

CODE OF FEDERAL REGULATIONS

Title 10 Energy

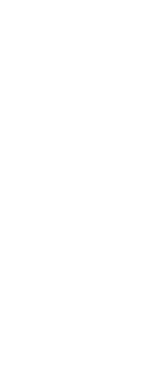

Part 500 to End

Revised as of January 1, 2016

Containing a codification of documents
of general applicability and future effect

As of January 1, 2016

Published by the Office of the Federal Register
National Archives and Records Administration
as a Special Edition of the Federal Register

U.S. GOVERNMENT OFFICIAL EDITION NOTICE

Legal Status and Use of Seals and Logos

The seal of the National Archives and Records Administration (NARA) authenticates the Code of Federal Regulations (CFR) as the official codification of Federal regulations established under the Federal Register Act. Under the provisions of 44 U.S.C. 1507, the contents of the CFR, a special edition of the Federal Register, shall be judicially noticed. The CFR is prima facie evidence of the original documents published in the Federal Register (44 U.S.C. 1510).

It is prohibited to use NARA's official seal and the stylized Code of Federal Regulations logo on any republication of this material without the express, written permission of the Archivist of the United States or the Archivist's designee. Any person using NARA's official seals and logos in a manner inconsistent with the provisions of 36 CFR part 1200 is subject to the penalties specified in 18 U.S.C. 506, 701, and 1017.

Use of ISBN Prefix

This is the Official U.S. Government edition of this publication and is herein identified to certify its authenticity. Use of the 0-16 ISBN prefix is for U.S. Government Publishing Office Official Editions only. The Superintendent of Documents of the U.S. Government Publishing Office requests that any reprinted edition clearly be labeled as a copy of the authentic work with a new ISBN.

Table of CFR Titles and Chapters	1087
Alphabetical List of Agencies Appearing in the CFR	1107
List of CFR Sections Affected	1117

Cite this Code: CFR

*To cite the regulations in
this volume use title,
part and section num-
ber. Thus, 10 CFR 500.1
refers to title 10, part
500, section 1.*

Explanation

The Code of Federal Regulations is a codification of the general and permanent rules published in the Federal Register by the Executive departments and agencies of the Federal Government. The Code is divided into 50 titles which represent broad areas subject to Federal regulation. Each title is divided into chapters which usually bear the name of the issuing agency. Each chapter is further subdivided into parts covering specific regulatory areas.

Each volume of the Code is revised at least once each calendar year and issued on a quarterly basis approximately as follows:

Title 1 through Title 16.....	as of January 1
Title 17 through Title 27.....	as of April 1
Title 28 through Title 41.....	as of July 1
Title 42 through Title 50.....	as of October 1

The appropriate revision date is printed on the cover of each volume.

LEGAL STATUS

The contents of the Federal Register are required to be judicially noticed (44 U.S.C. 1507). The Code of Federal Regulations is prima facie evidence of the text of the original documents (44 U.S.C. 1510).

HOW TO USE THE CODE OF FEDERAL REGULATIONS

The Code of Federal Regulations is kept up to date by the individual issues of the Federal Register. These two publications must be used together to determine the latest version of any given rule.

To determine whether a Code volume has been amended since its revision date (in this case, January 1, 2016), consult the "List of CFR Sections Affected (LSA)," which is issued monthly, and the "Cumulative List of Parts Affected," which appears in the Reader Aids section of the daily Federal Register. These two lists will identify the Federal Register page number of the latest amendment of any given rule.

EFFECTIVE AND EXPIRATION DATES

Each volume of the Code contains amendments published in the Federal Register since the last revision of that volume of the Code. Source citations for the regulations are referred to by volume number and page number of the Federal Register and date of publication. Publication dates and effective dates are usually not the same and care must be exercised by the user in determining the actual effective date. In instances where the effective date is beyond the cut-off date for the Code a note has been inserted to reflect the future effective date. In those instances where a regulation published in the Federal Register states a date certain for expiration, an appropriate note will be inserted following the text.

OMB CONTROL NUMBERS

The Paperwork Reduction Act of 1980 (Pub. L. 96-511) requires Federal agencies to display an OMB control number with their information collection request.

Many agencies have begun publishing numerous OMB control numbers as amendments to existing regulations in the CFR. These OMB numbers are placed as close as possible to the applicable recordkeeping or reporting requirements.

PAST PROVISIONS OF THE CODE

Provisions of the Code that are no longer in force and effect as of the revision date stated on the cover of each volume are not carried. Code users may find the text of provisions in effect on any given date in the past by using the appropriate List of CFR Sections Affected (LSA). For the convenience of the reader, a “List of CFR Sections Affected” is published at the end of each CFR volume. For changes to the Code prior to the LSA listings at the end of the volume, consult previous annual editions of the LSA. For changes to the Code prior to 2001, consult the List of CFR Sections Affected compilations, published for 1949-1963, 1964-1972, 1973-1985, and 1986-2000.

“[RESERVED]” TERMINOLOGY

The term “[Reserved]” is used as a place holder within the Code of Federal Regulations. An agency may add regulatory information at a “[Reserved]” location at any time. Occasionally “[Reserved]” is used editorially to indicate that a portion of the CFR was left vacant and not accidentally dropped due to a printing or computer error.

INCORPORATION BY REFERENCE

What is incorporation by reference? Incorporation by reference was established by statute and allows Federal agencies to meet the requirement to publish regulations in the Federal Register by referring to materials already published elsewhere. For an incorporation to be valid, the Director of the Federal Register must approve it. The legal effect of incorporation by reference is that the material is treated as if it were published in full in the Federal Register (5 U.S.C. 552(a)). This material, like any other properly issued regulation, has the force of law.

What is a proper incorporation by reference? The Director of the Federal Register will approve an incorporation by reference only when the requirements of 1 CFR part 51 are met. Some of the elements on which approval is based are:

- (a) The incorporation will substantially reduce the volume of material published in the Federal Register.
- (b) The matter incorporated is in fact available to the extent necessary to afford fairness and uniformity in the administrative process.
- (c) The incorporating document is drafted and submitted for publication in accordance with 1 CFR part 51.

What if the material incorporated by reference cannot be found? If you have any problem locating or obtaining a copy of material listed as an approved incorporation by reference, please contact the agency that issued the regulation containing that incorporation. If, after contacting the agency, you find the material is not available, please notify the Director of the Federal Register, National Archives and Records Administration, 8601 Adelphi Road, College Park, MD 20740-6001, or call 202-741-6010.

CFR INDEXES AND TABULAR GUIDES

A subject index to the Code of Federal Regulations is contained in a separate volume, revised annually as of January 1, entitled CFR INDEX AND FINDING AIDS. This volume contains the Parallel Table of Authorities and Rules. A list of CFR titles, chapters, subchapters, and parts and an alphabetical list of agencies publishing in the CFR are also included in this volume.

An index to the text of “Title 3—The President” is carried within that volume. The Federal Register Index is issued monthly in cumulative form. This index is based on a consolidation of the “Contents” entries in the daily Federal Register.

A List of CFR Sections Affected (LSA) is published monthly, keyed to the revision dates of the 50 CFR titles.

REPUBLICATION OF MATERIAL

There are no restrictions on the republication of material appearing in the Code of Federal Regulations.

INQUIRIES

For a legal interpretation or explanation of any regulation in this volume, contact the issuing agency. The issuing agency’s name appears at the top of odd-numbered pages.

For inquiries concerning CFR reference assistance, call 202-741-6000 or write to the Director, Office of the Federal Register, National Archives and Records Administration, 8601 Adelphi Road, College Park, MD 20740-6001 or e-mail fedreg.info@nara.gov.

SALES

The Government Publishing Office (GPO) processes all sales and distribution of the CFR. For payment by credit card, call toll-free, 866-512-1800, or DC area, 202-512-1800, M-F 8 a.m. to 4 p.m. e.s.t. or fax your order to 202-512-2104, 24 hours a day. For payment by check, write to: US Government Publishing Office – New Orders, P.O. Box 979050, St. Louis, MO 63197-9000.

ELECTRONIC SERVICES

The full text of the Code of Federal Regulations, the LSA (List of CFR Sections Affected), The United States Government Manual, the Federal Register, Public Laws, Public Papers of the Presidents of the United States, Compilation of Presidential Documents and the Privacy Act Compilation are available in electronic format via www.ofr.gov. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800, or 866-512-1800 (toll-free). E-mail, ContactCenter@gpo.gov.

The Office of the Federal Register also offers a free service on the National Archives and Records Administration’s (NARA) World Wide Web site for public law numbers, Federal Register finding aids, and related information. Connect to NARA’s web site at www.archives.gov/federal-register.

The e-CFR is a regularly updated, unofficial editorial compilation of CFR material and Federal Register amendments, produced by the Office of the Federal Register and the Government Publishing Office. It is available at www.ecfr.gov.

OLIVER A. POTTS,
Director,
Office of the Federal Register.
January 1, 2016.

THIS TITLE

Title 10—ENERGY is composed of four volumes. The parts in these volumes are arranged in the following order: parts 1-50, 51-199, 200-499 and part 500-end. The first and second volumes containing parts 1-199 are comprised of chapter I—Nuclear Regulatory Commission. The third and fourth volumes containing part 200-end are comprised of chapters II, III and X—Department of Energy, chapter XIII—Nuclear Waste Technical Review Board, and chapter XVII—Defense Nuclear Facilities Safety Board. The contents of these volumes represent all current regulations codified under this title of the CFR as of January 1, 2016.

For this volume, Michele Bugenhagen was Chief Editor. The Code of Federal Regulations publication program is under the direction of John Hyrum Martinez, assisted by Stephen J. Frattini.

Title 10—Energy

PART 500—DEFINITIONS

Sec.

500.1 Purpose and scope.

500.2 General definitions.

500.3 Electric regions—electric region groupings for reliability measurements under the Powerplant and Industrial Fuel Use Act of 1978.

AUTHORITY: Department of Energy Organization Act, Pub. L. 95-91, 91 Stat. 565 (42 U.S.C. § 7101 *et seq.*); Powerplant and Industrial Fuel Use Act of 1978, Pub. L. 95-620, 92 Stat. 3289 (42 U.S.C. 8301 *et seq.*); Energy Security Act, Pub. L. 96-294, 94 Stat. 611 (42 U.S.C. 8701 *et seq.*); E.O. 1209, 42 FR 46267, September 15, 1977.

SOURCE: 46 FR 59884, Dec. 7, 1981, unless otherwise noted.

(OMB Control No.: 1903-0075. See 46 FR 63209, Dec. 31, 1981.)

§ 500.1 Purpose and scope.

Unless otherwise expressly provided or the context clearly indicates otherwise, this section defines the terms used in these regulations. The use of the male gender is to include female; the use of singular to include plural.

§ 500.2 General definitions.

For purposes of this part and parts 501-507 term(s):

Act means Powerplant and Industrial Fuel Use Act of 1978, 42 U.S.C. 8301 *et seq.*

Action means a prohibition by rule or order, in accordance with sections 301(b) and (c) of FUA; any order granting or denying an exemption in accordance with sections 211, 212, 311 and 312 of FUA; a modification or rescission of any such order, or rule; an interpretation; a notice of violation; a remedial order; an interpretive ruling; or a rule-making undertaken by DOE.

Affiliate, when used in relation to person, means another person who controls, is controlled by, or is under common control, with such person.

Aggrieved, for purposes of administrative proceedings, describes and means a person (with an interest sought to be protected under FUA) who is adversely affected by an action proposed or undertaken by DOE.

Air pollution control agency means any of the following:

(1) A single State agency designated as the official State air pollution control agency;

(2) An agency established by two or more States and having substantial powers or duties pertaining to the prevention and control of air pollution;

(3) A city, county, or other local government health authority or, in the case of any city, county, or other local unit of government in which there is an agency other than the health authority charged with responsibility for enforcing ordinances or laws relating to the prevention and control of air pollution, such other agency; or

(4) An agency or two or more municipalities located in the same State or in different States and having substantial powers or duties pertaining to the prevention and control of air pollution.

Alternate fuel means electricity or any fuel, other than natural gas or petroleum. The term includes, but is not limited to:

(1) Coal;

(2) Solar energy;

(3) Petroleum coke; shale oil; uranium; biomass, tar sands, oil-impregnated diatomaceous earth; municipal, industrial, or agricultural wastes; wood; and renewable and geothermal energy sources (For purposes of this paragraph (3), the term *industrial* does not include refineries.);

(4) Liquid, solid or gaseous waste by-products of refinery or industrial operations which are commercially unmarketable, either by reason of quality or quantity. (For purposes of this paragraph (4), the term *waste by-product* is defined as an unavoidable by-product of the industrial or refinery operation.) A waste by-product of a refinery or industrial operation is commercially unmarketable if it meets the criteria listed in the definition of "commercial unmarketability," set forth below;

(5) Any fuel derived from an alternate fuel; and

(6) Waste gases from industrial operations. (For purposes of this subsection, the term *industrial* does not include refineries.)

§ 500.2

10 CFR Ch. II (1-1-16 Edition)

Applicable environmental requirements includes:

(1) Any standard, limitation, or other requirement established by or pursuant to Federal or State law (including any final order of any Federal or State Court) applicable to emissions of environmental pollutants (including air and water pollutants) or disposal of solid waste residues resulting from the use of coal or other alternate fuels, natural gas, or petroleum as a primary energy source or from the operation of pollution control equipment in connection with such use, taking into account any variance of law granted or issued in accordance with Federal law or in accordance with State law to the extent consistent with Federal law; and

(2) Any other standard, limitation, or other requirement established by, or pursuant to, the Clean Air Act, the Federal Water Pollution Control Act, the Solid Waste Disposal Act, the Resource Conservation and Recovery Act of 1976, or the National Environmental Policy Act of 1969.

Base load powerplant means a powerplant, the electrical generation of which in kilowatt hours exceeds, for any 12-calendar-month period, such powerplant's design capacity multiplied by 3,500 hours.

Boiler means a closed vessel in which water is heated electrically or by the combustion of a fuel to produce steam of one percent or more quality.

Btu means British thermal unit.

Capability to use alternate fuel, for the purposes of Title II prohibitions relating to construction of new powerplants, means the powerplant to be constructed:

(1) Has sufficient inherent design characteristics to permit the addition of equipment (including all necessary pollution devices) necessary to render such electric powerplant capable of using coal or another alternate fuel as its primary energy source; and

(2) Is not physically, structurally, or technologically precluded from using coal or another alternate fuel as its primary energy source.

Capability to use coal or another alternate fuel shall not be interpreted to require any such powerplant to be immediately able to use coal or another alternate fuel as its primary energy

source on its initial day of operation. In addition, the owner or operator of a baseload powerplant need not have adequate on-site space for either a coal gasifier or any facilities for handling coal or related fuels.

Certification means a document, signed by an official of the owner or operator, notarized, and submitted to OFE, which declares that a new powerplant will have the "capability to use alternate fuel" (as defined herein).

Certifying powerplant means an existing powerplant whose owner or operator seeks to obtain a prohibition order against the use of natural gas or petroleum either totally or in a mixture with coal or an alternate fuel by filing a certification as to both the technical capability and financial feasibility of conversion to coal or another alternate fuel pursuant to section 301 of FUA, as amended.

Clean Air Act means the Clean Air Act, 42 U.S.C. 7401 *et seq.* (1970), as amended by Public Law 93-319, 88 Stat. 246, and Public Law 95-91, 91 Stat. 685.

Coal means anthracite, bituminous and sub-bituminous coal, lignite, and any fuel derivative thereof.

Cogeneration facility means an electric powerplant that produces:

(1) Electric power; and

(2) Any other form of useful energy (such as steam, gas or heat) that is, or will be used, for industrial, commercial, or space heating purposes. In addition, for purposes of this definition, electricity generated by the cogeneration facility must constitute more than five (5) percent and less than ninety (90) percent of the useful energy output of the facility.

NOTE: Any cogeneration facility selling or exchanging less than fifty percent (50%) of the facility's generated electricity is considered an industrial cogenerator and is exempt from the fuel use prohibitions of FUA.

Combined cycle unit means an electric power generating unit that consists of a combination of one or more combustion turbine units and one or more steam turbine units with a substantial portion of the required energy input of the steam turbine unit(s) provided by the exhaust gas from the combustion turbine unit(s).

Substantial amounts of supplemental firing for a steam turbine or waste heat

Department of Energy

§ 500.2

boiler to improve thermal efficiency will not affect a unit's classification as a combined cycle unit.

Combustion turbine means a unit that is a rotary engine driven by a gas under pressure that is created by the combustion of any fuel.

Commercial unmarketability as used in the definitions of "alternate fuel," "natural gas" and "petroleum" shall be determined as follows:

(1) A waste by-product of industrial or refinery operations is commercially unmarketable by reason of:

(i) Quality, where the cost of processing (limited to upgrading the waste by-product to commercial quality), storing, and distributing the waste by-product would not be covered by reasonably expected revenues from its sale;

(ii) Quantity, where the cost of aggregating the waste by-product into commercial quantities through storing and distributing the waste by-product would not be covered by reasonably expected revenues from its sale.

(2) A fuel will not be classified as "natural gas" when it is commercially unmarketable by reason of:

(i) Quality, where the cost of producing, upgrading to commercial quality, storing, and distributing the fuel would not be covered by reasonably expected revenues from its sale; or

(ii) Quantity, where the quantities of the fuel are so small that the revenues to be reasonably expected from its sale would not cover the cost of its production, distribution or storage.

(3) Costs associated with upgrading, storing, distributing, and aggregating a by-product or other fuel (to determine if such fuel is natural gas) may properly include a reasonable rate of return on any capital investment required to overcome the problems posed by the quality or quantity of a fuel because the return on investment is a normal aspect of any investment decision. A firm may account for this reasonable rate of return by using its customary discount rate for an investment of similar risk.

(4) As part of any consideration of the rate of return on investment, the cost of replacing the Btu's lost if the by-product or other fuel were upgraded and sold instead of used as a fuel may

be taken into consideration. The actual expense that would result from burning a replacement fuel in lieu of the by-product or other fuel in question may therefore be considered. The costs associated with using a replacement fuel are indirect costs that result from upgrading and selling the fuel, instead of burning it. These indirect costs as well as the direct costs associated with the upgrading, storing, distributing, and aggregating of by-products or other fuel may be considered in any assessment of commercial unmarketability.

Conference means an informal meeting incident to any proceeding, between DOE and any interested person.

Construction means substantial physical activity at the unit site and includes more than clearance of a site or installation of foundation pilings.

Costs means total costs, both operating and capital, incurred over the estimated remaining useful life of an electric powerplant, discounted to the present, pursuant to rules established in parts 503 and 504 of these regulations.

DEOA means the Department of Energy Organization Act (Pub. L. 95-91) (42 U.S.C. 7101 *et seq.*) as implemented by Executive Order 12009 (42 FR 46267, September 15, 1977).

Design capability defined in section 103(a)(7) of FUA, shall be determined as follows:

(1) *Boiler and associated generator turbines.* The design fuel heat input rate of a steam-electric generating unit (Btu/hr) shall be the product of the generator's nameplate rating, measured in kilowatts, and 3412 (Btu/kWh), divided by the overall boiler-turbine-generator unit design efficiency (decimal); or if the generator's nameplate does not have a rating measured in kilowatts, the product of the generator's kilovolt-amperes nameplate rating, and the power factor nameplate rating; and 3412 (Btu/kWh), divided by the boiler turbine-generator unit's design efficiency (decimal). (The number 3412 converts kilowatt-hours (absolute) into Btu's (mean).)

(2) *Combustion turbine and associated generator.* The design fuel heat input rate of a combustion turbine (Btu/hr) shall be the product of its nameplate rating, measured in kilowatts, and 3412

(Btu/kWh), divided by the combustion turbine-generator unit's design efficiency (decimal), adjusted for peaking service at an ambient temperature of 59 degrees Fahrenheit (15 degrees Celsius) at the unit's elevation. (The number 3412 converts kilowatt-hours (absolute) into Btu's (mean).)

(3) *Combined cycle unit.* The design fuel heat input rate of a combined cycle unit (Btu/hr) shall be the summation of the product of its generator's nameplate rating, measured in kilowatts, and 3412 (Btu/kWh), divided by the overall combustion turbine-generator unit's efficiency (decimal), adjusted for peaking service at an ambient temperature of 59 degrees Fahrenheit (15 degrees Celsius) and at the unit's elevation, plus the product of the maximum fuel heat input to any supplemental heat recovery steam generator/boiler in gallons or pounds per hour and the fuel's heat content. If the generator's nameplate does not have a rating measured in kilowatts, the product of the generator's kilowatt-amperes nameplate rating and power factor nameplate rating must be substituted for kilowatts. (The number 3412 converts kilowatt-hours (absolute) into Btu's (mean).)

Design capacity of a powerplant pursuant to section 103(a)(18) of FUA, is determined according to 18 CFR 287.101.

DOE or the Department means the United States Department of Energy, as defined in sections 201 and 301(a) of the DEOA, including the Secretary of Energy or his designee.

Duly authorized representative means a person who is authorized to appear before DOE in connection with a proceeding on behalf of a person interested in or aggrieved by that proceeding. Such appearance may include the submission of applications, petitions, requests, statements, memoranda of law, other documents, or of a personal appearance, oral communication, or any other participation in a proceeding.

Electing powerplant means an existing powerplant, which (1) has been issued a proposed prohibition order under former section 301 (b) or (c) of FUA prior to August 13, 1981, the date of enactment of the Omnibus Budget Reconciliation Act of 1981, Public Law 97-35 (OBRA); and (2) files an election to

continue the current prohibition order proceeding under provisions of the former section 301 of FUA, rather than under amended section 301 of FUA.¹ Under the election provisions, an existing powerplant which has an order pending against it under section 2 of the Energy Supply and Environmental Coordination Act of 1974, as amended, 15 U.S.C. 791 *et seq.* (ESECA), as of August 13, 1981, may also elect to continue the current proceeding under section 2 of ESECA. Electing powerplants under ESECA are not included in the FUA definition of "electing powerplant". Relevant regulations governing ESECA proceedings are found at 10 CFR part 303 and 305. These elections must have been filed with DOE by November 30, 1981 in the case of FUA orders and by January 14, 1982 in the case of ESECA orders.

Electric generating unit does not include:

(1) Any electric generating unit subject to the licensing jurisdiction of the Nuclear Regulatory Commission (NRC); and

(2) Any cogeneration facility from which less than 50 percent of the net annual electric power generation is sold or exchanged for resale. Excluded from 'sold or exchanged for resale' are sales or exchanges to or with an electric utility for resale by the utility to the cogenerating supplier, and sales or exchanges among owners of the cogeneration facility.

NOTE: For purposes of subparagraph (1) of this definition, OFE will not consider any unit located at a site subject to NRC's licensing authority to be jurisdictional for purposes of FUA.

Electric powerplant means any stationary electric generating unit consisting of (a) a boiler, (b) a gas turbine, or (c) a combined cycle unit which employs a generator to produce electric power for purposes of sale or exchange and has the design capability of consuming any fuel (or mixture thereof) at a fuel heat input rate of 100 million Btu's per hour or greater. In accordance with section 103(a)(7)(C) of FUA, the Secretary has determined that it is

¹The election provisions are published at 46 FR 48118 (October 1, 1981) and will not be codified in the Code of Federal Regulations.

Department of Energy

§ 500.2

appropriate to exclude from this definition any unit which has a design capability to consume any fuel (including any mixture thereof) that does not equal or exceed 100 million Btu's per hour.

Electric Region is as defined in § 500.3 of this part.

Electric utility means any person, including any affiliate, or Federal agency, which sells electric power.

Emission offset means emission reductions as defined by EPA's regulations set forth at 40 CFR part 51, appendix S.

EPA means the United States Environmental Protection Agency.

ESECA means the Energy Supply and Environmental Coordination Act of 1974, as amended, 15 U.S.C. 791 *et seq.*

Existing powerplant means any powerplant other than a new powerplant.

Federal Water Pollution Control Act means the Federal Water Pollution Control Act, 33 U.S.C. 1251 *et seq.*, as amended.

FERC means the Federal Energy Regulatory Commission.

Firm means a parent company and the consolidated or unconsolidated entities (if any) that it directly or indirectly controls.

Fluidized bed combustion means combustion of fuel in connection with a bed of inert material, such as limestone or dolomite, that is held in a fluid-like state by the means of air or other gases being passed through such materials.

FTC means the Federal Trade Commission.

FUA means the Powerplant and Industrial Fuel Use Act of 1978, 42 U.S.C. 8301 *et seq.*

Fuel Use Act means *FUA*.

Fuel use order means a directive issued by OFE pursuant to § 501.167 of these regulations.

Gas turbine means "combustion turbine".

High-priority user, for purposes of subsection 312(j) of FUA, means any residential user of natural gas, or any commercial user whose consumption of natural gas on peak day is less than 50 MCF.

Internal combustion engine means a heat engine in which the combustion that generates the heat takes place inside the engine proper.

Interpretation means a written statement issued by the DOE General Counsel or his delegate, in response to a written request, that applies the regulations, rulings, and other precedents previously issued by the DOE to the particular facts of a prospective or completed act or transaction.

Mcf means 1,000 cubic feet of natural gas.

Mixture, when used in relation to fuels used in a unit, means a mixture of petroleum or natural gas and an alternate fuel, or a combination of such fuels, used simultaneously or alternately in such unit.

Natural gas means any fuel consisting in whole or in part of natural gas, including components of natural gas such as methane and ethane; liquid petroleum gas; synthetic gas derived from petroleum or natural gas liquids; or any mixture of natural gas and synthetic gas. Natural gas does not include:

(1) Gaseous waste by-products or waste gas specifically designated as an alternate fuel in § 500.2 of these regulations;

(2) Natural gas which is commercially unmarketable, as defined in these rules;

(3) Natural gas produced by the user from a well, the maximum efficient production rate of which is less than 250 million Btu's per day. For purposes of paragraph (3) of this definition:

(i) *Produced by the user* means:

(A) All gas produced by the well, when such gas is delivered for use in the user's facility through a gas delivery, gathering, or transportation system which could not deliver such gas to any other user; or

(B) Only that amount which represents the user's net working (mineral) interest in the gas produced from such well, where such gas is delivered for use in the user's facility through a gas delivery, gathering, or transportation system which could deliver such gas to any other user.

(ii) *Maximum efficient production rate* (MEPR) means that rate at which production of natural gas may be sustained without damage to the reservoir or the rate which may be sustained without damage to the ultimate recovery of oil or gas through the well.

§ 500.2

10 CFR Ch. II (1-1-16 Edition)

(4) Occluded methane in coal seams within the meaning of section 107(c)(3) of the Natural Gas Policy Act of 1978 (NGPA);

(5) The following gas from wells spudded prior to January 1, 1990:

(i) Gas produced from geopressurized brine, within the meaning of section 107(c)(2) of the NGPA;

(ii) Gas produced from Devonian shale, within the meaning of section 107(c)(4) of the NGPA;

(iii) Gas produced from tight sands, as designated by the FERC in accordance with section 107(c)(5) of the NGPA; and

(iv) Other gases designated by FERC as “high-cost natural gas” in accordance with section 107(c)(5) of the NGPA, except as specifically designated as “natural gas” by OFE;

(6)(i) Synthetic gas derived from coal or other alternate fuel, the heat content of which is less than 600 Btu’s per cubic foot at 14.73 pounds per square inch (absolute) and 60 °F; and

(ii) Commingled natural gas and synthetic gas derived from coal consumed as part of the necessary process of a major fuel burning installation used in the iron and steel industry, so long as the average annual Btu heat content of the commingled stream as consumed within a major fuel burning installation does not exceed 600 Btu’s per cubic foot at 14.73 pounds per square inch (absolute) and 60 °F;

(7) Mixtures of natural gas and synthetic gas derived from alternate fuels for which the person proposing to use the gas certifies to OFE that:

(i) He owns, or is entitled to receive at the point of manufacture, synthetic gas derived from alternate fuels;

(ii) He delivers, or arranges for the delivery of such synthetic gas to a pipeline which by transport or displacement is capable of delivering such synthetic gas, mixed with natural gas, to facilities owned by the user;

(iii) The total annual Btu content of the synthetic gas delivered to a pipeline is equal to or greater than the total annual Btu content of the natural gas delivered to the facilities owned by the user, plus the approximate total annual Btu content of any natural gas consumed or lost in transportation; and

(iv) All necessary permits, licenses, or approvals from appropriate Federal, State, and local agencies (including Indian tribes) have been obtained for construction and operation of the facilities for the manufacture of the synthetic gas involved, except that for purposes of the prohibition under section 201(2) of FUA against powerplants being constructed without the capability of using coal or another alternate fuel, only permits, licenses, and approvals for the construction of such synthetic gas facilities shall be required under this subparagraph, to be certified and documented; and

(8) A mixture of natural gas and an alternate fuel when such mixture is deliberately created for purposes of (i) Complying with a prohibition order issued pursuant to section 301(c) of the Act, or (ii) Qualifying for a fuel mixtures exemption under the Act, provided such exemption is granted.

NEPA means the National Environmental Policy Act of 1969, as amended, 42 U.S.C. 4321 *et seq.*

New electric powerplant means any electric powerplant: (1) That was not classified as existing under part 515 of this subchapter; (2) That was reconstructed, as defined in these rules under the definition of “reconstruction”; or (3) For which construction was begun after November 9, 1978.

NGPA means the Natural Gas Policy Act of 1978, 15 U.S.C. 3301 *et seq.*

Nonboiler means any powerplant which is not a boiler and consists of either a combustion turbine unit or combined cycle unit.

Notice of violation means a written statement issued to a person by DOE that states one or more alleged violations of the provisions of these regulations, any order issued pursuant thereto, or the Act.

OBRA means the Omnibus Budget Reconciliation Act of 1981, Public Law 97-35.

OFE means the Office of Fossil Energy of OFE.

Offset means “emission offset”.

Order means a final disposition, other than the issuance of a rule, issued by DOE pursuant to these regulations or the Act.

Person means any:

Department of Energy

§ 500.2

(1) Individual, corporation, company, partnership, association, firm, institution, society, trust, joint venture, or joint stock company;

(2) Any State; or

(3) Any Federal, State, or local agency or instrumentality (including any municipality) thereof.

Petroleum means crude oil and products derived from crude oil, other than:

(1) Petroleum products specifically designated as alternate fuels pursuant to these regulations;

(2) Synthetic gas derived from crude oil;

(3) Liquid petroleum gas;

(4) Petroleum coke or waste gases from industrial operations; and

(5) A liquid, solid, or gaseous waste by-product of refinery operations which is commercially unmarketable under the definition of "commercial unmarketability" in these rules.

NOTE: For the purposes of this subparagraph, waste by-products do not include components (such as butane and propane) that can be extracted from the waste by-product by reasonable further processing of the waste by-product at the refinery, nor do they include final products that use the waste by-product as a blend stock at the refinery.

Petition means a formal request for any action including an exemption submitted to DOE under these regulations.

Powerplant means "electric powerplant."

Product or process requirements means that product or process for which the use of an alternate fuel is not technically feasible due to the necessity to maintain satisfactory control of product quality and for which the substitution of steam is not technically feasible due to process requirements.

Primary energy source means the fuel or fuels used by any existing or new electric powerplant except:

(1) Minimum amounts of fuel required for unit ignition, startup, testing, flame stabilization, and control uses. OFE has determined that, unless need for a greater amount is demonstrated, twenty-five (25) percent of the total annual Btu heat input of a unit shall be automatically excluded under this paragraph.

(2) Minimum amounts of fuel required to alleviate or prevent:

(i) Unanticipated equipment outages as defined in §501.191 of these regulations; and

(ii) Emergencies directly affecting the public health, safety, or welfare that would result from electric power outages as defined in §501.191 of these regulations.

NOTE: (1) Any fuel excluded under the provisions of paragraph (1) of this definition is in addition to any fuel authorized to be used in any order granting a fuel mixtures exemption under parts 503 and 504 of these rules. The exclusion of fuel under paragraph (1), together with the authority for such additive treatment, shall apply to any jurisdictional facility, regardless of whether or not it had received an order granting an exemption as of the date these rules are promulgated.

(2) If an auxiliary unit to an electric powerplant consumes fuel only for the auxiliary functions of unit ignition, startup, testing, flame stabilization, and other control uses, its use of minimum amounts of natural gas or petroleum is not prohibited by FUA. The measurement of such minimum amounts of fuel is discussed in *Associated Electric Cooperative, et al., Interpretation 1980-42* [45 FR 82572, Dec. 15, 1980].

Prohibition order means:

(1) An order issued pursuant to section 301(b) of the Act that prohibits a powerplant from burning natural gas or petroleum as its primary energy source; or

(2) An order issued pursuant to section 301(c) of the Act that prohibits excessive use of natural gas or petroleum in mixtures burned by a powerplant as its primary energy source.

Rated capacity for the purpose of determining reduction in the rated capacity of an existing powerplant, means design capacity, or, at the election of the facility owner or operator, the actual maximum sustained energy output per unit of time that could be produced, measured in power output, expressed in kilowatts, per unit of time.

Reconstruction means the following:

(1) Except as provided in paragraph (2) of this definition, reconstruction shall be found to have taken place whenever the capital expenditures for refurbishment or modification of an electric powerplant on a cumulative basis for the current calendar year and

§ 500.3

preceding calendar year, are equal to or greater than fifty (50) percent of the capital costs of an equivalent replacement unit of the same capacity, capable of burning the same fuels.

(2) Notwithstanding paragraph (1) of this definition, reconstruction shall not be found to have taken place whenever:

(i) The capital expenditures for refurbishment or modification of an electric powerplant, on a cumulative basis for the current calendar year and preceding calendar year, are not greater than eighty (80) percent of the capital costs of an equivalent replacement unit of the same capacity, capable of burning the same fuels and the unit, as refurbished or modified, will not have a greater fuel consumption capability than the unit it replaces;

(ii) The unit being refurbished or modified was destroyed, in whole or substantial part, in a plant accident and the unit, as refurbished or modified, will not have a greater fuel consumption capability than the unit it replaces; or

(iii) Refurbishment or modification of the unit is undertaken primarily for the purpose of increasing fuel burning efficiency of the unit, and will not result in:

(A) Increased remaining useful plant life, or

(B) Increased total annual fuel consumption.

Resource Conservation and Recovery Act of 1976 means the Resource Conservation and Recovery Act of 1976, 42 U.S.C. 6901 *et seq.*

SIP means State Implementation Plan pursuant to section 10 of the Clean Air Act.

Site limitation means a specific physical limitation associated with a particular site that relates to the use of an alternate fuel as a primary energy source for the powerplant such as:

(1) Inaccessibility to alternate fuels;

(2) Lack of transportation facilities for alternate fuels;

(3) Lack of adequate land for facilities for the handling, use and storage of alternate fuels;

(4) Lack of adequate land or facilities for the control or disposal of wastes from such powerplant, including lack of land for pollution control equipment

10 CFR Ch. II (1-1-16 Edition)

or devices necessary to assure compliance with applicable environmental requirements; and

(5) Lack of an adequate and reliable supply of water, including water for use in compliance with applicable environmental requirements.

Solid Waste Disposal Act means the Solid Waste Disposal Act, 42 U.S.C. 6901 *et seq.*, as amended.

State regulatory authority means any State agency that acts as ratemaking or power supply authority with respect to the sale of electricity by any State regulated electric utility.

Synthetic fuel means any fuel derived from an alternate fuel and does not include any fuels derived from petroleum or natural gas.

Wetlands areas means, for purposes of section 103(a)(12) of the Act, those geographical areas designated as wetlands areas by State or local environmental regulatory authorities, or in the absence of any such geographic designation, those areas that are inundated by surface or ground water with frequency sufficient to support, and under normal circumstances does or would support, a prevalence of vegetation or aquatic life that requires saturated, seasonably saturated, or tidally saturated soil conditions for growth or reproduction.

(Department of Energy Organization Act, Pub. L. 95-91, 42 U.S.C. 7101 *et seq.*; Energy Supply and Environmental Coordination Act of 1974, Pub. L. 93-319, as amended by Pub. L. 94-163, Pub. L. 95-70, and Pub. L. 95-620, (15 U.S.C. 719 *et seq.*); Powerplant and Industrial Fuel Use Act of 1978, Pub. L. 95-620, as amended by Pub. L. 97-35 (42 U.S.C. 8301 *et seq.*); Omnibus Budget Reconciliation Act of 1981, Pub. L. 97-35)

[46 FR 59884, Dec. 7, 1981, as amended at 47 FR 15313, 15314, Apr. 9, 1982; 47 FR 17041, Apr. 21, 1982; 47 FR 29210, July 6, 1982; 47 FR 34972, Aug. 12, 1982; 54 FR 52889, Dec. 22, 1989]

§ 500.3 Electric regions—electric region groupings for reliability measurements under the Powerplant and Industrial Fuel Use Act of 1978.

(a) The following is a list of electric regions for use with regard to the Act. The regions are identified by FERC Power Supply Areas (PSA's) as authorized by section 202(a) of the Federal Power Act except where noted. They will be reviewed annually by ERA.

Department of Energy

Pt. 501

Each grouping meets one or more of the following criteria:

(1) Existing centrally dispatched pools and hourly power brokers;

(2) Systems with joint planning and construction agreements;

(3) Systems with coordination agreements in the areas of:

(i) Generation reserve and system reliability criteria;

(ii) Capacity and energy exchange policies;

(iii) Maintenance scheduling; and

(iv) Emergency procedures for dealing with capacity or fuel shortages; or

(4) Systems within the same National Electric Reliability Council (NERC) region with historical coordination policies.

(b) The PSA's referred to in the definition of electric regions in paragraph (a) of this section were first defined by the Federal Power Commission in 1936. The most recent reference to them is given in the *1970 National Power Survey*, Vol. 1, Pg. 1-3-16. In cases where a petitioner finds an ambiguity in a regional assignment, he shall consult with DOE for an official determination.

Electric Region Groupings and FERC PSA's:

1. Allegheny Power System (APS)—7, except Duquesne Light Company.

2. American Electric Power System (AEP)—entire AEP System.

3. New England Planning Pool (NEPOOL)—1, 2.

4. New York Planning Pool (NYPP)—3, 4.

5. Pennsylvania—New Jersey—Maryland interconnection (PJM)—5, 6.

6. Commonwealth Edison Company—14.

7. Florida Coordination Group (FCG)—24.

8. Middle South Utilities—25.

9. Southern Company—22, 23.

10. Gulf States Group—35.

11. Tennessee Valley Authority (TVA)—20.

12. Virginia—Carolina Group (VACAR)—18, 21.

13. Central Area Power Coordination Group (CAPCO)—Cleveland Electric Illuminating Company, Toledo Edison Company, Ohio Edison Company, Duquesne Light Company.

14. Cincinnati, Columbus, Dayton Group (CCD)—Cincinnati Gas and Electric Company, Columbus and Southern Ohio Electric Company, Dayton Power and Light Company.

15. Kentucky Group—19.

16. Indiana Group—Indiana Utilities except AEP.

17. Illinois—Missouri Group (ILLMO)—15, 40.

18. Michigan Electric Coordinated Systems (MECS)—11.

19. Wisconsin—Upper Michigan Group (WUMS)—13.

20. Mid-Continent Area Power Pool (MAAP)—16, 17, 26, 27, 28.

21. Missouri—Kansas Group (MOKAN)—24, 29.

22. Oklahoma Group—33, 36.

23. Texas Interconnected Systems (TIS)—37, 38.

24. Rocky Mountain Power Pool (RMPP)—31, 32.

25. Northwest Power Pool (NWPP)—30, 42, 43, 44, 45.

26. Arizona—New Mexico Group—39, 48 within Arizona, in Nevada and California.

27. Southern California—Nevada—47, 48.

28. Northern California—Nevada—46.

29. Alaska (non-interconnected systems to be considered separately)—49.

30. Idaho—Utah Group—41.

PART 501—ADMINISTRATIVE PROCEDURES AND SANCTIONS

Subpart A—General Provisions

Sec.

501.1 Purpose and scope.

501.2 Prepetition conference.

501.3 Petitions.

501.4-501.5 [Reserved]

501.6 Service.

501.7 General filing requirements.

501.8 [Reserved]

501.9 Effective date of orders or rules.

501.10 Order of precedence.

501.11 Address for filing documents.

501.12 Public files.

501.13 Appeal.

501.14 Notice to Environmental Protection Agency.

Subpart B [Reserved]

Subpart C—Written Comments, Public Hearings and Conferences During Administrative Proceedings

501.30 Purpose and scope.

501.31 Written comments.

501.32 Conferences (other than prepetition conferences).

501.33 Request for a public hearing.

501.34 Public hearing.

501.35 Public file.

Subpart D—Subpoenas, Special Report Orders, Oaths and Witnesses

501.40 Issuance.

Subpart E—Prohibition Rules and Orders

501.50 Policy.

§ 501.1

- 501.51 Prohibitions by order—electing powerplants.
- 501.52 Prohibitions by order—certifying powerplants.
- 501.53–501.56 [Reserved]

Subpart F—Exemptions and Certifications

- 501.60 Purpose and scope.
- 501.61 Certification contents.
- 501.62 Petition contents.
- 501.63 Notice of the commencement of an administrative proceeding on an exemption petition.
- 501.64 Publication of notice of availability of tentative staff analysis.
- 501.65 Publication of notice of availability of draft EIS.
- 501.66 OFE evaluation of the record, decision and order.
- 501.67 Petition redesignations.
- 501.68 Decision and order.
- 501.69 Judicial review.

Subpart G—Requests for Modification or Rescission of a Rule or Order

- 501.100 Purpose and scope.
- 501.101 Proceedings to modify or rescind a rule or order.
- 501.102 OFE evaluation of the record, decision and order for modification or rescission of a rule or order.
- 501.103 OFE decision.

Subpart H—Requests for Stay

- 501.120 Purpose and scope.
- 501.121 Filing and notice of petitions for stays.
- 501.122 Contents.
- 501.123 Evaluation of the record.
- 501.124 Decision and order.

Subpart I—Requests for Interpretation

- 501.130 Purpose and scope.
- 501.131 Filing a request for interpretation.
- 501.132 Contents of a request for interpretation.
- 501.133 DOE evaluation.
- 501.134 Issuance and effect of interpretations.

Subpart J—Rulings

- 501.140 Purpose and scope.
- 501.141 Criteria for issuance.
- 501.142 Modification or rescission.
- 501.143 Comments.

Subpart K—Enforcement

- 501.160 Purpose and scope.
- 501.161 Filing a complaint.
- 501.162 Contents of a complaint.
- 501.163 OFE evaluation.

10 CFR Ch. II (1–1–16 Edition)

- 501.164 Decision to initiate enforcement proceedings.
- 501.165 Commencement of enforcement proceedings.
- 501.166 Hearings and conferences.
- 501.167 Fuel use order.

Subpart L—Investigations, Violations, Sanctions and Judicial Actions

- 501.180 Investigations.
- 501.181 Sanctions.
- 501.182 Injunctions.
- 501.183 Citizen suits.

Subpart M—Use of Natural Gas or Petroleum for Emergency and Unanticipated Equipment Outage Purposes

- 501.190 Purpose and scope.
- 501.191 Use of natural gas or petroleum for certain unanticipated equipment outages and emergencies defined in section 103(a)(15)(B) of the act.
- 501.192 [Reserved]

AUTHORITY: 42 U.S.C. 7101 *et seq.*; 42 U.S.C. 8301 *et seq.*; 42 U.S.C. 8701 *et seq.*; E.O. 12009, 42 FR 46267; 28 U.S.C. 2461 note.

SOURCE: 46 FR 59889, Dec. 7, 1981, unless otherwise noted.

(OMB Control No.: 1903–0075. See 46 FR 63209, Dec. 31, 1981.)

Subpart A—General Provisions

§ 501.1 Purpose and scope.

Part 501 establishes the procedures to be used in proceedings before DOE under parts 500–508 of this chapter except as otherwise provided.

§ 501.2 Prepetition conference.

(a) Owners and operators of powerplants may request a prepetition conference with OFE for the purpose of discussing the applicability of 10 CFR parts 503 and 504 to their situations and the scope of any exemption or other petition that OFE would accept as adequate for filing purposes.

(b) The owner or operator who requests a prepetition conference may personally represent himself or may designate a representative to appear on his behalf. A prepetition conference or a request for a prepetition conference does not commence a proceeding before OFE.

(c) If OFE agrees to waive any filing requirements under § 501.3(d), a memorandum of record stating this fact will

Department of Energy

§ 501.7

be furnished to the potential petitioner within thirty (30) days after the conference. Copies of all applicable memoranda of record must be attached to any subsequently-filed petition.

(d) A record of all prepetition conferences will be included in the public file. OFE may provide for the taking of a formal transcript of the conference and the transcript will be included in the public file.

[46 FR 59889, Dec. 7, 1981, as amended at 54 FR 52891, Dec. 22, 1989]

§ 501.3 Petitions.

(a) *Filing of petitions.* Petitions for exemptions are to be filed with OFE at the address given in § 501.11.

(b) *Acceptance of petition.* (1) Upon acceptance (as distinguished from filing) of the petition, OFE shall publish in the FEDERAL REGISTER a Notice of Acceptance of Petition or, in the case of an exemption by certification, a Notice of Acceptance and Availability of Certification, signifying that an exemption proceeding has commenced.

(2) OFE will notify each petitioner in writing within thirty (30) days of receipt of the petition that it has been accepted or rejected and, if rejected, the reasons therefor.

(3) A petition, including supporting documents, will be accepted if the information contained appears to be sufficient to support an OFE determination. Additional information may be requested during the course of the proceeding, and failure to respond to such a request may ultimately result in denial of the requested exemption.

(4) Acceptance of petition does not constitute a determination that the requested exemption will be granted.

(c) *Rejection of petition.* (1) OFE will reject a petition if it does not meet the information of certification requirements established for the relevant exemptions under parts 503 and 504 of this chapter. A written explanation of the reasons for rejection will be furnished with notification of the rejection.

(2) A timely-filed petition rejected as inadequate will not be rendered untimely if resubmitted in amended form within ninety (90) days of the date of rejection.

(3) OFE will, within thirty (30) days of receipt of a petition that is found to

be incomplete due to minor deficiencies, notify the petitioner of the deficiencies and allow ninety (90) days from the date of notification to cure the specified deficiencies. The failure to cure the deficiencies during this time may result in denial of the requested exemption.

(d) *Waiver of filing requirements.* Upon its own motion or at the request of a petitioner, OFE may waive some or all of the regulatory requirements if the purposes of FUA would be best achieved by doing so.

§§ 501.4–501.5 [Reserved]

§ 501.6 Service.

(a) DOE will serve all orders, notices interpretations or other documents that it is required to serve, personally or by mail, unless otherwise provided in these regulations.

(b) DOE will consider service upon a petitioner's duly authorized representative to be service upon the petitioner.

(c) Service by mail is effective upon mailing.

[54 FR 52891, Dec. 22, 1989]

§ 501.7 General filing requirements.

Except as indicated otherwise, all documents required or permitted to be filed with OFE or DOE in connection with a proceeding under parts 503 and 504 shall be filed in accordance with the following provisions:

(a) *Filing of documents.* (1) Documents including, but not limited to, applications, requests, complaints, petitions (including petitions for exemption), and other documents submitted in connection therewith, filed with OFE are considered to be filed upon receipt.

(2) Notwithstanding the provisions of paragraph (a)(1) of this section, an application for modification or rescission in accordance with subpart G of this part, a reply to a notice of violation, a response to a denial of a claim of confidentiality, or a comment submitted in connection with any proceeding transmitted by registered or certified mail and addressed to the appropriate office is considered to be filed upon mailing.

(3) *Timeliness.* Documents are to be filed with the appropriate DOE or OFE office listed in § 501.11. Documents that

§ 501.7

10 CFR Ch. II (1-1-16 Edition)

are to be considered filed upon receipt under paragraph (a)(1) of this section and that are received after regular business hours are deemed filed on the next regular business day. Regular business hours are 8 a.m. to 4:30 p.m.

(4) *Computation of time.* In computing any period of time prescribed or allowed by FUA, these regulations or by an order, the day of the act, event, or default from which the designated period of time begins to run is not to be included. The last day of the period so computed is to be included unless it is a Saturday, Sunday, or Federal legal holiday in which event the period runs until the end of the next day that is neither a Saturday, Sunday, nor a Federal legal holiday.

(5) *Additional time after service by mail.* Whenever a person is required to perform an act, to cease and desist therefrom, or to initiate a proceeding under this part within a prescribed period of time and the order, notice, interpretation or other document is served by mail, three (3) days shall be added to the prescribed period.

(6) *Extension of time.* When a document is required to be filed within a prescribed time, an extension of time to file may be granted upon good cause shown.

(7) *Signing.* All applications, petitions, requests, comments, and other documents that are required to be signed, shall be signed by the person filing the document or a duly authorized representative. Any application, petition, request, complaint, or other document filed by a duly authorized representative shall contain a statement by such person certifying that he is a duly authorized representative, unless an OFE form otherwise requires. (A false certification is unlawful under the provisions of 18 U.S.C. 1001 (1970).)

(8) *Labeling.* An application, petition, or other request for action by DOE or OFE should be clearly labeled according to the nature of the action involved, e.g., "Petition for Temporary Exemption;" "Petition for Extension (or Renewal) of Temporary Exemption," both on the document and on the outside of the envelope in which the document is transmitted.

(9) *Obligation to supply information.* A person who files an application, peti-

tion, complaint, or other request for action is under a continuing obligation during the proceeding to provide DOE or OFE with any new or newly discovered information that is relevant to that proceeding. Such information includes, but is not limited to, information regarding any other application, petition, complaint, or request for action that is subsequently filed by that person with any DOE office or OFE office.

(10) *The same or related matters.* In filing a petition or other document requesting OFE action, the person must state whether, to the best of his knowledge, the same or a related issue, act or transaction has been or presently is being considered or investigated by a DOE office, other Federal agency, department or instrumentality, or a State or municipal agency.

(11) *Request for confidential treatment.*
(i) If any person filing a document with DOE or OFE claims that some or all of the information contained in the document is exempt from the mandatory public disclosure requirements of the Freedom of Information Act (5 U.S.C. 552); is information referred to in 18 U.S.C. 1905; or is otherwise exempt by law from public disclosure, and if such person requests DOE or OFE not to disclose such information, such person shall make a filing in accordance with paragraph (b)(2) of this section. The person shall indicate in the original document that it is confidential or contains confidential information and may file a statement specifying the justification for non-disclosure of the information for which confidential treatment is claimed. If the person states that the information comes within the exception in 5 U.S.C. 552(b)(4) for trade secrets and commercial or financial information, such person shall include a statement specifying why such information is privileged or confidential. If a document is not so filed, OFE may assume that there is no objection to public disclosure of the document in its entirety, unless the person subsequently files a claim of confidentiality prior to public disclosure of the document.

(ii) DOE or OFE retains the right to make its own determination with regard to any claim of confidentiality.

Department of Energy

§ 501.14

Notice of the decision by DOE or OFE to deny such claim, in whole or in part, and an opportunity to respond or take other appropriate action to avoid release shall be given to a person claiming confidentiality of information no less than seven (7) days prior to its public disclosure.

(iii) The above provisions in paragraphs (a)(11) (i) and (ii) of this section do not apply to information submitted on OFE forms that contain their own instructions concerning the treatment of confidential information.

(12) *Separate applications, petitions or requests.* Each application, petition, or request for DOE or OFE action shall be submitted as a separate document, even if the applications, petitions, or requests deal with the same or a related issue, act, or transaction, or are submitted in connection with the same proceeding.

(b) *Number of documents to be filed.* (1) A petitioner must file an executed original and fourteen (14) copies of all exemption requests submitted to DOE. For certification requests, an original and three (3) copies shall be submitted.

(2) Where the petitioner requests confidential treatment of some or all of the information submitted, an original and eleven (11) copies of the confidential document and three (3) copies of the document with confidential material deleted must be filed.

[46 FR 59889, Dec. 7, 1981, as amended at 47 FR 15314, Apr. 9, 1982; 54 FR 52891, Dec. 22, 1989]

§ 501.8 [Reserved]

§ 501.9 Effective date of orders or rules.

(a) When OFE issues a rule or order imposing a prohibition or granting an exemption (or permit) under FUA, the rule or order will be effective sixty (60) days after publication in the FEDERAL REGISTER, unless it is stayed, modified, suspended or rescinded.

(b) If the appropriate State regulatory authority has not approved a powerplant for which a petition has been filed, such exemption, to the extent it applies to the prohibition under section 201 of FUA against construction without the capability of using coal or another alternate fuel, shall

not take effect until all approvals required by such State regulatory authority which relate to construction have been obtained.

[54 FR 52891, Dec. 22, 1989]

§ 501.10 Order of precedence.

If there is any conflict or inconsistency between the provisions of this part and any other provisions or parts of this chapter, except for general procedures which are unique to part 515 of this chapter, the provisions of this part will control respect to procedure.

[54 FR 52891, Dec. 22, 1989]

§ 501.11 Address for filing documents.

Send all petitions, self-certifications and written communications to the following address: Office of Fossil Energy, Office of Fuels Programs, Coal and Electricity Division, Mail Code FE-52, 1000 Independence Avenue, SW., Washington, DC 20585.

[54 FR 52891, Dec. 22, 1989]

§ 501.12 Public files.

DOE will make available at the Freedom of Information reading room, room 1E190, 1000 Independence Avenue SW., Washington, DC for public inspection and copying any information required by statute and any information that OFE determines should be made available to the public.

[54 FR 52891, Dec. 22, 1989]

§ 501.13 Appeal.

There is no administrative appeal of any final administrative action to which this part applies.

§ 501.14 Notice to Environmental Protection Agency.

A copy of any proposed rule or order that imposes a prohibition, order that imposes a prohibition, or a petition for an exemption or permit, shall be transmitted for comments, if any, to the Administrator and the appropriate Regional Administrator of the Environmental Protection Agency (EPA). The Administrator of EPA shall be given the same opportunity to comment and question as is given other interested persons.

[54 FR 52891, Dec. 22, 1989]

Subpart B [Reserved]**Subpart C—Written Comments,
Public Hearings and Con-
ferences During Administra-
tive Proceedings****§ 501.30 Purpose and scope.**

This subpart establishes the procedures for requests for and the conduct of public hearings; for submission of written comments; and for requests for and conduct of conferences pursuant to an administrative proceeding before OFE. Hearings shall be convened at the request of any interested person, in accordance with section 701(d) of FUA, and shall be held at a time and place to be decided by the Presiding Officer.

§ 501.31 Written comments.

(a) *New facilities.* Except as may be provided elsewhere in these regulations, OFE shall provide a period of at least forty-five (45) days, commencing with publication of the Notice of Acceptance of Petition, of in the case of certification exemptions, Notice of Acceptance and availability of Certification, in the FEDERAL REGISTER in accordance with § 501.63(a), for submission of written comments concerning a petition for an exemption. Written comments shall be made in accordance with § 501.7.

(b) *Existing facilities.* Except as may be provided elsewhere in these regulations, OFE shall provide a period of at least 45 days for submission of written comments concerning a proposed prohibition rule or order or a petition for a permit. In the case of a proposed prohibition rule or order issued to an existing electing powerplant, OFE shall also provide for a period of at least 45 days for submission of written comments concerning a Tentative Staff Analysis. This period shall commence on the day after publication of the Notice of Availability of the Tentative Staff Analysis in the FEDERAL REGISTER. In the case of prohibition order proceedings for certifying powerplants under section 301 of FUA, as amended, OFE shall provide a period of at least 45 days, beginning the day after the Notice of Acceptance of certification is published, for submission of written

comments concerning the certification and OFE's proposed prohibition order, and requests for public hearings. Prohibition order proceedings under section 301, as amended by OBRA, will have only one period of 45 days, since no Tentative Staff Analysis will be prepared. The comment period may be extended by OFE in accordance with § 501.7. See § 501.52(b) of this part for further information with respect to the comment period. Written comments shall be filed in accordance with § 501.7.

(Department of Energy Organization Act, Pub. L. 95-91, 91 Stat. 565 (42 U.S.C. 7101 *et seq.*); Powerplant and Industrial Fuel Use Act of 1978, Pub. L. 95-620, 92 Stat. 3289 (42 U.S.C. 8301 *et seq.*); Omnibus Budget Reconciliation Act of 1981 (Pub. L. 97-35); E.O. 12009, 42 FR 46267, Sept. 15, 1977)

[46 FR 59889, Dec. 7, 1981, as amended at 47 FR 50848, Nov. 10, 1982; 54 FR 52892, Dec. 22, 1989]

**§ 501.32 Conferences (other than
prepetition conferences).**

(a) At any time following commencement of a proceeding before OFE, an interested person may request a conference with the staff of OFE to discuss a petition, permit or any other issue pending before OFE. The request for a conference should generally be in writing and should indicate the subjects to be covered and should describe the requester's interest in the proceeding. Conferences held after the commencement of an administrative proceeding before OFE shall be convened at the discretion of OFE or the Presiding Officer.

(b) When OFE convenes a conference in accordance with this section, any person invited may present views as to the issue or issues involved. Documentary evidence may be submitted at the conference and such evidence, to the extent that it is not deemed to be confidential, will be included in the administrative record. OFE will not normally have a transcript of the conference prepared but may do so at its discretion.

(c) Because a conference is solely for the exchange of views incident to a proceeding, there will be no formal report or findings by OFE unless OFE in its discretion determines that the preparation of a report or findings would be

Department of Energy

§ 501.34

advisable. OFE will, however, place in the public file a record of any conference.

§ 501.33 Request for a public hearing.

(a) *New facilities.* In the case of a petition for an exemption under title II of FUA, any interested person may submit a written request that OFE convene a public hearing in accordance with section 701 of FUA no later than forty-five (45) days after publication of either the Notice of Acceptance of a petition, or in the case of a certification exemption, the publication of the Notice of Acceptance of Certification. This time period may be extended at the discretion of OFE.

(b) *Existing powerplants.* In the case of a petition for an exemption from a prohibition imposed by a final rule or order issued by OFE to an electing powerplant under former sections of title III of FUA or a petition for a permit under §504.1, any interested person may submit a written request that OFE convene a public hearing in accordance with section 701 of FUA within 45 days after the notice of the filing of a petition is published in the FEDERAL REGISTER. In the case of a proposed prohibition rule or order issued to an electing powerplant under former section 301, the 45 day period in which to request a public hearing shall commence upon the publication of the Notice of Availability of the Tentative Staff Analysis. In the case of a proposed prohibition order to be issued to certifying powerplants under section 301 of FUA, as amended, the 45 day period in which to request a public hearing commences upon publication of the Notice of Acceptance of Certification. This time limit may be extended at the discretion of OFE in accordance with §501.7.

(c) *Contents of request.* A request for a public hearing must be in writing and must include a description of the requesting party's interest in the proceeding and a statement of the issues involved. The request should, to the extent possible, identify any witnesses that are to be called, summarize the anticipated testimony to be given at

the hearing, and outline questions that are to be posed.

(Department of Energy Organization Act, Pub. L. 95-91, 91 Stat. 565 (42 U.S.C. 7101 *et seq.*); Powerplant and Industrial Fuel Use Act of 1978, Pub. L. 95-620, 92 Stat. 3269 (42 U.S.C. 8301 *et seq.*); Omnibus Budget Reconciliation Act of 1981 (Pub. L. 97-35); E.O. 12009, 42 FR 46267, Sept. 15, 1977)

[46 FR 59889, Dec. 7, 1981, as amended at 47 FR 50848, Nov. 10, 1982; 54 FR 52892, Dec. 22, 1989]

§ 501.34 Public hearing.

(a) A public hearing under this subsection is for the purpose of insuring that all issues are fully and properly developed, but is not a formal adjudicatory hearing subject to the provisions of 5 U.S.C. 554 and 556.

(b) *Opportunity to be heard at a public hearing.* (1) Any interested person, may request, and OFE will provide, an opportunity to present oral or written data, views and arguments at a public hearing on any proposed prohibition rule or order, or on any petition for an exemption or permit. An interested person may file a request to be listed as a party to a hearing on the service list prepared by the Presiding Officer pursuant to §501.34(d) of this part.

(2) Participants at the public hearing will have an opportunity to present oral or written data, views and arguments.

(3) A request for a public hearing may be withdrawn by the requestor at any time. If other persons have requested to participate as parties in the public hearing, OFE may cancel the hearing only if all parties agree to cancellation. OFE will give notice, whenever possible, in the FEDERAL REGISTER of the cancellation of any hearings for which there has been prior notice.

(c) *Presiding Officer.* OFE will appoint a Presiding Officer to conduct the public hearing.

(d) *Powers of the Presiding Officer.* The Presiding Officer is responsible for orderly conduct of the hearing and for certification of the record of the public hearing. The Presiding Officer will not prepare any recommended findings, conclusions, or any other recommendations for disposition of a particular

§ 501.34

10 CFR Ch. II (1–1–16 Edition)

case, except those of a procedural nature. The Presiding Officer has, but is not limited to the following powers:

- (1) Administer oaths, affirmations and protective orders;
- (2) Issue administrative subpoenas and rule on motions to modify or withdraw subpoenas that he has issued;
- (3) Rule on questions as to relevance and materiality of evidence;
- (4) Regulate the course of the public hearing;
- (5) Hold conferences for the simplification of issues by consent of the parties;
- (6) Require submission of evidence in writing where appropriate;
- (7) Establish service lists;
- (8) Dispose of procedural requests and similar matters; and
- (9) Take other actions authorized by these rules.

The Presiding Officer may also limit the number of witnesses to be presented by any party and may impose reasonable time limits for testimony. The Presiding Officer shall establish and maintain a service list that contains the names and addresses of all parties to the OFE proceeding. At the time the Presiding Officer certifies the record, he will provide the staff of OFE with an index of the issues addressed in the record.

(e) *Notice.* OFE will convene a public hearing only after publishing a notice in the FEDERAL REGISTER that states the time, place and nature of the public hearing.

(f) *Opportunity to question at the public hearing.* At any public hearing requested pursuant to paragraph (b) of this section, with respect to disputed issues of material fact, OFE will provide any interested person an opportunity to question:

- (1) Other interested persons who make oral presentations;
- (2) Employees and contractors of the United States who have made written or oral presentations or who have participated in the development of the proposed rule or order or in the consideration of the petition for an exemption or permit; and
- (3) Experts and consultants who have provided information to any person who makes an oral presentation and

which is contained in or referred to in such presentation.

(g) OFE encourages persons who wish to question Government witnesses to submit their questions at least ten (10) days in advance of the hearing.

(h) The Presiding Officer will allow questions by any interested person to be asked of those making presentations or submitting information, data, analyses or views at the hearing. The Presiding Officer may restrict questioning if he determines that such questioning is duplicative or is not likely to result in a timely and effective resolution of issues pending in the administrative proceeding for which the hearing is being conducted.

(i) The Presiding Officer or OFE may exercise discretion to control a hearing by denying, temporarily or permanently, the privilege of participating in a particular OFE hearing if OFE finds, for example, that a person:

- (1) Has knowingly made false or misleading statements, either orally or in writing;
- (2) Has knowingly filed false affidavits or other writings;
- (3) Lacks the specific authority to represent the person seeking an OFE action; or
- (4) Has disrupted or is disrupting a hearing.

(j) *Evidence.* (1) The Presiding Officer is responsible for orderly submission of information, data, materials, views or other evidence into the record of the public hearing. The Presiding Officer may exclude any evidence that is irrelevant, immaterial or unduly repetitious. Judicial rules of evidence do not apply.

(2) Documentary material must be of a size consistent with ease of handling, transportation and filing, and a reasonable number of copies should be made available at the public hearing for the use of interested persons. An original and fourteen (14) copies shall be furnished to the Presiding Officer and one copy to each party listed on the service list. Large exhibits that are used during the hearing must be provided on no larger than 11½" × 14" legal size paper if they are to be submitted into the hearing record.

(k) *Hearing record.* OFE will have a verbatim transcript made of the public

Department of Energy

§ 501.50

hearing. The hearing record shall remain open for a period of fourteen (14) days following the public hearing, unless extended by OFE, during which time the participants at the hearing may submit additional written statements which will be made part of the administrative record and will be served by the Presiding Officer upon those parties listed on the service list. OFE may also request additional information, data or analysis following the hearing in order to resolve disputed issues in the record. If OFE receives or obtains any relevant information or evidence that is placed in the record after the close of the public hearing or comment period, it will so notify all participants, and allow an additional fourteen (14) days for submission of evidence in rebuttal. In addition, OFE may, in its discretion, re-open the hearing at the request of a party or participant, to permit further rebuttal of evidence or statements submitted to OFE and made part of the hearing record after the close of the hearing. The transcript, together with any written comments submitted in the course of the proceeding, will be made part of the record available for public inspection and copying at the OFE Public Information Office, as provided in § 501.12.

§ 501.35 Public file.

(a) *Contents.* The public file shall consist of the rule, order, or petition, with supporting data and supplemental information, and all data and information submitted by interested persons. Materials which are claimed by any party to be exempt from public disclosure under the Freedom of Information Act (5 U.S.C. 552) shall be excised from the public file provided OFE has made a determination that the material is confidential in accordance with § 501.7(a)(11) of this part.

(b) *Availability.* The public file shall be available for inspection at room 1E190, 1000 Independence Avenue SW., Washington, DC. Photocopies may be made available, on request. The charge for such copies shall be made in accordance with a written schedule.

[46 FR 59889, Dec. 7, 1981, as amended at 54 FR 52892, Dec. 22, 1989]

Subpart D—Subpoenas, Special Report Orders, Oaths and Witnesses

§ 501.40 Issuance.

(a) *Authority.* As authorized by section 711 of FUA and section 645 of the DEOA, the Administrator, his duly authorized agent or a Presiding Officer may, in accordance with 10 CFR 205.8, sign, issue, and serve subpoenas; issue special report orders (SRO); administer oaths and affirmations; take sworn testimony, compel attendance of and sequester witnesses; control the dissemination of any record of testimony taken pursuant to this section; and subpoena and reproduce books, papers, correspondence, memoranda, contracts, agreements, or other relevant records of tangible evidence including, but not limited to, information retained in computerized or other automated systems in the possession of the subpoenaed person.

(b) *Petition to withdraw or modify.* Prior to the time specified for compliance in the subpoena or SRO, the person to whom the subpoena or SRO is directed may apply for its withdrawal or modification as provided in 10 CFR 205.8, except that if the subpoena or SRO is issued by a duly appointed Presiding Officer, the request to withdraw or modify must be addressed to that Presiding Officer, and its grant or denial will be decided by him.

Subpart E—Prohibition Rules and Orders

§ 501.50 Policy.

Except in conjunction with a prohibition order requested by the intended recipient, OFE shall not propose to prohibit or prohibit by rule or order the use of petroleum or natural gas either as a primary energy source or in amounts in excess of the minimum amount necessary to maintain reliability of operation consistent with reasonable fuel efficiency in an existing installation unless and until OFE adopts rules establishing regulatory requirements governing the issuance of such orders and rules in accordance

§ 501.51

10 CFR Ch. II (1–1–16 Edition)

with the applicable procedural and substantive requirements of law.

(Department of Energy Organization Act, Pub. L. 95–91, 91 Stat. 565 (42 U.S.C. 7101 *et seq.*); Powerplant and Industrial Fuel Use Act of 1978, Pub. L. 95–620, 92 Stat. 3269 (42 U.S.C. 8301 *et seq.*); Omnibus Budget Reconciliation Act of 1981 (Pub. L. 97–35); E.O. 12009, 42 FR 46267, Sept. 15, 1977)

[47 FR 50848, Nov. 10, 1982]

§ 501.51 Prohibitions by order—electing powerplants.

(a) OFE may prohibit by order the use of petroleum or natural gas as a primary energy source or in amounts in excess of the minimum amount necessary to maintain reliability of operation consistent with reasonable fuel efficiency in an electing powerplant, if:

(1) That facility has not been identified as a member of a category subject to a final rule at the time of the issuance of such order; and

(2) The requirements of § 504.6 have been met.

(b) *Notice of order and public participation.* (1) OFE may hold a conference with the proposed order recipient prior to issuing the proposed order.

(2) Pursuant to section 701 of FUA, prior to the issuance of a final order to an electing powerplant, OFE shall publish a proposed order in the FEDERAL REGISTER together with a statement of the reasons for the order. In the case of a proposed order that would prohibit the use of petroleum or natural gas as a primary energy source, the finding required by former section 301(b)(1) of the Act shall be published with such proposed order.

(3) OFE shall provide a period for the submission of written comments of at least three months after the date of the proposed order. During this period, the recipient of the proposed order and any other interested person must submit any evidence that they have determined at that time to support their respective positions as to each of the findings that OFE is required to make under section 301(b) of the Act. A proposed order recipient may submit additional new evidence at any time prior to the close of the public comment period which follows publication of the Tentative Staff Analysis or prior to the close of the record of any public hear-

ing, whichever occurs later. A request by the proposed order recipient for an extension of the three-month period may be granted at OFE's discretion.

(4) Subsequent to the end of the comment period, OFE will issue a notice of whether OFE intends to proceed with the prohibition order proceeding.

(5) An owner or operator of a facility that may be subject to an order may demonstrate prior to issuance of a final prohibition order that the facility would qualify for an exemption if the prohibition had been established by rule. OFE will not delay the issuance of a final prohibition order or stay the effective date of such an order for the purpose of determining whether a proposed order recipient qualifies for a particular exemption unless the demonstration or qualification is submitted prior to or during the second three-month comment period, commencing after issuance of a notice of intention to proceed, or unless materials submitted after the period (i) could not have been submitted during the period through the exercise of due diligence, (ii) address material changes in fact or law occurring after the close of the period, or (iii) consist of amplification or rebuttal occasioned by the subsequent course of the proceeding. A request by the proposed order recipient for an extension of this time period may be granted at OFE's discretion.

(6) Subsequent to the end of the second three (3) month period, OFE will, if it intends to issue a final prohibition order, prepare and issue a Notice of Availability of a Tentative Staff Analysis. Interested persons wishing a hearing must request a hearing within forty-five (45) day after issuance of the Notice of Availability of the Tentative Staff Analysis. During this forty-five (45) days period, interested persons may also submit written comments on the Tentative Staff Analysis.

(7) If a hearing has been requested, OFE shall provide interested persons with an opportunity to present oral data, views and arguments at a public hearing held in accordance with subpart C of this part. The hearing will consider the findings which OFE must make in order to issue a final prohibition order and any exemption for which the proposed order recipient submitted

Department of Energy

§ 501.52

its demonstration in accordance with paragraph (b)(5) of this section.

(8) Upon request by the recipient of the proposed prohibition order, the combined public comment periods provided for in this section may be reduced to a minimum of forty-five (45) days from the time of publication of the proposed order.

(9) OFE may terminate a prohibition order proceeding at any time prior to the date upon which a final order shall become effective. Should OFE terminate the proceeding, it will notify the proposed order recipient, and publish a notice in the FEDERAL REGISTER.

(c) *Decision to issue a final order.* (1) OFE will base its determination to issue an order on consideration of the whole record or those parts thereof cited by a party and supported by and in accordance with reliable, probative and substantial evidence.

(2) OFE shall include in the final order a written statement of the pertinent facts, a statement of the basis upon which the final order is issued, a recitation of the conclusions regarding the required findings and qualifications for exemptions. The final order shall state the effective date of the prohibition contained therein. If it is demonstrated that the facility would have been granted a temporary exemption, the effective date of the prohibition contained in the final order shall be delayed until such time as the temporary exemption would have terminated. If it is demonstrated that a facility will need a period of time to comply with the final order, the effective date of the prohibition contained in the final order may be delayed, in OFE's discretion, so as to allow an order recipient to comply with the final order.

(3) OFE will enclose with a copy of the final order, where appropriate, a schedule of steps that should be taken by a stated date (a compliance schedule) to ensure that the affected facility will be able to comply with the prohibitions stated in the order by the effective date of the prohibition contained in the final order. The compliance schedule may require the affected person to take steps with regard to a unit 60 days after service of the final order.

(4) A copy of the final order and a summary of the basis therefore will be

published in the FEDERAL REGISTER. The order will become effective 60 days after publication in the FEDERAL REGISTER.

(d) *Request for order.* (1) A proceeding for issuance of a prohibition order to a specific unit may be commenced by OFE, in its sole discretion, in response to a request for an order filed by the owner or operator of a facility.

(2) A petition requesting OFE to commence a prohibition order proceeding should include the following information for all units to be covered by the prohibition order:

(i) A statement of the reasons the owner or operator is seeking the issuance of a prohibition order; and

(ii) Sufficient information for OFE to make the findings required by section 301(b) of FUA.

(3) If OFE determines to accept the request, OFE shall publish a proposed order in the FEDERAL REGISTER together with a statement of the reasons for the order.

(Department of Energy Organization Act, Pub. L. 95-91, 91 Stat. 565 (42 U.S.C. 7101 *et seq.*); Energy Supply and Environmental Coordination Act of 1974, Pub. L. 93-319, as amended by Pub. L. 94-163, Pub. L. 95-70, (15 U.S.C. 719 *et seq.*); Powerplant and Industrial Fuel Use Act of 1978, Pub. L. 95-620, 92 Stat. 3269 (42 U.S.C. 8301 *et seq.*); Omnibus Budget Reconciliation Act of 1981, (Pub. L. 97-35); E.O. 12009, 42 FR 46267, Sept. 15, 1977)

[46 FR 59889, Dec. 7, 1981, as amended at 47 FR 17042, Apr. 21, 1982; 47 FR 50848, Nov. 10, 1982; 54 FR 52892, Dec. 22, 1989]

§ 501.52 Prohibitions by order—certifying powerplants.

(a) OFE may prohibit by order the use of petroleum or natural gas as a primary energy source or in amounts in excess of the minimum amount necessary to maintain reliability of operation consistent with maintaining reasonable fuel efficiency in an existing powerplant if the owner or operator of the powerplant certifies, and OFE concurs in such certification in accordance with the requirements of §§ 504.5, 504.6 and 504.8.

(b) *Notice of order and participation.* (1) OFE may hold a conference with the

§ 501.52

10 CFR Ch. II (1–1–16 Edition)

proposed order recipient, at the recipient's election, prior to issuing the proposed order. The conference may resolve any questions regarding the certification required by section 301 of the Act, as amended, and §§ 504.5, 504.6, and 504.8, and OFE's review and concurrence therein.

(2) Pursuant to section 701(b) of FUA, prior to the issuance of a final order to a certifying powerplant owner or operator, OFE must publish in the FEDERAL REGISTER, a proposed prohibition order stating the reasons for such order. OFE will review all of the information submitted by a proposed order recipient within 60 days after receipt by OFE. If the certification is complete, OFE will, within 30 days after the end of the 60 day review period, publish in the FEDERAL REGISTER a Notice of Acceptance of certification together with a proposed prohibition order stating therein the reasons for such order. This commences the prohibition order proceeding. If OFE does not believe it is able to concur in the certification, OFE shall notify the proposed order recipient and shall publish a Notice of Proposed Non-Concurrence in the FEDERAL REGISTER within 30 days after the end of the 60 day review period. If OFE finds that the certification with compliance schedule is incomplete, OFE will notify the proposed prohibition order recipient as to the deficiencies, and provide an additional period of 30 days for the certification to be amended and resubmitted. If a complete certification is not submitted within this period, the proceeding shall be terminated in accordance with § 501.52(b)(5). OFE will notify the proposed order recipient and other parties to the proceeding of the termination and publish a notice in the FEDERAL REGISTER. OFE, on its own motion, may extend any period of time by publishing a notice to that effect in the FEDERAL REGISTER.

(3) The publication of the Notice of Acceptance or Notice of Proposed Non-Concurrence commences a period of 45 days during which interested persons may submit written comments or request a public hearing. During this period, the recipient of the proposed order and any other interested person may submit any evidence that they

have available relating to the proposed order, the certification or the concurrence that OFE must make. A proposed order recipient may submit additional new evidence at any time prior to the close of the public comment period which follows the commencement of the proceeding or prior to the close of the record of any public hearing, whichever occurs later. A request for an extension of the 45 day period may be granted at OFE's discretion. In the case of a Notice of Acceptance, as set forth in § 504.9, no final prohibition order can be issued until any necessary environmental review pursuant to the National Environmental Policy Act of 1969, 42 U.S.C 4321 *et seq.* (NEPA) has been completed. Upon completion of the NEPA review and unless OFE determines on the basis of the record of the proceeding that the certification fails to meet the requirements of §§ 504.5, 504.6, and 504.8, OFE shall publish a final prohibition order, together with the information required by paragraph (c) of this section. In the case of a Notice of Proposed Non-Concurrence, at the end of the 45 day comment period, OFE will notify the proposed order recipient and parties to the proceeding and publish a final Notice of Non-Concurrence in the FEDERAL REGISTER, if OFE determines it cannot concur in the certification based upon additional information submitted during the proceeding. If, at the end of the 45 day period, OFE believes it can concur in the certification, OFE will notify the proposed order recipient and parties to the proceeding and publish a Notice of Acceptance followed by a new 45 day comment period.

(4) If a hearing has been requested, OFE shall provide interested persons with an opportunity to present oral data, views and arguments at a public hearing held in accordance with subpart C of this part. The hearing may consider, among other matters, the sufficiency of the certification of the owner or operator of the powerplant required by section 301 of FUA, as amended, and §§ 504.5, 504.6, and 504.8 of these regulations.

(5) OFE may terminate a prohibition order proceeding at any time prior to the date upon which a final prohibition order is issued whenever OFE believes,

Department of Energy

§ 501.60

from any information contained in the record of the proceeding, that the certification does not meet the requirements of section 301 of the Act, as amended, or §§ 504.5, 504.6, and 504.8 of these regulations. If OFE terminates the proceeding or publishes a final Notice of Non-Concurrence, or the proposed order recipient fails to submit a complete certification, OFE will notify the proposed order recipient and other parties to the proceeding and publish a notice in the FEDERAL REGISTER. In such event, the proposed order recipient may submit a new certification under any provision of section 301 of the Act, as amended, at a later date. Specifically, a Notice of Non-Concurrence under either section 301(b) or 301(c) shall not affect a proposed order recipient's ability to make a certification under the other subsection.

(c) *Record and decision to issue a final order.* (1) OFE will base its determination to issue an order on consideration of the whole record or those parts thereof cited by a party and supported by and in accordance with reliable, probative and substantial evidence.

(2) OFE shall include in the final order a written statement of the basis upon which the final order is issued, and its concurrence in the required certification. A copy of the final order and a summary of the basis therefor will be published in the FEDERAL REGISTER. While the prohibition order is final for purposes of judicial review under section 702 of FUA, the prohibitions contained in the final order shall not become effective for purposes of amendment under section 301(d) of FUA, as amended, and § 501.52(d) of these regulations until the effective date of the prohibitions stated in the order, or, where the order is subject to one or more conditions subsequent listed in the prohibition order compliance schedule, until all its conditions are met.

(d) *Amendment to certifications under §§ 504.5 and 504.6.* The proposed prohibition order recipient may amend its compliance schedule under § 504.5(d), or its certification under section 301 of FUA, as amended, and §§ 504.5, 504.6 and 504.8 of these regulations in order to take into account changes in relevant facts and circumstances at any time

prior to the effective date of the prohibitions contained in the final prohibition order.

(e) *Rescission of prohibition orders.* The rescission or modification of final prohibition orders issued to existing electric powerplants will be governed by the procedure in § 501.101 of these regulations.

(Approved by the Office of Management and Budget under control number 1903-0077)

(Department of Energy Organization Act, Pub. L. 95-91, 42 U.S.C. 7101 *et seq.*; Energy Supply and Environmental Coordination Act of 1974, Pub. L. 93-319, as amended by Pub. L. 94-163, Pub. [47 FR 17042, Apr. 21, 1982]

§§ 501.53-501.56 [Reserved]

Subpart F—Exemptions and Certifications

§ 501.60 Purpose and scope.

(a) (1) If the owner or operator plans to construct a new baseload powerplant and the unit will not be in compliance with the prohibition contained in section 201(a) of FUA, this subpart establishes the procedures for filing a petition requesting a temporary or permanent exemption under, respectively, sections 211 and 212 of FUA.

(2) Self-certification alternative. If the owner or operator plans to construct a new baseload powerplant not in compliance with the prohibitions contained in section 201(a) of FUA, this subpart establishes the procedures for the filing of a self-certification under section 201(d) of FUA.

(3) If the petitioner owns, operates or controls a new powerplant, this subpart provides the procedures for filing a petition requesting extension of a temporary exemption granted under sections 211 or 311 of FUA.

(4) If the petitioner owns, operates or controls a new or existing powerplant or MFBI, this subpart provides the procedures for filing a petition requesting extension of a temporary exemption granted under section 211 or section 311 of FUA.

§ 501.61

(b) If the petition is for an extension of a temporary exemption, the petitioner must apply for this extension at least (90) days prior to the expiration of the temporary exemption.

(Department of Energy Organization Act, Pub. L. 95-91, 91 Stat. 565 (42 U.S.C. 7101 *et seq.*); Powerplant and Industrial Fuel Use Act of 1978, Pub. L. 95-620, 92 Stat. 3269 (42 U.S.C. 8301 *et seq.*); Omnibus Budget Reconciliation Act of 1981, Pub. L. 97-35; E.O. 12009, 42 FR 46267, Sept. 15, 1977)

[46 FR 59889, Dec. 7, 1981, as amended at 47 FR 50849, Nov. 10, 1982; 54 FR 52892, Dec. 22, 1989]

§ 501.61 Certification contents.

(a) A self-certification filed under section 201(d) of FUA should include the following information:

- (1) Owner's name and address.
- (2) Operator's name and address.
- (3) Plant location and address.
- (4) Plant configuration (combined cycle, simple cycle, topping cycle, etc.)
- (5) Design capacity in megawatts (MW).
- (6) Fuel(s) to be used by the new facility.
- (7) Name of utility purchasing electricity from the proposed facility and percent of total output to be sold.
- (8) Date unit is expected to be placed in service.
- (9) Certification by an officer of the company or his designated representative certifying that the proposed facility:
 - (i) Has sufficient inherent design characteristics to permit the addition of equipment (including all necessary pollution devices) necessary to render such electric powerplant capable of using coal or another alternate fuel as its primary energy source; and
 - (ii) Is not physically, structurally, or technologically precluded from using coal or another alternate fuel as its primary energy source.

(b) A self-certification filed pursuant to § 501.61(a) shall be effective to establish compliance with the requirement of section 201(a) of FUA as of the date filed.

(c) OFE will publish a notice in the FEDERAL REGISTER within fifteen days reciting that the certification has been filed. Publication of this notice does

10 CFR Ch. II (1-1-16 Edition)

not serve to commence a public comment period.

(d) OFE will notify the owner or operator within 60 days if supporting documentation is needed to verify the certification.

[54 FR 52892, Dec. 22, 1989]

§ 501.62 Petition contents.

(a) A petition for exemption should include the following information:

- (1) The name of the petitioner;
- (2) The name and location of the unit for which an exemption is being requested;
- (3) The specific exemption(s) being requested; and
- (4) The name, address, and telephone number of the person who can supply further information.

(b) *Table of contents.* Include only those sections contained in the petition.

(c) *Introduction.* Include the following:

- (1) Description of the facility under consideration;
- (2) Description of the unit and fuel the petitioner proposes to burn in that unit, including the purpose of and need for the unit; and
- (3) Description of the operational requirements for the unit, including size (capacity, input and output in millions of Btu's per hour), output in terms of product or service to be supplied, fuel capability, and operating mode, including capacity factor, utilization factor, and fluctuations in the load.

(d) *General requirements.* The evidence required under part 503 subpart B for each exemption(s) for which the petitioner is applying:

- (1) No alternate power supply (§ 503.8);
- (2) Use of mixtures (§ 503.9);
- (3) Alternative site (§ 503.11);
- (4) Compliance Plan (§ 503.12);
- (5) Environmental impact analysis (§ 503.13);
- (6) Fuels search (§ 503.14).

(e) *Specific evidence.* Evidence required for each exemption, segregated by exemption (part 503 subparts C and D).

(f) *References.* (1) Specify the reports, documents, experts, and other sources consulted in compiling the petition. Cite these sources in accordance with acceptable documentation standards,

Department of Energy

§ 501.63

and indicate the part of the petition to which they apply. If the source is unusual or little known, briefly describe its contents.

(2) Identify at the end of each section of the petition any information or any statement based, in whole or in part, on information or principles which, to petitioner's knowledge, represent significant innovations to or departures from generally accepted facts or principles.

(g) *Appendices.* Include in the appendices material which the petitioner believes substantiates any analyses fundamental to the petition, materials prepared in connection with it, and any other documents, studies, or analyses which are believed to be relevant to the decision to be made. Also, include in the appendices copies of any forms submitted as part of the petition.

(h) *List of preparers.* List the names with the qualifications and professional credentials of the principal contributors to the preparation of the petition. Indicate the sections or subject matters for which each principal contributor was responsible.

(i) *Incorporation by reference.* Pertinent information may be incorporated into the petition by reference when this can be done without impeding agency and public review. Referenced materials must be specifically identified and their contents briefly described in the petition. To incorporate by reference, the material must be submitted with the petition, or if previously submitted, the office to which it was submitted must be identified in the petition. The petitioner cannot incorporate by reference material based on proprietary data not available to OFE for review.

(Department of Energy Organization Act, Pub. L. 95-91, 91 Stat. 565 (42 U.S.C. 7101 *et seq.*); Powerplant and Industrial Fuel Use Act of 1978, Pub. L. 95-620, 92 Stat. 3269 (42 U.S.C. 8301 *et seq.*); Omnibus Budget Reconciliation Act of 1981, Pub. L. 97-35; E.O. 12009, 42 FR 46267, Sept. 15, 1977)

[46 FR 59889, Dec. 7, 1981, as amended at 47 FR 50849, Nov. 10, 1982]

§ 501.63 Notice of the commencement of an administrative proceeding on an exemption petition.

(a)(1) When a petition is accepted, OFE will publish in the FEDERAL REGISTER a Notice of Acceptance, or, in the case of a certification exemption, a Notice of Acceptance and Availability of Certification, signifying that an exemption proceeding has commenced. The notice will include a summary of the exemption petition, and publication will commence a public comment period of no less than forty-five (45) days during which interested parties may file written comments concerning the petition. In the case of a certification exemption, interested persons may request a public hearing during this period, pursuant to § 501.33.

(2) OFE will notify the appropriate State agency having apparent primary authority to permit or regulate the construction or operation of a powerplant that an exemption proceeding has commenced and will consult with this agency to the maximum extent practicable. Copies of all accepted petitions also will be forwarded to EPA, as provided in § 501.14(a).

(b) In processing an exemption petition, OFE shall comply with the requirements of the National Environmental Policy Act of 1969 (NEPA), the Council on Environmental Quality's implementing regulations, and the DOE guidelines implementing those regulations (45 FR 20694, Mar. 28, 1980). Compliance with NEPA may involve the preparation of (1) an environmental impact statement (EIS) evaluating the grant or denial of an exemption petition, (2) an environmental assessment (EA), or (3) a memorandum to the file finding that the grant of the requested petition would not be considered a major federal action significantly affecting the quality of the human environment. If an EIS is required, OFE will publish in the FEDERAL REGISTER a Notice of Intent (NOI) to prepare an EIS as soon as practicable after commencement of the proceeding. A public meeting may be held pursuant to 40 CFR 1501.7 to solicit comments or suggestions on the structure and content of the EIS.

[46 FR 59889, Dec. 7, 1981, as amended at 54 FR 52893, Dec. 22, 1989]

§ 501.64

§ 501.64 Publication of notice of availability of tentative staff analysis.

OFE will publish in the FEDERAL REGISTER a Notice of the Availability of Tentative Staff Analysis for the non-certification temporary public interest exemption, for noncertification environmental exemptions, and for a cogeneration exemption based on the public interest. OFE will provide a public comment period of at least fourteen (14) days from the date of publication during which interested persons may make written comments and request a public hearing.

§ 501.65 Publication of notice of availability of draft EIS.

A Notice of Availability of any draft EIS will be published in the FEDERAL REGISTER and comments thereon will also be solicited. Interested persons may request a hearing on any draft EIS. Such hearing must be requested within thirty (30) days of publication of the Notice of Availability of the draft EIS.

[54 FR 52893, Dec. 22, 1989]

§ 501.66 OFE evaluation of the record, decision and order.

(a) The administrative record in a proceeding under this part will consist of the proposed prohibition order and/or petition and related documents, all relevant evidence presented at the public hearing, all written comments, and any other information in the possession of OFE and made a part of the public record of the proceeding. OFE will base its determination to issue a rule or order on consideration of the whole record, or those parts thereof cited by a party and supported by reliable, probative, and substantial evidence.

(b) OFE may investigate and corroborate any statement in any petition, document, or public comments submitted to it. OFE also may use any relevant facts it possesses in its evaluation and may request submissions from third persons relevant to the petition or other documents. OFE also may request additional information, data, or analyses following a public hearing, if any, if this information is necessary to resolve disputed issues in the record.

10 CFR Ch. II (1-1-16 Edition)

Any relevant information received by OFE following the hearing that is not declared to be confidential under § 501.7(a)(11) shall be made part of the public record with opportunity provided for rebuttal.

(c) OFE will notify all participants if, after the close of any public hearing or comment period, it receives or obtains any relevant information or evidence. Participants may respond to such information or evidence in writing within fourteen (14) days of such notification. If OFE finds that the additional information or evidence relates to material issues of disputed fact and may significantly influence the outcome of the proceeding, OFE shall reopen the hearing on the issue or issues to which the additional information or evidence relates.

§ 501.67 Petition redesignations.

OFE, with the petitioner's approval, will redesignate an exemption petition if the petitioner qualifies for an exemption other than the one originally requested, even though he may not qualify for the specific exemption originally requested, or be entitled to the full exemption period provided by requested exemption. OFE shall give public notice of any redesignation of an exemption petition, and where a public hearing has been requested notice shall be given at least thirty (30) days prior to such hearing.

§ 501.68 Decision and order.

(a)(1) OFE shall issue an order either granting or denying the petition for an exemption or permit within six (6) months after the end of the period for public comment and hearing applicable to any petition.

(2) OFE may extend the six (6) month period for decision to a date certain by publishing notice in the FEDERAL REGISTER, and stating the reasons for such extension.

(3) OFE will publish a final EIS at least thirty (30) days prior to take issuance of the final order in all cases where an EIS is required.

(b)(1) OFE shall serve a copy of the order granting or denying a petition for exemption to the petitioner and all persons on the service list in cases involving a public hearing.

Department of Energy

§ 501.101

(2) OFE shall publish any order granting or denying a petition under this subpart in the FEDERAL REGISTER together with a statement of the reasons for the grant or denial.

(c)(1) Any order granting or denying a petition for exemption shall be based upon consideration of the whole record or those parts thereof cited by a party and supported by, and in accordance with, reliable, probative and substantive evidence.

(2) The denial of a petition for exemption shall be without prejudice to the petitioner's right to submit an amended petition. OFE may, however, reject the amended petition if it is not materially different from the denied petition.

(d) OFE may design any terms and conditions included in any temporary exemption issued or extended under section 211 of FUA, to ensure, among other things, that upon expiration of the exemption the persons and powerplant covered by the exemption will comply with the applicable prohibitions under FUA. For purposes of the provision, the subsequent grant of a permanent exemption to the subject unit shall be deemed compliance with applicable prohibitions.

(Department of Energy Organization Act, Pub. L. 95-91, 91 Stat. 565 (42 U.S.C. 7101 *et seq.*); Powerplant and Industrial Fuel Use Act of 1978, Pub. L. 95-620, 92 Stat. 3269 (42 U.S.C. 8301 *et seq.*); Omnibus Budget Reconciliation Act of 1981, Pub. L. 97-35; E.O. 12009, 42 FR 46267, Sept. 15, 1977)

[46 FR 59889, Dec. 7, 1981, as amended at 47 FR 50849, Nov. 10, 1982; 54 FR 52893, Dec. 22, 1989]

§ 501.69 Judicial review.

Any person aggrieved by any order issued by OFE under this subpart, must file, within sixty (60) days of publication of the final order in the FEDERAL REGISTER, a petition for judicial review in the United States Court of Appeals for the Circuit wherein he resides, or has his principal place of business. Exhaustion of administrative remedies for purposes of judicial review does not require filing a petition pursuant to subpart G for modification or rescission of the order to be reviewed.

Subpart G—Requests for Modification or Rescission of a Rule or Order

§ 501.100 Purpose and scope.

(a) Anyone may request that OFE commence a rulemaking proceeding pursuant to 5 U.S.C. 553(e); however, this subpart provides the procedures to be followed by—

(1) An interested person seeking the modification or rescission of a prohibition by rule applicable to a new facility;

(2) An owner or operator of a facility named in a prohibition by rule requesting the modification or rescission of that rule; or

(3) An owner or operator subject to an exemption order or a specific prohibition imposed by order requesting the modification or a rescission of that order.

(b) OFE also may commence a modification or rescission proceeding on its own initiative.

§ 501.101 Proceedings to modify or rescind a rule or order.

(a) In response to a request duly filed by an interested person, OFE may commence a proceeding to modify or rescind a rule or order. If OFE determines that a request to modify or rescind a rule or order does not warrant commencement of a proceeding, it will deny the request and issue a brief statement of the reason(s) for the denial.

(b) A request for modification or rescission of a rule or order must comply with the requirements of § 501.7 and must be filed at the address set forth in § 501.11.

(c) Notice of the request for modification or rescission of an order must be given by the requester to each party to the original proceeding that resulted in the issuance of the original order for which modification or rescission is sought. If the number of parties to the original proceeding is too large to allow actual notice at a reasonable cost or within a reasonable time, a requester may ask that OFE give notice to the parties by publication in the FEDERAL REGISTER; however, this alternate notice does not bind OFE to

§ 501.102

commence a proceeding, if it subsequently determines that the request is not warranted.

(d) If OFE determines to grant a request to commence a proceeding to rescind or modify a rule or order, or OFE on its own initiative, commences a proceeding for the modification or rescission of a rule or order, it will give notice, either by service of a written notice or by oral communication (which communication must be promptly confirmed in writing) to each person upon whom the order was served that OFE proposes to modify or rescind, or, alternatively, by publication of notice in the FEDERAL REGISTER. OFE will give a reasonable period of time for each person notified to file a written response.

(e)(1) A copy of any written comments submitted to OFE under this subpart by a party to the original proceeding must also be sent to the requester. The party submitting such comments must certify to OFE that he has sent a copy of such comments to the requester.

(2) OFE may notify other persons participating in the proceeding of the comments and provide an opportunity for those notified to respond.

(f) A request for modification or rescission of a rule or order must contain a complete statement of all facts relevant to the action sought. The request must also include the names and addresses of all reasonably ascertainable persons who will be affected. Pertinent provisions contained in any documents believed to support a request may be briefly described, however, OFE reserves the right to obtain copies of any significant documents that will assist in making a determination on the merits of a request. The request must identify the specific order or rule for which modification or rescission is sought. A request should also indicate whether an informal conference will facilitate OFE's determination to commence, or not to commence a proceeding, or will assist OFE in making any determinations on material issues raised by the request.

(g) A decision by OFE to commence a proceeding under this subpart does not entitle the requester to a public hearing on the request for modification or rescission. A public hearing may be

10 CFR Ch. II (1-1-16 Edition)

held, however, if, in its discretion, OFE considers that a public hearing will advance its evaluation of the request.

§ 501.102 OFE evaluation of the record, decision and order for modification or rescission of a rule or order.

(a) OFE will consider the entire administrative record in its evaluation of the decision and order for modification or rescission of a rule or order. OFE may investigate and corroborate any statement in the petition or related documents and may utilize in its evaluation any relevant facts obtained by its investigations. OFE may solicit or accept submissions from third persons relevant to any request under this subpart and all interested persons will be afforded an opportunity to respond to these submissions. OFE may, in its discretion and on its own initiative, convene a conference, if it considers that a conference will advance its evaluation of the request.

(b) *Criteria.* Except where modification or rescission of a rule or order is initiated by OFE, OFE's decision to rescind or modify a rule or order will be based on a determination that there are significantly changed circumstances with respect to the applicability of a particular prohibition or exemption to the requester. OFE believes that there may be "significantly changed circumstances", if:

(1) Significant material facts are subsequently discovered which were not known and could not have been known to the petitioner or to OFE at the time of the original proceeding;

(2) A law, regulation, interpretation, ruling, order or decision on appeal that was in effect at the time of the proceeding upon which the rule or order is based and which, if it had been made known to OFE, would have been relevant to the proceeding and would have substantially altered the outcome is subsequently discovered; or

(3) There has been a substantial change in the facts or circumstances upon which an outstanding and continuing order was based, which change occurred during the interval between issuance of the order and the date of filing of the request under this subpart,

Department of Energy

§ 501.123

and was caused by force or circumstances beyond the requester's control.

§ 501.103 OFE decision.

(a) OFE shall issue an appropriate rule or order after considering the request for modification or rescission of a rule or order and other relevant information received during the proceeding.

(b) OFE will either grant or deny the request for modification or rescission and will briefly state the pertinent facts and legal basis for the decision.

(c) OFE will serve the rule or order granting or denying the request for modification or rescission upon the requester, or, if the action was initiated by OFE, upon the owner or operator of the affected powerplant or installation. OFE will publish a notice of the issuance of a rule or order modifying or rescinding a rule or order in the FEDERAL REGISTER.

Subpart H—Requests for Stay

§ 501.120 Purpose and scope.

(a) This subpart sets forth the procedures for the request and issuance of a stay of a rule or order or other requirement issued or imposed by OFE or these regulations but does not apply to the mandatory stays provided for in sections 202(b) and 301(a) of FUA. The application for a stay under this subpart will only be considered incidental to a proceeding on a request for modification or rescission of a final prohibition rule or order.

(b) The petitioner must comply with all final and effective OFE orders, regulations, rulings, and generally applicable requirements unless a petition for a stay is granted or is applicable under FUA.

§ 501.121 Filing and notice of petitions for stays.

(a)(1) The petition for a stay must be in writing and comply with the general filing requirements stated in § 501.7, in addition to any other requirements set forth in this subpart, and must be filed at the address provided in § 501.11.

(2) A claim for confidential treatment of any information contained in the petition for stay and supporting

documents must be in accordance with § 501.7(a)(11), and filed at the address provided in § 501.11.

(b) OFE will publish notice of receipt of a petition for a stay under this subpart in the FEDERAL REGISTER.

§ 501.122 Contents.

(a) A petition for a stay shall contain a full and complete statement of all facts believed to be pertinent to the act or transaction for which a stay is sought. The facts shall include, but not be limited to, the criteria listed below in § 501.123(b).

(b) The petitioner may request a conference regarding the application. If the request is not made at the time the application is filed, it must be made as soon thereafter as possible. The request and OFE's determination regarding it will be made in accordance with subpart C of this part.

§ 501.123 Evaluation of the record.

(a) The record in a proceeding on a petition for stay shall consist of the petition and any related documents, evidence submitted at any public proceedings and any other information in the possession of OFE and made part of the record. OFE may investigate and corroborate any statement in the petition or any other document submitted to it and may utilize in its evaluation any relevant facts obtained by its investigations. OFE may solicit or accept submissions from third persons relevant to the petition for stay or other document and any interested person will be afforded an opportunity to respond to these submissions. OFE, on its initiative, may convene a conference, if, in its discretion, it considers that the conference will advance its evaluation of the petition.

(b) *Criteria.* (1) OFE may grant a stay incident to a proceeding on a petition for modification of a rule or order if the petitioner shows:

(i) Irreparable injury will result if the stay is denied;

(ii) There is a strong likelihood of success on the merits;

(iii) The denial of a stay will result in a more immediate hardship or inequity to the petitioner than to other persons affected by the proceeding; and

§ 501.124

(iv) It would be desirable for reasons of public policy to grant the stay.

§ 501.124 Decision and order.

(a) OFE will issue an order granting or denying the petition for a stay upon consideration of the request and other relevant information received or obtained during the proceeding.

(b) OFE will include in the order a brief written statement setting forth the relevant facts and the basis of the decision, including any appropriate terms and conditions of the stay.

Subpart I—Requests for Interpretation

§ 501.130 Purpose and scope.

This subpart establishes procedures for filing a formal request for and the issuance of an interpretation of a rule, order or other action by DOE. Any response, whether oral or written, to a general inquiry, or to other than a formal written request for interpretation filed with DOE, is not an interpretation and merely provides general information that may not be relied upon in any proceeding to determine compliance with the applicable requirements of FUA.

§ 501.131 Filing a request for interpretation.

A proceeding to request an interpretation is commenced by the filing of a "Request for Interpretation (FUA)." The request must be in writing and must also comply with the general filing requirements stated in § 501.7. Any claims for confidential treatment for any information contained in the request or other related documents must be made pursuant to § 501.7(a)(11). A request for interpretation should be filed with the Assistant General Counsel for Interpretations and Rulings at the address provided in § 501.11.

§ 501.132 Contents of a request for interpretation.

(a) A request for an interpretation must contain a complete statement of all the facts believed to be relevant to the circumstances, acts or transactions that are the subject of the request. The facts must include the names and addresses of all potentially affected per-

10 CFR Ch. II (1–1–16 Edition)

sons (if reasonably ascertainable) and a full discussion of the pertinent provisions and relevant facts contained in any documents submitted with the request. Copies of relevant contracts, agreements, leases, instruments, and other documents relating to the request must be submitted if DOE believes they are necessary for determination of any issue pending in the proceeding under this subpart. When the request pertains to only one step in a larger integrated transaction, the requesting party must also submit the facts, circumstances, and other relevant information pertaining to the entire transaction.

(b) The requesting party must include in the request a discussion of all relevant legal authorities, rulings, regulations, interpretations and decisions on appeal relied upon to support the particular interpretation sought.

(c) DOE may refuse to issue an interpretation if it determines that there is insufficient information upon which to base an interpretation.

§ 501.133 DOE evaluation.

(a)(1) The record shall consist of the request for an interpretation and any supporting documents, all relevant evidence presented at any public proceedings, written comments and any information in the possession of DOE that has been made part of the record.

(2) DOE may investigate and corroborate any statement in a request or related documents and may utilize in its evaluation any relevant facts obtained by the investigation. DOE may solicit or accept submissions from third persons relevant to the request for interpretation, or any other document submitted under this subpart, and the person requesting the interpretation will be afforded an opportunity to respond to these submissions.

(3) The General Counsel or his delegate will issue an interpretation on the basis of the information provided in the request, unless that information is supplemented by other information brought to the attention of DOE during the proceeding. DOE's interpretation will, therefore, depend on the accuracy of the factual statements, and the requesting party may rely upon it only

Department of Energy

§ 501.141

to the extent that the facts of the actual situation correspond to those upon which the interpretation is based.

(b) *Criteria.* (1) DOE will base its FUA interpretations on the DEOA and FUA, as applicable, and the regulations and published rulings of DOE as applied to the specific factual situation presented.

(2) DOE will take into consideration previously issued interpretations dealing with the same or a related issue.

§ 501.134 Issuance and effect of interpretations.

(a) DOE may issue an interpretation after consideration of the request for interpretation and other relevant information received or obtained during the proceeding.

(b) The interpretation will contain a written statement of the information upon which it is based and a legal analysis of and conclusions regarding the application of rulings, regulations and other precedent to the situation presented in the request.

(c) Only those persons to whom an interpretation is specifically addressed, and other persons upon whom the DOE serves the interpretation and who are directly involved in the same transaction or act, are entitled to rely upon it. No person entitled to rely upon an interpretation shall be subject to civil or criminal penalties stated in title VII of FUA for any act taken in reliance upon the interpretation, notwithstanding that the interpretation shall thereafter be declared by judicial or other competent authority to be invalid.

(d) DOE may at any time rescind or modify an interpretation on its own initiative. Rescission or modification shall be made by notifying persons entitled to rely on the interpretation that it is rescinded or modified. This notification will include a statement of the reasons for the rescission or modification and, in the case of a modification, a restatement of the interpretation as modified.

(e) An interpretation is modified by a subsequent amendment to the regulations or ruling to the extent that it is inconsistent with the amended regulation or ruling.

(f) Any person who believes he is directly affected by an interpretation issued by DOE, and who believes that he will be aggrieved by its implementation, may submit a petition for reconsideration of that interpretation to the General Counsel. DOE will acknowledge receipt of all requests for reconsideration; however, this acknowledgment in no way binds DOE to commence any proceeding on the request. If within sixty (60) days of DOE's acknowledgement of the receipt of a request for reconsideration, DOE has not issued either a notice of intent to commence a proceeding to reconsider the interpretation or a modification, revision or rescission of the original interpretation, the request for reconsideration will be deemed denied. DOE may, in its discretion, issue a formal denial of a request for reconsideration if:

(1) The request has not been filed in a timely manner, and good cause therefor has not been shown;

(2) The person requesting reconsideration is not aggrieved or otherwise injured substantially by the interpretation; or

(3) The request is defective because it fails to state and to present facts and legal argument that the interpretation was erroneous in fact or in law, or that it was arbitrary or capricious.

Subpart J—Rulings

§ 501.140 Purpose and scope.

DOE may issue rulings in accordance with the provisions of this subpart. DOE will publish each ruling in the FEDERAL REGISTER and in 10 CFR part 518. A person is entitled to rely upon a ruling to the extent provided in this subpart.

§ 501.141 Criteria for issuance.

(a) The General Counsel may issue a ruling whenever:

(1) There has been a substantial number of inquiries with regard to similar factual situations or a particular section of the regulations; or

(2) It is determined that a ruling will be of assistance to the public in applying the regulations to a specific situation.

§ 501.142

§ 501.142 Modification or rescission.

(a) A ruling may be modified or rescinded by—

(1) Publication of the modification or rescission by DOE in the FEDERAL REGISTER and in 10 CFR part 518; or

(2) Adoption of a rule that supersedes or modifies a prior ruling.

(b) A person shall not be subject to the sanctions or penalties stated in these regulations for actions taken in reliance upon a ruling, notwithstanding that the ruling is subsequently declared to be invalid or no longer applicable. A person affected by a ruling may not rely upon it for more than 30 days after it has been rendered invalid pursuant to issuance of a superseding rule by OFE, or after it has been rescinded or modified by DOE.

§ 501.143 Comments.

Any interested person may file a written comment on or objection to a published ruling at any time with the Assistant General Counsel for Interpretations and Rulings at the address provided in § 501.11.

Subpart K—Enforcement

§ 501.160 Purpose and scope.

This subpart provides the procedures by which OFE may initiate enforcement proceedings on its own behalf and by which complaints concerning a violation of the Act or any rule or order thereunder may be filed.

§ 501.161 Filing a complaint.

(a) A complaint under this subpart must be submitted in writing over the signature of the person making the complaint in accordance with the general filing requirements stated in § 501.7. OFE will accept oral complaints that otherwise satisfy the requirements of this subpart, but OFE may request written verification.

(b) A complaint shall be filed at the address provided in § 501.11.

§ 501.162 Contents of a complaint.

A complaint must contain a complete statement of all relevant facts pertaining to the act or transaction that is the subject of the complaint. It must also include the names and addresses of

10 CFR Ch. II (1–1–16 Edition)

all persons involved (if reasonably ascertainable), a description of the events that led to the complaint, and a statement describing the statutory provision, regulation, ruling, order, rule, or interpretation that allegedly has been violated.

§ 501.163 OFE evaluation.

(a) The record shall consist of the complaint and any supporting documents and all other relevant information developed in the course of any investigations or proceedings related to that complaint. OFE may investigate and corroborate any statement in the complaint or related documents submitted, and may utilize in its evaluation any relevant facts obtained by such investigation or from any other source of information. OFE may solicit or accept submissions from third persons relevant to the complaint or other related documents.

(b) *Confidentiality of information.* OFE will treat as confidential information received in any investigation of a complaint, including the identity of the complainant and the identity of any other persons who provide information to the extent such information is exempt from public disclosure under the Freedom of Information Act, 5 U.S.C. 552. OFE reserves the right to make disclosures that would be in the public interest.

§ 501.164 Decision to initiate enforcement proceedings.

After investigation of a specific complaint or based on any relevant information received or obtained during an investigation, OFE may issue a notice of violation, determine that no violation has occurred, or take such other actions as it deems appropriate. Prior to issuance of a notice of violation, and before commencement of an enforcement proceeding, OFE may transmit a draft of the notice of violation to the potentially affected person in order to promote an informal resolution of the violation.

§ 501.165 Commencement of enforcement proceedings.

(a) Whenever, on the basis of any information available, OFE determines that a person is in violation or about

to be in violation of any provision of these regulations, OFE may issue a notice of violation stating, in writing and with reasonable specificity, the nature of the violation. An enforcement proceeding commences with the issuance of a notice of violation.

(b) *Contents of the notice of violation.* OFE will set forth in the notice of violation the nature of the violation, the relevant facts that OFE believes establish the violation and the legal basis for the conclusions reached therein. OFE may also include with the notice of violation a copy of a proposed order. The notice of violation will also state whether or not OFE proposes to assess civil penalties.

(1) If OFE proposes to assess a civil penalty, a notice of violation will be issued to the violator with an opportunity for a hearing before an Administrative Law Judge, as set forth in § 501.166(a)(1) of this part, before any final determination on the violation and penalty are made by OFE. The recipient of the notice will also be informed of his right to elect to have the procedures of § 501.166(a)(2) apply, in lieu of the hearing, with respect to a final determination on the assessment of any civil penalty.

(2) If OFE does not propose to assess a civil penalty, the violator will be provided the opportunity for a conference, as set forth in § 501.166(b), before a final determination on the violation is made by OFE. OFE may, in its discretion, also provide the violator an opportunity for a hearing pursuant to § 501.166(a)(1).

(c) *Service.* OFE will serve the notice of violation in accordance with provisions set forth in § 501.6.

(d) *Rescission.* If, after issuance of a notice of violation and any related investigation, OFE finds no basis for the belief that a violation has occurred, is continuing to occur, or is about to occur, OFE may rescind the notice of violation by giving written notice to that effect to the recipient.

§ 501.166 Hearings and conferences.

(a) *When a civil penalty is proposed—*
(1) *Hearing alternative in civil penalty assessment proceedings.* Unless the recipient of a notice of violation elects in writing to have the provisions of para-

graph (a)(2) of this section apply, OFE will commence a proceeding to assess a penalty and, prior to a final determination on the violation and assessment of a penalty, provide an opportunity for a hearing pursuant to 5 U.S.C. 554 before an Administrative Law Judge.

(2) *Election alternative in civil penalty assessment proceedings.* The recipient of a notice of violation in which a civil penalty assessment has been proposed may elect, in writing, within thirty (30) days of receipt of the notice, to waive the administrative proceedings described in paragraph (a)(1) of this section. OFE will make a determination on the proposed civil penalty assessment and issue a final order to that effect within forty-five (45) days after receiving notice of the exercise of this election.

(b) *When a civil penalty is not proposed—opportunity to request a conference.* If a person has received a notice of violation in which a civil penalty has not been proposed, he may, within thirty (30) days after receipt of the notice, request a conference with OFE to discuss the notice. In order to request a conference he must comply with the instructions set forth in the notice.

§ 501.167 Fuel use order.

(a) *General.* OFE will issue a Fuel Use Order if, after considering all the information received during the proceeding, OFE determines that a person has committed, is committing, or is about to commit a violation of FUA or of an order or rule thereunder.

(b) *Contents.* Any Fuel Use Order issued under this section shall set forth the relevant facts and legal basis for the order and where appropriate, the final penalty assessment and the basis therefor. When an administrative hearing is requested under § 501.166(a) of this part, the Fuel Use Order will include the recommended findings and conclusions of the Administrative Law Judge (ALJ) and the basis for the penalty assessment. OFE will make a final determination as to any penalty assessment or other appropriate remedy based upon the recommended findings and conclusions of the ALJ and other information in the record of the enforcement proceeding. The order will

§ 501.180

be effective upon service, unless otherwise provided therein, or stayed pursuant to § 501.120.

(c) *Service.* OFE will serve a copy of the Fuel Use Order upon any person who was served a copy of the notice of violation and upon all parties to any public proceeding on the notice of violation. OFE will place a copy of each final order on file in the Public Information Office described in § 501.12.

(d) *Judicial review.* Any person against whom a penalty is assessed pursuant to § 501.167(b) after a hearing before an ALJ may, within sixty (60) calendar days after the date of issuance of the order assessing such penalty, institute an action in the United States Court of Appeals for the appropriate judicial circuit for judicial review of such order in accordance with the provisions of section 723 of FUA.

Subpart L—Investigations, Violations, Sanctions and Judicial Actions

§ 501.180 Investigations.

(a) *General.* Pursuant to section 711 of FUA, the DEOA, and in accordance with the provisions of 10 CFR 205.201, OFE may initiate and conduct investigations relating to the scope, nature, and extent of compliance by any person with the rules, regulations, and orders issued by OFE under the authority of the Act, or any order or decree of court relating thereto, or any other agency action. When the circumstances warrant, OFE may issue subpoenas as provided in subpart D of this part. OFE may also conduct investigative conferences in conjunction with any investigation.

(b) Any duly authorized representative of OFE has the authority to conduct an investigation and to take such action as he deems necessary and appropriate to the conduct of the investigation.

(c) *Notification.* If any person is required to furnish information or documentary evidence pursuant to a subpoena or special report order, OFE will, upon written request, inform that person as to the general purposes of the investigation.

(d) *Confidentiality.* OFE shall not disclose any information received during

10 CFR Ch. II (1–1–16 Edition)

an investigation under this section, including the identities of the person investigated and any other person who provides information, to the extent it is exempt from public disclosure pursuant to 5 U.S.C. 552 and 10 CFR part 1004.

§ 501.181 Sanctions.

(a) *General.* (1) A violation of any provision of the Act (other than section 402 of FUA), or any rule or order thereunder shall be subject to the penalties and sanctions provided in subtitle C of title VII of FUA.

(2) Each day that any provision of the Act (other than section 402), or any rule or order thereunder is violated constitutes a separate violation within the meaning of the provisions of this section relating to civil penalties.

(b) *Criminal penalties.* Any person who willfully violates any provision of the Act (other than section 402), or any rule or order thereunder will be subject to a fine of not more than \$50,000, or to imprisonment for not more than 1 year, or both, for each violation.

(c) *Civil Penalties.* (1) Any person who violates any provisions of the Act (other than section 402) or any rule or order thereunder will be subject to the following civil penalty, which may not exceed \$40,000 for each violation: Any person who operates a powerplant or major fuel burning installation under an exemption, during any 12-calendar-month period, in excess of that authorized in such exemption will be assessed a civil penalty of up to \$3.30 for each MCF of natural gas or up to \$20 for each barrel of oil used in excess of that authorized in the exemption.

(2) OFE may compromise and settle, and collect civil penalties whenever it considers it to be appropriate or advisable.

(d) *Corporate personnel.* (1) If a director, officer, or agent of a corporation willfully authorizes, orders, or performs any act or practice constituting in whole or in part a violation of the Act, or any rule or order thereunder, he will be subject to the penalties specified in paragraphs (b) and (c) of this section without regard to any penalties to which the corporation may be subject. He will not, however, be subject to imprisonment under paragraph (b) of

Department of Energy

§ 501.191

this section unless he knew of non-compliance by the corporation, or had received from OFE notice of non-compliance by the corporation.

(2) Purposes of this paragraph:

(i) *Agent* includes any employee or other person acting on behalf of the corporation on either a temporary or permanent basis; and

(ii) *Notice of noncompliance* is a final Fuel Use Order issued under § 501.167 of this part.

[46 FR 59889, Dec. 7, 1981, as amended at 62 FR 46183, Sept. 2, 1997; 74 FR 66032, Dec. 14, 2009]

§ 501.182 Injunctions.

Whenever it appears to OFE that any person has committed, is committing, or is about to commit a violation of any provision of the Act, or any rule or order thereunder, OFE may, in accordance with section 724 of FUA, bring a civil action in the appropriate United States District Court to enjoin such acts or practices. The relief sought may include a mandatory injunction commanding any person to comply with any provision of such provision, order or rule, the violation of which is prohibited by section 724 of FUA and may also include interim equitable relief.

§ 501.183 Citizen suits.

(a) *General.* A person who believes he is aggrieved by the failure of OFE to perform any nondiscretionary act of duty under the Act may file a Petition for Action for OFE to take such action as he may feel to be proper. This petition must be filed at the address provided in § 501.11. The petition must specify the action requested and set forth the facts and legal arguments that constitute the basis for the request. The filing of a Petition for Action will serve as notice to OFE under FUA section 725(b) for purposes of any citizens suit that may be subsequently filed.

(b) *OFE decision.* Within sixty (60) days of receiving the Petition for Action, OFE will notify the person giving notice under this section that it has instituted the action requested or that other described action is being taken, or that other described action is being

taken, or that no action is being taken and the reasons therefor.

Subpart M—Use of Natural Gas or Petroleum for Emergency and Unanticipated Equipment Outage Purposes

§ 501.190 Purpose and scope.

(a) If a person operates a powerplant covered by any of the prohibitions of titles II, III, or IV of FUA, § 501.191 of this subpart establishes procedures to be followed for the use of minimum amounts of natural gas or petroleum under FUA section 103(a)(15)(B) in order to alleviate or prevent unanticipated equipment outages and emergencies directly affecting the public health, safety, or welfare that would result from electric power outages.

(b) *Explanatory note:* If a person operates a rental boiler as a powerplant covered by any of the prohibitions of titles II, III, or IV of FUA, he may be able to use the provisions of this subpart for the emergency use of natural gas or petroleum.

[54 FR 52893, Dec. 22, 1989]

§ 501.191 Use of natural gas or petroleum for certain unanticipated equipment outages and emergencies defined in section 103(a)(15)(B) of the act.

(a) In the event of the occurrence or imminent occurrence of an emergency, or of the occurrence or imminent occurrence of an unanticipated equipment outage in the unit, an owner or operator of a powerplant is automatically permitted to use minimum amounts of natural gas or petroleum in the unit or in a substitute unit to prevent or alleviate the outage or to prevent or alleviate the emergency if he complies with procedures contained in paragraph (b) of this section.

(b) If the use of minimum amounts of petroleum or natural gas is required for purposes specified in this section, the owner or operator must notify OFE of such use by telegram or telephone within 24 hours after the commencement of such use. Immediately thereafter a written confirmation must be submitted to OFE, describing, to the best estimate of the owner or operator,

§ 501.192

(1) the nature of the emergency and (2) how long petroleum or natural gas use is likely to be required.

(c) For purposes of this section only:

(1) An *emergency* is the occurrence or threat of imminent occurrence of a condition which results or would result from an electric power outage and directly effects or would directly effect the public health, safety or welfare;

(2) *Unanticipated equipment outage* shall mean an unexpected outage due to equipment failure.

(3) *Minimum amounts required to alleviate or prevent* shall mean:

(i) For powerplants, the amounts of natural gas or petroleum required to prevent curtailment of electric supply where the operating utility has, to the maximum extent possible, utilized alternate fuel-fired capacity to prevent such curtailment. Note—A utility operating hydroelectric facilities may take into account seasonal fluctuations in storage capacity and shall be permitted to prevent depletion of stored power-producing capacity as deemed necessary by the utility; and

(ii) For installations, the amounts of natural gas or petroleum required to meet plant protection or human health and safety needs, including services to hospitals, public transportation facilities, sanitation, or water supply and pumping.

[46 FR 59889, Dec. 7, 1981, as amended at 54 FR 52893, Dec. 22, 1989]

§ 501.192 [Reserved]

PART 503—NEW FACILITIES

Subpart A—General Prohibition

Sec.

503.1 Purpose and scope.

503.2 Prohibition.

503.3 [Reserved]

Subpart B—General Requirements for Exemptions

503.4 Purpose and scope.

503.5 Contents of petition.

503.6 Cost calculations for new powerplants and installations.

503.7 State approval—general requirement for new powerplants.

503.8 No alternate power supply—general requirement for certain exemptions for new powerplants.

10 CFR Ch. II (1–1–16 Edition)

503.9 Use of mixtures—general requirement for certain permanent exemptions.

503.10 Use of fluidized bed combustion not feasible—general requirement for permanent exemptions.

503.11 Alternative sites—general requirement for permanent exemptions for new powerplants.

503.12 Terms and conditions; compliance plans.

503.13 Environmental impact analysis.

503.14 Fuels search.

Subpart C—Temporary Exemptions for New Facilities

503.20 Purpose and scope.

503.21 Lack of alternate fuel supply.

503.22 Site limitations.

503.23 Inability to comply with applicable environmental requirements.

503.24 Future use of synthetic fuels.

503.25 Public interest.

Subpart D—Permanent Exemptions for New Facilities

503.30 Purpose and scope.

503.31 Lack of alternate fuel supply for the first 10 years of useful life.

503.32 Lack of alternate fuel supply at a cost which does not substantially exceed the cost of using imported petroleum.

503.33 Site limitations.

503.34 Inability to comply with applicable environmental requirements.

503.35 Inability to obtain adequate capital.

503.36 State or local requirements.

503.37 Cogeneration.

503.38 Permanent exemption for certain fuel mixtures containing natural gas or petroleum.

SOURCE: 46 FR 59903, Dec. 7, 1981, unless otherwise noted.

(OMB Control No.: 1903–0075. See 46 FR 63209, Dec. 31, 1981.)

Subpart A—General Prohibition

§ 503.1 Purpose and scope.

This subpart sets forth the statutory prohibition imposed by the Act upon new powerplants. The prohibition in the subpart applies to all new baseload

Department of Energy

§ 503.6

electric powerplants unless an exemption has been granted by OFE under subparts C and D of this part. Any person who owns, controls, rents, leases or operates a new powerplant that is subject to the prohibition may be subject to sanctions provided by the Act or these regulations.

[54 FR 52893, Dec. 22, 1989]

§ 503.2 Prohibition.

Section 201 of the Act prohibits, unless an exemption has been granted under subpart C or D of this part, any new electric powerplant from being constructed or operated as a baseload powerplant without the capability to use coal or another alternate fuel as a primary energy source.

[54 FR 52893, Dec. 22, 1989]

§ 503.3 [Reserved]

Subpart B—General Requirements for Exemptions

§ 503.4 Purpose and scope.

This subpart establishes the general requirements necessary to qualify for either a temporary or permanent exemption under this part and sets out the methodology for calculating the cost of using an alternate fuel and the cost of using imported petroleum.

§ 503.5 Contents of petition.

Before OFE will accept a petition for either a temporary or permanent exemption under this part, the petition must include all of the evidence and information required in this part and part 501 of this chapter.

§ 503.6 Cost calculations for new powerplants and installations.

(a) *General.* (1) This calculation compares the cost of using alternate fuel to the cost of using imported petroleum. It must be performed for each alternate fuel and/or alternate site that the petitioner is required to examine.

(2) The cost of using an alternate fuel as a primary energy source will be deemed to substantially exceed the cost of using imported petroleum if the difference between the cost of using alternate fuel and the cost of using imported oil is greater than zero.

(3) There are two comparative cost calculations—a general cost test and a special cost test. Both take into consideration cash outlays for capital investments, annual expenses, and the effect of depreciation and taxes on cash flow. To demonstrate eligibility for a permanent exemption, a petitioner must use the procedures specified in the general cost test (paragraph (b) of this section). To demonstrate eligibility for a temporary exemption, the petitioner may apply the procedures specified in either the general cost test or the special cost test (paragraph (c) of this section).

(b) *Cost calculation—general cost test.*

(1) A petitioner may be eligible for a permanent exemption if he can demonstrate that the cost of using an alternate fuel from the first year of operation substantially exceeds the cost of using imported petroleum. Unless the best practicable cost estimates as prescribed below will not materially change during the first ten years of operation of the unit (given the best information available at the time the petition is filed), the petitioner must also demonstrate that the cost of using an alternate fuel beginning at any time within the first ten years of operation and using imported petroleum or natural gas until such time (*i.e.*, delayed use of alternate fuel) would substantially exceed the cost of using only imported petroleum.

(2) The petitioner would only be eligible for a temporary exemption if the computed costs of delayed alternate fuel use, commencing at the start of the second through eleventh years of operation, do not always substantially exceed the cost of using only imported petroleum. The length of the temporary exemption would be the minimum period from the start of operation in which the cost of using alternate fuel substantially exceeds the cost of using imported petroleum.

(3) To conduct the general cost test, calculate the difference (DELTA) between the cost of using an alternate fuel (COST(ALTERNATE)) and the cost of using imported petroleum (COST(OIL)) using Equations 1 through 3 below and the comparison procedures in paragraph (b)(5) of this section.

EQ 1 **DELTA = COST (ALTERNATE) - COST (OIL)**

where COST(ALTERNATE) and COST(OIL) are determined by:

EQ 2 **COST = I + $\sum_{i=1}^N \frac{(OM_i + FL_i)(1-t_i)}{(1+k)^i}$**

and I (capital investment) is:

EQ 3 **I = $\sum_{i=-g}^N \frac{I_i - ITC_i - S_i - t_i(DPR_i) \left(\frac{IX_e}{IX_i} \right)}{(1+k)^i}$**

(4) The terms in Equations 2 and 3 are defined as follows:

- i = Year. i is a specified year either before year 0 or after year 0. Year 0 is the year before the unit becomes operational. For example, in the third year before the unit becomes operational, i would equal -2, and in the third year following commencement of operations of the unit, i would equal +3. Years are represented by 52 week periods prior to or following the date on which the unit becomes operational. Outlays before the unit becomes operational are future valued to the year before the unit becomes operational (year 0), and outlays after the unit becomes operational are present valued to the year before the unit becomes operational. Year 0 must be the same for the units being compared.
- g = The number of years prior to the year before the unit becomes operational (year 0) that (1) a cash outlay is first made for capital investments, or (2) an investment tax credit is first used—whichever occurs first.
- N = The useful life of the unit (see paragraph (d)(5) of this section).
- I_i = Yearly cash outlay (in dollars) from the year outlays first occur to the last year of the unit's useful life for capital investments. (See paragraph (d)(2) of this section for the items that must be included.)

- OM_i = Annual cash outlay in year i (in dollars) for all operations and maintenance expenses except fuel (i.e., all non-capital and non-fuel cash outlays caused by putting the capital investments (I) into service). This may include labor, materials, insurance, taxes (except income taxes), etc. (See paragraph (d)(3) of this section.)
- S_i = Salvage value of capital investment (in dollars) in year i.
- FL_i = Annual cash outlay for delivered fuel expenses (in dollars) in year i. (See paragraph (d)(3) of this section for FL_i calculation instructions and appendix II of these regulations for the procedures to determine fuel price.)
- k = The discount rate expressed as a fraction (see paragraph (d)(4) of this section).
- ITC_i = Federal investment tax credit used in year i resulting from capital investments (see paragraph (d)(6) of this section).
- DPR_i = Depreciation in year i resulting from capital investments (see paragraph (d)(6) of this section).
- t_i = Marginal income tax rate in year i (see paragraph (d)(6) of this section).
- IX_i = Inflation index value for year i (see appendix II to part 504 for method of computation).
- IX_e = Inflation index value for the year e, the year before the asset is placed in service.

(5) The step-by-step procedure that follows shows the comparison that the petitioner must make.

Department of Energy

§ 503.6

(i) Compute the cost of using an alternate fuel (COST(ALTERNATE)) unit throughout the useful life of the unit using Equations 2 and 3.

(ii) Compute the cost of using oil or natural gas (COST(OIL)) throughout the useful life of the unit using Equations 2 and 3.

(iii) Using Equation 1, compute the difference (DELTA) between COST (ALTERNATE) and COST (OIL). If the difference (DELTA) is less than or equal to zero, a petitioner is not eligible for a permanent or temporary exemption using the general cost test and need not complete the remainder of the general cost test calculation. However, he still may be eligible for a temporary exemption using the special cost test (paragraph (c) of this section). If the difference (DELTA) is greater than zero and if the best practicable cost estimates will not materially change during the first ten years of operation (given the best information available at the time the petition is filed), the petitioner has completed the test and is eligible for a permanent exemption. However, if the best practicable cost estimate will materially change during the first ten years, the petitioner must complete the remainder of the general cost test—the delayed use calculations which follow.

(iv) Recompute COST (ALTERNATE) with Equations 2 and 3, assuming that an alternate fuel is not used as the primary energy source until the start of the second year of operation and that imported petroleum or natural gas is used for the first year of operation. All cash outlays should reflect postponed use of alternate fuel.

(v) Successively recompute COST (ALTERNATE) with Equations 2 and 3, assuming that the alternate fuel use is postponed until the start of the third year, fourth year, and so on, through the beginning of the eleventh year of

operation (with imported petroleum or natural gas used in the years preceding alternate fuel use).

(vi) Compute the difference (DELTA) between each of the ten COST(ALTERNATE)s calculated in paragraph (b)(5) (iv) and (v) of this section and the COST(OIL) calculated in paragraph (b)(5)(ii) of this section.

(vii) If *all* the DELTAs computed in paragraph (b)(5) (iii) and (vi) of this section are greater than zero, the petitioner is eligible for a permanent exemption. If one or more of the DELTAs is less than or equal to zero, he is eligible for a temporary exemption for the period beginning at the start of the first year of operation and terminating at the beginning of the first year in which a DELTA is zero or less.

(c) *Cost calculations—special cost test.*

(1) A petitioner may be eligible for a temporary exemption if he demonstrates that the cost of using an alternate fuel will substantially exceed the cost of using imported petroleum or (natural gas) over the period of the proposed exemption. The period of the proposed temporary exemption may not exceed ten years.

The petitioner must demonstrate that the cost of using an alternate fuel substantially exceeds the cost of using imported petroleum for the first year of operation, the first two years of operation, and so forth, through the period of the proposed exemption. OFE will limit the duration of a temporary exemption to the shortest time possible.

(2) To conduct the test, calculate the difference (DELTA) between the cost of using an alternate fuel (COST (ALTERNATE)) and the cost of using imported petroleum (COST (OIL)) using Equations 4 and 5 below, Equation 3 (paragraph (b)(3) of this section), and the comparison procedures in paragraph (c)(4) of this section.

EQ 4 **DELTA = COST (ALTERNATE) - COST (OIL)**

where COST(ALTERNATE) and COST(OIL) are determined by:

EQ 5 **COST = I x**
$$\frac{\sum_{i=1}^P (1+k)^{-i}}{\sum_{i=1}^N (1+k)^{-i}} + \sum_{i=1}^P \frac{(OM_i + FL_i)(1-t_i)}{(1+k)^i}$$

Capital investment (I) is calculated with Equation 3 (paragraph (b)(3) of this section).

(3) The terms in Equation 5 are the same as those in Equation 2 with the addition of P, the length of the proposed temporary exemption in years. (See paragraph (b)(4) of this section for other terms.)

(4) The step-by-step procedure that follows shows the comparisons which must be made.

(i) Using Equation 5, compute the cost of using an alternate fuel (COST(ALTERNATE)) assuming the length of the proposed exemption is one year.

(ii) Likewise, compute the cost of using imported petroleum or natural gas (COST(OIL)) assuming the length of the proposed exemption is one year.

(iii) Compute the difference (DELTA) between COST (ALTERNATE) and COST (OIL) using Equation 4.

(iv) Repeat the calculations made in (i), (ii), and (iii) above, assuming the length of the proposed exemption is two years, three years, four years, and so on, up through the period of the proposed exemption.

(v) A petitioner is eligible for a temporary exemption for the period beginning at the start of the first year of operation and terminating at the beginning of the first year in which a DELTA is zero or less.

(d) *Information on parameters used in the calculations.* (1) All estimated expenditures, except fuel, shall be expressed in real terms (unadjusted for inflation) by using the prices in effect

at the time the petition is submitted. Instructions for fuel price calculations are contained in appendix II.

(2) Capital investment yearly cash outlays (I_i) must include all items that are capital investments for Federal income tax purposes. All purchased equipment that has a useful life greater than one year, capitalized engineering costs, land, construction, environmental offsets, fuel inventory, transmission facilities, piping, etc., that are necessary for the operation of the unit must be included. However, an item must only be included if a cash outlay is required after the decision has been made to build the unit; sunk costs must not be included (e.g., if the firm owns the land, its purchase price may not be included).

NOTE: The guidelines for the fuel inventory for powerplants not using natural gas shall be: (a) All powerplants with only steam driven turbines—78 days, (b) all powerplants with only combustion turbines—142 days, (c) all powerplants with combined cycles—both steam driven turbines and combustion turbines—142 days. The guidelines for the fuel inventory for installations not using natural gas shall be the greater of: (1) 21 days fuel supply, or (2) sufficient fuel to fill sixty (60) percent of the storage volume. The guidelines for the fuel inventory for all facilities using natural gas shall be zero unless the gas supply is interruptible in which case an appropriate inventory of back-up fuel must be included. Other inventory levels may be used if they are more appropriate than these guidelines; however, the source or derivation of these levels must be discussed in the evidential summary.

Department of Energy

§ 503.6

(3)(i) The annual cash outlays for operations and maintenance expense (OM_i) and fuel expense (FL_i) for a powerplant may be computed by one of the following three methods; however, the one chosen must be consistently applied throughout the analysis.

(A) Assume the energy produced by the powerplant equals seventy (70) percent of design capacity times 8760 hours for each year during the life of the powerplant, and compute cash outlays for operations, maintenance, and fuel expenses for the powerplant.

(B) *Economically dispatch the new powerplant.* The cash outlays for operations, maintenance, and fuel expenses of all powerplants being dispatched (where oil and natural gas are priced according to the procedures of appendix II¹) are the corresponding expenses for the purpose of the cost calculation. The dispatch analysis area must be that area with which the firm currently dispatches, anticipates dispatching, and will be interconnected. It must also include all anticipated exchanges of energy with other utilities or powerpools. The outlays for operations, maintenance, and fuel may also be estimated using a methodology that incorporates the benefits of economically dispatching units and provides consistent treatment in the alternate fuel and oil or natural gas cases being compared.

(C) Use a dispatch analysis to project the energy produced by the powerplant for a representative (not atypical) year of operation when consuming an alternate fuel. Compute the cash outlays for operations, maintenance, and fuel expenses for the powerplant based upon the level of energy production estimated for the representative year. The dispatch analysis and fuel expenses for the cost calculation must include oil and natural gas priced according to the procedures of appendix II.¹

(ii) When computing the annual cash outlays for operations and maintenance expense (OM_i) and fuel expense (FL_i) for an installation, specify the firing rates and the length of time each firing rate will be maintained.

(4) The discount rate (k) for analyses is 2.9 percent or that which is computed as specified in appendix I. The method of computing the inflation

index (IX) is shown in appendix II to part 504. OFE will modify these specified rates from time to time as required by changed conditions after public notice and an opportunity to comment. However, the relevant set of specified rates for a specific petition for exemption will be the set in effect at the time the petition is submitted or the set in effect at the time a decision is rendered, whichever set is more favorable to the petitioner.

(5)(i) The guidelines for the useful life (N) of all powerplants except nuclear will be thirty-five (35) years. The guidelines for the useful life of a nuclear powerplant will be forty (40) years. The guidelines for the useful life of major fuel burning installations will be forty (40) years. Other useful life projections may be used if they are more appropriate than these guidelines; however, the source or derivation of these projections must be contained in the evidential summary. The summary should include a discussion of engineering, economic historical or other evidence.

(ii) If the units being compared have different useful lives, the petitioner will have to modify his calculation so that the two cash flows being compared have the length of the shorter useful life. To do this, (A) use the shorter of the two useful lives in Equations 2 and 5 for both units, and (B) multiply capital investment (I) of the unit with the longer life (computed with Equation 3) by the following adjustment factor (A):

$$EQ\ 6\ A = \frac{\sum_{i=1}^Q (1+k)^{-i}}{\sum_{i=1}^R (1+k)^{-i}}$$

where:

R = The useful life of the facility with the longer life.

Q = The useful life of the facility with the shorter life.

k = The discount rate (see paragraph (d)(4) above).

(6) All Federal investment tax credits (ITC_i) and depreciation (PR_i) values are those used for Federal income tax purposes and must be applied consistently throughout the analysis and in a manner consistent with the Federal tax

§ 503.7

laws. All investment tax credits allowed under Federal tax law must be reflected in the computations. The petitioner must use the method of depreciation which results in the greatest present value of the cash flow due to the tax and depreciation effect. The marginal income tax rate (t_i) is the firm's anticipated marginal Federal income tax rate in year i . The relevant investment tax credits, depreciation methodology, and marginal Federal income tax rates for a specific exemption petition will be those prescribed by Federal law in effect (or those tax parameters which are known with certainty will be in effect) at the time a decision is rendered. (However, if an investment tax credit expires in a certain year under the law which is in effect at the time the petition is submitted, the petitioner must assume that it will in fact expire in that year.)

(7) If powerplants are being compared, the design capacities or the maximum sustained energy per unit of time that could be produced must be the same. If installations are being compared, the maximum sustained energy per unit of time that could be produced must be the same.

(8) All estimated cash outlays must be computed in accordance with generally accepted accounting principles consistently applied.

(9) The scope of the estimates of relevant costs (as discussed above) of units being compared must be the same.

(10) All allowances for uncertainty and risk in the cost estimates must be explicit.

(11) All cash outlays must be net of any government subsidies or grants.

(e) *Evidence in support of the cost calculation.* Petitioners for an exemption which requires the use of the cost calculation shall certify that the cost of using alternate fuel substantially exceeds the cost of using oil as primary energy source as calculated in this section. A brief summary of the petitioner's supporting calculations and estimates shall be submitted with the certification. The summary should include the following:

(1) Cash outlays, Investment tax credits, depreciation methodologies, and anticipated salvage for capital in-

10 CFR Ch. II (1-1-16 Edition)

vestments including a description of all major construction and equipment;

(2) Annual cash outlays for operations and maintenance expenses including the formulas used to compute them; and

(3) Annual cash outlays for delivered fuel expenses including the formulas used to compute them.

[46 FR 59903, Dec. 7, 1981; 46 FR 63033, Dec. 30, 1981; 47 FR 15314, Apr. 9, 1982; 54 FR 52893, Dec. 22, 1989]

§ 503.7 State approval—general requirement for new powerplants.

(a) Where approvals by the appropriate State regulatory authority are required prior to the construction or use of a new powerplant, a petition for an exemption for consideration by OFE may be submitted to OFE prior to obtaining such approvals from the State regulatory authority.

(b) An exemption granted for a powerplant shall not become effective until an adequate demonstration has been made to OFE that all applicable approvals required by the State regulatory authorities have been obtained.

§ 503.8 No alternate power supply—general requirement for certain exemptions for new powerplants.

(a) *Application.* To qualify for an exemption, except in the case of an exemption for cogeneration units, section 213(c) of the Act requires a demonstration that, despite reasonable good faith efforts, there is no alternative supply of electric power available within a reasonable distance at a reasonable cost without impairing short-run or long-run reliability of service. If a petitioner is unable to demonstrate that there is no alternate supply during the first year of operation, OFE will conclude that the absence of the proposed powerplant will not impair short-term reliability of service, and as a result will not grant the exemption. Such action would not impair long-term reliability of service, since a petition may be submitted for a powerplant that would begin operation in a subsequent year.

(b) *Criteria.* To meet the demonstration required under paragraph (a) of this section, a petitioner must certify that:

Department of Energy

§ 503.10

(1) A diligent effort has been made to purchase firm power for the first year of operation to cover all or part of the projected shortfall at a cost that is less than ten (10) percent above the annualized cost of generating power from the proposed plant (including the capital, operation and maintenance expenses, and fuel prices); and

(2)(i) Despite these efforts, the reserve margin in the petitioner's electric region, normal dispatch area, or service area, in the absence of the proposed plant, would fall below twenty (20) percent during the first year of proposed operation; or

(ii) Despite these efforts, the reserve margin will be greater than twenty (20) percent but reliability of service would be impaired. In such case, the certification must be related to factors not included in the calculation of reserve margin, such as transmission constraints.

(c) *Evidence.* The petition must include the following evidence in order to make the demonstration required by this section:

(1) Duly executed certification required under paragraph (b) of this section; and

(2) Exhibits containing the basis for the certification submitted under this section (including those factual and analytical materials deemed by the petitioner to be sufficient to support its certification to this general requirement).

(d) *FERC consultation.* OFE will forward a copy of any petition for which a showing is required under this section to FERC promptly after it is filed with OFE, and OFE will consult with FERC before making the no alternate supply of power finding.

[46 FR 59903, Dec. 7, 1981, as amended at 47 FR 15314, Apr. 9, 1982; 54 FR 52894, Dec. 22, 1989]

§ 503.9 Use of mixtures—general requirement for certain permanent exemptions.

(a) *Criteria.* To qualify for a permanent exemption, except in the case of an exemption for fuel mixtures, section 213(a)(1) of the Act requires a demonstration that the use of a mixture of natural gas and petroleum and an alternate fuel for which an exemption

under 10 CFR 503.38 (Fuel mixtures) would be available, would not be economically or technically feasible.

(b) *Evidence.* The petition must include the following evidence in order to make the demonstration required by this section:

(1) Duly executed certifications to the criteria set forth in paragraph (a) of this section; and

(2) Exhibits containing the basis for the certifications submitted under this section (including those factual and analytical materials deemed by the petitioner to be sufficient to support its certifications to this general requirement.)

NOTE: In meeting this general requirement, OFE will require a petitioner to examine only mixtures of oil and coal and natural gas and coal, or, where petitioner wishes to examine an additional or substitute mixture, such other alternate fuels as OFE and the petitioner agree are reasonable to petitioner's circumstances.

[46 FR 59903, Dec. 7, 1981, as amended at 54 FR 52894, Dec. 22, 1989]

§ 503.10 Use of fluidized bed combustion not feasible—general requirement for permanent exemptions.

(a) *OFE finding.* Except in the case of an exemption for fuel mixtures, OFE may deny permanent exemptions authorized under section 212 of the Act if OFE finds on a site-specific or generic basis that use of a method of fluidized bed combustion of an alternate fuel is economically and technically feasible.

(b) *Demonstration.* If OFE has made such a finding, OFE will deny a petitioner's request for exemption unless the petitioner demonstrated that the use of a method of fluidized bed combustion is not economically or technically feasible. The petition or any supplement thereto required by OFE must include the following evidence:

(1) If use of a method of fluidized bed combustion were to be required, evidence that the petitioner would be eligible for a permanent exemption for lack of alternate fuel supply, site limitations, environmental requirements, lack of adequate capital, or State or local requirements; or

§ 503.11

(2) Use of a method of fluidized bed combustion is not technically or economically feasible due to design or special circumstances.

[46 FR 59903, Dec. 7, 1981, as amended at 54 FR 52894, Dec. 22, 1989]

§ 503.11 Alternative sites—general requirement for permanent exemptions for new powerplants.

(a) *Criteria.* To qualify for permanent exemption due to lack of alternate fuel supply, site limitations, environmental requirements, or inadequate capital, section 212(a) of the Act requires a demonstration that one of these exemptions would be available for any reasonable alternative site for the facility.

(b) *Evidence.* The petition must include the following evidence in order to make the demonstration required by this section:

(1) Duly executed certifications to the criteria set forth in paragraph (a) of this section; and

(2) Exhibits containing the basis for the certifications submitted under this section (including those factual and analytical materials deemed by the petitioner to be sufficient to support its certifications to this general requirement).

[46 FR 59903, Dec. 7, 1981, as amended at 54 FR 52894, Dec. 22, 1989]

§ 503.12 Terms and conditions; compliance plans.

(a) *Terms and conditions generally.* A petitioner must comply with any terms and conditions imposed upon the grant of an exemption petition. OFE will limit any such terms and conditions to the unit(s) which is the subject of the petition.

(b) *Compliance plans for temporary exemptions.* (1) Any compliance plan required to accompany a petition for a temporary exemption shall include the following:

(i) A detailed schedule of progressive events and the dates upon which the events are to take place, indicating how compliance with the applicable prohibitions of the Act will occur;

(ii) Evidence of binding contracts for fuel, or for facilities for the production of fuel, which are required for compli-

10 CFR Ch. II (1–1–16 Edition)

ance with the applicable prohibitions of the Act;

(iii) A schedule indicating how any necessary permits and approvals required to burn an alternate fuel will be obtained; and

(iv) Any other documentary evidence which indicates an ability to comply with the applicable prohibitions of the Act.

(2) Any exemption for which a compliance plan is required shall not be effective until the compliance plan is approved by DOE.

(3) If the petition is granted, an updated, duly executed plan must be submitted to OFE within one (1) month of an alteration of any milestone in the compliance plan, together with the reasons for the alteration and its impact upon the scheduling of all other milestones in the plan.

§ 503.13 Environmental impact analysis.

In order to enable OFE to comply with NEPA, a petitioner must include the information indicated in this section if a permanent exemption is requested. Material which has been prepared pursuant to any Federal, State or local requirement for environmental information for this unit or site may be incorporated by reference and appended to the petition. Guidelines issued by OFE for environmental reports should be used in preparing this analysis (44 FR 63740, November 5, 1979). These guidelines, which are also available in the OFE public document room, have been designed to insure that environmental reports follow the format prescribed by Council on Environmental Quality final regulations implementing NEPA. The guidelines are subject to discussion at a prepetition conference and to modification according to the facts of a particular case.

(a) All petitions for permanent exemptions must contain the following information:

(1) A description of the facility, including site location, and surroundings, alternative site(s), the facility's current proposed operations, its

Department of Energy

§ 503.14

fuel capability, and its pollution abatement systems and equipment (including those systems and equipment necessary for all fuel scenarios considered);

(2) A description of the existing environment, including air, water, and land resources;

(3) Direct and indirect environmental impacts of the proposed action including impacts of alternative fuel scenarios, and no build alternatives.

(4) Regulatory requirements governing the facility, including a description of Federal, State and local requirements for air, water, noise and solid waste disposal which must be met for each fuel considered.

(b) For exemptions for cogeneration, the information enumerated below is to be submitted in lieu of the information required by paragraph (a) of this section. However, submission of the following information merely establishes a rebuttable presumption that the grant or denial of the exemption would have no significant environmental impact. OFE may, in individual cases, during the course of the administrative proceeding, determine that additional environmental information is required. In such cases, the petitioner will be required to submit the information described in paragraph (a) of this section.

(1) A certification that the petitioner will, prior to operating the unit under the exemption, secure all applicable environmental permits and approvals pursuant to, but not limited to, the following: Clean Air Act, Rivers and Harbors Act, Coastal Zone Management Act, Safe Drinking Water Act, Resource Conservation and Recovery Act; and

(2) Information required by the following environmental checklist must be provided and certified as accurate:

Environmental Checklist for FUA Certification Exemptions Instructions

All questions are to be answered by placing a check in the appropriate box. N/A represents (not applicable). Although it is not required, the petitioner may elaborate on any question in writing on a separate sheet of paper.

	Yes	No	N/A
(1) Is your facility located in, or will it affect a wetland (Protection of Wetlands Executive Order No. 11990)?			
(2) Is your facility located in, or will it affect, a 100-year floodplain (Floodplain Management Executive Order No. 11988)?			
(3) Will your facility affect a designated wild, scenic, or recreation river (Wild and Scenic Rivers Act)?			
(4)(A) Is your facility located within a county in which critical habitat for threatened or endangered species are known to exist (Endangered Species Act)?			
(4)(B) Has a qualified biologist determined that your facility will not affect any species on the Threatened and Endangered Species list?			
(5) Is your facility located on, or will it affect land that has been classified as prime or unique farmland or rangeland by the U.S. Department of Agriculture?			
(6) Is your facility located on, or will it affect, historical archaeological, or cultural resources that have been designated pursuant to the National Historic Preservation Act?			

[46 FR 59903, Dec. 7, 1981, as amended at 47 FR 15315, Apr. 9, 1982; 51 FR 18866, May 22, 1986; 52 FR 658, Jan. 7, 1987; 54 FR 52894, Dec. 22, 1989]

§ 503.14 Fuels search.

Prior to submitting a petition for a permanent exemption for lack of alternate fuel supply, site limitations, inadequate capital, or state or local requirements, a petitioner must examine the use of conventional solid coal as a primary energy source at the site under consideration, and at reasonable alternative sites. Where a petitioner believes that its use of such coal would be infeasible, however, and where OFE and the petitioner can reach accord, it may evaluate use of a different alternate fuel in lieu of solid coal. A petitioner of these exemptions must demonstrate for any fuel examined that he would qualify for an exemption.

[54 FR 52894, Dec. 22, 1989]

Subpart C—Temporary Exemptions for New Facilities

§ 503.20 Purpose and scope.

(a) This subpart implements the provisions contained in section 211 of the Act with regard to temporary exemptions for new facilities.

(b) This subpart establishes the criteria and standards which owners or operators of new powerplants who petition for a temporary exemption must meet to sustain their burden of proof under the Act.

(c) All petitions for temporary exemptions shall be submitted in accordance with the procedures set out in part 501 of this chapter and the applicable requirements of part 503 of these regulations.

(d) The duration of any temporary exemption granted under this subpart shall be measured from the date that the facility is placed in service using petroleum or natural gas.

[46 FR 59903, Dec. 7, 1981, as amended at 54 FR 52894, Dec. 22, 1989]

§ 503.21 Lack of alternate fuel supply.

(a) *Eligibility.* Section 211(a)(1) of the Act provides for a temporary exemption due to the unavailability of an adequate and reliable supply of an alternate fuel at a cost which does not substantially exceed the cost of using imported petroleum. To qualify, a petitioner must certify that:

(1) A good faith effort has been to obtain an adequate and reliable supply of an alternate fuel of the quality necessary to conform to the design and operational requirements of the unit;

(2) For the period of the proposed exemption, the cost of using such alternate fuel would substantially exceed the cost of using imported petroleum as a primary energy source as defined in § 503.6 (Cost calculation) of these regulations;

(3) The petitioner will be able to comply with the applicable prohibitions of the Act at the end of the proposed exemption period; and

(4) No alternate power supply exists, as required under § 503.8 of these regulations.

(b) *Evidence required in support of a petition.* The petition must include the

following evidence in order to make the demonstration required by this section:

(1) Duly executed certifications required under paragraph (a) of this section;

(2) Exhibits containing the basis for the certifications required under paragraph (a) of this section (including those factual and analytical materials deemed by the petitioner to be sufficient to support the granting of this exemption);

(3) All data required by § 503.6 (cost calculation) of these regulations necessary for computing the cost calculation formula; and

(4) The anticipated duration of the lack of alternate fuel supply which constitutes the basis for the exemption.

(c) *Duration.* This temporary exemption, taking into account any extensions or renewals, may not exceed 10 years.

[46 FR 59903, Dec. 7, 1981, as amended at 47 FR 15315, Apr. 9, 1982; 54 FR 52894, Dec. 22, 1989]

§ 503.22 Site limitations.

(a) *Eligibility.* Section 211(a)(2) of the Act provides for a temporary exemption due to a site limitation. To qualify for such an exemption, a petitioner must certify that:

(1) One or more specific physical limitations relevant to the location or operation of the proposed facility exist which, despite diligent good faith efforts, cannot be overcome before the end of the proposed exemption period;

(2) The petitioner will be able to comply with the applicable prohibitions of the Act at the end of the proposed exemption period; and

(3) No alternate power supply exists, as required under § 503.8 of these regulations.

NOTE: Examples of the types of site limitations to which a petitioner may certify in order to qualify for this exemption include:

(i) Inaccessability of alternate fuels as a result of a specific physical limitation;

(ii) Unavailability of transportation facilities for alternate fuels;

(iii) Unavailability of adequate land or facilities for handling, using, or storing an alternate fuel;

(iv) Unavailability of adequate land or facilities for controlling and disposing of wastes, including pollution control equipment or devices necessary to assure compliance with applicable environmental requirements;

(v) Unavailability of adequate and reliable supply of water, including water for use in compliance with applicable environmental requirements; or

(vi) Other site limitations exist which will not permit the location or operation of the proposed unit using an alternate fuel.

(b) *Evidence required in support of a petition.* The petition must include the following evidence in order to make the demonstration required by this section:

(1) Duly executed certifications required under paragraph (a) of this section;

(2) Exhibits containing the basis for the certifications required under paragraph (a) of this section (including those factual and analytical materials deemed by the petitioner to be sufficient to support the granting of this exemption); and

(3) The anticipated duration of the site limitation which constitutes the basis for the exemption.

(c) *Duration.* This temporary exemption, taking into account any extensions and renewals, may not exceed five years.

[46 FR 59903, Dec. 7, 1981, as amended at 54 FR 52894, Dec. 22, 1989]

§ 503.23 Inability to comply with applicable environmental requirements.

(a) *Eligibility.* Section 211(a)(3) of the Act provides for a temporary exemption due to an inability to comply with applicable environmental requirements. To qualify a petitioner must demonstrate that despite diligent good faith efforts:

(1) The petitioner will be unable, as of the projected date of commencement of operation, to comply with the applicable prohibitions of the Act without violating applicable Federal or State environmental requirements; and

(2) The petitioner will be able to comply with the applicable prohibi-

tions of the Act and with applicable environmental requirements by the end of the temporary exemption period.

NOTE: (1) For purposes of considering an exemption under this section, OFE's decision will be based solely on an analysis of the petitioner's capacity to physically achieve applicable environmental requirements. The petition should be directed toward those conditions or circumstances which make it physically impossible to comply during the temporary exemption period. The cost of compliance is not relevant, but cost-related considerations may be presented as part of a demonstration submitted under § 503.21.

(2) Prior to submitting an exemption petition, it is recommended that a meeting be requested with OFE and EPA or the appropriate State or local regulatory agency to discuss options for operating an alternate fuel fired facility in compliance with applicable environmental requirements.

(b) *Evidence required in support of a petition.* The petition must include the following evidence in order to make the demonstration required by this section:

(1) Where the petitioner has applied for a construction permit from EPA or an appropriate State agency prior to petitioning for an exemption under this section, a copy of that application and synopsis of supporting documents filed with or subsequent to that application must be submitted to OFE with the petition or at the time filed with the permitting agency;

(2) To the extent applicable, a copy of the EPA or State denial of the construction permit application;

(3) To the extent applicable, a synopsis of the administrative record of the EPA or State or local permit proceedings;

(4) To the extent applicable, a summary of the technology upon which the denial was based, including a performance comparison between the proposed technology and that technology which would provide the maximum possible reduction of pollution;

(5) An examination of the environmental compliance of the facility, including an analysis of its ability to meet applicable standards and criteria when using both the proposed fuel and the alternate fuel(s) which would provide the basis for exemption. All such analysis must be based on accepted analytical techniques, such as air quality

§ 503.24

modeling, and reflect current conditions of the area which would be affected by the facility. The petitioner is responsible for obtaining the necessary data to accurately characterize these conditions. Environmental compliance must be examined in the context of available pollution control equipment which would provide the maximum possible reduction of pollution. The analysis must contain: (i) Requests for bids and other inquiries made and responses received by the petitioner concerning the availability and performance of pollution control equipment; (ii) contracts signed, if any, for an alternate fuel supply and for the purchase and installation of pollution control equipment; or (iii) other comparable evidence such as technical studies documenting the efficacy of equipment to meet applicable requirements;

(6) An examination of any regulatory options available to the petitioner in seeking to achieve environmental compliance (such as offsets, variances, and State Implementation Plan revisions);

(7) Any other documentation which demonstrates an inability to comply with applicable environmental requirements;

(8) No alternate power supply exists, as required under § 503.8 of these regulations.

(c) *Duration.* This temporary exemption, taking into account any extension and renewals, may not exceed 5 years.

(d) *Certification alternative.* (1) To qualify for this exemption, in lieu of meeting the evidentiary requirements of paragraph (b) of this chapter, a petitioner may certify that, for the period of the exemption:

(i) The site for the facility is or will be located in a Class I area or Class II area in which the allowable increment established by law has been consumed, as defined in part C of the Clean Air Act; the use of an alternate fuel will cause or contribute to concentrations of pollutants which would exceed the maximum allowable increases in a Class I or Class II area even with the application of best available control technology; the site for the facility is or will be located in a non-attainment area as defined in part D of the Clean Air Act for any pollutant which would

10 CFR Ch. II (1-1-16 Edition)

be emitted by the facility; or, even with the application of the lowest achievable emission rate, the use of an alternate fuel will cause or contribute to concentrations in an air quality control region, of a pollutant for which any national ambient air quality standard is or would be exceeded; and

(ii) No alternate power supply exists, as required under § 503.8 of these regulations.

(2) A petition by certification under this paragraph must include:

(i) Duly executed certifications required under paragraph (d)(1) of this section;

(ii) Exhibits containing the basis for the certifications required under paragraph (d)(1) of this section (including those factual and analytical materials deemed by the petitioner to be sufficient to support the granting of this exemption); and

(iii) The anticipated duration of the circumstances which constitute the basis for the exemption.

[46 FR 59903, Dec. 7, 1981, as amended at 54 FR 52894, Dec. 22, 1989]

§ 503.24 Future use of synthetic fuels.

(a) *Eligibility.* Section 211(b) of the Act provides for a temporary exemption based upon the future use of synthetic fuels. To qualify, a petitioner must certify that:

(1) The petitioner will be able to comply with the applicable prohibitions imposed by the Act by the use of a synthetic fuel derived from coal or another alternate fuel as a primary energy source in the proposed facility by the end of the proposed exemption period;

(2) The petitioner will not be able to comply with the applicable prohibitions imposed by the Act by use of a synthetic fuel until the end of the proposed exemption period; and

(3) No alternate power supply exists, as required under § 503.8 of these regulations.

(b) *Evidence required in support of a petition.* The petition must include the following evidence in order to make the demonstration required by this section:

(1) Duly executed certifications required under paragraph (a) of this section;

Department of Energy

§ 503.31

(2) Exhibits containing the basis for the certifications required under paragraph (a) of this section (including those factual and analytical materials deemed by the petitioner to be sufficient to support the granting of this exemption); and

(3) A preliminary compliance plan, including to the extent available, the information required under § 503.12.

(c) *Final Compliance Plan.* Before an exemption may become effective, the petitioner must submit and OFE must approve a final compliance plan as required by § 503.12.

(d) *Duration.* This temporary exemption may be granted for a period of up to ten (10) years. Unless the petitioner requests otherwise, any temporary exemption from the fuel use prohibitions of the Act for the future use of synthetic fuels will commence on the date of commercial operation of the facility.

NOTE: Contracts based on the anticipated successful demonstration of a development program and/or the anticipated economic feasibility of a synthetic fuels facility, will generally be sufficient to meet the "binding contract" requirements for this exemption.

[46 FR 59903, Dec. 7, 1981; 47 FR 15315, Apr. 9, 1982; 54 FR 52894, Dec. 22, 1989]

§ 503.25 Public interest.

(a) *Eligibility.* Section 211(c) of the Act provides for a temporary public interest exemption. To qualify, a petitioner must demonstrate that:

(1) The unit will be capable of complying with the applicable prohibitions at the end of the proposed exemption period;

(2) The granting of the exemption would be in accord with the purposes of the Act and would be in the public interest; and

(3) No alternate power supply exists, as required under § 503.8 of these regulations.

(b) *Evidence required in support of a petition.* The petition must include the following evidence in order to make the demonstration required by this section:

(1) Substantial evidence to corroborate the eligibility requirements identified above; and

(2) The anticipated duration of the circumstances which constitute the basis for the exemption.

(c) *Certification alternative.* If the petitioner requires use of oil or natural gas in a unit, during the construction of an alternate-fuel fired unit, the petitioner may substitute, in lieu of the evidentiary requirements of paragraphs (b)(1) and (2) of this section:

(1) A duly executed certification, including the requested duration of the exemption, that the unit will be operated on oil or natural gas only during the construction of an alternate fuel fired unit to be owned or operated by the petitioner; and

(2) Exhibits containing the basis for the certifications required under paragraph (c)(1) of this section (including those factual and analytical materials deemed by the petitioner to be sufficient to support the granting of this exemption).

(d) *Duration.* This temporary exemption, taking into account extension and renewals, may not exceed 5 years.

[46 FR 59903, Dec. 7, 1981, as amended at 54 FR 52894, Dec. 22, 1989]

Subpart D—Permanent Exemptions for New Facilities

§ 503.30 Purpose and scope.

(a) This subpart implements the provisions contained in section 212 of the Act with regard to permanent exemptions for new facilities.

(b) This subpart establishes the criteria and standards which owners or operators of new powerplants and installations who petition for a permanent exemption must meet to sustain their burden of proof under the Act.

(c) All petitions for permanent exemptions for new facilities shall be submitted in accordance with the procedures set out in part 501 of this chapter and the applicable requirements of part 503 of these regulations.

§ 503.31 Lack of alternate fuel supply for the first 10 years of useful life.

(a) *Eligibility.* Section 212(a)(1)(A)(i) of the Act provides for a permanent exemption due to lack of an adequate and reliable supply of alternate fuel within the first 10 years of useful life of the proposed unit. To qualify, a petitioner must certify that:

§ 503.32

10 CFR Ch. II (1–1–16 Edition)

(1) A good faith effort has been made to obtain an adequate and reliable supply of an alternate fuel for use as a primary energy source of the quality and quantity necessary to conform with the design and operational requirements of the unit;

(2) Such a supply is not likely to be available within the first 10 years of useful life of the proposed unit;

(3) No alternate power supply exists, as required under § 503.8 of these regulations;

(4) Use of mixtures is not feasible, as required under § 503.9 of these regulations; and

(5) Alternative sites are not available, as required under § 503.11 of these regulations.

(b) *Evidence required in support of a petition.* A petition must include the following evidence in order to make the demonstration required by this section:

(1) Duly executed certifications required under paragraph (a) of this section;

(2) Exhibits containing the basis for the certifications required under paragraph (a) of this section (including those factual and analytical materials deemed by the petitioner to be sufficient to support the granting of this exemption);

(3) Environmental impact analysis, as required under § 503.13 of these regulations; and

(4) Fuels search, as required under § 503.14 of these regulations.

[46 FR 59903, Dec. 7, 1981, as amended at 54 FR 52895, Dec. 22, 1989]

§ 503.32 Lack of alternate fuel supply at a cost which does not substantially exceed the cost of using imported petroleum.

(a) *Eligibility.* Section 212(a)(1)(A)(ii) of the Act provides for a permanent exemption due to lack of an alternate fuel supply at a cost which does not substantially exceed the cost of using imported petroleum. To qualify a petitioner must certify that:

(1) A good faith effort has been made to obtain an adequate and reliable supply of an alternate fuel for use as a primary energy source of the quality and quantity necessary to conform with

the design and operational requirements of the proposed unit;

(2) The cost of using such a supply would substantially exceed the cost of using imported petroleum as a primary energy source during the useful life of the proposed unit as defined in § 503.6 (cost calculation) of these regulations;

(3) No alternate power supply exists, as required under § 503.8 of these regulations.

(4) Use of mixtures is not feasible, as required under § 503.9 of these regulations; and

(5) Alternative sites are not available, as required under § 503.11 of these regulations.

(b) *Evidence required in support of a petition.* The petition must include the following evidence in order to make the demonstration required by this section:

(1) Duly executed certifications required under paragraph (a) of this section;

(2) Exhibits containing the basis for certifications required under paragraph (a) of this section (including those factual and analytical materials deemed by the petitioner to be sufficient to support the granting of this exemption);

(3) Environmental impact analysis, as required under § 503.13 of these regulations;

(4) Fuels search, as required under § 503.14 of these regulations; and

(5) All data required by § 503.6 (cost calculation) of these regulations necessary for computing the cost calculation formula.

[46 FR 59903, Dec. 7, 1981, as amended at 47 FR 15315, Apr. 9, 1982; 54 FR 52895, Dec. 22, 1989]

§ 503.33 Site limitations.

(a) *Eligibility.* Section 212(a)(1)(B) of the Act provides for a permanent exemption due to site limitations. To qualify for such an exemption, a petitioner must certify that:

(1) One or more specific physical limitations relevant to the location or operation of the proposed facility exist which, despite good faith efforts, cannot reasonably be expected to be overcome within five years after commencement of operations;

(2) No alternate power supply exists, as required under §503.8 of these regulations;

(3) Use of mixtures is not feasible, as required under §503.9 of these regulations; and

(4) Alternative sites are not available, as required under §503.11 of these regulations.

NOTE: Examples of the types of site limitations to which a petitioner may certify in order to qualify for this exemption include:

(i) Inaccessibility of alternate fuels as a result of a specific physical limitation;

(ii) Unavailability of transportation facilities for alternate fuels;

(iii) Unavailability of adequate land or facilities for handling, using or storing an alternate fuel;

(iv) Unavailability of adequate land or facilities for controlling and disposing of wastes, including pollution control equipment or devices necessary to assure compliance with applicable environmental requirements;

(v) Unavailability of adequate and reliable supply of water, including water for use in compliance with applicable environmental requirements; or

(vi) Other site limitations exist which will not permit the location or operation of the proposed unit using an alternate fuel.

(b) *Evidence required in support of the petition.* A petitioner must include in the petition the following evidence in order to make the demonstration required by this section:

(1) Duly executed certifications required under paragraph (a) of this section;

(2) Exhibits containing the basis for the certifications required under paragraph (a) of this section (including those factual and analytical materials deemed by the petitioner to be sufficient to support the granting of this exemption);

(3) Environmental impact analysis, as required under §503.13 of these regulations; and

(4) Fuels search, as required under §503.14 of these regulations.

[46 FR 59903, Dec. 7, 1981, as amended at 54 FR 52895, Dec. 22, 1989]

§ 503.34 Inability to comply with applicable environmental requirements.

(a) *Eligibility.* Section 212(a)(1)(C) of the Act provides for a permanent exemption due to the inability to comply with applicable environmental require-

ments. To qualify, a petitioner must demonstrate that despite good faith efforts:

(1) The petitioner will be unable within 5 years after beginning operation, to comply with the applicable prohibitions imposed by the Act without violating applicable Federal or state environmental requirements; and

(2) Reasonable alternative sites, which would permit the use of alternate fuels in compliance with applicable Federal or state environmental requirements, are not available.

NOTE: (1) For purposes of considering an exemption under this section, OFE's decision will be based solely on an analysis of the petitioner's capacity to physically achieve applicable environmental requirements. The cost of compliance is not relevant, but cost-related considerations may be presented as part of a demonstration submitted under §503.32 (Lack of alternate fuel supply).

(2) Prior to deciding to submit an exemption petition, it is recommended that a petitioner request a meeting with OFE and EPA or the appropriate state or local regulatory agency to discuss options for operating an alternate fuel-fired facility in compliance with the applicable environmental requirements.

(b) [Reserved]

(c) *Evidence required in support of a petition.* The petitioner must include in the petition the following evidence in order to make the demonstration required by this section:

(1) Where the petitioner has applied for a construction permit from EPA or an appropriate state agency prior to petitioning for an exemption from OFE under this section, a copy of such application and a synopsis of all supporting documents filed with or subsequent to the application must be submitted to OFE with the petition or at the time filed with the permitting agency;

(2) To the extent applicable, a copy of the EPA or state denial of the construction permit application;

(3) To the extent applicable, a synopsis of the administrative record of the EPA or state or local permit proceedings;

(4) To the extent applicable, a summary of the technology upon which the denial was based, including a performance comparison between the proposed technology and that technology which

§ 503.35

10 CFR Ch. II (1–1–16 Edition)

provides the maximum possible reduction of pollution;

(5) An examination of the environmental compliance of the facility, including an analysis of its ability to meet applicable standards and criteria when using both the proposed fuel and the alternate fuel(s) which would provide the basis for the exemption. All such analysis must be based on accepted analytical techniques, such as air quality modeling, and reflect current conditions of the area which would be affected by the facility. The petitioner is responsible for obtaining the necessary data to accurately characterize these conditions. Environmental compliance must be examined in the context of available pollution control equipment which would provide the maximum possible reduction of pollution. The analysis must contain: (i) Requests for bids and other inquiries made and responses received by the petitioner concerning the availability and performance of pollution control equipment; or (ii) other comparable evidence such as technical studies documenting the efficacy of equipment to meet applicable requirements;

(6) An examination of any regulatory options available to the petitioner in seeking to achieve environmental compliance (such as offsets, variances and State Implementation Plan (SIP) revisions); and

(7) Any other documentation which demonstrates an inability to comply with applicable environmental requirements;

(8) No alternate power supply exists as required under § 503.8 of these regulations;

(9) Use of mixtures is not feasible, as required under § 503.9 of these regulations;

(10) Alternative sites are not available, as required under § 503.11 of these regulations;

(11) Environmental impact analysis, as required under § 503.13 of these regulations; and

(12) Fuels search, as required under § 503.14 of these regulations.

(d) *Certification alternative.* (1) To qualify for this exemption, in lieu of meeting the evidentiary requirements of paragraph (c) of this section, a petitioner may certify that:

(i) The site for the facility is or will be located in a Class I area or Class II area in which the allowable increment established by law has been consumed, as defined in part C of the Clean Air Act; the use of an alternate fuel will cause or contribute to concentrations of pollutants which would exceed the maximum allowable increases in a Class I or Class II area even with the application of best available control technology; the site for the facility is or will be located in a non-attainment area as defined in part D of the Clean Air Act for any pollutant which would be emitted by the facility; or, even with the application of the lowest achievable emission rate, the use of an alternate fuel will cause or contribute to concentrations in an air quality control region of a pollutant for which any national ambient air quality standard is or would be exceeded;

(ii) No alternate power supply exists, as required under § 503.8 of these regulations;

(iii) Alternative sites are not available, as required under § 503.11 of these regulations; and

(iv) Use of mixtures is not feasible, as required under § 503.19 of these regulations.

(2) A petition by certification under this paragraph must include:

(i) Duly executed certifications required under paragraph (d)(1) of this section;

(ii) Exhibits containing the basis for the certifications required under paragraph (d)(1) of this section (including those factual and analytical materials deemed by the petitioner to be sufficient to support the granting of this exemption);

(iii) Environmental impact analysis, as required under § 503.13 of these regulations; and

(iv) Fuels search, as required under § 503.14 of these regulations.

[46 FR 59903, Dec. 7, 1981, as amended at 54 FR 52895, Dec. 22, 1989]

§ 503.35 Inability to obtain adequate capital.

(a) *Eligibility.* Section 212(a)(1)(D) of the Act provides for a permanent exemption due to inability to obtain adequate capital. To qualify, a petitioner must certify that:

Department of Energy

§ 503.36

(1) Despite good faith efforts the petitioner will be unable to comply with the applicable prohibitions imposed by the Act because the additional capital required for an alternate fuel-capable unit beyond that required for the proposed unit cannot be raised;

(2) The additional capital cannot be raised:

(i) Due to specific restrictions (e.g., covenants on existing bonds) which constrain management's ability to raise debt or equity capital;

(ii) Without a substantial dilution of shareholder equity;

(iii) Without an unreasonably adverse affect on the utility's credit rating; or

(iv) In the case of non-investor-owned public utilities, without jeopardizing the utility's ability to recover its capital investment, through tariffs, without unreasonably adverse economic effect on its service area (such as adverse impacts on local industry or undue hardship to ratepayers).

(3) No alternative power supply exists, as required under §503.8 of these regulations;

(4) Use of mixtures is not feasible, as required under §503.9 of these regulations; and

(5) Alternative sites are not available, as required under §503.11 of these regulations.

(b) *Evidence required in support of a petition.* A petition must include the following evidence in order to make the demonstration required by this section:

(1) Duly executed certifications required under paragraph (a) of this section;

(2) Exhibits containing the basis for the certifications required under paragraph (a) of this section (including those factual and analytical materials deemed by the petitioner to be sufficient to support the granting of this exemption);

(3) Environmental impact analysis, as required under §503.13 of these regulations; and

(4) Fuels search, as required under §503.14 of these regulations.

[46 FR 59903, Dec. 7, 1981, as amended at 47 FR 15315, Apr. 9, 1982; 54 FR 52895, Dec. 22, 1989]

§ 503.36 State or local requirements.

(a) *Eligibility.* Section 212(b) of the Act provides for an exemption due to certain State or local requirements. To qualify a petitioner must certify that:

(1) With respect to the proposed site of the unit, the operation or construction of the new unit using an alternate fuel is infeasible because of a State or local requirement other than a building code, nuisance, or zoning law;

(2) The petitioner has made a good faith effort to obtain a variance from the State or local requirement but has been unable to do so or has demonstrated why none is available;

(3) The granting of the exemption would be in the public interest and would be consistent with the purposes of the Act;

(4) The petitioner is not entitled to an exemption for lack of alternate fuel supply, site limitation, environmental requirements, or inability to obtain adequate capital at the site of the proposed powerplant or at any reasonable alternative site for the alternate fuel(s) considered;

(5) At the proposed site and every reasonable alternative site where the petitioner is not entitled to an exemption for lack of alternate fuel supply, site limitation, environmental requirements, or inability to obtain adequate capital, the petitioner nevertheless would be barred at each such proposed or alternate site from burning an alternate fuel by reason of a State or local requirement;

(6) No alternate power supply exists, as required under §503.8 of these regulations; and

(7) Use of mixtures is not feasible, as required under §503.9 of these regulations.

(b) *Evidence required in support of a petition.* The petition must include the following evidence in order to make the demonstration required by this section:

(1) Duly executed certifications required under paragraph (a) of this section;

(2) Exhibits containing the basis for the certifications required under paragraph (a) of this section (including those factual and analytical materials

§ 503.37

deemed by the petitioner to be sufficient to support the granting of this exemption);

(3) Environmental impact analysis, as required under §503.13 of these regulations; and

(4) Fuels search, as required under §503.14 of these regulations.

[46 FR 59903, Dec. 7, 1981; 46 FR 63033, Dec. 30, 1981, as amended at 54 FR 52895, Dec. 22, 1989]

§ 503.37 Cogeneration.

The following table may be used to determine eligibility for a permanent exemption based on oil and natural gas savings.

AVERAGE ANNUAL UTILIZATION OF OIL AND NATURAL GAS FOR ELECTRICITY GENERATION BY STATE

[BTU's per KWH sold]	
State name	Oil/gas savings Btu/kWh
Alabama	33
Arizona	802
Arkansas	1,363
California	3,502
Colorado	289
Connecticut	3,924
Delaware	3,478
Washington, DC.	895
Florida	3,177
Georgia	45
Idaho	0
Illinois	250
Indiana	53
Iowa	147
Kansas	686
Kentucky	34
Louisiana	4,189
Maine	2,560
Maryland	895
Massachusetts	5,250
Michigan	256
Minnesota	151
Mississippi	1,519
Missouri	57
Montana	60
Nebraska	139
Nevada	761
New Hampshire	2,695
New Jersey	1,894
New Mexico	1,528
New York	4,219
North Carolina	49
North Dakota	47
Ohio	36
Oklahoma	5,180
Oregon	0
Pennsylvania	771
Rhode Island	1,800
South Carolina	24
South Dakota	36
Tennessee	20
Texas	4,899
Utah	107
Vermont	105

10 CFR Ch. II (1-1-16 Edition)

AVERAGE ANNUAL UTILIZATION OF OIL AND NATURAL GAS FOR ELECTRICITY GENERATION BY STATE—Continued

[BTU's per KWH sold]	
State name	Oil/gas savings Btu/kWh
Virginia	460
Washington	3
West Virginia	126
Wisconsin	72
Wyoming	75

Data are based upon 1987 oil, natural gas and electricity statistics published by DOE's Energy Information Administration.

Example: The proposed cogeneration project is to be located in Massachusetts and is to use distillate oil. It will have a capacity of 50 MW, an average annual heat rate of 7600 BTU/KWH, and be operated at a capacity factor of 90%. The annual fuel consumption is therefore calculated to be $2,996 \times 10^9$ Btu/yr. ($50,000 \text{ KW} \times 7600 \text{ BTU/KWH} \times .9 \times 8760 \text{ HR/YR}$) The oil and gas backed off the grid would be calculated to be $.2070 \times 10^9$ BTU/YR. ($50,000 \text{ KW} \times 5250 \text{ BTU/KWH} \times .9 \times 8760 \text{ HR/YR}$) since the proposed unit would consume more oil that would be "backed off" the grid, the unit would not be eligible for a permanent exemption based on savings of oil and natural gas.

[54 FR 52895, Dec. 22, 1989]

§ 503.38 Permanent exemption for certain fuel mixtures containing natural gas or petroleum.

(a) *Eligibility.* Section 212(d) of the Act provides for a permanent exemption for certain fuel mixtures. To qualify a petitioner must certify that:

(1) The petitioner proposes to use a mixture of natural gas or petroleum and an alternate fuel as a primary energy source;

(2) The amount of petroleum or natural gas proposed to be used in the mixture will not exceed the minimum percentage of the total annual Btu heat input of the primary energy sources needed to maintain operational reliability of the unit consistent with maintaining a reasonable level of fuel efficiency; and

(3) No alternate power supply exists, as required under §503.8 of these regulations.

(b) *Evidence required in support of a petition.* The petition must include the following evidence in order to make

Department of Energy

§ 504.2

the demonstration required by this section:

(1) Duly executed certifications required under paragraph (a) of this section;

(2) Exhibits containing the basis for the certifications required under paragraph (a) of this section (including those factual and analytical materials deemed by the petitioner to be sufficient to support the granting of this exemption);

(3) A description of the fuel mixture, including component fuels and the percentage of each such fuel to be used; and

(4) Environmental impact analysis as required under §503.13 of these regulations.

(c) *Solar mixtures.* OFE will grant a permanent mixtures exemption for the use of a mixture of solar energy (including wind, tide, and other intermittent sources) and petroleum or natural gas, where:

(1) Solar energy will account for at least 20 percent of the total annual Btu heat input, of the primary energy sources of the unit; and

(2) Petitioner meets the eligibility and evidentiary requirements of paragraphs (a) and (c) of this section.

U.S.C. §7101 *et seq.*); Powerplant and Industrial Fuel Use Act of 1978, Pub. L. 95-620, 92 Stat. 3289 (42 U.S.C. 8301 *et seq.*); Energy Security Act, Pub. L. 96-294, 94 Stat. 611 (42 U.S.C. 8701 *et seq.*); E.O. 1209, 42 FR 46267, Sept. 15, 1977.

SOURCE: 45 FR 53692, Aug. 12, 1980, unless otherwise noted.

(Approved by the Office of Management and Budget under control number 1903-0075. See 46 FR 63209, Dec. 31, 1981)

§ 504.2 Purpose and scope.

(a) Sections 504.5, 504.6, and 504.8, set forth the prohibitions that OFP, pursuant to section 301 of the Act, as amended, may impose upon existing powerplants after a review of the certification and prohibition order compliance schedule submitted by the owner or operator of a powerplant. Sections 504.5 and 504.8 are explanatory sections, and §504.6 provides the informational requirements necessary to support the certification.

(b) Sections 504.6 and 504.7, set forth the prohibitions that OFP may impose upon certain electing powerplants, pursuant to former section 301 (b) and (c) of FUA, where OFP can make the findings as to the unit's technical capability and financial feasibility to use coal or another alternate fuel as a primary energy source. The prohibitions may be made to apply to electing powerplants unless an exemption is granted by OFP under the provisions of the Final Rule for Existing Facilities (10 CFR parts 500, 501 and 504) published at 45 FR 53682, Aug. 12, 1980 and 46 FR 59872, Dec. 7, 1981. Any person who owns, controls, rents or leases an existing electing powerplant may be subject to the prohibitions imposed by and the sanctions provided for in the Act or these regulations, if OFP can make the findings required by former section 301 (b) and (c) of FUA.

(Department of Energy Organization Act, Pub. L. 95-91, 91 Stat. 565 (42 U.S.C. 7101 *et seq.*); Powerplant and Industrial Fuel Use Act of 1978, Pub. [47 FR 50849, Nov. 10, 1982]

§§ 504.3–504.4

§§ 504.3–504.4 [Reserved]

§ 504.5 Prohibitions by order (certifying powerplants under section 301 of FUA, as amended).

(a) In the case of existing powerplants, OFP may prohibit, in accordance with section 301 of the Act, as amended, the use of petroleum or natural gas as a primary energy source where the owner or operator of the powerplant presents a complete certification concurred in by OFP. The certification, which may be presented at any time, pertains to the unit's technical capability and financial feasibility to use coal or another alternate fuel as a primary energy source in the unit. The informational requirements necessary to support a certification are contained in § 504.6 of these regulations. A prohibition compliance schedule which meets the requirements of § 504.5(d) shall also be submitted.

(b) If OFP concurs with the certification, a prohibition order on the powerplant's use of petroleum or natural gas will be issued following the procedure outlined in § 501.52 of these regulations.

(c) The petitioner may amend its certification at any time prior to the effective date of the prohibitions contained in the final prohibition order in order to take into account changes in relevant facts and circumstances by following the procedure contained in § 501.52(d).

(d) *Prohibition order compliance schedule.* The certification described above, which forms the basis for the issuance of a prohibition order to a powerplant, shall include a prohibition order compliance schedule. The compliance schedule should contain the following:

(1) A schedule of progressive events involved in the conversion project, including construction of any facilities for the production of fuel or fuel handling equipment, and contracts for the purchase of alternate fuels, and estimated date of compliance with the applicable prohibitions of the Act; and

(2) A schedule indicating estimated dates for obtaining necessary federal, state, and local permits and approvals. Any prohibition order issued under the certification provisions of §§ 504.5, 504.6, and 504.8 will be subject to appropriate

10 CFR Ch. II (1–1–16 Edition)

conditions subsequent so as to delay the effectiveness of the prohibitions contained in the final prohibition order until the above events or permits have occurred or been obtained.

(Approved by the Office of Management and Budget under control number 1903–0077)

(Department of Energy Organization Act, Pub. L. 95–91 (42 U.S.C. 7101 *et seq.*); Energy Supply and Environmental Coordination Act of 1974, Pub. L. 93–319, as amended by Pub. L. 94–163, Pub. L. 95–70, and Pub. L. 95–620 (15 U.S.C. 719 *et seq.*); Powerplant and Industrial Fuel Use Act of 1978, Pub. L. 95–620, as amended by Pub. L. 97–35 (42 U.S.C. 8301 *et seq.*); Omnibus Budget Reconciliation Act of 1981, Pub. L. 97–35)

[47 FR 17044, Apr. 21, 1982]

§ 504.6 Prohibitions by order (case-by-case).

(a) OFP may prohibit, by order, the use of natural gas or petroleum as a primary energy source in existing powerplants under certain circumstances. In the case of certifying powerplants under section 301 of the Act, as amended, the petitioner must present evidence to support the certification, required by § 504.6 (c), (d), (e), and (f). In the case of electing powerplants, OFP must make the following findings required by § 504.6 (c), (d), (e), and (f), in order to issue a prohibition order to the unit, pursuant to former section 301 (b) or (c):

(1) The unit currently has, or previously had, the technical capability to use an alternate fuel as a primary energy source;

(2) The unit has this technical capability now, or it could have the technical capability without:

(i) A substantial physical modification of the unit; or

(ii) A substantial reduction in the rated capacity of the unit; and

(3) It is financially feasible for the unit to use an alternate fuel as its primary energy source.

(b) In the case of electing powerplants, OFP must make a proposed finding regarding the technical capability of a unit to use alternate fuel as identified in paragraph (a) (1) of this section prior to the date of publication of the notice of the proposed prohibition. OFP will publish this finding in

The FEDERAL REGISTER along with the notice of the proposed prohibition.

(c) *Technical capability.* (1) In the case of electing and certifying powerplants, OFP will consider “technical capability” on a case-by-case basis in order to make the required finding. In the case of a certifying powerplant, the powerplant should present information to support the certification relevant to the considerations set forth below. OFP will consider the ability of the unit, from the point of fuel intake to physically sustain combustion of a given fuel and to maintain heat transfer.²

(2) OFP considers that a unit “had” the technical capability to use an alternate fuel if the unit was once able to burn that fuel (regardless of whether the unit was expressly designed to burn that fuel or whether it ever actually did burn it), but is no longer able to do so at the present due to temporary or permanent alterations to the unit itself.³

(3) A unit “has” the technical capability to use an alternate fuel if it can burn an alternate fuel, notwithstanding the fact that adjustments must be made to the unit beforehand or that pollution control equipment may be required to meet air quality requirements.⁴

²OFP will not ordinarily consider the nature or absence of appurtenances outside the unit. For example, OFP will examine the furnace configuration and ash removal capability but will not normally consider the need to install pollution control equipment as a measure of technical capability. Furthermore, OFP will not normally conclude that the absence of fuel handling equipment, such as conveyor belts, pulverizers, or unloading facilities, bears on the issue of a unit’s “technical capability” to burn an alternate fuel.

³For example, a unit which at one time burned solid coal but which could no longer do so because its coal firing ports and sluicing channels had been cemented over, would be classified as having “had” the technical capability to use coal. (The question of whether it again “could have” such capability without “substantial physical modification” is a separate and additional question.)

⁴A unit designed to burn natural gas shall be presumed to have the technical capability to burn a synthetic fuel such as medium Btu gas from coal (assuming such gas is available

(d) *Substantial physical modification.* In the case of electing and certifying powerplants, OFP will make its determination on whether a physical modification to a unit is “substantial” on a case-by-case basis. In the case of certifying powerplants, OFP will consider the factors set forth below for the purpose of concurrence in the certification. OFP will consider physical modifications made to the unit as “substantial” where warranted by the magnitude and complexity of the engineering task or where the modification would impact severely upon operations at the site.⁵ OFP will not, however, assess physical modification on the basis of cost.

(e) *Substantial reduction in rated capacity.* In the case of electing and certifying powerplants, OFP will make this determination on the basis of the following factors. A certifying powerplant should present information to support its certification regarding these factors in order for OFP to make its review for concurrence.

(1) OFP regards a unit’s derating of 25 percent or more, as a result of converting a unit from oil or gas to an alternate fuel, as substantial.

(2) OFP will presume that a derating of less than 10 percent, as a result of converting a unit from oil or gas to an alternate fuel, is not substantial unless

unless convincing evidence to the contrary is submitted in rebuttal). Also a unit designed to burn oil may, depending upon the chemical characteristics, be a unit that “has” the technical capability to burn liquefied coal. The fact that certain adjustments may be necessary does not render this a “hypothetical” as opposed to a “real” capability. Even an oil fired unit converting from the use of #2 distillate to #6 residual oil may be required to adjust or replace burner nozzles and add soot blowers.

⁵Generally, modification of a unit to burn coal or an alternate fuel will be considered insubstantial if significant alterations to the boiler, such as a change to the furnace configuration or a complete respacing of the tubes, are not required. Minor alterations such as replacement of burners or additions of soot blowers, and additions or alterations outside the boiler, shall not cause the modification to be substantial.

§ 504.7

convincing evidence to the contrary is submitted in rebuttal.⁶

(3) OFP will assess units for which a derating is claimed of 10 percent or more, but less than 25 percent, on a case-by-case.

(4) In assessing whether a unit's derating is not substantial, OFP will consider the impact of a reduction in rated capacity of the unit taking into consideration all necessary appurtenances such as air pollution control equipment required to burn an alternate fuel in compliance with environmental requirements expected to be applicable at the date the prohibitions contained in the final prohibition order become effective. However, the potential order recipient may raise in rebuttal the impact of derating on the site at which the unit is located and on the system as well as on the unit itself, if under paragraph (e)(2), or case-by-case, if under paragraph (e)(3) of this section.

(f) *Financial feasibility.* In the case of certifying and electing powerplants, OFP will make this finding based on the following considerations. A certifying powerplant should present information to support its certification relevant to these considerations in order for OFP to make its review for concurrence. Conversion of a unit to burn coal or an alternate fuel shall be deemed financially feasible if the firm has the actual ability to obtain sufficient capital to finance the conversion, including all necessary land, coal and ash handling equipment, pollution control equipment, and all other necessary expenditures, without violating legal restrictions on its ability to raise debt or equity capital, unreasonably diluting shareholder equity, or unreasonably adversely affecting its credit rating. OFP will consider any economic or financial factors presented by the proposed order recipient in determining

⁶For example, units that are the subject of a prohibition order will not have installed any operating air pollution control equipment sufficient to burn coal in compliance with applicable environmental equipments. The installation and use of air pollution control equipment alone can, in many cases, produce a derating. Moreover, the shift to coal itself will, because of differences in energy density and fuel flow characteristics, typically involve some derating.

10 CFR Ch. II (1-1-16 Edition)

the firm's ability or inability to finance the conversion including, but not limited to, the following:

(1) The required coverage ratios on the firm's debt and preferred stock;

(2) The firm's investment program; and

(3) The financial impact of the conversion, including other conversions which are or may be undertaken voluntarily by the proposed order recipient or imposed upon the recipient's system by the Act, and including pending or planned construction or reconstruction of alternate-fuel-fired plants and plants exempt from FUA prohibitions.⁷ Where helpful in clarifying the long-term financial feasibility of a conversion, DOE may analyze the economic benefits anticipated from operation of the converted unit or units using coal or other alternate fuel relative to those from continued operation using petroleum or natural gas.

L. 95-91, 91 Stat. 565 (42 U.S.C. 7101 *et seq.*); Powerplant and Industrial Fuel Use Act of 1978, Pub. L. 95-620, 92 Stat. 3269 (42 U.S.C. 8301 *et seq.*); Omnibus Budget Reconciliation Act of 1981 (Pub. L. 97-35); E.O. 12009, 42 FR 46267, Sept. 15, 1977)

[45 FR 53692, Aug. 12, 1980, as amended at 47 FR 17044, Apr. 21, 1982; 47 FR 50849, Nov. 10, 1982]

§ 504.7 Prohibition against excessive use of petroleum or natural gas in mixtures—electing powerplants.

(a) In the case of electing powerplants, if OFP finds that it is technically and financially feasible for a unit to use a mixture of petroleum or natural gas and an alternate fuel as its primary energy source, OFP may prohibit, by order, the use in that unit of

⁷OFP will not require the proposed order recipient to cancel or defer construction or reconstruction of any alternate-fuel-fired facility, or any facility exempt from the prohibitions of the Act, for which a decision to finance such facility has been made by the appropriate company official before the publication of the prohibition order. The proposed order recipient may choose to cancel or defer any such facility.

Department of Energy

§ 504.9

petroleum or natural gas, or both, in amounts exceeding the minimum amount necessary to maintain reliability of operation consistent with maintaining reasonable fuel efficiency of the mixture.

(b) In making the technical feasibility finding required by former section 301 (b) and (c) of the Act and paragraph (a) of this section, OFP may weigh “physical modification” or “de-rating of the unit,” but these considerations, by themselves, will not control the technical feasibility finding. A technical feasibility finding might be made notwithstanding the need for substantial physical modification. The economic consequences of a substantial physical modification are taken into account in determining financial feasibility.

(Energy Supply and Environmental Coordination Act of 1974, Pub. L. 93-319, as amended by Pub. L. 94-163, Pub. L. 95-70, and 15 U.S.C. 719 *et seq.*; Department of Energy Organization Act, Pub. L. 95-91, 91 Stat. 565 (42 U.S.C. 7101 *et seq.*); Powerplant and Industrial Fuel Use Act of 1978, Pub. [47 FR 17045, Apr. 21, 1982, and 47 FR 50850, Nov. 10, 1982]

§ 504.8 Prohibitions against excessive use of petroleum or natural gas in mixtures—certifying powerplants.

(a) In the case of certifying powerplants, OFP may prohibit the use of petroleum or natural gas in such powerplant in amounts exceeding the minimum amount necessary to maintain reliability of operation consistent with maintaining the reasonable fuel efficiency of the mixture. This authority is contained in section 301(c) of the Act, as amended. The owner or operator of the powerplant may certify at any time to OFP that it is technically capable and financially feasible for the unit to use a mixture of petroleum or natural gas and coal or another alternate fuel as a primary energy source. In assessing whether the unit is technically capable of using a mixture of petroleum or natural gas and coal or another alternate fuel as a primary energy source, for purposes of this section, the extent of any physical modification necessary to convert the unit

and any concomitant reduction in rated capacity are not relevant factors. So long as a unit as proposed to be modified would be technically capable of using the mixture as a primary energy source under § 504.6(c), this certification requirement shall be deemed met. The criteria for certification of financial feasibility are found at § 504.6(f). In addition, the powerplant's owner or operator must submit a prohibition compliance schedule, which meets the requirements of § 504.5(d).

(b) If OFP concurs with the certification, a prohibition order against the unit's excessive use of petroleum or natural gas in the mixture will be issued following the procedure outlined in § 501.52 of these regulations.

(c) The petitioner may seek to amend its certification in order to take into account changes in relevant facts and circumstances by following the procedure contained in § 501.52(d).

NOTE: The authority of OFP implemented under this section should not be confused with the other two fuel mixture provisions of these regulations. One is the general requirement that petitioners for permanent exemptions demonstrate that the use of a mixture of natural gas or petroleum and an alternate fuel is not economically or technically feasible (See § 504.15). The second is the permanent fuel mixtures exemption itself (See § 504.56).

(Approved by the Office of Management and Budget under control number 1903-0077)

(Department of Energy Organization Act, Pub. L. 95-91 (42 U.S.C. 7101 *et seq.*); Energy Supply and Environmental Coordination Act of 1974, Pub. L. 93-319, as amended by Pub. L. 94-163, Pub. L. 95-70, and Pub. L. 95-620 (15 U.S.C. 719 *et seq.*); Powerplant and Industrial Fuel Use Act of 1978, Pub. L. 95-620, as amended by Pub. L. 97-35 (42 U.S.C. 8301 *et seq.*); Omnibus Budget Reconciliation Act of 1981, Pub. L. 97-35)

[47 FR 17045, Apr. 21, 1982]

§ 504.9 Environmental requirements for certifying powerplants.

Under §§ 501.52, 504.5 and 504.6 of these regulations, OFP may prohibit, in accordance with section 301 and section 303 (a) or (b) of FUA, as amended, the use of natural gas or petroleum, or both, as a primary energy source in any certifying powerplant. Under sections 301(c) and 303(a) of FUA, as amended, and §§ 501.52, 504.6, and 504.8 of

these regulations, OFP may prohibit the excessive use of natural gas or petroleum in a mixture with an alternate fuel as a primary energy source in a certifying powerplant.

(a) *NEPA compliance.* Except as provided in paragraph (c) of this section, where the owner or operator of a powerplant seeks to obtain an OFP prohibition order through the certification procedure, and did not hold either a proposed prohibition order under former section 301 of FUA or pending order under section 2 of ESECA, it will be responsible for the costs of preparing any necessary Environmental Assessment (EA) or Environmental Impact Statement (EIS) arising from OFP's obligation to comply with NEPA. The powerplant owner or operator shall enter into a contract with an independent party selected by OFP, who is qualified to conduct an environmental review and prepare an EA or EIS, as appropriate, and who does not have a financial or other interest in the outcome of the proceedings, under the supervision of OFP. The NEPA process must be completed and approved before OFP will issue a final prohibition order based on the certification.

(b) *Environmental review procedure.* Except as provided in paragraph (c) of this section, environmental documents, including the EA and EIS, where necessary, will be prepared utilizing the process set forth above. OFP, the powerplant owner or operator and the independent third party shall enter into an agreement for the owner or operator to engage and pay directly for the services of the qualified third party to prepare the necessary documents. The third party will execute an OFP prepared disclosure document stating that

he does not have any conflict of interest, financial or otherwise, in the outcome of either the environmental process or the prohibition order proceeding. The agreement shall outline the responsibilities of each party and his relationship to the other two parties regarding the work to be done or supervised. OFP shall approve the information to be developed and supervise the gathering, analysis and presentation of the information. In addition, OFP will have the authority to approve and modify any statement, analysis, and conclusion contained in the third party prepared environmental documents.

(c) *Financial hardship.* Whenever the bona fide estimate of the costs associated with NEPA compliance, if borne by the powerplant owner or operator, would make the conversion financially infeasible, OFP may waive the requirement set forth in paragraphs (a) and (b) of this section and perform the necessary environmental review.

(Approved by the Office of Management and Budget under control number 1903-0077)

APPENDIX I TO PART 504—PROCEDURES FOR THE COMPUTATION OF THE REAL COST OF CAPITAL

(a) The firm's real after-tax weighted average marginal cost of capital (K) is computed with equation 1.

$$\begin{aligned}
 \text{EQ 1} \quad K = & w_d \left[\frac{\hat{R}_d (1-t)}{1-f_d} - \text{INF} \right] \\
 & + w_p \left[\frac{\hat{R}_p}{1-f_p} - \text{INF} \right] + w_e \left[\frac{\hat{R}_e}{1-f_e} - \text{INF} \right]
 \end{aligned}$$

Department of Energy

Pt. 504, App. I

The terms in equation 1 are defined as follows:

W_d = Fraction of existing capital structure which is debt.

W_p = Fraction of existing capital structure which is preferred equity.

W_e = Fraction of existing capital structure which is common equity and retained earnings.

\hat{R}_d = Predicted nominal cost of long term debt expressed as a fraction.

\hat{R}_p = Predicted nominal cost of preferred stock expressed as a fraction.

\hat{R}_e = Predicted nominal cost of common stock expressed as a fraction.

INF = Percentage change in the GNP implicit price deflator over the past 12 months expressed as a fraction.

f_d = Flotation cost of debt expressed as a fraction.

f_p = Flotation cost of preferred stock expressed as a fraction.

f_e = Flotation cost of common stock expressed as a fraction.

t = Marginal federal income tax rate for the current year.

(b) *Information on parameters used in Equation 1.* (1) The parameters used in equation 1 will be the best practicable estimates. They will be obtained from the firm, accepted rating services (e.g., Standard & Poors, Moody's), government publications, accepted financial publications, annual financial reports and statements of firms, and investment bankers.

(2) The predicted nominal cost of debt (\hat{R}_d) may be estimated by determining the current average yield on newly issued bonds—industrial or utility as appropriate—which have the same rating as the firm's most recent debt issue.

(3) The predicted nominal cost of preferred stock (\hat{R}_p) may be estimated by determining the current average yield on newly issued preferred stock—industrial or utility as appropriate—which has the same rating as the firm's most recent preferred stock issue.

(4)(A) The predicted nominal cost of common stock (\hat{R}_e) is computed with equation 2.

$$\text{Eq 2} \quad \hat{R}_e = \hat{R}_r + B \times \bar{R}_m$$

where:

\hat{R}_r = The risk free interest rate—the average of the most recent auction rates of U.S. Government 13-week Treasury Bills,

B = The "beta" coefficient—the relationship between the excess return on common stock and the excess return on the S&P 500 composite index, and

\bar{R}_m = The mean excess return on the S&P 500 composite index—the mean of the difference between the return on the S&P 500 composite index and the risk free interest rate for the years 1926–1976 as computed by Ibbotson and Sinquefeld(1)—9.2%

(B) The "beta" coefficient is computed with regression analysis techniques. The regression equation is Equation 3.

$$(R_e^t - R_r^t) = A + B(R_m^t - R_r^t) + e^t \quad \text{Eq. 3}$$

where

$$R_e^t = \frac{\text{PRCC}_t - \text{PRCC}_{t-1} + (\text{DIVRATE}/12)}{\text{PRCC}_{t-1}}$$

R_r^t = The risk free interest rate in month t —the average of the yields on 13-week treasury bills auctioned in month t .(2)

A = A constant which should not be significantly different than zero.

$$R_m^t = \frac{V_{sp,t} - V_{sp,t-1} + D_{sp,t}}{V_{sp,t-1}}, \text{ and}$$

e^t = The error in month t .

PRCC_t = Closing market prices of the firm's common stock at the end of month t fully adjusted for splits and stock dividends.

DIVRATE_t = The sum of the dividends paid in the fiscal year which contain month t .

$V_{sp,t}$ = The market value of "one share" of the S&P 500 composite index at the end of month t .

$D_{sp,t}$ = The estimated monthly income received from holding "one share" of the S&P 500 in month t .

The regression analysis is done with sixty months of data. The first month ($t = 1$) is sixty months before the month in which the firm's current fiscal year started. The last month ($t = 60$) is the last month of the past fiscal year.

(5) Where the parameters specified above are not obtainable, alternate parameters that closely correspond to those above may be used. This may include substituting a bond yield for nominal cost of preferred stock where the former is not available. Where the capital structure does not consist of any debt, preferred equity, or common equity, an alternate methodology to predict the firm's real after-tax marginal cost of capital may be used.

Example of using alternate parameters that closely correspond to those above are:

(A) In the case of industrials, who do not typically issue preferred stock, the predicted nominal cost of preferred stock (\hat{R}_p) can be estimated by determining the current average yield on newly issued industrial bonds which have the same rating as the firm's most recent debt issue.

(B) If necessary, the following assumptions can be made to determine the nominal cost of debt or preferred stock and their flotation costs.

(i) Where a company issued privately placed debt that was not rated, the rating, applied to preferred stock could be used to

determine the cost of debt and its flotation cost.

(ii) Where a company issued privately placed preferred stock that was not rated, the rating applied to debt could be used to determine the cost of preferred stock and its flotation costs.

(iii) In the case where all issues were privately placed, the current average yield on all newly issued debt or preferred could be used to determine the cost of debt or preferred respectively, and an average flotation cost, for debt or preferred, could be used.

(C) *Evidence Requirements.* Copies of this calculation with notations as to the source of the data must be submitted.

FOOTNOTES

(1) Ibbotson, R.E. and R.A. Sinquefeld, *Stocks, Bonds, Bills, and Inflation*, Charlottesville, Va.: The Financial Analysts Research Foundation, 1977, cited by Ernst & Whinney, *Costs of Capital and Rates of Return for Industrial Firms and Class A&B Electric Utility Firms*, June 1979, p. 3-8.

(2) As an option, R_f^t can be developed with the following equation:

$$R_f^t = \frac{365D^t}{360 - ND^t} \times \frac{1}{12}$$

where:

D^t = The average annual yield on three month U.S. Treasury bills reported in the *Survey of Current Business* auctioned in month t —which is reported using the bank discount method.

N = Number of days to maturity.

[46 FR 59920, Dec. 7, 1981]

APPENDIX II TO PART 504—FUEL PRICE COMPUTATION

(a) *Introduction.* This appendix provides the equations and parameters needed to specify the price of the delivered fuels to be used in the cost calculations associated with parts 503 and 504 of these regulations. The delivered price of the fuel to be used to calculate delivered fuel expenses must reflect (1) the price of each fuel at the time of the petition, and (2) the effects of future real price increases for each fuel. The delivered price of an alternate fuel used to calculate delivered fuel expenses must reflect the petitioner's delivered price of the alternate fuel and the effects of real increases in the price of that alternate fuel. Paragraphs (b), (c) and (d) below provide the procedure to: (1) Calculate fuel price and inflation indices; (2) account for projected real increases in fuel prices when planning to burn one or more than one fuel; and (3) account for projected real increases in the price of the alternate fuel. Table II-1 of this appendix (See paragraph (b)) contains example fuel price and inflation

indices based on the latest data appearing in the Energy Information Administration's (EIA) *Annual Energy Outlook* (AEO).

The fuel price and inflation indices will change yearly with the publication of the AEO. Revisions shall become effective after final publication. However, the relevant set of parameters for a specific petition for exemption will be the set in effect at the time the petition is submitted or the set in effect at the time a decision is rendered, whichever is more favorable to the petitioner.

(b) *Computation of Fuel Price and Inflation Indices.* (1) the Petitioner is responsible for computing the annual fuel price and inflation indices by using Equation II-1 and Equation II-2, respectively. The petitioner may compute the fuel price index specified in Equation II-1 or use his own price index. However, if he uses his own price index, the source or the derivation of the index must be fully documented and be contained in the evidential summary.

EQ II-2 is:

$$PX_i = \frac{P_i}{P_o}$$

where:

PX_i = The fuel price index for each fuel in year i . P_i = Price of fuel in year i .

P_o = Price of fuel in base year.

EQ II-2 is:

$$IX_i = \frac{GX_i}{GX_o}$$

where:

IX_i = The inflation index in year i .

GX_i = The NIPA GNP price deflator for year i .

GX_o = The NIPA GNP price deflator for the base year.

(2) The parameters to be used in EQ II-1 are the Base Case fuel price projections found in EIA's current AEO.

(3) When computing annual inflation indices, the petitioner is to use the Base Case National Macroeconomic Indicators (NIPA GNP Price Deflator) contained in EIA's current AEO. If necessary, the petitioner must rebase the projection to the same year used for the fuel price projections. For example, in 1989 AEO projects the price deflator in 1982 dollars; this must be rebased to the year in which the petition is filed. The methodology used to rebase the inflation indices must follow standard statistical procedures and must be fully documented within the petition. This index will remain frozen at the last year of the AEO's projection for the remainder of the unit's useful life.

(4) Table II-1 is provided as an example of the application of equations II-1 and II-2. This table contains annual fuel price indices

Department of Energy

Pt. 504, App. II

for distillate oil, residual oil, natural gas, and coal. It also contains annual inflation indices. These values were computed from information contained in Table A3 and Table A11 of EIA's *AEO, 1989*.

TABLE II-1: PRICE AND INFLATION INDICES FOR USE IN THE COST CALCULATIONS

Year	Distillate (DPX)	Residual (RPX)	Natural gas (GPX)	Coal (CPX)	Inflation (IX)
1986	1.0000	1.0000	1.0000	1.0000	1.0000
1987	0.9810	1.2134	0.9508	0.9231	1.0334
1988	0.9429	0.9407	0.8934	0.8876	1.0658
1989	0.8929	0.9328	0.9057	0.8639	1.1054
1990	0.9905	1.0119	0.9221	0.9112	1.1607
1991	1.0381	1.0751	0.9344	0.9172	1.2204
1992	1.0929	1.1344	1.0205	0.9231	1.2836
1993	1.1595	1.2292	1.1148	0.9349	1.3512
1994	1.2286	1.3241	1.1844	0.9467	1.4214
1995	1.3000	1.4150	1.2705	0.9527	1.4960
1996	1.4000	1.5415	1.4016	0.9586	1.5768
1997	1.4762	1.6403	1.4918	0.9704	1.6585
1998	1.5452	1.7273	1.5615	0.9763	1.7410
1999	1.6143	1.7905	1.6475	0.9882	1.8235
2000	1.6690	1.8340	1.7049	0.9941	1.9025
2001	1.6690	1.8340	1.7049	0.9941	1.9025
2002	1.6690	1.8340	1.7049	0.9941	1.9025
2003	1.6690	1.8340	1.7049	0.9941	1.9025
2004	1.6690	1.8340	1.7049	0.9941	1.9025
2005	1.6690	1.8340	1.7049	0.9941	1.9025
2006	1.6690	1.8340	1.7049	0.9941	1.9025
2007	1.6690	1.8340	1.7049	0.9941	1.9025
2008	1.6690	1.8430	1.7049	0.9941	1.9025
2009	1.6690	1.8340	1.7049	0.9941	1.9025
2010	1.6690	1.8340	1.7049	0.9941	1.9025

(C) *Fuel Price Computation.* (1) The delivered price of the proposed fuel to be burned (FPB_i) must reflect the real escalation rate of the proposed fuel, and must be computed with Equation EQ II-3.

EQ-II-3 is: $FPB_i = MPB [PX_i]$

where:

FPB_i = Price of the proposed fuel (distillate oil, residual oil, or natural gas) in year i .

MPB = The current delivered market price of the proposed fuel.

PX_i = The fuel price index value in year i , computed with Equation II-1.

or:

(2) When planning to use more than one fuel in the proposed unit(s), the petitioner must use Equation II-1 and Equation II-3 to calculate the annual fuel price of each fuel to be used. The petitioner then must estimate the proportion of each fuel to be burned annually over the useful life of the unit(s). With these proportions and the respective annual fuel prices for each fuel, the petitioner must compute an annual weighted average fuel price. The methodology used to calculate the weighted average fuel price must follow standard statistical procedures and be fully documented within the petition.

(d) *Fuel Price Computation—Alternate Fuel.* The delivered price of alternate fuel (PFA_i) must reflect the real escalation rate of alternate fuel and must be computed with Equation II-4.

Equation II-4 is:

$PFA_i = APF \times apx_i$

where:

PFA = The price of the alternate fuel in year i .

APF^{-i} = The current market price of the alternate fuel f.o.b. the facility).

APX_i = The alternate fuel price index value for year i , computed with Equation II-1.

In most cases the alternate fuel will be coal. The petitioner must use Equation II-1 (paragraph (b)) to compute the escalation rate (APX_i). If an alternate fuel other than coal is proposed the source or the derivation of the index must be fully documented and be contained in the evidential summary.

SOURCE: 44 FR 15646, Mar. 15, 1979, unless otherwise noted.

§ 580.01 Purpose.

The purpose of this part is to implement the authority granted to the Secretary of Energy in section 401 of the Natural Gas Policy Act of 1978, Public Law 95-621, 92 Stat. 3394-3395 (1978).

§ 580.02 Definitions.

(a) Terms defined in section 2 of the Natural Gas Policy Act of 1978 shall have the same meaning, as applicable, for purposes of this part, unless further defined in paragraph (b) of this section.

(b) The following definitions are applicable to this part:

(1) *Commercial establishment* means any establishment, (including institutions and local, state and federal government agencies) engaged primarily in the sale of goods or services, where natural gas is used for purposes other than those involving manufacturing or electric power generation.

(2) *Essential agricultural use* means any use of natural gas:

(i) For agricultural production, natural fiber production, natural fiber processing, food processing, food quality maintenance, irrigation pumping, crop drying; or

(ii) As a process fuel or feedstock in the production of fertilizer, agricultural chemicals, animal feed, or food which the Secretary of Agriculture determines is necessary for full food and fiber production.

(3) *Essential agricultural user* means any person who uses natural gas for an essential agricultural use as defined in paragraph (b)(2) of this section.

(4) *Hospital* means a facility whose primary function is delivering medical care to patients who remain at the facility, including nursing and convalescent homes. Outpatient clinics or doctors' offices are not included in this definition.

(5) *High-priority use* means any use of natural gas by a high-priority user as defined in paragraph (a)(6) of this section.

(6) *High-priority user* means, in no specific order, any person who uses natural gas:

(i) In a residence, or

(ii) In a commercial establishment in amounts of less than 50 Mcf on a peak day; or

(iii) In any school or hospital; or

(iv) For minimum plant protection when operations are shut down, for police protection, for fire protection, in a sanitation facility, in a correctional facility, or for emergency situations pursuant to 18 CFR 2.78(a)(4).

(7) *Interstate pipeline* means any person engaged in natural gas transportation subject to the jurisdiction of the Federal Energy Regulatory Commission under the Natural Gas Act.

(8) *Residence* means a dwelling using natural gas predominately for residential purposes such as space heating, air conditioning, hot water heating, cooking, clothes drying, and other residential uses, and includes apartment buildings and other multi-unit residential buildings.

(9) *School* means a facility, the primary function of which is to deliver instruction to regularly enrolled students in attendance at such facility. Facilities used for both educational and non-educational activities are not included under this definition unless the latter are merely incidental to the delivery of instruction.

§ 580.03 Curtailment priorities.

(a) Notwithstanding any provision of law other than section 401(b) of the Natural Gas Policy Act of 1978, or any other rule, regulation, or order of the Department of Energy, the Federal Energy Regulatory Commission or their predecessor agencies, and to the maximum extent practicable, no curtailment plan of an interstate pipeline may provide for curtailment of deliveries of natural gas for any essential agricultural use, unless:

(1) Such curtailment does not reduce the quantity of natural gas delivered for such use below the use requirement certified by the Secretary of Agriculture under section 401(c) of the Natural Gas Policy Act of 1978 in order to meet the requirements of full food and fiber production; or

(2) Such curtailment is necessary in order to meet the requirements of high-priority users; or

(3) The Federal Energy Regulatory Commission, in consultation with the Secretary of Agriculture, determines, by rule or order issued pursuant to section 401(b) of the Natural Gas Policy Act of 1978, that use of a fuel (other than natural gas) is economically practicable and that the fuel is reasonably available as an alternative for such essential agricultural use.

(b) Any essential agricultural user who also qualifies as a high-priority user shall be a high-priority user for purposes of paragraph (a) of this section.

(c) The specific relative order of priority for all uses and users of natural gas, including high-priority and essential agricultural uses and users, shall remain as reflected in effective curtailment plans of interstate pipelines filed with the Federal Energy Regulatory Commission to the extent that the relative order of priorities does not conflict with paragraph (a) of this section.

(d) Nothing in this rule shall prohibit the injection of natural gas into storage by interstate pipelines or deliveries to its customers for their injection into storage unless it is demonstrated to the Federal Energy Regulatory Commission that these injections or deliveries are not reasonably necessary to meet the requirements of high-priority users or essential agricultural uses.

SOURCE: 54 FR 53531, Dec. 29, 1989, unless otherwise noted.

Subpart A—General Provisions

§ 590.100 OMB Control Numbers.

The information collection requirements contained in this part have been approved by the Office of Management and Budget under Control No. 1903–0081.

§ 590.101 Purpose and scope.

The purpose of this part is to establish the rules and procedures required to be followed by persons to obtain authorizations from DOE to import or export natural gas under the Natural Gas Act and by all other persons interested in participating in a natural gas import or export proceeding before the agency. This part establishes the procedural rules necessary to implement the authorities vested in the Secretary of Energy by sections 301(b) and 402(f) of the DOE Act, which have been delegated to the Assistant Secretary.

§ 590.102 Definitions.

As used in this part:

(a) *Assistant Secretary* means the Assistant Secretary for Fossil Energy or any employee of the DOE who has been delegated final decisional authority.

(b) *Contested proceeding* means a proceeding:

(1) Where a protest or a motion to intervene, or a notice of intervention, in opposition to an application or other requested action has been filed, or

(2) Where a party otherwise notifies the Assistant Secretary and the other parties to a proceeding in writing that

it opposes an application or other requested action.

(c) *Decisional employee* means the Assistant Secretary, presiding officials at conferences, oral presentations or trial-type hearings, and any other employee of the DOE, including consultants and contractors, who are, or may reasonably be expected to be, involved in the decision-making process, including advising the Assistant Secretary on the resolution of issues involved in a proceeding. The term includes those employees of the DOE assisting in the conduct of trial-type hearings by performing functions on behalf of the Assistant Secretary or presiding official.

(d) *DOE* means the Department of Energy, of which FE is a part.

(e) *DOE Act* means the Department of Energy Organization Act, Public Law 95–91, 91 Stat. 565 (42 U.S.C. 7101 *et seq.*).

(f) *FE* means the Office of The Assistant Secretary for Fossil Energy.

(g) *FERC* means the Federal Energy Regulatory Commission.

(h) *Interested person* means a person, other than a decisional employee, whose interest in a proceeding goes beyond the general interest of the public as a whole and includes applicants, intervenors, competitors of applicants, and other individuals and organizations, including non-profit and public interest organizations, and state, local, and other public officials, with a proprietary, financial or other special interest in the outcome of a proceeding. The term does not include other federal agencies or foreign governments and their representatives, unless the agency, foreign government, or representative of a foreign government is a party to the proceeding.

(i) *Natural gas* means natural gas and mixtures of natural gas and synthetic natural gas, regardless of physical form or phase, including liquefied natural gas and gels primarily composed of natural gas.

(j) *NGA* means the Natural Gas Act of June 21, 1938, c. 556, 52 Stat. 821 (15 U.S.C. 717 *et seq.*).

(k) *Off-the-record communication* means a written or oral communication not on the record which is relevant to the merits of a proceeding, and about which the parties have not been given reasonable prior notice of

Department of Energy

§ 590.103

the nature and purpose of the communication and an opportunity to be present during such communication or, in the case of a written communication, an opportunity to respond to the communication. It does not include communications concerned solely with procedures which are not relevant to the merits of a proceeding. It also does not include general background discussions about an entire industry or natural gas markets or communications of a general nature made in the course of developing agency policy for future general application, even though these discussions may relate to the merits of a particular proceeding.

(l) *Party* means an applicant, any person who has filed a motion for and been granted intervenor status or whose motion to intervene is pending, and any state commission which has intervened by notice pursuant to § 590.303(a).

(m) *Person* means any individual, firm, estate, trust, partnership, association, company, joint-venture, corporation, United States local, state and federal governmental unit or instrumentality thereof, charitable, educational or other institution, and others, including any officer, director, owner, employee, or duly authorized representative of any of the foregoing.

(n) *Presiding official* means any employee of the DOE who has been designated by the Assistant Secretary to conduct any stage of a proceeding, which may include presiding at a conference, oral presentation, or trial-type hearing, and who has been delegated the authority of the Assistant Secretary to make rulings and issue orders in the conduct of such proceeding, other than final opinions and orders, orders to show cause, emergency interim orders, or conditional decisions under subpart D and orders on rehearing under subpart E.

(o) *Proceeding* means the process and activity, and any part thereof, instituted by FE either in response to an application, petition, motion or other filing under this part, or on its own initiative, by which FE develops and considers the relevant facts, policy and applicable law concerning the importation or exportation of natural gas and which may lead to the issuance of an

order by the Assistant Secretary under subparts D and E.

(p) *State commission* means the regulatory body of a state or municipality having jurisdiction to regulate rates and charges for the sale of natural gas to consumers within the state or municipality, or having any regulatory jurisdiction over parties involved in the import or export arrangement.

§ 590.103 General requirements for filing documents with FE.

(a) Any document, including but not limited to an application, amendment of an application, request, petition, motion, answer, comment, protest, complaint, and any exhibit submitted in connection with such documents, shall be filed with FE under this part. Such document shall be considered officially filed with FE when it has been received and stamped with the time and date of receipt by the Office of Fuels Programs, FE. Documents transmitted to FE must be addressed as provided in § 590.104. All documents and exhibits become part of the record in the official FE docket file and will not be returned. An original and fifteen (15) copies of all applications, filings and submittals shall be provided to FE. No specific format is required. Applicants required to file quarterly reports as a condition to an authorization need only file an original and four (4) copies.

(b) Upon receipt by FE, each application or other initial request for action shall be assigned a docket number. Any petition, motion, answer, request, comment, protest, complaint or other document filed subsequently in a docketed proceeding with FE shall refer to the assigned docket number. All documents shall be signed either by the person upon whose behalf the document is filed or by an authorized representative. Documents signed by an authorized representative shall contain a certified statement that the representative is a duly authorized representative unless the representative has a certified statement already on file in the FE docket of the proceeding. All documents shall also be verified under oath or affirmation by the person filing, or by an officer or authorized representative of the firm having knowledge of the facts alleged. Each document filed

§ 590.104

with FE shall contain a certification that a copy has been served as required by § 590.107 and indicate the date of service. Service of each document must be made not later than the date of the filing of the document.

(c) A person who files an application shall state whether, to the best knowledge of that person, the same or a related matter is being considered by any other part of the DOE, including the FERC, or any other Federal agency or department and, if so, shall identify the matter and the agency or department.

§ 590.104 Address for filing documents.

All documents filed under this part shall be addressed to: Office of Fuels Programs, Fossil Energy, U.S. Department of Energy, Docket Room 3F-056, FE-50, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585. All hand delivered documents shall be filed with the Office of Fuels Programs at the above address between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

§ 590.105 Computation of time.

(a) In computing any period of time prescribed or allowed by these regulations, the day of the act or event from which the designated period of time begins to run is not included. The period of time begins to run the next day after the day of the act or event. The last day of the period so computed is included unless it is a Saturday, Sunday, or legal Federal holiday, in which event the period runs until the end of the next day that is neither a Saturday, Sunday, nor a legal Federal holiday, unless otherwise provided by this part or by the terms of an FE order. Documents received after the regular business hours of 8 a.m. to 4:30 p.m. are deemed filed on the next regular business day.

(b) When a document is required to be filed with FE within a prescribed time, an extension of time to file may be granted for good cause shown.

(c) An order is issued and effective when date stamped by the Office of Fuels Programs, FE, after the order has been signed unless another effective date is specified in the order.

10 CFR Ch. II (1-1-16 Edition)

§ 590.106 Dockets.

The FE shall maintain a docket file of each proceeding under this part, which shall contain the official record upon which all orders provided for in subparts D and E shall be based. The official record in a particular proceeding shall include the official service list, all documents filed under § 590.103, the official transcripts of any procedures held under subpart C, and opinions and orders issued by FE under subparts D and E, and reports of contract amendments under § 590.407. All dockets shall be available for inspection and copying by the public during regular business hours between 8 a.m. and 4:30 p.m. Dockets are located in the Office of Fuels Programs, FE, Docket Room 3F-056, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585.

§ 590.107 Service.

(a) An applicant, any other party to a proceeding, or a person filing a protest shall serve a copy of all documents filed with FE upon all parties unless otherwise provided in this part. The copy of a document served upon parties shall be a true copy of the document filed with FE, but does not have to be a copy stamped with the time and date of receipt by FE. The FE shall maintain an official service list for each proceeding which shall be provided upon request.

(b) When the parties are not known, such as during the initial comment period following publication of the notice of application, service requirements under paragraph (a) of this section may be met by serving a copy of all documents on the applicant and on FE for inclusion in the FE docket in the proceeding.

(c) All documents required to be served under this part may be served by hand, certified mail, registered mail, or regular mail. It shall be the responsibility of the serving party to ensure that service is effected in a timely manner. Service is deemed complete upon delivery or upon mailing, whichever occurs first.

(d) Service upon a person's duly authorized representatives on the official service list shall constitute service upon that person.

Department of Energy

§ 590.202

(e) All FE orders, notices, or other FE documents shall be served on the parties by FE either by hand, registered mail, certified mail, or regular mail, except as otherwise provided in this part.

§ 590.108 Off-the-record communications.

(a) In any contested proceeding under this part:

(1) No interested person shall make an off-the-record communication or knowingly cause an off-the-record communication to be made to any decisional employee.

(2) No decisional employee shall make an off-the-record communication or knowingly cause an off-the-record communication to be made to any interested person.

(3) A decisional employee who receives, makes, or knowingly causes to be made an oral off-the-record communication prohibited by this section shall prepare a memorandum stating the substance of the communication and any responses made to it.

(4) Within forty-eight (48) hours of the off-the-record communication, a copy of all written off-the-record communications or memoranda prepared in compliance with paragraph (a)(3) of this section shall be delivered by the decisional employee to the Assistant Secretary and to the Deputy Assistant Secretary for Fuels Programs. The materials will then be made available for public inspection by placing them in the docket associated with the proceeding.

(5) Requests by a party for an opportunity to rebut, on the record, any facts or contentions in an off-the-record communication may be filed in writing with the Assistant Secretary. The Assistant Secretary shall grant such requests only for good cause.

(6) Upon being notified of an off-the-record communication made by a party in violation of this section, the Assistant Secretary may, to the extent consistent with the interests of justice and the policies of the NGA and the DOE Act, require the party to show cause why the party's claim or interest in the proceeding should not be dismissed, denied, disregarded, or otherwise ad-

versely affected on account of the violation.

(b) The prohibitions of paragraph (a) of the section shall apply only to contested proceedings and begin at the time either a protest or a motion to intervene or notice of intervention in opposition to the application or other requested action is filed with FE, or a party otherwise specifically notifies the Assistant Secretary and the other parties in writing of its opposition to the application or other requested action, whichever occurs first.

§ 590.109 FE investigations.

The Assistant Secretary or the Assistant Secretary's delegate may investigate any facts, conditions, practices, or other matters within the scope of this part in order to determine whether any person has violated or is about to violate any provision of the NGA or other statute or any rule, regulation, or order within the Assistant Secretary's jurisdiction. In conducting such investigations, the Assistant Secretary or the Assistant Secretary's delegate may, among other things, subpoena witnesses to testify, subpoena or otherwise require the submission of documents, and order testimony to be taken by deposition.

Subpart B—Applications for Authorization To Import or Export Natural Gas

§ 590.201 General.

(a) Any person seeking authorization to import or export natural gas into or from the United States, to amend an existing import or export authorization, or seeking any other requested action, shall file an application with the FE under the provisions of this part.

(b) Applications shall be filed at least ninety (90) days in advance of the proposed import or export or other requested action, unless a later date is permitted for good cause shown.

[54 FR 53531, Dec. 29, 1989; 55 FR 14916, Apr. 19, 1990]

§ 590.202 Contents of applications.

(a) Each application filed under § 590.201 shall contain the exact legal

§ 590.203

10 CFR Ch. II (1-1-16 Edition)

name of the applicant, the names, titles, and mailing addresses of a maximum of two persons for the official service list, a statement describing the action sought from FE, the justification for such action, including why the proposed action is not inconsistent with the public interest, and the FE docket number, if applicable.

(b) Each application shall include the matters listed below to the extent applicable. All factual matters shall be supported to the extent practicable by the necessary data or documents. Copies of relevant documents filed or intended to be filed with FERC may be submitted to satisfy the requirements of this section. Topics to be addressed or described shall include:

(1) The scope of the project, including the volumes of natural gas involved, expressed in either Mcf or Bcf and their Btu equivalents, the dates of commencement and completion of the proposed import or export, and the facilities to be utilized or constructed;

(2) The source and security of the natural gas supply to be imported or exported, including contract volumes and a description of the gas reserves supporting the project during the term of the requested authorization;

(3) Identification of all the participants in the transaction, including the parent company, if any, and identification of any corporate or other affiliations among the participants;

(4) The terms of the transaction, such as take-or-pay obligations, make-up provisions, and other terms that affect the marketability of the gas;

(5) The provisions of the import arrangement which establish the base price, volume requirements, transportation and other costs, and allow adjustments during the life of the project, and a demonstration as to why the import arrangement is and will remain competitive over the life of the project and is otherwise not inconsistent with the public interest;

(6) For proposed imports, the need for the natural gas by the applicant or applicant's prospective customers, including a description of the persons who are expected to purchase the natural gas; and for proposed exports, the lack of a national or regional need for the gas; and

(7) The potential environmental impact of the project. To the extent possible, the application shall include a listing and description of any environmental assessments or studies being performed on the proposed gas project. The application shall be updated as the status of any environmental assessments changes.

(c) The application shall also have attached a statement, including a signed opinion of legal counsel, showing that a proposed import or export of natural gas is within the corporate powers of the applicant and a copy of all relevant contracts and purchase agreements.

(d) The Assistant Secretary or the Assistant Secretary's delegate may at any time require the applicant and other parties to make supplemental filings of additional information necessary to resolve issues raised by the application.

(e) All information and data filed in support of or against an application will be placed in the official FE docket file of the proceeding and will not be afforded confidential treatment, unless the party shows why the information or data should be exempted from public disclosure and the Assistant Secretary or Assistant Secretary's delegate determines that such information or data shall be afforded confidential treatment. Such determination shall be made in accordance with 10 CFR 1004.11.

[54 FR 53531, Dec. 29, 1989; 55 FR 18227, May 1, 1990]

§ 590.203 Deficient applications.

If an application is incomplete or otherwise deemed deficient, the Assistant Secretary or the Assistant Secretary's delegate may require the applicant to submit additional information or exhibits to remedy the deficiency. If the applicant does not remedy the deficiency within the time specified by the Assistant Secretary or the Assistant Secretary's delegate, the application may be dismissed without prejudice to refile at another time.

§ 590.204 Amendment or withdrawal of applications.

(a) The applicant may amend or supplement the application at any time

Department of Energy

§ 590.208

prior to issuance of the Assistant Secretary's final opinion and order resolving the application, and shall amend or supplement the application whenever there are changes in material facts or conditions upon which the proposal is based.

(b) The Assistant Secretary may for good cause shown by motion of a party or upon the Assistant Secretary's own initiative decline to act on, in whole or in part, an amendment or supplement requested by an applicant under paragraph (a) of this section.

(c) After written notice to FE and service upon the parties of that notice an applicant may withdraw an application. Such withdrawal shall be effective thirty (30) days after notice to FE if the Assistant Secretary does not issue an order to the contrary within that time period.

§ 590.205 Notice of applications.

(a) Upon receipt of an application, the FE shall publish a notice of application in the FEDERAL REGISTER. The notice shall summarize the proposal. Except in emergency circumstances, generally the notice shall provide a time limit of not less than thirty (30) days from the notice's date of publication in the FEDERAL REGISTER for persons to file protests, comments, or a motion to intervene or notice of intervention, as applicable. The notice may also request comments on specific issues or matters of fact, law, or policy raised by the application.

(b) The notice of application shall advise the parties of their right to request additional procedures, including the opportunity to file written comments and to request that a conference, oral presentation, or trial-type hearing be convened. Failure to request additional procedures at this time shall be deemed a waiver of any right to additional procedures should the Assistant Secretary decide to grant the application and authorize the import or export by issuing a final opinion and order in accordance with § 590.316.

(c) Where negotiations between the DOE, including FE, and a foreign government have resulted in a formal policy agreement or statement affecting a particular import or export proceeding, FE shall include in the notice of appli-

cation a description of the terms or policy positions of that agreement or statement to the extent they apply to the proceeding, and invite comment. A formal policy agreement or statement affecting a particular import or export proceeding that is arrived at after publication of the notice of application shall be placed on the record in that proceeding and the parties given an opportunity to comment thereon.

§ 590.206 Notice of procedures.

In all proceedings where, following a notice of application and the time specified in the notice for the filing of responses thereto, the Assistant Secretary determines to have additional procedures, which may consist of the filing of supplemental written comments, written interrogatories or other discovery procedures, a conference, oral presentation, or trial-type hearing, the Assistant Secretary shall provide the parties with notice of the procedures the Assistant Secretary has determined to follow in the proceeding and advise the parties of their right to request any additional procedures in accordance with the provisions of § 590.310. The notice of procedures may identify and request comments on specific issues of fact, law, or policy relevant to the proceeding and may establish a time limit for requesting additional procedures.

§ 590.207 Filing fees.

A non-refundable filing fee of fifty dollars (\$50) shall accompany each application filed under § 590.201. Checks shall be made payable to "Treasury of the United States."

§ 590.208 Small volume exports.

Any person may export up to 100,000 cubic feet of natural gas (14.73 pounds per square inch at 60 degrees Fahrenheit) or the liquefied or compressed equivalent thereof, in a single shipment for scientific, experimental, or other non-utility gas use without prior authorization of the Assistant Secretary.

§ 590.209 Exchanges by displacement.

Any importer of natural gas may enter into an exchange by displacement agreement without the prior authorization of the Assistant Secretary when the net effect of the exchange is no different than under the importer's existing authorization. An exchange by displacement is an arrangement whereby authorized imported volumes are displaced by other gas for purposes of storage or flexibility. The term of the exchange agreement may not exceed five (5) years, the volumes imported may not exceed the importer's existing import authorization, and no actual natural gas may flow across the United States border under the terms of the exchange agreement. Any importer who enters into an exchange agreement pursuant to this section shall file with FE within fifteen (15) days after the start up of the exchange, a written description of the transaction, the exact volume of natural gas to be displaced, the name of the purchaser, and the import authorization under which the exchange is being carried out.

Subpart C—Procedures**§ 590.301 General.**

The procedures of this subpart are applicable to proceedings conducted on all applications or other requested actions filed under this part. The Assistant Secretary may conduct all aspects of the procedures of this subpart or may designate a presiding official pursuant to § 590.314.

§ 590.302 Motions and answers.

(a) Motions for any procedural or interlocutory ruling shall set forth the ruling or relief requested and state the grounds and the statutory or other authority relied upon. All written motions shall comply with the filing requirements of § 590.103. Motions made during conferences, oral presentations or trial-type hearings may be stated orally upon the record, unless the Assistant Secretary or the presiding official determines otherwise.

(b) Any party may file an answer to any written motion within fifteen (15) days after the motion is filed, unless another period of time is established by

the Assistant Secretary or the presiding official. Answers shall be in writing and shall detail each material allegation of the motion being answered. Answers shall state clearly and concisely the facts and legal authorities relied upon.

(c) Any motion, except for motions seeking intervention or requesting that a conference, oral presentation or trial-type hearing be held, shall be deemed to have been denied, unless the Assistant Secretary or presiding official acts within thirty (30) days after the motion is filed.

§ 590.303 Interventions and answers.

(a) A state commission may intervene in a proceeding under this part as a matter of right and become a party to the proceeding by filing a notice of intervention no later than the date fixed for filing motions to intervene in the applicable FE notice or order. If the period for filing the notice has expired, a state commission may be permitted to intervene by complying with the filing and other requirements applicable to any other person seeking to become a party to the proceeding as provided in this section.

(b) Any other person who seeks to become a party to a proceeding shall file a motion to intervene, which sets out clearly and concisely the facts upon which the petitioner's claim of interest is based.

(c) A motion to intervene shall state, to the extent known, the position taken by the movant and the factual and legal basis for such positions in order to advise the parties and the Assistant Secretary as to the specific issues of policy, fact, or law to be raised or controverted.

(d) Motions to intervene may be filed at any time following the filing of an application, but no later than the date fixed for filing such motions or notices in the applicable FE notice or order, unless a later date is permitted by the Assistant Secretary for good cause shown and after considering the impact of granting the late motion of the proceeding. Each motion or notice shall list the names, titles, and mailing addresses of a maximum of two persons for the official service list.

(e) Any party may file an answer to a motion to intervene, but such answer shall be made within fifteen (15) days after the motion to intervene was filed, unless a later date is permitted by the Assistant Secretary for good cause shown. Answers shall be in writing. Answers shall detail each material allegation of the motion to intervene being answered and state clearly and concisely the facts and legal authorities relied upon. Failure to answer is deemed a waiver of any objection to the intervention. This paragraph does not prevent the Assistant Secretary from ruling on a motion to intervene and issuing a final opinion and order in accordance with § 590.316 prior to the expiration of the fifteen (15) days in which a party has to answer a motion to intervene.

(f) If an answer in opposition to a motion to intervene is timely filed or if the motion to intervene is not timely filed, then the movant becomes a party only after the motion to intervene is expressly granted.

(g) If no answer in opposition to a motion to intervene is filed within the period of time prescribed in paragraph (e) of this section, the motion to intervene shall be deemed to be granted, unless the Assistant Secretary denies the motion in whole or in part or otherwise limits the intervention prior to the expiration of the time allowed in paragraph (e) for filing an answer to the motion to intervene. Where the motion to intervene is deemed granted, the participation of the intervenor shall be limited to matters affecting asserted rights and interests specifically set forth in the motion to intervene, and the admission of such intervenor to party status shall not be construed as recognition by FE that the intervenor might be aggrieved because of any order issued.

(h) In the event that a motion for late intervention is granted, an intervenor shall accept the record of the proceeding as it was developed prior to the intervention.

§ 590.304 Protests and answers.

(a) Any person objecting to an application filed under § 590.201 of this part or to any action taken by FE under this part may file a protest. No par-

ticular form is required. The protest shall identify the person filing the protest, the application or action being objected to, and provide a concise statement of the reasons for the protest.

(b) The filing of a protest, without also filing a motion to intervene or a notice of intervention, shall not make the person filing the protest a party to the proceeding.

(c) A protest shall be made part of the official FE docket file in the proceeding and shall be considered as a statement of position of the person filing the protest, but not as establishing the validity of any assertion upon which the decision would be based.

(d) Protests shall be served on the applicant and all parties by the person filing the protest. If the person filing the protest is unable to provide service on any person identified as a party to the proceeding after a good faith effort, then FE shall effect service. However, when the parties are not known, service requirements may be met by serving a copy on the applicant and on FE as provided in § 590.107(b).

(e) Protests may be filed at any time following the filing of an application, but no later than the date fixed for filing protests in the applicable FE notice or order, unless a later date is permitted by the Assistant Secretary for good cause shown.

(f) Any party may file an answer to a protest but such answer must be filed within fifteen (15) days after the protest was filed, unless a later date is permitted by the Assistant Secretary for good cause shown.

[54 FR 53531, Dec. 29, 1989; 55 FR 14916, Apr. 19, 1990]

§ 590.305 Informal discovery.

The parties to a proceeding may conduct discovery through use of procedures such as written interrogatories or production of documents. In response to a motion by a party, the Assistant Secretary or presiding official may determine the procedures to be utilized for discovery if the parties cannot agree on such procedures.

§ 590.306 Subpoenas.

(a) Subpoenas for the attendance of witnesses at a trial-type hearing or for

§ 590.307

the production of documentary evidence may be issued upon the initiative of the Assistant Secretary or presiding official, or upon written motion of a party or oral motion of a party during a conference, oral presentation, or trial-type hearing, if the Assistant Secretary or presiding official determines that the evidence sought is relevant and material.

(b) Motions for the issuance of a subpoena shall specify the relevance, materiality, and scope of the testimony or documentary evidence sought, including, as to documentary evidence, specification to the extent possible of the documents sought and the facts to be proven by them, the issues to which they relate, and why the information or evidence was not obtainable through discovery procedures agreed upon by the parties.

(c) If service of a subpoena is made by a United States Marshal or a Deputy United States Marshal, service shall be evidenced by their return. If made by another person, that person shall affirm that service has occurred and file an affidavit to that effect with the original subpoena. A witness who is subpoenaed shall be entitled to witness fees as provided in § 590.315(c).

§ 590.307 Depositions.

(a) Upon motion filed by a party, the Assistant Secretary or presiding official may authorize the taking of testimony of any witness by deposition. Unless otherwise directed in the authorization issued, a witness being deposed may be examined regarding any matter which is relevant to the issues involved in the pending proceeding.

(b) Parties authorized to take a deposition shall provide written notice to the witness and all other parties at least ten (10) days in advance of the deposition unless such advance notice is waived by mutual agreement of the parties.

(c) The requesting motion and notice shall state the name and mailing address of the witness, delineate the subject matters on which the witness is expected to testify, state the reason why the deposition should be taken, indicate the time and place of the deposition, and provide the name and mailing

10 CFR Ch. II (1-1-16 Edition)

address of the person taking the deposition.

(d) A witness whose testimony is taken by deposition shall be sworn in or shall affirm concerning the matter about which the witness has been called to testify before any questions are asked or testimony given. A witness deposed shall be entitled to witness fees as provided in § 590.315(c).

(e) The moving party shall file the entire deposition with FE after it has been subscribed and certified. No portion of the deposition shall constitute a part of the record in the proceedings unless received in evidence, in whole or in part, by the Assistant Secretary or presiding official.

§ 590.308 Admissions of facts.

(a) At any time prior to the end of a trial-type hearing, or, if there is no trial-type hearing, prior to the issuance of a final opinion and order under § 590.404, any party, the Assistant Secretary, or the presiding official may serve on any party a written request for admission of the truth of any matters at issue in the proceeding that relate to statements or opinions of fact or of the application of law to fact.

(b) A matter shall be considered admitted and conclusively established for the purposes of any proceeding in which a request for admission is served unless, within fifteen (15) days of such time limit established by the Assistant Secretary or presiding official, the party to whom the request is directed answers or objects to the request. Any answer shall specifically admit or deny the matter, or set forth in detail the reasons why the answering party cannot truthfully admit or deny the matter. An answering party may not give lack of information or knowledge as a reason for failure to admit or deny, unless the answering party states that, after reasonable inquiry, the answering party has been unable to obtain sufficient information to admit or deny. If an objection is made, the answering party shall state the reasons for the objection.

(c) If the Assistant Secretary or presiding official determines that an answer to a request for admission does not comply with the requirements of this section, the Assistant Secretary or

Department of Energy

§ 590.312

presiding official may order either that the matter is admitted or that an amended answer be served.

(d) A copy of all requests for admission and answers thereto shall be filed with FE in accordance with § 590.103. Copies of any documents referenced in the request shall be served with the request unless they are known to be in the possession of the other parties.

(e) The Assistant Secretary or presiding official may limit the number of requests for admission of facts in order to expedite a proceeding through elimination of duplicative requests.

§ 590.309 Settlements.

The parties may conduct settlement negotiations. If settlement negotiations are conducted during a conference, at the request of one of the parties, the Assistant Secretary or presiding official may order that the discussions be off-the-record with no transcript of such settlement negotiations being prepared for inclusion in the official record of the proceeding. No offer of settlement, comment or discussion by the parties with respect to an offer of settlement shall be subject to discovery or admissible into evidence against any parties who object to its admission.

§ 590.310 Opportunity for additional procedures.

Any party may file a motion requesting additional procedures, including the opportunity to file written comments, request written interrogatories or other discovery procedures, or request that a conference, oral presentation or trial-type hearing be held. The motion shall describe what type of procedure is requested and include the information required by §§ 590.311, 590.312 and 590.313, as appropriate. Failure to request additional procedures within the time specified in the notice of application or in the notice of procedure, if applicable, shall constitute a waiver of that right unless the Assistant Secretary for good cause shown grants additional time for requesting additional procedures. If no time limit is specified in the notice or order, additional procedures may be requested at any time prior to the issuance of a final opinion and order. At any time

during a proceeding, the Assistant Secretary or presiding official may on his or her own initiative determine to provide additional procedures.

[54 FR 53531, Dec. 29, 1989; 55 FR 14916, Apr. 19, 1990]

§ 590.311 Conferences.

(a) Upon motion by a party, a conference of the parties may be convened to adjust or settle the proceedings, set schedules, delineate issues, stipulate certain issues of fact or law, set procedures, and consider other relevant matters where it appears that a conference will materially advance the proceeding. The Assistant Secretary or presiding official may delineate the issues which are to be considered and may place appropriate limitations on the number of intervenors who may participate, if two or more intervenors have substantially like interests.

(b) A motion by a party for a conference shall include a specific showing why a conference will materially advance the proceeding.

(c) Conferences shall be recorded, unless otherwise ordered by the Assistant Secretary or presiding official, and the transcript shall be made a part of the official record of the proceeding and available to the public.

§ 590.312 Oral presentations.

(a) Any party may file a motion requesting an opportunity to make an oral presentation of views, arguments, including arguments of counsel, and data on any aspect of the proceeding. The motion shall identify the substantial question of fact, law or policy at issue and demonstrate that it is material and relevant to the merits of the proceeding. The party may submit material supporting the existence of substantial issues. The Assistant Secretary or presiding official ordinarily will grant a party's motion for an oral presentation, if the Assistant Secretary or presiding official determines that a substantial question of fact, law, or policy is at issue in the proceeding and illumination of that question will be aided materially by such an oral presentation.

(b) The Assistant Secretary or presiding official may require parties making oral presentations to file briefs

§ 590.313

10 CFR Ch. II (1–1–16 Edition)

or other documents prior to the oral presentation. The Assistant Secretary or presiding official also may delineate the issues that are to be considered at the oral presentation and place appropriate limitations on the number of intervenors who may participate if two or more intervenors have substantially like interests.

(c) Oral presentations shall be conducted in an informal manner with the Assistant Secretary or the presiding official and other decisional employees presiding as a panel. The panel may question those parties making an oral presentation. Cross-examination by the parties and other more formal procedures used in trial-type hearings will not be available in oral presentations. The oral presentation may be, but need not be, made by legal counsel.

(d) Oral presentations shall be recorded, and the transcript shall be made part of the official record of the proceeding and available to the public.

§ 590.313 Trial-type hearings.

(a) Any party may file a motion for a trial-type hearing for the purpose of taking evidence on relevant and material issues of fact genuinely in dispute in the proceeding. The motion shall identify the factual issues in dispute and the evidence that will be presented. The party must demonstrate that the issues are genuinely in dispute, relevant and material to the decision and that a trial-type hearing is necessary for a full and true disclosure of the facts. The Assistant Secretary or presiding official shall grant a party's motion for a trial-type hearing, if the Assistant Secretary or presiding official determines that there is a relevant and material factual issue genuinely in dispute and that a trial-type hearing is necessary for a full and true disclosure of the facts.

(b) In trial-type hearings, the parties shall have the right to be represented by counsel, to request discovery, to present the direct and rebuttal testimony of witnesses, to cross-examine witnesses under oath, and to present documentary evidence.

(c) The Assistant Secretary or presiding official upon his or her own initiative or upon the motion of any party may consolidate any proceedings in-

volving common questions of fact in whole or in part for a trial-type hearing. The Assistant Secretary or presiding official may also place appropriate limitations on the number of intervenors who may participate if two or more intervenors have substantially like interests.

(d) The Assistant Secretary or presiding official may make such rulings for trial-type hearings, including delineation of the issues and limitation of cross-examination of a witness, as are necessary to obtain a full and true disclosure of the facts and to limit irrelevant, immaterial, or unduly repetitious evidence.

(e) At trial-type hearings, the Assistant Secretary or presiding official, or any other decisional employee directed by the Assistant Secretary or presiding official, may call witnesses for testimony or presenting exhibits that directly relate to a particular issue of fact to be considered at the hearing. The Assistant Secretary or presiding official, or any other decisional employee directed by the Assistant Secretary or presiding official, may also question witnesses offered by the parties concerning their testimony.

(f) Trial-type hearings shall be recorded, and the transcript shall be made part of the official record of the proceeding and available to the public.

§ 590.314 Presiding officials.

(a) The Assistant Secretary may designate a presiding official to conduct any stage of the proceeding, including officiating at a conference, oral presentation, or trial-type hearing. The presiding official shall have the full authority of the Assistant Secretary during such proceedings.

(b) A presiding official at a conference, oral presentation, or trial-type hearing shall have the authority to regulate the conduct of the proceeding including, but not limited to, determination of the issues to be raised during the course of the conference, oral presentation, or trial-type hearing, administering oaths or affirmations, directing discovery, ruling on objections to the presentation of testimony or exhibits, receiving relevant and material

Department of Energy

§ 590.401

evidence, requiring the advance submission of written testimony and exhibits, ruling on motions, determining the format, directing that briefs be filed with respect to issues raised or to be raised during the course of the conference, oral presentation or trial-type hearing, questioning witnesses, taking reasonable measures to exclude duplicative material, and placing limitations on the number of witnesses to be called by a party.

§ 590.315 Witnesses.

(a) The Assistant Secretary or presiding official may require that the direct testimony of witnesses in trial-type hearings be submitted in advance of the hearing and be under oath, and in written form.

(b) Witnesses who testify in trial-type hearings shall be under oath or affirmation before being allowed to testify.

(c) Witnesses subpoenaed pursuant to § 590.306 shall be paid the same fees and mileage as paid for like services in the District Courts of the United States.

(d) Witnesses subpoenaed pursuant to § 590.307 shall be paid the same fees and mileage as paid for like services in the District Court of the United States.

[54 FR 53531, Dec. 29, 1989; 55 FR 14916, Apr. 19, 1990]

§ 590.316 Shortened proceedings.

In any proceeding where, in response to a notice of application or notice of procedures, if applicable, no party files a motion requesting additional procedures, including the right to file written comments, or the holding of a conference, oral presentation, or trial-type hearing, or where the Assistant Secretary determines that such requested additional procedures are not required pursuant to §§ 590.310, 590.311, 590.312 and 590.313, the Assistant Secretary may issue a final opinion and order on the basis of the official record, including the application and all other filings. In any proceeding in which the Assistant Secretary intends to deny the application or grant the application with the attachment of material conditions unknown to, or likely to be opposed by, the applicant, solely on the basis of the application and responses to the notice of application or notice of

procedures, if applicable, without additional procedures, the Assistant Secretary shall advise the parties in writing generally of the issues of concern to the Assistant Secretary upon which the denial or material conditions would be based and provide them with an opportunity to request additional procedures pursuant to §§ 590.310, 590.311, 590.312 and 590.313.

§ 590.317 Complaints.

(a) Any person may file a complaint objecting to the actions by any other person under any statute, rule, order or authorization applicable to an existing import or export authorization over which FE has jurisdiction. No particular form is required. The complaint must be filed with FE in writing and must contain the name and address of the complainant and the respondent and state the facts forming the basis of the complaint.

(b) A complaint concerning an existing import or export authorization shall be served on all parties to the original import or export authorization proceeding either by the complainant or by FE if the complainant has made a good faith effort but has been unable to effect service.

(c) The Assistant Secretary may issue an order to show cause under § 590.401, or may provide opportunity for additional procedures pursuant to §§ 590.310, 590.311, 590.312, or § 590.313, in order to determine what action should be taken in response to the complaint.

Subpart D—Opinions and Orders

§ 590.401 Orders to show cause.

A proceeding under this part may commence upon the initiative of the Assistant Secretary or in response to an application by any person requesting FE action against any other person alleged to be in contravention or violation of any authorization, statute, rule, order, or law administered by FE applicable to the import or export of natural gas, or for any other alleged wrong involving importation or exportation of natural gas over which FE has jurisdiction. Any show cause order issued shall identify the matters of interest or the matters complained of

§ 590.402

that the Assistant Secretary is inquiring about, and shall be deemed to be tentative and for the purpose of framing issues for consideration and decision. The respondent named in the order shall respond orally or in writing, or both, as required by the order. A show cause order is not a final opinion and order.

§ 590.402 Conditional orders.

The Assistant Secretary may issue a conditional order at any time during a proceeding prior to issuance of a final opinion and order. The conditional order shall include the basis for not issuing a final opinion and order at that time and a statement of findings and conclusions. The findings and conclusions shall be based solely on the official record of the proceeding.

§ 590.403 Emergency interim orders.

Where consistent with the public interest, the Assistant Secretary may waive further procedures and issue an emergency interim order authorizing the import or export of natural gas. After issuance of the emergency interim order, the proceeding shall be continued until the record is complete, at which time a final opinion and order shall be issued. The Assistant Secretary may attach necessary or appropriate terms and conditions to the emergency interim order to ensure that the authorized action will be consistent with the public interest.

§ 590.404 Final opinions and orders.

The Assistant Secretary shall issue a final opinion and order and attach such conditions thereto as may be required by the public interest after completion and review of the record. The final opinion and order shall be based solely on the official record of the proceeding and include a statement of findings and conclusions, as well as the reasons or basis for them, and the appropriate order, condition, sanction, relief or denial.

§ 590.405 Transferability.

Authorizations by the Assistant Secretary to import or export natural gas shall not be transferable or assignable, unless specifically authorized by the Assistant Secretary.

10 CFR Ch. II (1–1–16 Edition)

§ 590.406 Compliance with orders.

Any person required or authorized to take any action by a final opinion and order of the Assistant Secretary shall file with FE, within thirty (30) days after the requirement or authorization becomes effective, a notice, under oath, that such requirement has been complied with or such authorization accepted or otherwise acted upon, unless otherwise specified in the order.

§ 590.407 Reports of changes.

Any person authorized to import or export natural gas has a continuing obligation to give the Assistant Secretary written notification, as soon as practicable, of any prospective or actual changes to the information submitted during the application process upon which the authorization was based, including, but not limited to, changes to: The parties involved in the import or export arrangement, the terms and conditions of any applicable contracts, the place of entry or exit, the transporters, the volumes accepted or offered, or the import or export price. Any notification filed under this section shall contain the FE docket number(s) to which it relates. Compliance with this section does not relieve an importer or exporter from responsibility to file the appropriate application to amend a previous import or export authorization under this part whenever such changes are contrary to or otherwise not permitted by the existing authorization.

Subpart E—Applications for Rehearing

§ 590.501 Filing.

(a) An application for rehearing of a final opinion and order, conditional order, or emergency interim order may be filed by any party aggrieved by the issuance of such opinion and order within thirty (30) days after issuance. The application shall be served on all parties.

(b) The application shall state concisely the alleged errors in the final opinion and order, conditional order, or emergency interim order and must set forth specifically the ground or grounds upon which the application is

Department of Energy

§ 590.505

based. If an order is sought to be vacated, reversed, or modified by reason of matters that have arisen since the issuance of the final opinion and order, conditional order, or emergency interim order, the matters relied upon shall be set forth with specificity in the application. The application shall also comply with the filing requirements of § 590.103.

§ 590.502 Application is not a stay.

The filing of an application for rehearing does not operate as a stay of the Assistant Secretary's order, unless specifically ordered by the Assistant Secretary.

§ 590.503 Opinion and order on rehearing.

Upon application for rehearing, the Assistant Secretary may grant or deny rehearing or may abrogate or modify the final opinion and order, conditional

order, or emergency interim order with or without further proceedings.

§ 590.504 Denial by operation of law.

Unless the Assistant Secretary acts upon the application for rehearing within thirty (30) days after it is filed, it is deemed to be denied. Such denial shall constitute final agency action for the purpose of judicial review.

§ 590.505 Answers to applications for rehearing.

No answers to applications for rehearing shall be entertained. Prior to the issuance of any final opinion and order on rehearing, however, the Assistant Secretary may afford the parties an opportunity to file briefs or answers and may order that a conference, oral presentation, or trial-type hearing be held on some or all of the issues presented by an application for rehearing.

Subpart A—General

SOURCE: 61 FR 7166, Feb. 26, 1996, unless otherwise noted.

§ 600.1 Purpose.

This part implements the Federal Grant and Cooperative Agreement Act, Pub. L. 95–224, as amended by Pub. L. 97–258 (31 U.S.C. 6301–6308), and establishes uniform policies and procedures for the award and administration of DOE grants and cooperative agreements. This subpart (Subpart A) sets forth the general policies and procedures applicable to the award and administration of grants, cooperative agreements, and technology investment agreements. The specific guidance for technology investment agreements is contained in part 603.

[61 FR 7166, Feb. 26, 1996, as amended at 70 FR 69253, Nov. 15, 2005]

§ 600.2 Applicability.

(a) Except as otherwise provided by Federal statute or program rule, this part applies to applications, funding opportunity announcement, and new, continuation, and renewal awards (and any subsequent subawards).

10 CFR Ch. II (1–1–16 Edition)

(b) Any new, continuation, or renewal award (and any subsequent subaward) shall comply with any applicable Federal statute, Federal rule, Office of Management and Budget (OMB) Circular and Governmentwide guidance in effect as of the date of such award.

(c) Financial assistance to foreign entities is governed, to the extent appropriate, by this part and by the administrative requirements and cost principles applicable to their respective recipient type, e.g. governmental, non-profit, commercial.

[61 FR 7166, Feb. 26, 1996, as amended at 74 FR 44275, Aug. 28, 2009]

§ 600.3 Definitions.

Amendment means the written document executed by a DOE Contracting Officer that changes one or more terms or conditions of an existing financial assistance award.

Award means the written document executed by a DOE Contracting Officer, after an application is approved, which contains the terms and conditions for providing financial assistance to the recipient.

Budget period means the interval of time, specified in the award, into which a project is divided for budgeting and funding purposes.

Continuation award means an award for a succeeding or subsequent budget period after the initial budget period of either an approved project period or renewal thereof.

Contract means a written procurement contract executed by a recipient or subrecipient for the acquisition of property or services under a financial assistance award.

Contracting Officer means the DOE official authorized to execute awards on behalf of DOE and who is responsible for the business management and non-program aspects of the financial assistance process.

Cost sharing or matching means that portion of project or program costs not borne by the Federal Government.

DOE Patent Counsel means the Department of Energy Patent Counsel assisting the Contracting Officer in the review and coordination of patents and data related items.

Financial assistance means the transfer of money or property to a recipient

Department of Energy

§ 600.4

or subrecipient to accomplish a public purpose of support or stimulation authorized by Federal statute. For purposes of this part, financial assistance instruments are grants and cooperative agreements and subawards.

Head of Contracting Activity or HCA means a DOE official with senior management authority for the award and administration of financial assistance instruments within one or more DOE organizational elements.

Merit review means a thorough, consistent, and objective examination of applications based on pre-established criteria by persons who are independent of those submitting the applications and who are knowledgeable in the field of endeavor for which support is requested.

Nonprofit organization means any corporation, trust, foundation, or institution which is entitled to exemption under section 501(c)(3) of the Internal Revenue Code, or which is not organized for profit and no part of the net earnings of which inure to the benefit of any private shareholder or individual (except that the definition of “nonprofit organization” at 48 CFR 27.301 shall apply for patent matters set forth at §§ 600.136 and 600.325).

Program rule means a rule issued by a DOE program office for the award and administration of financial assistance which may describe the program’s purpose or objectives, eligibility requirements for applicants, types of program activities or areas to be supported, evaluation and selection process, cost sharing requirements, etc. These rules usually supplement the generic policies and procedures for financial assistance contained in this part.

Project means the set of activities described in an application, State plan, or other document that is approved by DOE for financial assistance (whether such financial assistance represents all or only a portion of the support necessary to carry out those activities.)

Project period means the total period of time indicated in an award during which DOE expects to provide financial assistance. A project period may consist of one or more budget periods and may be extended by DOE.

Recipient means the organization, individual, or other entity that receives

an award from DOE and is financially accountable for the use of any DOE funds or property provided for the performance of the project, and is legally responsible for carrying out the terms and conditions of the award.

Renewal award means an award which adds one or more additional budget periods to an existing project period.

Research and development means all research activities, both basic and applied, and all development activities that are supported at universities, colleges, and other non-profit institutions and commercial organizations. “Research” is defined as a systematic study directed toward fuller scientific knowledge or understanding of the subject studied. The term research also includes activities involving the training of individuals in research techniques where such activities utilize the same facilities as other research and development activities and where such activities are not included in the instruction function. “Development” is the systematic use of knowledge and understanding gained from research directed toward the production of useful materials, devices, systems, or methods, including design and development of prototypes and processes.

Total Project Cost means all allowable costs, as set forth in the applicable Federal cost principles, incurred in accomplishing the objective of the project during the project period, including the value of contributions made by third parties and costs incurred by Federally Funded Research and Development Centers.

[61 FR 7166, Feb. 26, 1996, as amended at 64 FR 56420, Oct. 20, 1999; 68 FR 50650, Aug. 21, 2003; 74 FR 44275, Aug. 28, 2009]

§ 600.4 Deviations.

(a) *General.* (1) A deviation is the use of any policy, procedure, form, standard, term, or condition which varies from a requirement of this part, or the waiver of any such requirement, unless such use or waiver is authorized or precluded by Federal statute. The use of optional or discretionary provisions of this part, including special restrictive conditions used in accordance with §§ 600.114, 600.212, and 600.304 are not deviations. Awards to foreign entities

§ 600.5

and the waiver of the cost sharing requirements in § 600.30 are not subject to this section.

(2) A single-case deviation is a deviation which applies to one financial assistance transaction and one applicant, recipient, or subrecipient only.

(3) A class deviation is a deviation which applies to more than one financial assistance transaction, applicant, recipient, or subrecipient.

(b) The DOE officials specified in paragraph (c) of this section may authorize a deviation only upon a written determination that the deviation is—

(1) Necessary to achieve program objectives;

(2) Necessary to conserve public funds;

(3) Otherwise essential to the public interest; or

(4) Necessary to achieve equity.

(c) *Approval procedures.* (1) A deviation request must be in writing and must be submitted to the responsible DOE Contracting Officer. An applicant for a subaward or a subrecipient shall submit any such request through the recipient.

(2) Except as provided in paragraph (c)(3) of this section—

(i) A single-case deviation may be authorized by the responsible HCA.

(ii) A class deviation may be authorized by the Director, Procurement and Assistance Management or designee.

(3) Whenever the approval of OMB, other Federal agency, or other DOE office is required to authorize a deviation, the proposed deviation must be submitted to the Director, Procurement and Assistance Management or designee for concurrence prior to submission to the authorizing official.

(d) *Notice.* Whenever a request for a class deviation is approved, DOE shall publish a notice in the FEDERAL REGISTER at least 15 days before the class deviation becomes effective. Whenever a class deviation is contained in a proposed program rule, the preamble to the proposed rule shall describe the purpose and scope of the deviation.

(e) *Subawards.* A recipient may use a deviation in a subaward only with the

10 CFR Ch. II (1–1–16 Edition)

prior written approval of a DOE Contracting Officer.

[61 FR 7166, Feb. 26, 1996, as amended at 64 FR 56420, Oct. 20, 1999; 68 FR 50650, Aug. 21, 2003; 74 FR 44275, Aug. 28, 2009]

§ 600.5 Selection of award instrument.

(a) If DOE has administrative discretion in the selection of the award instrument, the DOE decision as to whether the relationship is principally one of procurement or financial assistance shall be made pursuant to the Federal Grant and Cooperative Agreement Act as codified at 31 U.S.C. 6301–6306. A grant or cooperative agreement shall be the appropriate instrument, in accordance with this part, when the principal purpose of the relationship is the transfer of money or property to accomplish a public purpose of support or stimulation authorized by Federal statute. In selecting the type of financial assistance instrument, DOE shall limit involvement between itself and the recipient in the performance of a project to the minimum necessary to achieve DOE program objectives.

(b) When it is anticipated that substantial involvement will be necessary between DOE and the recipient during performance of the contemplated activity, the award instrument shall be a cooperative agreement rather than a grant. Every cooperative agreement shall explicitly state the substantial involvement anticipated between DOE and the recipient during the performance of the project. Substantial involvement exists if:

(1) Responsibility for the management, control, or direction of the project is shared by DOE and the recipient; or

(2) Responsibility for the performance of the project is shared by DOE and the recipient.

(c) Providing technical assistance or guidance of a programmatic nature to a recipient does not constitute substantial involvement if:

(1) the recipient is not required to follow such guidance;

(2) the technical assistance or guidance is not expected to result in continuing DOE involvement in the performance of the project; or

Department of Energy

§ 600.6

(3) The technical assistance or guidance pertains solely to the administrative requirements of the award.

(d) In cooperative agreements, DOE has the right to intervene in the conduct or performance of project activities for programmatic reasons. Intervention includes the interruption or modification of the conduct or performance of project activities. Suspension or termination of the cooperative agreement under §§ 600.162, 600.243 and 600.352 does not constitute intervention in the conduct or performance of project activities.

[61 FR 7166, Feb. 26, 1996, as amended at 74 FR 44275, Aug. 28, 2009]

§ 600.6 Eligibility.

(a) *General.* DOE shall solicit applications for financial assistance in a manner which provides for the maximum amount of competition feasible.

(b) *Restricted eligibility.* If DOE restricts eligibility, an explanation of why the restriction of eligibility is considered necessary shall be included in the funding opportunity announcement, program rule, or published notice.

(1) If the aggregate amount of DOE funds available for award under a funding opportunity announcement or published notice is \$1 million or more, unless authorized by statute or program rule, such restriction of eligibility shall be:

(i) Supported by a written determination initiated by the program office;

(ii) Concurred in by legal counsel and the Contracting Officer; and

(iii) Approved by an official no less than one level below the responsible program Assistant Secretary, Deputy Administrator, or other official of equivalent authority.

(2) Where the amount of DOE funds is less than \$1 million, the cognizant HCA and the Contracting Officer may approve the determination.

(c) *Noncompetitive financial assistance.* DOE may award a grant or cooperative agreement or technology investment agreement on a noncompetitive basis only if the application satisfies one or more of the follow selection criteria:.

(1) The activity to be funded is necessary to the satisfactory completion of, or is a continuation or renewal of,

an activity presently being funded by DOE or another Federal agency, and for which competition for support would have a significant adverse effect on continuity or completion of the activity.

(2) The activity is being or would be conducted by the applicant using its own resources or those donated or provided by third parties; however, DOE support of that activity would enhance the public benefits to be derived and DOE knows of no other entity which is conducting or is planning to conduct such an activity.

(3) The applicant is a unit of government and the activity to be supported is related to performance of a governmental function within the subject jurisdiction, thereby precluding DOE provision of support to another entity.

(4) The applicant has exclusive domestic capability to perform the activity successfully, based upon unique equipment, proprietary data, technical expertise, or other such unique qualifications.

(5) The award implements an agreement between the United States Government and a foreign government to fund a foreign applicant.

(6) Time constraints associated with a public health, safety, welfare or national security requirement preclude competition.

(7) The proposed project was submitted as an unsolicited proposal and represents a unique or innovative idea, method, or approach that would not be eligible for financial assistance under a recent, current, or planned funding opportunity announcement, and if, as determined by DOE, a competitive funding opportunity announcement would not be appropriate.

(8) The responsible program Assistant Secretary, Deputy Administrator, or other official of equivalent authority determines that a noncompetitive award is in the public interest. This authority may not be delegated.

(d) *Approval requirements.* (1) Where the amount of DOE funds is \$1 million or greater, determinations of noncompetitive awards shall be:

(i) Documented in writing;

(ii) Concurred in by the responsible program technical official and local legal counsel; and

§ 600.7

10 CFR Ch. II (1–1–16 Edition)

(iii) Approved, prior to award, by the responsible program Assistant Secretary, Deputy Administrator, or official of equivalent authority and the Contracting Officer. The approval authority may be delegated to one organizational level below the Assistant Secretary, Deputy Administrator, or official of equivalent authority.

(2) Where the amount of DOE funds is less than \$1 million, determinations of noncompetitive awards shall be:

- (i) Documented in writing;
- (ii) Concurred in by local legal counsel, unless for a particular award or class of awards of \$1 million or less, review is waived by legal counsel; and
- (iii) Approved by the cognizant HCA and the Contracting Officer.

[74 FR 44275, Aug. 28, 2009, as amended at 74 FR 48850, Sept. 25, 2009]

§ 600.7 Small and disadvantaged and women-owned business participation.

(a) DOE encourages the participation in financial assistance awards of small businesses, including those owned by socially and economically disadvantaged individuals and women, of historically black colleges, and of colleges and universities with substantial minority enrollments.

(b) For definitions of the terms in paragraph (a) of this section, see the Higher Education Act of 1965, and 15 U.S.C. 644, as amended by the Federal Acquisition Streamlining Act (FASA), and implementing regulations under FASA issued by the Office of Federal Procurement Policy.

(c) When entering into contracts under financial assistance awards, recipients and subrecipients shall comply with the requirements of §§ 600.144, 600.236 and 600.331, as applicable.

[61 FR 7166, Feb. 26, 1996, as amended at 74 FR 44276, Aug. 28, 2009]

§ 600.8 Funding Opportunity Announcement.

(a) *General.* Funding Opportunity Announcements (FOA) include any issuance used to announce funding opportunities that would result in the award of a discretionary grant, cooperative agreement, or technology investment agreement, whether it is called a

program announcement, program notice, solicitation, broad agency announcement, research announcement, notice of program interest, or something else.

(1) A Program Assistant Secretary (or official of equivalent authority) may annually issue a program notice describing research areas in which financial assistance is being made available. Such notice shall also state whether the research areas covered by the notice are to be added to those listed in a previously issued program rule. If they are to be included, then applications received as a result of the notice may be treated as having been in response to that previously published program rule. If they are not to be included, then applications received in response to the notice are to be treated as unsolicited applications. FOAs may be issued by a DOE Contracting Officer or program office with prior concurrence of the contracting office.

(2) DOE must post synopses of its FOAs and modifications to the announcements at the Grants.gov Internet site, using the standard data elements/format, except for:

(i) Announcements of funding opportunities for awards less than \$25,000 for which 100 percent of eligible applicants live outside of the United States.

(ii) Single source announcements of funding opportunities which are specifically directed to a known recipient.

(b) *Subawards.* In accordance with the provisions of the applicable statute and program rules, if a DOE financial assistance program involves the award of financial assistance by a recipient to a subrecipient, the recipient shall provide sufficient advance notice so that potential subrecipients may prepare timely applications and secure prerequisite reviews and approvals.

(c) *Announcement format.* DOE must use the government-wide standard format to publish program announcements of funding opportunities.

[61 FR 7166, Feb. 26, 1996, as amended at 69 FR 7867, Feb. 20, 2004; 70 FR 69254, Nov. 15, 2005; 74 FR 44276, Aug. 28, 2009]

Department of Energy

§ 600.15

§ 600.9 [Reserved]

§§ 600.11–600.12 [Reserved]

§ 600.10 Form and content of applications.

(a) *General.* Applications shall be required for all financial assistance projects or programs.

(b) *Forms.* Applications shall be on the form specified in a program rule, the program announcement, or these regulations. (See also §§ 600.112 and 600.210.) For unsolicited applications, a guide for preparation and submission is available from U.S. Department of Energy, Federal Energy Technology Center, Attn: Unsolicited Proposal Manager, Post Office Box 10940, Pittsburgh, PA, 15236-0940.

(c) *Contents of an application.* In general, a financial assistance application shall include:

(1) A facesheet containing basic identifying information. The facesheet shall be the Standard Form (SF)424;

(2) A detailed narrative description of the proposed project, including the objectives of the project and the applicant's plan for carrying it out;

(3) A budget with supporting justification; and

(d) *Incomplete applications.* DOE may return an application that:

(1) Is not signed, either in writing or electronically, by an official authorized to bind the applicant; or

(2) Omits any information or documentation required by statute, program rule, or the solicitation, if the nature of the omission precludes review of the application.

(e) *Supplemental information.* During the review of a complete application, DOE may request the submission of additional information only if the information is essential to evaluate the application.

(f) Registration is required in the Central Contractor Registration (CCR) for all applications. Information on registration can be obtained at <http://www.ccr.gov/Grantees.aspx>.

[61 FR 7166, Feb. 26, 1996, as amended at 64 FR 56420, Oct. 20, 1999; 69 FR 7867, Feb. 20, 2004; 74 FR 44276, Aug. 28, 2009]

§ 600.13 Merit review.

(a) It is the policy of DOE that discretionary financial assistance be awarded through a merit-based selection process. A merit review means a thorough, consistent, and objective examination of applications based on pre-established criteria by persons who are independent of those submitting the applications and who are knowledgeable in the field of endeavor for which support is requested.

(b) Each program office must establish a merit review system covering the financial assistance programs it administers. Merit review of financial assistance applications is intended to be advisory and is not intended to replace the authority of the project/program official with responsibility for deciding whether an award will be made.

[64 FR 56420, Oct. 20, 1999]

§ 600.14 [Reserved]

§ 600.15 Authorized uses of information.

(a) *General.* Information contained in applications shall be used only for evaluation purposes unless such information is generally available to the public or is already the property of the Government. The Trade Secrets Act, 18 U.S.C. 1905, prohibits the unauthorized disclosure by Federal employees of trade secret and confidential business information.

(b) *Treatment of application information.* (1) An application or other document, including any unsolicited information, may include technical data and other data, including trade secrets and commercial or financial information that is privileged or confidential, which the applicant does not want disclosed to the public or used by the Government for any purpose other than application evaluation.

(i) To protect such data, the submitter must mark the cover sheet of the application or other document with the following Notice:

§ 600.16

Notice of Restriction on Disclosure and Use of Data

Pages [] of this document may contain trade secrets or commercial or financial information that is privileged or confidential and is exempt from public disclosure. Such information shall be used or disclosed only for evaluation purposes or in accordance with a financial assistance or loan agreement between the submitter and the Government. The Government may use or disclose any information that is not appropriately marked or otherwise restricted, regardless of source.

(ii)(A) To further protect such data, except as otherwise provided in paragraph (b)(1)(iii) of this section, each page containing trade secrets or commercial or financial information that is privileged or confidential must be specifically identified and marked with text similar to the following:

May contain trade secrets or commercial or financial information that is privileged or confidential and exempt from public disclosure.

(B) In addition, each line or paragraph containing trade secrets or commercial or financial information that is privileged or confidential must be marked with brackets or other clear identification, such as highlighting.

(iii) (A) In the case where a form for data submission is unalterable, such as certain forms submitted through Grants.gov, submitters must include in a cover letter or the project narrative a notice like the following:

Forms [] may contain trade secrets or commercial or financial information that is privileged or confidential and exempt from public disclosure. Such information shall be used or disclosed only for evaluation purposes or in accordance with a financial assistance or loan agreement between the submitter and the Government. The Government may use or disclose any information that is not appropriately marked or otherwise restricted, regardless of source.

(B) The cover letter or project narrative must also specify the particular information on such forms that the submitter believes contains trade secrets or commercial or financial information that is privileged or confidential.

(2) Unless DOE specifies otherwise, DOE shall not refuse to consider an application or other document solely on the basis that the application or other

10 CFR Ch. II (1–1–16 Edition)

document is restrictively marked in accordance with paragraph (b)(1) of this section.

(3) Data (or abstracts of data) specifically marked in accordance with paragraph (b)(1) of this section shall be used by DOE or its designated representatives solely for the purpose of evaluating the proposal. The data so marked shall not be disclosed or used for any other purpose except to the extent provided in any resulting assistance agreement, or to the extent required by law, including the Freedom of Information Act (5 U.S.C. 552) (10 CFR Part 1004). The Government shall not be liable for disclosure or use of unmarked data and may use or disclose such data for any purpose.

(4) This process enables DOE to follow the provisions of 10 CFR 1004.11(d) in the event a Freedom of Information Act (5 U.S.C. 552) request is received for the data submitted, such that information not identified as subject to a claim of exemption may be released without obtaining the submitter's views under the process set forth in 10 CFR 1004.11(c)

[76 FR 26581, May 9, 2011]

§ 600.16 Legal authority and effect of an award.

(a) A DOE financial assistance award is valid only if it is in writing and is signed, either in writing or electronically, by a DOE Contracting Officer.

(b) Recipients are free to accept or reject the award. A request to draw down DOE funds constitutes acceptance; however, DOE may require formal acceptance of an award.

(c) DOE funds awarded under a grant, cooperative agreement, or technology investment agreement shall be obligated as of the date the DOE Contracting Officer signs the award; however, the recipient is not authorized to incur costs under an award prior to the beginning date of the budget period shown in the award except as may be authorized in accordance with §§ 600.125(e), 600.230, 600.317(b), or 603.830 of this part. The duration of the DOE financial obligation shall not extend beyond the expiration date of the budget period shown in the award unless authorized by a DOE Contracting Officer by means of a continuation or renewal

Department of Energy

§ 600.22

award or other extension of the budget period.

[61 FR 7166, Feb. 26, 1996, as amended at 70 FR 69254, Nov. 15, 2005; 74 FR 44276, Aug. 28, 2009]

§ 600.17 Contents of Award.

Each financial assistance award shall be made on a Notice of Financial Assistance Award (NFAA) which contains basic identifying and funding information. The NFAA provides the contents of the award including any special terms and conditions, program regulations, the National Policy Assurances, and any other provisions necessary to establish the respective rights, duties, obligations, and responsibilities of DOE and the recipient, consistent with the requirements of this part.

[74 FR 44276, Aug. 28, 2009]

§ 600.18 [Reserved]

§ 600.19 Notification to unsuccessful applicants.

DOE shall promptly notify in writing each applicant whose application has not been selected for award or whose application cannot be funded because of the unavailability of appropriated funds. If the application was not selected, the written notice shall explain why the application was not selected.

[61 FR 7166, Feb. 26, 1996, as amended at 74 FR 44276, Aug. 28, 2009]

§ 600.20 Maximum DOE obligation.

(a) The maximum DOE obligation to the recipient is—

(1) For monetary awards, the amount shown in the award as the amount of DOE funds obligated, and

(2) Any designated property.

(b) DOE shall not be obligated to make any additional, supplemental, continuation, renewal, or other award for the same or any other purpose.

§ 600.21 Access to records.

(a) In addition to recipient and subrecipient responsibilities relative to access to records specified in §§ 600.153, 600.242 and 600.342, for any negotiated contract or subcontract in excess of \$10,000 under a grant or cooperative agreement, DOE, the Comptroller General of the United States, the recipient

and the subrecipient (if the contract was awarded under a financial assistance subaward), or any of their authorized representatives shall have the right of access to any books, documents, papers, or other records of the contractor or subcontractor which are pertinent to that contract or subcontract, in order to make audit, examination, excerpts, and copies.

(b) The right of access may be exercised for as long as the applicable records are retained by the recipient, subrecipient, contractor, or subcontractor.

[61 FR 7166, Feb. 26, 1996, as amended at 74 FR 44276, Aug. 28, 2009]

§ 600.22 Disputes and appeals.

(a) *Informal dispute resolution.* Whenever practicable, DOE shall attempt to resolve informally any dispute over the award or administration of financial assistance. Informal resolution, including resolution through an alternative dispute resolution mechanism, shall be preferred over formal procedures, to the extent practicable.

(b) *Alternative dispute resolution (ADR).* Before issuing a final determination in any dispute in which informal resolution has not been achieved, the Contracting Officer shall suggest that the other party consider the use of voluntary consensual methods of dispute resolution, such as mediation. The DOE dispute resolution specialist is available to provide assistance for such disputes, as are trained mediators of other federal agencies. ADR may be used at any stage of a dispute.

(c) *Final determination.* Whenever a dispute is not resolved informally or through an alternative dispute resolution process, DOE shall mail (by certified mail) a brief written determination signed by a Contracting Officer, setting forth DOE's final disposition of such dispute. Such determination shall contain the following information:

(1) A summary of the dispute, including a statement of the issues and of the positions taken by the Department and the party or parties to the dispute; and

(2) The factual, legal and, if appropriate, policy reasons for DOE's disposition of the dispute.

(d) *Right of appeal.* Except as provided in paragraph (f)(1) of this section, the

§ 600.23

final determination under paragraph (c) of this section may be appealed to the cognizant Senior Procurement Executive (SPE) for either DOE or the National Nuclear Security Administration (NNSA). The mailing address for the DOE SPE is Office of Procurement and Assistance Management, 1000 Independence Ave., SW, Washington, DC 20585. The mailing address for the NNSA SPE is Office of Acquisition and Supply Management, 1000 Independence Ave., SW., Washington, DC 20585.

(e) *Effect of appeal.* The filing of an appeal with the SPE shall not stay any determination or action taken by DOE which is the subject of the appeal. Consistent with its obligation to protect the interests of the Federal Government, DOE may take such authorized actions as may be necessary to preserve the status quo pending decision by the SPE, or to preserve its ability to provide relief in the event the SPE decides in favor of the appellant.

(f) *Review on appeal.* (1) The SPE shall have no jurisdiction to review

(i) Any preaward dispute (except as provided in paragraph (f)(2)(ii) of this section), including use of any special restrictive condition pursuant to § 600.114, § 600.212, or § 600.304;

(ii) DOE denial of a request for a deviation under § 600.4, § 600.103, § 600.205, or § 600.303 of this part;

(iii) DOE denial of a request for a budget revision or other change in the approved project under § 600.125, § 600.127, § 600.222, § 600.230, § 600.315, or § 600.317 of this part or under another term or condition of the award;

(iv) Any DOE action authorized under § 600.162(a)(1), (2), (3) or (5), § 600.243(a)(1), (a)(3), or § 600.352(a)(1), (2), (3) or (5) for suspensions only; or § 600.162(a)(4), § 600.243(a)(4) or § 600.352(a)(4) for actions disapproving renewal applications or other requests for extension of time or additional funding for the same project when related to recipient noncompliance, or such actions authorized by program rule;

(v) Any DOE decision about an action requiring prior DOE approval under § 600.144, § 600.236, or § 600.331 of this part or under another term or condition of the award;

10 CFR Ch. II (1–1–16 Edition)

(2) In addition to any right of appeal established by program rule, or by the terms and conditions (not inconsistent with paragraph (f)(1) of this section) of an award, the Board shall have jurisdiction to review:

(i) A DOE determination that the recipient has failed to comply with the applicable requirements of this part, the program statute or rules, or other terms and conditions of the award;

(ii) A DOE decision not to make a continuation award based on any of the determinations described in paragraph (f)(2)(i) of this section;

(iii) Termination of an award for cause, in whole or in part, by DOE;

(iv) A DOE determination that an award is void or invalid;

(v) The application by DOE of an indirect cost rate; and

(vi) DOE disallowance of costs.

(3) In reviewing disputes authorized under paragraph (f)(2) of this section, the Board shall be bound by the applicable law, statutes, and rules, including the requirements of this part, and by the terms and conditions of the award.

(4) The decision of the Board shall be the final decision of the Department.

[61 FR 7166, Feb. 26, 1996, as amended at 74 FR 44276, Aug. 28, 2009]

§ 600.23 [Reserved]

§ 600.24 Noncompliance.

(a) Except for noncompliance with nondiscrimination requirements under 10 CFR part 1040, whenever DOE determines that a recipient has not complied with the applicable requirements of this part, with the requirements of any applicable program statute or rule, or with any other term or condition of the award, a DOE Contracting Officer shall provide to the recipient (by certified mail, return receipt requested) a written notice setting forth:

(1) The factual and legal bases for the determination of noncompliance;

(2) The corrective actions and the date (not less than 30 days after the date of the notice) by which they must be taken.

(3) Which of the actions authorized under § 600.122(n), § 600.162(a), § 600.243(a), § 600.312(g), or § 600.352(a) of this part DOE may take if the recipient does not

achieve compliance within the time specified in the notice, or does not provide satisfactory assurances that actions have been initiated which will achieve compliance in a timely manner.

(b) DOE may take any of the actions set forth in § 600.122(n), § 600.162(a), §§ 600.243(a), 600.312(g), or 600.352(a) of this part concurrent with the written notice required under paragraph (a) of this section or with less than 30 days written notice to the recipient whenever:

(1) There is evidence the award was obtained by fraud;

(2) The recipient ceases to exist or becomes legally incapable of performing its responsibilities under the financial assistance award; or

(3) There is a serious mismanagement or misuse of financial assistance award funds necessitating immediate action.

[61 FR 7166, Feb. 26, 1996, as amended at 64 FR 56420, Oct. 20, 1999; 74 FR 44277, Aug. 28, 2009]

§ 600.25 Suspension and termination.

(a) *Suspension and termination for cause.* DOE may suspend or terminate an award for cause on the basis of:

(1) A noncompliance determination under § 600.24, § 600.122(n), § 600.162(a), § 600.243(a) or § 600.352(a); or

(2) A suspension or debarment of the awardee under 2 CFR 180 and 901.

(b) *Notification requirements.* Except as provided in § 600.24, § 600.162(a), § 600.243(a), or § 600.352(a) before suspending or terminating an award for cause, DOE shall mail to the awardee (by certified mail, return receipt requested) a separate written notice in addition to that required by § 600.24(a) at least ten days prior to the effective date of the suspension or termination. Such notice shall include, as appropriate:

(1) The factual and legal bases for the suspension or termination;

(2) The effective date or dates of the DOE action;

(3) If the action does not apply to the entire award, a description of the activities affected by the action;

(4) Instructions concerning which costs shall be allowable during the period of suspension, or instructions concerning allowable termination costs,

including in either case, instructions concerning any subgrants or contracts;

(5) Instructions concerning required final reports and other closeout actions for terminated awards (see §§ 600.170 through 600.173, §§ 600.250 through 600.252 and §§ 600.350 through 600.353);

(6) A statement of the awardee's right to appeal a termination for cause pursuant to § 600.22; and

(7) The dated signature of a DOE Contracting Officer.

(c) *Suspension.* (1) Unless DOE and the awardee agree otherwise, no period of suspension shall exceed 90 days.

(2) DOE may cancel the suspension at any time, up to and including the date of expiration of the period of suspension, if the awardee takes satisfactory corrective action before the expiration date of the suspension or gives DOE satisfactory evidence that such corrective action will be taken.

(3) If the suspension has not been cancelled by the expiration date of the period of suspension, the awardee shall resume the suspended activities or project unless, prior to the expiration date, DOE notifies the awardee in writing that the period of suspension shall be extended consistent with paragraph (c)(1) of this section or that the award shall be terminated.

(4) As of the effective date of the suspension, DOE shall withhold further payments and shall allow new obligations incurred by the awardee during the period of suspension only if such costs were authorized in the notice of suspension or in a subsequent letter.

(5) If the suspension is cancelled or expires and the award is not terminated, DOE shall reimburse the awardee for any authorized allowable costs incurred during the suspension and, if necessary, may amend the award to extend the period of performance.

(d) *Termination by mutual agreement.* In addition to any situation where a termination for cause pursuant to §§ 600.24, 600.160 through 600.162 §§ 600.243 through 600.244 or §§ 600.350 through 600.353 is appropriate, either DOE or the awardee may initiate a termination of an award (or portion thereof) as described in this paragraph. If the awardee initiates a termination, the awardee must notify DOE in writing and specify the awardee's reasons for

requesting the termination, the proposed effective date of the termination, and, in the case of a partial termination, a description of the activities to be terminated, and an appropriate budget revision. DOE shall terminate an award or portion thereof under this paragraph only if both parties agree to the termination and the conditions under which it shall occur. If DOE determines that the remaining activities under a partially terminated award would not accomplish the purpose for which the award was originally awarded, DOE may terminate the entire award.

(e) *Effect of termination.* The awardee shall incur no new obligations after the effective date of the termination of an award (or portion thereof), and shall cancel as many outstanding obligations as possible. DOE shall allow full credit to the awardee for the DOE share of noncancellable obligations properly incurred by the awardee prior to the effective date of the termination.

(f) *Subgrants.* Awardees shall follow the policies and procedures in this section and in §§ 600.24, 600.160 through 600.162 §§ 600.243 through 600.244 or §§ 600.350 through 600.353 for suspending and terminating subgrants.

[61 FR 7166, Feb. 26, 1996, as amended at 74 FR 44277, Aug. 28, 2009]

§§ 600.26–600.28 [Reserved]

§ 600.29 Fixed obligation awards.

(a) *General.* This section contains provisions applicable to the award of financial assistance instruments on a fixed amount basis. Under a fixed obligation award, funds are issued in support of a project without a requirement for Federal monitoring of actual costs subsequently incurred.

(b) *Provisions applicable to fixed obligation awards.* Financial assistance awards may be made on a fixed obligation basis subject to the following requirements:

(1) Each fixed obligation award may neither exceed \$250,000 nor exceed one year in length.

(2) Programs which require mandatory cost sharing are not eligible.

(3) Proposed costs must be analyzed in detail to ensure consistency with applicable cost principles.

(4) Budget categories are not stipulated in making an award. However, budgets are submitted by an applicant and reviewed for purposes of establishing the amount to be awarded.

(5) Payments must be made in the same manner as other financial assistance awards, except that when determined appropriate by the cognizant program official and Contracting Officer a lump sum payment may be made.

(6) Recipients must certify in writing to the Contracting Officer at the end of the project that the activity was completed or the level of effort was expended, however should the activity or effort not be carried out, the recipient would be expected to make appropriate reimbursements.

(7) Periodic reports may be established for each award so long as they are not more frequently than quarterly.

(8) Changes in principal investigator or project leader, scope of effort, or institution, must receive the prior approval of the Department.

[61 FR 7166, Feb. 26, 1996, as amended at 74 FR 44277, Aug. 28, 2009]

§ 600.30 Cost sharing.

In addition to the requirements of § 600.123, § 600.224, or § 600.313, the following requirements apply to research, development, demonstration and commercial application activities projects:

(a) Cost sharing is required for most financial assistance awards for research, development, demonstration and commercial applications activities initiated after the enactment of the Energy Policy Act of 2005 on August 8, 2005. This requirement does not apply to:

(1) An award under the small business innovation research program or the small business technology transfer program; or

(2) A program with cost sharing requirements defined by other than Section 988 of the Energy Policy Act of 2005 including other sections of the 2005 Act and the Energy Policy Act of 1992.

(b) A cost share of at least 20 percent of the cost of the activity is required

Department of Energy

§ 600.31

for research and development except where:

(1) A research or development activity of a basic or fundamental nature has been excluded by an appropriate officer of the Department, generally an Under Secretary; or

(2) The Secretary has determined it is necessary and appropriate to reduce or eliminate the cost sharing requirement for a research and development activity of an applied nature.

(c) A cost share of at least 50 percent of the cost of a demonstration or commercial application program or activity is required unless the Secretary has determined it is necessary and appropriate to reduce the cost sharing requirements, taking into consideration any technological risk relating to the activity.

(d) Cost share shall be provided by non-Federal funds unless otherwise authorized by statute. In calculating the amount of the non-Federal contribution:

(1) Base the non-Federal contribution on total project costs, including the cost of work where funds are provided directly to a partner, consortium member or subrecipient, such as a Federally Funded Research and Development Center;

(2) Include the following costs as allowable in accordance with the applicable cost principles:

(i) Cash;

(ii) Personnel costs;

(iii) The value of a service, other resource, or third party in-kind contribution determined in accordance with the applicable circular of the Office of Management and Budget;

(iv) Indirect costs or facilities and administrative costs; and/or

(v) Any funds received under the power program of the Tennessee Valley Authority (except to the extent that such funds are made available under an annual appropriation Act);

(3) Exclude the following costs:

(i) Revenues or royalties from the prospective operation of an activity beyond the time considered in the award;

(ii) Proceeds from the prospective sale of an asset of an activity; or

(iii) Other appropriated Federal funds.

(iv) Repayment of the Federal share of a cost-shared activity under Section 988 of the Energy Policy Act of 2005 shall not be a condition of the award.

[74 FR 44277, Aug. 28, 2009]

§ 600.31 Research misconduct.

(a) A recipient is responsible for maintaining the integrity of research of any kind under an award from DOE including the prevention, detection, and remediation of research misconduct, and the conduct of inquiries, investigations, and adjudication of allegations of research misconduct in accordance with the requirements of this section.

(b) For purposes of this section, the following definitions are applicable:

Adjudication means a formal review of a record of investigation of alleged research misconduct to determine whether and what corrective actions and sanctions should be taken.

Fabrication means making up data or results and recording or reporting them.

Falsification means manipulating research materials, equipment, or processes, or changing or omitting data or results such that the research is not accurately represented in the research record.

Finding of Research Misconduct means a determination, based on a preponderance of the evidence, that research misconduct has occurred. Such a finding requires a conclusion that there has been a significant departure from accepted practices of the relevant research community and that it be knowingly, intentionally, or recklessly committed.

Inquiry means information gathering and initial fact-finding to determine whether an allegation or apparent instance of misconduct warrants an investigation.

Investigation means the formal examination and evaluation of the relevant facts.

Plagiarism means the appropriation of another person's ideas, processes, results, or words without giving appropriate credit.

Research means all basic, applied, and demonstration research in all fields of science, medicine, engineering, and

§ 600.31

10 CFR Ch. II (1-1-16 Edition)

mathematics, including, but not limited to, research in economics, education, linguistics, medicine, psychology, social sciences statistics, and research involving human subjects or animals.

Research misconduct means fabrication, falsification, or plagiarism in proposing, performing, or reviewing research, or in reporting research results, but does not include honest error or differences of opinion.

Research record means the record of all data or results that embody the facts resulting from scientists' inquiries, including, but not limited to, research proposals, laboratory records, both physical and electronic, progress reports, abstracts, theses, oral presentations, internal reports, and journal articles.

(c) Unless otherwise instructed by the Contracting Officer, the recipient must conduct an initial inquiry into any allegation of research misconduct. If the recipient determines that there is sufficient evidence to proceed to an investigation, it must notify the Contracting Officer and, unless otherwise instructed, the recipient must:

(1) Conduct an investigation to develop a complete factual record and an examination of such record leading to either a finding of research misconduct and an identification of appropriate remedies or a determination that no further action is warranted;

(2) Inform the Contracting Officer if an initial inquiry supports an investigation and, if requested by the Contracting Officer thereafter, keep the Contracting Officer informed of the results of the investigation and any subsequent adjudication. When an investigation is complete, the recipient will forward to the Contracting Officer a copy of the evidentiary record, the investigative report, any recommendations made to the recipient's adjudicating official, and the adjudicating official's decision and notification of any corrective action taken or planned, and the subject's written response to the recommendations (if any).

(3) If the investigation leads to a finding of research misconduct, conduct an adjudication by a responsible official who was not involved in the inquiry or investigation and is separated

organizationally from the element which conducted the investigation. The adjudication must include a review of the investigative record and, as warranted, a determination of appropriate corrective actions and sanctions.

(d) The Department may elect to act in lieu of the recipient in conducting an inquiry or investigation into an allegation of research misconduct if the Contracting Officer finds that:

(1) The research organization is not prepared to handle the allegation in a manner consistent with this section;

(2) The allegation involves an entity of sufficiently small size that it cannot reasonably conduct the inquiry;

(3) DOE involvement is necessary to ensure the public health, safety, and security, or to prevent harm to the public interest; or,

(4) The allegation involves possible criminal misconduct.

(e) DOE reserves the right to pursue such remedies and other actions as it deems appropriate, consistent with the terms and conditions of the award instrument and applicable laws and regulations. However, the recipient's good faith administration of this section and the effectiveness of its remedial actions and sanctions shall be positive considerations and shall be taken into account as mitigating factors in assessing the need for such actions. If DOE pursues any such action, it will inform the subject of the action of the outcome and any applicable appeal procedures.

(f) In conducting the activities in paragraph (c) of this section, the recipient and the Department, if it elects to conduct the inquiry or investigation, shall adhere to the following guidelines:

(1) *Safeguards for information and subjects of allegations.* The recipient shall provide safeguards to ensure that individuals may bring allegations of research misconduct made in good faith to the attention of the recipient without suffering retribution. Safeguards include: protection against retaliation; fair and objective procedures for examining and resolving allegations; and diligence in protecting positions and reputations. The recipient shall also provide the subjects of allegations confidence that their rights are protected

Department of Energy

§ 600.100

and that the mere filing of an allegation of research misconduct will not result in an adverse action. Safeguards include timely written notice regarding substantive allegations against them, a description of the allegation and reasonable access to any evidence submitted to support the allegation or developed in response to an allegation and notice of any findings of research misconduct.

(2) *Objectivity and expertise.* The recipient shall select individual(s) to inquire, investigate, and adjudicate allegations of research misconduct who have appropriate expertise and have no unresolved conflict of interest. The individual(s) who conducts an adjudication must not be the same individual(s) who conducted the inquiry or investigation, and must be separate organizationally from the element that conducted the inquiry or investigation.

(3) *Timeliness.* The recipient shall coordinate, inquire, investigate and adjudicate allegations of research misconduct promptly, but thoroughly. Generally, an investigation should be completed within 120 days of initiation, and adjudication should be complete within 60 days of receipt of the record of investigation.

(4) *Confidentiality.* To the extent possible, consistent with fair and thorough processing of allegations of research misconduct and applicable law and regulation, knowledge about the identity of the subjects of allegations and informants should be limited to those with a need to know.

(5) *Remediation and sanction.* If the recipient finds that research misconduct has occurred, it shall assess the seriousness of the misconduct and its impact on the research completed or in process. The recipient must take all necessary corrective actions. Such action may include but are not limited to, correcting the research record and as appropriate imposing restrictions, controls, or other parameters on research in process or to be conducted in the future. The recipient must coordinate remedial actions with the Contracting Officer. The recipient must also consider whether personnel sanctions are appropriate. Any such sanction must be consistent with any applicable personnel laws, policies, and pro-

cedures, and must take into account the seriousness of the misconduct and its impact, whether it was done knowingly or intentionally, and whether it was an isolated event or pattern of conduct.

(g) By executing this agreement, the recipient provides its assurance that it has established an administrative process for performing an inquiry, mediating if possible, investigating, and reporting allegations of research misconduct; and that it will comply with its own administrative process and the requirements and definitions of 10 CFR part 733 for performing an inquiry, possible mediation, investigation and reporting of allegations of research misconduct.

(h) The recipient must insert or have inserted the substance of this section, including paragraph (g), in subawards at all tiers that involve research.

[70 FR 37013, June 28, 2005, as amended at 74 FR 44278, Aug. 28, 2009]

Subpart B—Uniform Administrative Requirements for Grants and Cooperative Agreements With Institutions of Higher Education, Hospitals, and Other Nonprofit Organizations

SOURCE: 59 FR 53266, Oct. 21, 1994, unless otherwise noted.

GENERAL

§ 600.100 Purpose.

This subpart implements OMB Circular A-110 and establishes uniform administrative requirements for grants and agreements awarded to institutions of higher education, hospitals, and other non-profit organizations. It also establishes rules governing subawards to institutions of higher education, hospitals, and non-profit organizations (including grants and cooperative agreements administered by State, local and Indian Tribal governments).

[59 FR 53266, Oct. 21, 1994, as amended at 68 FR 50650, Aug. 21, 2003]

§ 600.101

10 CFR Ch. II (1–1–16 Edition)

§ 600.101 Definitions.

Accrued expenditures means the charges incurred by the recipient during a given period requiring the provision of funds for:

(1) Goods and other tangible property received;

(2) Services performed by employees, contractors, subrecipients, and other payees; and,

(3) Other amounts becoming owed under programs for which no current services or performance is required.

Accrued income means the sum of:

(1) Earnings during a given period from services performed by the recipient, and goods and other tangible property delivered to purchasers, and

(2) Amounts becoming owed to the recipient for which no current services or performance is required by the recipient.

Acquisition cost of equipment means the net invoice price of the equipment, including the cost of modifications, attachments, accessories, or auxiliary apparatus necessary to make the property usable for the purpose for which it was acquired. Other charges, such as the cost of installation, transportation, taxes, duty or protective in-transit insurance, shall be included or excluded from the unit acquisition cost in accordance with the recipient's regular accounting practices.

Advance means a payment made by Treasury check or other appropriate payment mechanism to a recipient upon its request either before outlays are made by the recipient or through the use of predetermined payment schedules.

Award means financial assistance that provides support or stimulation to accomplish a public purpose. Awards include grants and other agreements in the form of money or property in lieu of money, by DOE to an eligible recipient. The term does not include: technical assistance, which provides services instead of money; other assistance in the form of loans, loan guarantees, interest subsidies, or insurance; direct payments of any kind to individuals; and, contracts which are required to be entered into and administered under procurement laws and regulations.

Cash contributions means the recipient's cash outlay, including the outlay

of money contributed to the recipient by third parties.

Closeout means the process by which DOE determines that all applicable administrative actions and all required work of the award have been completed by the recipient and DOE.

Contract means a procurement contract under an award or subaward, and a procurement subcontract under a recipient's or subrecipient's contract.

Cost sharing or matching means that portion of project or program costs not borne by DOE.

Date of completion means the date on which all work under an award is completed or the date on the award document, or any supplement or amendment thereto, on which DOE sponsorship ends.

Disallowed costs means those charges to an award that the DOE determines to be unallowable, in accordance with the applicable Federal cost principles or other terms and conditions contained in the award.

Equipment means tangible nonexpendable personal property including exempt property charged directly to the award having a useful life of more than one year and an acquisition cost of \$5000 or more per unit. However, consistent with recipient policy, lower limits may be established.

Excess property means property under the control of any Federal awarding agency that, as determined by the head thereof, is no longer required for its needs or the discharge of its responsibilities.

Exempt property means tangible personal property acquired in whole or in part with Federal funds, where the Federal awarding agency has statutory authority to vest title in the recipient without further obligation to the Federal Government. An example of exempt property authority is contained in the Federal Grant and Cooperative Agreement Act (31 U.S.C. 6306), for property acquired under an award to conduct basic or applied research by a non-profit institution of higher education or non-profit organization whose principal purpose is conducting scientific research.

Federal awarding agency means the Federal agency that provides an award to the recipient.

Federal funds authorized means the total amount of Federal funds obligated by the Federal Government for use by the recipient. This amount may include any authorized carryover of unobligated funds from prior funding periods when permitted by agency regulations or agency implementing instructions.

Federal share of real property, equipment, or supplies means that percentage of the property's acquisition costs and any improvement expenditures paid with Federal funds.

Funding period or budget period means the period of time when DOE funding is available for obligation by the recipient.

Intangible property and debt instruments means, but is not limited to, trademarks, copyrights, patents and patent applications and such property as loans, notes and other debt instruments, lease agreements, stock and other instruments of property ownership, whether considered tangible or intangible.

Obligations means the amounts of orders placed, contracts and grants awarded, services received and similar transactions during a given period that require payment by the recipient during the same or a future period.

Outlays or expenditures means charges made to the project or program. They may be reported on a cash or accrual basis. For reports prepared on a cash basis, outlays are the sum of cash disbursements for direct charges for goods and services, the amount of indirect expense charged, the value of third party in-kind contributions applied and the amount of cash advances and payments made to subrecipients. For reports prepared on an accrual basis, outlays are the sum of cash disbursements for direct charges for goods and services, the amount of indirect expense incurred, the value of in-kind contributions applied, and the net increase (or decrease) in the amounts owed by the recipient for goods and other property received, for services performed by employees, contractors, subrecipients and other payees and other amounts becoming owed under programs for which no current services or performance are required.

Personal property means property of any kind except real property. It may be tangible, having physical existence, or intangible, having no physical existence, such as copyrights, patents, or securities.

Prior approval means written approval by a contracting officer evidencing prior consent.

Program income means gross income earned by the recipient that is directly generated by a supported activity or earned as a result of the award (see exclusions in §§600.124 (e) and (h)). Program income includes, but is not limited to, income from fees for services performed, the use or rental of real or personal property acquired under federally-funded projects, the sale of commodities or items fabricated under an award, license fees and royalties on patents and copyrights, and interest on loans made with award funds. Interest earned on advances of DOE funds is not program income. Except as otherwise provided in this subpart, program regulations, or the terms and conditions of the award, program income does not include the receipt of principal on loans, rebates, credits, discounts, etc., or interest earned on any of them.

Project costs means all allowable costs, as set forth in the applicable Federal cost principles, incurred by a recipient and the value of the contributions made by third parties in accomplishing the objectives of the award during the project period.

Project period means the period established in the award document during which DOE sponsorship begins and ends.

Property means, unless otherwise stated, real property, equipment, intangible property and debt instruments.

Real property means land, including land improvements, structures and appurtenances thereto, but excludes movable machinery and equipment.

Recipient means an organization receiving financial assistance directly from DOE to carry out a project or program. The term includes public and private institutions of higher education, public and private hospitals, and other quasi-public and private non-profit organizations such as, but not limited to, community action agencies,

research institutes, educational associations, and health centers. The term shall include commercial organizations which are recipients, subrecipients, or contractors or subcontractors of recipients or subrecipients. The term does not include government-owned contractor-operated facilities or research centers providing continued support for mission-oriented, large-scale programs that are government-owned or controlled, or are designated as federally-funded research and development centers.

Research and development means all research activities, both basic and applied, and all development activities that are supported at universities, colleges, and other non-profit institutions. “Research” is defined as a systematic study directed toward fuller scientific knowledge or understanding of the subject studied. “Development” is the systematic use of knowledge and understanding gained from research directed toward the production of useful materials, devices, systems, or methods, including design and development of prototypes and processes. The term research also includes activities involving the training of individuals in research techniques where such activities utilize the same facilities as other research and development activities and where such activities are not included in the instruction function.

Small award means a grant or cooperative agreement not exceeding the small purchase threshold fixed at 41 U.S.C. 403(11) (currently \$25,000).

Subaward means an award of financial assistance in the form of money, or property in lieu of money, made under an award by a recipient to an eligible subrecipient or by a subrecipient to a lower tier subrecipient. The term includes financial assistance when provided by any legal agreement, even if the agreement is called a contract, but does not include procurement of goods and services nor does it include any form of assistance which is excluded from the definition of “award” above.

Subrecipient means the legal entity to which a subaward is made and which is accountable to the recipient for the use of the funds provided. The term may include foreign or international organi-

zations (such as agencies of the United Nations).

Supplies means all personal property excluding equipment, intangible property, and debt instruments as defined in this section, and inventions of a contractor conceived or first actually reduced to practice in the performance of work under a funding agreement (“subject inventions”), as defined in 37 CFR part 401, “Rights to Inventions Made by Nonprofit Organizations and Small Business Firms Under Government Grants, Contracts, and Cooperative Agreements.”

Suspension means an action by DOE that temporarily withdraws DOE sponsorship under an award, pending corrective action by the recipient or pending a decision to terminate the award by the DOE. Suspension of an award is a separate action from suspension under DOE regulations implementing E.O.’s 12549 and 12689, “Debarment and Suspension” (see 10 CFR part 1036).

Termination means the cancellation of DOE sponsorship, in whole or in part, under an agreement at any time prior to the date of completion.

Third party in-kind contributions means the value of non-cash contributions provided by non-Federal third parties. Third party in-kind contributions may be in the form of real property, equipment, supplies and other expendable property, and the value of goods and services directly benefiting and specifically identifiable to the project or program.

Unliquidated obligations, for financial reports prepared on a cash basis, means the amount of obligations incurred by the recipient that have not been paid. For reports prepared on an accrued expenditure basis, they represent the amount of obligations incurred by the recipient for which an outlay has not been recorded.

Unobligated balance means the portion of the funds authorized by DOE that has not been obligated by the recipient and is determined by deducting the cumulative obligations from the cumulative funds authorized.

Unrecovered indirect cost means the difference between the amount awarded and the amount which could have been awarded under the recipient’s approved negotiated indirect cost rate.

Department of Energy

§ 600.112

Working capital advance means a procedure whereby funds are advanced to the recipient to cover its estimated disbursement needs for a given initial period.

§ 600.102 Effect on other issuances.

For awards subject to this subpart, all administrative requirements of codified program regulations, program manuals, handbooks and other non-regulatory materials which are inconsistent with the requirements of this subpart shall be superseded, except to the extent they are required by statute, or authorized in accordance with the deviations provision in § 600.4.

§ 600.103 Deviations.

The deviation provisions of § 600.4 apply to this subpart.

§ 600.104 Subawards.

Unless sections of this subpart specifically exclude subrecipients from coverage, all DOE recipients, including State, local and Indian tribal governments, shall apply the provisions of this subpart to subrecipients performing work under awards if such subrecipients are institutions of higher education, hospitals, or other non-profit organizations. Thus, this subpart is applicable to those types of organizations regardless of the type of recipient receiving the primary award. State and local government subrecipients are subject to the provisions of 10 CFR part 600, subpart C, "Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments." For-profit subrecipients are subject to the provisions of 10 CFR part 600, subpart D, Administrative Requirements for Grants and Cooperative Agreements with For-Profit Organizations.

[59 FR 53266, Oct. 21, 1994, as amended at 68 FR 50650, Aug. 21, 2003]

PRE-AWARD REQUIREMENTS

§ 600.110 Purpose.

Sections 600.111 through 600.117 prescribe forms and instructions and other pre-award matters to be used in applying for DOE awards.

§ 600.111 Pre-award policies.

(a) *Use of Grants and Cooperative Agreements, and Contracts.* In each instance, the DOE shall decide on the appropriate award instrument (i.e., grant, cooperative agreement, or contract). The Federal Grant and Cooperative Agreement Act (31 U.S.C. 6301-08) governs the use of grants, cooperative agreements and contracts. A grant or cooperative agreement shall be used only when the principal purpose of a transaction is to accomplish a public purpose of support or stimulation authorized by Federal statute. The statutory criterion for choosing between grants and cooperative agreements is that for the latter, "substantial involvement is expected between the executive agency and the State, local government, or other recipient when carrying out the activity contemplated in the agreement." Contracts shall be used when the principal purpose is acquisition of property or services for the direct benefit or use of the Federal Government.

(b) *Public Notice and Priority Setting.* DOE will, whenever practical, notify the public of its intended funding priorities for discretionary grant programs, unless funding priorities are established by Federal statute.

§ 600.112 Forms for applying for Federal assistance.

(a) *General.* An application for an award shall be on the form or in the format specified in a program rule or in the funding opportunity announcement. When a version of the Standard Form 424 is not used, DOE shall indicate whether the application is subject to review by the State under Executive Order 12372.

(b) *Budgetary information.* DOE may request and the applicant shall submit the minimum budgetary information necessary to evaluate the costs of the proposed project.

(c) DOE may, subsequent to receipt of an application, request additional information from an applicant when necessary for clarification or to make informed preaward determinations.

(d) *Continuation and renewal applications.* DOE may require that an application for a continuation or renewal award be made in the format or on the

§ 600.113

forms authorized by paragraphs (a) and (b) of this section.

[74 FR 44278, Aug. 28, 2009]

§ 600.113 Debarment and suspension.

Recipients shall comply with the nonprocurement debarment and suspension common rule implementing E.O.'s 12549 and 12689, "Debarment and Suspension," 2 CFR 180 and 901. This common rule restricts subawards and contracts with certain parties that are debarred, suspended or otherwise excluded from or ineligible for participation in Federal assistance programs or activities.

[59 FR 53266, Oct. 21, 1994, as amended at 74 FR 44278, Aug. 28, 2009]

§ 600.114 Special award conditions.

(a) If an applicant or recipient has a history of poor performance, is not financially stable, has a management system that does not meet the standards prescribed in this subpart, has not conformed to the terms and conditions of a previous award, or is not otherwise responsible, DOE may impose additional requirements as needed, without regard to the deviation provisions of § 600.4. Such applicant or recipient will be notified in writing as to the nature of the additional requirements, the reason why the additional requirements are being imposed, the nature of the corrective action needed, and the time allowed for completing the corrective actions. Reconsideration of the additional requirements may be requested at any time. Any special conditions shall be promptly removed once the conditions that prompted them have been corrected.

(b) A recipient may place a special restrictive condition, as specified in paragraph (a) of this section, in a subaward. In any such case, the recipient must notify DOE in writing within 15 days of the subaward. DOE shall decide whether to notify OMB and other interested parties.

§ 600.115 Metric system of measurement.

The Metric Conversion Act, as amended by the Omnibus Trade and Competitiveness Act (15 U.S.C. 205) declares that the metric system is the

10 CFR Ch. II (1–1–16 Edition)

preferred measurement system for U.S. trade and commerce. The Act requires each Federal agency to establish a date or dates in consultation with the Secretary of Commerce, when the metric system of measurement will be used in the agency's procurements, grants, and other business-related activities. Metric implementation may take longer where the use of the system is initially impractical or likely to cause significant inefficiencies in the accomplishment of federally-funded activities. DOE will follow the provisions of E.O. 12770, "Metric Usage in Federal Government Programs."

§ 600.116 Resource Conservation and Recovery Act.

Under the Act (Pub. L. 94-580 codified at 42 U.S.C. 6962), any State agency or agency of a political subdivision of a State which is using appropriated Federal funds must comply with section 6002. Section 6002 requires that preference be given in procurement programs to the purchase of specific products containing recycled materials identified in guidelines developed by the Environmental Protection Agency (EPA) (40 CFR parts 247-254). Accordingly, State and local institutions of higher education, hospitals, and non-profit organizations that receive direct Federal awards or other Federal funds shall give preference in their procurement programs funded with Federal funds to the purchase of recycled products pursuant to the EPA guidelines.

§ 600.117 [Reserved]

POST-AWARD REQUIREMENTS

Financial and Program Management

§ 600.120 Purpose of financial and program management.

Sections 600.121 through 600.128 prescribe standards for financial management systems, methods for making payments and rules for satisfying cost sharing and matching requirements, accounting for program income, budget revision approvals, making audits, determining allowability of cost, and establishing fund availability.

Department of Energy

§ 600.122

§ 600.121 Standards for financial management systems.

(a) Recipients shall relate financial data to performance data and develop unit cost information whenever practical. For awards that support research, it should be noted that it is generally not appropriate to develop unit cost information.

(b) Except for the provisions of 600.121(f) and 600.181, recipients' financial management systems shall provide for the following:

(1) Accurate, current and complete disclosure of the financial results of each federally-sponsored project or program in accordance with the reporting requirements set forth in § 600.152. If a DOE award requires reporting on an accrual basis from a recipient that maintains its records on other than an accrual basis, the recipient shall not be required to establish an accrual accounting system. These recipients may develop such accrual data for their reports on the basis of an analysis of the documentation on hand.

(2) Records that identify adequately the source and application of funds for federally-sponsored activities. These records shall contain information pertaining to Federal awards, authorizations, obligations, unobligated balances, assets, outlays, income and interest.

(3) Effective control over and accountability for all funds, property and other assets. Recipients shall adequately safeguard all such assets and assure they are used solely for authorized purposes.

(4) Comparison of outlays with budget amounts for each award. Whenever appropriate, financial information should be related to performance and unit cost data. As discussed in paragraph (a) of this section, unit cost data is generally not appropriate for awards that support research.

(5) Written procedures to minimize the time elapsing between the transfer of funds to the recipient from the U.S. Treasury and the issuance or redemption of checks, warrants or payments by other means for program purposes by the recipient. To the extent that the provisions of the Cash Management Improvement Act (CMIA) (Pub. L. 101-453) govern, payment methods of State

agencies, instrumentalities, and fiscal agents shall be consistent with CMIA Treasury-State Agreements or the CMIA default procedures codified at 31 CFR part 205, "Withdrawal of Cash from the Treasury for Advances under Federal Grant and Other Programs."

(6) Written procedures for determining the reasonableness, allocability and allowability of costs in accordance with the provisions of the applicable Federal cost principles and the terms and conditions of the award.

(7) Accounting records including cost accounting records that are supported by source documentation.

(c) Where the Federal Government guarantees or insures the repayment of money borrowed by the recipient, the Contracting Officer, at his or her discretion, may require adequate bonding and insurance if the bonding and insurance requirements of the recipient are not deemed adequate to protect the interest of the Federal Government.

(d) The Contracting Officer may require adequate fidelity bond coverage where the recipient lacks sufficient coverage to protect the Federal Government's interest.

(e) Where bonds are required in the situations described in §§ 600.121 (c) and (d), the bonds shall be obtained from companies holding certificates of authority as acceptable sureties, as prescribed in 31 CFR part 223, "Surety Companies Doing Business with the United States."

(f) Individuals whose financial management systems do not meet the minimum standards of § 600.121 (b) shall maintain a separate bank account for deposit of award or subaward funds. Disbursements by the recipient or subrecipient from this account shall be supported by source documentation such as canceled checks, paid bills, receipts, payrolls, etc.

§ 600.122 Payment.

(a) Payment methods shall minimize the time elapsing between the transfer of funds from the United States Treasury and the issuance or redemption of checks, warrants, or payment by other means by the recipients. Payment methods of State agencies or instrumentalities shall be consistent with Treasury-State CMIA agreements or

§ 600.122

10 CFR Ch. II (1–1–16 Edition)

default procedures codified at 31 CFR part 205.

(b) Recipients will be paid in advance, provided they maintain or demonstrate the willingness to maintain:

(1) Written procedures that minimize the time elapsing between the transfer of funds and disbursement by the recipient, and

(2) Financial management systems that meet the standards for fund control and accountability as established in § 600.121. Cash advances to a recipient organization shall be limited to the minimum amounts needed and be timed to be in accordance with the actual, immediate cash requirements of the recipient organization in carrying out the purpose of the approved program or project. The timing and amount of cash advances shall be as close as is administratively feasible to the actual disbursements by the recipient organization for direct program or project costs and the proportionate share of any allowable indirect costs.

(c) Whenever possible, advances shall be consolidated to cover anticipated cash needs for all awards made by the DOE to the recipient.

(1) Advance payment mechanisms include, but are not limited to, Treasury check and electronic funds transfer.

(2) Advance payment mechanisms are subject to 31 CFR part 205.

(3) Recipients may submit requests for advances and reimbursements at least monthly when electronic fund transfers are not used.

(d) Requests for Treasury check advance payment shall be submitted on SF-270, "Request for Advance or Reimbursement," or other forms as may be authorized by OMB. This form is not to be used when Treasury check advance payments are made to the recipient automatically through the use of a pre-determined payment schedule or if precluded by special DOE instructions for electronic funds transfer.

(e) Reimbursement is the preferred method when the requirements in paragraph (b) of this section cannot be met. DOE may also use this method on any construction agreement, or if the major portion of the construction project is accomplished through private market financing or Federal

loans, and the Federal assistance constitutes a minor portion of the project.

(1) When the reimbursement method is used, DOE shall make payment within 30 days after receipt of the billing, unless the billing is improper.

(2) Recipients are authorized to submit requests for reimbursement at least monthly when electronic funds transfers are not used.

(f) If a recipient cannot meet the criteria for advance payments and DOE has determined that reimbursement is not feasible because the recipient lacks sufficient working capital, DOE may provide cash on a working capital advance basis. Under this procedure, DOE advances cash to the recipient to cover its estimated disbursement needs for an initial period generally geared to the recipient's disbursing cycle. Thereafter, DOE reimburses the recipient for its actual cash disbursements. The working capital advance method of payment will not be used for recipients unwilling or unable to provide timely advances to their subrecipient to meet the subrecipient's actual cash disbursements.

(g) To the extent available, recipients shall disburse funds available from repayments to and interest earned on a revolving fund, program income, rebates, refunds, contract settlements, audit recoveries and interest earned on such funds before requesting additional cash payments.

(h) Unless otherwise required by statute, DOE will not withhold payments for proper charges made by recipients at any time during the project period unless paragraph (h)(1) or (h)(2) of this section apply.

(1) A recipient has failed to comply with the project objectives, the terms and conditions of the award, or DOE reporting requirements.

(2) The recipient or subrecipient is delinquent in a debt to the United States. Under such conditions, the Federal awarding agency may, upon reasonable notice, inform the recipient that payments shall not be made for obligations incurred after a specified date until the conditions are corrected or the indebtedness to the Federal Government is liquidated. Before withholding any payment, DOE shall notify the recipient that payments shall not

Department of Energy

§ 600.122

be made for obligations incurred after a specified date, which shall ordinarily be no sooner than 30 days from the date of the notice, until the recipient corrects the noncompliance or pays the indebtedness to the Federal government.

(i) Standards governing the use of banks and other institutions as depositories of funds advanced under awards are as follows.

(1) Except for situations described in paragraph (i)(2) of this section, DOE shall not require separate depository accounts for funds provided to a recipient or establish any eligibility requirements for depositories for funds provided to a recipient. However, recipients must be able to account for the receipt, obligation and expenditure of funds.

(2) Advances of Federal funds shall be deposited and maintained in insured accounts whenever possible.

(j) Consistent with the national goal of expanding the opportunities for women-owned and minority-owned business enterprises, recipients are encouraged to use women-owned and minority-owned banks (a bank which is owned at least 50 percent by women or minority group members).

(k) Recipients shall maintain advances of Federal funds in interest bearing accounts, unless paragraph (k) (1), (2) or (3) of this section apply.

(1) The recipient receives less than \$120,000 in Federal awards per year.

(2) The best reasonably available interest bearing account would not be expected to earn interest in excess of \$250 per year on Federal cash balances.

(3) The depository would require an average or minimum balance so high that it would not be feasible within the expected Federal and non-Federal cash resources.

(l) For those entities where CMIA and its implementing regulations do not apply, interest earned on Federal advances deposited in interest bearing accounts shall be remitted annually to the HHS Payment Management System through an electronic medium such as the FEDWIRE Deposit system. Recipients which do not have this capability should use a check. The address is the Department of Health and Human Services, Payment Management System, P.O. Box 6021, Rockville,

MD 20852. Interest amounts up to \$250 per year may be retained by the recipient for administrative expense. State universities and hospitals shall comply with CMIA, as it pertains to interest. If an entity subject to CMIA uses its own funds to pay pre-award costs for discretionary awards without prior written approval from the Federal awarding agency, it waives its right to recover the interest under CMIA.

(m) Except as noted elsewhere in this subpart, only the following forms shall be authorized for the recipients in requesting advances and reimbursements. Federal agencies shall not require more than an original and two copies of these forms.

(1) SF-270, Request for Advance or Reimbursement. Each Federal awarding agency shall adopt the SF-270 as a standard form for all nonconstruction programs when electronic funds transfer or predetermined advance methods are not used. Federal awarding agencies, however, have the option of using this form for construction programs in lieu of the SF-271, "Outlay Report and Request for Reimbursement for Construction Programs."

(2) SF-271, Outlay Report and Request for Reimbursement for Construction Programs. Each Federal awarding agency shall adopt the SF-271 as the standard form to be used for requesting reimbursement for construction programs. However, a Federal awarding agency may substitute the SF-270 when the Federal awarding agency determines that it provides adequate information to meet Federal needs.

(n) The DOE may convert a recipient from advance payment to reimbursement whenever the recipient no longer meets the criteria for advance payment specified in paragraph (b) of this section. Any such conversion may be accomplished only after the DOE has advised the recipient in writing of the reasons for the proposed action and has provided a period of at least 30 days within which the recipient may take corrective action or provide satisfactory assurances of its intention to take such action.

(o) With prior DOE approval and in accordance with written DOE instructions, a recipient may assign to a bank,

§ 600.123

trust company or other financing institution, including any Federal lending agency, reimbursement by Treasury check due from DOE under the following conditions:

(1) The award provides for reimbursement totaling \$1,000 or more;

(2) The assignment covers all amounts payable under the award that have not already been paid;

(3) Reassignment is prohibited; and

(4) The assignee files a written notice of award payment assignment and a true copy of the instrument of assignment with DOE. Any interest costs resulting from a loan obtained on the basis of an assignment are unallowable charges to DOE award funds or any required cost sharing.

(p) Recipients shall observe the requirements of this section in making or withholding payments to subrecipients except that the forms used by recipients are not required to be used by subrecipients when requesting advances or reimbursement.

§ 600.123 Cost sharing or matching.

(a) All cost sharing or matching contributions, including cash and third party in-kind, shall meet all of the following criteria.

(1) Are verifiable from the recipient's records.

(2) Are not included as contributions for any other federally-assisted project or program.

(3) Are necessary and reasonable for proper and efficient accomplishment of project or program objectives.

(4) Are allowable under the applicable cost principles.

(5) Are not paid by the Federal Government under another award, except where authorized by Federal statute to be used for cost sharing or matching.

(6) Are provided for in the approved budget.

(7) Conform to other provisions of this subpart, as applicable.

(b) Unrecovered indirect costs may be included as part of cost sharing or matching.

(c) Values for recipient contributions of services and property shall be established in accordance with the applicable cost principles. If DOE authorizes recipients to donate buildings or land for construction/facilities acquisition

10 CFR Ch. II (1-1-16 Edition)

projects or long-term use, the value of the donated property for cost sharing or matching shall be the lesser of either paragraph (c)(1) or (2) of this section.

(1) The certified value of the remaining life of the property recorded in the recipient's accounting records at the time of donation.

(2) The current fair market value. However, when there is sufficient justification, DOE may approve the use of the current fair market value of the donated property, even if it exceeds the certified value at the time of donation to the project.

(d) Volunteer services furnished by professional and technical personnel, consultants, and other skilled and unskilled labor may be counted as cost sharing or matching if the service is an integral and necessary part of an approved project or program. Rates for volunteer services shall be consistent with those paid for similar work in the recipient's organization. In those instances in which the required skills are not found in the recipient organization, rates shall be consistent with those paid for similar work in the labor market in which the recipient competes for the kind of services involved. In either case, paid fringe benefits that are reasonable, allowable, and allocable may be included in the valuation.

(e) When an employer other than the recipient furnishes the services of an employee, these services shall be valued at the employee's regular rate of pay (plus an amount of fringe benefits that are reasonable, allowable, and allocable, but exclusive of overhead costs), provided these services are in the same skill for which the employee is normally paid.

(f) Donated supplies may include such items as office supplies, laboratory supplies or workshop and classroom supplies. Value assessed to donated supplies included in the cost sharing or matching share shall be reasonable and shall not exceed the fair market value of the property at the time of the donation.

(g) The method used for determining cost sharing or matching for donated equipment, buildings and land for which title passes to the recipient may differ according to the purpose of the

Department of Energy

§ 600.124

award, if either paragraph (g)(1) or (2) of this section apply.

(1) If the purpose of the award is to assist the recipient in the acquisition of equipment, buildings or land, the total value of the donated property may be claimed as cost sharing or matching.

(2) If the purpose of the award is to support activities that require the use of equipment, buildings or land, normally only depreciation or use charges for equipment and buildings may be made. However, the full value of equipment or other capital assets and fair rental charges for land may be allowed, provided that DOE has approved the charges.

(h) The value of donated property shall be determined in accordance with the usual accounting policies of the recipient, with the following qualifications.

(1) The value of donated land and buildings shall not exceed its fair market value at the time of donation to the recipient as established by an independent appraiser (e.g., certified real property appraiser or General Services Administration representative) and certified by a responsible official of the recipient.

(2) The value of donated equipment shall not exceed the fair market value of equipment of the same age and condition at the time of donation.

(3) The value of donated space shall not exceed the fair rental value of comparable space as established by an independent appraisal of comparable space and facilities in a privately-owned building in the same locality.

(4) The value of loaned equipment shall not exceed its fair rental value.

(i) The following requirements pertain to the recipient's supporting records for in-kind contributions from third parties.

(1) Volunteer services shall be documented and, to the extent feasible, supported by the same methods used by the recipient for its own employees.

(2) The basis for determining the valuation for personal service, material, equipment, buildings and land shall be documented.

(j) DOE shall specify in the solicitation or in the program rule, if any, any cost sharing requirement. The award

document shall be specific as to whether the cost sharing is based on a minimum amount for the recipient or on a percentage of total costs.

(k) If DOE requires that a recipient provide cost sharing which is not required by statute or which exceeds a statutory minimum, DOE shall state in the program rule or solicitation the reasons for requiring such cost sharing, recommended or required levels of cost sharing, and the circumstances under which the requirement for cost sharing may be waived or adjusted during any negotiation.

(1) Whenever DOE negotiates the amount of cost sharing, DOE may take into account such factors as the use of program income (see §600.124), patent rights, and rights in data. Foregone fee or profit shall not be considered in establishing the extent of cost sharing.

§ 600.124 Program income.

(a) The standards set forth in this section shall be used to account for program income related to projects financed in whole or in part with DOE funds.

(b) Except as provided in paragraph (h) of this section, program income earned during the project period shall be retained by the recipient and, in accordance with program regulations or the terms and conditions of the award, shall be used in one or more of the following ways.

(1) Added to funds committed to the project and used to further eligible project objectives.

(2) Used to finance the non-DOE share of the project.

(3) Deducted from the total project allowable cost in determining the net allowable costs on which the share of costs is based.

(c) When DOE authorizes the disposition of program income as described in paragraphs (b)(1) or (b)(2) of this section, program income in excess of any limits stipulated shall be used in accordance with paragraph (b)(3) of this section.

(d) In the event that the program regulations or the terms and conditions of the award do not specify how program income is to be used, paragraph (b)(3) of this section shall apply

§ 600.125

automatically to all projects or programs except research. For awards that support research, paragraph (b)(1) of this section shall apply automatically unless the award indicates another alternative in the terms and conditions, the recipient is subject to special award conditions, as indicated in § 600.114, or the recipient is a commercial organization.

(e) Unless program regulations or the terms and conditions of the award provide otherwise, recipients shall have no obligation to the Federal Government regarding program income earned after the end of the project period.

(f) Unless program regulations or the terms and conditions of the award provide otherwise, costs incident to the generation of program income may be deducted from gross income to determine program income, provided these costs have not been charged to the award.

(g) Proceeds from the sale of property shall be handled in accordance with the requirements of the Property Standards (See §§ 600.130 through 600.137).

(h) Unless program regulations or the terms and condition of the award provide otherwise, recipients shall have no obligation to the Federal Government with respect to program income earned from license fees and royalties for copyrighted material, patents, patent applications, trademarks, and inventions produced under an award. However, Patent and Trademark Amendments (35 U.S.C. Chapter 18) apply to inventions made under an experimental, developmental, or research award.

§ 600.125 Revision of budget and program plans.

(a) The budget plan is the financial expression of the project or program as approved during the award process. It includes the sum of the Federal and non-Federal share when there are cost sharing requirements. It shall be related to performance for program evaluation purposes whenever appropriate.

(b) Recipients are required to report deviations from budget and program plans, and request prior approvals for budget and program plan revisions, in accordance with this section.

10 CFR Ch. II (1–1–16 Edition)

(c) For nonconstruction awards, recipients shall request prior approvals from the DOE for one or more of the following program or budget related reasons.

(1) Change in the scope or the objective of the project or program (even if there is no associated budget revision requiring prior written approval).

(2) Change in a key person specified in the application or award document.

(3) The absence for more than three months, or a 25 percent reduction in time devoted to the project, by the approved project director or principal investigator.

(4) The need for additional Federal funding.

(5) If required by program regulations, the transfer of amounts budgeted for indirect costs to absorb increases in direct costs, or vice versa.

(6) The inclusion, unless waived by program regulations or the terms and conditions of award, of costs that require prior approval in accordance with OMB Circular A-21, "Cost Principles for Institutions of Higher Education," OMB Circular A-122, "Cost Principles for Non-Profit Organizations," or 45 CFR part 74 Appendix E, "Principles for Determining Costs Applicable to Research and Development under Grants and Contracts with Hospitals," or 48 CFR part 31, "Contract Cost Principles and Procedures," as applicable.

(7) The transfer of funds allotted for training allowances (direct payment to trainees) to other categories of expense.

(8) Unless described in the application and funded in the approved awards, the subaward, transfer or contracting out of any work under an award. This provision does not apply to the purchase of supplies, material, equipment or general support services.

(d) No other prior approval requirements for specific items may be imposed unless a deviation has been approved in accordance with § 600.4.

(e) Except for requirements listed in paragraphs (c)(1) and (c)(4) of this section, program regulations may waive cost-related and administrative prior written approvals required by this subpart and its Appendices. Such waivers may include authorizing recipients to do any one or more of the following.

Department of Energy

§ 600.125

(1) Incur pre-award costs 90 calendar days prior to award without prior approval or more than 90 calendar days with the prior approval of DOE. All pre-award costs are incurred at the recipient's risk (i.e., DOE is under no obligation to reimburse such costs if for any reason the recipient does not receive an award or if the award is less than anticipated and inadequate to cover such costs).

(2) Initiate a one-time extension of the expiration date of the final budget period of the project of up to 12 months unless one or more of the following conditions apply.

(i) The terms and conditions of award prohibit the extension.

(ii) The extension requires additional Federal funds.

(iii) The extension involves any change in the approved objectives or scope of the project.

(iv) The extension is being exercised merely for the purpose of using unobligated balances. For one-time extensions, the recipient must notify the DOE in writing with the supporting reasons and revised expiration date at least 10 days before the expiration date specified in the award.

(3) Carry forward unobligated balances to subsequent funding periods.

(4) For awards that support research, unless the terms and conditions of award provide otherwise, the prior approval requirements described in paragraph (e) of this section are automatically waived (i.e., recipients need not obtain such prior approvals) unless one of the conditions included in § 600.125(e)(2) applies.

(5) For continuation awards within a multiple year project in support of research, prior to receipt of continuation funding, preaward expenditures by recipients are not subject to the limitation or approval requirements of § 600.125(e)(1). Nevertheless, incurrence by the recipient does not impose any obligation on DOE if a continuation award is not subsequently made, or if an award is made for a lesser amount than the recipient expected.

(f) Program regulations may restrict the transfer of funds among direct cost categories or programs, functions and activities for awards in which DOE's share of the project exceeds \$100,000

and the cumulative amount of such transfers exceeds or is expected to exceed 10 percent of the total budget as last approved by DOE. However, no program regulation shall permit a transfer that would cause any Federal appropriation or part thereof to be used for purposes other than those consistent with the original intent of the appropriation.

(g) All other changes to nonconstruction budgets, except for the changes described in paragraph (j) of this section, do not require prior approval.

(h) For construction awards, recipients shall request prior written approval promptly from the Contracting Officer for budget revisions whenever paragraph (h) (1), (2) or (3) of this section apply.

(1) The revision results from changes in the scope or the objective of the project or program.

(2) The need arises for additional Federal funds to complete the project.

(3) A revision is desired which involves specific costs for which prior written approval requirements may be imposed consistent with applicable OMB cost principles listed in § 600.127.

(i) Except in accordance with the deviation procedures in 600.4 or as may be provided for in program regulations, no other prior approval requirements for specific items will be imposed by DOE.

(j) When DOE makes an award that provides support for both construction and nonconstruction work, DOE may require the recipient to request prior approval from DOE before making any fund or budget transfers between the two types of work supported.

(k) For both construction and nonconstruction awards, recipients shall notify DOE in writing promptly whenever the amount of Federal authorized funds is expected to exceed the needs of the recipient for the project period by more than \$5000 or five percent of the Federal award, whichever is greater. This notification shall not be required if an application for additional funding is submitted for a continuation award.

(l) Requests for budget revisions may be made by letter.

(m) Within 30 calendar days from the date of receipt of the request for budget revisions, DOE shall review the request and notify the recipient whether

§ 600.126

the budget revisions have been approved. If the revision is still under consideration at the end of 30 calendar days, DOE shall inform the recipient in writing of the date when the recipient may expect the decision.

(n) DOE approval or disapproval of a request for a budget or project revision shall be in writing and signed by a DOE Contracting Officer.

(o) A request by a subrecipient for prior approval shall be addressed in writing to the recipient. The recipient shall promptly review such request and shall approve or disapprove the request in writing within 30 days from the date of the recipient's request for the revision. A recipient shall not approve any budget or project revision which is inconsistent with the purpose or terms and conditions of the DOE award. If the revision requested by the subrecipient would result in a change to the recipient's approved budget or approved project which requires DOE prior approval, the recipient shall obtain DOE approval before approving such revision.

§ 600.126 Non-Federal audits.

(a) Recipients and subrecipients that are institutions of higher education or other non-profit organizations (including hospitals) shall be subject to the audit requirements contained in the Single Audit Act Amendments of 1996 (31 U.S.C. 7501-7507) and revised OMB Circular A-133, "Audits of States, Local Governments, and Non-Profit Organizations."

(b) State and local governments shall be subject to the audit requirements contained in the Single Audit Act Amendments of 1996 (31 U.S.C. 7501-7507) and revised OMB Circular A-133, "Audits of States, Local Governments, and Non-Profit Organizations."

(c) For-profit organizations that are subrecipients are subject to the audit requirements specified in 10 CFR 600.316.

[59 FR 53266, Oct. 21, 1994, as amended at 62 FR 45939, 45940, Aug. 29, 1997; 68 FR 50650, Aug. 21, 2003]

§ 600.127 Allowable costs.

(a) *General.* For each kind of recipient, there is a set of Federal principles for determining allowable costs. Allow-

10 CFR Ch. II (1-1-16 Edition)

ability of costs shall be determined in accordance with the cost principles applicable to the entity incurring the costs. Thus, allowability of costs incurred by State, local or federally-recognized Indian tribal governments is determined in accordance with the provisions of OMB Circular A-87, "Cost Principles for State and Local Governments." The allowability of costs incurred by non-profit organizations is determined in accordance with the provisions of OMB Circular A-122, "Cost Principles for Non-Profit Organizations." The allowability of costs incurred by institutions of higher education is determined in accordance with the provisions of OMB Circular A-21, "Cost Principles for Educational Institutions." The allowability of costs incurred by hospitals is determined in accordance with the provisions of Appendix E of 45 CFR part 74, "Principles for Determining Costs Applicable to Research and Development Under Grants and Contracts with Hospitals." The allowability of costs incurred by commercial organizations and those non-profit organizations listed in Attachment C to Circular A-122 is determined in accordance with the provisions of the Federal Acquisition Regulation (FAR) at 48 CFR part 31.

(b) *Indirect costs.* Unless restricted by Federal statute or program rule, DOE shall provide for the reimbursement of appropriate indirect costs.

(1) DOE shall include an amount for indirect costs in an award only if the applicant requests reimbursement of such costs and—

(i) Submits evidence that a cognizant Federal agency has been assigned to establish indirect cost rates for the applicant and indicates or provides evidence that—

(A) A current agreement containing an applicable approved indirect cost rate(s) covering all or part of the budget period for which DOE may provide funding has been established; or

(B) An indirect cost proposal has been submitted to the cognizant agency in order to establish an applicable approved indirect cost rate(s) covering all or part of the budget period for which DOE may provide funding; or

(C) An indirect cost proposal covering all or part of the budget period

Department of Energy

§ 600.132

and applicable to the activities for which DOE may provide funding will be submitted to the cognizant agency for approval no later than three months after the beginning date of the initial budget period of the DOE award or, for subsequent budget periods, in accordance with any schedule established by the cognizant agency; or

(ii) If not assigned to a cognizant agency, the applicant includes, in the application, data that is current, complete, accurate, and sufficient to allow the Contracting Officer to determine a rate(s) for indirect costs. If the total approved budget will not exceed \$100,000 or if the amount requested for indirect costs does not exceed \$5,000, DOE may waive the requirement for negotiation of a rate and, in lieu thereof, provide a reasonable allowance for such costs.

(2) Indirect cost proposals shall be prepared and submitted in accordance with the applicable Federal cost principles and instructions from the cognizant agency or from DOE, as appropriate.

(3) If a subaward under an award or subaward provides for the payment of indirect costs, the recipient or subrecipient shall be responsible for negotiating appropriate indirect costs, using the cost principles applicable to the subrecipient or contractor, unless the subrecipient or contractor has negotiated an applicable rate directly with DOE or another Federal department or agency. DOE may review and audit the procedures a recipient or subrecipient uses in conducting indirect cost negotiations.

(c) *Fee or profit.* No increment above cost may be paid to a recipient or subrecipient under a DOE award or subaward. A fee or profit may be paid to a contractor providing goods or services under a contract with a recipient or subrecipient.

[59 FR 53266, Oct. 21, 1994, as amended at 68 FR 50650, Aug. 21, 2003]

§ 600.128 Period of availability of funds.

Where a funding period is specified, a recipient may charge to the award only allowable costs resulting from obligations incurred during the funding pe-

riod and any pre-award costs authorized by DOE.

Property Standards

§ 600.130 Purpose of property standards.

Sections 600.131 through 600.137 set forth uniform standards governing management and disposition of property furnished by the Federal Government or whose cost was charged to a project supported by a Federal award. Recipients shall observe these standards under awards and shall not impose additional requirements, unless specifically required by Federal statute or program regulations. The recipient may use its own property management standards and procedures provided it observes the provisions of §§ 600.131 through 600.137.

§ 600.131 Insurance coverage.

Recipients shall, at a minimum, provide the equivalent insurance coverage for real property and equipment acquired with DOE funds as provided to property owned by the recipient. Federally-owned property need not be insured unless required by the terms and conditions of the award.

§ 600.132 Real property.

Unless otherwise provided by statute or program regulations, the requirements concerning the use and disposition of real property acquired in whole or in part under awards are as follows.

(a) Title to real property shall vest in the recipient subject to the condition that the recipient shall use the real property for the authorized purpose of the project as long as it is needed and shall not encumber the property without approval of DOE.

(b) The recipient shall obtain written approval by DOE for the use of real property in other federally-sponsored projects when the recipient determines that the property is no longer needed for the purpose of the original project. Use in other projects shall be limited to those under federally-sponsored projects (i.e., awards) or programs that have purposes consistent with those authorized for support by DOE.

§ 600.133

10 CFR Ch. II (1–1–16 Edition)

(c) When the real property is no longer needed as provided in paragraphs (a) and (b) of this section, the recipient shall request disposition instructions from DOE or its successor Federal awarding agency. DOE will give one or more of the following disposition instructions.

(1) The recipient may be permitted to retain title without further obligation to the Federal Government after it compensates the Federal Government for that percentage of the current fair market value of the property attributable to the Federal participation in the project.

(2) The recipient may be directed to sell the property under guidelines provided by DOE and pay the Federal Government for that percentage of the current fair market value of the property attributable to the Federal participation in the project (after deducting actual and reasonable selling and fix-up expenses, if any, from the sales proceeds). When the recipient is authorized or required to sell the property, proper sales procedures shall be established that provide for competition to the extent practicable and result in the highest possible return.

(3) The recipient may be directed to transfer title to the property to the Federal Government or to an eligible third party provided that, in such cases, the recipient shall be entitled to compensation for its attributable percentage of the current fair market value of the property.

§ 600.133 Federally-owned and exempt property.

(a) *Federally-owned property.* (1) Title to federally-owned property remains vested in the Federal Government. Recipients shall submit annually an inventory listing of federally-owned property in their custody to DOE. Upon completion of the award or when the property is no longer needed, the recipient shall report the property to DOE for further Federal agency utilization.

(2) If DOE has no further need for the property, it shall be declared excess and reported to the General Services Administration, unless DOE has statutory authority to dispose of the property by alternative methods (e.g., the

authority provided by the Federal Technology Transfer Act (15 U.S.C. 3710 (i)) to donate research equipment to educational and non-profit organizations in accordance with E.O. 12821, “Improving Mathematics and Science Education in Support of the National Education Goals.”) Appropriate instructions shall be issued to the recipient by DOE.

(b) *Exempt property.* When statutory authority exists, DOE may vest title to property acquired with Federal funds in the recipient without further obligation to the Federal Government and under conditions DOE considers appropriate. For example, under 31 U.S.C. 6306, DOE may so vest title to tangible personal property under a grant or cooperative agreement for basic or applied research in a nonprofit institution of higher education or in a nonprofit organization whose primary purpose is conducting scientific research. Such property is “exempt property.” Program regulations or the terms and conditions of award may establish provisions for vesting title to exempt property. Should such conditions not be established and the recipient has no need for the equipment, the recipient shall request disposition instructions from DOE. If DOE does not issue disposition instructions within 120 calendar days of receipt of the request, title to the property shall vest in the recipient without further obligation to the Federal Government. If, at the end of the project, DOE fails to issue disposition instructions within 120 calendar days of the receipt of a final inventory, title to the property shall vest in the recipient without further obligation to the Federal Government.

§ 600.134 Equipment.

(a) Title to equipment acquired by a recipient with Federal funds shall vest in the recipient, subject to conditions of this section.

(b) The recipient shall not use equipment acquired with Federal funds to provide services to non-Federal outside organizations for a fee that is less than private companies charge for equivalent services, unless specifically authorized by Federal statute, for as long as the Federal Government retains an interest in the equipment.

(c) The recipient shall use the equipment in the project or program for which it was acquired as long as needed, whether or not the project or program continues to be supported by Federal funds and shall not encumber the property without approval of DOE. When no longer needed for the original project or program, the recipient shall use the equipment in connection with its other federally-sponsored activities, in the following order of priority:

- (1) Activities sponsored by DOE, then
- (2) Activities sponsored by other Federal agencies.

(d) During the time that equipment is used on the project or program for which it was acquired, the recipient shall make it available for use on other projects or programs if such other use will not interfere with the work on the project or program for which the equipment was originally acquired. First preference for such other use shall be given to other projects or programs sponsored by DOE that financed the equipment; second preference shall be given to projects or programs sponsored by other Federal awarding agencies. If the equipment is owned by the Federal Government, use on other activities not sponsored by the Federal Government shall be permissible if authorized by DOE. User charges shall be treated as program income.

(e) When acquiring replacement equipment, the recipient may use the equipment to be replaced as trade-in or sell the equipment and use the proceeds to offset the costs of the replacement equipment subject to the approval of DOE.

(f) The recipient's property management standards for equipment acquired with Federal funds and federally-owned equipment shall include all of the following.

(1) Equipment records shall be maintained accurately and shall include the following information.

- (i) A description of the equipment.
- (ii) Manufacturer's serial number, model number, Federal stock number, national stock number, or other identification number.
- (iii) Source of the equipment, including the award number.
- (iv) Whether title vests in the recipient or the Federal Government.

(v) Acquisition date (or date received, if the equipment was furnished by the Federal Government) and cost.

(vi) Information from which one can calculate the percentage of Federal participation in the cost of the equipment (not applicable to equipment furnished by the Federal Government).

(vii) Location and condition of the equipment and the date the information was reported.

(viii) Unit acquisition cost.

(ix) Ultimate disposition data, including date of disposal and sales price or the method used to determine current fair market value where a recipient compensates DOE for its share.

(2) Equipment owned by the Federal Government shall be identified to indicate Federal ownership.

(3) A physical inventory of equipment shall be taken and the results reconciled with the equipment records at least once every two years. Any differences between quantities determined by the physical inspection and those shown in the accounting records shall be investigated to determine the causes of the difference. The recipient shall, in connection with the inventory, verify the existence, current utilization, and continued need for the equipment.

(4) A control system shall be in effect to insure adequate safeguards to prevent loss, damage, or theft of the equipment. Any loss, damage, or theft of equipment shall be investigated and fully documented; if the equipment was owned by the Federal Government, the recipient shall promptly notify DOE.

(5) Adequate maintenance procedures shall be implemented to keep the equipment in good condition.

(6) Where the recipient is authorized or required to sell the equipment, proper sales procedures shall be established which provide for competition to the extent practicable and result in the highest possible return.

(g) When the recipient no longer needs the equipment, the equipment may be used for other activities in accordance with the following standards. Equipment with a current per-unit fair market value of less than \$5000 may be retained, sold or otherwise disposed of with no further obligation to the awarding agency. For equipment with

§ 600.135

a current per unit fair market value of \$5000 or more, the recipient may retain the equipment for other uses provided that compensation is made to the original Federal awarding agency or its successor. The amount of compensation shall be computed by applying the percentage of Federal participation in the cost of the original project or program to the current fair market value of the equipment. If the recipient has no need for the equipment, the recipient shall request disposition instructions from DOE. DOE shall determine whether the equipment can be used to meet DOE's requirements. If no requirement exists within DOE, the availability of the equipment shall be reported to the General Services Administration by DOE to determine whether a requirement for the equipment exists in other Federal agencies. DOE will issue instructions to the recipient no later than 120 calendar days after the recipient's request and the following procedures shall govern.

(1) If so instructed or if disposition instructions are not issued within 120 calendar days after the recipient's request, the recipient shall sell the equipment and reimburse DOE an amount computed by applying to the sales proceeds the percentage of Federal participation in the cost of the original project or program. However, the recipient shall be permitted to deduct and retain from the Federal share \$500 or ten percent of the proceeds, whichever is less, for the recipient's selling and handling expenses.

(2) If the recipient is instructed to ship the equipment elsewhere, the recipient shall be reimbursed by the Federal Government by an amount which is computed by applying the percentage of the recipient's participation in the cost of the original project or program to the current fair market value of the equipment, plus any reasonable shipping or interim storage costs incurred.

(3) If the recipient is instructed to otherwise dispose of the equipment, the recipient shall be reimbursed by DOE for such costs incurred in its disposition.

(h) DOE reserves the right, at the end of a project, to transfer the title to the Federal Government or to a third party

10 CFR Ch. II (1-1-16 Edition)

named by DOE when such third party is otherwise eligible under existing statutes. Such transfer shall be subject to the following standards.

(1) The equipment shall be appropriately identified in the award or otherwise made known to the recipient in writing.

(2) DOE shall issue disposition instructions within 120 calendar days after receipt of a final inventory. The final inventory shall list all equipment acquired with award funds and federally-owned equipment. If DOE fails to issue disposition instructions within the 120 calendar day period, the provisions of § 600.134(g)(1) apply.

(3) When DOE exercises its right to take title, the equipment shall be subject to the provisions for federally-owned equipment.

§ 600.135 Supplies and other expendable property.

(a) Title to supplies and other expendable property shall vest in the recipient upon acquisition. If there is a residual inventory of unused supplies exceeding \$5000 in total aggregate value upon termination or completion of the project or program and the supplies are not needed for any other federally-sponsored project or program, the recipient shall retain the supplies for use on non-Federal sponsored activities or sell them, but shall, in either case, compensate the Federal Government for its share. The amount of compensation shall be computed in the same manner as for equipment.

(b) The recipient shall not use supplies acquired with Federal funds to provide services to non-Federal outside organizations for a fee that is less than private companies charge for equivalent services, unless specifically authorized by Federal statute as long as the Federal Government retains an interest in the supplies.

§ 600.136 Intangible property.

(a) Recipients may copyright any work that is subject to copyright and was developed, or for which ownership was purchased, under an award. DOE reserves a royalty-free, nonexclusive and irrevocable right to reproduce, publish or otherwise use the work for

Department of Energy

§ 600.137

Federal purposes and to authorize others to do so.

(b) Recipients are subject to applicable regulations governing patents and inventions, including government-wide regulations issued by the Department of Commerce at 37 CFR part 401, "Rights to Inventions Made by Non-profit Organizations and Small Business Firms Under Government Grants, Contracts and Cooperative Agreements."

(c) The DOE has the right to:

(1) Obtain, reproduce, publish or otherwise use the data first produced under an award; and

(2) Authorize others to receive, reproduce, publish, or otherwise use such data for Federal purposes.

(d)(1) In addition, in response to a Freedom of Information Act (FOIA) request for research data relating to published research findings produced under an award that were used by the Federal Government in developing an agency action that has the force and effect of law, the DOE shall request, and the recipient shall provide, within a reasonable time, the research data so that they can be made available to the public through the procedures established under the FOIA. If the DOE obtains the research data solely in response to a FOIA request, the agency may charge the requester a reasonable fee equaling the full incremental cost of obtaining the research data. This fee should reflect costs incurred by the agency, the recipient, and applicable subrecipients. This fee is in addition to any fees the agency may assess under the FOIA (5 U.S.C. 552(a)(4)(A)).

(2) The following definitions apply for purposes of this paragraph (d):

(i) *Research data* is defined as the recorded factual material commonly accepted in the scientific community as necessary to validate research findings, but not any of the following: preliminary analyses, drafts of scientific papers, plans for future research, peer reviews, or communications with colleagues. This "recorded" material excludes physical objects (e.g., laboratory samples). *Research data* also do not include:

(A) Trade secrets, commercial information, materials necessary to be held confidential by a researcher until they

are published, or similar information which is protected under law; and

(B) Personnel and medical information and similar information the disclosure of which would constitute a clearly unwarranted invasion of personal privacy, such as information that could be used to identify a particular person in a research study.

(ii) *Published* is defined as either when:

(A) Research findings are published in a peer-reviewed scientific or technical journal; or

(B) A Federal agency publicly and officially cites the research findings in support of an agency action that has the force and effect of law.

(iii) *Used by the Federal Government in developing an agency action that has the force and effect of law* is defined as when an agency publicly and officially cites the research findings in support of an agency action that has the force and effect of law.

(e) Title to intangible property and debt instruments acquired under an award or subaward vests upon acquisition in the recipient. The recipient shall use that property for the originally-authorized purpose, and the recipient shall not encumber the property without approval of DOE. When no longer needed for the originally authorized purpose, disposition of the intangible property shall occur in accordance with the provisions of § 600.134(g).

[61 FR 7165, Feb. 26, 1996, as amended at 65 FR 14407, 14408, Mar. 16, 2000; 68 FR 50650, Aug. 21, 2003]

§ 600.137 Property trust relationship.

Real property, equipment, intangible property and debt instruments that are acquired or improved with Federal funds shall be held in trust by the recipient as trustee for the beneficiaries of the project or program under which the property was acquired or improved. Recipients shall record liens or other appropriate notices of record to indicate that personal or real property has been acquired or improved with Federal funds and that use and disposition conditions apply to the property.

§ 600.140

10 CFR Ch. II (1–1–16 Edition)

Procurement Standards

§ 600.140 Purpose of procurement standards.

Sections 600.141 through 600.148 set forth standards for use by recipients in establishing procedures for the procurement of supplies and other expendable property, equipment, real property and other services with Federal funds. These standards are furnished to ensure that such materials and services are obtained in an effective manner and in compliance with the provisions of applicable Federal statutes and executive orders. No additional procurement standards or requirements shall be imposed by DOE upon recipients, unless specifically required by Federal statute or executive order or in accordance with the deviation procedures of § 600.4.

§ 600.141 Recipient responsibilities.

The standards contained in this section do not relieve the recipient of the contractual responsibilities arising under its contract(s). The recipient is the responsible authority, without recourse to DOE regarding the settlement and satisfaction of all contractual and administrative issues arising out of procurements entered into in support of an award or other agreement. This includes disputes, claims, protests of award, source evaluation or other matters of a contractual nature. Matters concerning violation of statute are to be referred to such Federal, State or local authority as may have proper jurisdiction.

§ 600.142 Codes of conduct.

The recipient shall maintain written standards of conduct governing the performance of its employees engaged in the award and administration of contracts. No employee, officer, or agent shall participate in the selection, award, or administration of a contract supported by Federal funds if a real or apparent conflict of interest would be involved. Such a conflict would arise when the employee, officer, or agent, any member of his or her immediate family, his or her partner, or an organization which employs or is about to employ any of the parties indicated herein, has a financial or other interest

in the firm selected for an award. The officers, employees, and agents of the recipient shall neither solicit nor accept gratuities, favors, or anything of monetary value from contractors, or parties to subagreements. However, recipients may set standards for situations in which the financial interest is not substantial or the gift is an unsolicited item of nominal value. The standards of conduct shall provide for disciplinary actions to be applied for violations of such standards by officers, employees, or agents of the recipient.

§ 600.143 Competition.

All procurement transactions shall be conducted in a manner to provide, to the maximum extent practical, open and free competition. The recipient shall be alert to organizational conflicts of interest as well as noncompetitive practices among contractors that may restrict or eliminate competition or otherwise restrain trade. In order to ensure objective contractor performance and eliminate unfair competitive advantage, contractors that develop or draft specifications, requirements, statements of work, invitations for bids and/or requests for proposals shall be excluded from competing for such procurements. Awards shall be made to the bidder or offeror whose bid or offer is responsive to the solicitation and is most advantageous to the recipient, price, quality and other factors considered. Solicitations shall clearly set forth all requirements that the bidder or offeror shall fulfill in order for the bid or offer to be evaluated by the recipient. Any and all bids or offers may be rejected when it is in the recipient's interest to do so.

§ 600.144 Procurement procedures.

(a) All recipients shall establish written procurement procedures. These procedures shall provide for, at a minimum, that paragraphs (a)(1), (2) and (3) of this section apply.

(1) Recipients avoid purchasing unnecessary items.

(2) Where appropriate, an analysis is made of lease and purchase alternatives to determine which would be the most economical and practical procurement.

Department of Energy

§ 600.144

(3) Solicitations for goods and services provide for all of the following.

(i) A clear and accurate description of the technical requirements for the material, product or service to be procured. In competitive procurements, such a description shall not contain features which unduly restrict competition.

(ii) Requirements which the bidder/offeror must fulfill and all other factors to be used in evaluating bids or proposals.

(iii) A description, whenever practicable, of technical requirements in terms of functions to be performed or performance required, including the range of acceptable characteristics or minimum acceptable standards.

(iv) The specific features of "brand name or equal" descriptions that bidders are required to meet when such items are included in the solicitation.

(v) The acceptance, to the extent practicable and economically feasible, of products and services dimensioned in the metric system of measurement.

(vi) Preference, to the extent practicable and economically feasible, for products and services that conserve natural resources and protect the environment and are energy efficient.

(b) Positive efforts shall be made by recipients to utilize small businesses, minority-owned firms, and women's business enterprises, whenever possible. Recipients of DOE awards shall take all of the following steps to further this goal.

(1) Ensure that small businesses, minority-owned firms, and women's business enterprises are used to the fullest extent practicable.

(2) Make information on forthcoming opportunities available and arrange time frames for purchases and contracts to encourage and facilitate participation by small businesses, minority-owned firms, and women's business enterprises.

(3) Consider in the contract process whether firms competing for larger contracts intend to subcontract with small businesses, minority-owned firms, and women's business enterprises.

(4) Encourage contracting with consortiums of small businesses, minority-owned firms and women's business en-

terprises when a contract is too large for one of these firms to handle individually.

(5) Use the services and assistance, as appropriate, of such organizations as the Small Business Administration and the Department of Commerce's Minority Business Development Agency in the solicitation and utilization of small businesses, minority-owned firms and women's business enterprises.

(c) The type of procuring instruments used (e.g., fixed price contracts, cost reimbursable contracts, purchase orders, and incentive contracts) shall be determined by the recipient but shall be appropriate for the particular procurement and for promoting the best interest of the program or project involved. The "cost-plus-a-percentage-of-cost" or "percentage of construction cost" methods of contracting shall not be used.

(d) Contracts shall be made only with responsible contractors who possess the potential ability to perform successfully under the terms and conditions of the proposed procurement. Consideration shall be given to such matters as contractor integrity, record of past performance, financial and technical resources or accessibility to other necessary resources. In certain circumstances, contracts with certain parties are restricted by DOE's implementation, in 10 CFR part 1036, of E.O.'s 12549 and 12689, "Debarment and Suspension."

(e) Recipients shall, on request, make available for DOE, pre-award review and procurement documents, such as request for proposals or invitations for bids, independent cost estimates, etc., when any of the following conditions apply.

(1) A recipient's procurement procedures or operation fails to comply with the procurement standards in this subpart.

(2) The procurement is expected to exceed the small purchase threshold fixed at 41 U.S.C. 403 (11) (currently \$25,000) and is to be awarded without competition or only one bid or offer is received in response to a solicitation.

(3) The procurement, which is expected to exceed the small purchase threshold, specifies a "brand name" product.

§ 600.145

(4) The proposed award over the small purchase threshold is to be awarded to other than the apparent low bidder under a sealed bid procurement.

(5) A proposed contract modification changes the scope of a contract or increases the contract amount by more than the amount of the small purchase threshold.

(f) By agreement of the recipient or subrecipient and the contractor, if consistent with the recipient's or subrecipient's usual business practices and applicable state and local law, any contract to which this section applies may provide for the payment of interest penalties on amounts overdue under such contract except that—

(1) In no case shall any obligation to pay such interest penalties be construed to be an obligation of the Federal government, and

(2) Any payment of such interest penalties may not be made from DOE funds nor be counted toward meeting a cost sharing requirement of a DOE award.

§ 600.145 Cost and price analysis.

Some form of cost or price analysis shall be made and documented in the procurement files in connection with every procurement action. Price analysis may be accomplished in various ways, including the comparison of price quotations submitted, market prices and similar indicia, together with discounts. Cost analysis is the review and evaluation of each element of cost to determine reasonableness, allocability and allowability.

§ 600.146 Procurement records.

Procurement records and files for purchases in excess of the small purchase threshold shall include the following at a minimum:

- (a) Basis for contractor selection,
- (b) Justification for lack of competition when competitive bids or offers are not obtained, and
- (c) Basis for award cost or price.

§ 600.147 Contract administration.

A system for contract administration shall be maintained to ensure contractor conformance with the terms, conditions and specifications of the

10 CFR Ch. II (1-1-16 Edition)

contract and to ensure adequate and timely follow up of all purchases. Recipients shall evaluate contractor performance and document, as appropriate, whether contractors have met the terms, conditions and specifications of the contract.

§ 600.148 Contract provisions.

The recipient shall include, in addition to provisions to define a sound and complete agreement, the following provisions in all contracts. The following provisions shall also be applied to subcontracts.

(a) Contracts in excess of the small purchase threshold shall contain contractual provisions or conditions that allow for administrative, contractual, or legal remedies in instances in which a contractor violates or breaches the contract terms, and provide for such remedial actions as may be appropriate.

(b) All contracts in excess of the small purchase threshold shall contain suitable provisions for termination by the recipient, including the manner by which termination shall be effected and the basis for settlement. In addition, such contracts shall describe conditions under which the contract may be terminated for default as well as conditions where the contract may be terminated because of circumstances beyond the control of the contractor.

(c) Except as otherwise required by statute, an award that requires the contracting (or subcontracting) for construction or facility improvements shall provide for the recipient to follow its own requirements relating to bid guarantees, performance bonds, and payment bonds unless the construction contract or subcontract exceeds \$100,000. For those contracts or subcontracts exceeding \$100,000, DOE may accept the bonding policy and requirements of the recipient, provided the DOE has made a determination that the Federal Government's interest is adequately protected. If such a determination has not been made, the minimum requirements shall be as follows.

(1) A bid guarantee from each bidder equivalent to five percent of the bid price. The "bid guarantee" shall consist of a firm commitment such as a

Department of Energy

§ 600.151

bid bond, certified check, or other negotiable instrument accompanying a bid as assurance that the bidder shall, upon acceptance of his bid, execute such contractual documents as may be required within the time specified.

(2) A performance bond on the part of the contractor for 100 percent of the contract price. A “performance bond” is one executed in connection with a contract to secure fulfillment of all the contractor’s obligations under such contract.

(3) A payment bond on the part of the contractor for 100 percent of the contract price. A “payment bond” is one executed in connection with a contract to assure payment as required by statute of all persons supplying labor and material in the execution of the work provided for in the contract.

(4) Where bonds are required in the situations described herein, the bonds shall be obtained from companies holding certificates of authority as acceptable sureties pursuant to 31 CFR part 223, “Surety Companies Doing Business with the United States.”

(d) All negotiated contracts (except those for less than the small purchase threshold) awarded by recipients shall include a provision to the effect that the recipient, DOE, the Comptroller General of the United States, or any of their duly authorized representatives, shall have access to any books, documents, papers and records of the contractor which are directly pertinent to a specific program for the purpose of making audits, examinations, excerpts and transcriptions.

(e) All contracts, including small purchases, awarded by recipients and their contractors shall contain the procurement provisions of appendix A to this subpart, as applicable.

§ 600.149 Resource Conservation and Recovery Act (RCRA).

Recipients’ procurements shall comply with applicable requirements of RCRA, as described at § 600.116 of this subpart.

Reports and Records

§ 600.150 Purpose of reports and records.

Sections 600.151 through 600.153 set forth the procedures for monitoring and reporting on the recipient’s financial and program performance and the necessary standard reporting forms. They also set forth record retention requirements.

§ 600.151 Monitoring and reporting program performance.

(a) Recipients are responsible for managing and monitoring each project, program, subaward, function or activity supported by the award. Recipients shall monitor subawards to ensure sub-recipients have met the audit requirements as delineated in § 600.126.

(b) The terms and conditions of the award will prescribe the frequency with which the performance reports shall be submitted. Except as provided in paragraph (f) of this section, performance reports shall not be required more frequently than quarterly or less frequently than annually. Annual reports shall be due 90 calendar days after the award year; quarterly or semi-annual reports shall be due 30 days after the reporting period. DOE may require annual reports before the anniversary dates of multiple year awards in lieu of these requirements. The final performance reports are due 90 calendar days after the expiration or termination of the award.

(c) If inappropriate, a final technical or performance report shall not be required after completion of the project.

(d) When required, performance reports shall generally contain, for each award, brief information on each of the following.

(1) A comparison of actual accomplishments with the goals and objectives established for the period, the findings of the investigator, or both. Whenever appropriate and the output of programs or projects can be readily quantified, such quantitative data should be related to cost data for computation of unit costs.

(2) Reasons why established goals were not met, if appropriate.

(3) Other pertinent information including, when appropriate, analysis

§ 600.152

10 CFR Ch. II (1–1–16 Edition)

and explanation of cost overruns or high unit costs.

DOE may specify in the award that the recipient provide this information on the Federal Assistance Program/Project Status Report (DOE F 4600.6), the technical reporting formats, or the Federal Assistance Management Summary Report. DOE may require that the Federal Assistance Management Summary Report be used as a performance report only when such use is authorized by program rule or the need for this form is explained in the solicitation. The requirements of this section concerning reporting frequency and deadlines shall apply to the Federal Assistance Management Summary Report. (See also § 600.112 with regard to use of this form as part of the award application.)

(e) Recipients shall not be required to submit more than the original and two copies of performance reports.

(f) Recipients shall immediately notify DOE of developments that have a significant impact on the award-supported activities. Also, notification shall be given in the case of problems, delays, or adverse conditions which materially impair the ability to meet the objectives of the award. This notification shall include a statement of the action taken or contemplated, and any assistance needed to resolve the situation.

(g) DOE may make site visits, as needed.

(h) DOE shall comply with applicable clearance requirements of 5 CFR part 1320 when requesting performance data from recipients.

(i) Recipients may place performance reporting requirements on subawards consistent with the provisions of this section and shall require interim reporting in accordance with § 600.151(f).

§ 600.152 Financial reporting.

(a) The following forms or such other forms as may be approved by OMB are authorized for obtaining financial information from recipients.

(1) SF-269 or SF-269A, Financial Status Report.

(i) Recipients shall use the SF-269 or SF-269A to report the status of funds for all nonconstruction projects or programs, except that DOE has the option

of not requiring the SF-269 or SF-269A when the SF-270, Request for Advance or Reimbursement, or SF-272, Report of Federal Cash Transactions, is determined to provide adequate information to meet DOE needs. However, a final SF-269 or SF-269A shall be required at the completion of the project when the SF-270 is used only for advances.

(ii) The terms and conditions of award shall prescribe whether the report shall be on a cash or accrual basis. DOE may require accrual reporting only if such reporting is required by program statute or rule. If the award requires accrual information and the recipient's accounting records are not normally kept on the accrual basis, the recipient shall not be required to convert its accounting system, but shall develop such accrual information through best estimates based on an analysis of the documentation on hand.

(iii) DOE shall determine the frequency of the Financial Status Report for each project or program, considering the size and complexity of the particular project or program. However, the report shall not be required more frequently than quarterly or less frequently than annually. A final report shall be required at the completion of the agreement.

(iv) DOE shall require recipients to submit the SF-269 or SF-269A (an original and no more than two copies) no later than 30 days after the end of each specified reporting period for quarterly and semi-annual reports, and 90 calendar days for annual and final reports. Extensions of reporting due dates may be approved by the DOE upon request of the recipient.

(2) SF-272, Report of Federal Cash Transactions.

(i) When funds are advanced, each recipient shall submit the SF-272 and, when necessary, its continuation sheet, SF-272a. DOE will use this report to monitor cash advanced to recipients and to obtain disbursement information for each agreement with the recipients.

(ii) Recipients shall forecast Federal cash requirements in the "Remarks" section of the report.

(iii) When practical and deemed necessary, DOE may require recipients to report in the "Remarks" section the

Department of Energy

§ 600.153

amount of cash advances received in excess of three days. Recipients shall provide short narrative explanations of actions taken to reduce the excess balances.

(iv) Recipients shall be required to submit not more than the original and two copies of the SF-272 15 calendar days following the end of each quarter. DOE may require a monthly report from those recipients receiving advances totaling \$1 million or more per year.

(v) DOE may waive the requirement for submission of the SF-272 for any one of the following reasons:

(A) When monthly advances do not exceed \$25,000 per recipient, provided that such advances are monitored through other forms contained in this section;

(B) If, in the contracting officer's opinion, the recipient's accounting controls are adequate to minimize excessive Federal advances; or,

(C) When electronic payment mechanisms provide adequate data.

(b) When DOE needs additional information or more frequent reports, the following shall be observed:

(1) When additional information is needed to comply with legislative requirements, DOE shall issue instructions to require recipients to submit such information under the "Remarks" section of the reports.

(2) When DOE determines that a recipient's accounting system does not meet the standards in §600.121, additional pertinent information to further monitor awards may be obtained upon written notice to the recipient until such time as the system is brought up to standard. DOE, in obtaining this information, shall comply with report clearance requirements of 5 CFR part 1320.

(3) Contracting officers are encouraged to shade out any line item on any report if not necessary.

(4) DOE may accept the identical information from the recipients in machine readable format or computer printouts or electronic outputs in lieu of prescribed formats.

(5) Computer or electronic outputs may be provided to recipients when that expedites or contributes to the accuracy of reporting.

§ 600.153 Retention and access requirements for records.

(a) This section sets forth requirements for record retention and access to records for awards to recipients. DOE shall not impose any other record retention or access requirements upon recipients, unless such requirements are established in program regulations.

(b) Financial records, supporting documents, statistical records, and all other records pertinent to an award shall be retained for a period of three years from the date of submission of the final expenditure report or, for awards that are renewed quarterly or annually, from the date of the submission of the quarterly or annual financial report, as authorized by DOE. The only exceptions are the following:

(1) If any litigation, claim, or audit is started before the expiration of the 3-year period, the records shall be retained until all litigation, claims or audit findings involving the records have been resolved and final action taken.

(2) Records for real property and equipment acquired with Federal funds shall be retained for 3 years after final disposition.

(3) When records are transferred to or maintained by DOE, the 3-year retention requirement is not applicable to the recipient.

(4) Indirect cost rate proposals, cost allocations plans, and related records, for which retention requirements are specified in §600.153(g).

(c) Copies of original records may be substituted for the original records if authorized by DOE.

(d) DOE shall request transfer of certain records to its custody from recipients when it determines that the records possess long term retention value. However, in order to avoid duplicate recordkeeping, DOE may make arrangements for recipients to retain any records that are continuously needed for joint use.

(e) DOE, the Inspector General, Comptroller General of the United States, or any of their duly authorized representatives, have the right of timely and unrestricted access to any books, documents, papers, or other records of recipients that are pertinent to the awards, in order to make audits,

§ 600.160

10 CFR Ch. II (1–1–16 Edition)

examinations, excerpts, transcripts and copies of such documents. This right also includes timely and reasonable access to a recipient's personnel for the purpose of interview and discussion related to such documents. The rights of access in this paragraph are not limited to the required retention period, but shall last as long as records are retained.

(f) Unless required by statute, DOE shall place no restrictions on recipients that limit public access to the records of recipients that are pertinent to an award, except when DOE can demonstrate that such records shall be kept confidential and would have been exempted from disclosure pursuant to the Freedom of Information Act (5 U.S.C. 552) if the records had belonged to DOE.

(g) Paragraphs (g)(1) and (g)(2) of this section apply to the following types of documents, and their supporting records: indirect cost rate computations or proposals, cost allocation plans, and any similar accounting computations of the rate at which a particular group of costs is chargeable (such as computer usage chargeback rates or composite fringe benefit rates).

(1) *If submitted for negotiation.* If the recipient submits to the Federal agency responsible for negotiating the recipient's indirect cost rate or the subrecipient submits to the recipient the proposal, plan, or other computation to form the basis for negotiation of the rate, then the 3-year retention period for its supporting records starts on the date of such submission.

(2) *If not submitted for negotiation.* If the recipient is not required to submit to the cognizant Federal agency or the subrecipient is not required to submit to the recipient the proposal, plan, or other computation for negotiation purposes, then the 3-year retention period for the proposal, plan, or other computation and its supporting records starts at the end of the fiscal year (or other accounting period) covered by the proposal, plan, or other computation.

(h) If, by the terms and conditions of the award, the recipient or sub-

(1) Is accountable for program income earned or received after the end of the project period or after the termination of an award or subaward, or

(2) If program income earned during the project period is required to be applied to costs incurred after the end of the project period or after termination of an award or subaward, the record retention period shall start on the last day of the recipient's or subrecipient's fiscal year in which such income was earned or received or such costs were incurred. All other program income records shall be retained in accordance with § 600.153(b).

Termination and Enforcement

§ 600.160 Purpose of termination and enforcement.

Sections 600.161 and 600.162 set forth uniform suspension, termination and enforcement procedures.

§ 600.161 Termination.

(a) Awards may be terminated in whole or in part only if paragraph (a) (1), (2) or (3) of this section apply.

(1) By DOE, if a recipient materially fails to comply with the terms and conditions of an award.

(2) By DOE with the consent of the recipient, in which case the two parties shall agree upon the termination conditions, including the effective date and, in the case of partial termination, the portion to be terminated.

(3) By the recipient upon sending to DOE written notification setting forth the reasons for such termination, the effective date, and, in the case of partial termination, the portion to be terminated. However, if DOE determines in the case of partial termination that the reduced or modified portion of the award will not accomplish the purposes for which the award was made, it may terminate the award in its entirety under either paragraph (a) (1) or (2) of this section.

(b) If costs are allowed under an award, the responsibilities of the recipient referred to in § 600.171(a), including those for property management as applicable, shall be considered in the

Department of Energy

§ 600.171

termination of the award, and provision shall be made for continuing responsibilities of the recipient after termination, as appropriate.

§ 600.162 Enforcement.

(a) *Remedies for noncompliance.* If a recipient materially fails to comply with the terms and conditions of an award, whether stated in a Federal statute, regulation, assurance, application, or notice of award, DOE may, in addition to imposing any of the special conditions outlined in § 600.114, take one or more of the following actions, as appropriate in the circumstances.

(1) Temporarily withhold cash payments pending correction of the deficiency by the recipient or more severe enforcement action by DOE.

(2) Disallow (that is, deny both use of funds and any applicable matching credit for) all or part of the cost of the activity or action not in compliance.

(3) Wholly or partly suspend or terminate the current award.

(4) Withhold further awards for the project or program.

(5) Take other remedies that may be legally available.

(b) *Hearings and appeals.* In taking an enforcement action, DOE shall provide the recipient an opportunity for hearing, appeal, or other administrative proceeding to which the recipient is entitled under any statute or regulation applicable to the action involved.

(c) *Effects of suspension and termination.* Costs of a recipient resulting from obligations incurred by the recipient during a suspension or after termination of an award are not allowable unless the awarding agency expressly authorizes them in the notice of suspension or termination or subsequently. Other recipient costs during suspension or after termination which are necessary and not reasonably avoidable are allowable if paragraph (c) (1) and (2) of this section apply.

(1) The costs result from obligations which were properly incurred by the recipient before the effective date of suspension or termination, are not in anticipation of it, and in the case of a termination, are noncancellable.

(2) The costs would be allowable if the award were not suspended or expired normally at the end of the fund-

ing period in which the termination takes effect.

(d) *Relationship to debarment and suspension.* The enforcement remedies identified in this section, including suspension and termination, do not preclude a recipient from being subject to debarment and suspension under 10 CFR part 1036.

AFTER-THE-AWARD REQUIREMENTS

§ 600.170 Purpose.

Sections 600.171 through 600.173 contain closeout procedures and other procedures for subsequent disallowances and adjustments.

§ 600.171 Closeout procedures.

(a) Recipients shall submit, within 90 calendar days after the date of completion of the award, all financial, performance, and other reports as required by the terms and conditions of the award. DOE may approve extensions when requested by the recipient.

(b) Unless DOE authorizes an extension, a recipient shall liquidate all obligations incurred under the award not later than 90 calendar days after the funding period or the date of completion as specified in the terms and conditions of the award or in agency implementing instructions.

(c) DOE shall make prompt payments to a recipient for allowable reimbursable costs under the award being closed out.

(d) The recipient shall promptly refund any balances of unobligated cash that DOE has advanced or paid and that is not authorized to be retained by the recipient for use in other projects. OMB Circular A-129 governs unreturned amounts that become delinquent debts.

(e) When authorized by the terms and conditions of the award, DOE shall make a settlement for any upward or downward adjustments to the Federal share of costs after closeout reports are received.

(f) The recipient shall account for any real and personal property acquired with Federal funds or received from the Federal Government in accordance with §§ 600.131 through 600.137.

(g) In the event a final audit has not been performed prior to the closeout of

§ 600.172

an award, DOE shall retain the right to recover an appropriate amount after fully considering the recommendations on disallowed costs resulting from the final audit.

§ 600.172 Subsequent adjustments and continuing responsibilities.

(a) The closeout of an award does not affect any of the following.

(1) The right of DOE to disallow costs and recover funds on the basis of a later audit or other review.

(2) The obligation of the recipient to return any funds due as a result of later refunds, corrections, or other transactions.

(3) Audit requirements in § 600.126.

(4) Property management requirements in §§ 600.131 through 600.137.

(5) Records retention as required in § 600.153.

(b) After closeout of an award, a relationship created under an award may be modified or ended in whole or in part with the consent of DOE and the recipient, provided the responsibilities of the recipient referred to in paragraph 600.173(a), including those for property management as applicable, are considered and provisions made for continuing responsibilities of the recipient, as appropriate.

§ 600.173 Collection of amounts due.

(a) Any funds paid to a recipient in excess of the amount to which the recipient is finally determined to be entitled under the terms and conditions of the award constitute a debt to the Federal Government. If not paid within a reasonable period after the demand for payment, DOE may reduce the debt by paragraph (a) (1), (2) or (3) of this section.

(1) Making an administrative offset against other requests for reimbursements.

(2) Withholding advance payments otherwise due to the recipient.

(3) Taking other action permitted by statute.

(b) Except as otherwise provided by law, DOE shall charge interest on an overdue debt in accordance with 4 CFR Chapter II, "Federal Claims Collection Standards."

10 CFR Ch. II (1–1–16 Edition)

ADDITIONAL PROVISIONS

APPENDIX A TO SUBPART B OF PART 600—CONTRACT PROVISIONS

All contracts, awarded by a recipient including small purchases, shall contain the following provisions as applicable:

1. *Equal Employment Opportunity*—All contracts shall contain a provision requiring compliance with E.O. 11246, "Equal Employment Opportunity," as amended by E.O. 11375, "Amending Executive Order 11246 Relating to Equal Employment Opportunity," and as supplemented by regulations at 41 CFR part 60, "Office of Federal Contract Compliance Programs, Equal Employment Opportunity, Department of Labor."

2. *Copeland "Anti-Kickback" Act (18 U.S.C. 874 and 40 U.S.C. 276c)*—All contracts and subgrants in excess of \$2000 for construction or repair awarded by recipients and subrecipients shall include a provision for compliance with the Copeland "Anti-Kickback" Act (18 U.S.C. 874), as supplemented by Department of Labor regulations (29 CFR part 3, "Contractors and Subcontractors on Public Building or Public Work Financed in Whole or in part by Loans or Grants from the United States"). The Act provides that each contractor or subrecipient shall be prohibited from inducing, by any means, any person employed in the construction, completion, or repair of public work, to give up any part of the compensation to which he is otherwise entitled. The recipient shall report all suspected or reported violations to the Federal awarding agency.

3. *Davis-Bacon Act, as amended (40 U.S.C. 276a to a-7)*—When required by Federal program legislation, all construction contracts awarded by the recipients and subrecipients of more than \$2000 shall include a provision for compliance with the Davis-Bacon Act (40 U.S.C. 276a to a-7) and as supplemented by Department of Labor regulations (29 CFR part 5, "Labor Standards Provisions Applicable to Contracts Governing Federally Financed and Assisted Construction"). Under this Act, contractors shall be required to pay wages to laborers and mechanics at a rate not less than the minimum wages specified in a wage determination made by the Secretary of Labor. In addition, contractors shall be required to pay wages not less than once a week. The recipient shall place a copy of the current prevailing wage determination issued by the Department of Labor in each solicitation and the award of a contract shall be conditioned upon the acceptance of the wage determination. The recipient shall report all suspected or reported violations to the Federal awarding agency.

4. *Contract Work Hours and Safety Standards Act (40 U.S.C. 327–333)*—Where applicable, all contracts awarded by recipients in excess of

Department of Energy

§ 600.202

\$2000 for construction contracts and in excess of \$2500 for other contracts that involve the employment of mechanics or laborers shall include a provision for compliance with sections 102 and 107 of the Contract Work Hours and Safety Standards Act (40 U.S.C. 327-333), as supplemented by Department of Labor regulations (29 CFR part 5). Under section 102 of the Act, each contractor shall be required to compute the wages of every mechanic and laborer on the basis of a standard work week of 40 hours. Work in excess of the standard work week is permissible provided that the worker is compensated at a rate of not less than 1½ times the basic rate of pay for all hours worked in excess of 40 hours in the work week. Section 107 of the Act is applicable to construction work and provides that no laborer or mechanic shall be required to work in surroundings or under working conditions which are unsanitary, hazardous or dangerous. These requirements do not apply to the purchases of supplies or materials or articles ordinarily available on the open market, or contracts for transportation or transmission of intelligence.

5. *Rights to Inventions Made Under a Contract or Agreement*—Contracts or agreements for the performance of experimental, developmental, or research work shall provide for the rights of the Federal Government and the recipient in any resulting invention in accordance with 37 CFR part 401, "Rights to Inventions Made by Nonprofit Organizations and Small Business Firms Under Government Grants, Contracts and Cooperative Agreements," and any implementing regulations issued by the awarding agency.

6. *Clean Air Act (42 U.S.C. 7401 et seq.) and the Federal Water Pollution Control Act (33 U.S.C. 1251 et seq.), as amended*—Contracts and subgrants of amounts in excess of \$100,000 shall contain a provision that requires the recipient to agree to comply with all applicable standards, orders or regulations issued pursuant to the Clean Air Act (42 U.S.C. 7401 et seq.) and the Federal Water Pollution Control Act as amended (33 U.S.C. 1251 et seq.). Violations shall be reported to the Federal awarding agency and the Regional Office of the Environmental Protection Agency (EPA).

7. *Byrd Anti-Lobbying Amendment (31 U.S.C. 1352)*— Contractors who apply or bid for an award of \$100,000 or more shall file the required certification. Each tier certifies to the tier above that it will not and has not used Federal appropriated funds to pay any person or organization for influencing or attempting to influence an officer or employee of any agency, a member of Congress, officer or employee of Congress, or an employee of a member of Congress in connection with obtaining any Federal contract, grant or any other award covered by 31 U.S.C. 1352. Each tier shall also disclose any lobbying with non-Federal funds that takes place in con-

nection with obtaining any Federal award. Such disclosures are forwarded from tier to tier up to the recipient.

8. *Debarment and Suspension (E.O.s 12549 and 12689)*— Contract awards that exceed the small purchase threshold and certain other contract awards shall not be made to parties listed on the nonprocurement portion of the General Services Administration's List of parties Excluded from Federal Procurement or Nonprocurement Programs in accordance with E.O.s 12549 and 12689, "Debarment and Suspension." This list contains the names of parties debarred, suspended, or otherwise excluded by agencies, and contractors declared ineligible under statutory or regulatory authority other than E.O. 12549. Contractors with awards that exceed the small purchase threshold shall provide the required certification regarding its exclusion status and that of its principals.

Subpart C—Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments

SOURCE: 53 FR 8045, 8087, Mar. 11, 1988, unless otherwise noted. Redesignated at 59 FR 53264, Oct. 21, 1994.

GENERAL

§ 600.200 Purpose and scope of this subpart.

This subpart establishes uniform administrative rules for Federal grants and cooperative agreements and subawards to State, local and Indian tribal governments.

§ 600.201 Scope of §§ 600.200 through 600.205.

This section contains general rules pertaining to this part and procedures for control of exceptions from this subpart.

§ 600.202 Definitions.

As used in this part:

Accrued expenditures mean the charges incurred by the grantee during a given period requiring the provision of funds for: (1) Goods and other tangible property received; (2) services performed by employees, contractors, subgrantees, subcontractors, and other payees; and (3) other amounts becoming owed under programs for which no

current services or performance is required, such as annuities, insurance claims, and other benefit payments.

Accrued income means the sum of: (1) Earnings during a given period from services performed by the grantee and goods and other tangible property delivered to purchasers, and (2) amounts becoming owed to the grantee for which no current services or performance is required by the grantee.

Acquisition cost of an item of purchased equipment means the net invoice unit price of the property including the cost of modifications, attachments, accessories, or auxiliary apparatus necessary to make the property usable for the purpose for which it was acquired. Other charges such as the cost of installation, transportation, taxes, duty or protective in-transit insurance, shall be included or excluded from the unit acquisition cost in accordance with the grantee's regular accounting practices.

Administrative requirements mean those matters common to grants in general, such as financial management, kinds and frequency of reports, and retention of records. These are distinguished from *programmatic* requirements, which concern matters that can be treated only on a program-by-program or grant-by-grant basis, such as kinds of activities that can be supported by grants under a particular program.

Awarding agency means (1) with respect to a grant, the Federal agency, and (2) with respect to a subgrant, the party that awarded the subgrant.

Cash contributions means the grantee's cash outlay, including the outlay of money contributed to the grantee or subgrantee by other public agencies and institutions, and private organizations and individuals. When authorized by Federal legislation, Federal funds received from other assistance agreements may be considered as grantee or subgrantee cash contributions.

Contract means (except as used in the definitions for *grant* and *subgrant* in this section and except where qualified by *Federal*) a procurement contract under a grant or subgrant, and means a procurement subcontract under a contract.

Cost sharing or matching means the value of the third party in-kind contributions and the portion of the costs of a federally assisted project or program not borne by the Federal Government.

Cost-type contract means a contract or subcontract under a grant in which the contractor or subcontractor is paid on the basis of the costs it incurs, with or without a fee.

Equipment means tangible, non-expendable, personal property having a useful life of more than one year and an acquisition cost of \$5,000 or more per unit. A grantee may use its own definition of equipment provided that such definition would at least include all equipment defined above.

Expenditure report means: (1) For non-construction grants, the SF-269 "Financial Status Report" (or other equivalent report); (2) for construction grants, the SF-271 "Outlay Report and Request for Reimbursement" (or other equivalent report).

Federally recognized Indian tribal government means the governing body or a governmental agency of any Indian tribe, band, nation, or other organized group or community (including any Native village as defined in section 3 of the Alaska Native Claims Settlement Act, 85 Stat 688) certified by the Secretary of the Interior as eligible for the special programs and services provided by him through the Bureau of Indian Affairs.

Government means a State or local government or a federally recognized Indian tribal government.

Grant means an award of financial assistance, including cooperative agreements, in the form of money, or property in lieu of money, by the Federal Government to an eligible grantee. The term does not include technical assistance which provides services instead of money, or other assistance in the form of revenue sharing, loans, loan guarantees, interest subsidies, insurance, or direct appropriations. Also, the term does not include assistance, such as a fellowship or other lump sum award, which the grantee is not required to account for.

Grantee means the government to which a grant is awarded and which is accountable for the use of the funds

provided. The grantee is the entire legal entity even if only a particular component of the entity is designated in the grant award document.

Local government means a county, municipality, city, town, township, local public authority (including any public and Indian housing agency under the United States Housing Act of 1937) school district, special district, intrastate district, council of governments (whether or not incorporated as a nonprofit corporation under state law), any other regional or interstate government entity, or any agency or instrumentality of a local government.

Obligations means the amounts of orders placed, contracts and subgrants awarded, goods and services received, and similar transactions during a given period that will require payment by the grantee during the same or a future period.

OMB means the United States Office of Management and Budget.

Outlays (expenditures) mean charges made to the project or program. They may be reported on a cash or accrual basis. For reports prepared on a cash basis, outlays are the sum of actual cash disbursement for direct charges for goods and services, the amount of indirect expense incurred, the value of in-kind contributions applied, and the amount of cash advances and payments made to contractors and subgrantees. For reports prepared on an accrued expenditure basis, outlays are the sum of actual cash disbursements, the amount of indirect expense incurred, the value of in-kind contributions applied, and the new increase (or decrease) in the amounts owed by the grantee for goods and other property received, for services performed by employees, contractors, subgrantees, subcontractors, and other payees, and other amounts becoming owed under programs for which no current services or performance are required, such as annuities, insurance claims, and other benefit payments.

Percentage of completion method refers to a system under which payments are made for construction work according to the percentage of completion of the work, rather than to the grantee's cost incurred.

Prior approval means documentation evidencing consent prior to incurring

specific cost. For the Department of Energy, this must be signed by a Contracting Officer.

Real property means land, including land improvements, structures and appurtenances thereto, excluding movable machinery and equipment.

Share, when referring to the awarding agency's portion of real property, equipment or supplies, means the same percentage as the awarding agency's portion of the acquiring party's total costs under the grant to which the acquisition costs under the grant to which the acquisition cost of the property was charged. Only costs are to be counted—not the value of third-party in-kind contributions.

State means any of the several States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, any territory or possession of the United States, or any agency or instrumentality of a State exclusive of local governments. The term does not include any public and Indian housing agency under United States Housing Act of 1937.

Subgrant means an award of financial assistance in the form of money, or property in lieu of money, made under a grant by a grantee to an eligible subgrantee. The term includes financial assistance when provided by contractual legal agreement, but does not include procurement purchases, nor does it include any form of assistance which is excluded from the definition of *grant* in this subpart.

Subgrantee means the government or other legal entity to which a subgrant is awarded and which is accountable to the grantee for the use of the funds provided.

Supplies means all tangible personal property other than "equipment" as defined in this subpart.

Suspension means depending on the context, either (1) temporary withdrawal of the authority to obligate grant funds pending corrective action by the grantee or subgrantee or a decision to terminate the grant, or (2) an action taken by a suspending official in accordance with agency regulations

§ 600.203

implementing E.O. 12549 to immediately exclude a person from participating in grant transactions for a period, pending completion of an investigation and such legal or debarment proceedings as may ensue.

Termination means permanent withdrawal of the authority to obligate previously-awarded grant funds before that authority would otherwise expire. It also means the voluntary relinquishment of that authority by the grantee or subgrantee. *Termination* does not include: (1) Withdrawal of funds awarded on the basis of the grantee's underestimate of the unobligated balance in a prior period; (2) withdrawal of the unobligated balance as of the expiration of a grant; (3) refusal to extend a grant or award additional funds, to make a competing or noncompeting continuation, renewal, extension, or supplemental award; or (4) voiding of a grant upon determination that the award was obtained fraudulently, or was otherwise illegal or invalid from inception.

Terms of a grant or subgrant mean all requirements of the grant or subgrant, whether in statute, regulations, or the award document.

Third party in-kind contributions mean property or services which benefit a federally assisted project or program and which are contributed by non-Federal third parties without charge to the grantee, or a cost-type contractor under the grant agreement.

Unliquidated obligations for reports prepared on a cash basis mean the amount of obligations incurred by the grantee that has not been paid. For reports prepared on an accrued expenditure basis, they represent the amount of obligations incurred by the grantee for which an outlay has not been recorded.

Unobligated balance means the portion of the funds authorized by the Federal agency that has not been obligated by the grantee and is determined by deducting the cumulative obligations from the cumulative funds authorized.

[53 FR 8087, Mar. 11, 1988, as amended at 53 FR 8047, Mar. 11, 1988; 54 FR 23960, June 5, 1989]

10 CFR Ch. II (1-1-16 Edition)

§ 600.203 Applicability.

(a) *General.* Sections 600.400 through 600.452 of this subpart apply to all grants and subgrants to governments, except where inconsistent with Federal statutes or with regulations authorized in accordance with the exception provision of § 600.405, or:

(1) Grants and subgrants to State and local institutions of higher education or State and local hospitals.

(2) The block grants authorized by the Omnibus Budget Reconciliation Act of 1981 (Community Services; Preventive Health and Health Services; Alcohol, Drug Abuse, and Mental Health Services; Maternal and Child Health Services; Social Services; Low-Income Home Energy Assistance; States' Program of Community Development Block Grants for Small Cities; and Elementary and Secondary Education other than programs administered by the Secretary of Education under Title V, Subtitle D, Chapter 2, Section 583—the Secretary's discretionary grant program) and Titles I-III of the Job Training Partnership Act of 1982 and under the Public Health Services Act (Section 1921), Alcohol and Drug Abuse Treatment and Rehabilitation Block Grant and part C of Title V, Mental Health Service for the Homeless Block Grant).

(3) Entitlement grants to carry out the following programs of the Social Security Act:

(i) Aid to Needy Families with Dependent Children (Title IV-A of the Act, not including the Work Incentive Program (WIN) authorized by section 402(a)19(G); HHS grants for WIN are subject to this subpart);

(ii) Child Support Enforcement and Establishment of Paternity (Title IV-D of the Act);

(iii) Foster Care and Adoption Assistance (Title IV-E of the Act);

(iv) Aid to the Aged, Blind, and Disabled (Titles I, X, XIV, and XVI-AABD of the Act); and

(v) Medical Assistance (Medicaid) (Title XIX of the Act) not including the State Medicaid Fraud Control program authorized by section 1903(a)(6)(B).

(4) Entitlement grants under the following programs of The National School Lunch Act:

Department of Energy

§ 600.210

(i) School Lunch (section 4 of the Act),

(ii) Commodity Assistance (section 6 of the Act),

(iii) Special Meal Assistance (section 11 of the Act),

(iv) Summer Food Service for Children (section 13 of the Act), and

(v) Child Care Food Program (section 17 of the Act).

(5) Entitlement grants under the following programs of The Child Nutrition Act of 1966:

(i) Special Milk (section 3 of the Act), and

(ii) School Breakfast (section 4 of the Act).

(6) Entitlement grants for State Administrative expenses under The Food Stamp Act of 1977 (section 16 of the Act).

(7) A grant for an experimental, pilot, or demonstration project that is also supported by a grant listed in paragraph (a)(3) of this section;

(8) Grant funds awarded under subsection 412(e) of the Immigration and Nationality Act (8 U.S.C. 1522(e)) and subsection 501(a) of the Refugee Education Assistance Act of 1980 (Pub. L. 96-422, 94 Stat. 1809), for cash assistance, medical assistance, and supplemental security income benefits to refugees and entrants and the administrative costs of providing the assistance and benefits;

(9) Grants to local education agencies under 20 U.S.C. 236 through 241-1(a), and 242 through 244 (portions of the Impact Aid program), except for 20 U.S.C. 238(d)(2)(c) and 240(f) (Entitlement Increase for Handicapped Children); and

(10) Payments under the Veterans Administration's State Home Per Diem Program (38 U.S.C. 641(a)).

(b) *Entitlement programs.* Entitlement programs enumerated above in § 600.403(a) (3) through (8) are subject to subpart E.

[53 FR 8045, 8087, Mar. 11, 1988, as amended at 54 FR 23960, June 5, 1989]

§ 600.204 Effect on other issuances.

All other grants administration provisions of codified program regulations, program manuals, handbooks and other nonregulatory materials which are inconsistent with this subpart are superseded, except to the ex-

tent they are required by statute, or authorized in accordance with the exception provision in § 600.205.

[53 FR 8045, 8087, Mar. 11, 1988. Redesignated at 59 FR 53264, Oct. 21, 1994, as amended at 61 FR 7165, Feb. 26, 1996]

§ 600.205 Additions and exceptions.

(a) For classes of grants and grantees subject to this subpart, Federal agencies may not impose additional administrative requirements except in codified regulations published in the FEDERAL REGISTER.

(b) Exceptions for classes of grants or grantees may be authorized only by OMB.

(c) Exceptions on a case-by-case basis and for subgrantees may be authorized by the affected Federal agencies.

(d) The DOE procedural requirements for requesting additions and exceptions are specified in § 600.4.

[53 FR 8087, Mar. 11, 1988, as amended at 53 FR 8047, Mar. 11, 1988]

PRE-AWARD REQUIREMENTS

§ 600.210 Forms for applying for grants.

(a) *Scope.* (1) This section prescribes forms and instructions to be used by governmental organizations (except hospitals and institutions of higher education operated by a government) in applying for grants. This section is not applicable, however, to formula grant programs which do not require applicants to apply for funds on a project basis.

(2) This section applies only to applications to Federal agencies for grants, and is not required to be applied by grantees in dealing with applicants for subgrants. However, grantees are encouraged to avoid more detailed or burdensome application requirements for subgrants.

(b) *Authorized forms and instructions for governmental organizations.* (1) In applying for grants, applicants shall only use standard application forms or those prescribed by the granting agency with the approval of OMB under the Paperwork Reduction Act of 1980.

(2) Applicants are not required to submit more than the original and two copies of preapplications or applications.

§ 600.211

(3) Applicants must follow all applicable instructions that bear OMB clearance numbers. Federal agencies may specify and describe the programs, functions, or activities that will be used to plan, budget, and evaluate the work under a grant. Other supplementary instructions may be issued only with the approval of OMB to the extent required under the Paperwork Reduction Act of 1980. For any standard form, except the SF-424 facesheet, Federal agencies may shade out or instruct the applicant to disregard any line item that is not needed.

(4) When a grantee applies for additional funding (such as a continuation or supplemental award) or amends a previously submitted application, only the affected pages need be submitted. Previously submitted pages with information that is still current need not be resubmitted.

§ 600.211 State plans.

(a) *Scope.* The statutes for some programs require States to submit plans before receiving grants. Under regulations implementing Executive Order 12372, "Intergovernmental Review of Federal Programs," States are allowed to simplify, consolidate and substitute plans. This section contains additional provisions for plans that are subject to regulations implementing the Executive order.

(b) *Requirements.* A State need meet only Federal administrative or programmatic requirements for a plan that are in statutes or codified regulations.

(c) *Assurances.* In each plan the State will include an assurance that the State shall comply with all applicable Federal statutes and regulations in effect with respect to the periods for which it receives grant funding. For this assurance and other assurances required in the plan, the State may:

(1) Cite by number the statutory or regulatory provisions requiring the assurances and affirm that it gives the assurances required by those provisions,

(2) Repeat the assurance language in the statutes or regulations, or

(3) Develop its own language to the extent permitted by law.

10 CFR Ch. II (1-1-16 Edition)

(d) *Amendments.* A State will amend a plan whenever necessary to reflect: (1) New or revised Federal statutes or regulations or (2) a material change in any State law, organization, policy, or State agency operation. The State will obtain approval for the amendment and its effective date but need submit for approval only the amended portions of the plan.

§ 600.212 Special grant or subgrant conditions for "high-risk" recipients.

(a) A grantee or subgrantee may be considered "high risk" if an awarding agency determines that a grantee or subgrantee:

(1) Has a history of unsatisfactory performance, or

(2) Is not financially stable, or

(3) Has a management system which does not meet the management standards set forth in this subpart, or

(4) Has not conformed to terms and conditions of previous awards, or

(5) Is otherwise not responsible; and if the awarding agency determines that an award will be made, special conditions and/or restrictions shall correspond to the high risk condition and shall be included in the award.

(b) Special conditions or restrictions may include:

(1) Payment on a reimbursement basis;

(2) Withholding authority to proceed to the next phase until receipt of evidence of acceptable performance within a given funding period;

(3) Requiring additional, more detailed financial reports;

(4) Additional project monitoring;

(5) Requiring the grantee or subgrantee to obtain technical or management assistance; or

(6) Establishing additional prior approvals.

(c) If an awarding agency decides to impose such conditions, the awarding official will notify the grantee or subgrantee as early as possible, in writing, of:

(1) The nature of the special conditions/restrictions;

(2) The reason(s) for imposing them;

(3) The corrective actions which must be taken before they will be removed

Department of Energy

§ 600.221

and the time allowed for completing the corrective actions and

(4) The method of requesting reconsideration of the conditions/restrictions imposed.

[53 FR 8045, 8087, Mar. 11, 1988, as amended at 59 FR 53265, Oct. 21, 1994]

POST-AWARD REQUIREMENTS

Financial Administration

§ 600.220 Standards for financial management systems.

(a) A State must expend and account for grant funds in accordance with State laws and procedures for expending and accounting for its own funds. Fiscal control and accounting procedures of the State, as well as its subgrantees and cost-type contractors, must be sufficient to—

(1) Permit preparation of reports required by this part and the statutes authorizing the grant, and

(2) Permit the tracing of funds to a level of expenditures adequate to establish that such funds have not been used in violation of the restrictions and prohibitions of applicable statutes.

(b) The financial management systems of other grantees and subgrantees must meet the following standards:

(1) *Financial reporting.* Accurate, current, and complete disclosure of the financial results of financially assisted activities must be made in accordance with the financial reporting requirements of the grant or subgrant.

(2) *Accounting records.* Grantees and subgrantees must maintain records which adequately identify the source and application of funds provided for financially-assisted activities. These records must contain information pertaining to grant or subgrant awards and authorizations, obligations, unobligated balances, assets, liabilities, outlays or expenditures, and income.

(3) *Internal control.* Effective control and accountability must be maintained for all grant and subgrant cash, real and personal property, and other assets. Grantees and subgrantees must adequately safeguard all such property and must assure that it is used solely for authorized purposes.

(4) *Budget control.* Actual expenditures or outlays must be compared

with budgeted amounts for each grant or subgrant. Financial information must be related to performance or productivity data, including the development of unit cost information whenever appropriate or specifically required in the grant or subgrant agreement. If unit cost data are required, estimates based on available documentation will be accepted whenever possible.

(5) *Allowable cost.* Applicable OMB cost principles, agency program regulations, and the terms of grant and subgrant agreements will be followed in determining the reasonableness, allowability, and allocability of costs.

(6) *Source documentation.* Accounting records must be supported by such source documentation as cancelled checks, paid bills, payrolls, time and attendance records, contract and subgrant award documents, etc.

(7) *Cash management.* Procedures for minimizing the time elapsing between the transfer of funds from the U.S. Treasury and disbursement by grantees and subgrantees must be followed whenever advance payment procedures are used. Grantees must establish reasonable procedures to ensure the receipt of reports on subgrantees' cash balances and cash disbursements in sufficient time to enable them to prepare complete and accurate cash transactions reports to the awarding agency. When advances are made by letter-of-credit or electronic transfer of funds methods, the grantee must make drawdowns as close as possible to the time of making disbursements. Grantees must monitor cash drawdowns by their subgrantees to assure that they conform substantially to the same standards of timing and amount as apply to advances to the grantees.

(c) An awarding agency may review the adequacy of the financial management system of any applicant for financial assistance as part of a preaward review or at any time subsequent to award.

[53 FR 8045, 8087, Mar. 11, 1988, as amended at 57 FR 5, Jan. 2, 1992]

§ 600.221 Payment.

(a) *Scope.* This section prescribes the basic standard and the methods under

which a Federal agency will make payments to grantees, and grantees will make payments to subgrantees and contractors.

(b) *Basic standard.* Methods and procedures for payment shall minimize the time elapsing between the transfer of funds and disbursement by the grantee or subgrantee, in accordance with Treasury regulations at 31 CFR part 205.

(c) *Advances.* Grantees and subgrantees shall be paid in advance, provided they maintain or demonstrate the willingness and ability to maintain procedures to minimize the time elapsing between the transfer of the funds and their disbursement by the grantee or subgrantee.

(d) *Reimbursement.* Reimbursement shall be the preferred method when the requirements in paragraph (c) of this section are not met. Grantees and subgrantees may also be paid by reimbursement for any construction grant. Except as otherwise specified in regulation, Federal agencies shall not use the percentage of completion method to pay construction grants. The grantee or subgrantee may use that method to pay its construction contractor, and if it does, the awarding agency's payments to the grantee or subgrantee will be based on the grantee's or subgrantee's actual rate of disbursement.

(e) *Working capital advances.* If a grantee cannot meet the criteria for advance payments described in paragraph (c) of this section, and the Federal agency has determined that reimbursement is not feasible because the grantee lacks sufficient working capital, the awarding agency may provide cash or a working capital advance basis. Under this procedure the awarding agency shall advance cash to the grantee to cover its estimated disbursement needs for an initial period generally geared to the grantee's disbursing cycle. Thereafter, the awarding agency shall reimburse the grantee for its actual cash disbursements. The working capital advance method of payment shall not be used by grantees or subgrantees if the reason for using such method is the unwillingness or inability of the grantee to provide timely advances to the subgrantee to meet the

subgrantee's actual cash disbursements.

(f) *Effect of program income, refunds, and audit recoveries on payment.* (1) Grantees and subgrantees shall disburse repayments to and interest earned on a revolving fund before requesting additional cash payments for the same activity.

(2) Except as provided in paragraph (f)(1) of this section, grantees and subgrantees shall disburse program income, rebates, refunds, contract settlements, audit recoveries and interest earned on such funds before requesting additional cash payments.

(g) *Withholding payments.* (1) Unless otherwise required by Federal statute, awarding agencies shall not withhold payments for proper charges incurred by grantees or subgrantees unless—

(i) The grantee or subgrantee has failed to comply with grant award conditions or

(ii) The grantee or subgrantee is indebted to the United States.

(2) Cash withheld for failure to comply with grant award condition, but without suspension of the grant, shall be released to the grantee upon subsequent compliance. When a grant is suspended, payment adjustments will be made in accordance with § 600.243(c).

(3) A Federal agency shall not make payment to grantees for amounts that are withheld by grantees or subgrantees from payment to contractors to assure satisfactory completion of work. Payments shall be made by the Federal agency when the grantees or subgrantees actually disburse the withheld funds to the contractors or to escrow accounts established to assure satisfactory completion of work.

(h) *Cash depositories.* (1) Consistent with the national goal of expanding the opportunities for minority business enterprises, grantees and subgrantees are encouraged to use minority banks (a bank which is owned at least 50 percent by minority group members). A list of minority owned banks can be obtained from the Minority Business Development Agency, Department of Commerce, Washington, DC 20230.

(2) A grantee or subgrantee shall maintain a separate bank account only when required by Federal-State agreement.

Department of Energy

§ 600.224

(i) *Interest earned on advances.* Unless there are statutory provisions to the contrary, grantees and subgrantees shall promptly, but at least quarterly, remit to the Federal agency interest earned on advances. The grantee or subgrantee may keep interest amounts up to \$100 per year for administrative expenses.

[53 FR 8045, 8087, Mar. 11, 1988, as amended at 57 FR 5, Jan. 2, 1992; 61 FR 7165, Feb. 26, 1996]

§ 600.222 Allowable costs.

(a) *Limitation on use of funds.* Grant funds may be used only for:

(1) The allowable costs of the grantees, subgrantees and cost-type contractors, including allowable costs in the form of payments to fixed-price contractors; and

(2) Reasonable fees or profit to cost-type contractors but not any fee or profit (or other increment above allowable costs) to the grantee or subgrantee.

(b) *Applicable cost principles.* For each kind of organization, there is a set of Federal principles for determining allowable costs. Allowable costs will be determined in accordance with the cost principles applicable to the organization incurring the costs. The following chart lists the kinds of organizations and the applicable cost principles.

For the costs of a—	Use the principles in—
State, local or Indian tribal government.	OMB Circular A-87.
Private nonprofit organization other than an (1) institution of higher education, (2) hospital, or (3) organization named in OMB Circular A-122 as not subject to that circular.	OMB Circular A-122.

Hospitals	45 CFR part 74, Appendix E

[53 FR 8087, Mar. 11, 1988, as amended at 53 FR 8047, Mar. 11, 1988]

§ 600.223 Period of availability of funds.

(a) *General.* Where a funding period is specified, a grantee may charge to the award only costs resulting from obligations of the funding period unless carryover of unobligated balances is permitted, in which case the carryover balances may be charged for costs resulting from obligations of the subsequent funding period.

(b) *Liquidation of obligations.* A grantee must liquidate all obligations incurred under the award not later than 90 days after the end of the funding period (or as specified in a program regulation) to coincide with the submission of the annual Financial Status Report (SF-269). The Federal agency may extend this deadline at the request of the grantee.

§ 600.224 Matching or cost sharing.

(a) *Basic rule: Costs and contributions acceptable.* With the qualifications and exceptions listed in paragraph (b) of this section, a matching or cost sharing requirement may be satisfied by either or both of the following:

(1) Allowable costs incurred by the grantee, subgrantee or a cost-type contractor under the assistance agreement. This includes allowable costs borne by non-Federal grants or by others cash donations from non-Federal third parties.

(2) The value of third party in-kind contributions applicable to the period to which the cost sharing or matching requirements applies.

(b) *Qualifications and exceptions—(1) Costs borne by other Federal grant agreements.* Except as provided by Federal statute, a cost sharing or matching requirement may not be met by costs borne by another Federal grant. This prohibition does not apply to income earned by a grantee or subgrantee from a contract awarded under another Federal grant.

(2) *General revenue sharing.* For the purpose of this section, general revenue sharing funds distributed under 31 U.S.C. 6702 are not considered Federal grant funds.

(3) *Cost or contributions counted towards other Federal costs-sharing requirements.* Neither costs nor the values of third party in-kind contributions may

count towards satisfying a cost sharing or matching requirement of a grant agreement if they have been or will be counted towards satisfying a cost sharing or matching requirement of another Federal grant agreement, a Federal procurement contract, or any other award of Federal funds.

(4) *Costs financed by program income.* Costs financed by program income, as defined in § 600.425, shall not count towards satisfying a cost sharing or matching requirement unless they are expressly permitted in the terms of the assistance agreement. (This use of general program income is described in § 600.225(g).)

(5) *Services or property financed by income earned by contractors.* Contractors under a grant may earn income from the activities carried out under the contract in addition to the amounts earned from the party awarding the contract. No costs of services or property supported by this income may count toward satisfying a cost sharing or matching requirement unless other provisions of the grant agreement expressly permit this kind of income to be used to meet the requirement.

(6) *Records.* Costs and third party in-kind contributions counting towards satisfying a cost sharing or matching requirement must be verifiable from the records of grantees and subgrantee or cost-type contractors. These records must show how the value placed on third party in-kind contributions was derived. To the extent feasible, volunteer services will be supported by the same methods that the organization uses to support the allocability of regular personnel costs.

(7) *Special standards for third party in-kind contributions.* (i) Third party in-kind contributions count towards satisfying a cost sharing or matching requirement only where, if the party receiving the contributions were to pay for them, the payments would be allowable costs.

(ii) Some third party in-kind contributions are goods and services that, if the grantee, subgrantee, or contractor receiving the contribution had to pay for them, the payments would have been an indirect costs. Cost sharing or matching credit for such contributions shall be given only if the

grantee, subgrantee, or contractor has established, along with its regular indirect cost rate, a special rate for allocating to individual projects or programs the value of the contributions.

(iii) A third party in-kind contribution to a fixed-price contract may count towards satisfying a cost sharing or matching requirement only if it results in:

(A) An increase in the services or property provided under the contract (without additional cost to the grantee or subgrantee) or

(B) A cost savings to the grantee or subgrantee.

(iv) The values placed on third party in-kind contributions for cost sharing or matching purposes will conform to the rules in the succeeding sections of this subpart. If a third party in-kind contribution is a type not treated in those sections, the value placed upon it shall be fair and reasonable.

(c) *Valuation of donated services—(1) Volunteer services.* Unpaid services provided to a grantee or subgrantee by individuals will be valued at rates consistent with those ordinarily paid for similar work in the grantee's or subgrantee's organization. If the grantee or subgrantee does not have employees performing similar work, the rates will be consistent with those ordinarily paid by other employers for similar work in the same labor market. In either case, a reasonable amount for fringe benefits may be included in the valuation.

(2) *Employees of other organizations.* When an employer other than a grantee, subgrantee, or cost-type contractor furnishes free of charge the services of an employee in the employee's normal line of work, the services will be valued at the employee's regular rate of pay exclusive of the employee's fringe benefits and overhead costs. If the services are in a different line of work, paragraph (c)(1) of this section applies.

(d) *Valuation of third party donated supplies and loaned equipment or space.*

(1) If a third party donates supplies, the contribution will be valued at the market value of the supplies at the time of donation.

(2) If a third party donates the use of equipment or space in a building but retains title, the contribution will be

Department of Energy

§ 600.225

valued at the fair rental rate of the equipment or space.

(e) *Valuation of third party donated equipment, buildings, and land.* If a third party donates equipment, buildings, or land, and title passes to a grantee or subgrantee, the treatment of the donated property will depend upon the purpose of the grant or subgrant, as follows:

(1) *Awards for capital expenditures.* If the purpose of the grant or subgrant is to assist the grantee or subgrantee in the acquisition of property, the market value of that property at the time of donation may be counted as cost sharing or matching.

(2) *Other awards.* If assisting in the acquisition of property is not the purpose of the grant or subgrant, paragraphs (e)(2) (i) and (ii) of this section apply:

(i) If approval is obtained from the awarding agency, the market value at the time of donation of the donated equipment or buildings and the fair rental rate of the donated land may be counted as cost sharing or matching. In the case of a subgrant, the terms of the grant agreement may require that the approval be obtained from the Federal agency as well as the grantee. In all cases, the approval may be given only if a purchase of the equipment or rental of the land would be approved as an allowable direct cost. If any part of the donated property was acquired with Federal funds, only the non-federal share of the property may be counted as cost-sharing or matching.

(ii) If approval is not obtained under paragraph (e)(2)(i) of this section, no amount may be counted for donated land, and only depreciation or use allowances may be counted for donated equipment and buildings. The depreciation or use allowances for this property are not treated as third party in-kind contributions. Instead, they are treated as costs incurred by the grantee or subgrantee. They are computed and allocated (usually as indirect costs) in accordance with the cost principles specified in § 600.222, in the same way as depreciation or use allowances for purchased equipment and buildings. The amount of depreciation or use allowances for donated equipment and build-

ings is based on the property's market value at the time it was donated.

(f) *Valuation of grantee or subgrantee donated real property for construction/acquisition.* If a grantee or subgrantee donates real property for a construction or facilities acquisition project, the current market value of that property may be counted as cost sharing or matching. If any part of the donated property was acquired with Federal funds, only the non-federal share of the property may be counted as cost sharing or matching.

(g) *Appraisal of real property.* In some cases under paragraphs (d), (e) and (f) of this section, it will be necessary to establish the market value of land or a building or the fair rental rate of land or of space in a building. In these cases, the Federal agency may require the market value or fair rental value be set by an independent appraiser, and that the value or rate be certified by the grantee. This requirement will also be imposed by the grantee on subgrantees.

[53 FR 8045, 8087, Mar. 11, 1988, as amended at 57 FR 5, Jan. 2, 1992; 61 FR 7165, Feb. 26, 1996]

§ 600.225 Program income.

(a) *General.* Grantees are encouraged to earn income to defray program costs. Program income includes income from fees for services performed, from the use or rental of real or personal property acquired with grant funds, from the sale of commodities or items fabricated under a grant agreement, and from payments of principal and interest on loans made with grant funds. Except as otherwise provided in regulations of the Federal agency, program income does not include interest on grant funds, rebates, credits, discounts, refunds, etc. and interest earned on any of them.

(b) *Definition of program income.* Program income means gross income received by the grantee or subgrantee directly generated by a grant supported activity, or earned only as a result of the grant agreement during the grant period. "During the grant period" is the time between the effective date of the award and the ending date of the award reflected in the final financial report.

(c) *Cost of generating program income.* If authorized by Federal regulations or

§ 600.226

10 CFR Ch. II (1–1–16 Edition)

the grant agreement, costs incident to the generation of program income may be deducted from gross income to determine program income.

(d) *Governmental revenues.* Taxes, special assessments, levies, fines, and other such revenues raised by a grantee or subgrantee are not program income unless the revenues are specifically identified in the grant agreement or Federal agency regulations as program income.

(e) *Royalties.* Income from royalties and license fees for copyrighted material, patents, and inventions developed by a grantee or subgrantee is program income only if the revenues are specifically identified in the grant agreement or Federal agency regulations as program income. (See § 600.234.)

(f) *Property.* Proceeds from the sale of real property or equipment will be handled in accordance with the requirements of §§ 600.231 and 600.232.

(g) *Use of program income.* Program income shall be deducted from outlays which may be both Federal and non-Federal as described below, unless the Federal agency regulations or the grant agreement specify another alternative (or a combination of the alternatives). In specifying alternatives, the Federal agency may distinguish between income earned by the grantee and income earned by subgrantees and between the sources, kinds, or amounts of income. When Federal agencies authorize the alternatives in paragraphs (g) (2) and (3) of this section, program income in excess of any limits stipulated shall also be deducted from outlays.

(1) *Deduction.* Ordinarily program income shall be deducted from total allowable costs to determine the net allowable costs. Program income shall be used for current costs unless the Federal agency authorizes otherwise. Program income which the grantee did not anticipate at the time of the award shall be used to reduce the Federal agency and grantee contributions rather than to increase the funds committed to the project.

(2) *Addition.* When authorized, program income may be added to the funds committed to the grant agreement by the Federal agency and the grantee. The program income shall be

used for the purposes and under the conditions of the grant agreement.

(3) *Cost sharing or matching.* When authorized, program income may be used to meet the cost sharing or matching requirement of the grant agreement. The amount of the Federal grant award remains the same.

(h) *Income after the award period.* There are no Federal requirements governing the disposition of program income earned after the end of the award period (i.e., until the ending date of the final financial report, see paragraph (a) of this section), unless the terms of the agreement or the Federal agency regulations provide otherwise.

[53 FR 8045, 8087, Mar. 11, 1988. Redesignated at 59 FR 53264, Oct. 21, 1994, as amended at 61 FR 7165, 7166, Feb. 26, 1996]

§ 600.226 Non-Federal audit.

(a) *Basic rule.* Grantees and subgrantees are responsible for obtaining audits in accordance with the Single Audit Act Amendments of 1996 (31 U.S.C. 7501–7507) and revised OMB Circular A-133, “Audits of States, Local Governments, and Non-Profit Organizations.” The audits shall be made by an independent auditor in accordance with generally accepted government auditing standards covering financial audits.

(b) *Subgrantees.* State or local governments, as those terms are defined for purposes of the Single Audit Act Amendments of 1996, that provide Federal awards to a subgrantee, which expends \$300,000 or more (or other amount as specified by OMB) in Federal awards in a fiscal year, shall:

(1) Determine whether State or local subgrantees have met the audit requirements of the Act and whether subgrantees covered by OMB Circular A-110, “Uniform Administrative Requirements for Grants and Agreements with Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations,” have met the audit requirements of the Act. Commercial contractors (private for-profit and private and governmental organizations) providing goods and services to State and local governments are not required to have a single audit performed. State and local governments should use their own procedures to ensure that the contractor

Department of Energy

§ 600.230

has complied with laws and regulations affecting the expenditure of Federal funds;

(2) Determine whether the subgrantee spent Federal assistance funds provided in accordance with applicable laws and regulations. This may be accomplished by reviewing an audit of the subgrantee made in accordance with the Act, Circular A-110, or through other means (e.g., program reviews) if the subgrantee has not had such an audit;

(3) Ensure that appropriate corrective action is taken within six months after receipt of the audit report in instance of noncompliance with Federal laws and regulations;

(4) Consider whether subgrantee audits necessitate adjustment of the grantee's own records; and

(5) Require each subgrantee to permit independent auditors to have access to the records and financial statements.

(c) *Auditor selection.* In arranging for audit services, § 600.236 shall be followed.

[53 FR 8045, 8087, Mar. 11, 1988. Redesignated at 59 FR 53264, Oct. 21, 1994, as amended at 61 FR 7166, Feb. 26, 1996; 62 FR 45939, 45940, Aug. 29, 1997]

Changes, Property, and Subawards

§ 600.230 Changes.

(a) *General.* Grantees and subgrantees are permitted to rebudget within the approved direct cost budget to meet unanticipated requirements and may make limited program changes to the approved project. However, unless waived by the awarding agency, certain types of post-award changes in budgets and projects shall require the prior written approval of the awarding agency.

(b) *Relation to cost principles.* The applicable cost principles (see § 600.222) contain requirements for prior approval of certain types of costs. Except where waived, those requirements apply to all grants and subgrants even if paragraphs (c) through (f) of this section do not.

(c) *Budget changes*—(1) *Nonconstruction projects.* Except as stated in other regulations or an award document, grantees or subgrantees shall obtain the prior approval of the awarding

agency whenever any of the following changes is anticipated under a non-construction award:

(i) Any revision which would result in the need for additional funding.

(ii) Unless waived by the awarding agency, cumulative transfers among direct cost categories, or, if applicable, among separately budgeted programs, projects, functions, or activities which exceed or are expected to exceed ten percent of the current total approved budget, whenever the awarding agency's share exceeds \$100,000.

(iii) Transfer of funds allotted for training allowances (i.e., from direct payments to trainees to other expense categories).

(2) *Construction projects.* Grantees and subgrantees shall obtain prior written approval for any budget revision which would result in the need for additional funds.

(3) *Combined construction and non-construction projects.* When a grant or subgrant provides funding for both construction and nonconstruction activities, the grantee or subgrantee must obtain prior written approval from the awarding agency before making any fund or budget transfer from non-construction to construction or vice versa.

(d) *Programmatic changes.* Grantees or subgrantees must obtain the prior approval of the awarding agency whenever any of the following actions is anticipated:

(1) Any revision of the scope or objectives of the project (regardless of whether there is an associated budget revision requiring prior approval).

(2) Need to extend the period of availability of funds.

(3) Changes in key persons in cases where specified in an application or a grant award. In research projects, a change in the project director or principal investigator shall always require approval unless waived by the awarding agency.

(4) Under nonconstruction projects, contracting out, subgranting (if authorized by law) or otherwise obtaining the services of a third party to perform activities which are central to the purposes of the award. This approval requirement is in addition to the approval requirements of § 600.236 but

§ 600.231

does not apply to the procurement of equipment, supplies, and general support services.

(e) *Additional prior approval requirements.* The awarding agency may not require prior approval for any budget revision which is not described in paragraph (c) of this section.

(f) *Requesting prior approval.* (1) A request for prior approval of any budget revision will be in the same budget form as the grantee used in its application and shall be accompanied by a narrative justification for the proposed revision.

(2) A request for a prior approval under the applicable Federal cost principles (see § 600.222) may be made by letter.

(3) A request by a subgrantee for prior approval will be addressed in writing to the grantee. The grantee will promptly review such request and shall approve or disapprove the request in writing. A grantee will not approve any budget or project revision which is inconsistent with the purpose or terms and conditions of the Federal grant to the grantee. If the revision, requested by the subgrantee would result in a change to the grantee's approved project which requires Federal prior approval, the grantee will obtain the Federal agency's approval before approving the subgrantee's request.

[53 FR 8045, 8087, Mar. 11, 1988. Redesignated at 59 FR 53264, Oct. 21, 1994, as amended at 61 FR 7166, Feb. 26, 1996]

§ 600.231 Real property.

(a) *Title.* Subject to the obligations and conditions set forth in this section, title to real property acquired under a grant or subgrant will vest upon acquisition in the grantee or subgrantee respectively.

(b) *Use.* Except as otherwise provided by Federal statutes, real property will be used for the originally authorized purposes as long as needed for that purposes, and the grantee or subgrantee shall not dispose of or encumber its title or other interests.

(c) *Disposition.* When real property is no longer needed for the originally authorized purpose, the grantee or subgrantee will request disposition instructions from the awarding agency.

10 CFR Ch. II (1-1-16 Edition)

The instructions will provide for one of the following alternatives:

(1) *Retention of title.* Retain title after compensating the awarding agency. The amount paid to the awarding agency will be computed by applying the awarding agency's percentage of participation in the cost of the original purchase to the fair market value of the property. However, in those situations where a grantee or subgrantee is disposing of real property acquired with grant funds and acquiring replacement real property under the same program, the net proceeds from the disposition may be used as an offset to the cost of the replacement property.

(2) *Sale of property.* Sell the property and compensate the awarding agency. The amount due to the awarding agency will be calculated by applying the awarding agency's percentage of participation in the cost of the original purchase to the proceeds of the sale after deduction of any actual and reasonable selling and fixing-up expenses. If the grant is still active, the net proceeds from sale may be offset against the original cost of the property. When a grantee or subgrantee is directed to sell property, sales procedures shall be followed that provide for competition to the extent practicable and result in the highest possible return.

(3) *Transfer of title.* Transfer title to the awarding agency or to a third-party designated/approved by the awarding agency. The grantee or subgrantee shall be paid an amount calculated by applying the grantee or subgrantee's percentage of participation in the purchase of the real property to the current fair market value of the property.

§ 600.232 Equipment.

(a) *Title.* Subject to the obligations and conditions set forth in this section, title to equipment acquired under a grant or subgrant will vest upon acquisition in the grantee or subgrantee respectively.

(b) *States.* A State will use, manage, and dispose of equipment acquired under a grant by the State in accordance with State laws and procedures. Other grantees and subgrantees will follow paragraphs (c) through (e) of this section.

Department of Energy

§ 600.232

(c) *Use.* (1) Equipment shall be used by the grantee or subgrantee in the program or project for which it was acquired as long as needed, whether or not the project or program continues to be supported by Federal funds. When no longer needed for the original program or project, the equipment may be used in other activities currently or previously supported by a Federal agency.

(2) The grantee or subgrantee shall also make equipment available for use on other projects or programs currently or previously supported by the Federal Government, providing such use will not interfere with the work on the projects or program for which it was originally acquired. First preference for other use shall be given to other programs or projects supported by the awarding agency. User fees should be considered if appropriate.

(3) Notwithstanding the encouragement in § 600.225(a) to earn program income, the grantee or subgrantee must not use equipment acquired with grant funds to provide services for a fee to compete unfairly with private companies that provide equivalent services, unless specifically permitted or contemplated by Federal statute.

(4) When acquiring replacement equipment, the grantee or subgrantee may use the equipment to be replaced as a trade-in or sell the property and use the proceeds to offset the cost of the replacement property, subject to the approval of the awarding agency.

(d) *Management requirements.* Procedures for managing equipment (including replacement equipment), whether acquired in whole or in part with grant funds, until disposition takes place will, as a minimum, meet the following requirements:

(1) Property records must be maintained that include a description of the property, a serial number or other identification number, the source of property, who holds title, the acquisition date, and cost of the property, percentage of Federal participation in the cost of the property, the location, use and condition of the property, and any ultimate disposition data including the date of disposal and sale price of the property.

(2) A physical inventory of the property must be taken and the results reconciled with the property records at least once every two years.

(3) A control system must be developed to ensure adequate safeguards to prevent loss, damage, or theft of the property. Any loss, damage, or theft shall be investigated.

(4) Adequate maintenance procedures must be developed to keep the property in good condition.

(5) If the grantee or subgrantee is authorized or required to sell the property, proper sales procedures must be established to ensure the highest possible return.

(e) *Disposition.* When original or replacement equipment acquired under a grant or subgrant is no longer needed for the original project or program or for other activities currently or previously supported by a Federal agency, disposition of the equipment will be made as follows:

(1) Items of equipment with a current per-unit fair market value of less than \$5,000 may be retained, sold or otherwise disposed of with no further obligation to the awarding agency.

(2) Items of equipment with a current per unit fair market value in excess of \$5,000 may be retained or sold and the awarding agency shall have a right to an amount calculated by multiplying the current market value or proceeds from sale by the awarding agency's share of the equipment.

(3) In cases where a grantee or subgrantee fails to take appropriate disposition actions, the awarding agency may direct the grantee or subgrantee to take excess and disposition actions.

(f) *Federal equipment.* In the event a grantee or subgrantee is provided federally-owned equipment:

(1) Title will remain vested in the Federal Government.

(2) Grantees or subgrantees will manage the equipment in accordance with Federal agency rules and procedures, and submit an annual inventory listing.

(3) When the equipment is no longer needed, the grantee or subgrantee will request disposition instructions from the Federal agency.

(g) *Right to transfer title.* The Federal awarding agency may reserve the right

§ 600.233

to transfer title to the Federal Government or a third party named by the awarding agency when such a third party is otherwise eligible under existing statutes. Such transfers shall be subject to the following standards:

(1) The property shall be identified in the grant or otherwise made known to the grantee in writing.

(2) The Federal awarding agency shall issue disposition instructions within 120 calendar days after the end of the Federal support of the project for which it was acquired. If the Federal awarding agency fails to issue disposition instructions within the 120 calendar-day period the grantee shall follow § 600.232(e).

(3) When title to equipment is transferred, the grantee shall be paid an amount calculated by applying the percentage of participation in the purchase to the current fair market value of the property.

[53 FR 8045, 8087, Mar. 11, 1988. Redesignated at 59 FR 53264, Oct. 21, 1994, as amended at 61 FR 7166, Feb. 26, 1996]

§ 600.233 Supplies.

(a) *Title.* Title to supplies acquired under a grant or subgrant will vest, upon acquisition, in the grantee or subgrantee respectively.

(b) *Disposition.* If there is a residual inventory of unused supplies exceeding \$5,000 in total aggregate fair market value upon termination or completion of the award, and if the supplies are not needed for any other federally sponsored programs or projects, the grantee or subgrantee shall compensate the awarding agency for its share.

§ 600.234 Copyrights.

The Federal awarding agency reserves a royalty-free, nonexclusive, and irrevocable license to reproduce, publish or otherwise use, and to authorize others to use, for Federal Government purposes:

(a) The copyright in any work developed under a grant, subgrant, or contract under a grant or subgrant; and

(b) Any rights of copyright to which a grantee, subgrantee or a contractor purchases ownership with grant support.

10 CFR Ch. II (1–1–16 Edition)

§ 600.235 Subawards to debarred and suspended parties.

Grantees and subgrantees must not make any award or permit any award (subgrant or contract) at any tier to any party which is debarred or suspended or is otherwise excluded from or ineligible for participation in Federal assistance programs under Executive Order 12549, “Debarment and Suspension.”

§ 600.236 Procurement.

(a) *States.* When procuring property and services under a grant, a State will follow the same policies and procedures it uses for procurements from its non-Federal funds. The State will ensure that every purchase order or other contract includes any clauses required by Federal statutes and executive orders and their implementing regulations. Other grantees and subgrantees will follow paragraphs (b) through (i) in this section.

(b) *Procurement standards.* (1) Grantees and subgrantees will use their own procurement procedures which reflect applicable State and local laws and regulations, provided that the procurements conform to applicable Federal law and the standards identified in this section.

(2) Grantees and subgrantees will maintain a contract administration system which ensures that contractors perform in accordance with the terms, conditions, and specifications of their contracts or purchase orders.

(3) Grantees and subgrantees will maintain a written code of standards of conduct governing the performance of their employees engaged in the award and administration of contracts. No employee, officer or agent of the grantee or subgrantee shall participate in selection, or in the award or administration of a contract supported by Federal funds if a conflict of interest, real or apparent, would be involved. Such a conflict would arise when:

- (i) The employee, officer or agent,
- (ii) Any member of his immediate family,
- (iii) His or her partner, or
- (iv) An organization which employs, or is about to employ, any of the above, has a financial or other interest in the firm selected for award. The

grantee's or subgrantee's officers, employees or agents will neither solicit nor accept gratuities, favors or anything of monetary value from contractors, potential contractors, or parties to subagreements. Grantee and subgrantees may set minimum rules where the financial interest is not substantial or the gift is an unsolicited item of nominal intrinsic value. To the extent permitted by State or local law or regulations, such standards or conduct will provide for penalties, sanctions, or other disciplinary actions for violations of such standards by the grantee's and subgrantee's officers, employees, or agents, or by contractors or their agents. The awarding agency may in regulation provide additional prohibitions relative to real, apparent, or potential conflicts of interest.

(4) Grantee and subgrantee procedures will provide for a review of proposed procurements to avoid purchase of unnecessary or duplicative items. Consideration should be given to consolidating or breaking out procurements to obtain a more economical purchase. Where appropriate, an analysis will be made of lease versus purchase alternatives, and any other appropriate analysis to determine the most economical approach.

(5) To foster greater economy and efficiency, grantees and subgrantees are encouraged to enter into State and local intergovernmental agreements for procurement or use of common goods and services.

(6) Grantees and subgrantees are encouraged to use Federal excess and surplus property in lieu of purchasing new equipment and property whenever such use is feasible and reduces project costs.

(7) Grantees and subgrantees are encouraged to use value engineering clauses in contracts for construction projects of sufficient size to offer reasonable opportunities for cost reductions. Value engineering is a systematic and creative analysis of each contract item or task to ensure that its essential function is provided at the overall lower cost.

(8) Grantees and subgrantees will make awards only to responsible contractors possessing the ability to perform successfully under the terms and

conditions of a proposed procurement. Consideration will be given to such matters as contractor integrity, compliance with public policy, record of past performance, and financial and technical resources.

(9) Grantees and subgrantees will maintain records sufficient to detail the significant history of a procurement. These records will include, but are not necessarily limited to the following: rationale for the method of procurement, selection of contract type, contractor selection or rejection, and the basis for the contract price.

(10) Grantees and subgrantees will use time and material type contracts only—

(i) After a determination that no other contract is suitable, and

(ii) If the contract includes a ceiling price that the contractor exceeds at its own risk.

(11) Grantees and subgrantees alone will be responsible, in accordance with good administrative practice and sound business judgment, for the settlement of all contractual and administrative issues arising out of procurements. These issues include, but are not limited to source evaluation, protests, disputes, and claims. These standards do not relieve the grantee or subgrantee of any contractual responsibilities under its contracts. Federal agencies will not substitute their judgment for that of the grantee or subgrantee unless the matter is primarily a Federal concern. Violations of law will be referred to the local, State, or Federal authority having proper jurisdiction.

(12) Grantees and subgrantees will have protest procedures to handle and resolve disputes relating to their procurements and shall in all instances disclose information regarding the protest to the awarding agency. A protestor must exhaust all administrative remedies with the grantee and subgrantee before pursuing a protest with the Federal agency. Reviews of protests by the Federal agency will be limited to:

(i) Violations of Federal law or regulations and the standards of this section (violations of State or local law will be under the jurisdiction of State or local authorities) and

(ii) Violations of the grantee's or subgrantee's protest procedures for failure to review a complaint or protest. Protests received by the Federal agency other than those specified above will be referred to the grantee or subgrantee.

(c) *Competition*. (1) All procurement transactions will be conducted in a manner providing full and open competition consistent with the standards of § 600.236. Some of the situations considered to be restrictive of competition include but are not limited to:

(i) Placing unreasonable requirements on firms in order for them to qualify to do business,

(ii) Requiring unnecessary experience and excessive bonding,

(iii) Noncompetitive pricing practices between firms or between affiliated companies,

(iv) Noncompetitive awards to consultants that are on retainer contracts,

(v) Organizational conflicts of interest,

(vi) Specifying only a "brand name" product instead of allowing "an equal" product to be offered and describing the performance of other relevant requirements of the procurement, and

(vii) Any arbitrary action in the procurement process.

(2) Grantees and subgrantees will conduct procurements in a manner that prohibits the use of statutorily or administratively imposed in-State or local geographical preferences in the evaluation of bids or proposals, except in those cases where applicable Federal statutes expressly mandate or encourage geographic preference. Nothing in this section preempts State licensing laws. When contracting for architectural and engineering (A/E) services, geographic location may be a selection criteria provided its application leaves an appropriate number of qualified firms, given the nature and size of the project, to compete for the contract.

(3) Grantees will have written selection procedures for procurement transactions. These procedures will ensure that all solicitations:

(i) Incorporate a clear and accurate description of the technical requirements for the material, product, or service to be procured. Such description shall not, in competitive procurements, contain features which unduly

restrict competition. The description may include a statement of the qualitative nature of the material, product or service to be procured, and when necessary, shall set forth those minimum essential characteristics and standards to which it must conform if it is to satisfy its intended use. Detailed product specifications should be avoided if at all possible. When it is impractical or uneconomical to make a clear and accurate description of the technical requirements, a "brand name or equal" description may be used as a means to define the performance or other salient requirements of a procurement. The specific features of the named brand which must be met by offerors shall be clearly stated; and

(ii) Identify all requirements which the offerors must fulfill and all other factors to be used in evaluating bids or proposals.

(4) Grantees and subgrantees will ensure that all prequalified lists of persons, firms, or products which are used in acquiring goods and services are current and include enough qualified sources to ensure maximum open and free competition. Also, grantees and subgrantees will not preclude potential bidders from qualifying during the solicitation period.

(d) *Methods of procurement to be followed*. (1) Procurement by *small purchase procedures*. Small purchase procedures are those relatively simple and informal procurement methods for securing services, supplies, or other property that do not cost more than the simplified acquisition threshold fixed at 41 U.S.C. 403(11) (currently set at \$100,000). If small purchase procedures are used, price or rate quotations shall be obtained from an adequate number of qualified sources.

(2) Procurement by *sealed bids* (formal advertising). Bids are publicly solicited and a firm-fixed-price contract (lump sum or unit price) is awarded to the responsible bidder whose bid, conforming with all the material terms and conditions of the invitation for bids, is the lowest in price. The sealed bid method is the preferred method for procuring construction, if the conditions in § 600.236(d)(2)(i) apply.

Department of Energy

§ 600.236

(i) In order for sealed bidding to be feasible, the following conditions should be present:

(A) A complete, adequate, and realistic specification or purchase description is available;

(B) Two or more responsible bidders are willing and able to compete effectively and for the business; and

(C) The procurement lends itself to a firm fixed price contract and the selection of the successful bidder can be made principally on the basis of price.

(ii) If sealed bids are used, the following requirements apply:

(A) The invitation for bids will be publicly advertised and bids shall be solicited from an adequate number of known suppliers, providing them sufficient time prior to the date set for opening the bids;

(B) The invitation for bids, which will include any specifications and pertinent attachments, shall define the items or services in order for the bidder to properly respond;

(C) All bids will be publicly opened at the time and place prescribed in the invitation for bids;

(D) A firm fixed-price contract award will be made in writing to the lowest responsive and responsible bidder. Where specified in bidding documents, factors such as discounts, transportation cost, and life cycle costs shall be considered in determining which bid is lowest. Payment discounts will only be used to determine the low bid when prior experience indicates that such discounts are usually taken advantage of; and

(E) Any or all bids may be rejected if there is a sound documented reason.

(3) Procurement by *competitive proposals*. The technique of competitive proposals is normally conducted with more than one source submitting an offer, and either a fixed-price or cost-reimbursement type contract is awarded. It is generally used when conditions are not appropriate for the use of sealed bids. If this method is used, the following requirements apply:

(i) Requests for proposals will be publicized and identify all evaluation factors and their relative importance. Any response to publicized requests for proposals shall be honored to the maximum extent practical;

(ii) Proposals will be solicited from an adequate number of qualified sources;

(iii) Grantees and subgrantees will have a method for conducting technical evaluations of the proposals received and for selecting awardees;

(iv) Awards will be made to the responsible firm whose proposal is most advantageous to the program, with price and other factors considered; and

(v) Grantees and subgrantees may use competitive proposal procedures for qualifications-based procurement of architectural/engineering (A/E) professional services whereby competitors' qualifications are evaluated and the most qualified competitor is selected, subject to negotiation of fair and reasonable compensation. The method, where price is not used as a selection factor, can only be used in procurement of A/E professional services. It cannot be used to purchase other types of services though A/E firms are a potential source to perform the proposed effort.

(4) Procurement by *noncompetitive proposals* is procurement through solicitation of a proposal from only one source, or after solicitation of a number of sources, competition is determined inadequate.

(i) Procurement by noncompetitive proposals may be used only when the award of a contract is infeasible under small purchase procedures, sealed bids or competitive proposals and one of the following circumstances applies:

(A) The item is available only from a single source;

(B) The public exigency or emergency for the requirement will not permit a delay resulting from competitive solicitation;

(C) The awarding agency authorizes noncompetitive proposals; or

(D) After solicitation of a number of sources, competition is determined inadequate.

(ii) Cost analysis, i.e., verifying the proposed cost data, the projections of the data, and the evaluation of the specific elements of costs and profits, is required.

(iii) Grantees and subgrantees may be required to submit the proposed procurement to the awarding agency for

pre-award review in accordance with paragraph (g) of this section.

(e) *Contracting with small and minority firms, women's business enterprise and labor surplus area firms.* (1) The grantee and subgrantee will take all necessary affirmative steps to assure that minority firms, women's business enterprises, and labor surplus area firms are used when possible.

(2) Affirmative steps shall include:

(i) Placing qualified small and minority businesses and women's business enterprises on solicitation lists;

(ii) Assuring that small and minority businesses, and women's business enterprises are solicited whenever they are potential sources;

(iii) Dividing total requirements, when economically feasible, into smaller tasks or quantities to permit maximum participation by small and minority business, and women's business enterprises;

(iv) Establishing delivery schedules, where the requirement permits, which encourage participation by small and minority business, and women's business enterprises;

(v) Using the services and assistance of the Small Business Administration, and the Minority Business Development Agency of the Department of Commerce; and

(vi) Requiring the prime contractor, if subcontracts are to be let, to take the affirmative steps listed in paragraphs (e)(2) (i) through (v) of this section.

(f) *Contract cost and price.* (1) Grantees and subgrantees must perform a cost or price analysis in connection with every procurement action including contract modifications. The method and degree of analysis is dependent on the facts surrounding the particular procurement situation, but as a starting point, grantees must make independent estimates before receiving bids or proposals. A cost analysis must be performed when the offeror is required to submit the elements of his estimated cost, e.g., under professional, consulting, and architectural engineering services contracts. A cost analysis will be necessary when adequate price competition is lacking, and for sole source procurements, including contract modifications or change orders,

unless price reasonableness can be established on the basis of a catalog or market price of a commercial product sold in substantial quantities to the general public or based on prices set by law or regulation. A price analysis will be used in all other instances to determine the reasonableness of the proposed contract price.

(2) Grantees and subgrantees will negotiate profit as a separate element of the price for each contract in which there is no price competition and in all cases where cost analysis is performed. To establish a fair and reasonable profit, consideration will be given to the complexity of the work to be performed, the risk borne by the contractor, the contractor's investment, the amount of subcontracting, the quality of its record of past performance, and industry profit rates in the surrounding geographical area for similar work.

(3) Costs or prices based on estimated costs for contracts under grants will be allowable only to the extent that costs incurred or cost estimates included in negotiated prices are consistent with Federal cost principles (see § 600.422). Grantees may reference their own cost principles that comply with the applicable Federal cost principles.

(4) The cost plus a percentage of cost and percentage of construction cost methods of contracting shall not be used.

(g) *Awarding agency review.* (1) Grantees and subgrantees must make available, upon request of the awarding agency, technical specifications on proposed procurements where the awarding agency believes such review is needed to ensure that the item and/or service specified is the one being proposed for purchase. This review generally will take place prior to the time the specification is incorporated into a solicitation document. However, if the grantee or subgrantee desires to have the review accomplished after a solicitation has been developed, the awarding agency may still review the specifications, with such review usually limited to the technical aspects of the proposed purchase.

(2) Grantees and subgrantees must on request make available for awarding agency pre-award review procurement

Department of Energy

§ 600.236

documents, such as requests for proposals or invitations for bids, independent cost estimates, etc. when:

(i) A grantee's or subgrantee's procurement procedures or operation fails to comply with the procurement standards in this section; or

(ii) The procurement is expected to exceed the simplified acquisition threshold and is to be awarded without competition or only one bid or offer is received in response to a solicitation; or

(iii) The procurement, which is expected to exceed the simplified acquisition threshold, specifies a "brand name" product; or

(iv) The proposed award is more than the simplified acquisition threshold and is to be awarded to other than the apparent low bidder under a sealed bid procurement; or

(v) A proposed contract modification changes the scope of a contract or increases the contract amount by more than the simplified acquisition threshold.

(3) A grantee or subgrantee will be exempt from the pre-award review in paragraph (g)(2) of this section if the awarding agency determines that its procurement systems comply with the standards of this section.

(i) A grantee or subgrantee may request that its procurement system be reviewed by the awarding agency to determine whether its system meets these standards in order for its system to be certified. Generally, these reviews shall occur where there is a continuous high-dollar funding, and third-party contracts are awarded on a regular basis.

(ii) A grantee or subgrantee may self-certify its procurement system. Such self-certification shall not limit the awarding agency's right to survey the system. Under a self-certification procedure, awarding agencies may wish to rely on written assurances from the grantee or subgrantee that it is complying with these standards. A grantee or subgrantee will cite specific procedures, regulations, standards, etc., as being in compliance with these requirements and have its system available for review.

(h) *Bonding requirements.* For construction or facility improvement con-

tracts or subcontracts exceeding the simplified acquisition threshold, the awarding agency may accept the bonding policy and requirements of the grantee or subgrantee provided the awarding agency has made a determination that the awarding agency's interest is adequately protected. If such a determination has not been made, the minimum requirements shall be as follows:

(1) *A bid guarantee from each bidder equivalent to five percent of the bid price.* The "bid guarantee" shall consist of a firm commitment such as a bid bond, certified check, or other negotiable instrument accompanying a bid as assurance that the bidder will, upon acceptance of his bid, execute such contractual documents as may be required within the time specified.

(2) *A performance bond on the part of the contractor for 100 percent of the contract price.* A "performance bond" is one executed in connection with a contract to secure fulfillment of all the contractor's obligations under such contract.

(3) *A payment bond on the part of the contractor for 100 percent of the contract price.* A "payment bond" is one executed in connection with a contract to assure payment as required by law of all persons supplying labor and material in the execution of the work provided for in the contract.

(i) *Contract provisions.* A grantee's and subgrantee's contracts must contain provisions in paragraph (i) of this section. Federal agencies are permitted to require changes, remedies, changed conditions, access and records retention, suspension of work, and other clauses approved by the Office of Federal Procurement Policy.

(1) Administrative, contractual, or legal remedies in instances where contractors violate or breach contract terms, and provide for such sanctions and penalties as may be appropriate. (Contracts more than the simplified acquisition threshold)

(2) Termination for cause and for convenience by the grantee or subgrantee including the manner by which it will be effected and the basis for settlement. (All contracts in excess of \$10,000)

§ 600.237

10 CFR Ch. II (1–1–16 Edition)

(3) Compliance with Executive Order 11246 of September 24, 1965, entitled “Equal Employment Opportunity,” as amended by Executive Order 11375 of October 13, 1967, and as supplemented in Department of Labor regulations (41 CFR chapter 60). (All construction contracts awarded in excess of \$10,000 by grantees and their contractors or subgrantees)

(4) Compliance with the Copeland “Anti-Kickback” Act (18 U.S.C. 874) as supplemented in Department of Labor regulations (29 CFR Part 3). (All contracts and subgrants for construction or repair)

(5) Compliance with the Davis-Bacon Act (40 U.S.C. 276a to 276a-7) as supplemented by Department of Labor regulations (29 CFR Part 5). (Construction contracts in excess of \$2000 awarded by grantees and subgrantees when required by Federal grant program legislation)

(6) Compliance with Sections 103 and 107 of the Contract Work Hours and Safety Standards Act (40 U.S.C. 327–330) as supplemented by Department of Labor regulations (29 CFR Part 5). (Construction contracts awarded by grantees and subgrantees in excess of \$2000, and in excess of \$2500 for other contracts which involve the employment of mechanics or laborers)

(7) Notice of awarding agency requirements and regulations pertaining to reporting.

(8) Notice of awarding agency requirements and regulations pertaining to patent rights with respect to any discovery or invention which arises or is developed in the course of or under such contract.

(9) Awarding agency requirements and regulations pertaining to copyrights and rights in data.

(10) Access by the grantee, the subgrantee, the Federal grantor agency, the Comptroller General of the United States, or any of their duly authorized representatives to any books, documents, papers, and records of the contractor which are directly pertinent to that specific contract for the purpose of making audit, examination, excerpts, and transcriptions.

(11) Retention of all required records for three years after grantees or sub-

grantees make final payments and all other pending matters are closed.

(12) Compliance with all applicable standards, orders, or requirements issued under section 306 of the Clean Air Act (42 U.S.C. 1857(h)), section 508 of the Clean Water Act (33 U.S.C. 1368), Executive Order 11738, and Environmental Protection Agency regulations (40 CFR part 15). (Contracts, subcontracts, and subgrants of amounts in excess of \$100,000).

(13) Mandatory standards and policies relating to energy efficiency which are contained in the state energy conservation plan issued in compliance with the Energy Policy and Conservation Act (Pub. L. 94-163, 89 Stat. 871).

[53 FR 8045, 8087, Mar. 11, 1988, as amended at 60 FR 19639, 19641, Apr. 19, 1995; 61 FR 7166, Feb. 26, 1996]

§ 600.237 Subgrants.

(a) *States.* States shall follow state law and procedures when awarding and administering subgrants (whether on a cost reimbursement or fixed amount basis) of financial assistance to local and Indian tribal governments. States shall:

(1) Ensure that every subgrant includes any clauses required by Federal statute and executive orders and their implementing regulations;

(2) Ensure that subgrantees are aware of requirements imposed upon them by Federal statute and regulation;

(3) Ensure that a provision for compliance with § 600.242 is placed in every cost reimbursement subgrant; and

(4) Conform any advances of grant funds to subgrantees substantially to the same standards of timing and amount that apply to cash advances by Federal agencies.

(b) *All other grantees.* All other grantees shall follow the provisions of this subpart which are applicable to awarding agencies when awarding and administering subgrants (whether on a cost reimbursement or fixed amount basis) of financial assistance to local and Indian tribal governments. Grantees shall:

(1) Ensure that every subgrant includes a provision for compliance with this subpart;

Department of Energy

§ 600.240

(2) Ensure that every subgrant includes any clauses required by Federal statute and executive orders and their implementing regulations; and

(3) Ensure that subgrantees are aware of requirements imposed upon them by Federal statutes and regulations.

(c) *Exceptions.* By their own terms, certain provisions of this subpart do not apply to the award and administration of subgrants:

(1) Section 600.210;

(2) Section 600.211;

(3) The letter-of-credit procedures specified in Treasury Regulations at 31 CFR part 205, cited in § 600.221; and

(4) Section 600.250.

[53 FR 8045, 8087, Mar. 11, 1988. Redesignated at 59 FR 53264, Oct. 21, 1994, as amended at 61 FR 7166, Feb. 26, 1996]

Reports, Records Retention, and Enforcement

§ 600.240 Monitoring and reporting program performance.

(a) *Monitoring by grantees.* Grantees are responsible for managing the day-to-day operations of grant and subgrant supported activities. Grantees must monitor grant and subgrant supported activities to assure compliance with applicable Federal requirements and that performance goals are being achieved. Grantee monitoring must cover each program, function or activity.

(b) *Nonconstruction performance reports.* The Federal agency may, if it decides that performance information available from subsequent applications contains sufficient information to meet its programmatic needs, require the grantee to submit a performance report only upon expiration or termination of grant support. Unless waived by the Federal agency this report will be due on the same date as the final Financial Status Report.

(1) Grantees shall submit annual performance reports unless the awarding agency requires quarterly or semi-annual reports. However, performance reports will not be required more frequently than quarterly. Annual reports shall be due 90 days after the grant year, quarterly or semi-annual reports shall be due 30 days after the reporting

period. The final performance report will be due 90 days after the expiration or termination of grant support. If a justified request is submitted by a grantee, the Federal agency may extend the due date for any performance report. Additionally, requirements for unnecessary performance reports may be waived by the Federal agency.

(2) Performance reports will contain, for each grant, brief information on the following:

(i) A comparison of actual accomplishments to the objectives established for the period. Where the output of the project can be quantified, a computation of the cost per unit of output may be required if that information will be useful.

(ii) The reasons for slippage if established objectives were not met.

(iii) Additional pertinent information including, when appropriate, analysis and explanation of cost overruns or high unit costs.

(3) Grantees will not be required to submit more than the original and two copies of performance reports.

(4) Grantees will adhere to the standards in this section in prescribing performance reporting requirements for subgrantees.

(c) *Construction performance reports.* For the most part, on-site technical inspections and certified percentage-of-completion data are relied on heavily by Federal agencies to monitor progress under construction grants and subgrants. The Federal agency will require additional formal performance reports only when considered necessary, and never more frequently than quarterly.

(d) *Significant developments.* Events may occur between the scheduled performance reporting dates which have significant impact upon the grant or subgrant supported activity. In such cases, the grantee must inform the Federal agency as soon as the following types of conditions become known:

(1) Problems, delays, or adverse conditions which will materially impair the ability to meet the objective of the award. This disclosure must include a statement of the action taken, or contemplated, and any assistance needed to resolve the situation.

§ 600.241

10 CFR Ch. II (1–1–16 Edition)

(2) Favorable developments which enable meeting time schedules and objectives sooner or at less cost than anticipated or producing more beneficial results than originally planned.

(e) Federal agencies may make site visits as warranted by program needs.

(f) *Waivers, extensions.* (1) Federal agencies may waive any performance report required by this part if not needed.

(2) The grantee may waive any performance report from a subgrantee when not needed. The grantee may extend the due date for any performance report from a subgrantee if the grantee will still be able to meet its performance reporting obligations to the Federal agency.

§ 600.241 Financial reporting.

(a) *General.* (1) Except as provided in paragraphs (a) (2) and (5) of this section, grantees will use only the forms specified in paragraphs (a) through (e) of this section, and such supplementary or other forms as may from time to time be authorized by OMB, for:

(i) Submitting financial reports to Federal agencies, or

(ii) Requesting advances or reimbursements when letters of credit are not used.

(2) Grantees need not apply the forms prescribed in this section in dealing with their subgrantees. However, grantees shall not impose more burdensome requirements on subgrantees.

(3) Grantees shall follow all applicable standard and supplemental Federal agency instructions approved by OMB to the extent required under the Paperwork Reduction Act of 1980 for use in connection with forms specified in paragraphs (b) through (e) of this section. Federal agencies may issue substantive supplementary instructions only with the approval of OMB. Federal agencies may shade out or instruct the grantee to disregard any line item that the Federal agency finds unnecessary for its decisionmaking purposes.

(4) Grantees will not be required to submit more than the original and two copies of forms required under this subpart.

(5) Federal agencies may provide computer outputs to grantees to expe-

dite or contribute to the accuracy of reporting. Federal agencies may accept the required information from grantees in machine usable format or computer printouts instead of prescribed forms.

(6) Federal agencies may waive any report required by this section if not needed.

(7) Federal agencies may extend the due date of any financial report upon receiving a justified request from a grantee.

(b) *Financial Status Report—(1) Form.* Grantees will use Standard Form 269 or 269A, Financial Status Report, to report the status of funds for all non-construction grants and for construction grants when required in accordance with § 600.241(e)(2)(iii).

(2) *Accounting basis.* Each grantee will report program outlays and program income on a cash or accrual basis as prescribed by the awarding agency. If the Federal agency requires accrual information and the grantee's accounting records are not normally kept on the accrual basis, the grantee shall not be required to convert its accounting system but shall develop such accrual information through and analysis of the documentation on hand.

(3) *Frequency.* The Federal agency may prescribe the frequency of the report for each project or program. However, the report will not be required more frequently than quarterly. If the Federal agency does not specify the frequency of the report, it will be submitted annually. A final report will be required upon expiration or termination of grant support.

(4) *Due date.* When reports are required on a quarterly or semiannual basis, they will be due 30 days after the reporting period. When required on an annual basis, they will be due 90 days after the grant year. Final reports will be due 90 days after the expiration or termination of grant support.

(c) *Federal Cash Transactions Report—(1) Form.* (i) For grants paid by letter or credit, Treasury check advances or electronic transfer of funds, the grantee will submit the Standard Form 272, Federal Cash Transactions Report, and when necessary, its continuation sheet, Standard Form 272a, unless the terms of the award exempt the grantee from this requirement.

Department of Energy

§ 600.242

(ii) These reports will be used by the Federal agency to monitor cash advanced to grantees and to obtain disbursement or outlay information for each grant from grantees. The format of the report may be adapted as appropriate when reporting is to be accomplished with the assistance of automatic data processing equipment provided that the information to be submitted is not changed in substance.

(2) *Forecasts of Federal cash requirements.* Forecasts of Federal cash requirements may be required in the "Remarks" section of the report.

(3) *Cash in hands of subgrantees.* When considered necessary and feasible by the Federal agency, grantees may be required to report the amount of cash advances in excess of three days' needs in the hands of their subgrantees or contractors and to provide short narrative explanations of actions taken by the grantee to reduce the excess balances.

(4) *Frequency and due date.* Grantees must submit the report no later than 15 working days following the end of each quarter. However, where an advance either by letter of credit or electronic transfer of funds is authorized at an annualized rate of one million dollars or more, the Federal agency may require the report to be submitted within 15 working days following the end of each month.

(d) *Request for advance or reimbursement—(1) Advance payments.* Requests for Treasury check advance payments will be submitted on Standard Form 270, Request for Advance or Reimbursement. (This form will not be used for drawdowns under a letter of credit, electronic funds transfer or when Treasury check advance payments are made to the grantee automatically on a predetermined basis.)

(2) *Reimbursements.* Requests for reimbursement under nonconstruction grants will also be submitted on Standard Form 270. (For reimbursement requests under construction grants, see paragraph (e)(1) of this section.)

(3) The frequency for submitting payment requests is treated in § 600.441(b)(3).

(e) *Outlay report and request for reimbursement for construction programs—(1) Grants that support construction activi-*

ties paid by reimbursement method. (i) Requests for reimbursement under construction grants will be submitted on Standard Form 271, Outlay Report and Request for Reimbursement for Construction Programs. Federal agencies may, however, prescribe the Request for Advance or Reimbursement form, specified in § 600.241(d), instead of this form.

(ii) The frequency for submitting reimbursement requests is treated in § 600.241(b)(3).

(2) *Grants that support construction activities paid by letter of credit, electronic funds transfer or Treasury check advance.* (i) When a construction grant is paid by letter of credit, electronic funds transfer or Treasury check advances, the grantee will report its outlays to the Federal agency using Standard Form 271, Outlay Report and Request for Reimbursement for Construction Programs. The Federal agency will provide any necessary special instruction. However, frequency and due date shall be governed by § 600.241(b)(3) and (4).

(ii) When a construction grant is paid by Treasury check advances based on periodic requests from the grantee, the advances will be requested on the form specified in § 600.241(d).

(iii) The Federal agency may substitute the Financial Status Report specified in § 600.241(b) for the Outlay Report and Request for Reimbursement for Construction Programs.

(3) *Accounting basis.* The accounting basis for the Outlay Report and Request for Reimbursement for Construction Programs shall be governed by § 600.241(b)(2).

[53 FR 8045, 8047, Mar. 11, 1988, as amended at 59 FR 53266, Oct. 21, 1994; 61 FR 7166, Feb. 26, 1996]

§ 600.242 Retention and access requirements for records.

(a) *Applicability.* (1) This section applies to all financial and programmatic records, supporting documents, statistical records, and other records of grantees or subgrantees which are:

(i) Required to be maintained by the terms of this subpart, program regulations or the grant agreement, or

(ii) Otherwise reasonably considered as pertinent to program regulations or the grant agreement.

(2) This section does not apply to records maintained by contractors or subcontractors. For a requirement to place a provision concerning records in certain kinds of contracts, see § 600.436(i)(10).

(b) *Length of retention period.* (1) Except as otherwise provided, records must be retained for three years from the starting date specified in paragraph (c) of this section.

(2) If any litigation, claim, negotiation, audit or other action involving the records has been started before the expiration of the 3-year period, the records must be retained until completion of the action and resolution of all issues which arise from it, or until the end of the regular 3-year period, whichever is later.

(3) To avoid duplicate recordkeeping, awarding agencies may make special arrangements with grantees and subgrantees to retain any records which are continuously needed for joint use. The awarding agency will request transfer of records to its custody when it determines that the records possess long-term retention value. When the records are transferred to or maintained by the Federal agency, the 3-year retention requirement is not applicable to the grantee or subgrantee.

(c) *Starting date of retention period* (1) *General.* When grant support is continued or renewed at annual or other intervals, the retention period for the records of each funding period starts on the day the grantee or subgrantee submits to the awarding agency its single or last expenditure report for that period. However, if grant support is continued or renewed quarterly, the retention period for each year's records starts on the day the grantee submits its expenditure report for the last quarter of the Federal fiscal year. In all other cases, the retention period starts on the day the grantee submits its final expenditure report. If an expenditure report has been waived, the retention period starts on the day the report would have been due.

(2) *Real property and equipment records.* The retention period for real property and equipment records starts

from the date of the disposition or replacement or transfer at the direction of the awarding agency.

(3) *Records for income transactions after grant or subgrant support.* In some cases grantees must report income after the period of grant support. Where there is such a requirement, the retention period for the records pertaining to the earning of the income starts from the end of the grantee's fiscal year in which the income is earned.

(4) *Indirect cost rate proposals, cost allocations plans, etc.* This paragraph applies to the following types of documents, and their supporting records: indirect cost rate computations or proposals, cost allocation plans, and any similar accounting computations of the rate at which a particular group of costs is chargeable (such as computer usage chargeback rates or composite fringe benefit rates).

(i) *If submitted for negotiation.* If the proposal, plan, or other computation is required to be submitted to the Federal Government (or to the grantee) to form the basis for negotiation of the rate, then the 3-year retention period for its supporting records starts from the date of such submission.

(ii) *If not submitted for negotiation.* If the proposal, plan, or other computation is not required to be submitted to the Federal Government (or to the grantee) for negotiation purposes, then the 3-year retention period for the proposal plan, or computation and its supporting records starts from end of the fiscal year (or other accounting period) covered by the proposal, plan, or other computation.

(d) *Substitution of microfilm.* Copies made by microfilming, photocopying, or similar methods may be substituted for the original records.

(e) *Access to records—(1) Records of grantees and subgrantees.* The awarding agency and the Comptroller General of the United States, or any of their authorized representatives, shall have the right of access to any pertinent books, documents, papers, or other records of grantees and subgrantees which are pertinent to the grant, in order to make audits, examinations, excerpts, and transcripts.

(2) *Expiration of right of access.* The rights of access in this section must

Department of Energy

§ 600.244

not be limited to the required retention period but shall last as long as the records are retained.

(f) *Restrictions on public access.* The Federal Freedom of Information Act (5 U.S.C. 552) does not apply to records unless required by Federal, State, or local law, grantees and subgrantees are not required to permit public access to their records.

§ 600.243 Enforcement.

(a) *Remedies for noncompliance.* If a grantee or subgrantee materially fails to comply with any term of an award, whether stated in a Federal statute or regulation, an assurance, in a State plan or application, a notice of award, or elsewhere, the awarding agency may take one or more of the following actions, as appropriate in the circumstances:

(1) Temporarily withhold cash payments pending correction of the deficiency by the grantee or subgrantee or more severe enforcement action by the awarding agency,

(2) Disallow (that is, deny both use of funds and matching credit for) all or part of the cost of the activity or action not in compliance,

(3) Wholly or partly suspend or terminate the current award for the grantee's or subgrantee's program,

(4) Withhold further awards for the program, or

(5) Take other remedies that may be legally available.

(b) *Hearings, appeals.* In taking an enforcement action, the awarding agency will provide the grantee or subgrantee an opportunity for such hearing, appeal, or other administrative proceeding to which the grantee or subgrantee is entitled under any statute or regulation applicable to the action involved.

(c) *Effects of suspension and termination.* Costs of grantee or subgrantee resulting from obligations incurred by the grantee or subgrantee during a suspension or after termination of an award are not allowable unless the awarding agency expressly authorizes them in the notice of suspension or termination or subsequently. Other grantee or subgrantee costs during suspension or after termination which are

necessary and not reasonably avoidable are allowable if:

(1) The costs result from obligations which were properly incurred by the grantee or subgrantee before the effective date of suspension or termination, are not in anticipation of it, and, in the case of a termination, are noncancellable, and,

(2) The costs would be allowable if the award were not suspended or expired normally at the end of the funding period in which the termination takes effect.

(d) *Relationship to debarment and suspension.* The enforcement remedies identified in this section, including suspension and termination, do not preclude grantee or subgrantee from being subject to "Debarment and Suspension" under E.O. 12549 (see § 600.235).

[53 FR 8045, 8087, Mar. 11, 1988. Redesignated at 59 FR 53264, Oct. 21, 1994, as amended at 61 FR 7166, Feb. 26, 1996]

§ 600.244 Termination for convenience.

Except as provided in § 600.443 awards may be terminated in whole or in part only as follows:

(a) By the awarding agency with the consent of the grantee or subgrantee in which case the two parties shall agree upon the termination conditions, including the effective date and in the case of partial termination, the portion to be terminated, or

(b) By the grantee or subgrantee upon written notification to the awarding agency, setting forth the reasons for such termination, the effective date, and in the case of partial termination, the portion to be terminated. However, if, in the case of a partial termination, the awarding agency determines that the remaining portion of the award will not accomplish the purposes for which the award was made, the awarding agency may terminate the award in its entirety under either § 600.243 or paragraph (a) of this section.

[53 FR 8045, 8087, Mar. 11, 1988. Redesignated at 59 FR 53264, Oct. 21, 1994, as amended at 61 FR 7166, Feb. 26, 1996]

§ 600.250

After-the-Grant Requirements

§ 600.250 Closeout.

(a) *General.* The Federal agency will close out the award when it determines that all applicable administrative actions and all required work of the grant has been completed.

(b) *Reports.* Within 90 days after the expiration or termination of the grant, the grantee must submit all financial, performance, and other reports required as a condition of the grant. Upon request by the grantee, Federal agencies may extend this timeframe. These may include but are not limited to:

(1) *Final performance or progress report.*

(2) *Financial Status Report (SF 269) or Outlay Report and Request for Reimbursement for Construction Programs (SF-271) (as applicable).*

(3) *Final request for payment (SF-270) (if applicable).*

(4) *Invention disclosure (if applicable).*

(5) *Federally-owned property report:*

In accordance with § 600.232(f), a grantee must submit an inventory of all federally owned property (as distinct from property acquired with grant funds) for which it is accountable and request disposition instructions from the Federal agency of property no longer needed.

(c) *Cost adjustment.* The Federal agency will, within 90 days after receipt of reports in paragraph (b) of this section, make upward or downward adjustments to the allowable costs.

(d) *Cash adjustments.* (1) The Federal agency will make prompt payment to the grantee for allowable reimbursable costs.

(2) The grantee must immediately refund to the Federal agency any balance of unobligated (unencumbered) cash advanced that is not authorized to be retained for use on other grants.

[53 FR 8045, 8087, Mar. 11, 1988. Redesignated at 59 FR 53264, Oct. 21, 1994, as amended at 61 FR 7166, Feb. 26, 1996]

§ 600.251 Later disallowances and adjustments.

The closeout of a grant does not affect:

(a) The Federal agency's right to disallow costs and recover funds on the basis of a later audit or other review;

10 CFR Ch. II (1–1–16 Edition)

(b) The grantee's obligation to return any funds due as a result of later refunds, corrections, or other transactions;

(c) Records retention as required in § 600.242;

(d) Property management requirements in §§ 600.231 and 600.232; and

(e) Audit requirements in § 600.226.

[53 FR 8045, 8087, Mar. 11, 1988. Redesignated at 59 FR 53264, Oct. 21, 1994, as amended at 61 FR 7166, Feb. 26, 1996]

§ 600.252 Collection of amounts due.

(a) Any funds paid to a grantee in excess of the amount to which the grantee is finally determined to be entitled under the terms of the award constitute a debt to the Federal Government. If not paid within a reasonable period after demand, the Federal agency may reduce the debt by:

(1) Making an administrative offset against other requests for reimbursements,

(2) Withholding advance payments otherwise due to the grantee, or

(3) Other action permitted by law.

(b) Except where otherwise provided by statutes or regulations, the Federal agency will charge interest on an overdue debt in accordance with the Federal Claims Collection Standards (4 CFR Ch. II). The date from which interest is computed is not extended by litigation or the filing of any form of appeal.

Entitlements [Reserved]

Subpart D—Administrative Requirements for Grants and Cooperative Agreements With For-Profit Organizations

SOURCE: 68 FR 50650, Aug. 21, 2003, unless otherwise noted.

GENERAL

§ 600.301 Purpose.

(a) This subpart prescribes administrative requirements for awards to for-profit organizations.

(b) Applicability to prime awards and subawards is as follows:

(1) *Prime awards:* DOE contracting officers must apply the provisions of this

part to awards to for-profit organizations. Contracting officers must not impose requirements that are in addition to, or inconsistent with, the requirements provided in this part, except:

(i) In accordance with the deviation procedures or special award conditions in § 600.303 or § 600.304, respectively; or

(ii) As required by Federal statute, Executive order, or Federal regulation implementing a statute or Executive order.

(2) *Subawards.* (i) Any legal entity (including any State, local government, university or other nonprofit organization, as well as any for-profit entity) that receives an award from DOE must apply the provisions of this part to subawards with for-profit organizations.

(ii) For-profit organizations that receive prime awards covered by this part must apply to each subaward the administrative requirements that are applicable to the particular type of subrecipient (*e.g.*, 10 CFR part 600, subpart B, contains requirements for institutions of higher education, hospitals, or other nonprofit organizations and 10 CFR part 600, subpart C, specifies requirements for subrecipients that are States or local governments).

§ 600.302 Definitions.

In addition to the definitions used in subpart A of this part, the following are definitions of terms as used in this subpart:

Advance means a payment made by Treasury check or other appropriate payment mechanism to a recipient upon its request either before outlays are made by the recipient or through the use of predetermined payment schedules.

Applied research means efforts that seek to determine and exploit the potential of scientific discoveries or improvements in technology, and is directed toward the development of new materials, devices, methods, and processes.

Basic research means efforts directed solely toward increasing knowledge or understanding in science and engineering.

Cash contributions means the recipient's cash outlay, including the outlay

of money contributed to the recipient by third parties.

Closeout means the process by which DOE determines that all applicable administrative actions and all required work of the award have been completed by the recipient and DOE.

Cost sharing or matching means that portion of project or program costs not borne by the Federal Government.

Demonstration means a project designed to determine the technical feasibility and economic potential of a technology on either a pilot plant or a prototype scale.

Development means efforts to create or advance new technology or demonstrate the viability of applying existing technology to new products and processes.

Disallowed costs means those charges to an award that the DOE contracting officer determines to be unallowable, in accordance with the applicable Federal cost principles or other terms and conditions contained in the award.

DOE means the Department of Energy, including the National Nuclear Security Administration (NNSA).

Equipment means tangible, non-expendable personal property charged directly to the award having a useful life of more than one year and an acquisition cost of \$5,000 or more per unit.

Excess property means property under the control of any DOE Headquarters or field office that, as determined by the head thereof, is no longer required for its needs or the discharge of its responsibilities.

Federal funds authorized: means the total amount of Federal funds obligated by the Federal Government for use by the recipient. This amount may include any authorized carryover of unobligated funds from prior funding periods.

Federally owned property means property in the possession of, or directly acquired by, the Government and subsequently made available to the recipient.

Funding period means the period of time when Federal funding is available for obligation by the recipient.

Incremental funding means a method of funding a grant or cooperative

agreement where the funds initially obligated to the award are less than the total amount of the award, and DOE anticipates making additional obligations of funds when appropriated funds become available.

Obligations means the amount of orders placed, contracts and grants awarded, services received and similar transactions during a given period that require payment by the recipient during the same or a future period.

Outlays or expenditures means charges made to the project or program. They may be reported on cash or accrual basis. For reports prepared on a cash basis, outlays are the sum of cash disbursements for direct charges for goods and services, the amount of indirect expense charged, the value of third party in-kind contributions applied, and the amount of cash advances and payments made to subrecipients. For reports prepared on an accrual basis, outlays are the sum of cash disbursements for direct charges for goods and services, the amount of indirect expense incurred, the value of in-kind contributions applied, and the net increase (or decrease) in the amounts owed by the recipient for goods and other property received, for services performed by employees, contractors, subrecipients and other payees, and for other amounts becoming owed under programs for which no current services or performance are required.

Personal property means property of any kind except real property. It may be:

- (1) Tangible, having physical existence (*i.e.*, equipment and supplies); or
- (2) Intangible, having no physical existence, such as patents, copyrights, data, and software.

Prior approval means written or electronic approval by an authorized official evidencing prior consent.

Program income means gross income earned by the recipient that is directly generated by a supported activity or earned as a result of the award. Program income includes, but is not limited to, income from fees for services performed, the use or rental of real or personal property acquired under federally-funded projects, the sale of commodities or items fabricated under an award, license fees and royalties on patents and copyrights, and interest on

loans made with award funds. Interest earned on advances of Federal funds is not program income. Except as otherwise provided in program regulations or the terms and conditions of the award, program income does not include the receipt of principal on loans, rebates, credits, discounts, etc., or interest earned on any of them.

Project costs means all allowable costs, as set forth in the applicable Federal cost principles, incurred by a recipient and the value of the contributions made by third parties in accomplishing the objectives of the award during the project period.

Property means real property and personal property (equipment, supplies, and intellectual property), unless otherwise stated.

Real property means land, including land improvements, structures and appurtenances thereto, but excludes movable machinery and equipment.

Small award means an award not exceeding the simplified acquisition threshold fixed at 41 U.S.C. 403(11) (currently \$100,000).

Small business concern means a small business as defined at section 2 of Pub. L. 85-536 (16 U.S.C. 632) and the implementing regulations of the Administrator of the Small Business Administration. The criteria and size standards for small business concerns are contained in 13 CFR part 121.

Subaward means financial assistance in the form of money, or property in lieu of money, provided under an award by a recipient to an eligible subrecipient or by a subrecipient to a lower tier subrecipient. The term includes financial assistance when provided by any legal agreement, even if the agreement is called a contract, but the term does not include procurement of goods and services or any form of assistance which is not included in the definition of “award” in this part.

Subrecipient means the legal entity to which a subaward is made and which is accountable to the recipient for the use of the funds or property provided.

Supplies means tangible, expendable personal property that is charged directly to the award and that has a useful life of less than one year or an acquisition cost of less than \$5,000 per unit.

Suspension means an action by DOE that temporarily withdraws Federal sponsorship under an award, pending corrective action by the recipient or pending a decision to terminate the award by DOE. Suspension of an award is a separate action from suspension of a recipient under 10 CFR part 1036.

Termination means the cancellation of an award, in whole or in part, under an agreement at any time prior to either:

- (1) The date on which all work under an award is completed; or
- (2) The date on which Federal sponsorship ends, as provided in the award document or any supplement or amendment thereto.

Third party in-kind contributions means the value of non-cash contributions provided by non-Federal third parties. Third party in-kind contributions may be in the form of real property, equipment, supplies and other expendable property, and the value of goods and services directly benefiting and specifically identifiable to the project or program.

Unobligated balance means the portion of the funds authorized by DOE that has not been obligated by the recipient and is determined by deducting the cumulative obligations from the cumulative funds authorized.

§ 600.303 Deviations.

(a) *Individual deviations.* Individual deviations affecting only one award are subject to the procedures stated in 10 CFR 600.4

(b) *Class deviations.* Class deviations affecting more than one financial assistance transaction are subject to the procedures states in 10 CFR 600.4.

§ 600.304 Special award conditions.

(a) Contracting officers may impose additional requirements as needed, over and above those provided in this subpart, if an applicant or recipient:

- (1) Has a history of poor performance;
- (2) Is not financially stable;
- (3) Has a management system that does not meet the standards prescribed in this subpart;
- (4) Has not conformed to the terms and conditions of a previous award; or
- (5) Is not otherwise responsible.

(b) Before imposing additional requirements, DOE must notify the applicant or recipient in writing as to:

- (1) The nature of the additional requirements;
- (2) The reason why the additional requirements are being imposed;
- (3) The nature of the corrective action needed;
- (4) The time allowed for completing the corrective actions; and
- (5) The method for requesting reconsideration of the additional requirements imposed.

(c) The contracting officer must remove any special conditions if the circumstances that prompted them have been corrected.

§ 600.305 Debarment and suspension.

Recipients must comply with the nonprocurement debarment and suspension common rule implemented in 2 CFR 180 and 901. This common rule restricts subawards and contracts with certain parties that are debarred, suspended, or otherwise excluded from or ineligible for participation in Federal assistance programs or activities.

[68 FR 50650, Aug. 21, 2003, as amended at 74 FR 44278, Aug. 28, 2009]

§ 600.306 Metric system of measurement.

(a) The Metric Conversion Act of 1975, as amended by the Omnibus Trade and Competitiveness Act of 1988 (15 U.S.C. 205) and implemented by Executive Order 12770, states that:

(1) The metric system is the preferred measurement system for U.S. trade and commerce.

(2) The metric system of measurement will be used, to the extent economically feasible, in Federal agencies' procurements, grants, and other business-related activities.

(3) Metric implementation is not required if such use is likely to cause significant inefficiencies or loss of markets to United States firms.

(b) Recipients are encouraged to use the metric system to the maximum extent practicable in measurement-sensitive activities and in measurement-sensitive outputs resulting from DOE funded programs.

§ 600.310

10 CFR Ch. II (1–1–16 Edition)

POST-AWARD REQUIREMENTS

Financial and Program Management

§ 600.310 Purpose of financial and program management.

Sections 600.311 through 600.318 prescribe standards for financial management systems; methods for making payments; and rules for cost sharing and matching, program income, revisions to budgets and program plans, audits, allowable costs, and fee and profit.

§ 600.311 Standards for financial management systems.

(a) Recipients are encouraged to use existing financial management systems to the extent that the systems comply with Generally Accepted Accounting Principles (GAAP) and the minimum standards in this section. At a minimum, a recipient's financial management system must provide:

(1) Effective control of all funds. Control systems must be adequate to ensure that costs charged to Federal funds and those counted as the recipient's cost share or match are consistent with requirements for cost reasonableness, allowability, and allocability in the applicable cost principles (see § 600.317) and in the terms and conditions of the award.

(2) Accurate, current and complete records that document, for each project funded wholly or in part with Federal funds, the source and application of the Federal funds and the recipient's required cost share or match. These records must:

(i) Contain information about receipts, authorizations, assets, expenditures, program income, and interest.

(ii) Be adequate to make comparisons of outlays with amounts budgeted for each award (as required for programmatic and financial reporting under § 600.341). Where appropriate, financial information should be related to performance and unit cost data.

(3) To the extent that advance payments are authorized under § 600.312, procedures that minimize the time elapsing between the transfer of funds to the recipient from the Government and the recipient's disbursement of the funds for program purposes.

(4) A system to support charges to Federal awards for salaries and wages, whether treated as direct or indirect costs. If employees work on multiple activities or cost objectives, a distribution of their salaries and wages must be supported by personnel activity reports which:

(i) Reflect an after the fact distribution of the actual activity of each employee.

(ii) Account for the total activity for which each employee is compensated.

(iii) Are prepared at least monthly, and coincide with one or more pay periods.

(b) If the Federal Government guarantees or insures the repayment of money borrowed by the recipient, DOE, at its discretion, may require adequate bonding and insurance if the bonding and insurance requirements of the recipient are not deemed adequate to protect the interest of the Federal Government.

(c) DOE may require adequate fidelity bond coverage if the recipient lacks sufficient coverage to protect the Federal Government's interest.

(d) If bonds are required in the situations described in paragraphs (b) and (c) of this section, the bonds must be obtained from companies holding certificates of authority as acceptable sureties, as prescribed in 31 CFR part 223, "Surety Companies Doing Business with the United States."

§ 600.312 Payment.

(a) *Methods available.* Payment methods for awards with for-profit organizations are:

(1) *Reimbursement.* Under this method, the recipient requests reimbursement for costs incurred during a particular time period. In cases where the recipient submits requests for payment to the contracting officer, the DOE payment office reimburses the recipient by electronic funds transfer after approval of the request by the designated contracting officer.

(2) *Advance payments.* Under this method, DOE makes a payment to a recipient based upon projections of the recipient's cash needs. The payment generally is made upon the recipient's request, although predetermined payment schedules may be used when the

timing of the recipient's needs to disburse funds can be predicted in advance with sufficient accuracy to ensure compliance with paragraph (b)(2)(iii) of this section.

(b) *Selecting a method.* (1) The preferred payment method is the reimbursement method, as described in paragraph (a)(1) of this section.

(2) Advance payments, as described in paragraph (a)(2) of this section, may be used in exceptional circumstances, subject to the following conditions:

(i) The contracting officer, in consultation with the program official, determines in writing that advance payments are necessary or will materially contribute to the probability of success of the project contemplated under the award (*e.g.*, as startup funds for a project performed by a newly formed company).

(ii) Cash advances must be limited to the minimum amounts needed to carry out the program.

(iii) Recipients and DOE must maintain procedures to ensure that the timing of cash advances is as close as is administratively feasible to the recipients' disbursements of the funds for program purposes, including direct program or project costs and the proportionate share of any allowable indirect costs.

(iv) Recipients must maintain advance payments of Federal funds in interest-bearing accounts, and remit annually the interest earned to the contracting officer for return to the Department of Treasury's miscellaneous receipts account, unless one of the following applies:

(A) The recipient receives less than \$120,000 in Federal awards per year.

(B) The best reasonably available interest bearing account would not be expected to earn interest in excess of \$250 per year on Federal cash balances.

(C) The depository would require an average or minimum balance so high that establishing an interest bearing account would not be feasible, given the expected Federal and non-Federal cash resources.

(c) *Frequency of payments.* For either reimbursements or advance payments, recipients may submit requests for payment monthly, or more often if authorized by the contracting officer.

(d) *Forms for requesting payment.* DOE may authorize recipients to use the SF-270, "Request for Advance or Reimbursement;" the SF-271, "Outlay Report and Request for Reimbursement for Construction Programs;" or prescribe other forms or formats as necessary.

(e) *Timeliness of payments.* Payments normally will be made within 30 calendar days of the receipt of a recipient's request for reimbursement or advance by the office designated to receive the request, unless the billing is improper.

(f) *Precedence of other available funds.* Recipients must disburse funds available from program income, rebates, refunds, contract settlements, audit recoveries, credits, discounts, and interest earned on such funds before requesting additional cash payments.

(g) *Withholding of payments.* Unless otherwise required by statute, contracting officers may not withhold payments for proper charges made by recipients during the project period for reasons other than the following:

(1) A recipient failed to comply with project objectives, the terms and conditions of the award, or Federal reporting requirements, in which case the contracting officer may suspend payments in accordance with § 600.352.

(2) The recipient is delinquent on a debt to the United States (*see* definitions of "debt" and "delinquent debt" in 32 CFR 22.105). In that case, the contracting officer may, upon reasonable notice, withhold payments to the recipient until the debt owed is resolved.

§ 600.313 Cost sharing or matching.

(a) *Acceptable contributions.* All contributions, including cash contributions and third party in-kind contributions, must be accepted as part of the recipient's cost sharing or matching if such contributions meet all of the following criteria:

(1) They are verifiable from the recipient's records.

(2) They are not included as contributions for any other federally-assisted project or program.

(3) They are necessary and reasonable for proper and efficient accomplishment of project or program objectives.

(4) They are allowable under § 600.317.

§ 600.313

10 CFR Ch. II (1–1–16 Edition)

(5) They are not paid by the Federal Government under another award unless authorized by Federal statute to be used for cost sharing or matching.

(6) They are provided for in the approved budget.

(7) They conform to other provisions of this part, as applicable.

(b) *Valuing and documenting contributions*—(1) *Valuing recipient's property or services of recipient's employees.* Values are established in accordance with the applicable cost principles in § 600.317, which means that amounts chargeable to the project are determined on the basis of costs incurred. For real property or equipment used on the project, the cost principles authorize depreciation or use charges. The full value of the item may be applied when the item will be consumed in the performance of the award or fully depreciated by the end of the award. In cases where the full value of a donated capital asset is to be applied as cost sharing or matching, that full value must be the lesser or the following:

(i) The certified value of the remaining life of the property recorded in the recipient's accounting records at the time of donation; or

(ii) The current fair market value. If there is sufficient justification, the contracting officer may approve the use of the current fair market value of the donated property, even if it exceeds the certified value at the time of donation to the project. The contracting officer may accept the use of any reasonable basis for determining the fair market value of the property.

(2) *Valuing services of others' employees.* If an employer other than the recipient furnishes the services of an employee, those services are valued at the employee's regular rate of pay plus an amount of fringe benefits and overhead (at an overhead rate appropriate for the location where the services are performed), provided these services are in the same skill for which the employee is normally paid.

(3) *Valuing volunteer services.* Volunteer services furnished by professional and technical personnel, consultants, and other skilled and unskilled labor may be counted as cost sharing or matching if the service is an integral and necessary part of an approved

project or program. Rates for volunteer services must be consistent with those paid for similar work in the recipient's organization. In those markets in which the required skills are not found in the recipient organization, rates must be consistent with those paid for similar work in the labor market in which the recipient competes for the kind of services involved. In either case, paid fringe benefits that are reasonable, allowable, and allocable may be included in the valuation.

(4) *Valuing property donated by third parties.* (i) Donated supplies may include such items as office supplies or laboratory supplies. Value assessed to donated supplies included in the cost sharing or matching share must be reasonable and must not exceed the fair market value of the property at the time of the donation.

(ii) Normally only depreciation or use charges for equipment and buildings may be applied. However, the fair rental charges for land and the full value of equipment or other capital assets may be allowed, when they will be consumed in the performance of the award or fully depreciated by the end of the award, provided that the contracting officer has approved the charges. When use charges are applied, values must be determined in accordance with the usual accounting policies of the recipient, with the following qualifications:

(A) The value of donated space must not exceed the fair rental value of comparable space as established by an independent appraisal of comparable space and facilities in a privately-owned building in the same locality.

(B) The value of loaned equipment must not exceed its fair rental value.

(5) *Documentation.* The following requirements pertain to the recipient's supporting records for in-kind contributions from third parties:

(i) Volunteer services must be documented and, to the extent feasible, supported by the same methods used by the recipient for its own employees.

(ii) The basis for determining the valuation for personal services and property must be documented.

Department of Energy

§ 600.315

§ 600.314 Program income.

(a) DOE must apply the standards in this section to the disposition of program income from projects financed in whole or in part with Federal funds.

(b) Unless program regulations or the terms and conditions of the award provide otherwise, recipients, without any further accounting to DOE, may retain program income earned:

(1) From license fees and royalties for copyrighted material, patents, patent applications, trademarks, and inventions produced under an award.

(2) After the end of the project period.

(c) Unless program regulations or the terms and conditions of the award provide otherwise, costs incident to the generation of program income for which there is some obligation to the Government may be deducted from gross income to determine program income, provided these costs have not been charged to the award.

(d) Other than any program income excluded pursuant to paragraph (b) and (c) of this section, program income earned during the project period must be retained by the recipient and used in one or more of the following ways, as specified in program regulations or the terms and conditions of the award:

(1) Added to funds committed to the project by DOE and recipient and used to further eligible project or program objectives.

(2) Used to finance the non-Federal share of the project or program.

(3) Deducted from the total project or program allowable cost in determining the net allowable costs on which the Federal share of costs is based.

(e) If the program regulation or terms and conditions of an award authorize the disposition of program income as described in paragraph (d)(1) or (d)(2) of this section, and stipulate a limit on the amounts that may be used in those ways, program income in excess of the stipulated limits must be used in accordance with paragraph (d)(3) of this section.

(f) In the event that the program regulation or terms and conditions of the award do not specify how program income is to be used, paragraph (d)(3) of this section applies automatically to all projects or programs except re-

search. For awards that support basic or applied research, paragraph (d)(1) of this section applies automatically unless the terms and conditions specify another alternative or the recipient is subject to special award conditions, as indicated in § 600.304.

(g) Proceeds from the sale of property that is acquired, rather than fabricated, under an award are not program income and must be handled in accordance with the requirements of §§ 600.320 through 600.325 of this part.

§ 600.315 Revision of budget and program plans.

(a) The budget plan is the financial expression of the project or program as approved during the award process. It includes the sum of the Federal and non-Federal shares when there are cost sharing requirements. The budget plan must be related to performance for program evaluation purposes, whenever appropriate.

(b) The recipient must obtain the contracting officer's prior approval if a revision is necessary for either of the following two reasons:

(1) A change in the scope or the objective of the project or program (even if there is no associated budget revision requiring prior written approval).

(2) A need for additional Federal funding.

(c) The recipient must obtain the contracting officer's prior approval if a revision is necessary for any of the following six reasons, unless the requirement for prior approval is specifically waived in the program regulation or terms and conditions of the award:

(1) A change in the approved project director, principal investigator, or other key person specified in the application or award document.

(2) The absence for more than three months, or a 25 percent reduction in time devoted to the project, by the approved project director or principal investigator.

(3) The inclusion of any additional costs that require prior approval in accordance with the applicable costs principles for Federal funds and the requirements applicable to the recipient's cost share or match, as provided in § 600.313 and § 600.317, respectively.

§ 600.316

(4) The inclusion of pre-award costs for periods greater than the 90 calendar days immediately preceding the effective date of the award.

(5) A “no-cost” extension of the project period.

(6) Any subaward, transfer, or contracting out of substantive program performance under an award, unless described in the application and funded in the approved awards.

(d) If specifically required in the program regulation or the terms and conditions of the award, the recipient must obtain the contracting officer's prior approval for the following revisions:

(1) The transfer of funds among direct cost categories, functions, and activities for awards in which the Federal share of the project exceeds \$100,000 and the cumulative amount of such transfers exceeds or is expected to exceed 10 percent of the total budget as last approved by DOE.

(2) For awards that provide support for both construction and nonconstruction work, any fund or budget transfers between the two types of work supported.

(e) Within 30 calendar days from the date of receipt of the recipient's request for budget revisions, the contracting officer must review the request and notify the recipient whether the budget revisions have been approved. If the revision is still under consideration at the end of 30 calendar days, the contracting officer must inform the recipient in writing of the date when the recipient may expect the decision.

§ 600.316 Audits.

(a) Any recipient that expends \$500,000 or more in a year under Federal awards must have an audit made for that year by an independent auditor, in accordance with paragraph (b) of this section. If a recipient is currently performing under a Federal award that requires an audit by its Federal cognizant agency, that auditor must perform the independent audit. The audit generally should be made a part of the regularly scheduled, annual audit of the recipient's financial statements. However, it may be more economical in some cases to have Federal

10 CFR Ch. II (1–1–16 Edition)

awards separately audited, and a recipient may elect to do so, unless that option is precluded by award terms and conditions or by Federal laws or regulations applicable to the program(s) under which the awards were made.

(b) The auditor must determine and report on whether:

(1) The recipient has an internal control structure that provides reasonable assurance that it is managing Federal awards in compliance with Federal laws and regulations and the terms and conditions of the awards.

(2) Based on a sampling of Federal award expenditures, the recipient has complied with laws, regulations, and award terms that may have a direct and material effect on Federal awards.

(c) The recipient must make the auditor's report available to the DOE contracting officers whose awards are affected.

(d) Before requesting an audit in addition to the independent audit, the contracting officer must:

(1) Consider whether the independent audit satisfies his or her requirements;

(2) Limit the scope of such additional audit to areas not adequately addressed by the independent audit; and

(3) If DOE is not the Federal agency with the predominant fiscal interest in the recipient, coordinate with the agency that has the predominant fiscal interest.

(e) The recipient and its Federal cognizant agency for audit should develop a coordinated audit approach to minimize duplication of audit work.

(f) Audit costs (including a reasonable allocation of the costs of the audit of the recipient's financial statement, based on the relative benefit to the Government and the recipient) are allowable costs of DOE awards.

§ 600.317 Allowable costs.

(a) DOE determines allowability of costs in accordance with the cost principles applicable to the type of entity incurring the cost as follows:

(1) *For-profit organizations.* Allowability of costs incurred by for-profit organizations and those nonprofit organizations listed in Attachment C to OMB Circular A-122 is determined in accordance with the for-profit costs

Department of Energy

§ 600.321

principles in 48 CFR part 31 in the Federal Acquisition Regulation, except that patent prosecution costs are not allowable unless specifically authorized in the award document.

(2) *Other types of organizations.* Allowability of costs incurred by other types of organizations that may be subrecipients under a prime award to a for-profit organization is determined as follows:

(i) *Institutions of higher education.* Allowability is determined in accordance with OMB Circular A-21, "Cost Principles for Educational Institutions."

(ii) *Other nonprofit organizations.* Allowability is determined in accordance with OMB Circular A-122, "Cost Principles for Nonprofit Organizations."

(iii) *Hospitals.* Allowability is determined in accordance with the provisions of 45 CFR part 74, Appendix E, "Principles for Determining Costs Applicable to Research and Development Under Grants and Contracts with Hospitals."

(iv) *Governmental organizations.* Allowability for State, local, or federally recognized Indian tribal government is determined in accordance with OMB Circular A-87, "Cost Principles for State and Local Governments."

(b) *Pre-award costs.* If a recipient incurs pre-award costs without the prior approval of the contracting officer, DOE may pay those costs incurred within the ninety calendar day period immediately preceding the effective date of the award, if such costs are:

(1) Necessary for the effective and economical conduct of the project;

(2) Otherwise allowable in accordance with the applicable cost principles; and

(3) Less than the total value of the award.

§ 600.318 Fee and profit.

(a) Grants and cooperative agreements may not provide for the payment of fee or profit to recipients or subrecipients, except for awards made pursuant to the Small Business Innovation Research or Small Business Technology Transfer Research programs.

(b) A recipient or subrecipient may pay a fee or profit to a contractor providing goods or services under a contract.

Property Standards

§ 600.320 Purpose of property standards.

Sections 600.321 through 600.325 set forth uniform standards for management, use, and disposition of property. DOE encourages recipients to use existing property-management systems to the extent that the systems meet these minimum requirements.

§ 600.321 Real property and equipment.

(a) *Prior approvals for acquisition with Federal funds.* Recipients may purchase real property or equipment in whole or in part with Federal funds under an award only with the prior approval of the contracting officer.

(b) *Title.* Unless a statute specifically authorizes and the award specifies that title to property vests unconditionally in the recipient, title to real property or equipment vests in the recipient subject to the conditions that the recipient:

(1) Use the real property or equipment for the authorized purposes of the project until funding for the project ceases, or until the property is no longer needed for the purposes of the project;

(2) Not encumber the property without approval of the contracting officer; and

(3) Use and dispose of the property in accordance with paragraphs (d) and (e) of this section.

(c) *Federal interest in real property or equipment offered as cost-share.* A recipient may offer the full value of real property or equipment that is purchased with recipient's funds or that is donated by a third party to meet a portion of any required cost sharing or matching, subject to the requirements in § 600.313. If a resulting award includes such property as a portion of the recipient's cost share, the Government has a financial interest in the property, (*i.e.*, a share of the property value equal to the Federal participation in the project). The property is considered as if it had been acquired in part with Federal funds, and is subject to the provisions of paragraphs (b)(1), (b)(2), and (b)(3) of this section and to the provisions of § 600.323.

(d) *Insurance.* Recipients must, at a minimum, provide the equivalent insurance coverage for real property and equipment acquired with DOE funds as provided to property owned by the recipient.

(e) *Use.* If real property or equipment is acquired in whole or in part with Federal funds under an award and the award does not specify that title vests unconditionally in the recipient, the real property or equipment is subject to the following:

(1) During the time that the real property or equipment is used on the project or program for which it was acquired, the recipient must make it available for use on other projects or programs, if such other use does not interfere with the work on the project or program for which the real property or equipment was originally acquired. Use of the real property or equipment on other projects is subject to the following order of priority:

(i) Activities sponsored by DOE grants, cooperative agreements, or other assistance awards;

(ii) Activities sponsored by other Federal agencies' grants, cooperative agreements, or other assistance awards;

(iii) Activities under Federal procurement contracts or activities not sponsored by any Federal agency. If so used, use charges must be assessed to those activities. For real property or equipment, the use charges must be at rates equivalent to those for which comparable real property or equipment may be leased.

(2) After Federal funding for the project ceases or if the real property or equipment is no longer needed for the purposes of the project, the recipient may use the real property or equipment for other projects, insofar as:

(i) There are Federally sponsored projects for which the real property or equipment may be used. If the only use for the real property or equipment is for projects that have no Federal sponsorship, the receipt must proceed with disposition of the real property or equipment, in accordance with paragraph (f) of this section.

(ii) The recipient obtains written approval from the contracting officer to do so. The contracting officer must en-

sure that there is a formal change of accountability for the real property or equipment to a currently funded, Federal award.

(iii) The recipient's use of the real property or equipment for other projects is in the same order of priority as described in paragraph (e)(1) of this section.

(f) *Disposition.* (1) If an item of real property or equipment is no longer needed for Federally sponsored projects, the recipient has the following options:

(i) If the property is equipment with a current per unit fair market value of less than \$5,000, it may be retained, sold, or otherwise disposed of with no further obligation to DOE.

(ii) If the property that is no longer needed is equipment (rather than real property), the recipient may wish to replace it with an item that is needed currently for the project by trading in or selling to offset the costs of the replacement equipment, subject to the approval of the contracting officer.

(iii) The recipient may elect to retain title, without further obligation to the Federal Government, by compensating the Federal Government for that percentage of the current fair market value of the real property or equipment that is attributable to the Federal participation in the project.

(iv) If the recipient does not elect to retain title to real property or equipment or does not request approval to use equipment as trade-in or offset for replacement equipment, the recipient must request disposition instructions from the responsible agency.

(2) If a recipient requests disposition instructions, the contracting officer must:

(i) For equipment (but not real property), consult with the DOE Project Director to determine whether the condition and nature of the equipment warrant excess screening within DOE. If screening is warranted, the equipment will be made available for reutilization within DOE through the Energy Asset Disposal System (EADS). If no DOE requirement is identified within a 30-day period, EADS automatically reports the availability of the equipment to the General Services Administration, to determine whether a requirement

Department of Energy

§ 600.323

for the equipment exists in other Federal agencies.

(ii) For either real property or equipment, issue instructions to the recipient for disposition of the property no later than 120 calendar days after the recipient's request. The contracting officer's options for disposition are to direct the recipient to:

(A) Transfer title to the real property or equipment to the Federal Government or to an eligible third party provided that, in such cases, the recipient is entitled to compensation for its attributable percentage of the current fair market value of the real property or equipment, plus any reasonable shipping or interim storage costs incurred.

(B) Sell the real property or equipment and pay the Federal Government for that percentage of the current fair market value of the property that is attributable to the Federal participation in the project (after deducting actual and reasonable selling and fix-up expenses, if any, from the sale proceeds). If the recipient is authorized or required to sell the real property or equipment, the recipient must use competitive procedures that result in the highest practicable return.

(3) If the responsible agency fails to issue disposition instructions within 120 calendar days of the recipient's request, the recipient must dispose of the real property or equipment through the option described in paragraph (f)(2)(ii)(B) of this section.

§ 600.322 Federally owned property.

(a) *Annual inventory.* The recipient must submit annually to the contracting officer an inventory listing of all Federally owned property in its custody, i.e., property furnished by the Federal Government, rather than acquired by the recipient with Federal funds under the award.

(b) *Insurance.* The recipient may not insure Federally owned property unless required by the terms and conditions of the award.

(c) *Use on other activities.* (1) Use of federally owned property on other activities is permissible, if authorized by the contracting officer responsible for administering the award to which the property currently is charged.

(2) Use on other activities must be in the following order of priority:

(i) Activities sponsored by DOE grants, cooperative agreements, or other assistance awards;

(ii) Activities sponsored by other Federal agencies' grants, cooperative agreements, or other assistance awards;

(iii) Activities under Federal procurement contracts or activities not sponsored by any Federal agency. If so used, use charges must be assessed to those activities. For real property or equipment, the use charges must be at rates equivalent to those for which comparable real property or equipment may be leased.

(d) *Disposition of property.* Upon completion of the award, the recipient must submit to the contracting officer a final inventory of Federal owned property. DOE may:

(1) Use the property to meet another Federal Government need (e.g., by transferring accountability for the property to another Federal award to the same recipient, or by directing the recipient to transfer the property to a Federal agency that needs the property or to another recipient with a currently funded award).

(2) Declare the property to be excess property and either:

(i) Report the property to the General Services Administration through EADS, in accordance with the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 483(b)(2)), as implemented by General Services Administration regulations at 41 CFR 101-47.202; or

(ii) Dispose of the property by alternative methods, if there is authority under law, such as 15 U.S.C. 3710(i).

§ 600.323 Property management system.

The recipient's property management system must include the following:

(a) Property records must be maintained, to include the following information for property that is Federally owned, equipment that is acquired in whole or in part with Federal funds, or property or equipment that is used as cost sharing or matching:

(1) A description of the property.

§ 600.324

(2) Manufacturer's serial number, model number, Federal stock number, national stock number, or any other identification number.

(3) Source of the property, including the award number.

(4) Whether title vests in the recipient or the Federal Government.

(5) Acquisition date (or date received, if the property was furnished by the Federal Government) and cost.

(6) Information from which one can calculate the percentage of Federal participation in the cost of the property (not applicable to property furnished by the Federal Government).

(7) The location and condition of the property and the date the information was reported.

(8) Ultimate disposition data, including data of disposal and sales price or the method used to determine current fair market value where a recipient compensates the Federal Government for its share.

(b) Federal owned equipment must be marked to indicate Federal ownership.

(c) A physical inventory must be taken and the results reconciled with the property records at least once every two years. Any differences between quantities determined by the physical inspection and those shown in the accounting records must be investigated to determine the causes of the difference. The recipient must, in connection with the inventory, verify the existence, current utilization, and continued need for the property.

(d) A control system must be in effect to insure adequate safeguards to prevent loss, damage, or theft of the property. Any loss, damage, or theft of property must be investigated and fully documented. If the property is owned by the Federal Government, the recipient must promptly notify the Federal agency responsible for administering the property.

(e) Adequate maintenance procedures must be implemented to keep the property in good condition.

§ 600.324 Supplies.

(a) Title vests in the recipient upon acquisition of supplies acquired with Federal funds under an award.

(b) Upon termination or completion of the project or program, the recipient

10 CFR Ch. II (1-1-16 Edition)

may retain any unused supplies. If the inventory of unused supplies exceeds \$5,000 in total aggregate value and the items are not needed for any other Federally sponsored project or program, the recipient may retain the items for use on non-Federal sponsored activities or sell them, but must, in either case, compensate the Federal Government for its share.

§ 600.325 Intellectual property.

(a) *Scope.* This section sets forth the policies with regard to disposition of rights to data and to inventions conceived or first actually reduced to practice in the course of, or under, a grant or cooperative agreement with DOE.

(b) *Patents right—small business concerns.* In accordance with 35 U.S.C. 202, if the recipient is a small business concern and receives a grant, cooperative agreement, subaward, or contract for research, developmental, or demonstration activities, then, unless there are "exceptional circumstances" as described in 35 U.S.C. 202(e), the award must contain the standard clause in appendix A to this subpart, entitled "Patents Rights (Small Business Firms and Nonprofit Organizations)" which provides to the recipient the right to elect ownership of inventions made under the award.

(c) *Patent rights—other than small business concerns, e.g., large businesses—*
(1) *No Patent Waiver.* Except as provided by paragraph (c)(2) of this section, if the recipient is a for-profit organization other than a small business concern, as defined in 35 U.S.C. 201(h) and receives an award or a subaward for research, development, and demonstration activities, then, pursuant to statute, the award must contain the standard clause in appendix A to this subpart, entitled "Patent Rights (Large Business Firms)—No Waiver" which provides that DOE owns the patent rights to inventions made under the award.

(2) *Patent Waiver Granted.* Paragraph (c)(1) of this section does not apply if:

(i) DOE grants a class waiver for a particular program under 10 CFR part 784;

(ii) The applicant requests and receives an advance patent waiver under 10 CFR part 784; or

(iii) A subaward is covered by a waiver granted under the prime award.

(3) *Special Provision.* Normally, an award will not include a background patent and data provision. However, under special circumstances, in order to provide heightened assurance of commercialization, a provision providing for a right to require licensing of third parties to background inventions, limited rights data and/or restricted computer software, may be included. Inclusion of a background patent and/or a data provision to assure commercialization will be done only with the written concurrence of the DOE program official setting forth the need for such assurance. An award may include the right to license the Government and third party contractors for special Government purposes when future availability of the technology would also benefit the government, *e.g.*, clean-up of DOE facilities. The scope of any such background patent and/or data licensing provision is subject to negotiation.

(d) *Rights in data—general rule.* (1) Subject to paragraphs (d)(2) and (3) of this section, and except as otherwise provided by paragraphs (e) and (f) of this section or other law, any award under this subpart must contain the standard clause in appendix A to this subpart, entitled “Rights in Data—General”.

(2) Normally, an award will not require the delivery of limited rights data or restricted computer software. However, if the contracting officer, in consultation with DOE patent counsel and the DOE program official, determines that delivery of limited rights data or restricted computer software is necessary, the contracting officer, after negotiation with the applicant, may insert in the award the standard clause as modified by Alternates I and/or II set forth in appendix A to this subpart.

(3) If software is specified for delivery to DOE, or if other special circumstances exist, *e.g.*, DOE specifying “open-source” treatment of software, then the contracting officer, after negotiation with the recipient, may in-

clude in the award special provisions requiring the recipient to obtain written approval of the contracting officer prior to asserting copyright in the software, modifying the retained Government license, and/or otherwise altering the copyright provisions.

(e) *Rights in data—programs covered under special protected data statutes.* (1) If a statute, other than those providing for the Small Business Innovation Research (SBIR) and Small Business Technology Transfer Research (STTR) programs, provides for a period of time, typically up to five years, during which data produced under an award for research, development, and demonstration may be protected from public disclosure, then the contracting officer must insert in the award the standard clause in appendix A to this subpart entitled “Rights in Data—Programs Covered Under Special Protected Data Statutes” or, as determined in consultation with DOE patent counsel and the DOE program official, a modified version of such clause which may identify data or categories of data that the recipient must make available to the public.

(2) An award under paragraph (e)(1) of this section is subject to the provisions of paragraphs (d)(2) and (3) of this section.

(f) *Rights in data—SBIR/STTR programs.* (1) If an applicant receives an award under the SBIR or STTR program, then the contracting officer must insert in the award the standard data clause in the General Terms and Conditions for SBIR Grants, entitled “Rights in Data—SBIR Program”.

(2) The data rights provisions for SBIR/STTR grants are contained in the award terms and conditions for SBIR grants located at <http://e-center.doe.gov> on the Professionals Homepage under Financial Assistance, Regulations and Guidance.

(g) *Authorization and consent.* (1) Work performed by a recipient under a grant is not subject to authorization and consent to the use of a patented invention, and the Government assumes no liability for patent infringement by the recipient under 28 U.S.C. 1498.

(2) Work performed by a recipient under a cooperative agreement is subject to authorization and consent to

§ 600.330

10 CFR Ch. II (1–1–16 Edition)

the use of a patented invention consistent with the principles set forth in 48 CFR 27.201–1.

(3) The contracting officer, in consultation with patent counsel, may also include clauses in the cooperative agreement addressing other patent matters related to authorization and consent, such as patent indemnification of the Government by recipient and notice and assistance regarding patent and copyright infringement. The policies and clauses for these other patent matters will be the same or consistent with those in 48 CFR part 927.

Procurement Standards

§ 600.330 Purpose of procurement standards.

Section 600.331 sets forth requirements necessary to ensure:

(a) Recipients' procurements that use Federal funds comply with applicable Federal statutes, regulations, and executive orders.

(b) Proper stewardship of Federal funds used in recipients' procurements.

§ 600.331 Requirements.

The following requirements pertain to recipients' procurements funded in whole or in part with Federal funds or with recipients' cost-share or match:

(a) *Reasonable cost.* Recipients' procurement procedures must use best commercial practices to ensure reasonable cost for procured goods and services. Recipients are encouraged to buy commercial items, if practicable.

(b) *Pre-award review of certain procurements.* If the contracting officer determines that there is a compelling need to perform a pre-award review of a specific transaction and the terms of the award identify the specific transaction and provide for such a review, then the recipient must obtain the contracting officer's approval prior to awarding the transaction and must provide the contracting officer the following documents to review:

- (1) Request for proposals or invitation to bid, if any;
- (2) Cost estimate;
- (3) Proposal/bid;
- (4) Proposed award document; and
- (5) Summary of negotiations or justification for award.

(c) *Contract provisions.* (1) Contracts in excess of the simplified acquisition threshold must contain contractual provisions or conditions that allow for administrative, contractual, or legal remedies in instances in which a contractor violates or breaches the contract terms, and provide for such remedial actions as may be appropriate.

(2) All contracts in excess of the simplified acquisition threshold must contain suitable provisions for termination for default by the recipient and for termination due to circumstances beyond the control of the contractor.

(3) All negotiated contracts in excess of the simplified acquisition threshold must include a provision permitting access of DOE, the Inspector General, the Comptroller General of the United States, or any of their duly authorized representatives, to any books, documents, papers, and records of the contractor that are directly pertinent to a specific program, for the purpose of making audits, examinations, excerpts, transcriptions, and copies of such documents.

(4) All contracts, including those for amounts less than the simplified acquisition threshold, awarded by recipients and their contractors must contain the procurement provisions of Appendix B to this subpart, as applicable.

(d) *Recipient responsibilities.* The recipient is the responsible authority, without recourse to DOE, regarding the settlement and satisfaction of all contractual and administrative issues arising out of procurements entered into in support of an award. This includes disputes, claims, protests of award, source evaluation or other matters of a contractual nature. The recipient should refer matters concerning violations of statutes to such Federal, State or local authority as may have proper jurisdiction.

Reports and Records

§ 600.340 Purpose of reports and records.

Sections 600.341 and 600.342 prescribe requirements for monitoring and reporting financial and program performance and for records retention.

§ 600.341 Monitoring and reporting program and financial performance.

(a) The terms and conditions of the award prescribe the reporting requirements, the frequency, and the due dates for reports. At a minimum, requirements must include:

(1) Periodic progress reports (at least annually, but no more frequently than quarterly) addressing both program status and business status, as follows:

(i) The program portions of the reports must address progress toward achieving program performance goals and milestones, including current issues, problems, or developments.

(ii) The business portions of the reports must provide summarized details on the status of resources (Federal funds and non-Federal cost sharing or matching), including an accounting of expenditures for the period covered by the report. The report should compare the resource status with any payment and expenditure schedules or plans provided in the original award, explain any major deviations from those schedules, and discuss actions that will be taken to address the deviations.

(2) A final technical report if the award is for research and development.

(b) If the contracting officer previously authorized advance payments, pursuant to § 600.312(a)(2), he/she should consult with the DOE project director and consider whether program progress reported in the periodic progress report, in relation to reported expenditures, is sufficient to justify continued authorization of advance payments.

§ 600.342 Retention and access requirements for records.

(a) This section sets forth requirements for records retention and access to records for awards to recipients and subrecipients.

(b) Financial records, supporting documents, statistical records, and all other records pertinent to an award must be retained for a period of three years from the date of submission of the final expenditure report. The only exceptions are the following:

(1) If any litigation, claim, or audit is started before the expiration of the 3-year period, the records must be retained until all litigation, claims, or

audit findings involving the records have been resolved and final action taken.

(2) Records for real property and equipment acquired with Federal funds must be retained for 3 years after final disposition.

(3) If records are transferred to or maintained by DOE, the 3-year retention requirement is not applicable to the recipient.

(4) Indirect cost rate proposals, cost allocation plans, and related records must be retained in accordance with the requirements specified in paragraph (g) of this section.

(c) Copies of original records may be substituted for the original records if authorized by the contracting officer.

(d) The contracting officer may request that recipients transfer certain records to DOE custody if he or she determines that the records possess long term retention value. However, in order to avoid duplicate recordkeeping, a contracting officer may make arrangements for recipients to retain any records that are continuously needed for joint use.

(e) DOE, the Inspector General, Comptroller General of the United States, or any of their duly authorized representatives, have the right of timely and unrestricted access to any books, documents, papers, or other records of recipients that are pertinent to the awards, in order to make audits, examinations, excerpts, transcripts and copies of such documents. This right also includes timely and reasonable access to a recipient's personnel for the purpose of interview and discussion related to such documents. The rights of access in this paragraph are not limited to the required retention period, but must last as long as records are retained.

(f) Unless required by statute, DOE must not place restrictions on recipients that limit public access to the records of recipients that are pertinent to an award, except when DOE can demonstrate that such records would be kept confidential and would be exempt from disclosure pursuant to the Freedom of Information Act (5 U.S.C. 552) if the records belonged to DOE.

(g) Indirect cost proposals, cost allocation plans, and other cost accounting

§ 600.350

documents (such as documents related to computer usage chargeback rates), along with their supporting records, must be retained for a 3-year period, as follows:

(1) If the recipient or the subrecipient is required to submit an indirect-cost proposal, cost allocation plan, or other computation to the cognizant Federal agency for purposes of negotiating an indirect cost rate or other rates, the 3-year retention period starts on the date of the submission.

(2) If the recipient or the subrecipient is not required to submit the documents or supporting records for negotiating an indirect cost rate or other rates, the 3-year retention period for the documents and records starts at the end of the fiscal year (or other accounting period) covered by the proposal, plan, or other computation.

(h) If the information described in this section is maintained on a computer, recipients must retain the computer data on a reliable medium for the time periods prescribed. Recipients may transfer computer data in machine readable form from one reliable computer medium to another. Recipients' computer data retention and transfer procedures must maintain the integrity, reliability, and security of the original computer data. Recipients must also maintain an audit trail describing the data transfer. For the record retention time periods prescribed in this section, recipients must not destroy, discard, delete, or write over such computer data.

Termination and Enforcement

§ 600.350 Purpose of termination and enforcement.

Sections 600.351 through 600.353 set forth uniform procedures for suspension, termination, enforcement, and disputes.

§ 600.351 Termination.

(a) Awards may be terminated in whole or in part only in accordance with one of the following:

(1) By the contracting officer, if a recipient materially fails to comply with the terms and conditions of an award.

(2) By the contracting officer with the consent of the recipient, in which

10 CFR Ch. II (1-1-16 Edition)

case the two parties must agree upon the termination conditions, including the effective date and, in the case of partial termination, the portion to be terminated.

(3) By the recipient upon sending to the contracting officer written notification setting forth the reasons for such termination, the effective date, and, in the case of partial termination, the portion to be terminated. The recipient must provide such notice at least 30 calendar days prior to the effective date of the termination. However, if the contracting officer determines in the case of partial termination that the reduced or modified portion of the award will not accomplish the purposes for which the award was made, he or she may terminate the award in its entirety.

(b) If the recipient incurred allowable costs prior to the termination, the responsibilities of the recipient referred to in § 600.361(b), including those related to property, apply to the termination of the award, and provision must be made for continuing responsibilities of the recipient after termination, as appropriate.

§ 600.352 Enforcement.

(a) *Remedies for noncompliance.* If a recipient materially fails to comply with the terms and conditions of an award, whether stated in a Federal statute, regulation, assurance, application, or notice of award, the contracting officer may, in addition to imposing any of the special conditions outlined in § 600.304, take one or more of the following actions, as appropriate:

(1) Temporarily withhold cash payments pending correction of the deficiency by the recipient or more severe enforcement action by the contracting officer.

(2) Disallow (that is, deny both the use of funds and any applicable matching credit for) all or part of the cost of the activity or action not in compliance.

(3) Wholly or partly suspend or terminate the current award.

(4) Withhold further awards for the project or program.

(5) Apply other remedies that may be legally available.

(b) *Hearings and appeals.* In taking an enforcement action, DOE must provide the recipient an opportunity for hearing, appeal, or other administrative proceeding to which the recipient is entitled under any statute or regulation applicable to the action involved.

(c) *Effects of suspension and termination.* Costs resulting from obligations incurred by the recipient during a suspension or after termination of an award are not allowable, unless the contracting officer expressly authorizes them in the notice of suspension or termination or subsequently authorizes such costs. Other recipient costs during suspension or after termination, which are necessary and not reasonably avoidable, are allowable if the costs:

(1) Result from obligations which were properly incurred by the recipient before the effective date of suspension or termination, are not in anticipation of it, and in the case of a termination, are noncancellable; and

(2) Would be allowable if the award expired normally at the end of the funding period.

(d) *Relationship to debarment and suspension.* The enforcement remedies identified in this section, including suspension and termination, do not preclude a recipient from being subject to debarment and suspension under 10 CFR part 1036.

§ 600.353 Disputes and appeals.

Consistent with 10 CFR 600.22 and part 1024, recipients have the right to appeal certain decisions by contracting officers.

AFTER-THE-AWARD REQUIREMENTS

§ 600.360 Purpose.

Sections 600.361 through 600.363 contain procedures for closeout and for subsequent disallowances and adjustments.

§ 600.361 Closeout procedures.

(a) Recipients must submit, within 90 calendar days after the date of completion of the award, all reports required by the terms and conditions of the award. DOE may approve extensions when requested by the recipient.

(b) The following provisions must apply to the closeout:

(1) Unless DOE authorizes an extension, a recipient must liquidate all obligations incurred under the award not later than 90 calendar days after the funding period or the date of completion of the award as specified in the terms and conditions of the award or in agency implementing instructions.

(2) DOE must make prompt, final payments to a recipient for allowable reimbursable costs under the award being closed out.

(3) The recipient must promptly refund any unobligated balances of cash that DOE has advanced or paid and that are not authorized to be retained by the recipient for use in other projects. OMB Circular A-129 governs unreturned amounts that become delinquent debts.

(4) When authorized by the terms and conditions of the award, the contracting officer must make a settlement for any upward or downward adjustments to the Federal share of costs after closeout reports are received.

(5) The recipient must account for any real property and equipment acquired with Federal funds or received from the Federal Government in accordance with §§ 600.321 through 600.325.

(6) If a final audit is required and has not been performed prior to the closeout of an award, DOE retains the right to recover an appropriate amount after fully considering the recommendations on disallowed costs resulting from the final audit.

§ 600.362 Subsequent adjustments and continuing responsibilities.

(a) The closeout of an award does not affect any of the following:

(1) The right of DOE to disallow costs and recover funds on the basis of a later audit or other review.

(2) The obligation of the recipient to return any funds due as a result of later refunds, corrections, or other transactions.

(3) Audit requirements in § 600.316.

(4) Property management requirements in §§ 600.321 through 600.325.

(5) Records retention requirements in § 600.342.

(b) After closeout of an award, the continuing responsibilities under an award may be modified or ended in whole or in part with the consent of

§ 600.363

the contracting officer and the recipient, provided property management requirements are considered and provisions made for the continuing responsibilities of the recipient, as appropriate.

§ 600.363 Collection of amounts due.

(a) Any funds paid to a recipient in excess of the amount to which the recipient is finally determined to be entitled under the terms and conditions of the award constitute a debt to the Federal Government. If not paid within 30 days after the demand for payment, DOE may reduce the debt in accordance with the procedures and techniques described in 10 CFR part 1015 and OMB Circular A-129, including:

(1) Making an administrative offset against other requests for reimbursements.

(2) Withholding advance payments otherwise due to the recipient.

(3) Taking other action permitted by statute or regulation.

(b) Except as otherwise provided by law, DOE may charge interest and administrative fees on an overdue debt in accordance with 31 CFR Chapter IX, parts 900-904, "Federal Claims Collection Standards."

ADDITIONAL PROVISIONS

§ 600.380 Purpose.

The purpose of "Additional Provisions" is to provide alternative requirements for recipients otherwise covered by this subpart D, when they are performing under Small Business Innovation Research grants.

§ 600.381 Special provisions for Small Business Innovation Research Grants.

(a) *General.* This section contains provisions applicable to the Small Business Innovation Research (SBIR) Program.

(b) *Provisions Applicable to Phase I SBIR Awards:* Phase I SBIR awards may be made on a fixed obligation basis, subject to the following requirements.

(1) While proposed costs must be analyzed in detail to ensure consistency with applicable cost principles, incurred costs are not subject to review

10 CFR Ch. II (1-1-16 Edition)

under the standards of cost allowability.

(2) Although detailed budgets are submitted by a recipient and reviewed by DOE for purposes of establishing the amount to be awarded, budget categories are not stipulated in making an award;

(3) Prior approval from the DOE for rebudgeting among categories by the recipient is not required. Prior approval from DOE is required for any variation from the requirement that no more than one-third of Phase I work can be done by subcontractors or consortium partners;

(4) Pre-award expenditure approval is not required;

(5) Payments are to be made in the same manner as other financial assistance (*see* § 600.312), except that, when determined appropriate by the cognizant program official and contracting officer, a lump sum payment may be made. If a lump sum payment is made, the award must contain a condition that requires the recipient to return to DOE amounts remaining unexpended at the end of the project if those amounts exceed \$500;

(6) Recipients will certify in writing to the Contracting Officer at the end of the project that the activity was completed or the level of effort was expended. Should the activity or effort not be carried out, the recipient would be expected to make appropriate reimbursements;

(7) Requirements for periodic reports may be established for each award so long as they are consistent with § 600.341;

(8) Changes in principal investigator or project leader, scope of effort, or institution, require the prior approval of DOE.

(c) *Provision Applicable to Phase II SBIR Awards.* Phase II SBIR awards may be made for a single budget period of 24 months.

(d) *Provisions Applicable to Phase I and Phase II SBIR Awards.* (1) The prior approval of the cognizant DOE Contracting Officer is required before the final budget period of the project period may be extended without additional funds.

(2) A fee or profit may be paid to SBIR recipients.

Department of Energy

Pt. 600, Subpt. D, App. A

APPENDIX A TO SUBPART D OF PART 600—PATENT AND DATA PROVISIONS

1. Patent Rights (Small Business Firms and Nonprofit Organizations)
2. Patent Rights (Large Business Firms)—No Waiver
3. Rights in Data—General
4. Rights in Data—Programs Covered Under Special Protected Data Statutes

PATENT RIGHTS (SMALL BUSINESS FIRMS AND NONPROFIT ORGANIZATIONS)

(a) Definitions

Invention means any invention or discovery which is or may be patentable or otherwise protectable under title 35 of the United States Code, or any novel variety of plant which is or may be protected under the Plant Variety Protection Act (7 U.S.C. 2321 *et seq.*).

Made when used in relation to any invention means the conception or first actual reduction to practice of such invention.

Nonprofit organization means a university or other institution of higher education or an organization of the type described in section 501(c)(3) of the Internal Revenue Code of 1954 (26 U.S.C. 501(c)) and exempt from taxation under section 501(a) of the Internal Revenue Code (26 U.S.C. 501(a)) or any nonprofit scientific or educational organization qualified under a State nonprofit organization statute.

Practical application means to manufacture in the case of a composition or product, to practice in the case of a process or method, or to operate in the case of a machine or system; and, in each case, under such conditions as to establish that the invention is being utilized and that its benefits are to the extent permitted by law or Government regulations available to the public on reasonable terms.

Small business firm means a small business concern as defined at section 2 of Public Law 85-536 (16 U.S.C. 632) and implementing regulations of the Administrator of the Small Business Administration. For the purpose of this clause, the size standards for small business concerns involved in Government procurement and subcontracting at 13 CFR 121.3 through 121.8 and 13 CFR 121.3 through 121.12, respectively, will be used.

Subject invention means any invention of the Recipient conceived or first actually reduced to practice in the performance of work under this award, provided that in the case of a variety of plant, the date of determination (as defined in section 41(d) of the Plant Variety Protection Act, 7 U.S.C. 2401(d) must also occur during the period of award performance.

(b) Allocation of Principal Rights

The Recipient may retain the entire right, title, and interest throughout the world to

each subject invention subject to the provisions of this Patent Rights clause and 35 U.S.C. 203. With respect to any subject invention in which the Recipient retains title, the Federal Government shall have a non-exclusive, nontransferable, irrevocable, paid-up license to practice or have practiced for or on behalf of the U.S. the subject invention throughout the world.

(c) Invention Disclosure, Election of Title and Filing of Patent Applications by Recipient

(1) The Recipient will disclose each subject invention to DOE within two months after the inventor discloses it in writing to Recipient personnel responsible for the administration of patent matters. The disclosure to DOE shall be in the form of a written report and shall identify the award under which the invention was made and the inventor(s). It shall be sufficiently complete in technical detail to convey a clear understanding to the extent known at the time of disclosure, of the nature, purpose, operation, and the physical, chemical, biological or electrical characteristics of the invention. The disclosure shall also identify any publication, on sale or public use of the invention and whether a manuscript describing the invention has been submitted for publication and, if so, whether it has been accepted for publication at the time of disclosure. In addition, after disclosure to DOE, the Recipient will promptly notify DOE of the acceptance of any manuscript describing the invention for publication or of any on sale or public use planned by the Recipient.

(2) The Recipient will elect in writing whether or not to retain title to any such invention by notifying DOE within two years of disclosure to DOE. However, in any case where publication, on sale, or public use has initiated the one-year statutory period wherein valid patent protection can still be obtained in the U.S., the period for election of title may be shortened by the agency to a date that is no more than 60 days prior to the end of the statutory period.

(3) The Recipient will file its initial patent application on an invention to which it elects to retain title within one year after election of title or, if earlier, prior to the end of any statutory period wherein valid patent protection can be obtained in the U.S. after a publication, on sale, or public use. The Recipient will file patent applications in additional countries or international patent offices within either ten months of the corresponding initial patent application, or six months from the date when permission is granted by the Commissioner of Patents and Trademarks to file foreign patent applications when such filing has been prohibited by a Secrecy Order.

(4) Requests for extension of the time for disclosure to DOE, election, and filing under

subparagraphs (c)(1), (2), and (3) of this clause may, at the discretion of DOE, be granted.

(d) Conditions When the Government May Obtain Title

The Recipient will convey to DOE, upon written request, title to any subject invention:

(1) If the Recipient fails to disclose or elect the subject invention within the times specified in paragraph (c) of this patent rights clause, or elects not to retain title; provided that DOE may only request title within 60 days after learning of the failure of the Recipient to disclose or elect within the specified times;

(2) In those countries in which the Recipient fails to file patent applications within the times specified in paragraph (c) of this Patent Rights clause; provided, however, that if the Recipient has filed a patent application in a country after the times specified in paragraph (c) of this Patent Rights clause, but prior to its receipt of the written request of DOE, the Recipient shall continue to retain title in that country; or

(3) In any country in which the Recipient decides not to continue the prosecution of any application for, to pay the maintenance fees on, or defend in a reexamination or opposition proceeding on, a patent on a subject invention.

(e) Minimum Rights to Recipient and Protection of the Recipient Right To File

(1) The Recipient will retain a non-exclusive royalty-free license throughout the world in each subject invention to which the Government obtains title, except if the Recipient fails to disclose the subject invention within the times specified in paragraph (c) of this Patent Rights clause. The Recipient's license extends to its domestic subsidiaries and affiliates, if any, within the corporate structure of which the Recipient is a party and includes the right to grant sublicenses of the same scope of the extent the Recipient was legally obligated to do so at the time the award was awarded. The license is transferable only with the approval of DOE except when transferred to the successor of that part of the Recipient's business to which the invention pertains.

(2) The Recipient's domestic license may be revoked or modified by DOE to the extent necessary to achieve expeditious practical application of the subject invention pursuant to an application for an exclusive license submitted in accordance with applicable provisions at 37 CFR part 404 and the agency's licensing regulation, if any. This license will not be revoked in that field of use or the geographical areas in which the Recipient has achieved practical application and continues to make the benefits of the invention reason-

ably accessible to the public. The license in any foreign country may be revoked or modified at discretion of the funding Federal agency to the extent the Recipient, its licensees, or its domestic subsidiaries or affiliates have failed to achieve practical application in that foreign country.

(3) Before revocation or modification of the license, the funding Federal agency will furnish the Recipient a written notice of its intention to revoke or modify the license, and the Recipient will be allowed thirty days (or such other time as may be authorized by DOE for good cause shown by the Recipient) after the notice to show cause why the license should not be revoked or modified. The Recipient has the right to appeal, in accordance with applicable regulations in 37 CFR part 404 and the agency's licensing regulations, if any, concerning the licensing of Government-owned inventions, any decision concerning the revocation or modification of its license.

(f) Recipient Action To Protect Government's Interest

(1) The Recipient agrees to execute or to have executed and promptly deliver to DOE all instruments necessary to:

(i) Establish or confirm the rights the Government has throughout the world in those subject inventions for which the Recipient retains title; and

(ii) Convey title to DOE when requested under paragraph (d) of this Patent Rights clause, and to enable the government to obtain patent protection throughout the world in that subject invention.

(2) The Recipient agrees to require, by written agreement, its employees, other than clerical and non-technical employees, to disclose promptly in writing to personnel identified as responsible for the administration of patent matters and in a format suggested by the Recipient each subject invention made under this award in order that the Recipient can comply with the disclosure provisions of paragraph (c) of this Patent Rights clause, and to execute all papers necessary to file patent applications on subject inventions and to establish the Government's rights in the subject inventions. The disclosure format should require, as a minimum, the information requested by paragraph (c)(1) of this Patent Rights clause. The Recipient shall instruct such employees through the employee agreements or other suitable educational programs on the importance of reporting inventions in sufficient time to permit the filing of patent applications prior to U.S. or foreign statutory bars.

(3) The Recipient will notify DOE of any decision not to continue prosecution of a patent application, pay maintenance fees, or defend in a reexamination or opposition proceeding on a patent, in any country, not less

Department of Energy

Pt. 600, Subpt. D, App. A

than 30 days before the expiration of the response period required by the relevant patent office.

(4) The Recipient agrees to include, within the specification of any U.S. patent application and any patent issuing thereon covering a subject invention, the following statement: "This invention was made with Government support under (identify the award) awarded by (identify DOE). The Government has certain rights in this invention."

(g) Subaward/Contract

(1) The Recipient will include this Patent Rights clause, suitably modified to identify the parties, in all subawards/contracts, regardless of tier, for experimental, developmental or research work to be performed by a small business firm or nonprofit organization. The subrecipient/contractor will retain all rights provided for the Recipient in this Patent Rights clause, and the Recipient will not, as part of the consideration for awarding the subcontract, obtain rights in the sub-contractors' subject inventions.

(2) The Recipient will include in all other subawards/contracts, regardless of tier, for experimental, developmental or research work, the patent rights clause required by 10 CFR 600.325(c).

(3) In the case of subawards/contracts at any tier, DOE, the Recipient, and the subrecipient/contractor agree that the mutual obligations of the parties created by this clause constitute a contract between the subrecipient/contractor and DOE with respect to those matters covered by the clause.

(h) Reporting on Utilization of Subject Inventions

The Recipient agrees to submit on request periodic reports no more frequently than annually on the utilization of a subject invention or on efforts at obtaining such utilization that are being made by the Recipient or its licensees or assignees. Such reports shall include information regarding the status of development, date of first commercial sale or use, gross royalties received by the Recipient and such other data and information as DOE may reasonably specify. The Recipient also agrees to provide additional reports in connection with any march-in proceeding undertaken by DOE in accordance with paragraph (j) of this Patent Rights clause. As required by 35 U.S.C. 202(c)(5), DOE agrees it will not disclose such information to persons outside the Government without the permission of the Recipient.

(i) Preference for United States Industry.

Notwithstanding any other provision of this Patent Rights clause, the Recipient agrees that neither it nor any assignee will grant to any person the exclusive right to use or sell any subject invention in the U.S.

unless such person agrees that any products embodying the subject invention or produced through the use of the subject invention will be manufactured substantially in the U.S. However, in individual cases, the requirement for such an agreement may be waived by DOE upon a showing by the Recipient or its assignee that reasonable but unsuccessful efforts have been made to grant licenses on similar terms to potential licensees that would be likely to manufacture substantially in the U.S. or that under the circumstances domestic manufacture is not commercially feasible.

(j) March-in-Rights

The Recipient agrees that with respect to any subject invention in which it has acquired title, DOE has the right in accordance with procedures at 37 CFR 401.6 and any supplemental regulations of the Agency to require the Recipient, an assignee or exclusive licensee of a subject invention to grant a non-exclusive, partially exclusive, or exclusive license in any field of use to a responsible applicant or applicants, upon terms that are reasonable under the circumstances and if the Recipient, assignee, or exclusive licensee refuses such a request, DOE has the right to grant such a license itself if DOE determines that:

(1) Such action is necessary because the Recipient or assignee has not taken or is not expected to take within a reasonable time, effective steps to achieve practical application of the subject invention in such field of use;

(2) Such action is necessary to alleviate health or safety needs which are not reasonably satisfied by the Recipient, assignee, or their licensees;

(3) Such action is necessary to meet requirements for public use specified by Federal regulations and such requirements are not reasonably satisfied by the Recipient, assignee, or licensee; or

(4) Such action is necessary because the agreement required by paragraph (i) of this Patent Rights clause has not been obtained or waived or because a licensee of the exclusive right to use or sell any subject invention in the U.S. is in breach of such agreement.

(k) Special Provisions for Awards With Nonprofit Organizations

If the Recipient is a nonprofit organization, it agrees that:

(1) Rights to a subject invention in the U.S. may not be assigned without the approval of DOE, except where such assignment is made to an organization which has as one of its primary functions the management of inventions, provided that such assignee will be subject to the same provisions as the Recipient;

(2) The Recipient will share royalties collected on a subject invention with the inventor, including Federal employee co-inventors (when DOE deems it appropriate) when the subject invention is assigned in accordance with 35 U.S.C. 202(e) and 37 CFR 401.10;

(3) The balance of any royalties or income earned by the Recipient with respect to subject inventions, after payment of expenses (including payments to inventors) incidental to the administration of subject inventions, will be utilized for the support of scientific or engineering research or education; and

(4) It will make efforts that are reasonable under the circumstances to attract licensees of subject inventions that are small business firms and that it will give preference to a small business firm if the Recipient determines that the small business firm has a plan or proposal for marketing the invention which, if executed, is equally likely to bring the invention to practical application as any plans or proposals from applicants that are not small business firms; provided that the Recipient is also satisfied that the small business firm has the capability and resources to carry out its plan or proposal. The decision whether to give a preference in any specific case will be at the discretion of the Recipient. However, the Recipient agrees that the Secretary of Commerce may review the Recipient's licensing program and decisions regarding small business applicants, and the Recipient will negotiate changes to its licensing policies, procedures or practices with the Secretary when the Secretary's review discloses that the Recipient could take reasonable steps to implement more effectively the requirements of this paragraph (k)(4).

(l) Communications

All communications required by this Patent Rights clause should be sent to the DOE Patent Counsel address listed in the Award Document.

(m) Electronic Filing

Unless otherwise Specified in the award, the information identified in paragraphs (f)(2) and (f)(3) may be electronically filed.

(End of clause)

PATENT RIGHTS (LARGE BUSINESS FIRMS)—NO WAIVER

(a) Definitions

DOE patent waiver regulations, as used in this clause, means the Department of Energy patent waiver regulations in effect on the date of award. See 10 CFR part 784.

Invention, as used in this clause, means any invention or discovery which is or may be patentable of otherwise protectable under title 35 of the United States Code or any novel variety of plant that is or may be

protectable under the Plant Variety Protection Act (7 U.S.C. 2321, *et seq.*).

Patent Counsel, as used in this clause, means the Department of Energy Patent Counsel assisting the awarding activity.

Subject invention, as used in this clause, means any invention of the Recipient conceived or first actually reduced to practice in the course of or under this agreement.

(b) Allocations of Principal Rights

(1) Assignment to the Government. The Recipient agrees to assign to the Government the entire right, title, and interest throughout the world in and to each subject invention, except to the extent that rights are retained by the Recipient under subparagraph (b)(2) and paragraph (d) of this clause.

(2) Greater rights determinations. The Recipient, or an employee-inventor after consultation with the Recipient, may request greater rights than the nonexclusive license and the foreign patent rights provided in paragraph (d) of this clause on identified inventions in accordance with the DOE patent waiver regulation. Each determination of greater rights under this agreement shall be subject to paragraph (c) of this clause, unless otherwise provided in the greater rights determination, and to the reservations and conditions deemed to be appropriate by the Secretary of Energy or designee.

(c) Minimum Rights Acquired by the Government

With respect to each subject invention to which the Department of Energy grants the Recipient principal or exclusive rights, the Recipient agrees to grant to the Government: A nonexclusive, nontransferable, irrevocable, paid-up license to practice or have practiced each subject invention throughout the world by or on behalf of the Government of the United States (including any Government agency); "march-in rights" as set forth in 37 CFR 401.14(a)(J)); preference for U.S. industry as set forth in 37 CFR 401.14(a)(I); periodic reports upon request, no more frequently than annually, on the utilization or intent of utilization of a subject invention in a manner consistent with 35 U.S.C. 202(c)(5); and such Government rights in any instrument transferring rights in a subject invention.

(d) Minimum Rights to the Recipient

(1) The Recipient is hereby granted a revocable, nonexclusive, royalty-free license in each patent application filed in any country on a subject invention and any resulting patent in which the Government obtains title, unless the Recipient fails to disclose the subject invention within the times specified in subparagraph (e)(2) of this clause. The Recipient's license extends to its domestic subsidiaries and affiliates, if any, within the

corporate structure of which the Recipient is a part and includes the right to grant sublicenses of the same scope to the extent the Recipient was legally obligated to do so at the time the agreement was awarded. The license is transferable only with the approval of DOE except when transferred to the successor of that part of the Recipient's business to which the invention pertains.

(2) The Recipient may request the right to acquire patent rights to a subject invention in any foreign country where the Government has elected not to secure such rights, subject to the minimum rights acquired by the Government similar to paragraph (c) of this clause. Such request must be made in writing to the Patent Counsel as part of the disclosure required by subparagraph (e)(2) of this clause, with a copy to the DOE Contracting Officer. DOE approval, if given, will be based on a determination that this would best serve the national interest.

(e) Invention Identification, Disclosures, and Reports

(1) The Recipient shall establish and maintain active and effective procedures to assure that subject inventions are promptly identified and disclosed to Recipient personnel responsible for patent matters within 6 months of conception and/or first actual reduction to practice, whichever occurs first in the performance of work under this agreement. These procedures shall include the maintenance of laboratory notebooks or equivalent records and other records as are reasonably necessary to document the conception and/or the first actual reduction to practice of subject inventions, and records that show that the procedures for identifying and disclosing the inventions are followed. Upon request, the Recipient shall furnish the Contracting Officer a description of such procedures for evaluation and for determination as to their effectiveness.

(2) The Recipient shall disclose each subject invention to the DOE Patent Counsel with a copy to the Contracting Officer within 2 months after the inventor discloses it in writing to Recipient personnel responsible for patent matters or, if earlier, within 6 months after the Recipient becomes aware that a subject invention has been made, but in any event before any on sale, public use, or publication of such invention known to the Recipient. The disclosure to DOE shall be in the form of a written report and shall identify the agreement under which the invention was made and the inventor(s). It shall be sufficiently complete in technical detail to convey a clear understanding, to the extent known at the time of the disclosure, of the nature, purpose, operation, and physical, chemical, biological, or electrical characteristics of the invention. The disclosure shall also identify any publication, on

sale, or public use of the invention and whether a manuscript describing the invention has been submitted for publication and, if so, whether it has been accepted for publication at the time of disclosure. In addition, after disclosure to DOE, the Recipient shall promptly notify Patent Counsel of the acceptance of any manuscript describing the invention for publication or of any on sale or public use planned by the Recipient. The report should also include any request for a greater rights determination in accordance with subparagraph (b)(2) of this clause. When an invention is disclosed to DOE under this paragraph, it shall be deemed to have been made in the manner specified in Sections (a)(1) and (a)(2) of 42 U.S.C. 5908, unless the Recipient contends in writing at the time the invention is disclosed that it was not so made.

(3) The Recipient shall furnish the Contracting Officer a final report, within 3 months after completion of the work listing all subject inventions or containing a statement that there were no such inventions, and listing all subawards/contracts at any tier containing a patent rights clause or containing a statement that there were no such subawards/contracts.

(4) The Recipient agrees to require, by written agreement, its employees, other than clerical and nontechnical employees, to disclose promptly in writing to personnel identified as responsible for the administration of patent matters and in a format suggested by the Recipient each subject invention made under subaward/contract in order that the Recipient can comply with the disclosure provisions of paragraph (c) of this clause, and to execute all papers necessary to file patent applications on subject inventions and to establish the Government's rights in the subject inventions. This disclosure format should require, as a minimum, the information required by subparagraph (e)(2) of this clause.

(5) The Recipient agrees, subject to FAR 27.302(j), that the Government may duplicate and disclose subject invention disclosures and all other reports and papers furnished or required to be furnished pursuant to this clause.

(f) Examination of Records Relating to Inventions

(1) The Contracting Officer or any authorized representative shall, until 3 years after final payment under this agreement, have the right to examine any books (including laboratory notebooks), records, and documents of the Recipient relating to the conception or first actual reduction to practice of inventions in the same field of technology as the work under this agreement to determine whether—

(i) Any such inventions are subject inventions;

(ii) The Recipient has established and maintains the procedures required by subparagraphs (e)(1) and (4) of this clause;

(iii) The Recipient and its inventors have complied with the procedures.

(2) If the Contracting Officer learns of an unreported Recipient invention which the Contracting Officer believes may be a subject invention, the Recipient may be required to disclose the invention to DOE for a determination of ownership rights.

(3) Any examination of records under this paragraph will be subject to appropriate conditions to protect the confidentiality of the information involved.

(g) Subaward/Contract

(1) The recipient shall include the clause PATENT RIGHTS (SMALL BUSINESS FIRMS AND NONPROFIT ORGANIZATIONS) (suitably modified to identify the parties) in all subawards/contracts, regardless of tier, for experimental, developmental, demonstration, or research work to be performed by a small business firm or domestic nonprofit organization, except where the work of the subaward/contract is subject to an Exceptional Circumstances Determination by DOE. In all other subawards/contracts, regardless of tier, for experimental, developmental, demonstration, or research work, the Recipient shall include this clause (suitably modified to identify the parties), or an alternate clause as directed by the contracting officer. The Recipient shall not, as part of the consideration for awarding the subaward/contract, obtain rights in the subrecipient's/contractor's subject inventions.

(2) In the event of a refusal by a prospective subrecipient/contractor to accept such a clause the Recipient:

(i) Shall promptly submit a written notice to the Contracting Officer setting forth the subrecipient/contractor's reasons for such refusal and other pertinent information that may expedite disposition of the matter; and

(ii) Shall not proceed with such subaward/contract without the written authorization of the Contracting Officer.

(3) In the case of subawards/contracts at any tier, DOE, the subrecipient/contractor, and Recipient agree that the mutual obligations of the parties created by this clause constitute a contract between the subrecipient/contractor and DOE with respect to those matters covered by this clause.

(4) The Recipient shall promptly notify the Contracting Officer in writing upon the award of any subaward/contract at any tier containing a patent rights clause by identifying the subrecipient/contractor, the applicable patent rights clause, the work to be performed under the subaward/contract, and the dates of award and estimated completion. Upon request of the Contracting Officer, the Recipient shall furnish a copy of such subaward/contract, and, no more fre-

quently than annually, a listing of the subawards/contracts that have been awarded.

(5) The Recipient shall identify all subject inventions of a subrecipient/contractor of which it acquires knowledge in the performance of this agreement and shall notify the Patent Counsel, with a copy to the contracting officer, promptly upon identification of the inventions.

(h) Atomic Energy

(1) No claim for pecuniary award of compensation under the provisions of the Atomic Energy Act of 1954, as amended, shall be asserted with respect to any invention or discovery made or conceived in the course of or under this agreement.

(2) Except as otherwise authorized in writing by the Contracting Officer, the Recipient will obtain patent agreements to effectuate the provisions of subparagraph (h)(1) of this clause from all persons who perform any part of the work under this agreement, except nontechnical personnel, such as clerical employees and manual laborers.

(i) Publication

It is recognized that during the course of the work under this agreement, the Recipient or its employees may from time to time desire to release or publish information regarding scientific or technical developments conceived or first actually reduced to practice in the course of or under this agreement. In order that public disclosure of such information will not adversely affect the patent interests of DOE or the Recipient, patent approval for release of publication shall be secured from Patent Counsel prior to any such release or publication.

(j) Forfeiture of Rights in Unreported Subject Inventions

(1) The Recipient shall forfeit and assign to the Government, at the request of the Secretary of Energy or designee, all rights in any subject invention which the Recipient fails to report to Patent Counsel within six months after the time the Recipient:

(i) Files or causes to be filed a United States or foreign patent application thereon; or

(ii) Submits the final report required by subparagraph (e)(3) of this clause, whichever is later.

(2) However, the Recipient shall not forfeit rights in a subject invention if, within the time specified in subparagraph (e)(2) of this clause, the Recipient:

(i) Prepares a written decision based upon a review of the record that the invention was neither conceived nor first actually reduced to practice in the course of or under the agreement and delivers the decision to Patent Counsel, with a copy to the Contracting Officer, or

(ii) Contending that the invention is not a subject invention, the Recipient nevertheless discloses the invention and all facts pertinent to this contention to the Patent Counsel, with a copy of the Contracting Officer; or

(iii) Establishes that the failure to disclose did not result from the Recipient's fault or negligence.

(3) Pending written assignment of the patent application and patents on a subject invention determined by the Secretary of Energy or designee to be forfeited (such determination to be a final decision under the Disputes clause of this agreement), the Recipient shall be deemed to hold the invention and the patent applications and patents pertaining thereto in trust for the Government. The forfeiture provision of this paragraph (j) shall be in addition to and shall not supersede other rights and remedies which the Government may have with respect to subject inventions.

(End of clause)

RIGHTS IN DATA—GENERAL

(a) Definitions

Computer Data Bases, as used in this clause, means a collection of data in a form capable of, and for the purpose of, being stored in, processed, and operated on by a computer. The term does not include computer software.

Computer software, as used in this clause, means (i) computer programs which are data comprising a series of instructions, rules, routines or statements, regardless of the media in which recorded, that allow or cause a computer to perform a specific operation or series of operations and (ii) data comprising source code listings, design details, algorithms, processes, flow charts, formulae, and related material that would enable the computer program to be produced, created or compiled. The term does not include computer data bases.

Data, as used in this clause, means recorded information, regardless of form or the media on which it may be recorded. The term includes technical data and computer software. The term does not include information incidental to administration, such as financial, administrative, cost or pricing, or management information.

Form, fit, and function data, as used in this clause, means data relating to items, components, or processes that are sufficient to enable physical and functional interchangeability, as well as data identifying source, size, configuration, mating, and attachment characteristics, functional characteristics, and performance requirements; except that for computer software it means data identifying source, functional characteristics, and performance requirements but specifically

excludes the source code, algorithm, process, formulae, and flow charts of the software.

Limited rights, as used in this clause, means the rights of the Government in limited rights data as set forth in the Limited Rights Notice of subparagraph (g)(2) if included in this clause.

Limited rights data, as used in this clause, means data (other than computer software) developed at private expense that embody trade secrets or are commercial or financial and confidential or privileged.

Restricted computer software, as used in this clause, means computer software developed at private expense and that is a trade secret; is commercial or financial and is confidential or privileged; or is published copyrighted computer software; including minor modifications of such computer software.

Restricted rights, as used in this clause, means the rights of the Government in restricted computer software, as set forth in a Restricted Rights Notice of subparagraph (g)(3) if included in this clause, or as otherwise may be provided in a collateral agreement incorporated in and made part of this contract, including minor modifications of such computer software.

Technical data, as used in this clause, means data (other than computer software) which are of a scientific or technical nature. Technical data does not include computer software, but does include manuals and instructional materials and technical data formatted as a computer data base.

Unlimited rights, as used in this clause, means the right of the Government to use, disclose, reproduce, prepare derivative works, distribute copies to the public, and perform publicly and display publicly, in any manner and for any purpose, and to have or permit others to do so.

(b) Allocations of Rights

(1) Except as provided in paragraph (c) of this clause regarding copyright, the Government shall have unlimited rights in—

(i) Data first produced in the performance of this agreement;

(ii) Form, fit, and function data delivered under this agreement;

(iii) Data delivered under this agreement (except for restricted computer software) that constitute manuals or instructional and training material for installation, operation, or routine maintenance and repair of items, components, or processes delivered or furnished for use under this agreement; and

(iv) All other data delivered under this agreement unless provided otherwise for limited rights data or restricted computer software in accordance with paragraph (g) of this clause.

(2) The Recipient shall have the right to—

(i) Use, release to others, reproduce, distribute, or publish any data first produced or

specifically used by the Recipient in the performance of this agreement, unless provided otherwise in paragraph (d) of this clause;

(ii) Protect from unauthorized disclosure and use those data which are limited rights data or restricted computer software to the extent provided in paragraph (g) of this clause;

(iii) Substantiate use of, add or correct limited rights, restricted rights, or copyright notices and to take over appropriate action, in accordance with paragraphs (e) and (f) of this clause; and

(iv) Establish claim to copyright subsisting in data first produced in the performance of this agreement to the extent provided in subparagraph (c)(1) of this clause.

(c) Copyright

(1) Data first produced in the performance of this agreement. Unless provided otherwise in paragraph (d) of this clause, the Recipient may establish, without prior approval of the Contracting Officer, claim to copyright subsisting in data first produced in the performance of this agreement. When claim to copyright is made, the Recipient shall affix the applicable copyright notices of 17 U.S.C. 401 or 402 and acknowledgement of Government sponsorship (including agreement number) to the data when such data are delivered to the Government, as well as when the data are published or deposited for registration as a published work in the U.S. Copyright Office. For such copyrighted data, including computer software, the Recipient grants to the Government, and others acting on its behalf, a paid-up nonexclusive, irrevocable worldwide license in such copyrighted data to reproduce, prepare derivative works, distribute copies to the public, and perform publicly and display publicly, by or on behalf of the Government.

(2) Data not first produced in the performance of this agreement. The Recipient shall not, without prior written permission of the Contracting Officer, incorporate in data delivered under this agreement any data not first produced in the performance of this agreement and which contains the copyright notice of 17 U.S.C. 401 or 402, unless the Recipient identifies such data and grants to the Government, or acquires on its behalf, a license of the same scope as set forth in subparagraph (c)(1) of this clause; provided, however, that if such data are computer software the Government shall acquire a copyright license as set forth in subparagraph (g)(3) of this clause if included in this agreement or as otherwise may be provided in a collateral agreement incorporated in or made part of this agreement.

(3) Removal of copyright notices. The Government agrees not to remove any copyright notices placed on data pursuant to this paragraph (c), and to include such notices on all reproductions of the data.

(d) Release, Publication and Use of Data

(1) The Recipient shall have the right to use, release to others, reproduce, distribute, or publish any data first produced or specifically used by the Recipient in the performance of this agreement, except to the extent such data may be subject to the Federal export control or national security laws or regulations, or unless otherwise provided in this paragraph of this clause or expressly set forth in this agreement.

(2) The Recipient agrees that to the extent it receives or is given access to data necessary for the performance of this award, which contain restrictive markings, the Recipient shall treat the data in accordance with such markings unless otherwise specifically authorized in writing by the contracting officer.

(e) Unauthorized Marking of Data

(1) Notwithstanding any other provisions of this agreement concerning inspection or acceptance, if any data delivered under this agreement are marked with the notices specified in subparagraph (g)(2) or (g)(3) of this clause and use of such is not authorized by this clause, or if such data bears any other restrictive or limiting markings not authorized by this agreement, the Contracting Officer may at any time either return the data to the Recipient or cancel or ignore the markings. However, the following procedures shall apply prior to canceling or ignoring the markings.

(i) The Contracting Officer shall make written inquiry to the Recipient affording the Recipient 30 days from receipt of the inquiry to provide written justification to substantiate the propriety of the markings;

(ii) If the Recipient fails to respond or fails to provide written justification to substantiate the propriety of the markings within the 30-day period (or a longer time not exceeding 90 days approved in writing by the Contracting Officer for good cause shown), the Government shall have the right to cancel or ignore the markings at any time after said period and the data will no longer be made subject to any disclosure prohibitions.

(iii) If the Recipient provides written justification to substantiate the propriety of the markings within the period set in subparagraph (e)(1)(i) of this clause, the Contracting Officer shall consider such written justification and determine whether or not the markings are to be cancelled or ignored. If the Contracting Officer determines that the markings are authorized, the Recipient shall be so notified in writing. If the Contracting Officer determines, with concurrence of the head of the contracting activity, that the markings are not authorized, the

Department of Energy

Pt. 600, Subpt. D, App. A

Contracting Officer shall furnish the Recipient a written determination, which determination shall become the final agency decision regarding the appropriateness of the markings unless the Recipient files suit in a court of competent jurisdiction within 90 days of receipt of the Contracting Officer's decision. The Government shall continue to abide by the markings under this subparagraph (e)(1)(iii) until final resolution of the matter either by the Contracting Officer's determination becoming final (in which instance the Government shall thereafter have the right to cancel or ignore the markings at any time and the data will no longer be made subject to any disclosure prohibitions), or by final disposition of the matter by court decision if suit is filed.

(2) The time limits in the procedures set forth in subparagraph (e)(1) of this clause may be modified in accordance with agency regulations implementing the Freedom of Information Act (5 U.S.C. 552) if necessary to respond to a request thereunder.

(f) Omitted or Incorrect Markings

(1) Data delivered to the Government without either the limited rights or restricted rights notice as authorized by paragraph (g) of this clause, or the copyright notice required by paragraph (c) of this clause, shall be deemed to have been furnished with unlimited rights, and the Government assumes no liability for the disclosure, use, or reproduction of such data. However, to the extent the data has not been disclosed without restriction outside the Government, the Recipient may request, within 6 months (or a longer time approved by the Contracting Officer for good cause shown) after delivery or such data, permission to have notices placed on qualifying data at the Recipient's expense, and the Contracting Officer may agree to do so if the Recipient:

- (i) Identifies the data to which the omitted notice is to be applied;
- (ii) Demonstrates that the omission of the notice was inadvertent;
- (iii) Establishes that the use of the proposed notice is authorized; and
- (iv) Acknowledges that the Government has no liability with respect to the disclosure, use, or reproduction of any such data made prior to the addition of the notice or resulting from the omission of the notice.

(2) The Contracting Officer may also:

- (i) Permit correction at the Recipient's expense of incorrect notices if the Recipient identifies the data on which correction of the notice is to be made, and demonstrates that the correct notice is authorized, or
- (ii) Correct any incorrect notices.

(g) Protection of Limited Rights Data and Restricted Computer Software

When data other than that listed in subparagraphs (b)(1)(i), (ii), and (iii) of this clause are specified to be delivered under this agreement and qualify as either limited rights data or restricted computer software, if the Recipient desires to continue protection of such data, the Recipient shall withhold such data and not furnish them to the Government under this agreement. As a condition to this withholding, the Recipient shall identify the data being withheld and furnish form, fit, and function data in lieu thereof. Limited rights data that are formatted as a computer data base for delivery to the Government are to be treated as limited rights data and not restricted computer software.

(h) Subaward/Contract

The Recipient has the responsibility to obtain from its subrecipients/contractors all data and rights therein necessary to fulfill the Recipient's obligations to the Government under this agreement. If a subrecipient/contractor refuses to accept terms affording the Government such rights, the Recipient shall promptly bring such refusal to the attention of the Contracting Officer and not proceed with the subaward/contract award without further authorization.

(i) Additional Data Requirements

In addition to the data specified elsewhere in this agreement to be delivered, the Contracting Officer may, at anytime during agreement performance or within a period of 3 years after acceptance of all items to be delivered under this agreement, order any data first produced or specifically used in the performance of this agreement. This clause is applicable to all data ordered under this subparagraph. Nothing contained in this subparagraph shall require the Recipient to deliver any data the withholding of which is authorized by this clause, or data which are specifically identified in this agreement as not subject to this clause. When data are to be delivered under this subparagraph, the Recipient will be compensated for converting the data into the prescribed form, for reproduction, and for delivery.

(j) The recipient agrees, except as may be otherwise specified in this award for specific data items listed as not subject to this paragraph, that the Contracting Officer or an authorized representative may, up to three years after acceptance of all items to be delivered under this award, inspect at the Recipient's facility any data withheld pursuant to paragraph (g) of this clause, for purposes of verifying the Recipient's assertion pertaining to the limited rights or restricted rights status of the data or for evaluating work performance. Where the Recipient

whose data are to be inspected demonstrates to the Contracting Officer that there would be a possible conflict of interest if the inspection were made by a particular representative, the Contracting Officer shall designate an alternate inspector.

As prescribed in 600.325(d)(1), the following Alternate I and/or II may be inserted in the clause in the award instrument.

Alternate I:

(g)(2) Notwithstanding subparagraph (g)(1) of this clause, the agreement may identify and specify the delivery of limited rights data, or the Contracting Officer may require by written request the delivery of limited rights data that has been withheld or would otherwise be withholdable. If delivery of such data is so required, the Recipient may affix the following "Limited Rights Notice" to the data and the Government will thereafter treat the data, in accordance with such Notice:

LIMITED RIGHTS NOTICE

(a) These data are submitted with limited rights under Government agreement No. _____ (and subaward/contract No. _____, if appropriate). These data may be reproduced and used by the Government with the express limitation that they will not, without written permission of the Recipient, be used for purposes of manufacture nor disclosed outside the Government; except that the Government may disclose these data outside the Government for the following purposes, if any, provided that the Government makes such disclosure subject to prohibition against further use and disclosure:

(1) Use (except for manufacture) by Federal support services contractors within the scope of their contracts;

(2) This "limited rights data" may be disclosed for evaluation purposes under the restriction that the "limited rights data" be retained in confidence and not be further disclosed;

(3) This "limited rights data" may be disclosed to other contractors participating in the Government's program of which this Recipient is a part for information or use (except for manufacture) in connection with the work performed under their awards and under the restriction that the "limited rights data" be retained in confidence and not be further disclosed;

(4) This "limited rights data" may be used by the Government or others on its behalf for emergency repair or overhaul work under the restriction that the "limited rights data" be retained in confidence and not be further disclosed; and

(5) Release to a foreign government, or instrumentality thereof, as the interests of the United States Government may require, for information or evaluation, or for emergency repair or overhaul work by such government.

This Notice shall be marked on any reproduction of this data in whole or in part.

(b) This Notice shall be marked on any reproduction of these data, in whole or in part.

(End of notice)

Alternate II:

(g)(3)(i) Notwithstanding subparagraph (g)(1) of this clause, the agreement may identify and specify the delivery of restricted computer software, or the Contracting Officer may require by written request the delivery of restricted computer software that has been withheld or would otherwise be withholdable. If delivery of such computer software is so required, the Recipient may affix the following "Restricted Rights Notice" to the computer software and the Government will thereafter treat the computer software, subject to paragraphs (e) and (f) of this clause, in accordance with the Notice.

RESTRICTED RIGHTS NOTICE

(a) This computer software is submitted with restricted rights under Government Agreement No. _____ (and subaward/contract _____, if appropriate). It may not be used, reproduced, or disclosed by the Government except as provided in paragraph (b) of this Notice or as otherwise expressly stated in the agreement.

(b) This computer software may be—

(1) Used or copies for use in or with the computer or computers for which it was acquired, including use at any Government installation to which such computer or computers may be transferred;

(2) Used or copied for use in a backup computer if any computer for which it was acquired is inoperative;

(3) Reproduced for safekeeping (archiv3es) or backup purposes;

(4) Modified, adapted, or combined with other computer software, provided that the modified, combined, or adapted portions of the derivative software are made subject to the same restricted rights;

(5) Disclosed to and reproduced for use by support service Recipients in accordance with subparagraph (b)(1) through (4) of this clause, provided the Government makes such disclosure or reproduction subject to these restricted rights; and

(6) Used or copied for use in or transferred to a replacement computer.

(c) Notwithstanding the foregoing, if this computer software is published copyrighted computer software, it is licensed to the Government, without disclosure prohibitions, with the minimum rights set forth in paragraph (b) of this clause.

(d) Any other rights or limitations regarding the use, duplication, or disclosure of this computer software are to be expressly stated, in, or incorporated in, the agreement.

Department of Energy

Pt. 600, Subpt. D, App. A

(e) This Notice shall be marked on any reproduction of this computer software, in whole or in part.

(End of notice)

(ii) Where it is impractical to include the Restricted Rights Notice on restricted computer software, the following short-form Notice may be used in lieu thereof:

RESTRICTED RIGHTS NOTICE

Use, reproduction, or disclosure is subject to restrictions set forth in agreement No. _____ (and subaward/contract _____, if appropriate) with _____ (name of Recipient and subrecipient/contractor).

(End of notice)

(iii) If restricted computer software is delivered with the copyright notice of 17 U.S.C. 401, it will be presumed to be published copyrighted computer software licensed to the government without disclosure prohibitions, with the minimum rights set forth in paragraph (b) of this clause, unless the Recipient includes the following statement with such copyright notice: "Unpublished—rights reserved under the Copyright Laws of the United States."

(End of clause)

RIGHTS IN DATA—PROGRAMS COVERED UNDER SPECIAL DATA STATUTES

(a) Definitions

Computer Data Bases, as used in this clause, means a collection of data in a form capable of, and for the purpose of, being stored in, processed, and operated on by a computer. The term does not include computer software.

Computer software, as used in this clause, means (i) computer programs which are data comprising a series of instructions, rules, routines, or statements, regardless of the media in which recorded, that allow or cause a computer to perform a specific operation or series of operations and (ii) data comprising source code listings, design details, algorithms, processes, flow charts, formulae and related material that would enable the computer program to be produced, created or compiled. The term does not include computer data bases.

Data, as used in this clause, means recorded information, regardless of form or the media on which it may be recorded. The term includes technical data and computer software. The term does not include information incidental to administration, such as financial, administrative, cost or pricing or management information.

Form, fit, and function data, as used in this clause, means data relating to items, components, or processes that are sufficient to en-

able physical and functional interchangeability as well as data identifying source, size, configuration, mating and attachment characteristics, functional characteristics, and performance requirements except that for computer software it means data identifying source, functional characteristics, and performance requirements but specifically excludes the source code, algorithm, process, formulae, and flow charts of the software.

Limited rights data, as used in this clause, means data (other than computer software) developed at private expense that embody trade secrets or are commercial or financial and confidential or privileged.

Restricted computer software, as used in this clause, means computer software developed at private expense and that is a trade secret; is commercial or financial and confidential or privileged; or is published copyrighted computer software; including modifications of such computer software.

Protected data, as used in this clause, means technical data or commercial or financial data first produced in the performance of the award which, if it had been obtained from and first produced by a non-federal party, would be a trade secret or commercial or financial information that is privileged or confidential under the meaning of 5 U.S.C. 552(b)(4) and which data is marked as being protected data by a party to the award.

Protected rights, as used in this clause, mean the rights in protected data set forth in the Protected Rights Notice of paragraph (g) of this clause.

Technical data, as used in this clause, means that data which are of a scientific or technical nature. Technical data does not include computer software, but does include manuals and instructional materials and technical data formatted as a computer data base.

Unlimited rights, as used in this clause, means the right of the Government to use, disclose, reproduce, prepare derivative works, distribute copies to the public, and perform publicly and display publicly, in any manner and for any purpose whatsoever, and to have or permit others to do so.

(b) Allocation of Rights

(1) Except as provided in paragraph (c) of this clause regarding copyright, the Government shall have unlimited rights in—

(i) Data specifically identified in this agreement as data to be delivered without restriction;

(ii) Form, fit, and function data delivered under this agreement;

(iii) Data delivered under this agreement (except for restricted computer software) that constitute manuals or instructional and training material for installation, operation, or routine maintenance and repair of items, components, or processes delivered or furnished for use under this agreement; and

(iv) All other data delivered under this agreement unless provided otherwise for protected data in accordance with paragraph (g) of this clause or for limited rights data or restricted computer software in accordance with paragraph (h) of this clause.

(2) The Recipient shall have the right to—

(i) Protect rights in protected data delivered under this agreement in the manner and to the extent provided in paragraph (g) of this clause;

(ii) Withhold from delivery those data which are limited rights data or restricted computer software to the extent provided in paragraph (h) of this clause;

(iii) Substantiate use of, add, or correct protected rights or copyrights notices and to take other appropriate action, in accordance with paragraph (e) of this clause; and

(iv) Establish claim to copyright subsisting in data first produced in the performance of this agreement to the extent provided in subparagraph (c)(1) of this clause.

(c) Copyright

(1) Data first produced in the performance of this agreement. Except as otherwise specifically provided in this agreement, the Recipient may establish, without the prior approval of the Contracting Officer, claim to copyright subsisting in any data first produced in the performance of this agreement. If claim to copyright is made, the Recipient shall affix the applicable copyright notice of 17 U.S.C. 401 or 402 and acknowledgment of Government sponsorship (including agreement number) to the data when such data are delivered to the Government, as well as when the data are published or deposited for registration as a published work in the U.S. Copyright Office. For such copyrighted data, including computer software, the Recipient grants to the Government, and others acting on its behalf, a paid-up nonexclusive, irrevocable, worldwide license to reproduce, prepare derivative works, distribute copies to the public, and perform publicly and display publicly, by or on behalf of the Government, for all such data.

(2) Data not first produced in the performance of this agreement. The Recipient shall not, without prior written permission of the Contracting Officer, incorporate in data delivered under this agreement any data that are not first produced in the performance of this agreement and that contain the copyright notice of 17 U.S.C. 401 or 402, unless the Recipient identifies such data and grants to the Government, or acquires on its behalf, a license of the same scope as set forth in subparagraph (c)(1) of this clause; provided, however, that if such data are computer software, the Government shall acquire a copyright license as set forth in subparagraph (h)(3) of this clause if included in this agreement or as otherwise may be provided in a

collateral agreement incorporated or made a part of this agreement.

(3) Removal of copyright notices. The Government agrees not to remove any copyright notices placed on data pursuant to this paragraph (c), and to include such notices on all reproductions of the data.

(d) Release, Publication and Use of Data

(1) The Receipt shall have the right to use, release to others, reproduce, distribute, or publish any data first produced or specifically used by the Recipient in the performance of this contract, except to the extent such data may be subject to the Federal export control or national security laws or regulations, or unless otherwise provided in this paragraph of this clause or expressly set forth in this contract.

(2) The Recipient agrees that to the extent it receives or is given access to data necessary for the performance of this agreement which contain restrictive markings, the Recipient shall treat the data in accordance with such markings unless otherwise specifically authorized in writing by the Contracting Officer.

(e) Unauthorized Marking of Data

(1) Notwithstanding any other provisions of this agreement concerning inspection or acceptance, if any data delivered under this agreement are marked with the notices specified in subparagraph (g)(2) or (g)(3) of this clause and use of such is not authorized by this clause, or if such data bears any other restrictive or limiting markings not authorized by this agreement, the Contracting Officer may at any time either return the data to the Recipient or cancel or ignore the markings. However, the following procedures shall apply prior to canceling or ignoring the markings.

(i) The Contracting Officer shall make written inquiry to the Recipient affording the Recipient 30 days from receipt of the inquiry to provide written justification to substantiate the propriety of the markings;

(ii) If the Recipient fails to respond or fails to provide written justification to substantiate the propriety of the markings within the 30-day period (or a longer time not exceeding 90 days approved in writing by the Contracting Officer for good cause shown), the Government shall have the right to cancel or ignore the markings at any time after said period and the data will no longer be made subject to any disclosure prohibitions.

(iii) If the Recipient provides written justification to substantiate the propriety of the markings within the period set in subdivision (e)(1)(i) of this clause, the Contracting Officer shall consider such written justification and determine whether or not the markings are to be cancelled or ignored. If the Contracting Officer determines that

Department of Energy

Pt. 600, Subpt. D, App. A

the markings are authorized, the Recipient shall be so notified in writing. If the Contracting Officer determines, with concurrence of the head of the contracting activity, that the markings are not authorized, the Contracting Officer shall furnish the Recipient a written determination, which determination shall become the final agency decision regarding the appropriateness of the markings unless the Recipient files suit in a court of competent jurisdiction within 90 days of receipt of the Contracting Officer's decision. The Government shall continue to abide by the markings under this subdivision (e)(1)(iii) until final resolution of the matter either by the Contracting Officer's determination become final (in which instance the Government shall thereafter have the right to cancel or ignore the markings at any time and the data will no longer be made subject to any disclosure prohibitions), or by final disposition of the matter by court decision if suit is filed.

(2) The time limits in the procedures set forth in subparagraph (e)(1) of this clause may be modified in accordance with agency regulations implementing the Freedom of Information Act (5 U.S.C. 552) if necessary to respond to a request thereunder.

(f) Omitted or Incorrect Markings

(1) Data delivered to the Government without either the limited rights or restricted rights notice as authorized by paragraph (g) of this clause, or the copyright notice required by paragraph (c) of this clause, shall be deemed to have been furnished with unlimited rights, and the Government assumes no liability for the disclosure, use, or reproduction of such data. However, to the extent the data has not been disclosed without restriction outside the Government, the Recipient may request, within 6 months (or a longer time approved by the Contracting Officer for good cause shown) after delivery of such data, permission to have notices placed on qualifying data at the Recipient's expense, and the Contracting Officer may agree to do so if the Recipient—

- (i) Identifies the data to which the omitted notice is to be applied;
- (ii) Demonstrates that the omission of the notice was inadvertent;
- (iii) Establishes that the use of the proposed notice is authorized; and
- (iv) Acknowledges that the Government has no liability with respect to the disclosure, use, or reproduction of any such data made prior to the addition of the notice or resulting from the omission of the notice.

(2) The Contracting Officer may also:

- (i) Permit correction at the Recipient's expense of incorrect notices if the Recipient identifies the data on which correction of the notice is to be made, and demonstrates that the correct notice is authorized; or
- (ii) Correct any incorrect notices.

(g) Rights to Protected Data

(1) The Recipient may, with the concurrence of DOE, claim and mark as protected data, any data first produced in the performance of this award that would have been treated as a trade secret if developed at private expense. Any such claimed "protected data" will be clearly marked with the following Protected Rights Notice, and will be treated in accordance with such Notice, subject to the provisions of paragraphs (e) and (f) of this clause.

PROTECTED RIGHTS NOTICE

These protected data were produced under agreement no. _____ with the U.S. Department of Energy and may not be published, disseminated, or disclosed to others outside the Government until (NOTE:) The period of protection of such data is fully negotiable, but cannot exceed the applicable statutorily authorized maximum), unless express written authorization is obtained from the recipient. Upon expiration of the period of protection set forth in this Notice, the Government shall have unlimited rights in this data. This Notice shall be marked on any reproduction of this data, in whole or in part.

(End of notice)

(2) Any such marked Protected Data may be disclosed under obligations of confidentiality for the following purposes:

(a) For evaluation purposes under the restriction that the "Protected Data" be retained in confidence and not be further disclosed; or

(b) To subcontractors or other team members performing work under the Government's (insert name of program or other applicable activity) program of which this award is a part, for information or use in connection with the work performed under their activity, and under the restriction that the Protected Data be retained in confidence and not be further disclosed.

(3) The obligations of confidentiality and restrictions on publication and dissemination shall end for any Protected Data.

(a) At the end of the protected period;

(b) If the data becomes publicly known or available from other sources without a breach of the obligation of confidentiality with respect to the Protected Data;

(c) If the same data is independently developed by someone who did not have access to the Protected Data and such data is made available without obligations of confidentiality; or

(d) If the Recipient disseminates or authorizes another to disseminate such data without obligations of confidentiality.

(4) However, the Recipient agrees that the following types of data are not considered to be protected and shall be provided to the Government when required by this award

without any claim that the data are Protected Data. The parties agree that notwithstanding the following lists of types of data, nothing precludes the Government from seeking delivery of additional data in accordance with this award, or from making publicly available additional non-protected data, nor does the following list constitute any admission by the Government that technical data not on the list is Protected Data. (NOTE: It is expected that this paragraph will specify certain types of mutually agreed upon data that will be available to the public and will not be asserted by the recipient/contractor as limited rights or protected data).

(5) The Government's sole obligation with respect to any protected data shall be as set forth in this paragraph (g).

(h) Protection of Limited Rights Data

When data other than that listed in subparagraphs (b)(1)(i), (ii), and (iii) of this clause are specified to be delivered under this agreement and such data qualify as either limited rights data or restricted computer software, the Recipient, if the Recipient desires to continue protection of such data, shall withhold such data and not furnish them to the Government under this agreement. As a condition to this withholding the Recipient shall identify the data being withheld and furnish form, fit, and function data in lieu thereof.

(i) Subaward/Contract

The Recipient has the responsibility to obtain from its subrecipients/contractors all data and rights therein necessary to fulfill the Recipient's obligations to the Government under this agreement. If a subrecipient/contractor refuses to accept terms affording the Government such rights, the Recipient shall promptly bring such refusal to the attention of the Contracting Officer and not proceed with subaward/contract award without further authorization.

(j) Additional Data Requirements

In addition to the data specified elsewhere in this agreement to be delivered, the Contracting Officer may, at anytime during agreement performance or within a period of 3 years after acceptance of all items to be delivered under this agreement, order any data first produced or specifically used in the performance of this agreement. This clause is applicable to all data ordered under this subparagraph. Nothing contained in this subparagraph shall require the Recipient to deliver any data the withholding of which is authorized by this clause or data which are specifically identified in this agreement as not subject to this clause. When data are to be delivered under this subparagraph, the Recipient will be compensated for converting

the data into the prescribed form, for reproduction, and for delivery.

(k) The Recipient agrees, except as may be otherwise specified in this agreement for specific data items listed as not subject to this paragraph, that the Contracting Officer or an authorized representative may, up to three years after acceptance of all items to be delivered under this contract, inspect at the Recipient's facility any data withheld pursuant to paragraph (h) of this clause, for purposes of verifying the Recipient's assertion pertaining to the limited rights or restricted rights status of the data or for evaluating work performance. Where the Recipient whose data are to be inspected demonstrates to the Contracting Officer that there would be a possible conflict of interest if the inspection were made by a particular representative, the Contracting Officer shall designate an alternate inspector.

As prescribed in 600.325(e)(2), the following Alternate I and/or II may be inserted in the clause in the award instrument.

Alternate I:

(h)(2) Notwithstanding subparagraph (h)(1) of this clause, the agreement may identify and specify the delivery of limited rights data, or the Contracting Officer may require by written request the delivery of limited rights data that has been withheld or would otherwise be withholdable. If delivery of such data is so required, the Recipient may affix the following "Limited Rights Notice" to the data and the Government will thereafter treat the data, in accordance with such Notice:

LIMITED RIGHTS NOTICE

(a) These data are submitted with limited rights under Government agreement No. _____ (and subaward/contract No. _____, if appropriate). These data may be reproduced and used by the Government with the express limitation that they will not, without written permission of the Recipient, be used for purposes of manufacture nor disclosed outside the Government; except that the Government may disclose these data outside the Government for the following purposes, if any, provided that the Government makes such disclosure subject to prohibition against further use and disclosure:

(1) Use (except for manufacture) by Federal support services contractors within the scope of their contracts;

(2) This "limited rights data" may be disclosed for evaluation purposes under the restriction that the "limited rights data" be retained in confidence and not be further disclosed;

(3) This "limited rights data" may be disclosed to other contractors participating in the Government's program of which this Recipient is a part for information or use (except for manufacture) in connection with the

Department of Energy

Pt. 600, Subpt. D, App. B

work performed under their awards and under the restriction that the "limited rights data" be retained in confidence and not be further disclosed;

(4) This "limited rights data" may be used by the Government or others on its behalf for emergency repair or overhaul work under the restriction that the "limited rights data" be retained in confidence and not be further disclosed; and

(5) Release to a foreign government, or instrumentality thereof, as the interests of the United States Government may require, for information or evaluation, or for emergency repair or overhaul work by such government. This Notice shall be marked on any reproduction of this data in whole or in part.

(b) This Notice shall be marked on any reproduction of these data, in whole or in part.

(End of notice)

Alternate II:

(h)(3)(i) Notwithstanding subparagraph (h)(1) of this clause, the agreement may identify and specify the delivery of restricted computer software, or the Contracting Officer may require by written request the delivery of restricted computer software that has been withheld or would otherwise be withholdable. If delivery of such computer software is so required, the Recipient may affix the following "Restricted Rights Notice" to the computer software and the Government will thereafter treat the computer software, subject to paragraphs (d) and (e) of this clause, in accordance with the Notice:

RESTRICTED RIGHTS NOTICE

(a) This computer software is submitted with restricted rights under Government Agreement No. _____ (and subaward/contract _____, if appropriate). It may not be used, reproduced, or disclosed by the Government except as provided in paragraph (c) of this Notice or as otherwise expressly stated in the agreement.

(b) This computer software may be—

(1) Used or copied for use in or with the computer or computers for which it was acquired, including use at any Government installation to which such computer or computers may be transferred;

(2) Used or copies for use in a backup computer if any computer for which it was acquired is inoperative;

(3) Reproduced for safekeeping (archives) or backup purposes;

(4) Modified, adapted, or combined with other computer software, provided that the modified, combined, or adapted portions of the derivative software are made subject to the same restricted rights;

(5) Disclosed to and reproduced for use by Federal support service Contractors in accordance with subparagraphs (b)(1) through

(4) of this clause, provided the Government makes such disclosure or reproduction subject to these restricted rights; and

(6) Used or copies for use in or transferred to a replacement computer.

(c) Notwithstanding the foregoing, if this computer software is published copyrighted computer software, it is licensed to the Government, without disclosure prohibitions, with the minimum rights set forth in paragraph (b) of this clause.

(d) Any other rights or limitations regarding the use, duplication, or disclosure of this computer software are to be expressly stated in, or incorporated in, the agreement.

(e) This Notice shall be marked on any reproduction of this computer software, in whole or in part.

(End of notice)

(ii) Where it is impractical to include the Restricted Rights Notice on restricted computer software, the following short-form Notice may be used in lieu thereof:

RESTRICTED RIGHTS NOTICE

Use, reproduction, or disclosure is subject to restrictions set forth in Agreement No. _____ (and subaward/contract _____, if appropriate) with _____ (name of Recipient and subrecipient/contractor).

(End of notice)

(iii) If restricted computer software is delivered with the copyright notice of 17 U.S.C. 401, it will be presumed to be published copyrighted computer software licensed to the Government without disclosure prohibitions, with the minimum rights set forth in paragraph (b) of this clause, unless the Recipient includes the following statement with such copyright notice: "Unpublished—rights reserved under the Copyright Laws of the United States."

(End of clause)

APPENDIX B TO SUBPART D OF PART 600—CONTRACT PROVISIONS

All contracts awarded by a recipient, including those for amounts less than the simplified acquisition threshold, must contain the following provisions as applicable:

1. *Equal Employment Opportunity*—All contracts must contain a provision requiring compliance with E.O. 11246 (3 CFR, 1964-1965 Comp., p. 339), "Equal Employment Opportunity," as amended by E.O. 11375 (3 CFR, 1966-1970 Comp., p. 684), "Amending Executive Order 11246 Relating to Equal Employment Opportunity," and as supplemented by regulations at 41 CFR chapter 60, "Office of Federal Contract Compliance Programs, Equal Employment Opportunity, Department of Labor."

2. *Copeland “Anti-Kickback” Act (18 U.S.C. 874 and 40 U.S.C. 276c)*—All contracts and subawards in excess of \$2,000 for construction or repair awarded by recipients and subrecipients must include a provision for compliance with the Copeland “Anti-Kickback” Act (18 U.S.C. 874), as supplemented by Department of Labor regulations (29 CFR part 3, “Contractors and Subcontractors on Public Building or Public Work Financed in Whole or in Part by Loans or Grants from the United States”). The Act provides that each contractor or subrecipient must be prohibited from inducing, by any means, any person employed in the construction, completion, or repair of public work, to give up any part of the compensation to which he is otherwise entitled. The recipient must report all suspected or reported violations to the responsible DOE contracting officer.

3. *Contact Work Hours and Safety Standards Act (40 U.S.C. 327–333)*—Where applicable, all contracts awarded by recipients in excess of \$100,000 for construction and other purposes that involve the employment of mechanics or laborers must include a provision for compliance with Sections 102 and 107 of the Contract Work Hours and Safety Standards Act (40 U.S.C. 327–333), as supplemented by Department of Labor regulations (29 CFR part 5). Under Section 102 of the Act, each contractor is required to compute the wages of every mechanic and laborer on the basis of a standard work week of 40 hours. Work in excess of the standard work week is permissible provided that the worker is compensated at a rate of not less than 1½ times the basic rate of pay for all hours worked in excess of 40 hours in the work week. Section 107 of the Act is applicable to construction work and provides that no laborer or mechanic is required to work in surroundings or under working conditions which are unsanitary, hazardous or dangerous. These requirements do not apply to the purchases of supplies or materials or articles ordinarily available on the open market, or contracts for transportation or transmission of intelligence.

4. *Rights to Inventions and Data Made Under a Contract or Agreement*—Contracts or agreements for the performance of experimental, development, or research work must provide for the rights of the Federal Government and the recipient in any resulting invention in accordance with 10 CFR 600.325 and Appendix A—Patent and Data Rights to Subpart D, Part 600.

5. *Clean Air Act (42 U.S.C. 7401 et seq.) and the Federal Water Pollution Control Act (33 U.S.C. 1251 et seq.), as amended*—Contracts and subawards of amounts in excess of \$100,000 must contain a provision that requires the recipient to agree to comply with all applicable standards, orders or regula-

tions issued pursuant to the Clean Air Act (41 U.S.C. 7401 et seq.) and the Federal Water Pollution control act as amended (33 U.S.C. 1251 et seq.). Violations must be reported to the responsible DOE contracting officer and the Regional Office of the Environmental Protection Agency (EPA).

6. *Byrd Anti-Lobbying Amendment (31 U.S.C. 1352)*—Contractors who apply or bid for an award of \$100,000 or more must file the required certification. Each tier certifies to the tier above that it will not and has not used Federal appropriated funds to pay any person or organization for influencing or attempting to influence an officer or employee of any agency, a member of Congress, officer or employee of Congress, or an employee of a member of Congress in connection with obtaining any Federal contract, grant or any other award covered by 31 U.S.C.1352. Each tier must also disclose any lobbying with non-Federal funds that takes place in connection with obtaining any Federal award. Such disclosures are forwarded from tier to tier up to the recipient.

7. *Debarment and Suspension (E.O.s 12549 and 12689)*—Contract awards that exceed the simplified acquisition threshold and certain other contract awards must not be made to parties listed on nonprocurement portion of the General Services Administration’s Lists of Parties Excluded from Federal Procurement and Nonprocurement Programs in accordance with E.O.s 12549 (3 CFR, 1986 Comp., p. 189) and 12689 (3 CFR, 1989 Comp., p. 235), “Debarment and Suspension.” This list contains the names of parties debarred, suspended, or otherwise excluded by agencies, and contractors declared ineligible under statutory or regulatory authority other than E.O. 12549. Contractors with awards that exceed the small purchase threshold must provide the required certification regarding its exclusion status and that of its principals.

8. *Davis-Bacon Act (40 U.S.C. 276a)*—As a general rule, it is unlikely that the Davis-Bacon Act, which among other things requires payment of prevailing wages on projects for the construction of public works, would apply to financial assistance awards. However, the presence of certain factors (e.g., requirement of particular program statutes; title to a construction facility resting in the Government) might necessitate a closer analysis of the award, to determine if the Davis-Bacon Act would apply in the particular factual situation presented.

Subpart E [Reserved]

Subpart F—Eligibility Determination for Certain Financial Assistance Programs—General Statement of Policy

SOURCE: 60 FR 65514, Dec. 20, 1995, unless otherwise noted.

§ 600.500 Purpose and scope.

This subpart implements section 2306 of the Energy Policy Act of 1992, 42 U.S.C. 13525, and sets forth a general statement of policy, including procedures and interpretations, for the guidance of implementing DOE officials in making mandatory pre-award determinations of eligibility for financial assistance under Titles XX through XXIII of that Act.

§ 600.501 Definitions.

The definitions in §600.3 of this part, including the definition of the term “financial assistance,” are applicable to this subpart. In addition, as used in this subpart:

Act means the Energy Policy Act of 1992.

Company means any business entity other than an organization of the type described in section 501(c)(3) of the Internal Revenue Code of 1954 (26 U.S.C. §501 (c)(3)).

Covered program means a program under Titles XX through XXIII of the Act. (A list of covered programs, updated periodically as appropriate, is maintained and published by the Department of Energy.)

Parent company means a company that:

(1) Exercises ultimate ownership of the applicant company either directly, by ownership of a majority of that company’s voting securities, or indirectly, by control over a majority of that company’s voting securities through one or more intermediate subsidiary companies or otherwise, and

(2) Is not itself subject to the ultimate ownership control of another company.

United States means the several States, the District of Columbia, and all commonwealths, territories, and possessions of the United States.

United States-owned company means:

(1) A company that has majority ownership by individuals who are citizens of the United States, or

(2) A company organized under the laws of a State that either has no parent company or has a parent company organized under the laws of a State.

Voting security has the meaning given the term in the Public Utility Holding Company Act (15 U.S.C. 15b(17)).

§ 600.502 What must DOE determine.

A company shall be eligible to receive an award of financial assistance under a covered program only if DOE finds that—

(a) Consistent with §600.503, the company’s participation in a covered program would be in the economic interest of the United States; and

(b) The company is either—

(1) A United States-owned company; or

(2) Incorporated or organized under the laws of any State and has a parent company which is incorporated or organized under the laws of a country which—

(i) Affords to the United States-owned companies opportunities comparable to those afforded to any other company, to participate in any joint venture similar to those authorized under the Act;

(ii) Affords to United States-owned companies local investment opportunities comparable to those afforded to any other company; and

(iii) Affords adequate and effective protection for the intellectual property rights of United States-owned companies.

§ 600.503 Determining the economic interest of the United States.

In determining whether participation of an applicant company in a covered program would be in the economic interest of the United States under §600.502(a), DOE may consider any evidence showing that a financial assistance award would be in the economic interest of the United States including, but not limited to—

(a) Investments by the applicant company and its affiliates in the United States in research, development, and manufacturing (including, for example, the manufacture of major

§ 600.504

components or subassemblies in the United States);

(b) Significant contributions to employment in the United States by the applicant company and its affiliates; and

(c) An agreement by the applicant company, with respect to any technology arising from the financial assistance being sought—

(1) To promote the manufacture within the United States of products resulting from that technology (taking into account the goals of promoting the competitiveness of United States industry); and

(2) To procure parts and materials from competitive suppliers.

§ 600.504 Information an applicant must submit.

(a) Any applicant for financial assistance under a covered program shall submit with the application for financial assistance, or at such later time as may be specified by DOE, evidence for DOE to consider in making findings required under § 600.502(a) and findings concerning ownership status under § 600.502(b).

(b) If an applicant for financial assistance is submitting evidence relating to future undertakings, such as an agreement under § 600.503(c) to promote manufacture in the United States of products resulting from a technology developed with financial assistance or to procure parts and materials from competitive suppliers, the applicant shall submit a representation affirming acceptance of these undertakings. The applicant should also briefly describe its plans, if any, for any manufacturing of products arising from the program-supported research and development, including the location where such manufacturing is expected to occur.

(c) If an applicant for financial assistance is claiming to be a United States-owned company, the applicant must submit a representation affirming that it falls within the definition of that term provided in § 600.501.

(d) DOE may require submission of additional information deemed necessary to make any portion of the determination required by § 600.502.

10 CFR Ch. II (1–1–16 Edition)

§ 600.505 Other information DOE may consider.

In making the determination under § 600.502(b)(2), DOE may—

(a) consider information on the relevant international and domestic law obligations of the country of incorporation of the parent company of an applicant;

(b) consider information relating to the policies and practices of the country of incorporation of the parent company of an applicant with respect to:

(1) The eligibility criteria for, and the experience of United States-owned company participation in, energy-related research and development programs;

(2) Local investment opportunities afforded to United States-owned companies; and

(3) Protection of intellectual property rights of United States-owned companies;

(c) Seek and consider advice from other federal agencies, as appropriate; and

(d) Consider any publicly available information in addition to the information provided by the applicant.

Subpart A—General

§ 601.100 Conditions on use of funds.

(a) No appropriated funds may be expended by the recipient of a Federal contract, grant, loan, or cooperative agreement to pay any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with any of the following covered Federal actions: the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan, or cooperative agreement.

(b) Each person who requests or receives from an agency a Federal contract, grant, loan, or cooperative agreement shall file with that agency a certification, set forth in appendix A, that the person has not made, and will not make, any payment prohibited by paragraph (a) of this section.

(c) Each person who requests or receives from an agency a Federal contract, grant, loan, or a cooperative agreement shall file with that agency a disclosure form, set forth in appendix B, if such person has made or has agreed to make any payment using nonappropriated funds (to include profits from any covered Federal action), which would be prohibited under paragraph (a) of this section if paid for with appropriated funds.

(d) Each person who requests or receives from an agency a commitment providing for the United States to insure or guarantee a loan shall file with that agency a statement, set forth in appendix A, whether that person has made or has agreed to make any payment to influence or attempt to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with that loan insurance or guarantee.

(e) Each person who requests or receives from an agency a commitment providing for the United States to insure or guarantee a loan shall file with that agency a disclosure form, set forth in appendix B, if that person has made or has agreed to make any payment to influence or attempt to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with that loan insurance or guarantee.

§ 601.105 Definitions.

For purposes of this part:

(a) *Agency*, as defined in 5 U.S.C. 552(f), includes Federal executive departments and agencies as well as independent regulatory commissions and Government corporations, as defined in 31 U.S.C. 9101(1).

(b) *Covered Federal action* means any of the following Federal actions:

(1) The awarding of any Federal contract;

(2) The making of any Federal grant;

(3) The making of any Federal loan;

(4) The entering into of any cooperative agreement; and,

(5) The extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan, or cooperative agreement.

Covered Federal action does not include receiving from an agency a commitment providing for the United States to insure or guarantee a loan. Loan guarantees and loan insurance are addressed independently within this part.

(c) *Federal contract* means an acquisition contract awarded by an agency, including those subject to the Federal Acquisition Regulation (FAR), and any

Department of Energy

§ 601.105

other acquisition contract for real or personal property or services not subject to the FAR.

(d) *Federal cooperative agreement* means a cooperative agreement entered into by an agency.

(e) *Federal grant* means an award of financial assistance in the form of money, or property in lieu of money, by the Federal Government or a direct appropriation made by law to any person. The term does not include technical assistance which provides services instead of money, or other assistance in the form of revenue sharing, loans, loan guarantees, loan insurance, interest subsidies, insurance, or direct United States cash assistance to an individual.

(f) *Federal loan* means a loan made by an agency. The term does not include loan guarantee or loan insurance.

(g) *Indian tribe* and *tribal organization* have the meaning provided in section 4 of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450B). Alaskan Natives are included under the definitions of Indian tribes in that Act.

(h) *Influencing or attempting to influence* means making, with the intent to influence, any communication to or appearance before an officer or employee or any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with any covered Federal action.

(i) *Loan guarantee* and *loan insurance* means an agency's guarantee or insurance of a loan made by a person.

(j) *Local government* means a unit of government in a State and, if chartered, established, or otherwise recognized by a State for the performance of a governmental duty, including a local public authority, a special district, an intrastate district, a council of governments, a sponsor group representative organization, and any other instrumentality of a local government.

(k) *Officer or employee of an agency* includes the following individuals who are employed by an agency:

(1) An individual who is appointed to a position in the Government under title 5, U.S. Code, including a position under a temporary appointment;

(2) A member of the uniformed services as defined in section 101(3), title 37, U.S. Code;

(3) A special Government employee as defined in section 202, title 18, U.S. Code; and,

(4) An individual who is a member of a Federal advisory committee, as defined by the Federal Advisory Committee Act, title 5, U.S. Code appendix 2.

(l) *Person* means an individual, corporation, company, association, authority, firm, partnership, society, State, and local government, regardless of whether such entity is operated for profit or not for profit. This term excludes an Indian tribe, tribal organization, or any other Indian organization with respect to expenditures specifically permitted by other Federal law.

(m) *Reasonable compensation* means, with respect to a regularly employed officer or employee of any person, compensation that is consistent with the normal compensation for such officer or employee for work that is not furnished to, not funded by, or not furnished in cooperation with the Federal Government.

(n) *Reasonable payment* means, with respect to professional and other technical services, a payment in an amount that is consistent with the amount normally paid for such services in the private sector.

(o) *Recipient* includes all contractors, subcontractors at any tier, and subgrantees at any tier of the recipient of funds received in connection with a Federal contract, grant, loan, or cooperative agreement. The term excludes an Indian tribe, tribal organization, or any other Indian organization with respect to expenditures specifically permitted by other Federal law.

(p) *Regularly employed* means, with respect to an officer or employee of a person requesting or receiving a Federal contract, grant, loan, or cooperative agreement or a commitment providing for the United States to insure or guarantee a loan, an officer or employee who is employed by such person for at least 130 working days within one year immediately preceding the date of the submission that initiates agency consideration of such person for

§ 601.110

10 CFR Ch. II (1-1-16 Edition)

receipt of such contract, grant, loan, cooperative agreement, loan insurance commitment, or loan guarantee commitment. An officer or employee who is employed by such person for less than 130 working days within one year immediately preceding the date of the submission that initiates agency consideration of such person shall be considered to be regularly employed as soon as he or she is employed by such person for 130 working days.

(q) *State* means a State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, a territory or possession of the United States, an agency or instrumentality of a State, and a multi-State, regional, or interstate entity having governmental duties and powers.

§ 601.110 Certification and disclosure.

(a) Each person shall file a certification, and a disclosure form, if required, with each submission that initiates agency consideration of such person for:

(1) Award of a Federal contract, grant, or cooperative agreement exceeding \$100,000; or

(2) An award of a Federal loan or a commitment providing for the United States to insure or guarantee a loan exceeding \$150,000.

(b) Each person shall file a certification, and a disclosure form, if required, upon receipt by such person of:

(1) A Federal contract, grant, or cooperative agreement exceeding \$100,000; or

(2) A Federal loan or a commitment providing for the United States to insure or guarantee a loan exceeding \$150,000,

unless such person previously filed a certification, and a disclosure form, if required, under paragraph (a) of this section.

(c) Each person shall file a disclosure form at the end of each calendar quarter in which there occurs any event that requires disclosure or that materially affects the accuracy of the information contained in any disclosure form previously filed by such person under paragraphs (a) or (b) of this section. An event that materially affects the accuracy of the information reported includes:

(1) A cumulative increase of \$25,000 or more in the amount paid or expected to be paid for influencing or attempting to influence a covered Federal action; or

(2) A change in the person(s) or individual(s) influencing or attempting to influence a covered Federal action; or

(3) A change in the officer(s), employee(s), or Member(s) contacted to influence or attempt to influence a covered Federal action.

(d) Any person who requests or receives from a person referred to in paragraphs (a) or (b) of this section:

(1) A subcontract exceeding \$100,000 at any tier under a Federal contract;

(2) A subgrant, contract, or subcontract exceeding \$100,000 at any tier under a Federal grant;

(3) A contract or subcontract exceeding \$100,000 at any tier under a Federal loan exceeding \$150,000; or,

(4) A contract or subcontract exceeding \$100,000 at any tier under a Federal cooperative agreement,

shall file a certification, and a disclosure form, if required, to the next tier above.

(e) All disclosure forms, but not certifications, shall be forwarded from tier to tier until received by the person referred to in paragraphs (a) or (b) of this section. That person shall forward all disclosure forms to the agency.

(f) Any certification or disclosure form filed under paragraph (e) of this section shall be treated as a material representation of fact upon which all receiving tiers shall rely. All liability arising from an erroneous representation shall be borne solely by the tier filing that representation and shall not be shared by any tier to which the erroneous representation is forwarded. Submitting an erroneous certification or disclosure constitutes a failure to file the required certification or disclosure, respectively. If a person fails to file a required certification or disclosure, the United States may pursue all available remedies, including those authorized by section 1352, title 31, U.S. Code.

(g) For awards and commitments in process prior to December 23, 1989, but not made before that date, certifications shall be required at award or

Department of Energy

§ 601.205

commitment, covering activities occurring between December 23, 1989, and the date of award or commitment. However, for awards and commitments in process prior to the December 23, 1989 effective date of these provisions, but not made before December 23, 1989, disclosure forms shall not be required at time of award or commitment but shall be filed within 30 days.

(h) No reporting is required for an activity paid for with appropriated funds if that activity is allowable under either subpart B or C.

Subpart B—Activities by Own Employees

§ 601.200 Agency and legislative liaison.

(a) The prohibition on the use of appropriated funds, in § 601.100 (a), does not apply in the case of a payment of reasonable compensation made to an officer or employee of a person requesting or receiving a Federal contract, grant, loan, or cooperative agreement if the payment is for agency and legislative liaison activities not directly related to a covered Federal action.

(b) For purposes of paragraph (a) of this section, providing any information specifically requested by an agency or Congress is allowable at any time.

(c) For purposes of paragraph (a) of this section, the following agency and legislative liaison activities are allowable at any time only where they are not related to a specific solicitation for any covered Federal action:

(1) Discussing with an agency (including individual demonstrations) the qualities and characteristics of the person's products or services, conditions or terms of sale, and service capabilities; and,

(2) Technical discussions and other activities regarding the application or adaptation of the person's products or services for an agency's use.

(d) For purposes of paragraph (a) of this section, the following agencies and legislative liaison activities are allowable only where they are prior to formal solicitation of any covered Federal action:

(1) Providing any information not specifically requested but necessary for an agency to make an informed deci-

sion about initiation of a covered Federal action;

(2) Technical discussions regarding the preparation of an unsolicited proposal prior to its official submission; and,

(3) Capability presentations by persons seeking awards from an agency pursuant to the provisions of the Small Business Act, as amended by Public Law 95-507 and other subsequent amendments.

(e) Only those activities expressly authorized by this section are allowable under this section.

§ 601.205 Professional and technical services.

(a) The prohibition on the use of appropriated funds, in § 601.100 (a), does not apply in the case of a payment of reasonable compensation made to an officer or employee of a person requesting or receiving a Federal contract, grant, loan, or cooperative agreement or an extension, continuation, renewal, amendment, or modification of a Federal contract, grant, loan, or cooperative agreement if payment is for professional or technical services rendered directly in the preparation, submission, or negotiation of any bid, proposal, or application for that Federal contract, grant, loan, or cooperative agreement or for meeting requirements imposed by or pursuant to law as a condition for receiving that Federal contract, grant, loan, or cooperative agreement.

(b) For purposes of paragraph (a) of this section, "professional and technical services" shall be limited to advice and analysis directly applying any professional or technical discipline. For example, drafting of a legal document accompanying a bid or proposal by a lawyer is allowable. Similarly, technical advice provided by an engineer on the performance or operational capability of a piece of equipment rendered directly in the negotiation of a contract is allowable. However, communications with the intent to influence made by a professional (such as a licensed lawyer) or a technical person (such as a licensed accountant) are not allowable under this section unless they provide advice and analysis directly applying their professional or

§ 601.210

technical expertise and unless the advice or analysis is rendered directly and solely in the preparation, submission or negotiation of a covered Federal action. Thus, for example, communications with the intent to influence made by a lawyer that do not provide legal advice or analysis directly and solely related to the legal aspects of his or her client's proposal, but generally advocate one proposal over another are not allowable under this section because the lawyer is not providing professional legal services. Similarly, communications with the intent to influence made by an engineer providing an engineering analysis prior to the preparation or submission of a bid or proposal are not allowable under this section since the engineer is providing technical services but not directly in the preparation, submission or negotiation of a covered Federal action.

(c) Requirements imposed by or pursuant to law as a condition for receiving a covered Federal award include those required by law or regulation, or reasonably expected to be required by law or regulation, and any other requirements in the actual award documents.

(d) Only those services expressly authorized by this section are allowable under this section.

§ 601.210 Reporting.

No reporting is required with respect to payments of reasonable compensation made to regularly employed officers or employees of a person.

Subpart C—Activities by Other Than Own Employees

§ 601.300 Professional and technical services.

(a) The prohibition on the use of appropriated funds, in § 601.100 (a), does not apply in the case of any reasonable payment to a person, other than an officer or employee of a person requesting or receiving a covered Federal action, if the payment is for professional or technical services rendered directly in the preparation, submission, or negotiation of any bid, proposal, or application for that Federal contract, grant, loan, or cooperative agreement or for

10 CFR Ch. II (1–1–16 Edition)

meeting requirements imposed by or pursuant to law as a condition for receiving that Federal contract, grant, loan, or cooperative agreement.

(b) The reporting requirements in § 601.110 (a) and (b) regarding filing a disclosure form by each person, if required, shall not apply with respect to professional or technical services rendered directly in the preparation, submission, or negotiation of any commitment providing for the United States to insure or guarantee a loan.

(c) For purposes of paragraph (a) of this section, “professional and technical services” shall be limited to advice and analysis directly applying any professional or technical discipline. For example, drafting or a legal document accompanying a bid or proposal by a lawyer is allowable. Similarly, technical advice provided by an engineer on the performance or operational capability of a piece of equipment rendered directly in the negotiation of a contract is allowable. However, communications with the intent to influence made by a professional (such as a licensed lawyer) or a technical person (such as a licensed accountant) are not allowable under this section unless they provide advice and analysis directly applying their professional or technical expertise and unless the advice or analysis is rendered directly and solely in the preparation, submission or negotiation of a covered Federal action. Thus, for example, communications with the intent to influence made by a lawyer that do not provide legal advice or analysis directly and solely related to the legal aspects of his or her client's proposal, but generally advocate one proposal over another are not allowable under this section because the lawyer is not providing professional legal services. Similarly, communications with the intent to influence made by an engineer providing an engineering analysis prior to the preparation or submission of a bid or proposal are not allowable under this section since the engineer is providing technical services but not directly in the preparation, submission or negotiation of a covered Federal action.

Department of Energy

§ 601.600

(d) Requirements imposed by or pursuant to law as a condition for receiving a covered Federal award include those required by law or regulation, or reasonably expected to be required by law or regulation, and any other requirements in the actual award documents.

(e) Persons other than officers or employees of a person requesting or receiving a covered Federal action include consultants and trade associations.

(f) Only those services expressly authorized by this section are allowable under this section.

Subpart D—Penalties and Enforcement

§ 601.400 Penalties.

(a) Any person who makes an expenditure prohibited herein shall be subject to a civil penalty of not less than \$15,000 and not more than \$160,000 for each such expenditure.

(b) Any person who fails to file or amend the disclosure form (see appendix B) to be filed or amended if required herein, shall be subject to a civil penalty of not less than \$15,000 and not more than \$160,000 for each such failure.

(c) A filing or amended filing on or after the date on which an administrative action for the imposition of a civil penalty is commenced does not prevent the imposition of such civil penalty for a failure occurring before that date. An administrative action is commenced with respect to a failure when an investigating official determines in writing to commence an investigation of an allegation of such failure.

(d) In determining whether to impose a civil penalty, and the amount of any such penalty, by reason of a violation by any person, the agency shall consider the nature, circumstances, extent, and gravity of the violation, the effect on the ability of such person to continue in business, any prior violations by such person, the degree of culpability of such person, the ability of the person to pay the penalty, and such other matters as may be appropriate.

(e) First offenders under paragraphs (a) or (b) of this section shall be subject to a civil penalty of \$15,000, absent ag-

gravating circumstances. Second and subsequent offenses by persons shall be subject to an appropriate civil penalty between \$15,000 and \$160,000, as determined by the agency head or his or her designee.

(f) An imposition of a civil penalty under this section does not prevent the United States from seeking any other remedy that may apply to the same conduct that is the basis for the imposition of such civil penalty.

[55 FR 6737, 6746, Feb. 26, 1990, as amended at 62 FR 46183, Sept. 2, 1997; 74 FR 66032, Dec. 14, 2009; 79 FR 19, Jan. 2, 2014]

§ 601.405 Penalty procedures.

Agencies shall impose and collect civil penalties pursuant to the provisions of the Program Fraud and Civil Remedies Act, 31 U.S.C. 3803 (except subsection (c)), 3804, 3805, 3806, 3807, 3808, and 3812, insofar as these provisions are not inconsistent with the requirements herein.

§ 601.410 Enforcement.

The head of each agency shall take such actions as are necessary to ensure that the provisions herein are vigorously implemented and enforced in that agency.

Subpart E—Exemptions

§ 601.500 Secretary of Defense.

(a) The Secretary of Defense may exempt, on a case-by-case basis, a covered Federal action from the prohibition whenever the Secretary determines, in writing, that such an exemption is in the national interest. The Secretary shall transmit a copy of each such written exemption to Congress immediately after making such a determination.

(b) The Department of Defense may issue supplemental regulations to implement paragraph (a) of this section.

Subpart F—Agency Reports

§ 601.600 Semi-annual compilation.

(a) The head of each agency shall collect and compile the disclosure reports (see appendix B) and, on May 31 and November 30 of each year, submit to the Secretary of the Senate and the

§ 601.605

Clerk of the House of Representatives a report containing a compilation of the information contained in the disclosure reports received during the six-month period ending on March 31 or September 30, respectively, of that year.

(b) The report, including the compilation, shall be available for public inspection 30 days after receipt of the report by the Secretary and the Clerk.

(c) Information that involves intelligence matters shall be reported only to the Select Committee on Intelligence of the Senate, the Permanent Select Committee on Intelligence of the House of Representatives, and the Committees on Appropriations of the Senate and the House of Representatives in accordance with procedures agreed to by such committees. Such information shall not be available for public inspection.

(d) Information that is classified under Executive Order 12356 or any successor order shall be reported only to the Committee on Foreign Relations of the Senate and the Committee on Foreign Affairs of the House of Representatives or the Committees on Armed Services of the Senate and the House of Representatives (whichever such committees have jurisdiction of matters involving such information) and to the Committees on Appropriations of the Senate and the House of Representatives in accordance with procedures agreed to by such committees. Such information shall not be available for public inspection.

(e) The first semi-annual compilation shall be submitted on May 31, 1990, and shall contain a compilation of the disclosure reports received from December 23, 1989 to March 31, 1990.

(f) Major agencies, designated by the Office of Management and Budget (OMB), are required to provide machine-readable compilations to the Secretary of the Senate and the Clerk of the House of Representatives no later than with the compilations due on May 31, 1991. OMB shall provide detailed specifications in a memorandum to these agencies.

(g) Non-major agencies are requested to provide machine-readable compilations to the Secretary of the Senate

10 CFR Ch. II (1-1-16 Edition)

and the Clerk of the House of Representatives.

(h) Agencies shall keep the originals of all disclosure reports in the official files of the agency.

§ 601.605 Inspector General report.

(a) The Inspector General, or other official as specified in paragraph (b) of this section, of each agency shall prepare and submit to Congress each year, commencing with submission of the President's Budget in 1991, an evaluation of the compliance of that agency with, and the effectiveness of, the requirements herein. The evaluation may include any recommended changes that may be necessary to strengthen or improve the requirements.

(b) In the case of an agency that does not have an Inspector General, the agency official comparable to an Inspector General shall prepare and submit the annual report, or, if there is no such comparable official, the head of the agency shall prepare and submit the annual report.

(c) The annual report shall be submitted at the same time the agency submits its annual budget justifications to Congress.

(d) The annual report shall include the following: All alleged violations relating to the agency's covered Federal actions during the year covered by the report, the actions taken by the head of the agency in the year covered by the report with respect to those alleged violations and alleged violations in previous years, and the amounts of civil penalties imposed by the agency in the year covered by the report.

**APPENDIX A TO PART 601—
CERTIFICATION REGARDING LOBBYING**
*Certification for Contracts, Grants, Loans, and
Cooperative Agreements*

The undersigned certifies, to the best of his or her knowledge and belief, that:

(1) No Federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of an agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the

Department of Energy

Pt. 601, App. A

extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan, or cooperative agreement.

(2) If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal contract, grant, loan, or cooperative agreement, the undersigned shall complete and submit Standard Form-LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions.

(3) The undersigned shall require that the language of this certification be included in the award documents for all subawards at all tiers (including subcontracts, subgrants, and contracts under grants, loans, and cooperative agreements) and that all subrecipients shall certify and disclose accordingly.

This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by section 1352, title 31, U.S. Code. Any person who fails to file the required certification shall be subject to a

civil penalty of not less than \$15,000 and not more than \$160,000 for each such failure.

Statement for Loan Guarantees and Loan Insurance

The undersigned states, to the best of his or her knowledge and belief, that:

If any funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this commitment providing for the United States to insure or guarantee a loan, the undersigned shall complete and submit Standard Form-LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions.

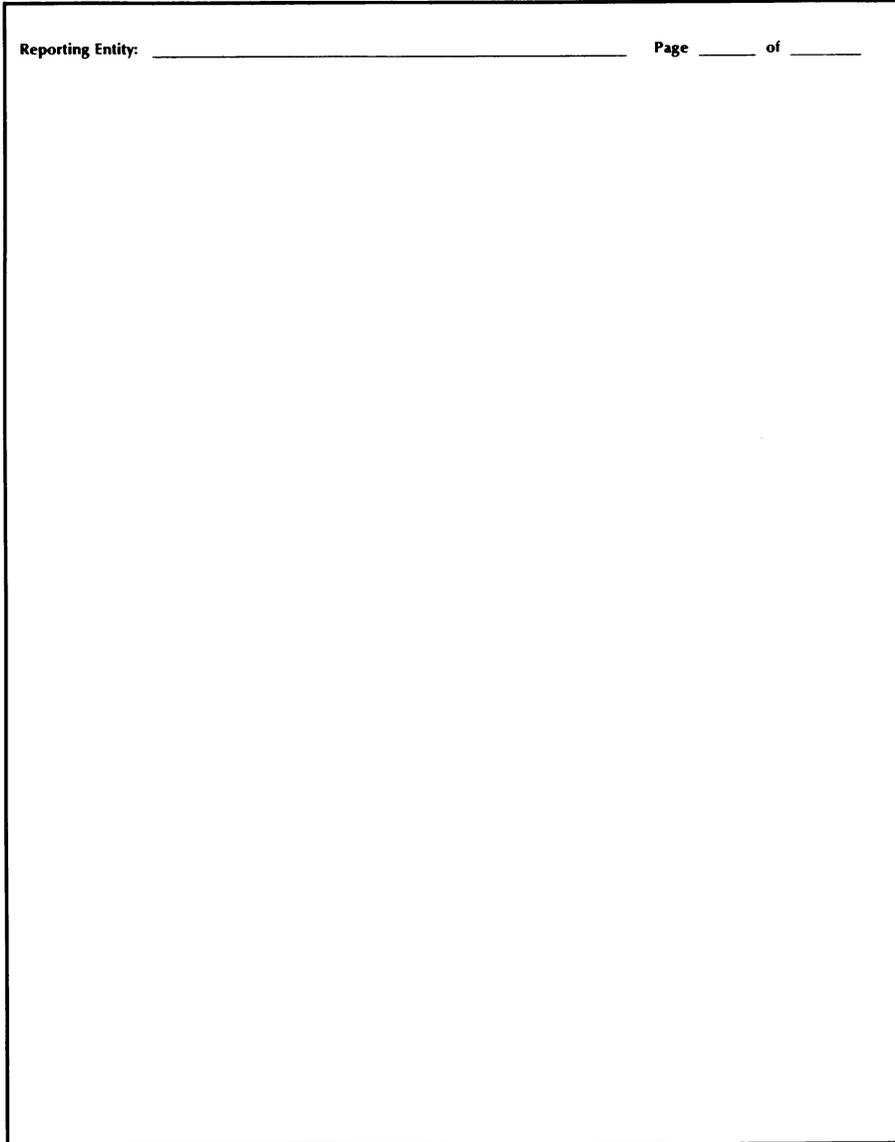

Submission of this statement is a prerequisite for making or entering into this transaction imposed by section 1352, title 31, U.S. Code. Any person who fails to file the required statement shall be subject to a civil penalty of not less than \$15,000 and not more than \$160,000 for each such failure.

[55 FR 6737, 6746, Feb. 26, 1990, as amended at 62 FR 46184, Sept. 2, 1997; 74 FR 66032, Dec. 14, 2009; 79 FR 19, Jan. 2, 2014]

**DISCLOSURE OF LOBBYING ACTIVITIES
CONTINUATION SHEET**

Approved by OMB
0348-0046

Reporting Entity: _____ Page _____ of _____

Authorized for Local Reproduction
Standard Form - LLL-A

INSTRUCTIONS FOR COMPLETION OF SF-LLL, DISCLOSURE OF LOBBYING ACTIVITIES

This disclosure form shall be completed by the reporting entity, whether subawardee or prime Federal recipient, at the initiation or receipt of a covered Federal action, or a material change to a previous filing, pursuant to title 31 U.S.C. section 1352. The filing of a form is required for each payment or agreement to make payment to any lobbying entity for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with a covered Federal action. Use the SF-LLL-A Continuation Sheet for additional information if the space on the form is inadequate. Complete all items that apply for both the initial filing and material change report. Refer to the implementing guidance published by the Office of Management and Budget for additional information.

1. Identify the type of covered Federal action for which lobbying activity is and/or has been secured to influence the outcome of a covered Federal action.
2. Identify the status of the covered Federal action.
3. Identify the appropriate classification of this report. If this is a followup report caused by a material change to the information previously reported, enter the year and quarter in which the change occurred. Enter the date of the last previously submitted report by this reporting entity for this covered Federal action.
4. Enter the full name, address, city, state and zip code of the reporting entity. Include Congressional District, if known. Check the appropriate classification of the reporting entity that designates if it is, or expects to be, a prime or subawardee recipient. Identify the tier of the subawardee, e.g., the first subawardee of the prime is the 1st tier. Subawards include but are not limited to subcontracts, subgrants and contract awards under grants.
5. If the organization filing the report in item 4 checks "Subawardee", then enter the full name, address, city, state and zip code of the prime Federal recipient. Include Congressional District, if known.
6. Enter the name of the Federal agency making the award or loan commitment. Include at least one organizational level below agency name, if known. For example, Department of Transportation, United States Coast Guard.
7. Enter the Federal program name or description for the covered Federal action (item 1). If known, enter the full Catalog of Federal Domestic Assistance (CFDA) number for grants, cooperative agreements, loans, and loan commitments.
8. Enter the most appropriate Federal identifying number available for the Federal action identified in item 1 (e.g., Request for Proposal (RFP) number; Invitation for Bid (IFB) number; grant announcement number; the contract, grant, or loan award number; the application/proposal control number assigned by the Federal agency). Include prefixes, e.g., "RFP-DE-90-001."
9. For a covered Federal action where there has been an award or loan commitment by the Federal agency, enter the Federal amount of the award/loan commitment for the prime entity identified in item 4 or 5.
10. (a) Enter the full name, address, city, state and zip code of the lobbying entity engaged by the reporting entity identified in item 4 to influence the covered Federal action.
(b) Enter the full names of the individual(s) performing services, and include full address if different from 10 (a). Enter Last Name, First Name, and Middle Initial (MI).
11. Enter the amount of compensation paid or reasonably expected to be paid by the reporting entity (item 4) to the lobbying entity (item 10). Indicate whether the payment has been made (actual) or will be made (planned). Check all boxes that apply. If this is a material change report, enter the cumulative amount of payment made or planned to be made.
12. Check the appropriate box(es). Check all boxes that apply. If payment is made through an in-kind contribution, specify the nature and value of the in-kind payment.
13. Check the appropriate box(es). Check all boxes that apply. If other, specify nature.
14. Provide a specific and detailed description of the services that the lobbyist has performed, or will be expected to perform, and the date(s) of any services rendered. Include all preparatory and related activity, not just time spent in actual contact with Federal officials. Identify the Federal official(s) or employee(s) contacted or the officer(s), employee(s), or Member(s) of Congress that were contacted.
15. Check whether or not a SF-LLL-A Continuation Sheet(s) is attached.
16. The certifying official shall sign and date the form, print his/her name, title, and telephone number.

Public reporting burden for this collection of information is estimated to average 30 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Office of Management and Budget, Paperwork Reduction Project (0348-0046), Washington, D.C. 20503.

APPENDIX A TO PART 602—SCHEDULE OF RENEWAL APPLICATIONS AND REPORTS

AUTHORITY: 42 U.S.C. 2051; 42 U.S.C. 5817; 42 U.S.C. 5901-5920; 42 U.S.C. 7254 and 7256; 31 U.S.C. 6301-6308.

SOURCE: 60 FR 5841, Jan. 31, 1995, unless otherwise noted.

§ 602.1 Purpose and scope.

This part sets forth the policies and procedures applicable to the award and administration of grants and cooperative agreements by DOE (through the Office of Environment, Health Safety and Security or any office to which its functions are subsequently redelegated) for health related research, education/training, conferences, communication, and related activities.

[60 FR 5841, Jan. 31, 1995, as amended at 71 FR 68729, Nov. 28, 2006; 79 FR 76046, Dec. 19, 2014; 80 FR 5007, Jan. 30, 2015]

§ 602.2 Applicability.

(a) This part applies to all grants and cooperative agreements awarded after the effective date of this rule.

(b) Except as otherwise provided by this part, the award and administration of grants and cooperative agreements shall be governed by 2 CFR part 200 as amended by 2 CFR part 910 (DOE Financial Assistance Regulation).

[60 FR 5841, Jan. 31, 1995, as amended at 79 FR 76046, Dec. 19, 2014]

§ 602.3 Definitions.

In addition to the definitions provided in 2 CFR part 200 and 2 CFR part 910, the following definitions are provided for purposes of this part:

Conference and communication activities means scientific or technical conferences, symposia, workshops, seminars, public meetings, publications, video or slide shows, and other presentations for the purpose of commu-

nicating or exchanging information or views pertinent to DOE.

DOE means the United States Department of Energy.

Education/Training means support for education or related activities for an individual or organization that will enhance educational levels and skills, in particular, scientific or technical areas of interest to DOE.

Epidemiology and Other Health Studies means research pertaining to potential health effects resulting from DOE or predecessor agency operations or from any aspect of energy production, transmission, or use (including electromagnetic fields) in the United States and abroad. Related systems or activities to enhance these areas, as well as other program areas that may be described by notice published in the FEDERAL REGISTER, are also included.

Principal investigator means the scientist or other individual designated by the recipient to direct the project.

Research means basic and applied research and that part of development not related to the development of specific systems or products. The primary aim of research is scientific study and experimentation directed toward advancing the state of the art or increasing knowledge or understanding rather than focusing on a specific system or product.

[60 FR 5841, Jan. 31, 1995, as amended at 79 FR 76046, Dec. 19, 2014]

§ 602.4 Exceptions.

(a) Single-case exceptions from this part may be authorized in writing by the Associate Under Secretary for Environment, Health, Safety and Security, the Head of the Contracting Activity, or their designees, upon the written request of DOE staff, an applicant for award, or a recipient. A request must be submitted to or through the cognizant contracting officer.

(b) Whenever a proposed deviation from this part would be a deviation from 2 CFR part 200 as amended by 2 CFR part 910, the deviation must also be authorized in accordance with the procedures prescribed in that part.

[60 FR 5841, Jan. 31, 1995, as amended at 71 FR 68729, Nov. 28, 2006; 79 FR 76046, Dec. 19, 2014; 80 FR 5007, Jan. 30, 2015]

§ 602.5

10 CFR Ch. II (1–1–16 Edition)

§ 602.5 Epidemiology and Other Health Studies Financial Assistance Program.

(a) DOE may issue under this part awards for research, education/training, conferences, communication, and related activities in the Office of Environment, Health, Safety and Security program areas set forth in paragraph (b) of this section.

(b) The program areas are:

(1) Health experience of DOE and DOE contractor workers;

(2) Health experience of populations living near DOE facilities;

(3) Workers exposed to toxic substances, such as beryllium;

(4) Use of biomarkers to recognize exposure to toxic substances;

(5) Epidemiology and other health studies relating to energy production, transmission, and use (including electromagnetic fields) in the United States and abroad;

(6) Compilation, documentation, management, use, and analysis of data for the DOE Comprehensive Epidemiologic Data Resource; and

(7) Other systems or activities enhancing these areas, as well as other program areas as may be described by notice published in the FEDERAL REGISTER.

[60 FR 5841, Jan. 31, 1995, as amended at 71 FR 68729, Nov. 28, 2006; 79 FR 76046, Dec. 19, 2014; 80 FR 5007, Jan. 30, 2015]

§ 602.6 Eligibility.

Any individual or entity other than a Federal agency is eligible for a grant or cooperative agreement. An unaffiliated individual is also eligible for a grant or cooperative agreement.

§ 602.7 Solicitation.

(a) The Catalog of Federal Domestic Assistance number for 10 CFR part 602 is 81.108 and its solicitation control number is EOHSFAP 10 CFR part 602.

(b) An application for a new or renewal award under this solicitation may be submitted at any time to DOE at the address specified in paragraph (c) of this section. New or renewal applications shall receive consideration for funding generally within 6 months but, in any event, no later than 12 months from the date of receipt by DOE.

(c) Except as otherwise provided in a notice of availability, applicants may obtain application forms, described in 602.8(b) of this part, and additional information from the Office of Domestic and International Health Studies, AU-13, U.S. Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585, 301-903-2340, and shall submit applications to the same address.

(d) DOE will publish program notices in the FEDERAL REGISTER regarding the availability of epidemiology and other health studies financial assistance. DOE may also use other means of communication, as appropriate, such as the publication of notices of availability in trade and professional journals and news media.

(1) Each notice of availability shall cite this part and shall include:

(i) The Catalog of Federal Domestic Assistance number and solicitation control number of the program;

(ii) The amount of money available or estimated to be available for award;

(iii) The name of the responsible DOE program official to contact for additional information and an address where application forms may be obtained;

(iv) The address for submission of applications; and

(v) Any evaluation criteria in addition to those set forth in § 602.9 of this part.

(2) The notice of availability may also include any other relevant information helpful to applicants such as:

(i) Program objectives;

(ii) A project agenda or potential area of project initiatives;

(iii) Problem areas requiring additional effort; and

(iv) Any other information that identifies areas in which grants or cooperative agreements may be made.

(e) DOE is under no obligation to pay for any costs associated with the preparation or submission of applications.

(f) DOE reserves the right to fund, in whole or in part, any, all, or none of the applications submitted.

(g) To be considered for a renewal award under this part, an incumbent recipient shall submit a continuation

Department of Energy

§ 602.8

or renewal application, as provided in § 602.8 (c) and (h) of this part.

[60 FR 5841, Jan. 31, 1995, as amended at 71 FR 68729, Nov. 28, 2006; 80 FR 5007, Jan. 30, 2015]

§ 602.8 Application requirements.

(a) An original and seven copies of the application for initial support must be submitted, except that State and local governments and Indian tribal governments shall not be required to submit more than the original and two copies of the application.

(b) Each new or renewal application in response to this part must include:

(1) An application face page, DOE Form 4650.2 (approved by OMB under OMB Control No. 1910-1400). However, the face page of an application submitted by a State or local government or an Indian tribal government shall be the face page of Standard Form 424 (approved by OMB under OMB Control Number 0348-0043).

(2) A detailed description of the proposed project, including its objectives, its relationship to DOE's program, its impact on the environment, if any, and the applicant's plan for carrying it out.

(3) Detailed information about the background and experience of the recipients of funds or, as appropriate, the principal investigator(s) (including references to publications), the facilities and experience of the applicant, and the cost-sharing arrangements, if any.

(4) A detailed budget for the entire proposed period of support with written justification sufficient to evaluate the itemized list of costs provided on the entire project. Applicants should note the following when preparing budgets:

(i) Numerical details on items of cost provided by State and local government and Indian tribal government applicants shall be on Standard Form 424A, "Budget Information for Non-Construction Programs" (approved under OMB Control No. 0348-0044). All other applicants shall use budget forms ERF 4620.1 (approved by OMB under Control No. 1910-1400).

(ii) DOE may, subsequent to receipt of an application, request additional budgetary information from an applicant when necessary for clarification or make informed pre-award deter-

minations under 2 CFR part 200 as amended by 2 CFR part 910.

(5) Any pre-award assurances required pursuant to 10 CFR parts 600 and 602.

(c) Applications for a renewal award must be submitted with an original and seven copies, except that State and local governments and Indian tribal government applicants are required to submit only an original and two copies (Approved by OMB under OMB Control Numbers 0348-00050348-0009)

(d) The application must be signed by an official who is authorized to act for the applicant organization and to commit the applicant to comply with the terms and conditions of the award, if one is issued, or if unaffiliated, by the individual applicant. (See § 602.17(a)(1) for requirements on continuation awards.)

(e) DOE may return an application that does not include all information and documentation required by statute, this part, 10 CFR part 600, or the notice of availability, when the nature of the omission precludes review of the application.

(f) During the review of a complete application, DOE may request the submission of additional information only if the information is essential to evaluate the application.

(g) In addition to including the information described in paragraphs (b), (c), and (d) of this section, an application for a renewal award must be submitted no later than 6 months before the expiration of the project period and must be on the same forms as required for initial applications. The renewal application must outline and justify a program and budget for the proposed project period, showing in detail the estimated cost of the proposed project, together with an indication of the amount of cost sharing, if any. The application shall also describe and explain the reasons for any change in the scope or objectives of the proposed project and shall compare and explain any difference between the estimates in the proposed budget and actual costs experienced as of the date of the application.

(h) DOE is not required to return an application to the applicant.

§ 602.9

(i) Renewal applications must include a separate section that describes the results of work accomplished through the date of the renewal application and how such results relate to the activities proposed to be undertaken in the renewal period.

[60 FR 5841, Jan. 31, 1995, as amended at 79 FR 76046, Dec. 19, 2014]

§ 602.9 Application evaluation and selection.

(a) Applications shall be evaluated for funding generally within 6 months, but in any event no later than 12 months, from the date of receipt by DOE. After DOE has held an application for 6 months, the applicant may, in response to DOE's request, be required to revalidate the terms of the original application.

(b) DOE shall perform an initial evaluation of all applications to ensure that the information required by this part is provided, that the proposed effort is technically sound and feasible, and that the effort is consistent with program funding priorities. For applications that pass the initial evaluation, DOE shall review and evaluate each application received based on the criteria set forth below and in accordance with the Office of Environment, Health, Safety, and Security Merit Review System developed, as required, under DOE Financial Assistance Regulations, 2 CFR 200 as amended by 2 CFR 910.

(c) DOE shall select evaluators on the basis of their professional qualifications and expertise. To ensure credible and inclusive peer review of applications, every effort will be made to select evaluators apart from DOE employees and contractors. Evaluators shall be required to comply with all applicable DOE rules or directives concerning the use of outside evaluators.

(d) DOE shall evaluate new and renewal applications based on the following criteria that are listed in descending order of importance:

(1) The scientific and technical merit of the proposed research;

(2) The appropriateness of the proposed method or approach;

(3) Competency of research personnel and adequacy of proposed resources;

(4) Reasonableness and appropriateness of the proposed budget; and

(5) Other appropriate factors consistent with the purpose of this part established and set forth in a Notice of Availability or in a specific solicitation.

(e) DOE shall also consider as part of the evaluation other available advice or information, as well as program policy factors, such as ensuring an appropriate balance among the program areas listed in § 602.5 of this part.

(f) In addition to the evaluation criteria set forth in paragraphs (d) and (e) of this section, DOE shall consider the recipient's performance under the existing award during the evaluation of a renewal application.

(g) Selection of applications for award will be based upon the findings of the technical evaluations (including peer reviews, as specified in the Office of Environment, Health, Safety and Security Merit Review System), the importance and relevance of the proposal to the Office of Environment, Health, Safety and Security's mission, and the availability of funds. Cost reasonableness and realism will also be considered.

(h) After the selection of an application, DOE may, if necessary, enter into negotiations with an applicant. Such negotiations are not a commitment that DOE will make an award.

[60 FR 5841, Jan. 31, 1995, as amended at 71 FR 68729, Nov. 28, 2006; 79 FR 76046, Dec. 19, 2014; 80 FR 5007, Jan. 30, 2015]

§ 602.10 Additional requirements.

(a) A recipient performing research or related activities involving the use of human subjects must comply with DOE regulations in 10 CFR part 745, "Protection of Human Subjects," and any additional provisions that may be included in the special terms and conditions of an award.

(b) A recipient performing research involving recombinant DNA molecules and/or organisms and viruses containing recombinant DNA molecules shall comply with the National Institutes of Health "Guidelines for Research Involving Recombinant DNA Molecules" (51 FR 16958, May 7, 1986),

Department of Energy

§ 602.14

or such later revision of those guidelines, as may be published in the FEDERAL REGISTER. (The guidelines are available from the Office of Recombinant DNA Activities, National Institutes of Health, Building 31, Room BBB, Bethesda, MD 20892, or from the Office of Domestic and International Health Studies, AU-13, U.S. Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585.

(c) A recipient performing research on warm-blooded animals shall comply with the Federal Laboratory Animal Welfare Act of 1966, as amended (7 U.S.C. 2131 *et seq.*), and the regulations promulgated thereunder by the Secretary of Agriculture at 9 CFR chapter I, subchapter A, pertaining to the care, handling, and treatment of warm-blooded animals held or used for research, teaching, or other activities supported by Federal awards. The recipient shall comply with the guidelines described in the Department of Health and Human Services Publication No. [NIH] 86-23, "Guide for the Care and Use of Laboratory Animals," or succeeding revised editions. (This guide is available from the Office for Protection from Research Risks, Office of the Director, National Institutes of Health, Building 31, Room 4B09, Bethesda, MD 20892, or from the Office of Domestic and International Health Studies, AU-13, U.S. Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585.

[60 FR 5841, Jan. 31, 1995, as amended at 71 FR 68730, Nov. 28, 2006; 80 FR 5007, Jan. 30, 2015]

§ 602.11 Funding.

(a) The project period during which DOE expects to provide support for an approved project under this part shall generally not exceed 3 years and may exceed 5 years only if DOE makes a renewal award or otherwise extends the award. The project period shall be specified on the Notice of Financial Assistance Grant (DOE Form 4600.1).

(b) Each budget period of an award under this part shall generally be 12 months and may be as much as 24 months, as DOE deems appropriate.

§ 602.12 Cost sharing.

Cost sharing is not required, nor will it be considered, as a criterion in the evaluation and selection process unless otherwise provided under § 602.9(d)(5).

§ 602.13 Limitation of DOE liability.

Awards made under this part are subject to the requirement that the maximum DOE obligation to the recipient is the amount shown in the Notice of Financial Assistance Award as the amount of DOE funds obligated. DOE shall not be obligated to make any additional, supplemental, continuation, renewal, or other award for the same or any other purpose.

§ 602.14 Fee.

(a) Notwithstanding 2 CFR part 200 as amended by 2 CFR part 910, a fee may be paid, in appropriate circumstances, to a recipient that is a small business concern, as qualified under the criteria and size standards of 13 CFR part 121, in order to permit the concern to participate in the Epidemiology and Other Health Studies Financial Assistance Program. Whether or not it is appropriate to pay a fee shall be determined by the contracting officer, who shall, at a minimum, apply the following guidelines:

(1) Whether the acceptance of an award will displace other work that the small business is currently engaged in or committed to assume in the near future; or

(2) Whether the acceptance of an award will, in the absence of paying a fee, cause substantial financial distress to the business. In evaluating financial distress, the contracting officer shall balance current displacement against reasonable future benefit to the company. (If the award will result in the beneficial expansion of the existing business base of the company, then no fee would generally be appropriate.) Fees shall not be paid to other entities except as a deviation from 2 CFR part 200 as amended by 2 CFR part 910, nor shall fees be paid under awards in support of conferences.

(b) To request a fee, a small business concern shall submit with its application a written self-certification that it is a small business concern qualified under the criteria and size standards in

§ 602.15

13 CFR part 121. In addition, the application must state the amount of fee requested for the entire project period and the basis for requesting the amount and must also state why payment of a fee by DOE would be appropriate.

(c) If the contracting officer determines that payment of a fee is appropriate under paragraph (a) of this section, the amount of fee shall be that determined to be reasonable by the contracting officer. The contracting officer shall, at a minimum, apply the following guidelines in determining the fee amount:

(1) The fee base shall include the estimated allowable cost of direct salaries and wages and allocable fringe benefits. This fee base shall exclude all other direct and indirect costs.

(2) The fee amount expressed as a percentage of the appropriate fee base, pursuant to paragraph (c)(1) of this section, shall not exceed the percentage rate of fee that would result if a Federal agency contracted for the same amount of salaries, wages, and allocable fringe benefits under a cost reimbursement contract.

(3) Fee amounts, determined pursuant to paragraphs (c)(1) and (c)(2) of this section, shall be appropriately reduced when:

(i) Advance payments are provided; and/or

(ii) Title to property acquired with DOE funds vests in the recipient (2 CFR part 200 as amended by 2 CFR part 910).

(d) Notwithstanding 2 CFR part 200 as amended by 2 CFR part 910, any fee awarded shall be a fixed fee and shall be payable on an annual basis in proportion to the work completed, as determined by the contracting officer, upon satisfactory submission and acceptance by DOE of the progress report. If the project period is shortened due to termination, or the project period is not fully funded, the fee shall be reduced by an appropriate amount.

[60 FR 5841, Jan. 31, 1995, as amended at 79 FR 76046, Dec. 19, 2014]

§ 602.15 Indirect cost limitations.

Awards issued under this part for conferences and scientific/technical

10 CFR Ch. II (1–1–16 Edition)

meetings will not include payment for indirect costs.

§ 602.16 National security.

Activities under the Epidemiology and Other Health Studies Financial Assistance Program are not expected to involve classified information (i.e., Restricted Data, Formerly Restricted Data, National Security Information). However, if in the opinion of the recipient or DOE such involvement becomes expected prior to the closeout of the award, the recipient or DOE shall notify the other in writing immediately. If the recipient believes any information developed or acquired may be classified, the recipient shall not provide the potentially classified information to anyone, including DOE officials with whom the recipient normally communicates, except the Director, Office of Classification, and shall protect such information as if it were classified until notified by DOE that a determination has been made that it does not require such handling. Correspondence that includes the specific information in question shall be sent by registered mail to the U.S. Department of Energy, Attn: Director, Office of Classification, AU-60, P.O. Box A, Germantown, MD 20875. If the information is determined to be classified, the recipient may wish to discontinue the project, in which case the recipient and DOE shall terminate the award by mutual agreement. If the award is to be terminated, all material deemed by DOE to be classified shall be forwarded to DOE in a manner specified by DOE for proper disposition. If the recipient and DOE wish to continue the award, even though classified information is involved, the recipient shall be requested to obtain both personnel and facility security clearances through the Office of Headquarters Security Operations awards or from the cognizant field office for awards obtained through DOE field organizations. Costs associated with handling and protecting any such classified information shall be negotiated at the time that the determination to proceed is made.

[60 FR 5841, Jan. 31, 1995, as amended at 71 FR 68730, Nov. 28, 2006; 80 FR 5008, Jan. 30, 2015]

§ 602.17 Continuation funding and reporting requirements.

(a) A recipient shall periodically report to DOE on the project's progress in meeting the project objectives of the award. The following types of reports shall be used:

(1) *Progress Reports*. After issuance of an initial award, recipients must submit a satisfactory progress report to receive a continuation award for the remainder of the project period. The original and two copies of the required report must be submitted to the Office of Environment, Health, Safety and Security program manager 90 days prior to the anticipated continuation funding date. The report should include results of work to date and emphasize findings and their significance to the field, and any real or anticipated problems. The report also should contain the following information: On the first page, provide the project title, principal investigator/project director name, period of time the report covers, name and address of recipient organization, DOE award number, the amount of unexpended funds, if any, that are anticipated to be left at the end of the current budget period. If the amount exceeds 10 percent of the funds available for the budget period, provide information as to why the excess funds are anticipated to be available and how they will be used in the next budget period. The report should state whether the aims have changed from the original application, and if they have, provide revised aims. A completed budget page must be submitted with the continuation progress report when a change to anticipated future costs will exceed 25 percent of the original recommended future budget.

(2) *Notice of Energy Research and Development (R&D) Project*. A Notice of Energy R&D Project, DOE Form 1430.22, which summarizes the purpose and scope of the project, must be submitted in accordance with the Distribution and Schedule of Documents set forth in appendix A to this part, Schedule of Renewal Applications and Reports. Copies of the form may be obtained from a DOE contracting office.

(3) *Special Reports*. The recipient shall report the following events to DOE as soon after they occur as possible:

(i) Problems, delays, or adverse conditions that will materially affect the ability to attain project objectives or prevent the meeting of time schedules and goals. The report must describe remedial action that the recipient has taken, or plans to take, and any action DOE should take to alleviate the problems.

(ii) Favorable developments or events that enable meeting time schedules and goals sooner, or a lower cost than anticipated, or producing more beneficial results than originally projected.

(4) *Final Report*. A final report covering the entire project must be submitted by the recipient within 90 days after the project period ends or the award is terminated. Satisfactory completion of an award will be contingent upon the receipt of this report. The final report shall follow the same outline as progress reports. Recipients will provide, as part of the final report, a description of records and data compiled during the project, along with a plan for its preservation or disposition (see § 602.19 of this part). All manuscripts prepared for publication should be appended to the final report.

(5) *Financial Status Report (FSR)* (OMB No. 0348-0039). The FSR is required within 90 days after completion of each budget period. For budget periods exceeding 12 months, an FSR is also required within 90 days after this first 12 months unless waived by the contracting officer.

(b) DOE may extend the deadline date for any report if the recipient submits a written request before the deadline, that adequately justifies an extension.

(c) A table summarizing the various types of reports, time for submission, and number of copies is set forth in appendix A to this part. The schedule of reports shall be as prescribed in this table, unless the award document specifies otherwise. These reports shall be submitted by the recipient to the awarding office.

(d) DOE, or its authorized representatives, may make site visits, at any reasonable time, to review the project. DOE may provide such technical assistance as may be requested.

§ 602.18

10 CFR Ch. II (1–1–16 Edition)

(e) Recipients may place performance reporting requirements on a sub-recipient consistent with the provisions of this section.

[60 FR 5841, Jan. 31, 1995, as amended at 71 FR 68730, Nov. 28, 2006; 80 FR 5008, Jan. 30, 2015]

§ 602.18 Dissemination of results.

(a) Recipients are encouraged to disseminate research results promptly. DOE reserves the right to utilize, and have others utilize to the extent it deems appropriate, the reports resulting from research awards.

(b) DOE may waive the technical reporting requirement of progress reports set forth in § 602.17, if the recipient submits to DOE a copy of its own report that is published or accepted for publication in a recognized scientific or technical journal and that satisfies the information requirements of the program.

(c) Recipients are urged to publish results through normal publication channels.

(d) The article shall include an acknowledgement that the project was supported, in whole or in part, by a DOE award, and specify the award number, but state that such support does not constitute an endorsement by DOE of the views expressed in the article.

[60 FR 5841, Jan. 31, 1995, as amended at 79 FR 76046, Dec. 19, 2014]

§ 602.19 Records and data.

(a) In some cases, DOE will require submission of certain project records

or data to facilitate mission-related activities. Recipients, therefore, must take adequate steps to ensure proper management, control, and preservation of all project records and data.

(b) Awardees must ensure that all project data is adequately documented. Documentation shall:

(1) Reference software used to compile, manage, and analyze data;

(2) Define all technical characteristics necessary for reading or processing the records;

(3) Define file and record content and codes;

(4) Describe update cycles or conditions and rules for adding or deleting information; and

(5) Detail instrument calibration effects, sampling and analysis, space and time coverage, quality control measures, data algorithms and reduction methods, and other activities relevant to data collection and assembly.

(c) Recipients agree to comply with designated DOE records and data management requirements, including providing electronic data in prescribed formats and retention of specified records and data for eventual transfer to the Comprehensive Epidemiologic Data Resource or to another repository, as directed by DOE. Recipients will provide, as part of the final report, a description of records and data compiled during the project along with a plan for its preservation or disposition.

(d) Recipients agree to make project records and data available as soon as possible when requested by DOE.

APPENDIX A TO PART 602—SCHEDULE OF RENEWAL APPLICATIONS AND REPORTS

Type	When due	Number of copies for awarding office
1. Summary: 200 words on scope and purpose (Notice of Energy R&D Project).	Immediately after a grant is awarded and with each application for renewal.	3
2. Renewal period ends	6 months before the budget	8
3. Progress Report period (or as part of a renewal application).	90 days prior to the next budget period	3
4. Other progress reports, brief topical reports, etc. (Designated when significant results develop or when work has direct programmatic impact).	As deemed appropriate by DOE or the recipient	3
5. Reprints, Conference	Same as 4. above	3
6. Final report of the project	Within 90 days after completion	3

Type	When due	Number of copies for awarding office
7. Financial Status Report (FSR)	Within 90 days after completion of the project period; for budget periods exceeding 12 months an FSR is also required within 90 days after the first 12-month period.	3

NOTE: Report types 5 and 6 require with submission two copies of DOE Form 1332.16, University-Type Contractor and Grantee Recommendations for Disposition of Scientific and Technical Document.

PART 603—TECHNOLOGY INVESTMENT AGREEMENTS

Subpart A—General

- Sec.
- 603.100 Purpose.
- 603.105 Description.
- 603.110 Use of TIAs.
- 603.115 Approval requirements.
- 603.120 Contracting officer warrant requirements.
- 603.125 Applicability of other parts of the DOE Assistance Regulations.

Subpart B—Appropriate Use of Technology Investment Agreements

- 603.200 Contracting officer responsibilities.
- 603.205 Nature of the project.
- 603.210 Recipients.
- 603.215 Recipient’s commitment and cost sharing.
- 603.220 Government participation.
- 603.225 Benefits of using a TIA.
- 603.230 Fee or profit.

Subpart C—Requirements for Expenditure-Based and Fixed-Support Technology Investment Agreements

- 603.300 Difference between an expenditure-based and a fixed-support TIA.
- 603.305 Use of a fixed-support TIA.
- 603.310 Use of an expenditure-based TIA.
- 603.315 Advantages of a fixed-support TIA.

Subpart D—Competition Phase

- 603.400 Competitive procedures.
- 603.405 Announcement format.
- 603.410 Announcement content.
- 603.415 Cost sharing.
- 603.420 Disclosure of information.

Subpart E—Pre-Award Business Evaluation

- 603.500 Pre-award business evaluation.
- 603.505 Program resources.

RECIPIENT QUALIFICATION

- 603.510 Recipient qualifications.
- 603.515 Qualification of a consortium.

TOTAL FUNDING

- 603.520 Reasonableness of total project funding.

COST SHARING

- 603.525 Value and reasonableness of the recipient’s cost sharing contribution.
- 603.530 Acceptable cost sharing.
- 603.535 Value of proposed real property or equipment.
- 603.540 Acceptability of fully depreciated real property or equipment.
- 603.545 Acceptability of costs of prior RD&D.
- 603.550 Acceptability of intellectual property.
- 603.555 Value of other contributions.

FIXED-SUPPORT OR EXPENDITURE-BASED APPROACH

- 603.560 Estimate of project expenditures.
- 603.565 Use of a hybrid instrument.

ACCOUNTING, PAYMENTS, AND RECOVERY OF FUNDS

- 603.570 Determining milestone payment amounts.
- 603.575 Repayment of Federal cost share.

Subpart F—Award Terms Affecting Participants’ Financial, Property, and Purchasing Systems

- 603.600 Administrative matters.
- 603.605 General policy.
- 603.610 Flow down requirements.

FINANCIAL MATTERS

- 603.615 Financial management standards for for-profit firms.
- 603.620 Financial management standards for nonprofit participants.
- 603.625 Cost principles or standards applicable to for-profit participants.
- 603.630 Use of Federally-approved indirect cost rates for for-profit firms.
- 603.635 Cost principles for nonprofit participants.
- 603.640 Audits of for-profit participants.
- 603.645 Periodic audits and award-specific audits of for-profit participants.
- 603.650 Designation of auditor for for-profit participants.

Pt. 603

- 603.655 Frequency of periodic audits of for-profit participants.
- 603.660 Other audit requirements.
- 603.665 Periodic audits of nonprofit participants.
- 603.670 Flow down audit requirements to subrecipients.
- 603.675 Reporting use of IPA for subawards.

PROPERTY

- 603.680 Purchase of real property and equipment by for-profit firms.
- 603.685 Management of real property and equipment by nonprofit participants.
- 603.690 Requirements for Federally-owned property.
- 603.695 Requirements for supplies.

PURCHASING

- 603.700 Standards for purchasing systems of for-profit firms.
- 603.705 Standards for purchasing systems of nonprofit organizations.

Subpart G—Award Terms Related to Other Administrative Matters

- 603.800 Scope.

PAYMENTS

- 603.805 Payment methods.
- 603.810 Method and frequency of payment requests.
- 603.815 Withholding payments.
- 603.820 Interest on advance payments.

REVISION OF BUDGET AND PROGRAM PLANS

- 603.825 Government approval of changes in plans.
- 603.830 Pre-award costs.

PROGRAM INCOME

- 603.835 Program income requirements.

INTELLECTUAL PROPERTY

- 603.840 Negotiating data and patent rights.
- 603.845 Data rights requirements.
- 603.850 Marking of data.
- 603.855 Protected data.
- 603.860 Rights to inventions.
- 603.865 March-in rights.
- 603.870 Marking of documents related to inventions.
- 603.875 Foreign access to technology and U.S. competitiveness provisions.

FINANCIAL AND PROGRAMMATIC REPORTING

- 603.880 Reports requirements.
- 603.885 Updated program plans and budgets.
- 603.890 Final performance report.
- 603.895 Protection of information in programmatic reports.
- 603.900 Receipt of final performance report.

10 CFR Ch. II (1–1–16 Edition)

RECORDS RETENTION AND ACCESS REQUIREMENTS

- 603.905 Record retention requirements.
- 603.910 Access to a for-profit participant's records.
- 603.915 Access to a nonprofit participant's records.

TERMINATION AND ENFORCEMENT

- 603.920 Termination and enforcement requirements.

Subpart H—Executing the Award

- 603.1000 Contracting officer's responsibilities at time of award.

THE AWARD DOCUMENT

- 603.1005 General responsibilities.
- 603.1010 Substantive issues.
- 603.1015 Execution.

REPORTING INFORMATION ABOUT THE AWARD

- 603.1020 File documents.

Subpart I—Post-Award Administration

- 603.1100 Contracting officer's post-award responsibilities.
- 603.1105 Advance payments or payable milestones.
- 603.1110 Other payment responsibilities.
- 603.1115 Single audits.
- 603.1120 Award-specific audits.

Subpart J—Definitions of Terms Used in This Part

- 603.1200 Definitions.
- 603.1205 Advance.
- 603.1210 Articles of collaboration.
- 603.1215 Assistance.
- 603.1220 Award-specific audit.
- 603.1225 Cash contributions.
- 603.1230 Commercial firm.
- 603.1235 Consortium.
- 603.1240 Cooperative agreement.
- 603.1245 Cost sharing.
- 603.1250 Data.
- 603.1255 Equipment.
- 603.1260 Expenditure-based award.
- 603.1265 Expenditures or outlays.
- 603.1270 Grant.
- 603.1275 In-kind contributions.
- 603.1280 Institution of higher education.
- 603.1285 Intellectual property.
- 603.1290 Participant.
- 603.1295 Periodic audit.
- 603.1300 Procurement contract.
- 603.1305 Program income.
- 603.1310 Program official.
- 603.1315 Property.
- 603.1320 Real property.
- 603.1325 Recipient.
- 603.1330 Supplies.
- 603.1335 Termination.

Department of Energy

§ 603.115

603.1340 Technology investment agreement.
APPENDIX A TO PART 603—APPLICABLE FEDERAL STATUTES, EXECUTIVE ORDERS, AND GOVERNMENT-WIDE REGULATIONS
APPENDIX B TO PART 603—FLOW DOWN REQUIREMENTS FOR PURCHASES OF GOODS AND SERVICES

AUTHORITY: 42 U.S.C. 7101 *et seq.*; 31 U.S.C. 6301–6308; 50 U.S.C. 2401 *et seq.*

SOURCE: 71 FR 27161, May 9, 2006, unless otherwise noted.

Subpart A—General

§ 603.100 Purpose.

This part establishes uniform policies and procedures for the implementation of DOE's "other transactions" authority and for award and administration of a technology investment agreement (TIA).

§ 603.105 Description.

(a) A TIA is a special type of assistance instrument used to increase involvement of commercial firms in the Department of Energy's (DOE) research, development and demonstration (RD&D) programs. A TIA, like a cooperative agreement, requires substantial Federal involvement in the technical or management aspects of the project. A TIA may be either a type of cooperative agreement or a type of assistance transaction other than a cooperative agreement, depending on the intellectual property provisions. A TIA is either:

(1) A type of cooperative agreement with more flexible provisions tailored for commercial firms (as distinct from a cooperative agreement subject to all of the requirements in 10 CFR 600), but with intellectual property provisions in full compliance with the DOE intellectual property statutes (*i.e.*, Bayh-Dole statute and 42 U.S.C. 2182 and 5908, as implemented in 10 CFR 600.325). The authority to award this type of TIA is 42 U.S.C. 7256(a), as well as any program-specific statute that provides authority to award cooperative agreements; or

(2) An assistance transaction other than a cooperative agreement, if its intellectual property provisions vary from the Bayh-Dole statute and 42 U.S.C. 2182 and 5908, which require the Government to retain certain intellec-

tual property rights and require differing treatment between large businesses and nonprofit organizations or small businesses. The authority to award this type of TIA is 42 U.S.C. 7256(g), as well as any program-specific statute that provides authority to award assistance agreements.

(b) The two types of TIAs have similar requirements, except for the intellectual property requirements. If the contracting officer determines there is a unique, exceptional need to vary from the standard intellectual property requirements in 10 CFR 600.325, the TIA becomes an assistance transaction other than a cooperative agreement.

§ 603.110 Use of TIAs.

The ultimate goal for using a TIA is to broaden the technology base available to meet DOE mission requirements and foster within the technology base new relationships and practices to advance the national economic and energy security of the United States, to promote scientific and technological innovation in support of that mission, and to ensure the environmental clean-up of the national nuclear weapons complex. A TIA therefore is designed to:

(a) Reduce barriers to participation in RD&D programs by commercial firms that deal primarily in the commercial marketplace. A TIA allows contracting officers to tailor Government requirements and lower or remove barriers if it can be done with proper stewardship of Federal funds.

(b) Promote new relationships among performers in the technology base. Collaborations among commercial firms that deal primarily in the commercial marketplace, firms that regularly perform on the DOE RD&D programs and nonprofit organizations can enhance overall quality and productivity.

(c) Stimulate performers to develop and use new business practices and disseminate best practices throughout the technology base.

§ 603.115 Approval requirements.

An officer of the Department who has been appointed by the President by and

§ 603.120

with the advice and consent of the Senate and who has been delegated the authority from the Secretary must approve the award of a TIA and may perform other functions of the Secretary as set forth in 42 U.S.C. 7256(g). This authority may not be re-delegated. The DOE or National Nuclear Security Administration (NNSA) Senior Procurement Executive also must concur in the award of a TIA.

§ 603.120 Contracting officer warrant requirements.

A contracting officer may award or administer a TIA only if the contracting officer's warrant authorizes the award or administration of a TIA.

§ 603.125 Applicability of other parts of the DOE Assistance Regulations.

(a) TIAs are explicitly covered in this part and 10 CFR part 600, subpart A—General. 10 CFR part 600, subpart A, addresses general matters that relate to assistance instruments.

(b) Three additional parts of the DOE Assistance Regulations apply to TIAs, although they do not mention a TIA explicitly. They are:

(1) 10 CFR part 601—lobbying restrictions apply by law (31 U.S.C. 1352) to a TIA that is a cooperative agreement and as a matter of DOE policy to a TIA that is an assistance transaction other than a cooperative agreement.

(2) 10 CFR part 606—debarment and suspension requirements apply because they cover nonprocurement instruments in general; and

(3) 10 CFR part 607—drug-free workplace (financial assistance) requirements apply because they cover all assistance instruments.

(c) Other portions of 10 CFR part 600 apply to a TIA as referenced in part 603.

Subpart B—Appropriate Use of Technology Investment Agreements

§ 603.200 Contracting officer responsibilities.

Contracting officers may use a TIA only in appropriate situations. To do so, the use of a TIA must be justified based on:

10 CFR Ch. II (1–1–16 Edition)

(a) The nature of the project, as discussed in § 603.205;

(b) The type of recipient, addressed in § 603.210;

(c) The recipient's commitment and cost sharing, as described in § 603.215;

(d) The degree of involvement of the Government program official, as discussed in § 603.220; and

(e) The contracting officer's judgment that the use of a TIA could benefit the RD&D objectives in ways that likely would not happen if another type of instrument were used (i.e., a contract, grant or cooperative agreement is not feasible or appropriate). Answers to the four questions in § 603.225 form the basis for the contracting officer's judgment.

§ 603.205 Nature of the project.

Judgments relating to the nature of the project include:

(a) The principal purpose of the project is to carry out a public purpose of support or stimulation of RD&D (i.e., assistance), rather than acquiring goods or services for the benefit of the Government (i.e., acquisition);

(b) To the maximum extent practicable, the TIA does not support RD&D that duplicates other RD&D being conducted under existing programs carried out by the DOE; and

(c) The use of a standard contract, grant or cooperative agreement for the project is not feasible or appropriate (see questions in § 603.225).

§ 603.210 Recipients.

(a) A TIA requires one or more for-profit firms, not acting in their capacity as the contractor of a FFRDC, to be involved either in the:

(1) Performance of the RD&D project; or

(2) The commercial application of the results.

(i) In those cases where there is only a non-profit performer or a consortium of non-profit performers or non-profit performers and FFRDC contractors, if and as authorized, the performers must have at least a tentative agreement with a specific for-profit partner or partners who plan on being involved in the commercial application of the results.

(ii) In consultation with legal counsel, the contracting officer should review the agreement between the performers and their for-profit partner to ensure that the for-profit partner is committed to being involved in the commercial application of the results.

(b) A TIA may be particularly useful for awards to consortia (a consortium may include one or more for-profit firms, as well as State or local government agencies, institutions of higher education, other nonprofit organizations, or FFRDC contractors, if and as authorized) because:

(1) If multiple performers are participating as a consortium, they may be more equal partners in the performance of the project than usually is the case with a prime recipient and sub-recipients. All of the performers are more likely to be directly involved in developing and revising plans for the RD&D effort, reviewing technical progress, and overseeing financial and other business matters. That feature makes consortia well suited to building new relationships among performers in the technology base, a principal objective for the use of a TIA.

(2) In addition, interactions among the participants within a consortium potentially provide a self-governance mechanism. The potential for additional self-governance is particularly good when a consortium includes multiple for-profit participants that normally are competitors within an industry.

(c) A TIA may be used for carrying out RD&D performed by single firms or multiple performers (e.g., a teaming arrangement) in prime award-subaward relationships. In awarding a TIA in those cases, however, consideration should be given to providing for greater involvement of the program official or a way to increase self-governance (e.g., a prime award with multiple subawards arranged so as to give the subrecipients more insight into and authority and responsibility for the programmatic and business aspects of the overall project than they usually have).

§ 603.215 Recipient's commitment and cost sharing.

(a) The contracting officer should evaluate whether the recipient has a

strong commitment to and self-interest in the success of the project and incorporating the technology into products and processes for the commercial marketplace. Evidence of that commitment and interest should be found in the proposal, in the recipient's management plan, or through other means.

(b) The contracting officer must seek cost sharing. The purpose of cost sharing is to ensure that the recipient incurs real risk that gives it a vested interest in the project's success; the willingness to commit to meaningful cost sharing is a good indicator of a recipient's self-interest. The requirements are that:

(1) To the maximum extent practicable, the non-Federal parties carrying out a RD&D project under a TIA are to provide at least half of the costs of the project; and

(2) The parties must provide the cost sharing from non-Federal resources unless otherwise provided by law.

(c) The contracting officer may consider whether cost sharing is impracticable in a given case, unless there is a statutory requirement for cost sharing that applies to the particular program under which the award is to be made. Before deciding that cost sharing is impracticable, the contracting officer should carefully consider if there are other factors that demonstrate the recipient's self-interest in the success of the current project.

§ 603.220 Government participation.

A TIA is used to carry out cooperative relationships between the Federal Government and the recipient(s) which require substantial involvement of the Government in the execution of the RD&D. For example, program officials will participate in recipients' periodic reviews of progress and may be substantially involved with the recipients in the resulting revisions of plans for future effort.

§ 603.225 Benefits of using a TIA.

Before deciding that a TIA is appropriate, the contracting officer also must judge that using a TIA could benefit the RD&D objectives in ways that likely would not happen if another type of assistance instrument were used (e.g., a cooperative agreement

subject to all of the requirements of 10 CFR part 600). The contracting officer, in conjunction with Government program officials, must consider the questions in paragraphs (a) through (d) of this section, to help identify the benefits that may justify using a TIA and reducing some of the usual requirements. The contracting officer must report the answers to these questions to help the DOE measure the benefits of using a TIA. Note full concise answers are required only to questions that relate to the benefits perceived for using the TIA, rather than another type of funding instrument, for the particular project. A simple “no” or “not applicable” is a sufficient response for other questions. The questions are:

(a) Will the use of a TIA permit the involvement of any commercial firms or business units of firms that would not otherwise participate in the project? If so:

(1) What are the expected benefits of those firms’ or divisions’ participation (e.g., is there a specific technology that could be better, more readily available, or less expensive)?

(2) Why would they not participate if an instrument other than a TIA were used? The contracting officer should identify specific provisions of the TIA or features of the TIA award process that enable their participation. For example, if the RD&D effort is based substantially on a for-profit firm’s privately developed technology and the Government may be a major user of any commercial product developed as a result of the award, a for-profit firm may not participate unless the Government’s intellectual property rights in the technology are modified.

(b) Will the use of a TIA allow the creation of new relationships among participants in a consortium, at the prime or subtier levels, among business units of the same firm, or between non-Federal participants and the Federal Government that will foster better technology? If so:

(1) Why do these new relationships have the potential for fostering technology that is better, more affordable, or more readily available?

(2) Are there provisions of the TIA or features of the TIA award process that enable these relationships to form? If

so, the contracting officer should be able to identify specifically what they are. If not, the contracting officer should be able to explain specifically why the relationships could not be created if another type of assistance instrument were used. For example, a large business firm may not be willing to participate in a consortium or teaming arrangement with small business firms and nonprofit firms under a standard cooperative agreement because those entities have invention rights under the Bayh-Dole statute that are not available to large businesses. A large business firm may be willing to participate in a consortium or teaming arrangement only if all partners are substantially equal with regard to the allocation of intellectual property rights.

(c) Will the use of a TIA allow firms or business units of firms that traditionally accept Government awards to use new business practices in the execution of the RD&D project that will foster better technology, new technology more quickly or less expensively, or facilitate partnering with commercial firms? If so:

(1) What specific benefits result from the use of these new practices? The contracting officer should be able to explain specifically the potential for those benefits.

(2) Are there provisions of the TIA or features of the TIA award process that enable the use of the new practices? If so, the contracting officer should be able to identify those provisions or features and explain why the practices could not be used if the award were made using another type of assistance instrument.

(d) Are there any other benefits of the use of a TIA that could help DOE meet its objectives in carrying out the project? If so, the contracting officer should be able to identify specifically what they are, how they can help meet the objectives, what features of the TIA or award process enable DOE to realize them, and why the benefits likely would not be realized if an assistance instrument other than a TIA were used.

§ 603.230 Fee or profit.

The contracting officer may not use a TIA if any participant is to receive fee or profit. Note that this policy extends to all performers of the project, including any subawards for substantive program performance, but it does not preclude participants' or sub-recipients' payment of reasonable fee or profit when making purchases from suppliers of goods (e.g., supplies and equipment) or services needed to carry out the RD&D.

Subpart C—Requirements for Expenditure-Based and Fixed-Support Technology Investment Agreements

§ 603.300 Difference between an expenditure-based and a fixed-support TIA.

The contracting officer may negotiate expenditure-based or fixed-support award terms for either types of TIA subject to the requirements in this subpart. The fundamental difference between an expenditure-based and a fixed-support TIA is:

(a) For an expenditure-based TIA, the amounts of interim payments or the total amount ultimately paid to the recipient are based on the amounts the recipient expends on project costs. If a recipient completes the project specified at the time of award before it expends all of the agreed-upon Federal funding and recipient cost sharing, the Federal Government may recover its share of the unexpended balance of funds or, by mutual agreement with the recipient, amend the agreement to expand the scope of the RD&D project. An expenditure-based TIA, therefore, is analogous to a cost-type procurement contract or grant.

(b) For a fixed-support TIA, the amount of assistance is established at the time of award and is not meant to be adjusted later. In that sense, a fixed-support TIA is somewhat analogous to a fixed-price procurement contract.

§ 603.305 Use of a fixed-support TIA.

The contracting officer may use a fixed-support TIA if:

(a) The agreement is to support or stimulate RD&D with outcomes that

are well defined, observable, and verifiable;

(b) The resources required to achieve the outcomes can be estimated well enough to ensure the desired level of cost sharing (see example in § 603.560(b)); and

(c) The agreement does not require a specific amount or percentage of recipient cost sharing. In cases where the agreement does require a specific amount or percentage of cost sharing, a fixed-support TIA is not practicable because the agreement has to specify cost principles or standards for costs that may be charged to the project; require the recipient to track the costs of the project; and provide access for audit to allow verification of the recipient's compliance with the mandatory cost sharing. A fixed-support TIA may not be used if there is:

(1) A requirement (e.g., in statute or policy determination) for a specific amount or percentage of recipient cost sharing; or

(2) The contracting officer, in consultation with the program official, otherwise elects to include in the TIA a requirement for a specific amount or percentage of cost sharing.

§ 603.310 Use of an expenditure-based TIA.

In general, the contracting officer must use an expenditure-based TIA under conditions other than those described in § 603.305. Reasons for any exceptions to this general rule must be documented in the award file and must be consistent with the policy in § 603.230 that precludes payment of fee or profit to participants.

§ 603.315 Advantages of a fixed-support TIA.

In situations where the use of a fixed-support TIA is permissible (see §§ 603.305 and 603.310), its use may encourage some commercial firms' participation in the RD&D. With a fixed-support TIA, the contracting officer can eliminate or reduce some post-award requirements that sometimes are cited as disincentives for those firms to participate. For example, a fixed-support TIA need not:

§ 603.400

(a) Specify minimum standards for the recipient's financial management system;

(b) Specify cost principles or standards stating the types of costs the recipient may charge to the project;

(c) Provide for financial audits by Federal auditors or independent public accountants of the recipient's books and records;

(d) Set minimum standards for the recipient's purchasing system; or

(e) Require the recipient to prepare financial reports for submission to the Federal Government.

Subpart D—Competition Phase

§ 603.400 Competitive procedures.

DOE policy is to award a TIA using competitive procedures and a merit-based selection process, as described in 10 CFR 600.6 and 600.13, respectively:

(a) In every case where required by statute; and

(b) To the maximum extent feasible, in all other cases. If it is not feasible to use competitive procedures, the contracting officer must comply with the requirements in 10 CFR 600.6(c).

§ 603.405 Announcement format.

If the contracting officer, in consultation with the program official, decides that a TIA is among the types of instruments that may be awarded, the additional elements described in §§ 603.410 through 603.420 should be included in the announcement.

§ 603.410 Announcement content.

Once the contracting officer, in consultation with the program official, considers the factors described in Subpart B of this part and decides that a TIA is among the types of instruments that may be awarded pursuant to a program announcement, it is important to state that fact in the announcement. The announcement also should state that a TIA is more flexible than a traditional financial assistance agreement and that requirements are negotiable in areas such as audits and intellectual property rights that may cause concern for commercial firms. Doing so should increase the likelihood that commercial firms will be willing to submit proposals.

10 CFR Ch. II (1–1–16 Edition)

§ 603.415 Cost sharing.

To help ensure a competitive process that is fair and equitable to all potential proposers, the announcement should state clearly:

(a) That, to the maximum extent practicable, the non-Federal parties carrying out a RD&D project under a TIA are to provide at least half of the costs of the project (see § 603.215(b));

(b) The types of cost sharing that are acceptable;

(c) How any in-kind contributions will be valued, in accordance with §§ 603.530 through 603.555; and

(d) Whether any consideration will be given to alternative approaches a proposer may offer to demonstrate its strong commitment to and self-interest in the project's success, in accordance with § 603.215.

§ 603.420 Disclosure of information.

The announcement should tell potential proposers that:

(a) For all TIAs, information described in paragraph (b) of this section is exempt from disclosure requirements of the Freedom of Information Act (FOIA)(codified at 5 U.S.C. 552) for a period of five years after the date on which the DOE receives the information from them; and

(b) As provided in 42 U.S.C. 7256(g) incorporating certain provisions of 10 U.S.C. 2371, disclosure is not required, and may not be compelled, under FOIA during that period if:

(1) A proposer submits the information in a competitive or noncompetitive process that could result in the award of a TIA; and

(2) The type of information is among the following types that are exempt:

(i) Proposals, proposal abstracts, and supporting documents; and

(ii) Business plans and technical information submitted on a confidential basis.

(c) If proposers desire to protect business plans and technical information for five years from FOIA disclosure requirements, they must mark them with a legend identifying them as documents submitted on a confidential basis. After the five-year period, information may be protected for longer periods if it meets any of the criteria in 5 U.S.C. 552(b) (as implemented by the

Department of Energy

§ 603.520

DOE in 10 CFR part 1004) for exemption from FOIA disclosure requirements.

Subpart E—Pre-Award Business Evaluation

§ 603.500 Pre-award business evaluation.

(a) The contracting officer must determine the qualification of the recipient, as described in §§ 603.510 and 603.515.

(b) As the business expert working with the program official, the contracting officer also must address the financial aspects of the proposed agreement. The contracting officer must:

(1) Determine that the total amount of funding for the proposed effort is reasonable, as addressed in § 603.520.

(2) Assess the value and determine the reasonableness of the recipient's proposed cost sharing contribution, as discussed in §§ 603.525 through 603.555.

(3) If contemplating the use of a fixed-support rather than expenditure-based TIA, ensure that its use is justified, as explained in §§ 603.560 and 603.565.

(4) Determine amounts for milestone payments, if used, as discussed in § 603.570.

§ 603.505 Program resources.

Program officials can be a source of information for determining the reasonableness of proposed funding (e.g., on labor rates, as discussed in § 603.520) or establishing observable and verifiable technical milestones for payments (see § 603.570).

RECIPIENT QUALIFICATION

§ 603.510 Recipient qualifications.

Prior to award of a TIA, the contracting officer's responsibilities for determining that the recipient is qualified are the same as those for awarding a grant or cooperative agreement. If the recipient is a consortium that is not formally incorporated, the contracting officer has the additional responsibility described in § 603.515.

§ 603.515 Qualification of a consortium.

(a) A consortium that is not formally incorporated must provide a collabora-

tion agreement, commonly referred to as the articles of collaboration, which sets out the rights and responsibilities of each consortium member. This agreement binds the individual consortium members together and should discuss, among other things, the consortium's

(1) Management structure;

(2) Method of making payments to consortium members;

(3) Means of ensuring and overseeing members' efforts on the project;

(4) Provisions for members' cost sharing contributions; and

(5) Provisions for ownership and rights in intellectual property developed previously or under the agreement.

(b) If the prospective recipient of a TIA is a consortium that is not formally incorporated, the contracting officer must, in consultation with legal counsel, review the management plan in the consortium's collaboration agreement to ensure that the management plan is sound and that it adequately addresses the elements necessary for an effective working relationship among the consortium members. An effective working relationship is essential to increase the project's chances of success.

TOTAL FUNDING

§ 603.520 Reasonableness of total project funding.

In cooperation with the program official, the contracting officer must assess the reasonableness of the total estimated budget to perform the RD&D that will be supported by the agreement.

(a) *Labor.* Much of the budget likely will involve direct labor and associated indirect costs, which may be represented together as a "loaded" labor rate. The program official is an essential advisor on reasonableness of the overall level of effort and its composition by labor category. The contracting officer also may rely on experience with other awards as the basis for determining reasonableness.

(b) *Real property and equipment.* In almost all cases, the project costs should normally include only depreciation or use charges for real property and

§ 603.525

equipment of for-profit participants, in accordance with § 603.680. Remember that the budget for an expenditure-based TIA may not include depreciation of a participant's property as a direct cost of the project if that participant's practice is to charge the depreciation of that type of property as an indirect cost, as many organizations do.

COST SHARING

§ 603.525 Value and reasonableness of the recipient's cost sharing contribution.

The contracting officer must:

(a) Determine that the recipient's cost sharing contributions meet the criteria for cost sharing and determine values for them, in accordance with §§ 603.530 through 603.555. In doing so, the contracting officer must:

(1) Ensure that there are affirmative statements from any third parties identified as sources of cash contributions, and

(2) Include in the award file an evaluation that documents how the values of the recipient's contributions to the funding of the project were determined.

(b) Judge that the recipient's cost sharing contribution, as a percentage of the total budget, is reasonable. To the maximum extent practicable, the recipient must provide at least half of the costs of the project, in accordance with § 603.215.

§ 603.530 Acceptable cost sharing.

The contracting officer may accept any cash or in-kind contributions that meet all of the following criteria.

(a) In the contracting officer's judgment, they represent meaningful cost sharing that demonstrates the recipient's commitment to the success of the RD&D project. Cash contributions clearly demonstrate commitment and they are strongly preferred over in-kind contributions.

(b) They are necessary and reasonable for accomplishment of the RD&D project's objectives.

(c) They are costs that may be charged to the project under § 603.625 and § 603.635, as applicable to the participant making the contribution.

10 CFR Ch. II (1-1-16 Edition)

(d) They are verifiable from the recipient's records.

(e) They are not included as cost sharing contributions for any other Federal award.

(f) They are not paid by the Federal Government under another award, except:

(1) Costs that are authorized by Federal statute to be used for cost sharing.

(2) Independent research and development (IR&D) costs, as described in 48 CFR part 31.208-18, that meet all of the criteria in paragraphs (a) through (e) of this section. IR&D is acceptable as cost sharing, even though it may be reimbursed by the Government through other awards. It is standard business practice for all for-profit firms, including commercial firms, to recover their IR&D costs through prices charged to their customers. Thus, the cost principles at 48 CFR part 31 allow a for-profit firm that has expenditure-based, Federal procurement contracts to recover through those procurement contracts the allocable portion of its research and development costs associated with a technology investment agreement. Contracting officers should note that in accordance with section 603.545, they may not count participant's costs of prior research, including IR&D, as a cost sharing contribution.

§ 603.535 Value of proposed real property or equipment.

The contracting officer rarely should accept values for cost sharing contributions of real property or equipment that are in excess of depreciation or reasonable use charges, as discussed in § 603.680 for for-profit participants. The contracting officer may accept the full value of a donated capital asset if the real property or equipment is to be dedicated to the project and the contracting officer expects that it will have a fair market value that is less than \$5,000 at the project's end. In those cases, the contracting officer should value the donation at the lesser of:

(a) The value of the property as shown in the recipient's accounting records (*i.e.*, purchase price less accumulated depreciation); and

(b) The current fair market value. The contracting officer may accept the

Department of Energy

§ 603.560

use of any reasonable basis for determining the fair market value of the property. If there is a justification to do so, the contracting officer may accept the current fair market value even if it exceeds the value in the recipient's records.

§ 603.540 Acceptability of fully depreciated real property or equipment.

The contracting officer should limit the value of any contribution of a fully depreciated asset to a reasonable use charge. In determining what is reasonable, the contracting officer must consider:

- (a) The original cost of the asset;
- (b) Its estimated remaining useful life at the time of the negotiations;
- (c) The effect of any increased maintenance charges or decreased performance due to age; and
- (d) The amount of depreciation that the participant previously charged to Federal awards.

§ 603.545 Acceptability of costs of prior RD&D.

The contracting officer may not count any participant's costs of prior RD&D as a cost sharing contribution. Only the additional resources that the recipient will provide to carry out the current project (which may include pre-award costs for the current project, as described in §603.830) are to be counted.

§ 603.550 Acceptability of intellectual property.

(a) In most instances, the contracting officer should not count costs of patents and other intellectual property (*e.g.*, copyrighted material, including software) as cost sharing because:

- (1) It is difficult to assign values to these intangible contributions;
- (2) Their value usually is a manifestation of prior research costs, which are not allowed as cost share under § 603.545; and
- (3) Contributions of intellectual property rights generally do not represent the same cost of lost opportunity to a recipient as contributions of cash or tangible assets. The purpose of cost share is to ensure that the recipient incurs real risk that gives it a vested interest in the project's success.

(b) The contracting officer may include costs associated with intellectual property if the costs are based on sound estimates of market value of the contribution. For example, a for-profit firm may offer the use of commercially available software for which there is an established license fee for use of the product. The costs of the development of the software would not be a reasonable basis for valuing its use.

§ 603.555 Value of other contributions.

For types of participant contributions other than those addressed in §§ 603.535 through 603.550, the general rule is that the contracting officer is to value each contribution consistently with the cost principles or standards in § 603.625 and § 603.635 that apply to the participant making the contribution. When valuing services and property donated by parties other than the participants, the contracting officer may use as guidance the provisions of 10 CFR 600.313(b)(2) through (b)(5).

FIXED-SUPPORT OR EXPENDITURE-BASED APPROACH

§ 603.560 Estimate of project expenditures.

(a) To use a fixed-support TIA, rather than an expenditure-based TIA, the contracting officer must have confidence in the estimate of the expenditures required to achieve well-defined outcomes. Therefore, the contracting officer must work carefully with program officials to select outcomes that, when the recipient achieves them, are reliable indicators of the amount of effort the recipient expended. However, the estimate of the required expenditures need not be a precise dollar amount, as illustrated by the example in paragraph (b) of this section, if:

- (1) The recipient is contributing a substantial share of the costs of achieving the outcomes, which must meet the criteria in § 603.305(a); and
- (2) The contracting officer is confident that the costs of achieving the outcomes will be at least a minimum amount that can be specified and the recipient is willing to accept the possibility that its cost sharing percentage ultimately will be higher if the costs exceed that minimum amount.

§ 603.565

(b) To illustrate the approach, consider a project for which the contracting officer is confident that the recipient will have to expend at least \$800,000 to achieve the specified outcomes. The contracting officer must determine, in conjunction with program officials, the minimum level of recipient cost sharing required to demonstrate the recipient's commitment to the success of the project. For purposes of this illustration, let that minimum recipient cost sharing be 60% of the total project costs. In that case, the Federal share should be no more than 40% and the contracting officer could set a fixed level of Federal support at \$320,000 (40% of \$800,000). With that fixed level of Federal support, the recipient would be responsible for the balance of the costs needed to complete the project.

(c) Note, however, that the level of recipient cost sharing negotiated should be based solely on the level needed to demonstrate the recipient's commitment. The contracting officer may not use a shortage of Federal Government funding for the program as a reason to try to persuade a recipient to accept a fixed-support TIA, rather than an expenditure-based instrument, or to accept responsibility for a greater share of the total project costs than it otherwise is willing to offer. If there is insufficient funding to provide an appropriate Federal Government share for the entire project, the contracting officer should re-scope the effort covered by the agreement to match the available funding.

§ 603.565 Use of a hybrid instrument.

For a RD&D project that is to be carried out by a number of participants, the contracting officer may award a TIA that provides for some participants to perform under fixed-support arrangements and others to perform under expenditure-based arrangements. This approach may be useful, for example, if a commercial firm that is a participant will not accept an agreement with all of the post-award require-

10 CFR Ch. II (1–1–16 Edition)

ments of an expenditure-based award. Before using a fixed-support arrangement for that firm's portion of the project, the agreement must meet the criteria in § 603.305.

ACCOUNTING, PAYMENTS, AND RECOVERY OF FUNDS

§ 603.570 Determining milestone payment amounts.

(a) If the contracting officer selects the milestone payment method (see § 603.805), the contracting officer must assess the reasonableness of the estimated amount for reaching each milestone. This assessment enables the contracting officer to set the amount of each milestone payment to approximate the Federal share of the anticipated resource needs for carrying out that phase of the RD&D effort.

(b) The Federal share at each milestone need not be the same as the Federal share of the total project. For example, the contracting officer might deliberately set payment amounts with a larger Federal share for early milestones if a project involves a start-up company with limited resources.

(c) For an expenditure-based TIA, if the contracting officer establishes minimum cost sharing percentages for each milestone, those percentages should be indicated in the agreement.

(d) For a fixed-support TIA, the milestone payments should be associated with the well-defined, observable, and verifiable technical outcomes (*e.g.*, demonstrations, tests, or data analysis) that are established for the project in accordance with §§ 603.305(a) and 603.560(a).

§ 603.575 Repayment of Federal cost share.

In accordance with the Energy Policy Act of 2005 (Public Law 109–58), section 988(e), the contracting officer may not require repayment of the Federal share of a cost-shared TIA as a condition of making an award, unless otherwise authorized by statute.

Subpart F—Award Terms Affecting Participants’ Financial, Property, and Purchasing Systems

FINANCIAL MATTERS

§ 603.615 Financial management standards for-profit firms.

§ 603.600 Administrative matters.

This subpart addresses “systemic” administrative matters that place requirements on the operation of a participant’s financial management, property management, or purchasing system. Each participant’s systems are organization-wide and do not vary with each agreement. Therefore, a TIA should address systemic requirements in a uniform way for each type of participant organization.

§ 603.605 General policy.

The general policy for an expenditure-based TIA is to avoid requirements that would force participants to use different financial management, property management, and purchasing systems than they currently use for:

(a) Expenditure-based Federal procurement contracts and assistance awards in general, if they receive them; or

(b) Commercial business, if they have no expenditure-based Federal procurement contracts and assistance awards.

§ 603.610 Flow down requirements.

If it is an expenditure-based award, the TIA must require participants to provide the same financial management, property management, and purchasing systems requirements to a subrecipient that would apply if the subrecipient were a participant. For example, a for-profit participant would require a university subrecipient to comply with requirements that apply to a university participant and would require a GOCO or FFRDC subrecipient to comply with standards that conform as much as practicable with the requirements in the GOCO/FFRDC procurement contract. Note that this policy applies to subawards for substantive performance of portions of the RD&D project supported by the TIA and not to participants’ purchases of goods or services needed to carry out the RD&D.

(a) To avoid causing needless changes in participants’ financial management systems, an expenditure-based TIA will make for-profit participants that currently perform under other expenditure-based Federal procurement contracts or assistance awards subject to the same standards for financial management systems that apply to those other awards. Therefore, if a for-profit participant has expenditure-based DOE assistance awards other than a TIA, the TIA must apply the standards in 10 CFR 600.311. The contracting officer may grant an exception and allow a for-profit participant that has other expenditure-based Federal Government awards to use an alternative set of standards that meets the minimum criteria in paragraph (b) of this section, if there is a compelling programmatic or business reason to do so. For each case in which an exception is granted, the contracting officer must document the reason in the award file.

(b) For an expenditure-based TIA, the contracting officer is to allow and encourage each for-profit participant that does not currently perform under expenditure-based Federal procurement contracts or assistance awards (other than a TIA) to use its existing financial management system as long as the system, as a minimum:

(1) Complies with Generally Accepted Accounting Principles.

(2) Effectively controls all project funds, including Federal funds and any required cost share. The system must have complete, accurate, and current records that document the sources of funds and the purposes for which they are disbursed. It also must have procedures for ensuring that project funds are used only for purposes permitted by the agreement (see § 603.625).

(3) Includes, if advance payments are authorized under § 603.805, procedures to minimize the time elapsing between the payment of funds by the Government and the firm’s disbursement of the funds for program purposes.

§ 603.620 Financial management standards for nonprofit participants.

So as not to force system changes for any State, local government, institution of higher education, or other nonprofit organization, expenditure-based TIA requirements for the financial management system of any nonprofit participant are to be the same as those that apply to the participant's other Federal assistance awards. Specifically, the requirements are those in:

(a) 10 CFR 600.220 for State and local governments; and

(b) 10 CFR 600.121(b) for other nonprofit organizations, with the exception of nonprofit Government-owned, contractor-operated (GOCO) facilities and Federally Funded Research and Development Centers (FFRDCs) that are excepted from the definition of "recipient" in 10 CFR 600.101. If a GOCO or FFRDC is a participant, the contracting officer must specify appropriate standards that conform as much as practicable with requirements in their procurement contract.

§ 603.625 Cost principles or standards applicable to for-profit participants.

(a) So as not to require any firm to needlessly change its cost accounting system, an expenditure-based TIA is to apply the Government cost principles in 48 CFR part 31 to for-profit participants that currently perform under expenditure-based Federal procurement contracts or assistance awards (other than a TIA) and therefore have existing systems for identifying allowable costs under those principles. If there are programmatic or business reasons to do otherwise, the contracting officer may grant an exception from this requirement and use alternative standards as long as the alternative satisfies the conditions described in paragraph (b) of this section; if an exception is granted the reasons must be documented in the award file.

(b) For other for-profit participants, the contracting officer may establish alternative standards in the agreement as long as that alternative provides, as a minimum, that Federal funds and funds counted as recipients' cost sharing will be used only for costs that:

(1) A reasonable and prudent person would incur in carrying out the RD&D

project contemplated by the agreement. Generally, elements of cost that appropriately are charged are those identified with RD&D activities under the Generally Accepted Accounting Principles (see Statement of Financial Accounting Standards Number 2, "Accounting for Research and Development Costs," October 1974). Moreover, costs must be allocated to DOE and other projects in accordance with the relative benefits the projects receive. Costs charged to DOE projects must be given consistent treatment with costs allocated to the participants' other RD&D activities (e.g., activities supported by the participants themselves or by non-Federal sponsors).

(2) Are consistent with the purposes stated in the governing Congressional authorizations and appropriations. The contracting officer is responsible for ensuring that provisions in the award document address any requirements that result from authorizations and appropriations.

§ 603.630 Use Federally approved indirect cost rates for for-profit firms.

In accordance with the general policy in § 603.605, the contracting officer must require a for-profit participant that has federally approved indirect cost rates for its Federal procurement contracts to use those rates to accumulate and report costs under an expenditure-based TIA. This includes both provisional and final rates that are approved up until the time that the TIA is closed out.

§ 603.635 Cost principles for nonprofit participants.

So as not to force financial system changes for any nonprofit participant, an expenditure-based TIA will provide that costs to be charged to the RD&D project by any nonprofit participant must be determined to be allowable in accordance with:

(a) OMB Circular A-87, if the participant is a State or local governmental organization;

(b) OMB Circular A-21, if the participant is an institution of higher education;

(c) 45 CFR Part 74, Appendix E, if the participant is a hospital; or

(d) OMB Circular A-122, if the participant is any other type of nonprofit organization (the cost principles in 48 CFR parts 31 and 231 are to be used by any nonprofit organization that is identified in Circular A-122 as being subject to those cost principles).

§ 603.640 Audits of for-profit participants.

If the TIA is an expenditure-based award, the contracting officer must include in it an audit provision that addresses, for each for-profit participant:

(a) Whether the for-profit participant must have periodic audits, in addition to any award-specific audits, as described in § 603.645;

(b) Whether the Defense Contract Audit Agency (DCAA) or an independent public accountant (IPA) will perform required audits, as discussed in § 603.650;

(c) How frequently any periodic audits are to be performed, addressed in § 603.655; and

(d) Other matters described in § 603.660, such as audit coverage, allowability of audit costs, auditing standards, and remedies for noncompliance.

§ 603.645 Periodic audits and award-specific audits of for-profit participants.

The contracting officer needs to consider requirements for both periodic audits and award-specific audits (as defined in § 603.1295 and § 603.1220, respectively). The way that an expenditure-based TIA addresses the two types of audits will vary, depending upon the type of for-profit participant.

(a) For for-profit participants that are audited by the DCAA or other Federal auditors, as described in §§ 603.650(b) and 603.655, specific requirements for periodic audits need not be added because the Federal audits should be sufficient to address whatever may be needed. The inclusion in the TIA of the standard access-to-records provision for those for-profit participants, as discussed in § 603.910(a), gives the necessary access in the event that the contracting officer later needs to request audits to address award-specific issues that arise.

(b) For each other for-profit participant, the contracting officer:

(1) Should require that the participant have an independent auditor (i.e., the DCAA or an independent public accountant (IPA)) conduct periodic audits of its systems if it expends \$500,000 or more per year in TIAs and other Federal assistance awards. A prime reason for including this requirement is that the Federal Government, for an expenditure-based award, necessarily relies on amounts reported by the participant's systems when it sets payment amounts or adjusts performance outcomes. The periodic audit provides some assurance that the reported amounts are reliable.

(2) Must ensure that the award provides an independent auditor the access needed for award-specific audits, to be performed at the request of the contracting officer if issues arise that require audit support. However, consistent with the government-wide policies on single audits that apply to nonprofit participants (see § 603.665), the contracting officer should rely on periodic audits to the maximum extent possible to resolve any award-specific issues.

§ 603.650 Designation of auditor for for-profit participants.

The auditor identified in an expenditure-based TIA to perform periodic and award-specific audits of a for-profit participant depends on the circumstances, as follows:

(a) The Federal cognizant agency or an IPA will be the auditor for a for-profit participant that does not meet the criteria in paragraph (b) of this section. Note that the allocable portion of the costs of the IPA's audit may be reimbursable under the TIA, as described in § 603.660(b). The IPA should be the one that the participant uses to perform other audits (e.g., of its financial statement), to minimize added burdens and costs.

(b) Except as provided in paragraph (c) of this section, the Federal cognizant agency (e.g., DCAA) must be identified as the auditor for a GOCO or FFRDC and for any for-profit participant that is subject to Federal audits because it is currently performing under a Federal award that is subject to the:

§ 603.655

(1) Cost principles in 48 CFR part 31 of the Federal Acquisition Regulation (FAR); or

(2) Cost Accounting Standards in 48 CFR Chapter 99.

(c) If there are programmatic or business reasons that justify the use of an auditor other than the Federal cognizant agency for a for-profit participant that meets the criteria in paragraph (b) of this section, the contracting officer may provide that an IPA will be the auditor for that participant in which case the reasons for this decision must be documented in the award file.

§ 603.655 Frequency of periodic audits of for-profit participants.

If an expenditure-based TIA provides for periodic audits of a for-profit participant by an IPA, the contracting officer must specify the frequency for those audits. The contracting officer should consider having an audit performed during the first year of the award, when the participant has its IPA do its next financial statement audit, unless the participant already had a systems audit due to other Federal awards within the past two years. The frequency thereafter may vary depending upon the dollars the participant is expending annually under the award, but it is not unreasonable to require an updated audit every two to three years to verify that the participant's systems continue to be reliable (the audit then would cover the two or three-year period between audits).

§ 603.660 Other audit requirements.

If an expenditure-based TIA provides for audits of a for-profit participant by an IPA, the contracting officer also must specify:

(a) What periodic audits are to cover. It is important to specify audit coverage that is only as broad as needed to provide reasonable assurance of the participant's compliance with award terms that have a direct and material effect on the RD&D project.

(b) Who will pay for periodic and award-specific audits. The allocable portion of the costs of any audits by IPAs may be reimbursable under the TIA. The costs may be direct charges or allocated indirect costs, consistent

10 CFR Ch. II (1-1-16 Edition)

with the participant's accounting system and practices.

(c) The auditing standards that the IPA will use. The contracting officer must provide that the IPA will perform the audits in accordance with the Generally Accepted Government Auditing Standards.

(d) The available remedies for non-compliance. The agreement must provide that the participant may not charge costs to the award for any audit that the contracting officer determines was not performed in accordance with the Generally Accepted Government Auditing Standards or other terms of the agreement. It also must provide that the Government has the right to require the participant to have the IPA take corrective action and, if corrective action is not taken, that the agreements officer has recourse to any of the remedies for noncompliance identified in 10 CFR 600.352(a).

(e) Where the IPA is to send audit reports. The agreement must provide that the IPA is to submit audit reports to the contracting officer. It also must require that the IPA report instances of fraud directly to the Office of Inspector General (OIG), DOE.

(f) The retention period for the IPA's working papers. The contracting officer must specify that the IPA is to retain working papers for a period of at least three years after the final payment, unless the working papers relate to an audit whose findings are not fully resolved within that period or to an unresolved claim or dispute (in which case, the IPA must keep the working papers until the matter is resolved and final action taken).

(g) Who will have access to the IPA's working papers. The agreement must provide for Government access to working papers.

§ 603.665 Periodic audits of nonprofit participants.

An expenditure-based TIA is an assistance instrument subject to the Single Audit Act (31 U.S.C. 7501-7507), so nonprofit participants are subject to the requirements under that Act and OMB Circular A-133. Specifically, the requirements are those in:

(a) 10 CFR 600.226 for State and local governments; and

Department of Energy

§ 603.685

(b) 10 CFR 600.126 for other nonprofit organizations.

§ 603.670 Flow down audit requirements to subrecipients.

(a) In accordance with § 603.610, an expenditure-based TIA must require participants to flow down the same audit requirements to a subrecipient that would apply if the subrecipient were a participant.

(b) For example, a for-profit participant that is audited by the DCAA:

(1) Would flow down to a university subrecipient the Single Audit Act requirements that apply to a university participant;

(2) Could enter into a subaward allowing a for-profit participant, under the circumstances described in § 603.650(a), to use an IPA to do its audits.

(c) This policy applies to subawards for substantive performance of portions of the RD&D project supported by the TIA, and not to participants' purchases of goods or services needed to carry out the RD&D.

§ 603.675 Reporting use of IPA for subawards.

An expenditure-based TIA should require participants to report to the contracting officer when they enter into any subaward allowing a for-profit subawardee to use an IPA, as described in § 603.670(b)(2).

PROPERTY

§ 603.680 Purchase of real property and equipment by for-profit firms.

(a) With the two exceptions described in paragraph (b) of this section, the contracting officer must require a for-profit firm to purchase real property or equipment with its own funds that are separate from the RD&D project. The contracting officer should allow the firm to charge to an expenditure-based TIA only depreciation or use charges for real property or equipment (and the cost estimate for a fixed-support TIA only would include those costs). Note that the firm must charge depreciation consistently with its usual accounting practice. Many firms treat depreciation as an indirect cost. Any firm that usually charges depreciation indirectly

for a particular type of property must not charge depreciation for that property as a direct cost to the TIA.

(b) In two situations, the contracting officer may grant an exception and allow a for-profit firm to use project funds, which includes both the Federal Government and recipient shares, to purchase real property or equipment (i.e., to charge to the project the full acquisition cost of the property). The two circumstances, which should be infrequent for equipment and extremely rare for real property, are those in which either:

(1) The real property or equipment will be dedicated to the project and has a current fair market value that is less than \$5,000 by the time the project ends; or

(2) The contracting officer gives prior approval for the firm to include the full acquisition cost of the real property or equipment as part of the cost of the project (see § 603.535).

(c) If the contracting officer grants an exception in either of the circumstances described in paragraphs (b)(1) and (2) of this section, the real property or equipment must be subject to the property management standards in 10 CFR 600.321(b) through (e). As provided in those standards, the title to the real property or equipment will vest conditionally in the for-profit firm upon acquisition. A TIA, whether it is a fixed-support or expenditure-based award, must specify that any item of equipment that has a fair market value of \$5,000 or more at the conclusion of the project also will be subject to the disposition process in 10 CFR 600.321(f), whereby the Federal Government will recover its interest in the property at that time.

§ 603.685 Management of real property and equipment by nonprofit participants.

For nonprofit participants, a TIA's requirements for vesting of title, use, management, and disposition of real property or equipment acquired under the award are the same as those that apply to the participant's other Federal assistance awards. Specifically, the requirements are those in:

§ 603.690

(a) 10 CFR 600.231 and 600.232, for participants that are States and local governmental organizations; and

(b) 10 CFR 600.132 and 600.134, for other nonprofit participants, with the exception of nonprofit GOCOs and FFRDCs that are exempted from the definition of “recipient” in 10 CFR 600.101. If a GOCO or FFRDC is a participant, the contracting officer must specify appropriate standards that conform as much as practicable with the requirements in its procurement contract. Note also that:

(1) If the TIA is a cooperative agreement, 31 U.S.C. 6306 provides authority to vest title to tangible personal property in a nonprofit institution of higher education or in a nonprofit organization whose primary purpose is conducting scientific research, without further obligation to the Federal Government; and

(2) A TIA therefore must specify any conditions on the vesting of title to real property or equipment acquired by any such nonprofit participant.

§ 603.690 Requirements for Federally-owned property.

If DOE provides Federally-owned property to any participant for the performance of RD&D under a TIA, the contracting officer must require that participant to account for, use, and dispose of the property in accordance with:

(a) 10 CFR 600.322, if the participant is a for-profit firm.

(b) 10 CFR 600.232(f), if the participant is a State or local governmental organization. Note that 10 CFR 600.232(f) contains additional requirements for managing the property.

(c) 10 CFR 600.133(a) and 600.134(f), if the participant is a nonprofit organization other than a GOCO or FFRDC (requirements for GOCOs and FFRDCs should conform with the property standards in their procurement contracts).

§ 603.695 Requirements for supplies.

An expenditure-based TIA’s provisions should permit participants to use their existing procedures to account for and manage supplies. A fixed-support TIA should not include require-

10 CFR Ch. II (1–1–16 Edition)

ments to account for or manage supplies.

PURCHASING

§ 603.700 Standards for purchasing systems of for-profit firms.

(a) If the TIA is an expenditure-based award, it should require for-profit participants that currently perform under DOE assistance instruments subject to the purchasing standards in 10 CFR 600.331 to use the same requirements for the TIA, unless there are programmatic or business reasons to do otherwise (in which case the reasons must be documented in the award file).

(b) Other for-profit participants under an expenditure-based TIA should be allowed to use their existing purchasing systems, as long as they flow down the applicable requirements in Federal statutes, Executive Orders or Government-wide regulations (see Appendices A and B to this part for a list of those requirements).

§ 603.705 Standards for purchasing systems of nonprofit organizations.

So as not to force system changes for any nonprofit participant, an expenditure-based TIA should provide that each nonprofit participant’s purchasing system comply with:

(a) 10 CFR 600.236, if the participant is a State or local governmental organization.

(b) 10 CFR 600.140 through 10 CFR 600.149, if the participant is a nonprofit organization other than a GOCO or FFRDC that is excepted from the definition of “recipient” in 10 CFR 600.101. If a GOCO or FFRDC is a participant, the TIA must specify appropriate standards that conform as much as practicable with requirements in its procurement contract.

Subpart G—Award Terms Related to Other Administrative Matters

§ 603.800 Scope.

This subpart addresses administrative matters that do not impose organization-wide requirements on a participant’s financial management, property management, or purchasing system. Because an organization does not

Department of Energy

§ 603.825

have to redesign its systems to accommodate award-to-award variations in these requirements, TIAs may differ in the requirements that they specify for a given participant, based on the circumstances of the particular RD&D project. To eliminate needless administrative complexity, the contracting officer should handle some requirements, such as the payment method, in a uniform way for the agreement as a whole.

PAYMENTS

§ 603.805 Payment methods.

A TIA may provide for:

(a) *Reimbursement*, as described in 10 CFR 600.312(a)(1), if it is an expenditure-based award.

(b) *Advance payments*, as described in 10 CFR 600.312(a)(2), subject to the conditions in 10 CFR 600.312(b)(2)(i) through (iii).

(c) *Payments based on payable milestones*. These are payments made according to a schedule that is based on predetermined measures of technical progress or other payable milestones. This approach relies upon the fact that, as the RD&D progresses throughout the term of the agreement, observable activity will be taking place. The recipient is paid upon the accomplishment of a predetermined measure of progress. A fixed-support TIA must use this payment method (this does not preclude use of an initial advance payment, if there is no alternative to meeting immediate cash needs). Payments based on payable milestones is the preferred method of payment for an expenditure-based TIA if well-defined outcomes can be identified.

§ 603.810 Method and frequency of payment requests.

The procedure and frequency for payment requests depend upon the payment method, as follows:

(a) For either reimbursements or advance payments, the TIA must allow recipients to submit requests for payment at least monthly. The contracting officer may authorize the recipients to use the forms or formats described in 10 CFR 600.312(d).

(b) If the payments are based on payable milestones, the recipient will submit a report or other evidence of ac-

complishment to the program official at the completion of each predetermined activity. If the award is an expenditure-based TIA that includes minimum cost sharing percentages for milestones (see 10 CFR 603.570(c)), the recipient must certify in the report that the minimum cost sharing requirement has been met. The contracting officer may approve payment to the recipient after receiving validation from the program manager that the milestone was successfully reached.

§ 603.815 Withholding payments.

A TIA must provide that the contracting officer may withhold payments in the circumstances described in 10 CFR 600.312(g), but not otherwise.

§ 603.820 Interest on advance payments.

If an expenditure-based TIA provides for either advance payments or payable milestones, the agreement must require the recipient to:

(a) Maintain in an interest-bearing account any advance payments or milestone payment amounts received in advance of needs to disburse the funds for program purposes unless:

(1) The recipient receives less than \$120,000 in Federal grants, cooperative agreements, and TIAs per year;

(2) The best reasonably available interest-bearing account would not be expected to earn interest in excess of \$1,000 per year on the advance or milestone payments; or

(3) The depository would require an average or minimum balance so high that it would not be feasible within the expected Federal and non-Federal cash resources for the project.

(b) Remit annually the interest earned to the contracting officer.

REVISION OF BUDGET AND PROGRAM PLANS

§ 603.825 Government approval of changes in plans.

If it is an expenditure-based award, a TIA must require the recipient to obtain the contracting officer's prior approval if there is to be a change in

§ 603.830

plans that may result in a need for additional Federal funding (this is unnecessary for a fixed-support TIA because the recipient is responsible for additional costs of achieving the outcomes). Other than that, the program official's substantial involvement in the project should ensure that the Government has advance notice of changes in plans.

§ 603.830 Pre-award costs.

Pre-award costs, as long as they are otherwise allowable costs of the project, may be charged to an expenditure-based TIA only with the specific approval of the contracting officer. All pre-award costs are incurred at the recipient's risk (e.g., DOE is not obligated to reimburse the costs if, for any reason, the recipient does not receive an award, or if the award is less than anticipated and inadequate to cover the costs).

PROGRAM INCOME

§ 603.835 Program income requirements.

A TIA must apply the standards of 10 CFR 600.314 for program income that may be generated. The TIA must also specify if the recipient is to have any obligation to the Federal Government with respect to program income generated after the end of the project period (i.e., the period, as established in the award document, during which Federal support is provided).

INTELLECTUAL PROPERTY

§ 603.840 Negotiating data and patent rights.

(a) The contracting officer must confer with program officials and assigned intellectual property counsel to develop an overall strategy for intellectual property that takes into account inventions and data that may result from the project and future needs the Government may have for rights in them. The strategy should take into account program mission requirements and any special circumstances that would support modification of standard patent and data terms, and should include considerations such as the extent of the recipient's contribution to the development of the technology; ex-

10 CFR Ch. II (1–1–16 Edition)

pected Government or commercial use of the technology; the need to provide equitable treatment among consortium or team members; and the need for the DOE to engage non-traditional Government contractors with unique capabilities.

(b) Because a TIA entails substantial cost sharing by recipients, the contracting officer must use discretion in negotiating Government rights to data and patentable inventions resulting from the RD&D under the agreements. The considerations in §§ 603.845 through 603.875 are intended to serve as guidelines, within which there is considerable latitude to negotiate provisions appropriate to a wide variety of circumstances that may arise.

§ 603.845 Data rights requirements.

(a) If the TIA is a cooperative agreement, the requirements at 10 CFR 600.325(d), Rights in data—general rule, apply. The “Rights in Data—General” provision in Appendix A to Subpart D of 10 CFR 600 normally applies. This provision provides the Government with unlimited rights in data first produced in the performance of the agreement, except as provided in paragraph (c) Copyright. However, in certain circumstances, the “Rights in Data—Programs Covered Under Special Protected Data Statutes” provision in Appendix A may apply.

(b) If the TIA is an assistance transaction other than a cooperative agreement, the requirements at 10 CFR 600.325(e), Rights in data—programs covered under special protected data statutes, normally apply. The “Rights in Data—Programs Covered Under Special Data Statutes” provision in Appendix A to Subpart D of 10 CFR 600 may be modified to accommodate particular circumstances (e.g., access to or expanded use rights in protected data among consortium or team members), or to list data or categories of data that the recipient must make available to the public. In unique cases, the contracting officer may negotiate special data rights requirements that vary from those in 10 CFR 600.325. Modifications to the standard data provisions must be approved by intellectual property counsel.

§ 603.850 Marking of data.

To protect the recipient's interests in data, the TIA should require the recipient to mark any particular data that it wishes to protect from disclosure as specified in 10 CFR 600.15(b).

[76 FR 26582, May 9, 2011]

§ 603.855 Protected data.

In accordance with law and regulation, the contracting officer must not release or disclose data marked with a restrictive legend (as specified in 603.850) to third parties, unless they are parties authorized by the award agreement or the terms of the legend to receive the data and are subject to a written obligation to treat the data in accordance with the marking.

§ 603.860 Rights to inventions.

(a) The contracting officer should negotiate rights in inventions that represent an appropriate balance between the Government's interests and the recipient's interests.

(1) The contracting officer has the flexibility to negotiate patent rights requirements that vary from that which the Bayh-Dole statute (Chapter 18 of Title 35, U.S.C.) and 42 U.S.C. 2182 and 5908 require. A TIA becomes an assistance transaction other than a cooperative agreement if its patent rights requirements vary from those required by these statutes.

(2) If the TIA is a cooperative agreement, the patent rights provision of 10 CFR 600.325(b) or (c) or 10 CFR 600.136 applies, depending on the type of recipient. Unless a class waiver has been issued under 10 CFR 784.7, it will be necessary for a large, for-profit business to request a patent waiver to obtain title to subject inventions.

(b) The contracting officer may negotiate Government rights that vary from the statutorily-required patent rights requirements described in paragraph (a)(2) of this section when necessary to accomplish program objectives and foster the Government's interests. Doing so would make the TIA an assistance transaction other than a cooperative agreement. The contracting officer must decide, with the help of the program manager and assigned intellectual property counsel,

what best represents a reasonable arrangement considering the circumstances, including past investments and anticipated future investments of the recipient to the development of the technology, contributions under the current TIA, and potential commercial and Government markets. Any change to the standard patent rights provisions must be approved by assigned intellectual property counsel.

(c) Taking past investments as an example, the contracting officer should consider whether the Government or the recipient has contributed more substantially to the prior RD&D that provides the foundation for the planned effort. If the predominant past contributor to the particular technology has been:

(1) The Government, then the TIA's patent rights provision should be the standard provision as set forth in 10 CFR 600.325(b) or (c), or 10 CFR 600.136, as applicable.

(2) The recipient, then less restrictive patent requirements may be appropriate, which would make the TIA an assistance transaction other than a cooperative agreement. The contracting officer normally would, with the concurrence of intellectual property counsel, allow the recipient to retain title to subject inventions without going through the process of obtaining a patent waiver as required by 10 CFR 784. For example, with the concurrence of intellectual property counsel, the contracting officer also could eliminate or modify the nonexclusive paid-up license for practice by or on behalf of the Government to allow the recipient to benefit more directly from its investments.

(d) For subawards under a TIA that is other than a cooperative agreement, the TIA should normally specify that subrecipients' invention rights are to be negotiated between recipient and subrecipient; that subrecipients will get title to inventions they make; or some other disposition of invention rights. Factors to be considered by the contracting officer in addressing subrecipient's invention rights include: the extent of cost sharing by parties at all tiers; a subrecipient's status as a small business, nonprofit, or FFRDC; and whether an appropriate field of use

§ 603.865

licensing requirement would meet the needs of the parties.

(e) Consortium members may allocate invention rights in their collaboration agreement, subject to the review of the contracting officer (See § 603.515). The contracting officer, in performing such review, should consider invention rights to be retained by the Government and rights that may be obtained by small business, nonprofit or FFRDC consortium members.

§ 603.865 March-in rights.

A TIA's patent rights provision should include the Bayh-Dole march-in rights set out in paragraph (j) of the Patent Rights (Small Business Firms and Nonprofit Organization) provision in Appendix A to subpart D of 10 CFR 600, or an equivalent clause, concerning actions that the Government may take to obtain the right to use subject inventions, if the recipient fails to take effective steps to achieve practical application of the subject inventions within a reasonable time. The march-in provision may be modified to best meet the needs of the program. However, only infrequently should the march-in provision be entirely removed (*e.g.*, if a recipient is providing most of the funding for a RD&D project, with the Government providing a much smaller share).

§ 603.870 Marking of documents related to inventions.

To protect the recipient's interest in inventions, the TIA should require the recipient to mark documents disclosing inventions it desires to protect by obtaining a patent. The recipient should mark the documents with a legend identifying them as intellectual property subject to public release or public disclosure restrictions, as provided in 35 U.S.C. 205.

§ 603.875 Foreign access to technology and U.S. competitiveness provisions.

(a) Consistent with the objective of enhancing national security and United States competitiveness by increasing the public's reliance on the United States commercial technology, the contracting officer must include provisions in a TIA that addresses for-

10 CFR Ch. II (1-1-16 Edition)

eign access to technology developed under the TIA.

(b) A provision must provide, as a minimum, that any transfer of the technology must be consistent with the U.S. export laws, regulations and the Department of Commerce Export Regulation at Chapter VII, Subchapter C, Title 15 of the CFR (15 CFR parts 730-774), as applicable.

(c) A provision should also provide that any products embodying, or produced through the use of, any created intellectual property, will be manufactured substantially in the United States, and that any transfer of the right to use or sell the products must, unless the Government grants a waiver, require that the products will be manufactured substantially in the United States. In individual cases, the contracting officer, with the approval of the program official and intellectual property counsel, may waive or modify the requirement of substantial manufacture in the United States at the time of award, or subsequent thereto, upon a showing by the recipient that:

- (1) Alternative benefits are being secured for the United States taxpayer (*e.g.*, increased domestic jobs notwithstanding foreign manufacture);
- (2) Reasonable but unsuccessful efforts have been made to transfer the technology under similar terms to those likely to manufacture substantially in the United States; or
- (3) Under the circumstances domestic manufacture is not commercially feasible.

FINANCIAL AND PROGRAMMATIC REPORTING

§ 603.880 Reports requirements.

A TIA must include requirements that, as a minimum, provide for periodic reports addressing program performance and, if it is an expenditure-based award, business/financial status. The contracting officer must require submission of the reports at least annually, and may require submission as frequently as quarterly (this does not preclude a recipient from electing to submit more frequently than quarterly the financial information that is required to process payment requests if the award is an expenditure-based TIA

Department of Energy

§ 603.910

that uses reimbursement or advance payments under § 603.810(a)). The requirements for the content of the reports are as follows:

(a) The program portions of the reports must address progress toward achieving performance goals and milestones, including current issues, problems, or developments.

(b) The business/financial portions of the reports, applicable only to expenditure-based awards, must provide summarized details on the status of resources (federal funds and non-federal cost sharing), including an accounting of expenditures for the period covered by the report. The report should compare the resource status with any payment and expenditure schedules or plans provided in the original award; explain any major deviations from those schedules; and discuss actions that will be taken to address the deviations. The contracting officer may require a recipient to separately identify in these reports the expenditures for each participant in a consortium and for each programmatic milestone or task, if the contracting officer, after consulting with the program official, judges that those additional details are needed for good stewardship.

§ 603.885 Updated program plans and budgets.

In addition to reports on progress to date, a TIA may include a provision requiring the recipient to annually prepare an updated technical plan for future conduct of the research effort and a revised budget if there is a significant change from the initial budget.

§ 603.890 Final performance report.

A TIA must require a final performance report that addresses all major accomplishments under the TIA.

§ 603.895 Protection of information in programmatic reports.

If a TIA is awarded under the authority of 42 U.S.C. 7256(g) (*i.e.*, it is a type of assistance transaction “other than” a contract, grant or a cooperative agreement), the contracting officer may inform a participant that the award is covered by a special protected data statute, which provides for the protection from public disclosure, for a

period of up to 5 years after the date on which the information is developed, any information developed pursuant to this transaction that would be trade secret, or commercial or financial information that is privileged or confidential, if the information had been obtained from a non-Federal party.

§ 603.900 Receipt of final performance report.

The TIA should make receipt of the final report a condition for final payment. If the payments are based on payable milestones, the submission and acceptance of the final report by the Government representative will be incorporated as an event that is a prerequisite for one of the payable milestones.

RECORDS RETENTION AND ACCESS REQUIREMENTS

§ 603.905 Record retention requirements.

A TIA must require participants to keep records related to the TIA (for which the agreement provides Government access under § 603.910) for a period of three years after submission of the final financial status report for an expenditure-based TIA or final program performance report for a fixed-support TIA, with the following exceptions:

(a) The participant must keep records longer than three years after submission of the final financial status report if the records relate to an audit, claim, or dispute that begins but does not reach its conclusion within the 3-year period. In that case, the participant must keep the records until the matter is resolved and final action taken.

(b) Records for any real property or equipment acquired with project funds under the TIA must be kept for three years after final disposition.

§ 603.910 Access to a for-profit participant's records.

(a) If a for-profit participant currently grants access to its records to the DCAA or other Federal Government auditors, the TIA must include for that participant the standard access-to-records requirements at 10 CFR 600.342(e). If the agreement is a fixed-

§ 603.915

support TIA, the language in 10 CFR 600.342(e) may be modified to provide access to records concerning the recipient's technical performance, without requiring access to the recipient's financial or other records. Note that any need to address access to technical records in this way is in addition to, not in lieu of, the need to address rights in data (see § 603.845).

(b) For other for-profit participants that do not currently give the Federal Government direct access to their records and are not willing to grant full access to records pertinent to the award, the contracting officer may negotiate limited access to the recipient's financial records. For example, if the audit provision of an expenditure-based TIA gives an IPA access to the recipient's financial records for audit purposes, the Federal Government must have access to the IPA's reports and working papers and the contracting officer need not include a provision requiring direct Government access to the recipient's financial records. For both fixed-support and expenditure-based TIAs, the TIA must include the access-to-records requirements at 10 CFR 600.342(e) for records relating to technical performance.

§ 603.915 Access to a nonprofit participant's records.

A TIA must include for any nonprofit participant the standard access-to-records requirement at:

(a) 10 CFR 600.242(e), for a participant that is a State or local governmental organization;

(b) 10 CFR 600.153(e), for a participant that is a nonprofit organization. The same requirement applies to any GOCO or FFRDC, even though nonprofit GOCOs and FFRDCs are exempted from the definition of "recipient" in 10 CFR 600.101.

TERMINATION AND ENFORCEMENT

§ 603.920 Termination and enforcement requirements.

(a) *Termination.* A TIA must include the following conditions for termination:

(1) An award may be terminated in whole or in part by the contracting officer, if a recipient materially fails to

10 CFR Ch. II (1–1–16 Edition)

comply with the terms and conditions of the award.

(2) Subject to a reasonable determination by either party that the project will not produce beneficial results commensurate with the expenditure of resources, that party may terminate in whole or in part the agreement by providing at least 30 days advance written notice to the other party, provided such notice is preceded by consultation between the parties. The two parties will negotiate the termination conditions, including the effective date and, in the case of partial termination, the portion to be terminated. If either party determines in the case of partial termination that the reduced or modified portion of the award will not accomplish the purpose for which the award was made, the award may be terminated in its entirety.

(3) Unless otherwise negotiated, for terminations of an expenditure based TIA, DOE's maximum liability is the lesser of:

(i) DOE's share of allowable costs incurred up to the date of termination, or

(ii) The amount of DOE funds obligated to the TIA.

(4) Unless otherwise negotiated, for terminations of a fixed-support based TIA, DOE shall pay the recipient a proportionate share of DOE's financial commitment to the project based on the percent of project completion as of the date of termination.

(5) Notwithstanding paragraphs (3) and (4) of this section, if the award includes milestone payments, the Government has no obligation to pay the recipient beyond the last completed and paid milestone if the recipient decides to terminate.

(b) *Enforcement.* The standards of 10 CFR 600.352 (for enforcement) and the procedures in 10 CFR 600.22 (for disputes and appeals) apply.

Subpart H—Executing the Award

§ 603.1000 Contracting officer's responsibilities at time of award.

At the time of the award, the contracting officer must:

(a) Ensure that the award document contains the appropriate terms and

Department of Energy

§ 603.1010

conditions and is signed by the appropriate parties, in accordance with §§ 603.1005 through 603.1015.

(b) Document the analysis of the agreement in the award file, as discussed in § 603.1020.

(c) Provide information about the award to the office responsible for reporting on TIAs.

THE AWARD DOCUMENT

§ 603.1005 General responsibilities.

The contracting officer is responsible for ensuring that the award document is complete and accurate. The document should:

(a) Address all issues;

(b) State requirements directly. It is not helpful to readers to incorporate statutes or rules by reference, without sufficient explanation of the requirements. The contracting officer generally should not incorporate clauses from the Federal Acquisition Regulation (48 CFR parts 1–53) or Department of Energy Acquisition Regulation (48 CFR parts 901–970) because those provisions are designed for procurement contracts that are used to acquire goods and services, rather than for a TIA or other assistance instruments.

(c) Be written in clear and concise language, to minimize potential ambiguity.

§ 603.1010 Substantive issues.

Each TIA is designed and negotiated individually to meet the specific requirements of the particular project, so the list of substantive issues that will be addressed in the award document may vary. Every award document must address:

(a) *Project scope.* The scope is an overall vision statement for the project, including a discussion of the project's purpose, objectives, and detailed commercial goals. It is a critical provision because it provides a context for resolving issues that may arise during post-award administration. In a fixed-support TIA, the well-defined outcomes that reliably indicate the amount of effort expended and serve as the basis for the level of the fixed support must be clearly specified (see §§ 603.305 and 603.560(a)).

(b) *Project management.* The TIA should describe the nature of the relationship between the Federal Government and the recipient; the relationship among the participants, if the recipient is an unincorporated consortium; and the overall technical and administrative management of the project. A TIA is used to carry out collaborative relationships between the Federal Government and the recipient. Consequently, there must be substantial involvement of the DOE program official (see § 603.220) and usually the contracting officer. The program official provides technical insight, which differs from the usual technical oversight of a project. The management provision also should discuss how modifications to the TIA are made.

(c) *Termination, enforcement, and disputes.* A TIA must provide for termination, enforcement remedies, and disputes and appeals procedures, in accordance with § 603.920.

(d) *Funding.* The TIA must:

(1) Show the total amount of the agreement and the total period of performance.

(2) If the TIA is an expenditure-based award, state the Government's and recipient's agreed-upon cost shares for the project period and for each budget period. The award document should identify values for any in-kind contributions, determined in accordance with §§ 603.530 through 603.555, to preclude later disagreements about them.

(3) Specify the amount of Federal funds obligated and the performance period for those obligated funds.

(4) State, if the agreement is to be incrementally funded, that the Government's obligation for additional funding is contingent upon the availability of funds and that no legal obligation on the part of the Government exists until additional funds are made available and the agreement is amended. The TIA also must include a prior approval requirement for changes in plans requiring additional Government funding, in accordance with § 603.825.

(e) *Payment.* The TIA must identify the payment method and tell the recipient how, when, and where to submit payment requests, as discussed in §§ 603.805 through 603.815. The payment method must take into account sound

§ 603.1015

10 CFR Ch. II (1–1–16 Edition)

cash management practices by avoiding unwarranted cash advances. For an expenditure-based TIA, the payment provision must require the return of interest should excess cash balances occur, in accordance with § 603.820. For any TIA using the milestone payment method described in § 603.805(c), the TIA must include language notifying the recipient that the contracting officer may adjust amounts of future milestone payments if a project's expenditures fall too far below the projections that were the basis for setting the amounts (see § 603.575(c) and § 603.1105(c)).

(f) *Records retention and access to records.* The TIA must include the records retention requirement at § 603.910. The TIA also must provide for access to for-profit and nonprofit participants' records, in accordance with § 603.915 and § 603.920.

(g) *Patents and data rights.* In designing the patents and data rights provision, the TIA must set forth the minimum required Federal Government rights in intellectual property generated under the award and address related matters, as provided in §§ 603.840 through 603.875. It is important to define all essential terms in the patent rights provision.

(h) *Foreign access to technology and U.S. competitiveness.* The TIA must include provisions, in accordance with § 603.875, concerning foreign access and domestic manufacture of products using technology generated under the award.

(i) *Title to, management of, and disposition of tangible property.* The property provisions for for-profit and nonprofit participants must be in accordance with §§ 603.685 through 603.700.

(j) *Financial management systems.* For an expenditure-based award, the TIA must specify the minimum standards for financial management systems of both for-profit and nonprofit participants, in accordance with §§ 603.615 and 603.620.

(k) *Allowable costs.* If the TIA is an expenditure-based award, it must specify the standards that both for-profit and nonprofit participants are to use to determine which costs may be charged to the project, in accordance with

§§ 603.625 through 603.635, as well as § 603.830.

(l) *Audits.* If a TIA is an expenditure-based award, it must include an audit provision for both for-profit and nonprofit participants and subrecipients, in accordance with §§ 603.640 through 603.670 and § 603.675.

(m) *Purchasing system standards.* The TIA should include a provision specifying the standards in §§ 603.700 and 603.705 for purchasing systems of for-profit and nonprofit participants, respectively.

(n) *Program income.* The TIA should specify requirements for program income, in accordance with § 603.835.

(o) *Financial and programmatic reporting.* The TIA must specify the reports that the recipient is required to submit and tell the recipient when and where to submit them, in accordance with §§ 603.880 through 603.900.

(p) *Assurances for applicable national policy requirements.* The TIA must incorporate assurances of compliance with applicable requirements in Federal statutes, Executive Orders, or regulations (except for national policies that require certifications). Appendix A to this part contains a list of commonly applicable requirements that should be augmented with any specific requirements that apply to a particular TIA (e.g., general provisions in the appropriations act for the specific funds that are being obligating).

(q) *Other matters.* The agreement should address any other issues that need clarification, including the name of the contracting officer who will be responsible for post-award administration and the statutory authority or authorities for entering into the TIA. In addition, the agreement must specify that it takes precedence over any inconsistent terms and conditions in collateral documents such as attachments to the TIA or the recipient's articles of collaboration.

§ 603.1015 Execution.

(a) If the recipient is a consortium that is not formally incorporated and the consortium members prefer to have the agreement signed by all of them individually, the agreement may be executed in that manner.

Department of Energy

§ 603.1100

(b) If they wish to designate one consortium member to sign the agreement on behalf of the consortium as a whole, the determination whether to execute the agreement in that way should not be made until the contracting officer reviews the consortium's articles of collaboration with legal counsel.

(1) The purposes of the review are to:

(i) Determine whether the articles properly authorize one participant to sign on behalf of the other participants and are binding on all consortium members with respect to the RD&D project; and

(ii) Assess the risk that otherwise could exist when entering into an agreement signed by a single member on behalf of a consortium that is not a legal entity. For example, the contracting officer should assess whether the articles of collaboration adequately address consortium members' future liabilities related to the RD&D project (e.g., whether they will have joint and severable liability).

(2) After the review, in consultation with legal counsel, the contracting officer should determine whether it is better to have all of the consortium members sign the agreement individually or to allow them to designate one member to sign on all members' behalf.

REPORTING INFORMATION ABOUT THE AWARD

§ 603.1020 File documents.

The award file should include an analysis which:

(a) Briefly describes the program and details the specific commercial benefits that should result from the project supported by the TIA. If the recipient is a consortium that is not formally incorporated, a copy of the signed articles of collaboration should be attached.

(b) Describes the process that led to the award of the TIA, including how DOE solicited and evaluated proposals and selected the one supported through the TIA.

(c) Explains the basis for the decision that a TIA was the most appropriate instrument, in accordance with the factors in Subpart B of this part. The explanation must include the answers to

the relevant questions in § 603.225(a) through (d).

(d) Explains how the recipient's cost sharing contributions was valued in accordance with §§ 603.530 through 603.555. For a fixed-support TIA, the file must document the analysis required (see § 603.560) to set the fixed level of Federal support; the documentation must explain how the recipient's minimum cost share was determined and how the expenditures required to achieve the project outcomes were estimated.

(e) Documents the results of the negotiation, addressing all significant issues in the TIA's provisions.

Subpart I—Post-Award Administration

§ 603.1100 Contracting officer's post-award responsibilities.

Generally, the contracting officer's post-award responsibilities are the same responsibilities as those for any cooperative agreement. Responsibilities for a TIA include:

(a) Participating as the business partner to the DOE program official to ensure the Government's substantial involvement in the RD&D project. This may involve attendance with program officials at kickoff meetings or post-award conferences with recipients. It also may involve attendance at the consortium management's periodic meetings to review technical progress, financial status, and future program plans.

(b) Tracking and processing of reports required by the award terms and conditions, including periodic business status reports, programmatic progress reports, and patent reports.

(c) Handling payment requests and related matters. For a TIA using advance payments, that includes reviews of progress to verify that there is continued justification for advancing funds, as discussed in § 603.1105(b). For a TIA using milestone payments, it includes making any needed adjustments in future milestone payment amounts, as discussed in § 603.1105(c).

(d) Making continuation awards for subsequent budget periods, if the agreement includes separate budget periods. See 10 CFR 600.26(b). Any continuation award is contingent on availability of

§ 603.1105

funds, satisfactory progress towards meeting the performance goals and milestones, submittal of required reports, and compliance with the terms and conditions of the award.

(e) Coordinating audit requests and reviewing audit reports for both single audits of participants' systems and any award-specific audits that may be needed, as discussed in §§ 603.1115 and 603.1120.

(f) Responding, after coordination with program officials and intellectual property counsel, to recipient requests for permission to assign or license intellectual property to entities that do not agree to manufacture substantially in the United States, as described in § 603.875(b). Before granting approval for any technology, the contracting officer must secure assurance that any such assignment is consistent with license rights for Government use of the technology, and that other conditions for any such transfer are met.

§ 603.1105 Advance payments or payable milestones.

The contracting officer must:

(a) For any expenditure-based TIA with advance payments or payable milestones, forward to the responsible payment office any interest that the recipient remits in accordance with § 603.820(b). The payment office will return the amounts to the Department of the Treasury's miscellaneous receipts account.

(b) For any expenditure-based TIA with advance payments, consult with the program official and consider whether program progress reported in periodic reports, in relation to reported expenditures, is sufficient to justify the continued authorization of advance payments under § 603.805(b).

(c) For any expenditure-based TIA using milestone payments, work with the program official at the completion of each payable milestone or upon receipt of the next business status report to:

(1) Compare the total amount of project expenditures, as recorded in the payable milestone report or business status report, with the projected budget for completing the milestone; and

(2) Adjust future payable milestones, as needed, if expenditures lag substan-

10 CFR Ch. II (1-1-16 Edition)

tially behind what was originally projected and the contracting officer judges that the recipient is receiving Federal funds sooner than necessary for program purposes. Before making adjustments, the contracting officer should consider how large a deviation is acceptable at the time of the milestone. For example, suppose that the first milestone payment for a TIA is \$50,000, and that the awarding official set the amount based on a projection that the recipient would have to expend \$100,000 to reach the milestone (*i.e.*, the original plan was for the recipient's share at that milestone to be 50% of project expenditures). If the milestone payment report shows \$90,000 in expenditures, the recipient's share at this point is 44% (\$40,000 out of the total \$90,000 expended, with the balance provided by the \$50,000 milestone payment of Federal funds). For this example, the contracting officer should adjust future milestones if a 6% difference in the recipient's share at the first milestone is judged to be too large, but not otherwise. Remember that milestone payment amounts are not meant to track expenditures precisely at each milestone and that a recipient's share will increase as it continues to perform RD&D and expend funds, until it completes another milestone to trigger the next Federal payment.

§ 603.1110 Other payment responsibilities.

Regardless of the payment method, the contracting officer should ensure that:

(a) The request complies with the award terms;

(b) Available funds are adequate to pay the request;

(c) The recipient will not have excess cash on hand, based on expenditure patterns; and

(d) Payments are not withheld, except in one of the circumstances described in 10 CFR 600.312(g).

§ 603.1115 Single audits.

For audits of for-profit participant's systems, under §§ 603.640 through 603.660, the contracting officer is the

Department of Energy

§ 603.1245

focal point for ensuring that participants submit audit reports and for resolving any findings in those reports. The contracting officer's responsibilities regarding single audits of non-profit participant's systems are identified in the DOE "Guide to Financial Assistance."

§ 603.1120 Award-specific audits.

Guidance on when and how the contracting officer should request additional audits for an expenditure-based TIA is identical to the guidance in 10 CFR 600.316(d). If the contracting officer requires an award-specific examination or audit of a for-profit participant's records related to a TIA, the contracting officer must use the auditor specified in the award terms and conditions, which should be the same auditor who performs periodic audits of the participant.

Subpart J—Definitions of Terms Used in this Part

§ 603.1200 Definitions.

The terms defined in 10 CFR 600.3 apply to all DOE financial assistance, including a TIA. In addition to those terms, the following terms are used in this part.

§ 603.1205 Advance.

A payment made to a recipient before the recipient disburses the funds for program purposes. Advance payments may be based upon a recipient's request or a predetermined payment schedule.

§ 603.1210 Articles of collaboration.

An agreement among the participants in a consortium that is not formally incorporated as a legal entity, by which they establish their relative rights and responsibilities (see § 603.515).

§ 603.1215 Assistance.

The transfer of a thing of value to a recipient to carry out a public purpose of support or stimulation authorized by a law of the United States (see 31 U.S.C. 6101(3)). Grants, cooperative agreements, and technology invest-

ment agreements are examples of legal instruments used to provide assistance.

§ 603.1220 Award-specific audit.

An audit of a single TIA, usually done at the cognizant contracting officer's request, to help resolve issues that arise during or after the performance of the RD&D project. An award-specific audit of an individual award differs from a periodic audit of a participant (as defined in § 603.1295).

§ 603.1225 Cash contributions.

A recipient's cash expenditures made as contributions toward cost sharing, including expenditures of money that third parties contributed to the recipient.

§ 603.1230 Commercial firm.

A for-profit firm or segment of a for-profit firm (*e.g.*, a division or other business unit) that does a substantial portion of its business in the commercial marketplace.

§ 603.1235 Consortium.

A group of RD&D-performing organizations that either is formally incorporated or that otherwise agrees to jointly carry out a RD&D project (see definition of "articles of collaboration," in § 603.1210).

§ 603.1240 Cooperative agreement.

A legal instrument which, consistent with 31 U.S.C. 6305, is used to enter into the same kind of relationship as a grant (see definition of "grant," in § 603.1270), except that substantial involvement is expected between the DOE and the recipient when carrying out the activity contemplated by the cooperative agreement. The term does not include "cooperative research and development agreements" as defined in 15 U.S.C. 3710a.

§ 603.1245 Cost sharing.

A portion of project costs from non-Federal sources that are borne by the recipient or non-Federal third parties on behalf of the recipient, rather than by the Federal Government.

§ 603.1250

10 CFR Ch. II (1–1–16 Edition)

§ 603.1250 Data.

Recorded information, regardless of form or the media on which it may be recorded. The term includes technical data and computer software. It does not include information incidental to administration, such as financial, administrative, cost or pricing, or other management information related to the administration of a TIA.

§ 603.1255 Equipment.

Tangible property, other than real property, that has a useful life of more than one year and an acquisition cost of \$5,000 or more per unit.

§ 603.1260 Expenditure-based award.

A Federal Government assistance award for which the amounts of in-

terim payments or the total amount ultimately paid (*i.e.*, the sum of interim payments and final payment) are subject to redetermination or adjustment, based on the amounts expended by the recipient in carrying out the purposes for which the award was made, as long as the redetermination or adjustment does not exceed the total Government funds obligated to the award. Most Federal Government grants and cooperative agreements are expenditure-based awards.

§ 603.1265 Expenditures or outlays.

Charges made to the project or program. They may be reported either on a cash or accrual basis, as shown in the following table:

If reports are prepared on a . . .	Expenditures are the sum of . . .
(a) Cash basis	(1) Cash disbursements for direct charges for goods and services; (2) The amount of indirect expense charge; (3) The value of third party in-kind contributions applied; and (4) The amount of cash advances and payments made to any other organizations for the performance of a part of the RD&D effort.
(b) Accrual basis	(1) Cash disbursements for direct charges for goods and services; (2) The amount of indirect expense incurred; (3) The value of in-kind contributions applied; and (4) The net increase (or decrease) in the amounts owed by the recipient for goods and other property received, for services performed by employees, contractors, and other payees and other amounts becoming owed under programs for which no current services or performance are required.

§ 603.1270 Grant.

A legal instrument which, consistent with 31 U.S.C. 6304, is used to enter into a relationship:

(a) The principal purpose of which is to transfer a thing of value to the recipient to carry out a public purpose of support or stimulation authorized by a law of the United States, rather than to acquire property or services for the Department of Energy’s direct benefit or use.

(b) In which substantial involvement is not expected between the DOE and the recipient when carrying out the activity contemplated by the grant.

§ 603.1275 In-kind contributions.

The value of non-cash contributions made by a recipient or non-Federal third parties toward cost sharing.

§ 603.1280 Institution of higher education.

An educational institution that:

(a) Meets the criteria in section 101 of the Higher Education Act of 1965 (20 U.S.C. 1001); and

(b) Is subject to the provisions of OMB Circular A-110, “Administrative Requirements for Grants and Agreements with Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations,” as implemented by the Department of Energy at 10 CFR 600, Subpart B.

§ 603.1285 Intellectual property.

Patents, trademarks, copyrights, mask works, protected data, and other forms of comparable property protected by Federal law and foreign counterparts.

Department of Energy

§ 603.1340

§ 603.1290 Participant.

A consortium member or, in the case of an agreement with a single for-profit entity, the recipient. Note that a for-profit participant may be a firm or a segment of a firm (*e.g.*, a division or other business unit).

§ 603.1295 Periodic audit.

An audit of a participant, performed at an agreed-upon time (usually a regular time interval), to determine whether the participant as a whole is managing its Federal awards in compliance with the terms of those awards. Appendix A to this part describes what such an audit may cover. A periodic audit of a participant differs from an award-specific audit of an individual award (as defined in § 603.1220).

§ 603.1300 Procurement contract.

A Federal Government procurement contract. It is a legal instrument which, consistent with 31 U.S.C. 6303, reflects a relationship between the Federal Government and a State, a local government, or other non-government entity when the principal purpose of the instrument is to acquire property or services for the direct benefit or use of the Federal Government. See the more detailed definition of the term "contract" at 48 CFR 2.101.

§ 603.1305 Program income.

Gross income earned by the recipient or a participant that is generated by a supported activity or earned as a direct result of a TIA. Program income includes but is not limited to: income from fees for performing services; the use or rental of real property, equipment, or supplies acquired under a TIA; the sale of commodities or items fabricated under a TIA; and license fees and royalties on patents and copyrights. Interest earned on advances of Federal funds is not program income.

§ 603.1310 Program official.

A Federal Government program manager, project officer, scientific officer, or other individual who is responsible for managing the technical program being carried out through the use of a TIA.

§ 603.1315 Property.

Real property, equipment, supplies, and intellectual property, unless stated otherwise.

§ 603.1320 Real property.

Land, including land improvements, structures and appurtenances thereto, but excluding movable machinery and equipment.

§ 603.1325 Recipient.

An organization or other entity that receives a TIA from DOE. Note that a for-profit recipient may be a firm or a segment of a firm (*e.g.*, a division or other business unit).

§ 603.1330 Supplies.

Tangible property other than real property and equipment. Supplies have a useful life of less than one year or an acquisition cost of less than \$5,000 per unit.

§ 603.1335 Termination.

The cancellation of a TIA, in whole or in part, at any time prior to either:

(a) The date on which all work under the TIA is completed; or

(b) The date on which Federal sponsorship ends, as given in the award document or any supplement or amendment thereto.

§ 603.1340 Technology investment agreement.

A TIA is a special type of assistance instrument used to increase involvement of commercial firms in the DOE research, development and demonstration (RD&D) programs. A TIA, like a cooperative agreement, requires substantial Federal involvement in the technical or management aspects of the project. A TIA may be either a type of cooperative agreement or a type of assistance transaction other than a cooperative agreement, depending on the intellectual property provisions. A TIA is either:

(a) A type of cooperative agreement with more flexible provisions tailored for involving commercial firms (as distinct from a cooperative agreement subject to all of the requirements in 10 CFR Part 600), but with intellectual property provisions in full compliance

with the DOE intellectual property statutes (*i.e.*, Bayh-Dole statute and 42 U.S.C. §§2182 and 5908, as implemented in 10 CFR 600.325); or

(b) An assistance transaction other than a cooperative agreement, if its intellectual property provisions vary from the Bayh-Dole statute and 42 U.S.C. §§2182 and 5908, which require the Government to retain certain intellectual property rights, and require differing treatment between large businesses and nonprofit organizations or small businesses.

APPENDIX A TO PART 603—APPLICABLE FEDERAL STATUTES, EXECUTIVE ORDERS, AND GOVERNMENT-WIDE REGULATIONS

Whether the TIA is a cooperative agreement or a type of assistance transaction other than a cooperative agreement, the terms and conditions of the agreement must provide for recipients' compliance with applicable Federal statutes, Executive Orders and Government-wide regulations. This appendix lists some of the more common requirements to aid in identifying ones that apply to a specific TIA. The list is not intended to be all-inclusive, however; the contracting officer may need to consult legal counsel to verify whether there are others that apply (*e.g.*, due to a provision in the appropriations act for the specific funds in use or due to a statute or rule that applies to a particular program or type of activity).

A. CERTIFICATIONS

All financial assistance applicants, including applicants requesting a TIA must comply with the prohibitions concerning lobbying in a Government-wide common rule that the DOE has codified at 10 CFR part 601. The "List of Certifications and Assurances for SF 424(R&R)" on the DOE Applicant and Recipient page at <http://grants.pr.doe.gov> includes the Government-wide certification that must be provided with a proposal for a financial assistance award, including a TIA.

B. ASSURANCES THAT APPLY TO A TIA

Currently the DOE approach to communicating Federal statutes, Executive Orders and Government-wide regulations is to provide potential applicants a list of "National Policies Assurances to be Incorporated as Award Terms" in the program announcement (This list is available on the Applicant and Recipient Page at <http://grants.pr.doe.gov> under Award Terms). The contracting officer should follow this approach for announcements that allow for the award of a TIA. The contracting officer should normally incor-

porate by reference or attach the list of national policy assurances to a TIA award. Of these requirements, the following four assurances apply to all TIA:

1. Prohibitions on discrimination on the basis of race, color, or national origin in Title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d, *et seq.*) as implemented by DOE regulations at 10 CFR part 1040. These apply to all financial assistance. They require recipients to flow down the prohibitions to any subrecipients performing a part of the substantive RD&D program (as opposed to suppliers from whom recipients purchase goods or services).

2. Prohibitions on discrimination on the basis of age, in the Age Discrimination Act of 1975 (42 U.S.C. 6101, *et seq.*) as implemented by DOE regulations at 10 CFR part 1040. They apply to all financial assistance and require flow down to subrecipients.

3. Prohibitions on discrimination on the basis of handicap, in section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) as implemented by DOE regulations at 10 CFR part 1041. They apply to all financial assistance and require flow down to subrecipients.

4. Preferences for use of U.S.-flag air carriers in the International Air Transportation Fair Competitive Practices Act of 1974 (49 U.S.C. 40118), which apply to uses of U.S. Government funds.

C. OTHER ASSURANCES

Additional assurance requirements may apply in certain circumstances, as follows:

1. If construction work is to be done under a TIA or its subawards, it is subject to the prohibitions in Executive Order 11246 on discrimination on the basis of race, color, religion, sex, or national origin.

2. If the RD&D involves human subjects or animals, it is subject to the requirements codified by the Department of Health and Human Services at 45 CFR part 46 and implemented by DOE at 10 CFR part 745 and rules on animal acquisition, transport, care, handling and use in 9 CFR parts 1 through 4, Department of Agriculture rules and rules of the Department of Interior at 50 CFR parts 10 through 24 and Commerce at 50 CFR parts 217 through 277, respectively. See item a. or b., respectively, under the heading "Live organisms" included on the DOE "National Policy Assurances To Be Incorporated As Award Terms" on the Applicant and Recipient Page.

3. If the RD&D involves actions that may affect the environment, it is subject to the National Environmental Policy Act, and may also be subject to national policy requirements for flood-prone areas, coastal zones, coastal barriers, wild and scenic rivers, and underground sources of drinking water.

Department of Energy

§ 605.2

4. If the project may impact a historic property, it is subject to the National Historic Preservation Act of 1966 (16 U.S.C. 470, *et seq.*).

APPENDIX B TO PART 603—FLOW DOWN REQUIREMENTS FOR PURCHASES OF GOODS AND SERVICES

A. As discussed in § 603.705, the contracting officer must inform recipients of any requirements that flow down to their purchases of goods or services (e.g., supplies or equipment) under their TIA. Note that purchases of goods or services differ from subawards, which are for substantive RD&D program performance.

B. Appendix A to 10 CFR part 600, subpart D lists eight requirements that commonly apply to firms' purchases under grants or cooperative agreements. Of those eight, two that apply to all recipients' purchases under a TIA are:

1. *Byrd Anti-Lobbying Amendment (31 U.S.C. 1352)*. A contractor submitting a bid to the recipient for a contract award of \$100,000 or more must file a certification with the recipient that it has not and will not use Federal appropriations for certain lobbying purposes. The contractor also must disclose any lobbying with non-Federal funds that takes place in connection with obtaining any Federal award. For further details, see 10 CFR part 601, the DOE's codification of the Government-wide common rule implementing this amendment.

2. *Debarment and suspension*. Recipients may not make contract awards that exceed the simplified acquisition threshold (currently \$100,000) and certain other contract awards may not be made to parties listed on the General Services Administration (GSA) "List of Parties Excluded from Federal Procurement and Nonprocurement Programs." The GSA list contains the names of parties debarred, suspended, or otherwise excluded by agencies, and parties declared ineligible under statutory or regulatory authority other than Executive Orders 12549 (3 CFR, 1986 Comp., p. 189) and 12689 (3 CFR, 1989 Comp., p. 235). For further details, see subparts A through E of 10 CFR part 606, which is the DOE's codification of the Government-wide common rule implementing Executive Orders 12549 and 12689.

C. One other requirement applies only in cases where construction work is to be performed under the TIA with Federal funds or recipient funds counted toward required cost sharing:

1. *Equal Employment Opportunity*. If the TIA includes construction work, the contracting officer should inform the recipient that Department of Labor regulations at 41 CFR 60-1.4(b) prescribe a clause that must be incorporated into construction awards and sub-

awards. Further details are provided in Appendix B to 10 CFR 600 subpart D, item 1.

APPENDIX A TO PART 605—ENERGY RESEARCH PROGRAM OFFICE DESCRIPTIONS

AUTHORITY: Section 31 of the Atomic Energy Act, as amended, Pub. L. 83-703, 68 Stat. 919 (42 U.S.C. 2051); sec. 107 of the Energy Reorganization Act of 1974, Pub. L. 93-438, 88 Stat. 1240 (42 U.S.C. 5817); Federal Non-nuclear Energy Research and Development Act of 1974, Pub. L. 93-577, 88 Stat. 1878 (42 U.S.C. 5901 *et seq.*); secs. 644 and 646 of the Department of Energy Organization Act, Pub. L. 95-91, 91 Stat. 599 (42 U.S.C. 7254 and 7256); Federal Grant and Cooperative Agreement Act, as amended (31 U.S.C. 6301 *et seq.*).

SOURCE: 57 FR 40583, Sept. 3, 1992, unless otherwise noted.

§ 605.1 Purpose and scope.

This part sets forth the policies and procedures applicable to the award and administration of grants and cooperative agreements by the DOE Office of Science (SC) for basic and applied research, educational and/or training activities, conferences and related activities.

[57 FR 40583, Sept. 3, 1992, as amended at 79 FR 76046, Dec. 19, 2014]

§ 605.2 Applicability.

(a) This part applies to all grants and cooperative agreements awarded after the effective date of this amended rule.

§ 605.3

(b) Except as otherwise provided by this part, the award and administration of grants and cooperative agreements shall be governed by 2 CFR part 200 as amended by 2 CFR part 910 (DOE Financial Assistance Rules).

[57 FR 40583, Sept. 3, 1992, as amended at 79 FR 76046, Dec. 19, 2014]

§ 605.3 Definitions.

In addition to the definitions provided in 2 CFR part 200 as amended by 2 CFR part 910, the following definitions are provided for purposes of this part—

Basic and applied research means basic and applied research and that part of development not related to the development of specific systems or products. The primary aim of research is scientific study and experimentation directed toward advancing the state of the art or increasing knowledge or understanding rather than focusing on a specific system or product.

Educational/Training means support for education or related activities for an individual or organization that will enhance education levels and skills in particular scientific or technical areas of interest to DOE.

Principal investigator means the scientist or other individual designated by the recipient to direct the project.

Recipient obligation means the amounts of orders placed, contracts and subawards issued, services received, and similar transactions during a given period that will require payment by the recipient during the same or a future period.

Related conference means scientific or technical conferences, symposia, workshops or seminars for the purpose of communicating or exchanging information or views pertinent to SC.

Special purpose equipment means equipment which is used only for research, medical, scientific, educational, or other related project activity.

[57 FR 40583, Sept. 3, 1992, as amended at 79 FR 76046, Dec. 19, 2014]

§ 605.4 Exceptions.

Single-case exceptions from this part may be authorized in writing by the Director or Deputy Director of SC or

10 CFR Ch. II (1–1–16 Edition)

the Head of a Contracting Activity upon the written request of DOE staff, an applicant for an award, or a recipient. A request from an applicant or a recipient must be submitted to or through the cognizant contracting officer. Whenever a proposed exception from this part would be an exception from 2 CFR part 200 as amended by 2 CFR part 910, the exception must also be authorized in accordance with the procedures prescribed in that part.

[57 FR 40583, Sept. 3, 1992, as amended at 79 FR 76046, Dec. 19, 2014]

§ 605.5 The Office of Science Financial Assistance Program.

(a) DOE may issue, under the Office of Science Financial Assistance Program, 10 CFR part 605, awards for basic and applied research, educational/training activities, conferences, and other related activities under the SC program areas set forth in paragraph (b) of this section and described in appendix A of this part.

(b) The Program areas are:

- (1) Basic Energy Sciences
- (2) Field Operations Management
- (3) Fusion Energy
- (4) Health and Environmental Research
- (5) High Energy and Nuclear Physics
- (6) Scientific Computing Staff
- (7) Superconducting Super Collider
- (8) University and Science Education Programs
- (9) Program Analysis; and
- (10) Other program areas of interest as may be described in a notice of availability published in the FEDERAL REGISTER.

[57 FR 40583, Sept. 3, 1992, as amended at 79 FR 76046, Dec. 19, 2014]

§ 605.6 Eligibility.

Any university or other institution of higher education or other non-profit or for-profit organization, non-Federal agency, or entity is eligible for a grant or cooperative agreement. An unaffiliated individual also is eligible for a grant or cooperative agreement.

§ 605.7 [Reserved]

§ 605.8 Solicitation.

(a) The Catalog of Federal Domestic Assistance number for this program is

Department of Energy

§ 605.9

81.049, and its solicitation control number is ERFAP 10 CFR part 605.

(b) An application for a new or renewal award under this solicitation may be submitted at any time to DOE at the address specified in paragraph (c) of this section. New or renewal applications shall receive consideration for funding generally within 6 months but, in any event, no later than 12 months from the date of receipt by DOE.

(c) Applicants may obtain application forms, described in §605.9(b), and additional information from the Acquisition and Assistance Management Division, Office of Science, SC, Department of Energy, Washington, DC 20585, (301) 903-5544, and shall submit applications to the same address.

(d) DOE shall publish annually, in the FEDERAL REGISTER, a notice of the availability of the Office of Science Financial Assistance Program. DOE shall also publish notices or abbreviated notices of availability in trade and professional journals, and news media, and use other means of communication, as appropriate.

(1) Each notice of availability shall cite this part and shall include:

(i) The Catalog of Federal Domestic Assistance number and solicitation control number of the program;

(ii) The amount of money available or estimated to be available for award;

(iii) The name of the responsible DOE program official to contact for additional information, and an address where application forms may be obtained;

(iv) The address for submission of applications; and

(v) Any evaluation criteria in addition to those set forth in §605.10.

(2) The notice of availability may also include any other relevant information helpful to applicants such as:

(i) Program objectives,

(ii) A project agenda or potential areas for project initiatives,

(iii) Problem areas requiring additional effort, and

(iv) Any other information which identifies areas in which grants or cooperative agreements may be made.

(e) DOE is under no obligation to pay for any costs associated with the preparation or submission of applications.

(f) DOE reserves the right to fund, in whole or in part, any, all, or none of the applications submitted.

(g) To be considered for a renewal award under this part, an incumbent recipient shall submit a renewal application as provided in §605.9 (c) and (h).

[57 FR 40583, Sept. 3, 1992, as amended at 79 FR 76046, Dec. 19, 2014]

§ 605.9 Application requirements.

(a) An original and seven copies of the application for initial support must be submitted except that State governments, local governments, or Indian tribal governments shall not be required to submit more than the original and two copies of the application.

(b) Each new or renewal application in response to this part must include:

(1) An application face page, DOE Form 4650.2 (approved by OMB under OMB Control No. 1910-1400). However, the facesheet of the application for State and local governments and Indian tribal government applicants shall be the facesheet of Standard Form (SF) 424 (approved by OMB under OMB Control Number 0348-0043).

(2) A detailed description of the proposed project, including the objectives of the project, in relationship to DOE's program and the applicant's plan for carrying it out;

(3) Detailed information about the background and experience of the principal investigator(s) (including references to publications), the facilities and experience of the applicant, and the cost-sharing arrangements, if any.

(4) A detailed budget for the entire proposed period of support with written justification sufficient to evaluate the itemized list of costs provided on the entire project.

(i) Numerical details on items of cost provided by State and local government and Indian tribal government applicants shall be on Standard Form 424A, Budget Information for Non-Construction Programs (approved under OMB Control No. 0348-0044). All other applicants shall use budget form ERF 4620.1 (approved by OMB under Control No. 1910-1400).

(ii) DOE may, subsequent to receipt of an application, request additional budgetary information from an applicant when necessary for clarification

§ 605.10

10 CFR Ch. II (1–1–16 Edition)

or to make informed preaward determinations under 2 CFR part 200 as amended by 2 CFR part 910.

(5) Any preaward assurances required pursuant to 2 CFR part 200 as amended by 2 CFR part 910.

(c) Applications for a renewal award must be submitted in an original and seven copies, except that State governments, local governments, or Indian tribes are required to submit only an original and two copies. (Approved by OMB under OMB Control Numbers 0348–0005–0348–0009)

(d) The application must be signed by an official who is authorized to act for the applicant organization and to commit the applicant to comply with the terms and conditions of the award, if one is issued, or if unaffiliated, by the individual applicant. (See § 605.19(a)(1) for requirements on continuation awards.)

(e) All applications which involve research, development, or demonstration activities when such activities:

(1) Have a unique geographic focus and are directly relevant to the governmental responsibilities of a State or local government within the geographic area;

(2) Necessitate the preparation of an Environmental Impact Statement under the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.* (1976)); or

(3) Are to be initiated at a particular site or location and require unusual measures to limit the possibility of adverse exposure or hazard to the general public, are subject to the provisions of Executive Order 12372 and 10 CFR part 1005.

Anyone planning to submit such applications should contact ER for further information about compliance requirements.

(f) DOE may return an application which does not include all information and documentation required by statute, this part, 2 CFR part 200 as amended by 2 CFR part 910 or the notice of availability, when the nature of the omission precludes review of the application.

(g) During the review of the complete application, DOE may request the submission of additional information only

if the information is essential to evaluate the application.

(h) In addition to including the information described in paragraphs (b), (c), and (d) of this section, an application for a renewal award must be submitted no later than six months prior to the scheduled expiration of the project period and must be on the same forms and include the same type of information as that required for initial applications. The renewal application must outline and justify a program and budget for the proposed project period, showing in detail the estimated cost of the proposed project, together with an indication of the amount of funds needed and the amount of cost sharing, if any. The application also shall describe and explain the reasons for any change in the scope or objectives of the proposed project, and shall compare and explain any difference between the estimates in the proposed budget and actual costs experienced as of the date of the application.

(i) DOE is not required to return to the applicant an application which is not selected or funded.

(j) Renewal applications must include a separate section that describes the results of work accomplished through the date of the renewal application and how such results relate to the activities proposed to be undertaken in the renewal period.

[57 FR 40583, Sept. 3, 1992, as amended at 79 FR 76046, Dec. 19, 2014]

§ 605.10 Application evaluation and selection.

(a) Applications shall be evaluated for funding generally within 6 months but, in any event, no later than 12 months from the date of receipt by DOE. After DOE has held an application for 6 months, the applicant may, in response to DOE's request, be required to revalidate the terms of the original application.

(b) DOE staff shall perform an initial evaluation of all applications to ensure that the information required by this part is provided, that the proposed effort is technically sound and feasible, and that the effort is consistent with program funding priorities. For applications which pass the initial evaluation, DOE shall review and evaluate

each application received based on the criteria set forth below and in accordance with the Merit Review System developed as required under DOE Financial Assistance Regulations, 2 CFR part 200 as amended by 2 CFR part 910.

(c) DOE shall select evaluators on the basis of their professional qualifications and expertise. Evaluators shall be required to comply with all applicable DOE rules or directives concerning the use of outside evaluators.

(d) DOE shall evaluate new and renewal applications based on the following criteria which are listed in descending order of importance:

(1) Scientific and/or technical merit or the educational benefits of the project;

(2) Appropriateness of the proposed method or approach;

(3) Competency of applicant's personnel and adequacy of proposed resources;

(4) Reasonableness and appropriateness of the proposed budget; and

(5) Other appropriate factors established and set forth by ER in a notice of availability or in a specific solicitation.

(e) Also, DOE shall consider, as part of the evaluation, other available advice or information as well as program policy factors such as ensuring an appropriate balance among the program areas listed in § 605.5(b) of this part.

(f) In addition to the evaluation criteria set forth in paragraphs (d) and (e) of this section, DOE shall consider the recipient's performance under the existing award during the evaluation of a renewal application.

(g) Selection of applications for award will be based upon the findings of the technical evaluations, the importance and relevance of the proposed application to SC's mission, and fund availability. Cost reasonableness and realism will also be considered to the extent appropriate.

(h) After the selection of an application, DOE may, if necessary, enter into negotiation with an applicant. Such negotiations are not a commitment that DOE will make an award.

[57 FR 40583, Sept. 3, 1992, as amended at 79 FR 76046, Dec. 19, 2014]

§ 605.11 Additional requirements.

(a) A recipient performing research, development, or related activities involving the use of human subjects must comply with DOE regulations in 10 CFR part 745, "Protection of Human Subjects," and any additional provisions which may be included in the Special Terms and Conditions of an award.

(b) A recipient performing research involving recombinant DNA molecules and/or organisms and viruses containing recombinant DNA molecules shall comply with the National Institutes of Health "Guidelines for Research Involving Recombinant DNA Molecules" (51 FR 16958, May 7, 1986), or such later revision of those guidelines as may be published in the FEDERAL REGISTER. (The guidelines are available from the Office of Recombinant DNA Activities, National Institutes of Health, Building 31, room 4B11, Bethesda, Maryland 20892.)

(c) Any recipient performing research on warm-blooded animals shall comply with the Federal Laboratory Animal Welfare Act of 1966, as amended (7 U.S.C. 2131 *et seq.*) and the regulations promulgated thereunder by the Secretary of Agriculture at 9 CFR chapter I, subchapter A, pertaining to the care, handling, and treatment of warm blooded animals held or used for research, teaching, or other activities supported by Federal awards. The recipient shall comply with the guidelines described in DHHS Publication No. [NIH] 86-23, "Guide for the Care and Use of Laboratory Animals," or succeeding revised editions. (This guide is available from the Office for Protection from Research Risks, Office of the Director, National Institutes of Health, Building 31, room 4B09, Bethesda, Maryland 20205.)

§ 605.12 Funding.

(a) The project period during which DOE expects to provide support for an approved project under this part shall generally not exceed 3 years and may exceed 5 years only if DOE makes a renewal award or otherwise extends the award. The project period shall be specified on the Notice of Financial Assistance Award (DOE Form 4600.1).

§ 605.13

(b) Each budget period, of an award under this part, shall generally be 12 months and may be as much as 24 months as determined appropriate by SC.

[57 FR 40583, Sept. 3, 1992, as amended at 79 FR 76047, Dec. 19, 2014]

§ 605.13 Cost sharing.

Cost sharing is not required nor will it be considered as a criterion in the evaluation and selection process unless otherwise provided under § 605.10(d)(5).

§ 605.14 Limitation of DOE liability.

Awards under this part are subject to the requirement that the maximum DOE obligation to the recipient is the amount shown in the Notice of Financial Assistance Award as the amount of DOE funds obligated. DOE shall not be obligated to make any additional, supplemental, continuation, renewal or other awards for the same or any other purpose.

§ 605.15 Fee.

(a) Notwithstanding 2 CFR part 200 as amended by 2 CFR part 910, a fee may be paid, in appropriate circumstances, to a recipient which is a small business concern as qualified under the criteria and size standards of 13 CFR part 121 in order to permit the concern to participate in the ER Financial Assistance Program. Whether or not it is appropriate to pay a fee shall be determined by the Contracting Officer who shall, at a minimum, apply the following guidelines:

(1) Whether the acceptance of an award will displace other work the small business is currently engaged in or committed to assume in the near future; or

(2) Whether the acceptance of an award will, in the absence of paying a fee, cause substantial financial distress to the business. In evaluating financial distress, the Contracting Officer shall balance current displacement against reasonable future benefit to the company. (If the award will result in the beneficial expansion of the existing business base of the company, then no fee would generally be appropriate.) Fees shall not be paid to other entities except as an exception from 2 CFR part 200 as amended by 2 CFR part 910, nor

10 CFR Ch. II (1–1–16 Edition)

shall fees be paid under awards in support of conferences.

(b) To request a fee, a small business concern shall submit with its application a written self certification that it is a small business concern qualified under the criteria and size standards in 13 CFR part 121. In addition, the application must state the amount of fee requested for the entire project period and the basis for requesting the amount, and must also state why payment of a fee by DOE would be appropriate.

(c) If the Contracting Officer determines that payment of a fee is appropriate under paragraph (a) of this section, the amount of fee shall be that determined to be reasonable by the Contracting Officer. The Contracting Officer shall, at a minimum, apply the following guidelines in determining the fee amount:

(1) The fee base shall include the estimated allowable cost of direct salaries and wages and allocable fringe benefits. This fee base shall exclude all other direct and indirect costs.

(2) The fee amount expressed as a percentage of the appropriate fee base pursuant to paragraph (c)(1) of this section, shall not exceed the percentage rate of fee that would result if a Federal agency contracted for the same amount of salaries, wages, and allocable fringe benefits under a cost reimbursement contract.

(3) Fee amounts, determined pursuant to paragraphs (c)(1) and (c)(2) of this section, shall be appropriately reduced when:

(i) Advance payments are provided; and/or

(ii) Title to property acquired with DOE funds vests in the recipient (10 CFR part 600).

(d) Notwithstanding 2 CFR part 200 as amended by 2 CFR part 910, any fee awarded shall be a fixed fee and shall be payable on an annual basis in proportion to the work completed, as determined by the Contracting Officer, upon satisfactory submission and acceptance by DOE of the progress report. If the project period is shortened

Department of Energy

§ 605.19

due to termination, or the project period is not fully funded, the fee shall be reduced by an appropriate amount.

[57 FR 40583, Sept. 3, 1992, as amended at 79 FR 76047, Dec. 19, 2014]

EDITORIAL NOTE: At 79 FR 76047, Dec. 19, 2014, §605.15 was amended; however, portions of the amendment could not be incorporated due to inaccurate amendatory instruction.

§ 605.16 Indirect cost limitations.

Awards issued under this part for conferences and scientific/technical meetings will not include payment for indirect costs.

§ 605.17 [Reserved]

§ 605.18 National security.

Activities under SC's Financial Assistance Program shall not involve classified information (i.e., Restricted Data, formerly Restricted Data, National Security Information). However, if in the opinion of the recipient or DOE such involvement becomes expected prior to the closeout of the award, the recipient or DOE shall notify the other in writing immediately. If the recipient believes any information developed or acquired may be classifiable, the recipient shall not provide the potentially classifiable information to anyone, including the DOE officials with whom the recipient normally communicates, except the Director of Classification, and shall protect such information as if it were classified until notified by DOE that a determination has been made that it does not require such handling. Correspondence which includes the specific information in question shall be sent by registered mail to U.S. Department of Energy, Attn: Director of Classification, DP-32, Washington, DC 20585. If the information is determined to be classified, the recipient may wish to discontinue the project in which case the recipient and DOE shall terminate the award by mutual agreement. If the award is to be terminated, all material deemed by DOE to be classified shall be forwarded to DOE, in a manner specified by DOE, for proper disposition. If the recipient and DOE wish to continue the award, even though classified information is involved, the recipient shall be required to obtain both personnel

and facility security clearances through the Office of Safeguards and Security for Headquarters awards, or from the cognizant field office Division of Safeguards and Security for awards obtained through DOE field organizations. Costs associated with handling and protecting any such classified information shall be negotiated at the time that the determination to proceed is made.

[57 FR 40583, Sept. 3, 1992, as amended at 79 FR 76047, Dec. 19, 2014]

§ 605.19 Continuation funding and reporting requirements.

(a) A recipient shall periodically report to DOE on the project's progress in meeting the project objectives of the award. The following types of reports shall be used:

(1) *Progress reports.* After issuance of an initial award and if future support is recommended, recipients must submit a satisfactory progress report in order to receive continuation awards for the remainder of the project period. The original and two copies of the required report (generally not to exceed two pages per project or task) must be submitted to the SC program manager 90 days prior to the anticipated continuation funding date and contain the following information: on the first page, provide the project title, principal investigator/project director name, period of time report covers, name and address of recipient organization, DOE award number, the amount of unexpended funds, if any, that are anticipated to be left at the end of the current budget period, and if the amount exceeds 10 percent of the funds available for the budget period, provide information as to why the excess funds are anticipated to be available and how they will be used in the next budget period. Report should state whether aims have changed from original application and if they have, provided revised aims. Include results of work to date. Emphasize findings and their significance to the field, and any real or anticipated problems. A completed budget page must be submitted with the continuation progress report when a change to anticipated future costs will exceed 25 percent of the original recommended future budget.

§ 605.20

10 CFR Ch. II (1–1–16 Edition)

(2) *Notice of Energy R&D Project.* A Notice of Energy R&D Project, DOE Form 1430.22, which summarizes the purpose and scope of the project, must be submitted in accordance with the Distribution and Schedule of Documents set forth at the end of this section. Copies of the form may be obtained from a DOE Contracting Office.

(3) *Special reports.* The recipient shall report the following events to DOE as soon after they occur as possible:

(i) Problems, delays, or adverse conditions which will materially affect the ability to attain project objectives, or prevent the meeting of time schedules and goals. The report must describe the remedial action the recipient has taken or plans to take and any action DOE should take to alleviate the problems.

(ii) Favorable developments or events which enable meeting time schedules and goals sooner or at less cost than anticipated or producing more beneficial results than originally projected.

(4) *Final report.* A final report summarizing the entire investigation must be submitted by the recipient within 90 days after the final project period ends or the award is terminated. Satisfactory completion of an award will be contingent upon the receipt of this report. The final report shall follow the same outline as a progress report. Manuscripts prepared for publication should be appended.

(5) *Financial status report (FSR) (OMB No. 0348–0039).* The FSR is required within 90 days after completion of each budget period; for budget periods exceeding 12 months, an FSR is also required within 90 days after this first 12 months unless waived by the Contracting Officer.

(b) DOE may extend the deadline date for any report if the recipient submits a written request before the deadline which adequately justifies an extension.

(c) A table summarizing the various types of reports, time for submission, number of copies is set forth below. The schedule of reports shall be as prescribed in this table, unless the award document specifies otherwise.

(d) *DOE review of performance.* DOE or its authorized representatives may make site visits, at any reasonable

time, to review the project. DOE may provide such technical assistance as may be requested.

(e) *Subrecipient progress reporting.* Recipients may place progress reporting requirements on a subrecipient consistent with the provisions of this section.

DISTRIBUTION AND SCHEDULE OF DOCUMENTS

Type	When due	Number of copies to be submitted
1. Summary: 200 words on scope and purpose (Notice of Energy R&D Project).	Immediately after award and with each application for renewal.	3
2. Renewal	6 months before the project period ends.	8
3. Progress Report	90 days prior to the next budget period (or as part of a renewal application).	3
4. Other progress reports, brief topical reports, etc. (Designated when significant results develop or when work has direct programmatic impact).	As deemed appropriate by the recipient.	3
5. Reprints, Conference papers.	Same as 4 above	3
6. Final Report	Within 90 days after termination of the project.	3
7. Financial Status Report. (FSR).	Within 90 days after completion of the project period; for budget periods exceeding 12 months an FSR is also required within 90 days after the first 12-month period.	3

NOTE: Report types 5 and 6 require with submission two copies of DOE Form 1332.16, University-Type Contractor and Grantee Recommendations for Disposition of Scientific and Technical Document.

[57 FR 40583, Sept. 3, 1992, as amended at 79 FR 76047, Dec. 19, 2014]

§ 605.20 Dissemination of results.

(a) Recipients are encouraged to disseminate project results promptly. DOE reserves the right to utilize, and have others utilize, to the extent it deems appropriate, the reports resulting from awards.

(b) DOE may waive progress reporting requirements set forth in § 605.19, if the recipient submits to DOE a copy of its own report which is published or accepted for publication in a recognized

Department of Energy

Pt. 605, App. A

scientific or technical journal and which satisfies the information requirements of the program.

(c) Recipients are urged to publish results through normal publication channels in accordance with the applicable provisions of 2 CFR part 200 as amended by 2 CFR part 910.

(d) The article shall include an acknowledgment that the project was supported, in whole or in part, by a DOE award, and specify the award number, but state that such support does not constitute an endorsement by DOE of the views expressed in the article.

[57 FR 40583, Sept. 3, 1992, as amended at 79 FR 76047, Dec. 19, 2014]

APPENDIX A TO PART 605—THE ENERGY RESEARCH PROGRAM OFFICE DESCRIPTIONS

1. BASIC ENERGY SCIENCES

This program supports basic science research efforts in a variety of disciplines to broaden the energy supply and technological base knowledge. The major science division and its objectives are as follows:

(a) Energy Biosciences

The primary objective of this program is to generate a basis of understanding of fundamental biological mechanisms in the areas of botanical and microbiological sciences that will support biotechnology development related to energy. The research serves as the basic information foundation with respect to renewable resource productivity for fuels and chemicals, microbial conversions or renewable materials and biological systems for the conservation of energy. This office has special requirements on the submission of preapplications, when to submit, and the length of the preapplication/application; applicants are encouraged to contact the office regarding these requirements.

(b) Chemical Sciences

This program sponsors experimental and theoretical research on liquids, gases, plasmas, and solids. The focus is on their chemical properties and the interactions of their component molecules, atoms, ions, and electrons. The subprogram objective is to expand, through support of basic research, our knowledge in the various areas of chemistry; the long-term goal is to contribute to new or improved processes for developing and using domestic energy resources in an efficient and environmentally sound manner. Disciplinary areas covered include physical, organic, and inorganic chemistry; chemical physics;

atomic physics; photochemistry; radiation chemistry; thermodynamics; thermophysics; separations science; analytical chemistry; and actinide chemistry.

(c) Geosciences

The goal of this program is to develop a quantitative and predictive understanding of the energy-related aspects of processes within the earth and at the solar-terrestrial interface. The emphasis is on the upper levels of the earth's crust and the focus is on geophysics and geochemistry of rock-fluid systems and interactions. Specific topical areas receiving emphasis include: High resolution geophysical imaging; fundamental properties of rocks, minerals, and fluids; scientific drilling; and sedimentary basin systems. The resulting improved understanding and knowledge base are needed to assist efforts in the utilization of the Nation's energy resources in an environmentally acceptable fashion.

(d) Engineering Research

This program's objectives are: (1) To extend the body of knowledge underlying current engineering practice in order to open new ways for enhancing energy savings and production, prolonging useful equipment life, and reducing costs while maintaining output and performance quality; and (2) to broaden the technical and conceptual base for solving future engineering problems in the energy technologies. Long-term research topics of current interest include: foundations of bioprocessing of fuels and energy related wastes, fracture mechanics, experimental and theoretical studies of multiphase flows, intelligent machines, and diagnostics and control for plasma processing of materials.

(e) Materials Sciences

The objective of this program is to increase the understanding of phenomena and properties important to materials behavior that will contribute to meeting the needs of present and future energy technologies. It is comprised of the subfields metallurgy, ceramics, solid state physics, materials chemistry, and related disciplines where the emphasis is on the science of materials.

(f) Advanced Energy Projects

The objective of this program is to support exploratory research on novel concepts related to energy. The concepts may be in any field related to energy but must not fall into an area of programmatic responsibility of an existing ER technical program. The research is usually aimed at establishing the scientific feasibility of a concept and, where appropriate, at estimating its economic viability.

2. FIELD OPERATIONS MANAGEMENT

This office administers special purpose support programs that cut across DOE program areas. In conjunction with this activity, it supports related conferences, research, and training initiatives that further these areas of interest.

(a) Laboratory Technology Transfer Program

The SC Laboratory Technology Transfer (LTT) Program has dedicated funding which fulfills the legislative mandate to more effectively transfer research and technology from Science laboratories to industry. By design, this program provides only partial funding for technology research projects and personnel exchanges with industry and universities. Mandatory cost-sharing by industry and other partners ensures that cooperative projects will focus on those that generate real interest in the private sector and facilitate the transfer of technology. The program supports laboratory-industry personnel exchanges; comprehensive program evaluation; and cost-shared technology research, especially CRADAs to advance precompetitive research projects to a point where they can be evaluated for commercial applications. Other activities of the SC Laboratory Technology Transfer Program include coordinating technology transfer operations throughout the SC laboratory system; coordinating technology transfer elements of the institutional planning process; contributing to Departmental technology transfer policy development; and implementing appropriate outreach activities.

3. FUSION ENERGY

The magnetic fusion energy program is an applied research and development program whose goal is to develop the scientific and technological information required to design and construct magnetic fusion energy systems. This goal is pursued by three divisions, whose major functions are listed below.

(a) APPLIED PLASMA PHYSICS (APP)

This Division seeks to develop that body of physics knowledge which permits advancement of the fusion program on a sound basis. APP research programs provide: (1) The theoretical understanding of fusion plasmas necessary for interpreting results from present experiments, and the planning and design of future confinement devices; (2) the data on plasma properties, atomic physics and new diagnostic techniques for operational support of confinement experiments; research and development of Heavy Ion Fusion Accelerator (HIFAR) and reactor studies in support of the development of Inertial Fusion Energy (IFE).

(b) CONFINEMENT SYSTEMS

This Division has as its primary objective the conduct of research efforts to investigate and resolve basic physics issues associated with medium- to large-scale confinement devices. These devices are used to experimentally explore the limits of specific confinement concepts as well as to study associated physical phenomena. Specific areas of interest include: the production of increased plasma densities and temperatures; the understanding of the physical laws governing plasma energy transport and confinement scaling; equilibrium and stability of high plasma pressure; the investigation of plasma interaction with radio-frequency waves; and the study and control of particle transport in the plasma.

(c) DEVELOPMENT AND TECHNOLOGY

This Division supports research and development of the technology necessary for fabrication and operation of present and future plasma and fusion devices. The program also pursues R&D and system studies pertaining to critical feasibility issues of fusion technology and development.

4. HEALTH AND ENVIRONMENTAL RESEARCH

The goals of this research program are as follows: (1) To provide, through basic and applied research, the scientific information required to identify, understand and anticipate the long-term health and environmental consequences of energy use and development; and (2) to utilize the Department's unique resources to solve major scientific problems in medicine, biology and the environment. The goals of the program are accomplished through the effort of its divisions, which are:

(a) Health Effects and Life Sciences Research

This is a broad program of basic and applied biological research. The objectives are: (1) To develop experimental information from biological systems for estimating or predicting risks of carcinogenesis, mutagenesis, and delayed toxicological effects associated with low level human exposures to energy-related radiations and chemicals; (2) to define mechanisms involved in the induction of biological damage following exposure to low levels of energy-related agents; (3) to develop new technologies for detecting and quantifying latent health effects associated with such agents; (4) to support fundamental research in structural biology user facilities at DOE laboratories; and (5) to create and apply new technologies and resources for characterizing the molecular nature of the human genome.

Increasing emphasis will be placed on: Understanding of mechanisms by which low level exposures to radiation and/or energy-related chemicals produce long-term health impacts; development of new technologies

Department of Energy

Pt. 605, App. A

for estimating human health risks from low level exposures; development and application of technologies and approaches for cost-effective characterization of the human genome.

(b) Medical Applications and Biophysical Research

The objectives of this program comprise several areas: (1) To develop new concepts and techniques for detecting and measuring hazardous physical and chemical agents related to energy production; (2) to evaluate chemical and radiation exposures and dosimetry for health protection application; (3) to determine the physical and chemical mechanisms of radiation action in biological systems; and (4) to develop new instrumentation and technology for biological and biomedical research. In addition, Medical Application research is aimed at enhancing the beneficial applications of radiation, and radionuclides, in the diagnosis, study, and treatment of human diseases. This includes the development of new techniques for radioactive isotope production, labeled pharmaceuticals, imaging devices, and radiation beam applications for the improved diagnosis and therapy of human diseases or the study of human physiological processes. A new area of interest involves the integration of Nuclear Medicine and Molecular Biology. This includes development of radioisotopes and new molecular radiopharmaceutical probes specific to disease-associated targets for improved diagnosis and therapy.

(c) Environmental Sciences

The objectives of the program relate to environmental processes affected by energy production and use. For example, the program develops information on the physical, chemical and biological processes that cycle and transport energy related material and nutrients through the atmosphere, and the ocean margin. Specific emphasis is placed on hydrological transport, mobility and degradation of energy-related contaminants by microorganisms in subsurface systems.

This program also addresses global environmental change from increases in atmospheric carbon dioxide and other greenhouse gases. The scope of the global change program encompasses the carbon cycle, climate modeling and diagnostics, ecosystem responses, the role of the ocean in global change and experiments to quantify the links between greenhouse gas increases and climate change. A new dimension of this program addresses the role of molecular biology in understanding the ecosystem response to global change.

5. HIGH ENERGY AND NUCLEAR PHYSICS

This program supports 90 percent of the U.S. efforts in high energy and nuclear phys-

ics. The objectives of these programs are indicated below:

(a) Nuclear Physics (Including Nuclear Data Program)

The primary objectives of this program are an understanding of the interactions and structures of atomic nuclei and nuclear matter at the most elementary level possible, and an understanding of the fundamental forces of nature as manifested in nuclear matter.

(b) High Energy Physics

The primary objectives of this program are to understand the nature and relationships among fundamental forces of nature and to understand the ultimate structure of matter in terms of the properties and interrelations of its basic constituents.

6. SCIENTIFIC COMPUTING STAFF

The goal of this program is to advance the understanding of the fundamental concepts of mathematics, statistics, and computer science underlying the complex mathematical models of the key physical processes involved in the research and development programs of DOE. Broad emphasis is given in three major categories: analytical and numerical methods, information analysis techniques, and advanced concepts.

7. SUPERCONDUCTING SUPER COLLIDER (SSC)

The goals of the Superconducting Super Collider are to build a proton-proton collider with an energy of 20 TeV per proton, to construct and operate experimental systems to study the interactions of these protons, to establish the premier international laboratory for high energy physics research, and to create a major resource for science education. The Office of the Superconducting Super Collider administers research grants associated with the SSC Laboratory's physics, accelerator, and associated technology research and development programs.

8. UNIVERSITY AND SCIENCE EDUCATION

The Office of University and Science Education supports a variety of science, mathematics and engineering education precollege through postgraduate programs aimed at strengthening the Nation's science education and research infrastructure. DOE's education mission has been expanded to include increasing emphasis on the precollege and general public literacy areas. Much of the support involves the use of the unique resources (scientists, facilities and equipment) at DOE's national laboratories and research facilities, and includes research and/or other "hands-on" opportunities for precollege and postsecondary students, teachers, and faculty members. In addition to programs centered in DOE facilities, a number of other

educational activities are supported, including:

(a) *Pre-Freshman Enrichment Program (PREP)*

PREP supports projects at colleges and universities aimed at seeking out individuals, typically under-represented in science-based careers, during junior high school and early high school years (sixth through tenth grades) and providing these individuals with pre-freshman enrichment activities to identify, motivate and prepare them for science-based careers. Projects must include concentrated, integrated activities that enhance the student's understanding of science and mathematics, must have a summer component at least four weeks in length, and may also include a pre-summer or post-summer component.

(b) *Museum Science Education Program*

This program funds museum projects that support the development of the media of informal energy-related science education. The media of informal science education include, but are not limited to: Interactive exhibits, demonstrations, hands-on activities, teacher-student curriculum and film/video/software productions. Examples of energy-related subjects include, but are not limited to: high energy and nuclear physics, nuclear science and technologies, global warming, waste management, energy efficiency, new materials development, fossil energy resources, renewable technologies, risk assessment, energy/environment and other timely topics. The purpose of the program is the development and use of creative informal science education media which focus on energy-related science and technology.

(c) *University Research Instrumentation Program*

The University Research Instrumentation Program has been developed as part of an interagency effort under the coordination of the Office of Science and Technology Policy to help alleviate the overall shortage of sophisticated state-of-the-art instruments required for advanced scientific and technical research at universities. The overall program objective is to assist university and college scientists in strengthening their capabilities to conduct long-range experimental/scientific research in specific energy areas of direct interest to DOE through the acquisition of large scientific/technical pieces of equipment. Only those colleges and universities that currently have DOE funded research projects, which require the requested equipment, totalling at least \$150,000 in the specific area will be selected (more complete eligibility guidelines and principal research areas of particular DOE interest in any given year are available from the program office). Smaller research instruments (less than

\$100,000 each) are not eligible for consideration in this program. No specific fraction of cost sharing is required but the level of non-Federal funds to be provided will be considered in final selection of awards under the program.

(d) *Experimental Program To Stimulate Competitive Research*

The purpose of the DOE Experimental Program to Stimulate Competitive Research is to enhance the capabilities of the eligible designated States to develop science and engineering manpower in energy-related areas and to conduct nationally competitive energy-related research. Planning committees within eligible States may apply for planning, implementation and/or training efforts (list of eligible States and activities to be supported in any given year as well as cost-sharing requirements are available from the program office). Separate applications for planning/implementation and graduate traineeships are required. Planning/implementation applications must contain information that details development of a State-wide improvement plan for energy-related research and human resources, while training grant applications must detail the need for energy-related specific and technical educational disciplines.

(e) *Nuclear Engineering Research*

The objective of this program is to support research efforts aimed at strengthening University-based nuclear engineering programs. Specific areas of basic and applied research of interest include, but are not limited to: (1) Material behavior in a radiation environment typical of advanced nuclear power plants; (2) real-time instrumentation that identifies and applies innovative measurements technologies in nuclear-related fields; (3) advanced nuclear reactor concepts; (4) applied nuclear sciences that address improvements in the applications of radiation and the understanding of the interaction of radiation with matter; (5) engineering science research applicable to advanced nuclear reactor concepts, industry safety and reliability concerns; (6) neutronics that address improvements in reactor computational methodologies and knowledge of the basic fission processes; and (7) nuclear thermal hydraulics that address improvements of models and analysis of thermal hydraulic behavior in an advanced nuclear reactor system.

(f) *Used Energy-Related Laboratory Equipment (ERIE) Program*

In accordance with DOE's responsibility to encourage research and development in the energy area, grants of used energy-related

Department of Energy

§ 609.2

laboratory equipment for use in energy-oriented educational programs in the life, physical and environmental sciences, and engineering are available to universities, colleges and other non-profit educational institutions of higher learning in the United States. An institution is not required to have a current DOE grant or contract in order to participate in this program. The program office should be contacted for specific information on how to access the list of eligible equipment under this program. The cost of care and handling incident to the grant must be borne by the institution.

9. PROGRAM ANALYSIS

The Office of Program Analysis conducts assessments to identify research opportunities in specific areas of interest to DOE programs.

AUTHORITY: 42 U.S.C. 7254, 16511–16514.

SOURCE: 74 FR 63549, Dec. 4, 2009, unless otherwise noted.

§ 609.1 Purpose and scope.

(a) This part sets forth the policies and procedures that DOE uses for receiving, evaluating, and, after consultation with the Department of the

Treasury, approving applications for loan guarantees to support Eligible Projects under Section 1703 of Title XVII of the Energy Policy Act of 2005, as amended.

(b) Except as set forth in paragraph (c) of this section, this part applies to all Pre-Applications, Applications, Conditional Commitments and Loan Guarantee Agreements to support Eligible Projects under Section 1703 of Title XVII of the Energy Policy Act of 2005, as amended.

(c) Sections 609.3, 609.4 and 609.5 of this part shall not apply to any Pre-Applications, Applications, Conditional Commitments or Loan Guarantee Agreements submitted, or entered into, as applicable, on or before December 31, 2007; provided, that DOE accepted the Pre-Application and invited an Application pursuant to such Pre-Application.

(d) Part 1024 of chapter X of title 10 of the Code of Federal Regulations shall not apply to actions taken under this part.

§ 609.2 Definitions.

Act means Title XVII of the Energy Policy Act of 2005 (42 U.S.C. 16511–16514), as amended.

Administrative Cost of Issuing a Loan Guarantee means the total of all administrative expenses that DOE incurs during:

(1) The evaluation of a Pre-Application, if a Pre-Application is requested in a solicitation, and an Application for a loan guarantee;

(2) The offering of a Term Sheet, executing the Conditional Commitment, negotiation, and closing of a Loan Guarantee Agreement; and

(3) The servicing and monitoring of a Loan Guarantee Agreement, including during the construction, startup, commissioning, shakedown, and operational phases of an Eligible Project.

Applicant means any person, firm, corporation, company, partnership, association, society, trust, joint venture, joint stock company, or other business entity or governmental non-Federal entity that has submitted an Application to DOE and has the authority to enter into a Loan Guarantee Agreement with DOE under the Act.

Application means a comprehensive written submission in response to a solicitation or a written invitation from DOE to apply for a loan guarantee pursuant to § 609.6 of this part.

Borrower means any Applicant who enters into a Loan Guarantee Agreement with DOE and issues Guaranteed Obligations.

Commercial Technology means a technology in general use in the commercial marketplace in the United States at the time the Term Sheet is issued by DOE. A technology is in general use if it has been installed in and is being used in three or more commercial projects in the United States in the same general application as in the proposed project, and has been in operation in each such commercial project for a period of at least five years. The five-year period shall be measured, for each project, starting on the in service date of the project or facility employing that particular technology. For purposes of this section, commercial projects include projects that have been the recipients of a loan guarantee from DOE under this part.

Conditional Commitment means a Term Sheet offered by DOE and accepted by the Applicant, with the understanding of the parties that if the Applicant thereafter satisfies all specified and precedent funding obligations and all other contractual, statutory and regulatory requirements, or other requirements, DOE and the Applicant will execute a Loan Guarantee Agreement; Provided that the Secretary may terminate a Conditional Commitment for any reason at any time prior to the execution of the Loan Guarantee Agreement; and Provided further that the Secretary may not delegate this authority to terminate a Conditional Commitment.

Contracting Officer means the Secretary of Energy or a DOE official authorized by the Secretary to enter into, administer and/or terminate DOE Loan Guarantee Agreements and related contracts on behalf of DOE.

Credit Subsidy Cost has the same meaning as “cost of a loan guarantee” in section 502(5)(C) of the Federal Credit Reform Act of 1990 (2 U.S.C. 661a(5)(C)), which is the net present value, at the time the Loan Guarantee

Agreement is executed, of the following estimated cash flows, discounted to the point of disbursement:

(1) Payments by the Government to cover defaults and delinquencies, interest subsidies, or other payments; less

(2) Payments to the Government including origination and other fees, penalties, and recoveries; including the effects of changes in loan or debt terms resulting from the exercise by the Borrower, Eligible Lender or other Holder of an option included in the Loan Guarantee Agreement.

DOE means the United States Department of Energy.

Eligible lender means:

(1) Any person or legal entity formed for the purpose of, or engaged in the business of, lending money, including, but not limited to, commercial banks, savings and loan institutions, insurance companies, factoring companies, investment banks, institutional investors, venture capital investment companies, trusts, or other entities designated as trustees or agents acting on behalf of bondholders or other lenders; and

(2) Any person or legal entity that meets the requirements of § 609.11 of this part, as determined by DOE; or

(3) The Federal Financing Bank.

Eligible project means a project located in the United States that employs a New or Significantly Improved Technology that is not a Commercial Technology, and that meets all applicable requirements of section 1703 of the Act (42 U.S.C. 16513), the applicable solicitation and this part.

Equity means cash contributed by the Borrowers and other principals. Equity does not include proceeds from the non-guaranteed portion of Title XVII loans, proceeds from any other non-guaranteed loans, or the value of any form of government assistance or support.

Federal Financing Bank means an instrumentality of the United States government created by the Federal Financing Bank Act of 1973 (12 U.S.C. 2281 *et seq.*). The Bank is under the general supervision of the Secretary of the Treasury.

Guaranteed Obligation means any loan or other debt obligation of the Borrower for an Eligible Project for which

Department of Energy

§ 609.2

DOE guarantees all or any part of the payment of principal and interest under a Loan Guarantee Agreement entered into pursuant to the Act.

Holder means any person or legal entity that owns a Guaranteed Obligation or has lawfully succeeded in due course to all or part of the rights, title, and interest in a Guaranteed Obligation, including any nominee or trustee empowered to act for the Holder or Holders.

Intercreditor Agreement means any agreement or instrument among DOE and one or more other persons providing financing or other credit arrangements or that otherwise provides for rights of DOE, in each case, in form and substance satisfactory to DOE and entered into or accepted by DOE in connection with a DOE loan guarantee upon a determination by DOE that such agreement or instrument is reasonable and necessary to protect the interests of the United States, and addressing such matters as collateral sharing, priorities (subject always to Section 1702(d)(3) of Title XVII) and voting rights among creditors and other intercreditor arrangements, as such agreement or instrument may be amended or modified from time to time with the consent of DOE.

Loan Agreement means a written agreement between a Borrower and an Eligible Lender or other Holder containing the terms and conditions under which the Eligible Lender or other Holder will make loans to the Borrower to start and complete an Eligible Project.

Loan Guarantee Agreement means a written agreement that, when entered into by DOE and a Borrower, an Eligible Lender or other Holder, pursuant to the Act, establishes the obligation of DOE to guarantee the payment of all or a portion of the principal and interest on specified Guaranteed Obligations of a Borrower to Eligible Lenders or other Holders subject to the terms and conditions specified in the Loan Guarantee Agreement.

New or Significantly Improved Technology means a technology concerned with the production, consumption or transportation of energy and that is not a Commercial Technology, and that has either:

(1) Only recently been developed, discovered or learned; or

(2) Involves or constitutes one or more meaningful and important improvements in productivity or value, in comparison to Commercial Technologies in use in the United States at the time the Term Sheet is issued.

OMB means the Office of Management and Budget in the Executive Office of the President.

Pre-Application means a written submission in response to a DOE solicitation that broadly describes the project proposal, including the proposed role of a DOE loan guarantee in the project, and the eligibility of the project to receive a loan guarantee under the applicable solicitation, the Act and this part.

Project costs means those costs, including escalation and contingencies, that are to be expended or accrued by Borrower and are necessary, reasonable, customary and directly related to the design, engineering, financing, construction, startup, commissioning and shakedown of an Eligible Project, as specified in § 609.12 of this part. Project costs do not include costs for the items set forth in § 609.12(c) of this part.

Project Sponsor means any person, firm, corporation, company, partnership, association, society, trust, joint venture, joint stock company or other business entity that assumes substantial responsibility for the development, financing, and structuring of a project eligible for a loan guarantee and, if not the Applicant, owns or controls, by itself and/or through individuals in common or affiliated business entities, a five percent or greater interest in the proposed Eligible Project, or the Applicant.

Secretary means the Secretary of Energy or a duly authorized designee or successor in interest.

Term Sheet means an offering document issued by DOE that specifies the detailed terms and conditions under which DOE may enter into a Conditional Commitment with the Applicant. A Term Sheet imposes no obligation on the Secretary to enter into a Conditional Commitment.

United States means the several States, the District of Columbia, the Commonwealth of Puerto Rico, the

§ 609.3

Virgin Islands, Guam, American Samoa or any territory or possession of the United States of America.

§ 609.3 Solicitations.

(a) DOE may issue solicitations to invite the submission of Pre-Applications or Applications for loan guarantees for Eligible Projects. DOE must issue a solicitation before proceeding with other steps in the loan guarantee process including issuance of a loan guarantee. A Project Sponsor or Applicant may only submit one Pre-Application or Application for one project using a particular technology. A Project Sponsor or Applicant, in other words, may not submit a Pre-Application or Application for multiple projects using the same technology.

(b) Each solicitation must include, at a minimum, the following information:

(1) The dollar amount of loan guarantee authority potentially being made available by DOE in that solicitation;

(2) The place and time for response submission;

(3) The name and address of the DOE representative whom a potential Project Sponsor may contact to receive further information and a copy of the solicitation;

(4) The form, format, and page limits applicable to the response submission;

(5) The amount of the application fee (First Fee), if any, that will be required;

(6) The programmatic, technical, financial and other factors the Secretary will use to evaluate response submissions, including the loan guarantee percentage requested by the Applicant and the relative weightings that DOE will use when evaluating those factors; and

(7) Such other information as DOE may deem appropriate.

§ 609.4 Submission of Pre-Applications.

In response to a solicitation requesting the submission of Pre-Applications, either Project Sponsors or Applicants may submit Pre-Applications to DOE. The information submitted in or in connection with Pre-Applications will be treated as provided in 10 CFR 600.15 and must be marked as provided in 10 CFR 600.15(b). Pre-Applications must meet all requirements specified in the

10 CFR Ch. II (1–1–16 Edition)

solicitation and this part. At a minimum, each Pre-Application must contain all of the following:

(a) A cover page signed by an individual with full authority to bind the Project Sponsor or Applicant that attests to the accuracy of the information in the Pre-Application, and that binds the Project Sponsor(s) or Applicant to the commitments made in the Pre-Application. In addition, the information requested in paragraphs (b) and (c) of this section should be submitted in a volume one and the information requested in paragraphs (d) through (h) of this section should be submitted in a volume two, to expedite the DOE review process.

(b) An executive summary briefly encapsulating the key project features and attributes of the proposed project (for clarity, with respect to any project in which project assets or facilities are jointly owned by the Applicant and one or more other persons, each of whom owns an undivided ownership interest in such project assets or facilities, the Applicant may submit a project proposal with respect to its undivided ownership interest in such project assets or facilities);

(c) A business plan which includes an overview of the proposed project, including:

(1) A description of the Project Sponsor, including all entities involved, and its experience in project investment, development, construction, operation and maintenance;

(2) A description of the new or significantly improved technology to be employed in the project, including:

(i) A report detailing its successes and failures during the pilot and demonstration phases;

(ii) The technology's commercial applications;

(iii) The significance of the technology to energy use or emission control;

(iv) How and why the technology is "new" or "significantly improved" compared to technology already in general use in the commercial marketplace in the United States;

(v) Why the technology to be employed in the project is not in "general use;"

Department of Energy

§ 609.5

(vi) The owners or controllers of the intellectual property incorporated in and utilized by such technologies; and

(vii) The manufacturer(s) and licensee(s), if any, authorized to make the technology available in the United States, the potential for replication of commercial use of the technology in the United States, and whether and how the technology is or will be made available in the United States for further commercial use;

(3) The estimated amount, in reasonable detail, of the total Project Costs;

(4) The timeframe required for construction and commissioning of the project;

(5) A description of any primary off-take or other revenue-generating agreements that will provide the primary sources of revenues for the project, including repayment of the debt obligations for which a guarantee is sought.

(6) An overview of how the project complies with the eligibility requirements in section 1703 of the Act (42 U.S.C. 16513);

(7) An outline of the potential environmental impacts of the project and how these impacts will be mitigated;

(8) A description of the anticipated air pollution and/or anthropogenic greenhouse gas reduction benefits and how these benefits will be measured and validated; and

(9) A list of all of the requirements contained in this part and the solicitation and where in the Pre-Application these requirements are addressed;

(d) A financing plan overview describing:

(1) The amount of equity to be invested and the sources of such equity;

(2) The amount of the total debt obligations to be incurred and the funding sources of all such debt if available;

(3) The amount of the Guaranteed Obligation as a percentage of total project debt; and as a percentage of total project cost; and

(4) A financial model detailing the investments in and the cash flows generated and anticipated from the project over the project's expected life-cycle, including a complete explanation of the facts, assumptions, and methodologies in the financial model;

(e) An explanation of what estimated impact the loan guarantee will have on the interest rate, debt term, and overall financial structure of the project;

(f) Where the Federal Financing Bank is not the lender, a copy of a letter from an Eligible Lender or other Holder(s) expressing its commitment to provide, or interest in providing, the required debt financing necessary to construct and fully commission the project;

(g) A copy of the equity commitment letter(s) from each of the Project Sponsors and a description of the sources for such equity; and

(h) A commitment to pay the Application fee (First Fee), if invited to submit an Application.

[74 FR 63549, Dec. 4, 2009, as amended at 76 FR 26582, May 9, 2011]

§ 609.5 Evaluation of Pre-Applications.

(a) Where Pre-Applications are requested in a solicitation, DOE will conduct an initial review of the Pre-Application to determine whether:

(1) The proposal is for an Eligible Project;

(2) The submission contains the information required by § 609.4 of this part; and

(3) The submission meets all other requirements of the applicable solicitation.

(b) If a Pre-Application fails to meet the requirements of paragraph (a) of this section, DOE may deem it non-responsive and eliminate it from further review.

(c) If DOE deems a Pre-Application responsive, DOE will evaluate:

(1) The commercial viability of the proposed project;

(2) The technology to be employed in the project;

(3) The relevant experience of the principal(s); and

(4) The financial capability of the Project Sponsor (including personal and/or business credit information of the principal(s)).

(d) After the evaluation described in paragraph (c) of this section, DOE will determine if there is sufficient information in the Pre-Application to assess the technical and commercial viability

§ 609.6

10 CFR Ch. II (1–1–16 Edition)

of the proposed project and/or the financial capability of the Project Sponsor and to assess other aspects of the Pre-Application. DOE may ask for additional information from the Project Sponsor during the review process and may request one or more meetings with the Project Sponsor. Any additional information submitted will be treated as provided in 10 CFR 600.15 and must be marked as provided in 10 CFR 600.15(b).

(e) After reviewing a Pre-Application and other information acquired under paragraph (c) of this section, DOE may provide a written response to the Project Sponsor or Applicant either inviting the Applicant to submit an Application for a loan guarantee and specifying the amount of the Application filing fee (First Fee) or advising the Project Sponsor that the project proposal will not receive further consideration. Neither the Pre-Application nor any written or other feedback that DOE may provide in response to the Pre-Application eliminates the requirement for an Application.

(f) No response by DOE to, or communication by DOE with, a Project Sponsor, or an Applicant submitting a Pre-Application or subsequent Application shall impose any obligation on DOE to enter into a Loan Guarantee Agreement.

[74 FR 63549, Dec. 4, 2009, as amended at 76 FR 26582, May 9, 2011]

§ 609.6 Submission of Applications.

(a) In response to a solicitation or written invitation to submit an Application, an Applicant submitting an Application must meet all requirements and provide all information specified in the solicitation and/or invitation and this part. The information submitted in or in connection with Applications will be treated as provided in 10 CFR 600.15 and must be marked as provided in 10 CFR 600.15(b).

(b) An Application must include, at a minimum, the following information and materials:

(1) A completed Application form signed by an individual with full authority to bind the Applicant and the Project Sponsors;

(2) Payment of the Application filing fee (First Fee) for the Pre-Application, if any, and Application phase;

(3) A detailed description of all material amendments, modifications, and additions made to the information and documentation provided in the Pre-Application, if a Pre-Application was requested in the solicitation, including any changes in the proposed project's financing structure or other terms;

(4) A description of how and to what measurable extent the project avoids, reduces, or sequesters air pollutants and/or anthropogenic emissions of greenhouse gases, including how to measure and verify those benefits;

(5) A description of the nature and scope of the proposed project, including:

(i) Key milestones;

(ii) Location of the project;

(iii) Identification and commercial feasibility of the new or significantly improved technology(ies) to be employed in the project;

(iv) How the Applicant intends to employ such technology(ies) in the project; and

(v) How the Applicant intends to assure, to the extent possible, the further commercial availability of the technology(ies) in the United States;

(vi) For clarity, with respect to any project in which project assets or facilities are jointly owned by the Applicant and one or more other persons, each of whom owns an undivided ownership interest in such project assets or facilities, the Applicant may submit a project proposal with respect to its undivided ownership interest in such project assets or facilities.

(6) A detailed explanation of how the proposed project qualifies as an Eligible Project;

(7) A detailed estimate of the total Project Costs together with a description of the methodology and assumptions used;

(8) A detailed description of the engineering and design contractor(s), construction contractor(s), equipment supplier(s), and construction schedules for the project, including major activity and cost milestones as well as the performance guarantees, performance bonds, liquidated damages provisions,

Department of Energy

§ 609.6

and equipment warranties to be provided;

(9) A detailed description of the operations and maintenance provider(s), the plant operating plan, estimated staffing requirements, parts inventory, major maintenance schedule, estimated annual downtime, and performance guarantees and related liquidated damage provisions, if any;

(10) A description of the management plan of operations to be employed in carrying out the project, and information concerning the management experience of each officer or key person associated with the project;

(11) A detailed description of the project decommissioning, deconstruction, and disposal plan, and the anticipated costs associated therewith;

(12) An analysis of the market for any product to be produced by the project, including relevant economics justifying the analysis, and copies of any contractual agreements for the sale of these products or assurance of the revenues to be generated from sale of these products;

(13) A detailed description of the overall financial plan for the proposed project, including all sources and uses of funding, equity and debt, and the liability of parties associated with the project over the term of the Loan Guarantee Agreement;

(14) A copy of all material agreements, whether entered into or proposed, relevant to the investment, design, engineering, financing, construction, startup commissioning, shutdown, operations and maintenance of the project;

(15) A copy of the financial closing checklist for the equity and debt to the extent available;

(16) Applicant's business plan on which the project is based and Applicant's financial model presenting project *pro forma* statements for the proposed term of the Guaranteed Obligations including income statements, balance sheets, and cash flows. All such information and data must include assumptions made in their preparation and the range of revenue, operating cost, and credit assumptions considered;

(17) Financial statements for the past three years, or less if the Applicant has been in operation less than three years, that have been audited by an independent certified public accountant, including all associated notes, as well as interim financial statements and notes for the current fiscal year, of Applicant and parties providing Applicant's financial backing, together with business and financial interests of controlling or commonly controlled organizations or persons, including parent, subsidiary and other affiliated corporations or partners of the Applicant;

(18) A copy of all legal opinions, and other material reports, analyses, and reviews related to the project;

(19) An independent engineering report prepared by an engineer with experience in the industry and familiarity with similar projects. The report should address: the project's siting and permitting, engineering and design, contractual requirements, environmental compliance, testing and commissioning and operations and maintenance;

(20) Credit history of the Applicant and, if appropriate, any party who owns or controls, by itself and/or through individuals in common or affiliated business entities, a five percent or greater interest in the project or the Applicant;

(21) A preliminary credit assessment for the project without a loan guarantee from a nationally recognized rating agency for projects where the estimated total Project Costs exceed \$25 million. For projects where the total estimated Project Costs are \$25 million or less and where conditions justify, in the sole discretion of the Secretary, DOE may require such an assessment;

(22) A list showing the status of and estimated completion date of Applicant's required project-related applications or approvals for Federal, State, and local permits and authorizations to site, construct, and operate the project;

(23) A report containing an analysis of the potential environmental impacts of the project that will enable DOE to assess whether the project will comply with all applicable environmental requirements, and that will enable DOE

§ 609.7

to undertake and complete any necessary reviews under the National Environmental Policy Act of 1969;

(24) A listing and description of assets associated, or to be associated, with the project and any other asset that will serve as collateral for the Guaranteed Obligations, including appropriate data as to the value of the assets and the useful life of any physical assets. With respect to real property assets listed, an appraisal that is consistent with the “Uniform Standards of Professional Appraisal Practice,” promulgated by the Appraisal Standards Board of the Appraisal Foundation, and performed by licensed or certified appraisers, is required;

(25) An analysis demonstrating that, at the time of the Application, there is a reasonable prospect that Borrower will be able to repay the Guaranteed Obligations (including interest) according to their terms, and a complete description of the operational and financial assumptions and methodologies on which this demonstration is based;

(26) Written affirmation from an officer of the Eligible Lender or other Holder confirming that it is in good standing with DOE’s and other Federal agencies’ loan guarantee programs;

(27) A list of all of the requirements contained in this part and the solicitation and where in the Application these requirements are addressed;

(28) A statement from the Applicant that it believes that there is “reasonable prospect” that the Guaranteed Obligations will be fully paid from project revenue; and

(29) Any other information requested in the invitation to submit an Application or requests from DOE in order to clarify an Application;

(c) DOE will not consider any Application complete unless the Applicant has paid the First Fee and the Application is signed by the appropriate entity or entities with the authority to bind the Applicant to the commitments and representations made in the Application.

[74 FR 63549, Dec. 4, 2009, as amended at 76 FR 26582, May 9, 2011]

10 CFR Ch. II (1–1–16 Edition)

§ 609.7 Programmatic, technical and financial evaluation of Applications.

(a) In reviewing completed Applications, and in prioritizing and selecting those to whom a Term Sheet should be offered, DOE will apply the criteria set forth in the Act, the applicable solicitation, and this part. Applications will be considered in a competitive process, *i.e.* each Application will be evaluated against other Applications responsive to the Solicitation. Greater weight will be given to applications that rely upon a smaller guarantee percentage, all else being equal. Concurrent with its review process, DOE will consult with the Secretary of the Treasury regarding the terms and conditions of the potential loan guarantee. Applications will be denied if:

(1) The project will be built or operated outside the United States;

(2) The project is not ready to be employed commercially in the United States, cannot yield a commercially viable product or service in the use proposed in the project, does not have the potential to be employed in other commercial projects in the United States, and is not or will not be available for further commercial use in the United States;

(3) The entity or person issuing the loan or other debt obligations subject to the loan guarantee is not an Eligible Lender or other Holder, as defined in § 609.11 of this part;

(4) The project is for demonstration, research, or development.

(5) The project does not avoid, reduce or sequester air pollutants or anthropogenic emissions of greenhouse gases; or

(6) The Applicant will not provide an equity contribution.

(b) In evaluating Applications, DOE will consider the following factors:

(1) To what measurable extent the project avoids, reduces, or sequesters air pollutants or anthropogenic emissions of greenhouses gases;

(2) To what extent the new or significantly improved technology to be employed in the project, as compared to Commercial Technology in general use in the United States, is ready to be employed commercially in the United States, can be replicated, yields a commercially viable project or service in

the use proposed in the project, has potential to be employed in other commercial projects in the United States, and is or will be available for further commercial use in the United States;

(3) To what extent the new or significantly improved technology used in the project constitutes an important improvement in technology, as compared to Commercial Technology, used to avoid, reduce or sequester air pollutants or anthropogenic emissions of greenhouse gases, and the Applicant has a plan to advance or assist in the advancement of that technology into the commercial marketplace;

(4) The extent to which the requested amount of the loan guarantee, the requested amount of Guaranteed Obligations and, if applicable, the expected amount of any other financing or credit arrangements are reasonable relative to the nature and scope of the project;

(5) The total amount and nature of the Eligible Project Costs and the extent to which Project Costs are funded by Guaranteed Obligations;

(6) The likelihood that the project will be ready for full commercial operations in the time frame stated in the Application;

(7) The amount of equity commitment to the project by the Applicant and other principals involved in the project;

(8) Whether there is sufficient evidence that the Applicant will diligently pursue the project, including initiating and completing the project in a timely manner;

(9) Whether and to what extent the Applicant will rely upon other Federal and non-Federal governmental assistance such as grants, tax credits, or other loan guarantees to support the financing, construction, and operation of the project and how such assistance will impact the project;

(10) The feasibility of the project and likelihood that the project will produce sufficient revenues to service the project's debt obligations over the life of the loan guarantee and assure timely repayment of Guaranteed Obligations;

(11) The levels of safeguards provided to the Federal government in the event of default through collateral, warran-

ties, and other assurance of repayment described in the Application, including the nature of any anticipated inter-creditor arrangements;

(12) The Applicant's capacity and expertise to successfully operate the project, based on factors such as financial soundness, management organization, and the nature and extent of corporate and personal experience;

(13) The ability of the applicant to ensure that the project will comply with all applicable laws and regulations, including all applicable environmental statutes and regulations;

(14) The levels of market, regulatory, legal, financial, technological, and other risks associated with the project and their appropriateness for a loan guarantee provided by DOE;

(15) Whether the Application contains sufficient information, including a detailed description of the nature and scope of the project and the nature, scope, and risk coverage of the loan guarantee sought to enable DOE to perform a thorough assessment of the project; and

(16) Such other criteria that DOE deems relevant in evaluating the merits of an Application.

(c) During the Application review process DOE may raise issues or concerns that were not raised during the Pre-Application review process where a Pre-Application was requested in the applicable solicitation. Any additional information submitted to DOE will be treated as provided in 10 CFR 600.15 and must be marked as provided in 10 CFR 600.15(b).

(d) If DOE determines that a project may be suitable for a loan guarantee, DOE will notify the Applicant and Eligible Lender or other Holder in writing and provide them with a Term Sheet. If DOE reviews an Application and decides not to proceed further with the issuance of a Term Sheet, DOE will inform the Applicant in writing of the reason(s) for denial.

[74 FR 63549, Dec. 4, 2009, as amended at 76 FR 26582, May 9, 2011]

§ 609.8 Term sheets and conditional commitments.

(a) DOE, after review and evaluation of the Application, additional information requested and received by DOE,

§ 609.9

10 CFR Ch. II (1–1–16 Edition)

potentially including a preliminary credit rating or credit assessment, and information obtained as the result of meeting with the Applicant and the Eligible Lender or other Holder, may offer to an Applicant and the Eligible Lender or other Holder detailed terms and conditions that must be met, including terms and conditions that must be met by the Applicant and the Eligible Lender or other Holder.

(b) The terms and conditions required by DOE will be expressed in a written Term Sheet signed by a Contracting Officer and addressed to the Applicant and the Eligible Lender or other Holder, where appropriate. The Term Sheet will request that the Project Sponsor and the Eligible Lender or other Holder express agreement with the terms and conditions contained in the Term Sheet by signing the Term Sheet in the designated place. Each person signing the Term Sheet must be a duly authorized official or officer of the Applicant and Eligible Lender or other Holder. The Term Sheet will include an expiration date on which the terms offered will expire unless the Contracting Officer agrees in writing to extend the expiration date.

(c) The Applicant and/or the Eligible Lender or other Holder may respond to the Term Sheet offer in writing or may request discussions or meetings on the terms and conditions contained in the Term Sheet, including requests for clarifications or revisions. When DOE, the Applicant, and the Eligible Lender or other Holder agree on all of the final terms and conditions and all parties sign the Term Sheet, the Term Sheet becomes a Conditional Commitment. When and if all of the terms and conditions specified in the Conditional Commitment have been met, DOE and the Applicant may enter into a Loan Guarantee Agreement.

(d) DOE's obligations under each Conditional Commitment are conditional upon statutory authority having been provided in advance of the execution of the Loan Guarantee Agreement sufficient under FCRA and Title XVII for DOE to execute the Loan Guarantee Agreement, and payment in full of the Credit Subsidy Cost for the loan guarantee that is the subject of the Condi-

tional Commitment from one of the following:

(1) A Congressional appropriation of funds;

(2) A payment from the Borrower deposited into the Treasury; or

(3) A combination of one or more appropriations under paragraph (d)(1) and one or more payments from the Borrower under paragraph (d)(2) of this section.

(e) The Applicant is required to pay fees to DOE to cover the Administrative Cost of Issuing a Loan Guarantee for the period of the Term Sheet through the closing of the Loan Guarantee Agreement (Second Fee).

[74 FR 63549, Dec. 4, 2009, as amended at 77 FR 29855, May 21, 2012]

§ 609.9 Closing on the Loan Guarantee Agreement.

(a) Subsequent to entering into a Conditional Commitment with an Applicant, DOE, after consultation with the Applicant, will set a closing date for execution of a Loan Guarantee Agreement.

(b) By the closing date, the Applicant and the Eligible Lender or other Holder must have satisfied all of the detailed terms and conditions contained in the Conditional Commitment and other related documents and all other contractual, statutory, and regulatory requirements. If the Applicant and the Eligible Lender or other Holder has not satisfied all such terms and conditions by the closing date, the Secretary may, in his/her sole discretion, set a new closing date or terminate the Conditional Commitment.

(c) In order to enter into a Loan Guarantee Agreement at closing:

(1) DOE must have received authority in an appropriations act for the loan guarantee; and

(2) All other applicable statutory, regulatory, or other requirements must be fulfilled.

(d) Prior to, or on, the closing date, DOE will ensure that:

(1) Pursuant to section 1702(b) of the Act, DOE has received payment in full of the Credit Subsidy Cost of the loan guarantee from one of the following:

(i) A Congressional appropriation of funds;

Department of Energy

§ 609.10

(ii) A payment from the Borrower deposited into the Treasury; or

(iii) A combination of one or more appropriations under paragraph (d)(1)(i) and one or more payments from the Borrower under paragraph (d)(1)(ii) of this section.

(2) Pursuant to section 1702(h) of the Act, DOE has received from the Borrower the First and Second Fees and, if applicable, the Third fee, or portions thereof, for the Administrative Cost of Issuing the Loan Guarantee, as specified in the Loan Guarantee Agreement;

(3) OMB has reviewed and approved DOE's calculation of the Credit Subsidy Cost of the loan guarantee;

(4) The Department of the Treasury has been consulted as to the terms and conditions of the Loan Guarantee Agreement;

(5) The Loan Guarantee Agreement and related documents contain all terms and conditions DOE deems reasonable and necessary to protect the interest of the United States; and

(6) All conditions precedent specified in the Conditional Commitment are either satisfied or waived by a Contracting Officer and all other applicable contractual, statutory, and regulatory requirements are satisfied.

(e) Not later than the period approved in writing by the Contracting Officer, which may not be less than 30 days prior to the closing date, the Applicant must provide in writing updated project financing information if the terms and conditions of the financing arrangements changed between execution of the Conditional Commitment and that date. The Conditional Commitment must be updated to reflect the revised terms and conditions.

(f) Where the total Project Costs for an Eligible Project are projected to exceed \$25 million, the Applicant must provide a credit rating from a nationally recognized rating agency reflecting the revised Conditional Commitment for the project without a Federal guarantee. Where total Project Costs are projected to be \$25 million or less than \$25 million, the Secretary may, on a case-by-case basis, require a credit rating. If a rating is required, an updated rating must be provided to the Secretary not later than 30 days prior to closing.

(g) Changes in the terms and conditions of the financing arrangements will affect the Credit Subsidy Cost for the Loan Guarantee Agreement. DOE may postpone the expected closing date pursuant to any changes submitted under paragraph (e) and (f) of this section. In addition, DOE may choose to terminate the Conditional Commitment.

[74 FR 63549, Dec. 4, 2009, as amended at 77 FR 29855, May 21, 2012]

§ 609.10 Loan Guarantee Agreement.

(a) Only a Loan Guarantee Agreement executed by a duly authorized DOE Contracting Officer can contractually obligate DOE to guarantee loans or other debt obligations.

(b) DOE is not bound by oral representations made during the Pre-Application stage, if Pre-Applications were solicited, or Application stage, or during any negotiation process.

(c) Except if explicitly authorized by an Act of Congress, no funds obtained from the Federal Government, or from a loan or other instrument guaranteed by the Federal Government, may be used to pay for Credit Subsidy Costs, administrative fees, or other fees charged by or paid to DOE relating to the Title XVII program or any loan guarantee there under.

(d) Prior to the execution by DOE of a Loan Guarantee Agreement, DOE must ensure that the following requirements and conditions are satisfied:

(1) The project qualifies as an Eligible Project under the Act and is not a research, development, or demonstration project or a project that employs Commercial Technologies in service in the United States;

(2) The project will be constructed and operated in the United States, the employment of the new or significantly improved technology in the project has the potential to be replicated in other commercial projects in the United States, and this technology is or is likely to be available in the United States for further commercial application;

(3) The face value of the debt guaranteed by DOE is limited to no more than 80 percent of total Project Costs;

(4)(i) Where DOE guarantees 100 percent of the Guaranteed Obligation, the

§ 609.10

10 CFR Ch. II (1–1–16 Edition)

loan shall be funded by the Federal Financing Bank;

(ii) Where DOE guarantees more than 90 percent of the Guaranteed Obligation, the guaranteed portion cannot be separated from or “stripped” from the non-guaranteed portion of the Guaranteed Obligation if the loan is participated, syndicated or otherwise resold in the secondary debt market;

(iii) Where DOE guarantees 90 percent or less of the Guaranteed Obligation, the guaranteed portion may be separated from or “stripped” from the non-guaranteed portion of the Guaranteed Obligation, if the loan is participated, syndicated or otherwise resold in the secondary debt market;

(5) The Borrower and other principals involved in the project have made or will make a significant equity investment in the project;

(6) The Borrower is obligated to make full repayment of the principal and interest on the Guaranteed Obligation and other project debt over a period of up to the lesser of 30 years or 90 percent of the projected useful life of the project’s major physical assets, as calculated in accordance with generally accepted accounting principles and practices. The non-guaranteed portion (if any) of any Guaranteed Obligation must be repaid on a pro-rata basis, and may not be repaid on a shorter or faster amortization schedule than the guaranteed portion. Any project-related financing or credit arrangement (other than the Guaranteed Obligation) may have a shorter or faster amortization schedule than the Guaranteed Obligation if DOE determines that the resulting financing structure of the project—

(i) Allocates to DOE a reasonably proportionate share of the default risk, in light of—

(A) DOE’s share of the total project financing,

(B) Risk allocation among the credit providers, and

(C) Internal and external credit enhancements; and

(ii) Is appropriate to assure reasonable prospect of repayment of the principal of and interest on the DOE Guaranteed Obligation and to protect the interests of the United States in the case of default;

(7) The loan guarantee does not finance, either directly or indirectly, tax-exempt debt obligations, consistent with the requirements of section 149(b) of the Internal Revenue Code;

(8) The amount of the loan guaranteed, when combined with other funds committed to the project, will be sufficient to carry out the project, including adequate contingency funds;

(9) There is a reasonable prospect of repayment by Borrower of the principal of and interest on the Guaranteed Obligations and other project debt;

(10) The Borrower has pledged project assets and other collateral or surety, including non project-related assets, determined by DOE to be necessary to secure the repayment of the Guaranteed Obligations;

(11) The Loan Guarantee Agreement and related documents include detailed terms and conditions necessary and appropriate to protect the interest of the United States in the case of default, including ensuring availability of all the intellectual property rights, technical data including software, and technology necessary for any person or entity selected, including DOE, to complete, operate, convey, and dispose of the defaulted project;

(12) The interest rate on any Guaranteed Obligation is determined by DOE, after consultation with the Treasury Department, to be reasonable, taking into account the range of interest rates prevailing in the private sector for similar obligations of comparable risk guaranteed by the Federal government;

(13) Any Guaranteed Obligation is not subordinate to any loan or other debt obligation;

(14) There is satisfactory evidence that Borrower and Eligible Lenders or other Holders are willing, competent, and capable of performing the terms and conditions of the Guaranteed Obligations and other debt obligation and the Loan Guarantee Agreement, and will diligently pursue the project;

(15) The Borrower has made the initial (or total) payment of fees for the Administrative Cost of Issuing a Loan Guarantee for the construction and operational phases of the project (Third Fee), as specified in the Conditional Commitment;

Department of Energy

§ 609.10

(16) The Eligible Lender, other Holder or servicer has taken and is obligated to continue to take those actions necessary to perfect and maintain liens on assets which are pledged as collateral for the Guaranteed Obligation;

(17) If Borrower is to make payment in full or in part for the Credit Subsidy Cost of the loan guarantee pursuant to section 1702(b)(2) of the Act, such payment must be received by DOE prior to, or at the time of, closing;

(18) DOE or its representatives have access to the project site at all reasonable times in order to monitor the performance of the project;

(19) DOE, the Eligible Lender, or other Holder and Borrower have reached an agreement as to the information that will be made available to DOE and the information that will be made publicly available;

(20) The prospective Borrower has filed applications for or obtained any required regulatory approvals for the project and is in compliance, or promptly will be in compliance, where appropriate, with all Federal, State, and local regulatory requirements;

(21) The Borrower has no delinquent Federal debt, including tax liabilities, unless the delinquency has been resolved with the appropriate Federal agency in accordance with the standards of the Debt Collection Improvement Act of 1996;

(22) The Loan Guarantee Agreement and related agreements contain such other terms and conditions as DOE deems reasonable and necessary to protect the interests of the United States, including without limitation provisions for (i) such collateral and other credit support for the Guaranteed Obligation, and (ii) such collateral sharing, priorities (subject always to Section 1702(d)(3) of Title XVII) and voting rights among creditors and other inter-creditor arrangements as, in each case, DOE deems reasonable and necessary to protect the interests of the United States; and

(23)(i) The Lender is an Eligible Lender, as defined in § 609.2 of this part, and meets DOE's lender eligibility and performance requirement contained in §§ 609.11 (a) and (b) of this part; and

(ii) The servicer meets the servicing performance requirements of § 609.11(c) of this part.

(e) The Loan Guarantee Agreement must provide that, in the event of a default by the Borrower:

(1) Interest accrues on the Guaranteed Obligations at the rate stated in the Loan Guarantee Agreement or Loan Agreement, until DOE makes full payment of the defaulted Guaranteed Obligations and, except when debt is funded through the Federal Financing Bank, DOE is not required to pay any premium, default penalties, or prepayment penalties;

(2) Upon payment of the Guaranteed Obligations by DOE, DOE is subrogated to the rights of the Holders of the debt, including all related liens, security, and collateral rights;

(3) The Eligible Lender or other servicer acting on DOE's behalf is obligated to take those actions necessary to perfect and maintain liens on assets which are pledged as collateral for the Guaranteed Obligations;

(4) The holder of pledged collateral is obligated to take such actions as DOE may reasonably require to provide for the care, preservation, protection, and maintenance of such collateral so as to enable the United States to achieve maximum recovery upon default by the Borrower on the Guaranteed Obligations;

(f) The Loan Guarantee Agreement must contain audit provisions which provide, in substance, as follows:

(1) The Eligible Lender or other Holder or other party servicing the Guaranteed Obligations, as applicable, and the Borrower, must keep such records concerning the project as are necessary to facilitate an effective and accurate audit and performance evaluation of the project as required in § 609.17 of this part; and

(2) DOE and the Comptroller General, or their duly authorized representatives, must have access, for the purpose of audit and examination, to any pertinent books, documents, papers, and records of the Borrower, Eligible Lender or other Holder, or other party servicing the Guaranteed Obligations, as applicable. Examination of records may be made during the regular business hours of the Borrower, Eligible

§ 609.11

10 CFR Ch. II (1–1–16 Edition)

Lender or other Holder, or other party servicing the Guaranteed Obligations, or at any other time mutually convenient as required in § 609.17 of this part.

(g)(1) An Eligible Lender or other Holder may sell, assign or transfer a Guaranteed Obligation to another Eligible Lender that meets the requirements of § 609.11 of this part. Such Eligible Lender to which a Guaranteed Obligation is assigned or transferred, is required to fulfill all servicing, monitoring, and reporting requirements contained in the Loan Guarantee Agreement and these regulations if the transferring Eligible Lender was performing these functions and transfer such functions to the new Eligible Lender. Any assignment or transfer, however, of the servicing, monitoring, and reporting functions must be approved by DOE in writing in advance of such assignment.

(2) The Secretary, or the Secretary's designee or contractual agent, for the purpose of identifying Holders with the right to receive payment under the guarantees shall include in the Loan Guarantee Agreement or related documents a procedure for tracking and identifying Holders of Guarantee Obligations. These duties usually will be performed by the servicer. Any contractual agent approved by the Secretary to perform this function cannot transfer or assign this responsibility without the prior written consent of the Secretary.

[74 FR 63549, Dec. 4, 2009, as amended at 77 FR 29855, May 21, 2012]

§ 609.11 Lender eligibility and servicing requirements.

(a) An Eligible Lender shall meet the following requirements:

(1) Not be debarred or suspended from participation in a Federal government contract (under 48 CFR part 9.4) or participation in a non-procurement activity (under a set of uniform regulations implemented for numerous agencies, such as DOE, at 2 CFR part 180);

(2) Not be delinquent on any Federal debt or loan;

(3) Be legally authorized to enter into loan guarantee transactions authorized by the Act and these regulations and is in good standing with DOE and other

Federal agency loan guarantee programs;

(4) Be able to demonstrate, or has access to, experience in originating and servicing loans for commercial projects similar in size and scope to the project under consideration; and

(5) Be able to demonstrate experience or capability as the lead lender or underwriter by presenting evidence of its participation in large commercial projects or energy-related projects or other relevant experience; or

(6) Be the Federal Financing Bank.

(b) When performing its duties to review and evaluate a proposed Eligible Project prior to the submission of a Pre-Application or Application, as appropriate, by the Project Sponsor through the execution of a Loan Guarantee Agreement, the Eligible Lender or DOE if loans are funded by the Federal Financing Bank, shall exercise the level of care and diligence that a reasonable and prudent lender would exercise when reviewing, evaluating and disbursing a loan made by it without a Federal guarantee.

(c) The servicing duties shall be performed by the Eligible Lender, DOE or other servicer if approved by the Secretary. When performing the servicing duties the Eligible Lender, DOE or other servicer shall exercise the level of care and diligence that a reasonable and prudent lender would exercise when servicing a loan made without a Federal guarantee, including:

(1) During the construction period, enforcing all of the conditions precedent to all loan disbursements, as provided in the Loan Guarantee Agreement, Loan Agreement and related documents;

(2) During the operational phase, monitoring and servicing the Debt Obligations and collection of the outstanding principal and accrued interest as well as ensuring that the collateral package securing the Guaranteed Obligations remains uncompromised; and

(3) As specified by DOE, providing annual or more frequent financial and other reports on the status and condition of the Guaranteed Obligations and the Eligible Project, and promptly notifying DOE if it becomes aware of any problems or irregularities concerning the Eligible Project or the ability of

Department of Energy

§ 609.13

the Borrower to make payment on the Guaranteed Obligations or other debt obligations.

(d) With regard to partial guarantees, even though DOE may in part rely on the Eligible Lender or other servicer to service and monitor the Guaranteed Obligation, DOE will also conduct its own independent monitoring and review of the Eligible Project.

§ 609.12 Project Costs.

(a) Before entering into a Loan Guarantee Agreement, DOE shall determine the estimated Project Costs for the project that is the subject of the agreement. To assist the Department in making that determination, the Applicant must estimate, calculate and record all such costs incurred in the design, engineering, financing, construction, startup, commissioning and shakedown of the project in accordance with generally accepted accounting principles and practices. Among other things, the Applicant must calculate the sum of necessary, reasonable and customary costs that it has paid and expects to pay, which are directly related to the project, including costs for escalation and contingencies, to estimate the total Project Costs.

(b) Project Costs include:

(1) Costs of acquisition, lease, or rental of real property, including engineering fees, surveys, title insurance, recording fees, and legal fees incurred in connection with land acquisition, lease or rental, site improvements, site restoration, access roads, and fencing;

(2) Costs of engineering, architectural, legal and bond fees, and insurance paid in connection with construction of the facility; and materials, labor, services, travel and transportation for facility design, construction, startup, commissioning and shakedown;

(3) Costs of equipment purchases;

(4) Costs to provide equipment, facilities, and services related to safety and environmental protection;

(5) Financial and legal services costs, including other professional services and fees necessary to obtain required licenses and permits and to prepare environmental reports and data;

(6) The cost of issuing project debt, such as fees, transaction and legal

costs and other normal charges imposed by Eligible Lenders and other Holders;

(7) Costs of necessary and appropriate insurance and bonds of all types;

(8) Costs of design, engineering, startup, commissioning and shakedown;

(9) Costs of obtaining licenses to intellectual property necessary to design, construct, and operate the project;

(10) A reasonable contingency reserve for cost overruns during construction; and

(11) Capitalized interest necessary to meet market requirements, reasonably required reserve funds and other carrying costs during construction; and

(12) Other necessary and reasonable costs.

(c) Project Costs do not include:

(1) Fees and commissions charged to Borrower, including finder's fees, for obtaining Federal or other funds;

(2) Parent corporation or other affiliated entity's general and administrative expenses, and non-project related parent corporation or affiliated entity assessments, including organizational expenses;

(3) Goodwill, franchise, trade, or brand name costs;

(4) Dividends and profit sharing to stockholders, employees, and officers;

(5) Research, development, and demonstration costs of readying the innovative energy or environmental technology for employment in a commercial project;

(6) Costs that are excessive or are not directly required to carry out the project, as determined by DOE, including but not limited to the cost of hedging instruments;

(7) Expenses incurred after startup, commissioning, and shakedown before the facility has been placed in service;

(8) Borrower-paid Credit Subsidy Costs and Administrative Costs of Issuing a Loan Guarantee; and

(9) Operating costs.

§ 609.13 Principal and interest assistance contract.

With respect to the guaranteed portion of any Guaranteed Obligation, and subject to the availability of appropriations, DOE may enter into a contract to pay Holders, for and on behalf

§ 609.14

of Borrower, from funds appropriated for that purpose, the principal and interest charges that become due and payable on the unpaid balance of the guaranteed portion of the Guaranteed Obligation, if DOE finds that:

(a) The Borrower:

(1) Is unable to make the payments and is not in default; and

(2) Will, and is financially able to, continue to make the scheduled payments on the remaining portion of the principal and interest due under the non-guaranteed portion of the debt obligation, if any, and other debt obligations of the project, or an agreement, approved by DOE, has otherwise been reached in order to avoid a payment default on non-guaranteed debt.

(b) It is in the public interest to permit Borrower to continue to pursue the purposes of the project;

(c) In paying the principal and interest, the Federal government expects a probable net benefit to the Government will be greater than that which would result in the event of a default;

(d) The payment authorized is no greater than the amount of principal and interest that Borrower is obligated to pay under the terms of the Loan Guarantee Agreement; and

(e) Borrower agrees to reimburse DOE for the payment (including interest) on terms and conditions that are satisfactory to DOE and executes all written contracts required by DOE for such purpose.

§ 609.14 Full faith and credit and incontestability.

The full faith and credit of the United States is pledged to the payment of all Guaranteed Obligations issued in accordance with this part with respect to principal and interest. Such guarantee shall be conclusive evidence that it has been properly obtained; that the underlying loan qualified for such guarantee; and that, but for fraud or material misrepresentation by the Holder, such guarantee will be presumed to be valid, legal, and enforceable.

§ 609.15 Default, demand, payment, and collateral liquidation.

(a) In the event that the Borrower has defaulted in the making of required

payments of principal or interest on any portion of a Guaranteed Obligation, and such default has not been cured within the period of grace provided in the Loan Guarantee Agreement and/or the Loan Agreement, the Eligible Lender or other Holder, or nominee or trustee empowered to act for the Eligible Lender or other Holder (referred to in this section collectively as “Holder”), may make written demand upon the Secretary for payment pursuant to the provisions of the Loan Guarantee Agreement.

(b) In the event that the Borrower is in default as a result of a breach of one or more of the terms and conditions of the Loan Guarantee Agreement, note, mortgage, Loan Agreement, or other contractual obligations related to the transaction, other than the Borrower’s obligation to pay principal or interest on the Guaranteed Obligation, as provided in paragraph (a) of this section, the Holder will not be entitled to make demand for payment pursuant to the Loan Guarantee Agreement, unless the Secretary agrees in writing that such default has materially affected the rights of the parties, and finds that the Holder should be entitled to receive payment pursuant to the Loan Guarantee Agreement.

(c) In the event that the Borrower has defaulted as described in paragraph (a) of this section and such default is not cured during the grace period provided in the Loan Guarantee Agreement, the Secretary shall notify the U.S. Attorney General and, subject to the terms of any applicable Intercreditor Agreement, may cause the principal amount of all Guaranteed Obligations, together with accrued interest thereon, and all amounts owed to the United States by Borrower pursuant to the Loan Guarantee Agreement, to become immediately due and payable by giving the Borrower written notice to such effect (without the need for consent or other action on the part of the Holders of the Guaranteed Obligations) and may exercise any other remedies available under the applicable agreements. In the event the Borrower is in default as described in paragraph (b) of this section, where the Secretary determines in writing that such a default has materially affected the rights of

Department of Energy

§ 609.15

the parties, the Borrower shall be given the period of grace provided in the Loan Guarantee Agreement to cure such default. If the default is not cured during the period of grace, the Secretary may, subject to the terms of any applicable Intercreditor Agreement, cause the principal amount of all Guaranteed Obligations, together with accrued interest thereon, and all amounts owed to the United States by Borrower pursuant to the Loan Guarantee Agreement, to become immediately due and payable by giving the Borrower written notice to such effect (without any need for consent or other action on the part of the Holders of the Guaranteed Obligations) and may exercise any other remedies available under the applicable agreements.

(d) No provision of this regulation shall be construed to preclude forbearance by any Holder with the consent of the Secretary for the benefit of the Borrower.

(e) Upon the making of demand for payment as provided in paragraph (a) or (b) of this section, the Holder shall provide, in conjunction with such demand or immediately thereafter, at the request of the Secretary, the supporting documentation specified in the Loan Guarantee Agreement and any other supporting documentation as may reasonably be required to justify such demand.

(f) Payment as required by the Loan Guarantee Agreement of the Guaranteed Obligation shall be made 60 days after receipt by the Secretary of written demand for payment, provided that the demand complies with the terms of the Loan Guarantee Agreement. The Loan Guarantee Agreement shall provide that interest shall accrue to the Holder at the rate stated in the Loan Guarantee Agreement until the Guaranteed Obligation has been fully paid by the Federal government.

(g) The Loan Guarantee Agreement shall provide that, upon payment of the Guaranteed Obligations, the Secretary shall be subrogated to the rights of the Holders. The Holder shall transfer and assign to the Secretary all rights held by the Holder of the Guaranteed Obligation. Such assignment shall include all related liens, security,

and collateral rights to the extent held by the Holder.

(h) Where the Loan Guarantee Agreement or any applicable Intercreditor Agreement so provides, the Eligible Lender or other Holder, or other agent or servicer, as appropriate, and the Secretary may jointly agree to a workout strategy and/or a plan of liquidation of the assets pledged to secure the Guaranteed Obligation and other applicable debt.

(i) Where payment of the Guaranteed Obligation has been made (or at any such earlier time as may be permitted by applicable agreements), the Secretary, acting through the U.S. Attorney General, in accordance with the rights received through subrogation or other applicable agreements, subject to any applicable Intercreditor Agreement, may seek to foreclose on the collateral assets and/or take such other legal action as necessary for the protection of the Government.

(j) If the Secretary (or an agent acting for the benefit of the Secretary) is awarded title to collateral assets pursuant to a foreclosure proceeding, the Secretary may take action to complete, maintain, operate, or lease such assets, or otherwise dispose of any such assets or take any other necessary action which the Secretary deems appropriate (and consistent with any applicable Intercreditor Agreement), in order that the original goals and objectives of the project will, to the extent possible, be realized.

(k) In addition to foreclosure and sale of collateral pursuant thereto, the U.S. Attorney General shall take appropriate action in accordance with rights contained in the Loan Guarantee Agreement and any applicable Intercreditor Agreement to recover costs incurred by, and other amounts owed to, the Government as a result of the defaulted loan or other defaulted obligation. Any recovery so received by the U.S. Attorney General on behalf of the Government shall be applied in the following manner: First to the expenses incurred by the U.S. Attorney General, DOE and any agent acting for the benefit of DOE in effecting such recovery; second, to reimbursement of any amounts paid by DOE, and to pay any

§ 609.16

10 CFR Ch. II (1–1–16 Edition)

other amounts owed to DOE, as a result of the defaulted obligation; third, to any amounts owed to DOE under related principal and interest assistance contracts; and fourth, to any other lawful claims held by the Government on such process. Any sums remaining after full payment of the foregoing shall be available for the benefit of other parties lawfully entitled to claim them.

(l) If there was a partial guarantee by DOE of the Guaranteed Obligation or if any other creditors are secured by a lien on collateral pledged to secure the Guaranteed Obligation, the proceeds received by the collateral agent or other responsible party as a result of any liquidation or sale of, collection from or other realization on any such collateral may, if so agreed in advance or unless otherwise agreed in the applicable agreements, be applied as follows (with any money distributed to the Federal Government to be further distributed according to § 609.15(k)):

(1) First, to the payment of reasonable and customary fees and expenses incurred in the liquidation or sale, collection or other realization (including without limitation any fees and expenses that the Attorney General of the United States is lawfully entitled to claim in connection with such action);

(2) Second, distributed among the Holders of the Guaranteed Obligation (including DOE, as subrogee) and the other creditors entitled to share in such proceeds on no greater than a pro rata share basis; and

(3) Third, as otherwise provided in the applicable agreement or agreements.

(m) No action taken by the Eligible Lender or other Holder or other agent or servicer in respect of any pledged assets will affect the rights of any party, including the Secretary, having an interest in the loan or other debt obligations, to pursue, jointly or severally, to the extent provided in the Loan Guarantee Agreement or other applicable agreement, legal action against the Borrower or other liable parties, for any deficiencies owing on the balance of the Guaranteed Obligations or other debt obligations after application of the proceeds received upon liquidation.

(n) In the event that the Secretary considers it necessary or desirable to protect or further the interest of the United States in connection with the liquidation or sale of, collection from or other realization on the collateral or recovery of deficiencies due under the loan, the Secretary will take such action as may be appropriate under the circumstances.

(o) Nothing in this part precludes the Secretary from purchasing any Holder's or other person's interest in the project upon liquidation or sale of, collection from or other realization on the collateral.

§ 609.16 Perfection of liens and preservation of collateral.

(a) The Loan Guarantee Agreement and other documents related thereto shall provide that:

(1) The Eligible Lender, or DOE in conjunction with the Federal Financing Bank where the loan is funded by the Federal Financing Bank, or other Holder or other agent or servicer will take those actions necessary or appropriate to perfect and maintain liens, as applicable, on assets which are pledged as collateral for the Guaranteed Obligation; and

(2) Upon default by the Borrower, the holder of pledged collateral shall take such actions as the Secretary (subject to any applicable Intercreditor Agreement) may reasonably require to provide for the care, preservation, protection, and maintenance of such collateral so as to enable the United States to achieve maximum recovery from the pledged assets. The Secretary shall reimburse the holder of collateral for reasonable and appropriate expenses incurred in taking actions required by the Secretary (unless otherwise provided in applicable agreements). Except as provided in § 609.15, no party may waive or relinquish, without the consent of the Secretary, any collateral securing the Guaranteed Obligation to which the United States would be subrogated upon payment under the Loan Guarantee Agreement.

(b) In the event of a default, the Secretary may enter into such contracts as the Secretary (subject to any applicable Intercreditor Agreement) determines are required or appropriate to

care for, preserve, protect or maintain the collateral. The cost of such contracts may be charged to the Borrower.

§ 609.17 Audit and access to records.

(a) The Loan Guarantee Agreement and related documents shall provide that:

(1) The Eligible Lender, or DOE in conjunction with the Federal Financing Bank where loans are funded by the Federal Financing Bank or other Holder or other party servicing the Guaranteed Obligations, as applicable, and the Borrower, shall keep such records concerning the project as is necessary, including the Pre-Application, Application, Term Sheet, Conditional Commitment, Loan Guarantee Agreement, Credit Agreement, mortgage, note, disbursement requests and supporting documentation, financial statements, audit reports of independent accounting firms, lists of all project assets and non-project assets pledged as security for the Guaranteed Obligations, all off-take and other revenue producing agreements, documentation for all project indebtedness, income tax returns, technology agreements, documentation for all permits and regulatory approvals and all other documents and records relating to the Eligible Project, as determined by the Secretary, to facilitate an effective audit and performance evaluation of the project; and

(2) The Secretary and the Comptroller General, or their duly authorized representatives, shall have access, for the purpose of audit and examination, to any pertinent books, documents, papers and records of the Borrower, Eligible Lender or DOE or other Holder or other party servicing the Guaranteed Obligation, as applicable. Such inspection may be made during regular office hours of the Borrower, Eligible Lender or DOE or other Holder, or other party servicing the Eligible Project and the Guaranteed Obligations, as applicable, or at any other time mutually convenient.

(b) The Secretary may from time to time audit any or all items of costs included as Project Costs in statements or certificates submitted to the Secretary or the servicer or otherwise, and may exclude or reduce the amount of

any item which the Secretary determines to be unnecessary or excessive, or otherwise not to be an item of Project Costs. The Borrower will make available to the Secretary all books and records and other data available to the Borrower in order to permit the Secretary to carry out such audits. The Borrower will represent that it has within its rights access to all financial and operational records and data relating to Project Costs, and agrees that it will, upon request by the Secretary, exercise such rights in order to make such financial and operational records and data available to the Secretary. In exercising its rights hereunder, the Secretary may utilize employees of other Federal agencies, independent accountants, or other persons.

§ 609.18 Deviations.

To the extent that such requirements are not specified by the Act or other applicable statutes, DOE may authorize deviations on an individual request basis from the requirements of this part upon a finding that such deviation is essential to program objectives and the special circumstances stated in the request make such deviation clearly in the best interest of the Government. DOE will consult with OMB and the Secretary of the Treasury before DOE grants any deviation that would constitute a substantial change in the financial terms of the Loan Guarantee Agreement and related documents. Any deviation, however, that was not captured in the Credit Subsidy Cost will require either additional fees or discretionary appropriations. A recommendation for any deviation shall be submitted in writing to DOE. Such recommendation must include a supporting statement, which indicates briefly the nature of the deviation requested and the reasons in support thereof.

PART 611—ADVANCED TECHNOLOGY VEHICLES MANUFACTURER ASSISTANCE PROGRAM

Subpart A—General

- Sec.
- 611.1 Purpose.
- 611.2 Definitions.

§ 611.1

10 CFR Ch. II (1–1–16 Edition)

611.3 Advanced technology vehicle.

Subpart B—Direct Loan Program

- 611.100 Eligible applicant.
- 611.101 Application.
- 611.102 Eligible project costs.
- 611.103 Application evaluation.
- 611.104 [Reserved]
- 611.105 Agreement.
- 611.106 Environmental requirements.
- 611.107 Loan terms.
- 611.108 Perfection of liens and preservation of collateral.
- 611.109 Audit and access to records.
- 611.110 Assignment or transfer of loans.
- 611.111 Default, demand, payment, and collateral liquidation.
- 611.112 Termination of obligations.

Subpart C—Facility Funding Awards

- 611.200 Purpose and scope.
- 611.201 Applicability.
- 611.202 Advanced Technology Vehicle Manufacturing Facility Award Program.
- 611.203 Eligibility.
- 611.204 Awards.
- 611.205 Period of award availability.
- 611.206 Existing facilities.
- 611.207 Small automobile and component manufacturers.
- 611.208–611.209 [Reserved]

AUTHORITY: Pub. L. 110–140 (42 U.S.C. 17013), Pub. L. 110–329.

SOURCE: 73 FR 66731, Nov. 12, 2008, unless otherwise noted.

Subpart A—General

§ 611.1 Purpose.

This part is issued by the Department of Energy (DOE) pursuant to section 136 of the Energy Independence and Security Act of 2007, Public Law 110–140, as amended by section 129 of Public Law 110–329. Specifically, section 136(e) directs DOE to promulgate an interim final rule establishing regulations that specify eligibility criteria and that contain other provisions that the Secretary deems necessary to administer this section and any loans made by the Secretary pursuant to this section.

§ 611.2 Definitions.

The definitions contained in this section apply to provisions contained in both subpart A and subpart B.

Adjusted average fuel economy means a harmonic production weighted average of the combined fuel economy of all ve-

hicles in a fleet, which were subject to CAFE.

Advanced technology vehicle means a passenger automobile or light truck that meets—

(1) The Bin 5 Tier II emission standard established in regulations issued by the Administrator of the Environmental Protection Agency under section 202(i) of the Clean Air Act (42 U.S.C. 7521(i)), as of the date of application, or a lower-numbered Bin emission standard;

(2) Any new emission standard in effect for fine particulate matter prescribed by the Administrator under that Act (42 U.S.C. 7401 *et seq.*), as of the date of application; and

(3) At least 125 percent of the harmonic production weighted average combined fuel economy, for vehicles with substantially similar attributes in model year 2005.

Agreement means the contractual loan arrangement between DOE and a Borrower for a loan made by and through the Federal Financing Bank with the full faith and credit of the United States government on the principal and interest.

Applicant means a party that submits a substantially complete application pursuant to this part.

Application means the compilation of the materials required by this part to be submitted to DOE by an Applicant. One Application can include requests for one or more loans and one or more projects. However, an Application covering more than one project must contain complete and separable information with respect to each project.

Automobile is used as that term is defined in 49 CFR part 523.

Borrower means an Applicant that receives a loan under this Program.

CAFE means the Corporate Average Fuel Economy program of the Energy Policy and Conservation Act, 49 U.S.C. 32901 *et seq.*

Combined fuel economy means the combined city/highway miles per gallon values, as are reported in accordance with section 32904 of title 49, United States Code. If CAFE compliance data is not available, the combined average fuel economy of a vehicle must be demonstrated through the use of a peer-reviewed model.

Department of Energy

§611.3

DOE or *Department* means the United States Department of Energy.

Eligible Facility means a manufacturing facility in the United States that produces qualifying advanced technology vehicles, or qualifying components.

Eligible Project means:

(1) Reequipping, expanding, or establishing a manufacturing facility in the United States to produce qualifying advanced technology vehicles, or qualifying components; or

(2) Engineering integration performed in the United States for qualifying advanced technology vehicles and qualifying components.

Engineering integration costs are the costs of engineering tasks relating to—

(1) Incorporating qualifying components into the design of advanced technology vehicles; and

(2) Designing tooling and equipment and developing manufacturing processes and material suppliers for production facilities that produce qualifying components or advanced technology vehicles.

Equivalent vehicle means a light-duty vehicle of the same vehicle classification as specified in 10 CFR part 523.

Financially viable means a reasonable prospect that the Applicant will be able to make payments of principal and interest on the loan as and when such payments become due under the terms of the loan documents, and that the applicant has a net present value that is positive, taking all costs, existing and future, into account.

Grantee means an entity awarded a grant made pursuant to section 136 and this Part.

Light-duty vehicle means passenger automobiles and light trucks.

Light truck is used as that term is defined in 49 CFR part 523.

Loan Documents mean the Agreement and all other instruments, and all documentation among DOE, the borrower, and the Federal Financing Bank evidencing the making, disbursing, securing, collecting, or otherwise administering the loan [references to loan documents also include comparable agreements, instruments, and documentation for other financial obligations for which a loan is requested or issued].

Model year is defined as that term is defined in 49 U.S.C. 32901.

Passenger automobile is used as that term is defined in 49 CFR part 523.

Qualifying components means components that the DOE determines are

(1) Designed for advanced technology vehicles; and

(2) Installed for the purpose of meeting the performance requirements of advanced technology vehicles.

Secretary means the United States Secretary of Energy.

Security means all property, real or personal, tangible or intangible, required by the provisions of the Loan Documents to secure repayment of any indebtedness of the Borrower under the Loan Documents.

§611.3 Advanced technology vehicle.

In order to demonstrate that a vehicle is an “advanced technology vehicle”, an automobile manufacturer must provide the following:

(a) Emissions certification. An automobile manufacturer must written certify that the vehicle meets, or will meet, the emissions requirements specified in the definition of “advanced technology vehicle”; and

(b) Demonstration of fuel economy performance. An automobile manufacturer must demonstrate that the vehicle has a combined average fuel economy of at least 125 percent of the average combined fuel economy for vehicles with substantially similar attributes for model year 2005.

(1) A combined average fuel economy calculation required under this paragraph for a vehicle that is a dual fueled automobile for the purpose of CAFE is calculated as if the vehicle were not a dual fueled automobile.

(2) The average combined fuel economy for vehicles with substantially similar attributes is a harmonic production weighted average of the combined average fuel economy of all vehicles with substantially similar attributes in model year 2005, as published by DOE.

(3) In the case of an electric drive vehicle with the ability to recharge from an off-board source, an automobile manufacturer must provide DOE with a test procedure and sufficient data to demonstrate that the vehicle meets or

§611.100

exceeds the applicable average combined fuel economy of vehicles with substantially similar attributes.

Subpart B—Direct Loan Program

§611.100 Eligible applicant.

(a) In order to be eligible to receive a loan under this part, an applicant

(1) Must be either—

(i) An automobile manufacturer that can demonstrate an improved fuel economy as specified in paragraph (b) of this section, or

(ii) A manufacturer of a qualifying component; and

(2) Must be financially viable without receipt of additional Federal funding associated with the proposed eligible project.

(b) Improved fuel economy. (1) If the applicant is an automobile manufacturer that manufactured in model year 2005, vehicles subject to the CAFE requirements, the applicant must demonstrate that its adjusted average fuel economy for its light-duty vehicle fleet produced in the most recent year for which final CAFE compliance data is available, at the time of application, is greater than or equal to the adjusted average fuel economy of the applicant's fleet for MY 2005, based on the MY 2005 final CAFE compliance data.

(2) If the applicant is an automobile manufacturer that did not manufacture in model year 2005, vehicles subject to the CAFE requirements, the applicant must demonstrate that the projected combined fuel economy for the relevant advanced technology vehicle that is the subject of the application is greater than or equal to the industry adjusted average fuel economy for model year 2005 of equivalent vehicles, based on final CAFE compliance data.

(3) The CAFE values under this paragraph are to be calculated using the CAFE procedures applicable to the model year being evaluated.

(4) An applicant must provide fuel economy data, at the model level, relied upon to make the demonstration required by this section.

(5) An applicant that is a manufacturer of a qualifying component under paragraph (a)(1)(ii) of this section does not need to make a showing of im-

10 CFR Ch. II (1–1–16 Edition)

proved fuel economy under this paragraph.

(c) In determining under paragraph (a)(2) of this section whether an applicant is financially viable, the Department will consider a number of factors, including, but not limited to:

(1) The applicant's debt-to-equity ratio as of the date of the loan application;

(2) The applicant's earnings before interest, taxes, depreciation, and amortization (EBITDA) for the applicant's most recent fiscal year prior to the date of the loan application;

(3) The applicant's debt to EBITDA ratio as of the date of the loan application;

(4) The applicant's interest coverage ratio (calculated as EBITDA divided by interest expenses) for the applicant's most recent fiscal year prior to the date of the loan application;

(5) The applicant's fixed charge coverage ratio (calculated as EBITDA plus fixed charges divided by fixed charges plus interest expenses) for the applicant's most recent fiscal year prior to the date of the loan application;

(6) The applicant's liquidity as of the date of the loan application;

(7) Statements from applicant's lenders that the applicant is current with all payments due under loans made by those lenders at the time of the loan application; and

(8) Financial projections demonstrating the applicant's solvency through the period of time that the loan is outstanding.

(d) For purposes of making a determination under paragraph (a)(2) of this section, additional Federal funding includes any loan, grant, guarantee, insurance, payment, rebate, subsidy, credit, tax benefit, or any other form of direct or indirect assistance from the Federal government, or any agency or instrumentality thereof, other than the proceeds of a loan approved under this Part, that is, or is expected to be made available with respect to, the project for which the loan is sought under this Part.

§611.101 Application.

The information and materials submitted in or in connection with applications will be treated as provided in 10

Department of Energy

§ 611.101

CFR 600.15 and must be marked as provided in 10 CFR 600.15(b). An application must include, at a minimum, the following information and materials:

(a) A certification by the applicant that it meets each of the requirements of the program as set forth in statute, the regulations in this part, and any supplemental requirements issued by DOE;

(b) A description of the nature and scope of the proposed project for which a loan or award is sought under this part, including key milestones and location of the project;

(c) A detailed explanation of how the proposed project qualifies under applicable law to receive a loan or award under this part, including vehicle simulations using industry standard model (need to add name and location of this open source model) to show projected fuel economy;

(d) A detailed estimate of the total project costs together with a description of the methodology and assumptions used to produce that estimate;

(e) A detailed description of the overall financial plan for the proposed project, including all sources and uses of funding, equity, and debt, and the liability of parties associated with the project;

(f) Applicant's business plan on which the project is based and applicant's financial model presenting project *pro forma* statements for the proposed term of the obligations including income statements, balance sheets, and cash flows. All such information and data must include assumptions made in their preparation and the range of revenue, operating cost, and credit assumptions considered;

(g) An analysis of projected market use for any product (vehicle or component) to be produced by or through the project, including relevant data and assumptions justifying the analysis, and copies of any contractual agreements for the sale of these products or assurance of the revenues to be generated from sale of these products;

(h) Financial statements for the past three years, or less if the applicant has been in operation less than three years, that have been audited by an independent certified public accountant, including all associated notes, as well

as interim financial statements and notes for the current fiscal year, of the applicant and parties providing the applicant's financial backing, together with business and financial interests of controlling or commonly controlled organizations or persons, including parent, subsidiary and other affiliated corporations or partners of the applicant;

(i) A list showing the status of and estimated completion date of applicant's required project-related applications or approvals for Federal, state, and local permits and authorizations to site, construct, and operate the project, a period of 5 years preceding the submission of an application under this Part;

(j) Information sufficient to enable DOE to comply with the National Environmental Policy Act of 1969, as required by § 611.106 of this part;

(k) A listing and description of assets associated, or to be associated, with the project and any other asset that will serve as collateral for the Loan, including appropriate data as to the value of the assets and the useful life of any physical assets. With respect to real property assets listed, an appraisal that is consistent with the "Uniform Standards of Professional Appraisal Practice," promulgated by the Appraisal Standards Board of the Appraisal Foundation, and performed by licensed or certified appraisers, is required;

(l) An analysis demonstrating that, at the time of the application, the applicant is financially viable without receipt of additional Federal funding associated with the proposed project, and that there is a reasonable prospect that the Applicant will be able to make payments of principal and interest on the loan as and when such payments become due under the terms of the loan documents, and that the applicant has a net present value which is positive, taking all costs, existing and future, into account. This information must include, from publicly traded companies, relevant filings with the Securities and Exchange Commission;

(m) Written assurance that all laborers and mechanics employed by contractors or subcontractors during construction, alteration, or repair that is financed, in whole or in part, by a loan

§611.102

under this Part shall be paid wages at rates not less than those prevailing on similar construction in the locality, as determined by the Secretary of Labor in accordance with 40 U.S.C. sections 3141-3144, 3146, and 3147;

(n) Completed Form SF-LLL, as required by 10 CFR Part 601; and

(o) Other information, as determined necessary by DOE.

[73 FR 66731, Nov. 12, 2008, as amended at 76 FR 26583, May 9, 2011]

§611.102 Eligible project costs.

(a) Eligible costs are:

(1) Those costs that are reasonably related to the reequipping, expanding, or establishing a manufacturing facility in the United States to produce qualifying advanced technology vehicles or qualifying components;

(2) Costs of engineering integration performed in the United States for qualifying vehicles or qualifying components;

(3) Costs for payment with loan proceeds that are incurred, but not yet paid by the borrower, after a substantially complete application has been submitted to DOE; and

(4) Costs incurred after closing of the loan.

(b) In determining the overall total cost of an Eligible Project, DOE and the applicant may include significant costs already incurred and capitalized by the applicant in accordance with Generally Accepted Accounting Principles and these costs may be considered by DOE in determining the Borrower's contribution to total project costs.

§611.103 Application evaluation.

(a) *Eligibility screening.* Applications will be reviewed to determine whether the applicant is eligible, the information required under §611.101 is complete, and the proposed loan complies with applicable statutes and regulations. DOE can at any time reject an application, in whole or in part, that does not meet these requirements. Any additional information submitted to DOE will be treated as provided in 10 CFR 600.15 and must be marked as provided in 10 CFR 600.15(b).

(b) *Evaluation criteria.* Applications that are determined to be eligible pur-

10 CFR Ch. II (1-1-16 Edition)

suant to paragraph (a) of this section shall be subject to a substantive review by DOE based upon factors that include, but are not limited to, the following:

(1) The technical merit of the proposed advanced technology vehicles or qualifying components, with greater weight given for factors including, but not limited to:

(i) Improved vehicle fuel economy above that required for an advanced technology vehicle;

(ii) Potential contributions to improved fuel economy of the U.S. light-duty vehicle fleet;

(iii) Likely reductions in petroleum use by the U.S. light-duty fleet; and

(iv) Promotion of use of advanced fuel (e.g., E85, ultra-low sulfur diesel).

(2) Technical Program Factors such as economic development and diversity in technology, company, risk, and geographic location.

(3) The adequacy of the proposed provisions to protect the Government, including sufficiency of Security, the priority of the lien position in the Security, and the percentage of the project to be financed with the loan.

(4) In making loans to those manufacturers that have existing facilities, priority will be given to those facilities that are oldest or have been in existence for at least 20 years even if such facilities are idle at the time of application.

[73 FR 66731, Nov. 12, 2008, as amended at 76 FR 26583, May 9, 2011]

§611.104 [Reserved]

§611.105 Agreement.

(a) Only an Agreement executed by a duly authorized DOE Contracting Officer can contractually obligate the government to make a loan made by and through the Federal Financing Bank with the full faith and credit of the United States government on the principal and interest.

(b) DOE is not bound by oral representations made during the Application stage, or during any negotiation process.

(c) No funds obtained from the Federal Government, or from a loan or other instrument guaranteed by the Federal Government, may be used to

Department of Energy

§ 611.106

pay administrative fees, or other fees charged by or paid to DOE relating to the section 136 loan program.

(d) Prior to the execution by DOE of an Agreement, DOE must ensure that the following requirements and conditions, which must be specified in the Agreement, are satisfied:

(1) The Borrower is a Eligible Applicant as defined in this part;

(2) The Agreement is for an Eligible Project as defined in this part;

(3) The principal amount of the loan is limited to no more than 80 percent of reasonably anticipated total Project Costs;

(4) Loan funds will be disbursed only to meet immediate cash disbursement needs of the Borrower and not for investment purposes, and any investment earnings obtained in excess of accrued interest expense will be returned to United States Government; and

(5) Such documents, representations, warrants and covenants as DOE may require.

§ 611.106 Environmental requirements.

(a)(1) *In general.* Environmental review of the proposed projects under this part will be conducted in accordance with applicable statutes, regulations, and Executive Orders.

(2) The applicant must submit a comprehensive environmental report. The comprehensive environmental report shall consist of the specific reports and related material set forth in paragraphs (d) through (f) of this section.

(3) The regulations of the Council on Environmental Quality implementing NEPA require DOE to provide public notice of the availability of project specific environmental documents such as environmental impact statements, environmental assessments, findings of no significant impact, records of decision etc., to the affected public. See 40 CFR 1506.6(b). The comprehensive environmental report will provide substantial basis for any required environmental impact statement or environmental assessment and findings of no significant impact, pursuant to the procedures set forth in 10 CFR 1021.215. DOE may also make a determination as to whether a categorical exclusion is available with regard to an Application.

(b) The detail of each specific report must be commensurate with the complexity of the proposal and its potential for environmental impact. Each topic in each specific report shall be addressed or its omission justified, unless the specific report description indicates that the data is not required for that type of project. If material required for one specific report is provided in another specific report or in another exhibit, it may be incorporated by reference. If any specific report topic is required for a particular project but is not provided at the time the application is filed, the comprehensive environmental report shall explain why it is missing and when the applicant anticipates it will be filed.

(c) As appropriate, each specific report shall:

(1) Address conditions or resources that might be directly or indirectly affected by the project;

(2) Identify significant environmental effects expected to occur as a result of the project;

(3) Identify the effects of construction, operation (including maintenance and malfunctions), and termination of the project, as well as cumulative effects resulting from existing or reasonably foreseeable projects;

(4) Identify measures proposed to enhance the environment or to avoid, mitigate, or compensate for adverse effects of the project; and

(5) Provide a list of publications, reports, and other literature or communications that were cited or relied upon to prepare each report.

(d) Specific Report 1—Project impact and description. This report must describe the environmental impacts of the project, facilities associated with the project, special construction and operation procedures, construction timetables, future plans for related construction, compliance with regulations and codes, and permits that must be obtained.

(e) Specific Report 2—Socioeconomics. This report must identify and quantify the impacts of constructing and operating the proposed project on factors affecting towns and counties in the vicinity of the project. The report must:

§611.107

(1) Describe the socioeconomic impact area;

(2) Evaluate the impact of any substantial immigration of people on governmental facilities and services and plans to reduce the impact on the local infrastructure;

(3) Describe on-site manpower requirements and payroll during construction and operation, including the number of construction personnel who currently reside within the impact area, would commute daily to the site from outside the impact area, or would relocate temporarily within the impact area;

(4) Determine whether existing housing within the impact area is sufficient to meet the needs of the additional population;

(5) Describe the number and types of residences and businesses that would be displaced by the project, procedures to be used to acquire these properties, and types and amounts of relocation assistance payments; and

(6) Conduct a fiscal impact analysis evaluating incremental local government expenditures in relation to incremental local government revenues that would result from construction of the project. Incremental expenditures include, but are not limited to, school operating costs, road maintenance and repair, public safety, and public utility costs.

(f) Specific Report 3—Alternatives. This report must describe alternatives to the project and compare the environmental impacts of such alternatives to those of the proposal. The discussion must demonstrate how environmental benefits and costs were weighed against economic benefits and costs, and technological and procedural constraints. The potential for each alternative to meet project deadlines and the environmental consequences of each alternative shall be discussed. The report must discuss the “no action” alternative and the potential for accomplishing the proposed objectives through the use of other means. The report must provide an analysis of the relative environmental benefits and costs for each alternative.

10 CFR Ch. II (1–1–16 Edition)

§611.107 Loan terms.

(a) All loans provided under this part shall be due and payable in full at the earlier of:

(1) the projected life, in years, of the Eligible facility that is built or installed as a result of the Eligible Project carried out using funds from the loan, as determined by the Secretary; or

(2) Twenty-five (25) years after the date the loan is closed.

(b) Loans provided under the Part must bear a rate of interest that is equal to the rate determined by the Secretary of the Treasury, taking into consideration current market yields outstanding marketable obligations of the United States of comparable maturity. This rate will be determined separately for each drawdown of the loan.

(c) A loan provided under this part may be subject to a deferral in repayment of principal for not more than 5 years after the date on which the Eligible facility that is built or installed as a result of the Eligible Project first begins operations, as determined by the Secretary.

(d)(1) The performance of all of the Borrower's obligations under the Loan Documents shall be secured by, and shall have the priority in, such Security as provided for within the terms and conditions of the Loan Documents.

(2) Accordingly, the rule states that the Secretary must have a first lien or security interest in all property acquired with loan funds. This requirement may be waived only by the Secretary on a non-delegable basis. DOE must also have a lien on any other property of the applicant pledged to secure the loan.

(3) In the event of default, if recoveries from the property and revenues pledged to the repayment of the loan are insufficient to fully repay all principal and interest on the loan, then the Federal Government will have recourse to the assets and revenues of the Borrower to the same extent as senior unsecured general obligations of the Borrower.

(e) The Borrower will be required to pay at the time of the closing of the loan a fee equal to 10 basis points of the principal amount of the loan.

Department of Energy

§ 611.110

§ 611.108 Perfection of liens and preservation of collateral.

(a) The Agreement and other documents related thereto shall provide that:

(1) DOE and the Applicant, in conjunction with the Federal Financing Bank if necessary, will take those actions necessary to perfect and maintain liens, as applicable, on assets which are pledged as collateral for the loan; and

(2) Upon default by the Borrower, the holder of pledged collateral shall take such actions as DOE may reasonably require to provide for the care, preservation, protection, and maintenance of such collateral so as to enable the United States to achieve maximum recovery from the pledged assets. DOE shall reimburse the holder of collateral for reasonable and appropriate expenses incurred in taking actions required by DOE.

(b) In the event of a default, DOE may enter into such contracts as the Secretary determines are required to preserve the collateral. The cost of such contracts may be charged to the Borrower.

§ 611.109 Audit and access to records.

(a) The Agreement and related documents shall provide that:

(1) DOE in conjunction with the Federal Financing Bank, as applicable, and the Borrower, shall keep such records concerning the project as are necessary, including the Application, Term Sheet, Conditional Commitment, Agreement, mortgage, note, disbursement requests and supporting documentation, financial statements, audit reports of independent accounting firms, lists of all project assets and non-project assets pledged as security for the loan, all off-take and other revenue producing agreements, documentation for all project indebtedness, income tax returns, technology agreements, documentation for all permits and regulatory approvals and all other documents and records relating to the Eligible Project, as determined by the Secretary, to facilitate an effective audit and performance evaluation of the project; and

(2) The Secretary and the Comptroller General, or their duly author-

ized representatives, shall have access, for the purpose of audit and examination, to any pertinent books, documents, papers and records of the Borrower or DOE, as applicable. Such inspection may be made during regular office hours of the Borrower or DOE, as applicable, or at any other time mutually convenient.

(b) The Secretary may from time to time audit any or all statements or certificates submitted to the Secretary. The Borrower will make available to the Secretary all books and records and other data available to the Borrower in order to permit the Secretary to carry out such audits. The Borrower should represent that it has within its rights access to all financial and operational records and data relating to the project financed by the loan, and agrees that it will, upon request by the Secretary, exercise such rights in order to make such financial and operational records and data available to the Secretary. In exercising its rights hereunder, the Secretary may utilize employees of other Federal agencies, independent accountants, or other persons.

(c) Loan funds are being expended efficiently and effectively if documentation submitted and audits conducted under this section demonstrate that the borrower is making appropriate progress toward achieving the purpose for which the loan was originally made.

§ 611.110 Assignment or transfer of loans.

(a) The Loan Documents may not be modified, in whole or in part, without the prior written approval of DOE.

(b) Upon prior written approval by DOE and the Federal Financing Bank, a certification by the assignor that the assignee is an Eligible Applicant as described in § 611.100 of this part, and subject to paragraph (c) of this section and other provisions of this part, a Borrower may assign or transfer its interest in a loan provided under this part, including the loan documents, to a party that qualifies as an Eligible Applicant.

(c) The provisions of paragraph (b) of this section shall not apply to transfers which occur by operation of law.

§ 611.111 Default, demand, payment, and collateral liquidation.

(a) In the event that the Borrower has defaulted in the making of required payments of principal or interest, and such default has not been cured within the period of grace provided in the Agreement, DOE may cause the principal amount of the loan, together with accrued interest thereon, and all amounts owed to the United States by Borrower pursuant to the Agreement, to become immediately due and payable by giving the Borrower written notice to such effect.

(b) In the event that the Borrower is in default as a result of a breach of one or more of the terms and conditions of the Agreement, note, mortgage, or other contractual obligations related to the transaction, other than the Borrower's obligation to pay principal or interest on the loan, and DOE determines, in writing, that such a default has materially affected the rights of the parties, the Borrower shall be given the period of grace provided in the Agreement to cure such default. If the default is not cured during the period of grace, DOE may cause the principal amount of the loan, together with accrued interest thereon, and all amounts owed to the United States by Borrower pursuant to the Agreement, to become immediately due and payable by giving the Borrower written notice to such effect.

(c) In the event that the Borrower has defaulted as described in paragraphs (a) or (b) of this section and such default is not cured during the grace period provided in the Agreement, DOE shall notify the U.S. Attorney General. DOE, acting through the U.S. Attorney General, may seek to foreclose on the collateral assets and/or take such other legal action as necessary for the protection of the Government.

(d) If DOE is awarded title to collateral assets pursuant to a foreclosure proceeding, DOE may take action to complete, maintain, operate, or lease the Eligible Facilities, or otherwise dispose of any property acquired pursuant to the Agreement or take any other necessary action which DOE deems appropriate.

(e) In addition to foreclosure and sale of collateral pursuant thereto, the U.S. Attorney General shall take appropriate action in accordance with rights contained in the Agreement to recover costs incurred by the Government as a result of the defaulted loan or other defaulted obligation. Any recovery so received by the U.S. Attorney General on behalf of the Government shall be applied in the following manner: First to the expenses incurred by the U.S. Attorney General and DOE in effecting such recovery; second, to reimbursement of any amounts paid by DOE as a result of the defaulted obligation; third, to any amounts owed to DOE under related principal and interest assistance contracts; and fourth, to any other lawful claims held by the Government on such process. Any sums remaining after full payment of the foregoing shall be available for the benefit of other parties lawfully entitled to claim them.

(f) In the event that DOE considers it necessary or desirable to protect or further the interest of the United States in connection with the liquidation of collateral or recovery of deficiencies due under the loan, DOE will take such action as may be appropriate under the circumstances.

§ 611.112 Termination of obligations.

DOE, the Federal Financing Bank, and the Borrower shall have such rights to terminate the Agreement as are set forth in the loan documents.

Subpart C—Facility/Funding Awards**§ 611.200 Purpose and scope.**

This subpart sets forth the policies and procedures applicable to the award and administration of grants by DOE for advanced technology vehicle manufacturing facilities as authorized by section 136(b) of the Energy Independence and Security Act (Pub. L. 110–140).

§ 611.201 Applicability.

Except as otherwise provided by this subpart, the award and administration of grants shall be governed by 10 CFR part 600 (DOE Financial Assistance Rules).

Department of Energy

§§ 611.208–611.209

§ 611.202 Advanced Technology Vehicle Manufacturing Facility Award Program.

DOE may issue, under the Advanced Technology Vehicle Manufacturing Facility Award Program, 10 CFR part 611, subpart C, awards for eligible projects.

§ 611.203 Eligibility.

In order to be eligible for an award, an applicant must be either—

(a) An automobile manufacturer that can demonstrate an improved fuel economy as specified in paragraph (b) of section 611.3, or

(b) A manufacturer of a qualifying component.

§ 611.204 Awards.

Awards issued for eligible projects shall be for an amount of no more than 30 percent of the eligible project costs.

§ 611.205 Period of award availability.

An award under section 611.204 shall apply to—

(a) Facilities and equipment placed in service before December 30, 2020; and

(b) Engineering integration costs incurred during the period beginning on December 19, 2007 and ending on December 30, 2020.

§ 611.206 Existing facilities.

The Secretary shall, in making awards to those manufacturers that have existing facilities, give priority to those facilities that are oldest or have been in existence for at least 20 years. Such facilities can currently be sitting idle.

§ 611.207 Small automobile and component manufacturers.

(a) In this section, the term “covered firm” means a firm that—

(1) Employs less than 500 individuals; and

(2) Manufactures automobiles or components of automobiles.

(b) *Set Aside*—Of the amount of funds that are used to provide awards for each fiscal year under this subpart, not less than 10 percent shall be used to provide awards to covered firms or consortia led by a covered firm.

§§ 611.208–611.209 [Reserved]

SUBCHAPTER I—SALES REGULATION

PART 622—CONTRACTUAL PROVISIONS

§ 622.103 Dispute provisions.

(a) Except as provided in paragraph (b) of this section, all DOE contracts for the sale of personal property to any organization outside the U.S. Government shall include a Disputes clause which provides for:

(1) Binding final decisions by the Contracting Officer, subject to appeal;

(2) Appeal rights pursuant to the Contract Disputes Act of 1978;

(3) Continuation of performance by the contractor at the direction of the contracting officer pending final resolution of the dispute.

(b) Exceptions:

(1) The provisions of this part shall not apply to contracts for sale of electric power by the Power Marketing Administrations;

(2) The Secretary may exempt a contract or class of contracts from this requirement upon determination that it would not be in the public interest in an individual contract or class of contracts with a foreign government, or agency thereof, or international organization, or subsidiary body thereof, to include the Disputes clause, as permitted by section 3 of the Contract Disputes Act of 1978.

(c) The Energy Board of Contract Appeals (EBCA) has cognizance over disputes relating to DOE Sales contracts.

(d) The Disputes clause in § 624.102-4 shall be used in accordance with this § 622.103.

(Sec. 644, Department of Energy Organization Act, Pub. L. 95-91, 91 Stat. 599 (42 U.S.C. 7254))

[46 FR 34559, July 2, 1981]

PART 624—CONTRACT CLAUSES

§ 624.102-4 Disputes.

The following clause shall be used in accordance with the provisions of § 622.103:

DISPUTES

(a) This contract is subject to the Contract Disputes Act of 1978 (41 U.S.C. 601 *et seq.*). If a dispute arises relating to the contract, the purchaser may submit a claim to the Contracting Officer who shall issue a written decision on the dispute.

(b) *Claim* means:

(1) A written request submitted to the Contracting Officer;

(2) For payment of money, adjustment of contract terms, or other relief;

(3) Which is in dispute or remains unresolved after a reasonable time for its review and disposition by the Government; and

(4) For which a Contracting Officer's decision is demanded.

(c) In the case of disputed requests or amendments to such requests for payment exceeding \$50,000, or with any amendment causing the total request in dispute to exceed \$50,000, the purchaser shall certify, at the time of submission of a claim, as follows:

I certify that the claim is made in good faith, that the supporting data is accurate and complete to the best of my knowledge and belief, and that the amount requested accurately reflects the contract adjustment for which the Purchaser believes the Government is liable.

(Purchaser's Name) _____

(Title) _____

(d) The Government shall pay the Purchaser interest.

(1) On the amount found due to the purchaser and unpaid on claims submitted under this clause;

(2) At the rates fixed by the Secretary of the Treasury;

(3) From the date the amount is due until the Government makes payment.

(e) The purchaser shall pay the Government interest:

(1) On the amount found due to the Government and unpaid on claims submitted under this clause;

(2) At the rates fixed by the Department of Energy for the payment of interest on past due accounts;

(3) From the date the amount is due until the purchaser makes payment.

Department of Energy

§ 625.3

(f) The decision of the Contracting Officer shall be final and conclusive and not subject to review by any forum, tribunal, or Government agency unless an appeal or action is timely commenced within the times specified by the Contract Disputes Act of 1978.

(g) The purchaser shall comply with any decision of the Contracting Officer and at the direction of the Contracting Officer shall proceed diligently with performance of this contract pending final resolution of any request for relief, claim, appeal, or action related to this contract.

(Sec. 644, Department of Energy Organization Act, Pub. L. 95-91, 91 Stat. 599 (42 U.S.C. 7254))

PART 625—PRICE COMPETITIVE SALE OF STRATEGIC PETROLEUM RESERVE PETROLEUM

Sec.

625.1 Application and purpose.

625.2 Definitions.

625.3 Standard sales provisions.

625.4 Publication of the Standard Sales Provisions.

625.5 Failure to perform in accordance with SPR Contracts of Sale.

APPENDIX A TO PART 625—STANDARD SALES PROVISIONS

AUTHORITY: 15 U.S.C. 761; 42 U.S.C. 7101; 42 U.S.C. 6201.

SOURCE: 48 FR 56541, Dec. 21, 1983, unless otherwise noted.

§ 625.1 Application and purpose.

This part shall apply to all price competitive sales of SPR petroleum by DOE. This section provides the rules for developing standard contract terms and conditions and financial and performance responsibility measures; notifying potential purchasers of those terms, conditions and measures; choosing applicable terms, conditions and measures for each sale of SPR petroleum; and notifying potential purchasers of which terms, conditions and measures will be applicable to particular sales of SPR petroleum.

§ 625.2 Definitions.

(a) *DOE*. DOE is the Department of Energy established by Public Law 95-91 (42 U.S.C. 7101 *et seq.*) and any component thereof including the SPR Office.

(b) *Notice of Sale*. The Notice of Sale is the document announcing the sale of SPR petroleum, the amount, type and location of the petroleum being sold, the delivery period and the procedures for submitting offers. The Notice of Sale will specify which contractual provisions and financial and performance responsibility measures are applicable to that particular sale of petroleum, and will provide other pertinent information.

(c) *Petroleum*. Petroleum means crude oil, residual fuel oil or any refined petroleum product (including any natural gas liquid and any natural gas liquid product) owned or contracted for by DOE and in storage in any permanent SPR facility, or temporarily stored in other storage facilities, or in transit to such facilities (including petroleum under contract but not yet delivered to a loading terminal).

(d) *Price Competitive Sale*. A price competitive sale of SPR petroleum is one in which contract awards are made to those responsive, responsible persons offering the highest prices; sales conducted pursuant to rules adopted under section 161(e) of the Energy Policy and Conservation Act (EPCA), Public Law 94-163 (42 U.S.C. 6201 *et seq.*), are not price competitive sales.

(e) *Purchaser*. A purchaser is any person or entity (including a Government agency) which enters into a contract with DOE to purchase SPR petroleum.

(f) *SPR*. SPR is the Strategic Petroleum Reserve, that program of the Department of Energy established by title I, part B of EPCA.

(g) *Standard Sales Provisions*. The Standard Sales Provisions are a set of terms and conditions of sale, which may contain or describe financial and performance responsibility measures, for petroleum sold from the SPR under this part.

§ 625.3 Standard sales provisions.

(a) *Contents*. The Standards Sales Provisions shall contain contract clauses which may be applicable to price competitive sales of SPR petroleum, including terms and conditions of sale, and purchaser financial and performance responsibility measures, or descriptions thereof. At his discretion, the Secretary or his designee may

§ 625.4

specify in a Notice of Sale which of such terms and conditions, or financial and performance responsibility measures, shall apply to a particular sale of SPR petroleum; and, he may specify any revisions in such terms, conditions and measures, and any additional terms, conditions and measures which shall be applicable to that sale, that are consistent with the SPR Drawdown Plan adopted on December 1, 1982.

(b) *Acceptance by offerors.* All offerors must, as part of their offers for SPR petroleum in response to a Notice of Sale, agree without exception to all contractual provisions and financial and performance responsibility measures which the Notice of Sale makes applicable to the particular sale.

(c) *Award of contracts.* No contract for the sale of SPR petroleum may be awarded to any offeror who has not unconditionally agreed to all contractual provisions and financial and performance responsibility measures which the Notice of Sale makes applicable to the particular sale.

(d) *Contract documents.* The terms and conditions which the Notice of Sale makes applicable to a particular sale may be incorporated into a contract for the sale of SPR petroleum by reference to the Notice of Sale.

§ 625.4 Publication of the Standard Sales Provisions.

(a) *Publication.* The Standard Sales Provisions shall be published in the FEDERAL REGISTER and in the Code of Federal Regulations as an appendix to this rule.

(b) *Revisions of the Standard Sales Provisions.* The Standard Sales Provisions shall be reviewed periodically and republished in the FEDERAL REGISTER, with any revisions.

(c) *Notification of applicable clauses.* The Notice of Sale will specify, by referencing the FEDERAL REGISTER and the Code of Federal Regulations in which the latest version of the Standard Sales Provisions was published, which contractual terms and conditions and contractor financial and performance responsibility measures contained or described therein are applicable to that particular sale.

10 CFR Ch. II (1-1-16 Edition)

§ 625.5 Failure to perform in accordance with SPR Contracts of Sale.

(a) *Ineligibility.* In addition to any remedies available to the Government under the Contract of Sale, in the event that a purchaser fails to perform in accordance with applicable SPR petroleum sale contractual provisions, and such failure is not excused by those provisions, the Headquarters Senior Procurement Official, at his discretion, may make such purchaser ineligible for future awards of SPR petroleum sales contracts.

(b) *Determination of ineligibility.* No purchaser shall be made ineligible for the award of any SPR sales contract prior to notice and opportunity to respond in accordance with the requirements of this subsection.

(1) Upon the determination that a purchaser is to be considered for ineligibility, the purchaser shall be sent by certified mail return receipt requested, the following:

(i) Notification that the Headquarters Senior Procurement Official is considering making the purchaser ineligible for future awards;

(ii) Identification of the SPR sales contract which the purchaser failed to comply with, along with a brief description of the events and circumstances relating to such failure;

(iii) Advice that the purchaser may submit in writing for consideration by the Headquarters Senior Procurement Official in determining whether or not to impose ineligibility on the purchaser, any information or argument in opposition to the ineligibility; and

(iv) Advice that such information or argument in opposition to the ineligibility must be submitted within a certain time in order to be considered by the Headquarters Senior Procurement Official, such time to be not less than 21 days.

(2) After elapse of the time period established under paragraph (b)(1) of this section for receipt of the purchaser's response, the Headquarters Senior Procurement Official, at his discretion, and after consideration of the purchaser's written response, if any, may make the purchaser ineligible for future awards of SPR petroleum sales contracts. Such ineligibility shall continue for the time period determined

by the Headquarters Senior Procurement Official, as appropriate under the circumstances.

(3) The purchaser shall be notified of the Headquarters Senior Procurement Official's decision.

(c) *Reconsideration.* Any purchaser who has been excluded from participating in any SPR sale under paragraph (a) may request that the Headquarters Senior Procurement Official reconsider the purchaser's ineligibility. The Headquarters Senior Procurement Official, at his discretion, may reinstate any such purchaser to eligibility for future competitive sales.

- (a) ASO: Apparently Successful Offeror
- (b) DLI: Delivery Line Item
- (c) DOE: U.S. Department of Energy
- (d) MLI: Master Line Item
- (e) NA: Notice of Acceptance
- (f) NS: Notice of Sale
- (g) SNL: Sales Notification List
- (h) SSPs: Standard Sales Provisions
- (i) SPR: Strategic Petroleum Reserve
- (j) SPRCODR: SPR Crude Oil Delivery Report (*Exhibit E*)
- (k) SPR/PMO: Strategic Petroleum Reserve Project Management Office

A.2 Definitions

Affiliate. The term “affiliate” means associated business concerns or individuals if, directly or indirectly, (1) either one controls or can control the other, or (2) a third party controls or can control both.

Business Day. The term “business day” means any day except Saturday, Sunday or a U.S. Government holiday.

Contract. The term “contract” means the contract under which DOE sells SPR petroleum. It is composed of the NS, the NA, the successful offer, and the SSPs incorporated by reference.

Contracting Officer. The term “Contracting Officer” means the person executing sales contracts on behalf of the Government, and any other Government employee properly designated as Contracting Officer. The term includes the authorized representative of a Contracting Officer acting within the limits of his or her authority.

Electronic signature or signature means a method of signing an electronic message that—

(1) Identifies and authenticates a particular person as the source of the electronic message; and

(2) Indicates such person’s approval of the information contained in the electronic message.

Government. The term “Government”, unless otherwise indicated in the text, means the United States Government.

Head of the Contracting Activity. The term “Head of the Contracting Activity” means Project Manager, Strategic Petroleum Reserve Project Management Office.

Notice of Acceptance (NA). The term “Notice of Acceptance” means the document that is sent by DOE to accept the purchaser’s offer to create a contract.

Notification of Apparently Successful Offeror (ASO). The term “notification of apparently successful offeror” means the notice, written or oral, by the Contracting Officer to an offeror that it will be awarded a contract if it is determined to be responsible.

feror that it will be awarded a contract if it is determined to be responsible.

Notice of Sale (NS). The term “Notice of Sale” means the document announcing the sale of SPR petroleum, the amount, characteristics and location of the petroleum being sold, the delivery period and the procedures for submitting offers. The NS will specify what contractual provisions and financial and performance responsibility measures are applicable to that particular sale of petroleum and provide other pertinent information.

Offeror. The term “offeror” means any person or entity (including a government agency) who submits an offer in response to a NS.

Petroleum. The term “petroleum” means crude oil, residual fuel oil, or any refined product (including any natural gas liquid, and any natural gas liquid product) owned or contracted for by DOE and in storage in any permanent SPR facility, or temporarily stored in other storage facilities.

Project Management Office (SPR/PMO). The term “Project Management Office” means the DOE personnel and DOE contractors located in Louisiana and Texas responsible for the operation of the SPR.

Purchaser. The term “purchaser” means any person or entity (including a government agency) who enters into a contract with DOE to purchase SPR petroleum.

Standard Sales Provisions (SSPs). The term “Standard Sales Provisions” means this set of terms and conditions of sale applicable to price competitive sales of SPR petroleum. These SSPs constitute the “standard sales agreement” referenced in the Strategic Petroleum Reserve “Drawdown” (Distribution) Plan, Amendment No. 4 (December 1, 1982, DOE/EP 0073) to the SPR Plan.

Strategic Petroleum Reserve (SPR). The term “Strategic Petroleum Reserve” means that DOE program established by Title I, Part B, of the Energy Policy and Conservation Act, 42 U.S.C. 6201, as amended.

Vessel. The term “vessel” means a tankship, an integrated tug-barge (ITB) system, a self-propelled barge, or other barge.

A.3 Standard Sales Provisions (SSPs)

(a) These SSPs contain pre-sale information, sales solicitation provisions, and sales contract clauses setting forth terms and conditions of sale, including purchaser financial and performance responsibility measures, or descriptions thereof, which may be applicable to price competitive sales of petroleum from the SPR in accordance with the SPR Sales Rule, 10 CFR Part 625. The NS will specify which of these provisions shall apply to a particular sale of such petroleum, and it may specify any revisions therein and any additional provisions which shall be applicable to that sale.

(b) All offerors must, as part of their offers for SPR petroleum in response to a NS, agree

without exception to all sales provisions of that NS.

A.4 Periodic Revisions of the Standard Sales Provisions

DOE will review the SSPs periodically and republish them in the FEDERAL REGISTER, with any revisions. When an NS is issued, it will cite the FEDERAL REGISTER and the Code of Federal Regulations (if any) in which the latest version of the SSPs was published. Offerors are cautioned that the Code of Federal Regulations may not contain the latest version of the SSPs published in the FEDERAL REGISTER. Interested persons may view the current SSPs at <http://www.spr.doe.gov/reports/SSPs/ssp.htm>.

A.5 Sales Notification List (SNL)

(a) The SPR/PMO will maintain a Sales Notification List (SNL) of those potential offerors who wish to receive notification of an NS whenever one is issued. In order to assure that prospective offerors will receive such notification in a timely fashion, all potential offerors are encouraged to register on the SNL as soon as possible.

(b) Any firm or individual may complete the SNL on-line registration process at <http://www.spr.doe.gov>.

A.6 Publication of the Notice of Sale

(a) Notification of a NS will be sent via e-mail to those who have registered on the SNL referenced in Provision A.5.

(b) The NS will be posted on the SPR web page <http://www.spr.doe.gov> for public viewing. In addition, the issuance of the NS will be publicized on the Fossil Energy web page <http://www.fe.doe.gov/programs/reserves/>.

(c) A DOE press release, which will include the salient features of the NS, will be made available to all news agencies.

A.7 Penalty for False Statements in Offers To Buy SPR Petroleum

(a) Making false statements in an offer to buy SPR petroleum may expose an offeror to a penalty under the False Statements Act, 18 U.S.C. 1001, which provides:

Whoever, in any matter within the jurisdiction of any department or agency of the United States knowingly and willfully falsifies, conceals or covers up by any trick, scheme, or device a material fact, or makes any false, fictitious or fraudulent statements or representations, or makes or uses any false writing or document knowing the same to contain any false, fictitious or fraudulent statement or entry, shall be fined under this title or imprisoned not more than 5 years, or both.

(b) Under 18 U.S.C. 3571, the maximum fine to which an individual or organization may be sentenced for violations of 18 U.S.C. (in-

cluding Section 1001) is set at \$250,000 and \$500,000 respectively, unless there is a greater amount specified in the statute setting out the offense, or the violation is subject to special factors set out in Section 3571. The United States Sentencing Guidelines also apply to violations of Section 1001, and offenders may be subject to a range of fines under the guidelines up to and including the maximum amounts permitted by law.

SECTION B—SALES SOLICITATION PROVISIONS

B.1 Requirements for a Valid Offer—Caution to Offerors

(a) Offerors are advised that the submission of an offer electronically is required. Submission of an offer via the SPR's specified on-line system will constitute a legal, binding offer. The use of the combination of User Name and password to login and submit offers constitutes an electronic signature.

(b) A valid offer to purchase SPR petroleum must meet the following conditions:

(1) The offer must be submitted via the SPR's on-line system as designated in the NS;

(2) The offer must be received no later than the date and time set for receipt of offers;

(3) The offer guarantee (see Provision B.12) must be received no later than the time set for the receipt of offers;

(4) Any amendments to the NS that explicitly require acknowledgment of receipt must be properly acknowledged as specified in the NS; and

(5) Submission of an on-line offer in accordance with this provision constitutes agreement without exception to all provisions of the SSPs that the NS makes applicable to a particular sale, as well as to all provisions in the NS.

(c) At the discretion of the Contracting Officer, offers may be received by alternative means if circumstances preclude use of the specified on-line system.

B.2 Price Indexing

The Government, at its discretion, may make use of a price indexing mechanism to effect contract price adjustments based on petroleum market conditions, e.g., crude oil market price changes between the times of offer price submissions and physical deliveries. The NS will set forth the provisions applicable to any such mechanism.

B.3 Certification of Independent Price Determination

(a) The offeror certifies that:

(1) The prices in this offer have been arrived at independently, without, for the purposes of restricting competition, any consultation, communication, or agreement with any other offeror or competitor relating to:

- (i) Those prices;
- (ii) The intention to submit an offer; or
- (iii) The methods or factors used to calculate the prices offered.

(2) The prices in this offer have not been and will not be knowingly disclosed by the offeror, directly or indirectly, to any other offeror or to any competitor before the time set for receipt of offers, unless otherwise required by law; and

(3) No attempt has been made or will be made by the offeror to induce any other concern to submit or not to submit an offer for the purpose of restricting competition.

(b) Each submission of an offer is considered to be a certification by the offeror that the offeror:

(1) Is the person within the offeror's organization responsible for determining the prices being offered, and that the offeror has not participated, and will not participate, in any action contrary to paragraphs (a)(1) through (a)(3) of this provision; or

(2)(i) Has been authorized in writing to act as agent for the persons responsible for such decision in certifying that such persons have not participated, and will not participate, in any action contrary to (a)(1) through (a)(3) of this provision;

(ii) As their agent does hereby so certify; and

(iii) As their agent has not participated, and will not participate, in any action contrary to paragraphs (a)(1) through (a)(3) of this provision.

B.4 Requirements for Vessels—Caution to Offerors

(a) The "Jones Act", 46 U.S.C. 883, prohibits the transportation of any merchandise, including SPR petroleum, by water or land and water, on penalty of forfeiture thereof, between points within the United States (including Puerto Rico, but excluding the Virgin Islands) in vessels other than vessels built in and documented under laws of the United States, and owned by United States citizens, unless the prohibition has been waived by the Secretary of Homeland Security. Further, certain U.S.-flag vessels built with Construction Differential Subsidies (CDS) are precluded by Section 506 of the Merchant Marine Act of 1936 (46 U.S.C. 1156) from participating in U.S. coastwise trade, unless such prohibition has been waived by the Secretary of Transportation, the waiver being limited to a maximum of 6 months in any given year. CDS vessels may also receive Operating Differential Subsidies, requiring separate permission from the Secretary of Transportation for domestic operation, under Section 805(a) of the same statute. The NS will advise offerors of any general waivers allowing use of non-coastwise qualified vessels or vessels built with Construction Differential Subsidies for a particular sale of SPR petroleum. If there is no

general waiver, purchasers may request waivers in accordance with Provision C.7, but remain obligated to complete performance under this contract regardless of the outcome of that waiver process.

(b) The Department of Homeland Security's regulations concerning Vessels Carrying Oil, Noxious Liquid Substances, Garbage, Municipal or Commercial Waste, and Ballast Water (33 CFR part 151) and Reception Facilities For Oil, Noxious Liquid Substances, and Garbage (33 CFR part 158) implement the requirements of the International Convention for the Prevention of Pollution from Ships, 1973, as modified by the 1978 Protocol relating thereto (MARPOL 73/78). These regulations prohibit any ocean-going tankship, required to retain oil or oily mixtures on-board while at sea, from entering any port or terminal unless the port or terminal has a valid Certificate of Adequacy as to its oil reception capabilities. Marine terminals in support of the SPR (*see Exhibit B, SPR Delivery Point Data*) have Certificates of Adequacy; however, they may not have reception facilities for oily ballast, vessel sludge or oily bilge water wastes. Accordingly, tankships will be required to make arrangements for and be responsible for all costs associated with appropriate disposal of such ballast, vessel sludge or oily bilge water waste or permission to load may be denied.

B.5 "Superfund" Tax on SPR Petroleum—Caution to Offerors

(a) Sections 4611 and 4612 of the Internal Revenue Code, provide for the imposition of taxes on domestic and imported petroleum to support the Hazardous Substance Response Fund (the "Superfund") and the Oil Spill Liability Trust Fund ("Trust Fund"). These taxes are not currently being collected.

(b) DOE has already paid the Superfund and Trust Fund taxes on some of the oil imported and stored in the SPR. However, no Superfund or Trust Fund tax has been paid on any domestic oil stored in the SPR or on imported oil stored prior to the imposition of these taxes. Because domestic and imported crude oil for which no Superfund and Trust Fund taxes have been paid and crude oils for which these taxes have been paid have been commingled in the SPR, the Government retains records of the tax status of all SPR petroleum in storage. The NS will advise purchasers in the event these taxes are reimposed.

B.6 Export Limitations and Licensing—Caution to Offerors

Offerors for SPR petroleum are put on notice that export of SPR crude oil is subject to U.S. export control laws implemented by the Department of Commerce Short Supply Controls, codified at 15 CFR part 754, §754.2,

Crude oil. Subsections of §754.2 provide for the approval of applications to export crude oil from the SPR in connection with refining or exchange of SPR oil. Specifically, these subsections are §§754.2(b)(iii), and 754.2(f), Refining or exchange of Strategic Petroleum Reserve Oil. These provisions implement the authority given to the President by 42 U.S.C. 6241(i) to permit the export of oil in the SPR for the purpose of obtaining refined petroleum for the U.S. market. In addition, the President could waive the requirement for an export license altogether. The NS will advise of any waivers under this Presidential authority.

B.7 State of Hawaii Access to SPR crude oil

Potential offerors are advised that pursuant to subsection 161 (j) of the Energy Policy and Conservation Act (42 U.S.C. 6241 (j)), the State of Hawaii, or a State-designated eligible entity authorized to act on the State's behalf, may submit a "binding offer" for the purchase of SPR petroleum. By submission of a binding offer, the State of Hawaii is entitled to purchase up to three percent of the quantity of SPR petroleum offered for sale or one-twelfth of the state's annual import quantity barrels. The price will be equal to the volumetrically weighted average price of the successful competitive offers for the applicable Master Line Item. Furthermore, at the request of the Hawaii or its designated eligible entity, the petroleum purchased will have first preference in its scheduling for delivery. The State of Hawaii may also enter into exchange or processing agreements to permit delivery of the purchased petroleum to other locations, if a petroleum product of similar value or quantity is delivered to the State.

B.8 Issuance of the Notice of Sale

In the event petroleum is sold from the SPR, DOE will issue a NS containing all the pertinent information necessary for the offeror to prepare a priced offer. A NS may be issued with a week or less allowed for the receipt of offers. Offerors are expected to examine the complete NS document, and to become familiar with the SSPs cited therein. Failure to do so will be at the offeror's risk.

B.9 Submission of Offers and Modification of Previously Submitted Offers

(a) Unless otherwise provided in the NS, offers must be submitted via SPR's on-line system and received no later than the date and time set for offer receipt as specified in the NS.

(b) Unless otherwise provided in the NS, offers may be modified or withdrawn on-line, provided that the modification or withdrawal is accomplished prior to the date and time specified for receipt of offers.

(c) An offeror may withdraw an offer by deleting the submission in accordance with the instructions provided for the SPR's on-line system.

(d) An offeror may modify a previously submitted offer by withdrawing the original offer (see (c) above) and resubmitting the replacement offer in its entirety no later than the date and time set for offer receipt.

(e) DOE will not release to the general public the identities of the offerors, or their offer quantities and prices, until the Apparently Successful Offerors have been determined. DOE will inform simultaneously all offerors and other interested parties of the successful and unsuccessful offerors and their offer data by means of a public "offer posting." The offer posting will normally occur within a week of receipt of offers and will provide all interested parties access to offer data as well as any DOE changes in the petroleum quantities or quality to be sold. DOE will announce the date, time, and location of the offer posting as soon as practicable.

B.10 Acknowledgment of Amendments to a Notice of Sale

When an amendment to a NS requires acknowledgment of issuance, it must be acknowledged by an offeror in accordance with instructions provided in the NS. Such acknowledgment must be received as part of a timely offer submission.

B.11 Late Offers, Modifications of Offers, and Withdrawal of Offers

(a) The date/time stamp affixed by the SPR's on-line system will be the sole determinant of timely offer receipt. Any offer received after the date and time specified in the NS for receipt will be considered only if

- (1) it is received before award is made; and
- (2) the Contracting Officer determines that the late receipt was due solely to a failure of the Government's electronic receiving equipment, or

(3) it is the only offer received.

(b) Any modification or withdrawal of an offer is subject to the same conditions as in (a) of this provision.

(c) Notwithstanding (a) and (b) of this provision, a late modification of an otherwise successful offer that makes its terms more favorable to the Government will be considered at any time it is received and may be accepted.

B.12 Offer Guarantee

(a) Each offeror must submit an acceptable offer guarantee for each offer submitted. Each offer guarantee must be received at the place specified in the NS no later than the date and time set for receipt of offers.

(b) An offeror's failure to submit a timely, acceptable guarantee will result in rejection

of its offer. A properly executed copy of the offer guarantee(s) may be faxed to the telephone numbers provided in the NS, with the original sent to the Contracting Officer as provided in paragraph (d) of this provision.

(c) The amount of each offer guarantee is \$10 million or 5 percent of the maximum potential contract amount, whichever is less. The maximum potential contract amount is the sum of the products determined by multiplying the offer's maximum purchase quantity for each master line item, times the highest offer prices that the offeror would have to pay for that master line item if the offer were to be successful. The SPR on-line system will perform this calculation automatically as offer information is entered.

(d) For each offer, an offeror must submit an irrevocable standby letter of credit from a U.S. depository institution containing the substantive provisions set out in *Exhibit C*, Offer Standby Letter of Credit, all letter of credit costs to be borne by the offeror. If the letter of credit contains any provisions at variance with *Exhibit C* or fails to include any provisions contained in *Exhibit C*, non-conforming provisions must be deleted and missing substantive provisions must be added or the letter of credit will not be accepted. The depository institution must be located in and authorized to do business in any state of the United States or the District of Columbia, and authorized to issue letters of credit by the banking laws of the United States or any state of the United States or the District of Columbia. The depository institution must be an account holder with the Federal Reserve Banking system and a participant (on line) in the Fed's Fedwire Deposit System Network funds transfer system. The original of the letter of credit must be sent to the Contracting Officer at the address specified in the NS. The issuing bank must provide documentation indicating that the person signing the letter of credit is authorized to do so, in the form of corporate minutes, the Authorized Signature List, or the General Resolution of Signature Authority.

(e) The envelope containing the original letter of credit shall clearly be marked "RE: NS # _____. OFFER STANDBY LETTER OF CREDIT (Name of Company)". Offerors are cautioned that if they provide more than one Offer Standby Letter of Credit for multiple offers and, due to the absence of clear information from the offeror, the Government is unable to identify which letter of credit applies to which offer, the Contracting Officer in his sole discretion may assign the letters of credit to specific offers.

(f) The offeror shall be liable for any amount lost by DOE due to the difference between the offer and the resale price, and for any additional resale costs incurred by DOE in the event that the offeror:

(1) withdraws its offer within 10 days following the time set for receipt of offers;

(2) withdraws its offer after having agreed to extend its acceptance period; or

(3) having received a notification of ASO, fails to furnish an acceptable payment and performance letter of credit (see Provision C.21) within the time limit specified by the Contracting Officer.

The offer guarantee shall be used toward offsetting such price difference or additional resale costs. Use of the offer guarantee for such recovery shall not preclude recovery by DOE of damages in excess of the amount of the offer guarantee caused by such failure of the offeror.

(g) Letters of credit furnished as offer guarantees must be valid for at least 60 calendar days after the date set for the receipt of offers.

(h) Offer guarantee letters of credit may be returned upon request to an unsuccessful offeror 5 business days after expiration of the offeror's acceptance period, and, except as provided in (i) of this provision, to a successful offeror upon receipt of a satisfactory payment and performance letter of credit.

(i) If an offeror defaults on its offer, DOE will hold the offer guarantee so that damages can be assessed against it.

B.13 Explanation Requests From Offerors

Offerors may request explanations regarding meaning or interpretation of the NS from the individual at the telephone number and/or e-mail address indicated in the NS. On complex and/or significant questions, DOE reserves the right to have the offeror put the question in writing; explanation or instructions regarding these questions will be given as an amendment to the NS.

B.14 Currency for Offers

Prices shall be stated and invoices shall be paid in U.S. dollars.

B.15 Language of Offers and Contracts

All offers in response to the NS and all modifications of offers shall be in English. All correspondence between offerors or purchasers and DOE shall be in English.

B.16 Proprietary Data

Offer quantities and prices are not considered proprietary information. If any other information submitted in connection with a sale is considered proprietary, that information shall be identified by e-mail to the address indicated in the NS, and an explanation provided as to the reason such data should be considered proprietary. Any final decision as to whether the material so identified is proprietary will be made by DOE. DOE's Freedom of Information Act regulations governing the release of proprietary data shall apply.

Department of Energy

Pt. 625, App. A

B.17 SPR Crude Oil Streams and Delivery Points

(a) The geographical locations of the terminals, pipelines, and docks interconnected with permanent SPR storage locations, the

SPR crude oil streams available at each location and the delivery points for those streams are as follows, (See also *Exhibit A*, SPR Crude Oil Comprehensive Analysis, and *Exhibit B*, SPR Delivery Point Data):

Geographical location	Delivery points	Crude oil stream
Freeport, Texas	Seaway Terminal or Seaway Pipeline Jones Creek.	SPR Bryan Mound Sweet, SPR Bryan Mound Sour
Texas City, Texas	Seaway Terminal or Local Pipelines	SPR Bryan Mound Sweet, SPR Bryan Mound Sour
Nederland, Texas	Sunoco Logistics Partners, Nederland Terminal.	SPR West Hackberry Sweet, SPR West Hackberry Sour, SPR Big Hill Sweet, SPR Big Hill Sour
Lake Charles, Louisiana	Shell 22-Inch/DOE Lake Charles Pipeline Connection.	SPR West Hackberry Sweet, SPR West Hackberry Sour
St. James, Louisiana	Shell Sugariand Terminal connected to LOCAP and Capline.	SPR Bayou Choctaw Sweet, SPR Bayou Choctaw Sour
Beaumont, Texas	Unocal Terminal	SPR Big Hill Sweet, SPR Big Hill Sour
Winnie, Texas	Shell 20-Inch Meter Station	SPR Big Hill Sweet, SPR Big Hill Sour

(b) The NS may change delivery points and it may also include additional crude oils, terminals, temporary storage facilities or systems utilized in connection with petroleum in transit to the SPR.

(c) The NS may contain additional information supplementing *Exhibit B*, SPR Delivery Point Data.

B.18 Notice of Sale Line Item Schedule—Petroleum Quantity, Quality, and Delivery Method

(a) Unless the NS provides otherwise, the possible master line items (MLI) that may be offered are as identified in Provision B.17. Currently, there are eight MLIs, one for each of the eight crude oil streams that the SPR has in storage. The NS may not offer all the possible MLIs.

(b) Each MLI contains multiple delivery line items (DLIs), each of which specifies an available delivery method and the nominal delivery period. Offerors are cautioned that the NS may alter the period of time covered by each DLI. The NS will specify which DLIs are offered for each MLI.

(1) DLI-A covers petroleum to be transported by pipeline, either common carrier or local. The nominal delivery period is one month.

(2) DLI-B covers petroleum to be transported by tankships. The nominal delivery period is one month.

(3) DLI-E covers petroleum to be transported by barges (Note: These DLIs are usually only applicable to deliveries of West Hackberry and Big Hill Sweet and Sour crude oil streams from Sun Docks). The nominal delivery period is one month.

(4) Where the storage site is connected to more than one terminal or pipeline, additional DLIs will be offered. The additional DLIs will include DLI-H, covering petroleum to be transported by pipeline over the period

of a month; DLI-I, covering tankships, etc. The Notice of Sale will specify any additional DLIs which may be applicable.

(c) The NS will state the total estimated number of barrels to be sold on each MLI. An offeror may offer to buy all or part of the petroleum offered on an MLI. In making awards, the Contracting Officer shall attempt to achieve award of the exact quantities offered by the NS, but may sell a quantity of petroleum in excess of the quantity offered for sale on a particular MLI in order to match the DLI offers received. In addition, the Contracting Officer may reduce the MLI quantity available for award by any amount and reject otherwise acceptable offers, if he determines, in his sole discretion after consideration of the offers received on all of the MLIs, that award of those quantities is not in the best interest of the Government because the prices offered for them are not reasonable, or that, in light of market conditions after offers are received, a lesser quantity than that offered should be sold.

(d) The NS will specify a minimum contract quantity for each DLI. To be responsive, an offer on a DLI must be for at least that quantity.

(e) The NS will specify the maximum quantity that could be sold on each of the DLIs. The maximum quantity is not an indication of the amount of petroleum that, in fact, will be sold on that DLI. Rather, it represents DOE's best estimate of the maximum amount of the particular SPR crude oil stream that can be moved by that transportation system over the delivery period. The total DOE estimated DLI maximums may exceed the total number of barrels to be sold on that MLI, as the NS DLI estimates represent estimated transportation capacity, not the amount of petroleum offered for sale.

(f) The NS will not specify what portion of the petroleum that DOE offers on a MLI will, in fact, be sold on any given DLI. Rather, the highest priced offers received on the MLI will determine the DLIs against which the offered petroleum is sold.

(g) DOE will not sell petroleum on a DLI in excess of the DLI maximum; however, DOE reserves the right to revise its estimates at any time and to award or modify contracts in accordance with its revised estimates. Offerors are cautioned that: DOE cannot guarantee that such transportation capacity is available; offerors should undertake their own analyses of available transportation capacity; and each purchaser is wholly responsible for arranging all transportation other than terminal arrangements at the terminals listed in Provision B.17, which shall be made in accordance with Provision C.5. A purchaser against one DLI cannot change a transportation mode without prior written permission from DOE, although such permission will be given whenever possible, in accordance with Provision C.6.

(h) *Exhibit A, SPR Crude Oil Comprehensive Analysis*, contains nominal characteristics for each SPR crude oil stream. Prospective offerors are cautioned that these data may change with SPR inventory changes. The NS will provide, to the maximum extent practicable, the latest data on each stream offered.

B.19 Line Item Information To Be Provided in the Offer

(a) Each offeror, if determined to be an ASO on a DLI, agrees to enter into a contract under the terms of its offer for the purchase of petroleum in the offer and to take delivery of that petroleum (plus or minus 10 percent as provided for in Provision C.20) in accordance with the terms of that contract.

(b) An offeror may submit an offer for any or all the MLIs offered by the NS. However, offerors are cautioned that alternate offers on different MLIs are not permitted. For example, an offeror may offer to purchase 1,000,000 barrels of SPR West Hackberry Sweet and 1,000,000 barrels of SPR West Hackberry Sour, but may not offer to purchase, in the alternative, either 1,000,000 barrels of sweet or 1,000,000 barrels of sour.

(c) An offeror may submit multiple offers. However, separate on-line offers and offer guarantees must be submitted and each offer will be evaluated on an individual basis.

(d) The following information will be provided to DOE by the offeror on the SPR on-line offer form:

(1) Maximum MLI Quantity. The offer shall state the maximum quantity of each crude oil stream that the offeror is willing to buy.

(2) Desired Qty. The offer shall state the number of barrels that the offeror will accept on each DLI, *i.e.*, by the delivery mode and during the delivery period specified. The

quantity stated on a single DLI shall not exceed the Maximum MLI Quantity for the MLI. The offeror shall designate a quantity on at least one DLI for the MLI, but may designate quantities on more than one DLI. If the offeror is willing to accept alternate DLIs, the total of its desired DLI quantities would exceed its Maximum MLI quantity; otherwise, the total of its desired DLI quantities should equal its Maximum MLI quantity.

(3) Price. The offer shall state the price per barrel for each DLI for which the offeror has designated a Desired Qty. Where offers have indicated quantities on more than one DLI with a different price on each, DOE will award the highest priced DLI first. If the offeror has the same price for two or more DLIs, it may indicate its first choice, second choice, etc., for award of those items; if the offeror does not indicate a preference, or indicates the same preference for more than one DLI, DOE may select the DLIs to be awarded at its discretion. Prices may be stated in hundredths of a cent (\$0.0001). DOE shall drop from the offer and not consider any numbers of less than one one-hundredth of a cent.

(4) Accept Minimum Quantity. The offeror must choose whether to accept only the Desired Qty (by deselecting the Accept Min Qty checkbox to indicate an unwillingness to accept less than the Desired Qty for that DLI) or, in the alternative, to accept any quantity awarded between the offer's Desired Qty and the minimum contract quantity for the DLI (by leaving the Accept Min Qty checkbox selected). However, DOE will award less than the Desired Qty only if the quantity available to be awarded is less than the Desired Qty.

B.20 Mistake in Offer

(a) After receiving offers, the Contracting Officer shall examine all offers for mistakes. If the Contracting Officer discovers any quantity discrepancies, he may obtain from the offeror oral or written verification of the offer actually intended, but in any event, he shall proceed with offer evaluation applying the following procedures:

(1) In case of conflict between the maximum MLI quantity and the stated DLI quantities (for example, if a single stated DLI quantity exceeds the corresponding maximum MLI quantity), the lesser quantity will govern in the evaluation of the offer.

(2) In the event that the offer fails to specify a maximum MLI quantity, the offer will be evaluated as though the largest stated DLI quantity is the offer's maximum MLI quantity.

(b) In cases where the Contracting Officer has reason to believe a mistake not covered by the procedures set forth in paragraph (a) may have been made, he shall request from the offeror a verification of the offer, calling

attention to the suspected mistake. The Contracting Officer may telephone the offeror and confirm the request by electronic means. The Contracting Officer may set a limit of as little as 6 hours for telephone response, with any required written documentation to be received within 2 business days. If no response is received, the Contracting Officer may determine that no error exists and proceed with offer evaluation.

(c) The Head of the Contracting Activity will make administrative determinations described in paragraphs (c)(1) and (c)(2) of this provision if an offeror alleges a mistake after receipt of offers and before award.

(1) The Head of the Contracting Activity may refuse to permit the offeror to withdraw an offer, but permit correction of the offer if clear and convincing evidence establishes both the existence of a mistake and the offer actually intended. However, if such correction would result in displacing one or more higher acceptable offers, the Head of the Contracting Activity shall not so determine unless the existence of the mistake and the offer actually intended are ascertainable substantially from the NS and offer itself.

(2) The Head of the Contracting Activity may determine that an offeror shall be permitted to withdraw an offer in whole, or in part if only part of the offer is affected, without penalty under the offer guarantee, where the offeror requests permission to do so and clear and convincing evidence establishes the existence of a mistake, but not the offer actually intended.

(d) In all cases where the offeror is allowed to make verbal corrections to the original offer, confirmation of these corrections must be received in writing within the time set by the Contracting Officer or the original offer will stand as submitted.

B.21 Evaluation of Offers

(a) The Contracting Officer will be the determining official as to whether an offer is responsive to the SSPs and the NS. DOE reserves the right to reject any or all offers and to waive minor informalities or irregularities in offers received.

(b) A minor informality or irregularity in an offer is an inconsequential defect the waiver or correction of which would not be prejudicial to other offerors. Such a defect or variation from the strict requirements of the NS is inconsequential when its significance as to price, quantity, quality or delivery is negligible.

B.22 Procedures for Evaluation of Offers

(a) Award on each DLI will be made to the responsible offerors that submit the highest priced offers responsive to the SSPs and the NS and that have provided the required payment and performance guarantee as required by Provision C.21.

(b) DOE will array all offers on an MLI from highest price to lowest price for award evaluation regardless of DLI. However, DOE will award against the DLIs and will not award a greater quantity on a DLI than DOE's estimate (which is subject to change at any time) of the maximum quantity that can be moved by the delivery method. Selection of the apparently successful offers involves the following steps:

(1) Any offers below the minimum acceptable price, if any minimum price has been established for the sale, will be rejected as nonresponsive.

(2) All offers on each MLI will be arrayed from highest price to lowest price.

(3) (i) Offers may be rejected if they are below 95 percent of the sales price, as estimated by the Government, of comparable crude oil being sold in the same area at the same time. In making the sales price estimate, the Government will consider both the "Base Reference Price" as defined in the Notice of Sale and other available information bearing on the issue.

(ii) For price offers at or above 95 percent of the sales price estimate, the Contracting Officer will determine price reasonableness, considering offers received and prevailing market conditions.

(iii) Price offers below 95 percent may be accepted only if the Contracting Officer determines such action is necessary to achieve SPR crude oil supply objectives and such offered prices are reasonable.

(4) The highest priced offers will be reviewed for responsiveness to the NS.

(5) In the event the highest priced offer does not take all the petroleum available on the MLI, sequentially, the next highest priced offer will be selected until all of the petroleum offered on the MLI is awarded or there are no more acceptable offers. In the event that acceptance of an offer against an MLI or a DLI would result in the sale of more petroleum on an MLI than DOE has offered or the sale of more petroleum on a DLI than DOE estimates can be delivered by the specified delivery method, DOE will not award the full amount of the offer, but rather the remaining MLI quantity or DLI capacity, provided such portion exceeds DOE's minimum contract quantity. In the event that the quantity remaining is less than the offeror is willing to accept, but more than DOE's minimum contract quantity, the Contracting Officer shall proceed to the next highest priced offer.

(6) In the event of tied offers and an insufficient remaining quantity available on the MLI or insufficient remaining capacity on the DLI to fully award all tied offers, the Contracting Officer shall apply an objective random methodology for allocating the remaining MLI quantity or DLI capacity among the tied offers, taking into consideration the quantity the offeror is willing to

accept as indicated in its offer. When making this allocation, the Contracting Officer in his sole discretion may do one or more of the following:

- (i) Make an additional quantity or capacity available;
- (ii) Contact an offeror to determine whether alternative delivery arrangements can be made; or
- (iii) Not award all or part of the remaining quantity of petroleum.

(7) The Contracting Officer may reduce the MLI quantity available for award by any amount and reject otherwise acceptable offers if in his sole discretion he determines, after consideration of the offers received on all of the MLIs, that award of those quantities is not in the best interest of the Government because the prices offered for them are not reasonable; or if the Government determines, in light of market conditions after offers are received, to sell less than the overall quantity of SPR petroleum offered for sale.

(8) Determinations of ASO responsibility will be made by the Contracting Officer before each award. All ASOs will be notified and advised to provide to the Contracting Officer within five business days a letter of credit (*See Exhibit D, Payment and Performance Letter of Credit*) as specified in Provision C.21, all letter of credit costs to be borne by the purchaser.

(9) Compliance with required payment and performance guarantees will effectively assure a finding of responsibility of offerors, except where:

- (i) An offeror is on either DOE's or the Federal Government's list of debarred, ineligible and suspended bidders; or
- (ii) Evidence, with respect to an offeror, comes to the attention of the Contracting Officer of conduct or activity that represents a violation of law or regulation (including an Executive Order); or
- (iii) Evidence is brought to the attention of the Contracting Officer of past activity or conduct of an offeror that shows a lack of integrity (including actions inimical to the welfare of the United States) or willingness to perform, so as to substantially diminish the Contracting Officer's confidence in the offeror's performance under the proposed contract.

B.23 Financial Statements and Other Information

(a) As indicated in Provision B.22(b)(9), compliance with the required payment and performance guarantee will in most instances effectively assure a finding of responsibility. Therefore, DOE does not intend to ask for financial information from all offerors. However, after receipt of offers, but prior to making award, DOE reserves the right to ask for the audited financial statements for an offeror's most recent fiscal year

and unaudited financial statements for any subsequent quarters. These financial statements must include a balance sheet and profit and loss statement for each period covered thereby. A certification by a principal accounting officer that there have been no material changes in financial condition since the date of the audited statements, and that these present the true financial condition as of the date of the offer, shall accompany the statements. If there has been a change, the amount and nature of the change must be specified and explained in the unaudited statements and a principal accounting officer shall certify that they are accurate. The Contracting Officer shall set a deadline for receipt of this information.

(b) DOE also reserves the right to require the submission of information from the offeror regarding its plans for use of the petroleum, the status of requests for export licenses, plans for complying with the Jones Act, and any other information relevant to the performance of the contract. The Contracting Officer shall set a deadline for receipt of this information.

B.24 Resolicitation Procedures on Unsold Petroleum

(a) In the event that petroleum offered on an MLI remains unsold after evaluation of all offers, the Contracting Officer, at his option, may issue an amendment to the NS, resoliciting offers from all interested parties. DOE reserves the right to alter the MLIs and/or offer different MLIs in the resolicitation.

(b) In the event that for any reason petroleum that has been awarded or allotted for award becomes available to DOE for resale, the following procedures will apply:

- (1) If priced offers remain valid in accordance with Provision B.25, the petroleum may go to the next highest ranked offer.
- (2) If offers have expired in accordance with Provision B.25, the Contracting Officer at his option may offer the petroleum to the highest offeror for that MLI. The pertinent offeror may, at its option, accept or reject that petroleum at the price it originally offered. If that offeror rejects the petroleum, it may be offered to the next highest offeror. This process may continue until all the remaining petroleum has been allotted for award.

(3) If the petroleum is not then resold, the Contracting Officer may at his option proceed to amend the NS to resolicit offers for that petroleum or add the petroleum to the next sales cycle.

B.25 Offeror's Certification of Acceptance Period

(a) By submission of an offer, the offeror certifies that its priced offer will remain valid for 10 calendar days after the date set

for the receipt of offers, and further that the successful line items of its offer will remain valid for an additional 30 calendar days should it receive a notification of ASO either by telephone or in writing during the initial 10-day period.

(b) By mutual agreement of DOE and the offeror, an individual offeror's acceptance period may be extended for a longer period.

B.26 Notification of Apparently Successful Offeror

The following information concerning its offer will be provided to the apparently successful offeror by DOE in the notification of ASO:

- (a) Identification of SPR crude oil streams to be awarded;
- (b) Total quantity to be awarded on each MLI and on each DLI;
- (c) Price in U.S. dollars per barrel for each DLI;
- (d) Extended total price offer for each DLI;
- (e) Provisional contract number;
- (f) Any other data necessary.

B.27 Contract Documents

If an offeror is successful, DOE will make award using an NA signed by the Contracting Officer. The NA will identify the items, quantities, prices and delivery method which DOE is accepting. The NS will be attached to the NA. Provisions of the SSPs will be made applicable through incorporation by reference in the NS. DOE may accept the offeror's offer by an electronic notice and the contract award shall be effective upon issuance of such notice. The electronic notice will be followed by a mailing of full documentation as described in Provision B.26.

B.28 [Reserved]

B.29 Procedures for Selling to Other U.S. Government Agencies

(a) If a U.S. Government agency submits an offer for petroleum in a price competitive sale, that offer will be arrayed for award consideration in accordance with Provision B.22. If a U.S. Government agency is an ASO, award and payment will be made exclusively in accordance with statutory and regulatory requirements governing transactions between agencies, and the U.S. Government agency will be responsible for complying with these requirements within the time limits set by the Contracting Officer.

(b) U.S. Government agencies are exempt from all guarantee requirements, but must make all necessary arrangements to accept delivery of and transport SPR petroleum as set out in Provision C.1. Failure by a U.S. Government agency to comply with any of the requirements of these SSPs shall not provide a basis for challenging a contract award to that agency.

SECTION C—SALES CONTRACT PROVISIONS

C.1 Delivery of SPR Petroleum

(a) The purchaser, at its expense, shall make all necessary arrangements to accept delivery of and transport the SPR petroleum, except for terminal arrangements which shall be coordinated with the SPR/PMO. The DOE will deliver and the purchaser will accept the petroleum at delivery points listed in the NS. The purchaser also shall be responsible for meeting any delivery requirements imposed at those points including complying with the rules, regulations, and procedures contained in applicable port/terminal manuals, pipeline tariffs or other applicable documents.

(b) For petroleum in the SPR's permanent storage sites, DOE shall provide, at no cost to the purchaser, transportation by pipeline from the SPR to the supporting SPR distribution terminal facility specified for the MLI and, for vessel loadings, a safe berth and loading facilities sufficient to deliver petroleum to the vessel's permanent hose connection. The purchaser agrees to assume responsibility for, to pay for, and to indemnify and hold DOE harmless for any other costs associated with terminal, port, vessel and pipeline services necessary to receive and transport the petroleum, including but not limited to demurrage charges assessed by the terminal, ballast and oily waste reception services, mooring and line-handling services, tank storage charges and port charges incurred in the delivery of SPR petroleum to the purchaser. The purchaser also agrees to assume responsibility for, to pay for and to indemnify and hold DOE harmless for any liability, including consequential or other damages, incurred or occasioned by the purchaser, its agent, subcontractor at any tier, assignee or any subsequent purchaser, in connection with movement of petroleum sold under a contract incorporating this provision.

C.2 Compliance With the "Jones Act" and the U.S. Export Control Laws

Failure to comply with the "Jones Act," 46 U.S.C. 883, regarding use of U.S.-flag vessels in the transportation of oil between points within the United States, and with any applicable U.S. export control laws affecting the export of SPR petroleum will be considered to be a failure to comply with the terms of any contract containing these SSPs and may result in termination for default in accordance with Provision C.25. Purchasers who have failed to comply with the "Jones Act" or the export control laws in SPR sales may be found to be non-responsible in the evaluation of offers in subsequent sales under Provision B.22 of the SSPs. Those purchasers may also be subject to proceedings

to make them ineligible for future awards in accordance with 10 CFR Part 625.

C.3 [Reserved]

C.4 Environmental Compliance

(a) SPR offerors must ensure that vessels used to transport SPR oil comply with all applicable statutes, including, among others, the Ports and Waterways Safety Act of 1972; the Port and Tanker Safety Act of 1978; the Act to Prevent Pollution from Ships of 1980 (implementing Annexes I, II, and V of MARPOL 73/78), and the Oil Pollution Act of 1990. Offerors also must ensure that vessels used to transport SPR oil comply with all applicable regulations, including 33 CFR parts 151, 153, 155, 157, 159, and 160–169, and 46 CFR chapter I, subchapter D.

(b) To transport SPR oil, a purchaser or the purchaser's subcontractors must use only those tank vessels for which the vessel's owner, operator, or demise charter has made a showing of financial responsibility under 33 CFR part 138, *Financial Responsibility for Water Pollution (Vessels)*.

(c) Failure of the purchaser or purchaser's subcontractor to comply with all applicable statutes and regulations in the transportation of SPR petroleum will be considered a failure to comply with the terms of any contract containing these SSPs, and may result in termination for default, unless, in accordance with Provision C.25, such failure was beyond the control and without the fault or negligence of the purchaser, its affiliates, or subcontractors.

C.5 Delivery and Transportation Scheduling

(a) Unless otherwise instructed in the notification of ASO, each purchaser shall submit a proposed vessel lifting program and/or pipeline delivery schedule to the SPR/PMO point of contact identified in the NS, no later than the fifteenth day prior to the earliest delivery date offered by the NS. The vessel lifting program shall specify the requested three-day loading window for each tanker and the quantity to be lifted. The pipeline schedule will specify the five day shipment ranges (*i.e.*, day 1–5, 6–10, 11–15, etc.) for which deliveries are to be tendered to the pipeline and the quantity to be tendered for each date. In the event conflicting requests are received, preference will be given to such requests in descending order, the highest offered price first. The SPR/PMO will respond to each purchaser no later than the tenth day prior to the start of deliveries, either confirming the schedule as originally submitted or proposing alterations. The purchaser shall be deemed to have agreed to those alterations unless the purchaser requests the SPR/PMO to reconsider within two days after receipt of such alterations. The SPR/PMO will use its best efforts to accommodate such requests, but its decision

following any such reconsideration shall be final and binding.

(b) In order to expedite the scheduling process, at the time of submission of each vessel lifting program or pipeline delivery schedule, each purchaser shall provide the DOE Contracting Officer's Representative with a written notice of the intended destination for each cargo scheduled, if such destination is known at that time. For pipeline deliveries, the purchaser shall also include, if known, the name of each pipeline in the routing to the final destination.

(c) Notwithstanding paragraph (a) of this provision, ASOs and purchasers may request early deliveries, *i.e.*, deliveries commencing prior to the contractual delivery period. DOE will use its best efforts to honor such requests, unless unacceptable costs might be incurred or SPR schedules might be adversely affected or other circumstances make it unreasonable to honor such requests. DOE's decision following any such consideration for a change shall be final and binding. Requests accepted by DOE will be handled on a first-come, first-served basis, except that where conflicting requests are received on the same day, the highest-priced offer will be given preference. Requests that include both a change in delivery method and an early delivery date may also be accommodated subject to Provision C.6. DOE may not be able to confirm requests for early deliveries until 24 hours prior to the delivery date.

(d) Notwithstanding paragraphs (a) and (c) of this provision, in no event will schedules be confirmed prior to award of contracts.

C.6 Contract Modification—Alternate Delivery Line Items

(a) A purchaser may request a change in delivery method after the issuance of the NA. Such requests may be made either orally (to be confirmed in writing within 24 hours) or in writing, but will require written modification of the contract by the Contracting Officer. Such modification shall be permitted by DOE, provided, in the sole judgment of DOE, the change is viewed as reasonable and would not interfere with the delivery plans of other purchasers, and further provided that the purchaser agrees to pay all increased costs incurred by DOE because of such modification.

(b) Changes in delivery method will only be considered after the initial confirmation of schedules described in Provision C.5(a).

C.7 Application Procedures for "Jones Act" and Construction Differential Subsidy Waivers

(a) Unless otherwise specified in the Notice of Sale, an ASO or purchaser seeking a waiver of the "Jones Act" should submit a request by letter or electronic means to: U.S. Bureau of Customs and Border Protection,

Department of Energy

Pt. 625, App. A

Office of Regulations and Rulings, Chief, Entry Procedures and Carriers Branch, Washington, DC 20229, Telephone: (202) 572-8724.

(b) A purchaser seeking a waiver to use a vessel built with a Construction Differential Subsidy should have the vessel owner submit a waiver request by letter or electronic means to: Associate Administrator for Ship Financial Assistance and Cargo Preference, Maritime Administration, U.S. Department of Transportation, 400 7th Street, SW., Washington, DC 20590.

For speed and brevity, the request may incorporate by reference appropriate contents of any earlier "Jones Act" waiver request by the purchaser. Under 46 U.S.C. App. 1223, a hearing is also required for any intervenor, and a waiver may not be approved if it will result in unfair competition to any person, firm, or corporation operating exclusively in the coastwise or intercoastal service.

(c) Copies of the Jones Act or CDS waiver requests should also be sent, as appropriate, to:

(1) Associate Administrator for Port, Intermodal and Environmental Activities, Maritime Administration, U.S. Department of Transportation, 400 7th Street, SW., Washington, DC 20590.

(2) U.S. Department of Energy, ATTN: Deputy Assistant Secretary for Petroleum Reserves, FE-40, 1000 Independence Avenue, SW., Washington, DC 20585.

(3) Contracting Officer, FE-4451, Strategic Petroleum Reserve Project Management Office, Acquisition and Sales Division, 900 Commerce Road East, New Orleans, LA 70123.

(d) In addition to the addresses in paragraph (c), copies of the "Jones Act" request should also be sent to: Office of the Under Secretary of Defense (Acquisition, Technology and Logistics), U.S. Department of Defense, Washington, DC 20301-3020.

(e) Any request for waiver should include the following information:

(1) Name, address and telephone number of requestor;

(2) Purpose for which waiver is sought, *e.g.*, to take delivery of so many barrels of SPR crude oil, with reference to the SPR NS number and the provisional or assigned contract number;

(3) Name and flag of registry of vessel for which waiver is sought, if known at the time of waiver request, and the scheduled 3-day delivery window(s), if available, or delivery period applicable to the contract;

(4) The intended number of voyages, including the ports for loading and discharging;

(5) Estimated period of time for which vessel will be employed; and

(6) Reason for not using qualified U.S.-flag vessel, including documentary evidence of good faith effort to obtain suitable U.S.-flag vessel and responses received from that ef-

fort. Such evidence would include copies of correspondence and telephone conversation summaries. Requests for waivers by electronic transmittals may reference such documentary evidence, with copies to be provided by mail, postmarked no more than one business day after the transmission requesting the waiver.

(7) For waivers to use Construction Differential Subsidy vessels, the request must also contain a specific agreement for Construction Differential Subsidies payback pursuant to section 506 of the Merchant Marine Act of 1936 and must be signed by an official of the vessel owner authorized to make a payback commitment.

(f) If there are shown to be "Jones Act" vessels available and in a position to meet the loading dates required, no waivers may be approved.

(g) The names of any vessel(s) to be employed under a "Jones Act" waiver must be provided to the U.S. Bureau of Customs and Border Protection no later than 3 days prior to the beginning of the 3-day loading window scheduled in accordance with Provision C.5.

C.8 Vessel Loading Procedures

(a) After notification of ASO, each ASO shall provide the SPR/PMO a proposed schedule of vessel loading windows in accordance with Provision C.5.

(b) The length of the scheduled loading window shall be 3 days. If the purchaser schedules more than one window, the average quantity to be lifted during any single loading window will be no less than DOE's minimum lot quantity.

(c) Tankships, ITBs, and self-propelled barges shall be capable of sustaining a minimum average load rate commensurate with receiving an entire full cargo within twenty-four (24) hours pumping time. Barges with a load rate of not less than 4,000 BPH shall be permitted at the Sun Terminal barge docks. With the consent of the SPR/PMO, lower loading rates and the use of barges at suitably equipped tankship docks at other terminals supporting the SPR may be permitted if such do not interfere with DOE's obligations to other parties.

(d) At least 7 days in advance of the beginning of the scheduled loading window, the purchaser shall furnish the SPR/PMO with vessel nominations specifying:

(i) Name and size of vessel or advice that the vessel is "To Be Nominated" at a later date (such date to be no later than 3 days before commencement of the loading window);

(ii) Estimated date of arrival (to be narrowed to a firm date not later than 72 hours prior to the first day of the vessel's 3-day window, as provided in paragraph (f) of this provision);

(iii) Quantity to be loaded and contract number; and

(iv) Other relevant information requested by the SPR/PMO including but not limited to ship's specifications, last three ports and cargoes, vessel owner/operator and flag, any known deficiencies, and on board quantities of cargo and slops.

DOE will advise the purchaser, in writing, of the acceptance or rejection of the nominated vessel within 24 hours of such nomination. If no advice is furnished within 24 hours, the nomination will be firm. Once established, changes in such nomination details may be made only by mutual agreement of the parties, to be confirmed by DOE in writing. The purchaser shall be entitled to substitute another vessel of similar size for any vessel so nominated, subject to DOE's approval. DOE must be given at least 3 days' notice prior to the first day of the 3-day loading window of any such substitution. DOE shall make a reasonable effort to accept any nomination for which notice has not been given in strict accordance with this provision.

(e) In the event the purchaser intends to use more than one vessel to take delivery of the contract quantity scheduled to be delivered during a loading window, the information in paragraphs (d) and (f) of this provision shall be provided for each vessel.

(f) The vessel or purchaser shall notify the SPR/PMO of the expected day of arrival 72 hours before the beginning of his scheduled 3-day loading window. This notice establishes the firm agreed-upon date of arrival which is the 1-day window for the purposes of vessel demurrage (see Provision C.9). If the purchaser fails to make notification of the expected day of arrival, the 1-day window will be deemed to be the middle day of the scheduled 3-day window. The vessel shall also notify the SPR/PMO of the expected hour of arrival 72, 48 and 24 hours in advance of arrival, and after the first notice, to advise of any variation of more than 4 hours. With the first notification of the hour of arrival, the Master shall advise the SPR/PMO:

- (i) Cargo loading rate requested;
- (ii) Number, size, and material of vessel's manifold connections; and
- (iii) Defects in vessel or equipment affecting performance or maneuverability.

(g) Notice of Readiness shall be tendered upon arrival at berth or at customary anchorage which is deemed to be any anchorage within 6 hours vessel time to the SPR dock. The preferred anchorages are identified in *Exhibit B*. The Notice of Readiness shall be confirmed promptly in writing to the SPR/PMO and the terminal responsible for coordination of crude oil loading operations. Such notice shall be effective only if given during customary port operating hours. If notice is given after customary business hours of the port, it shall be effective as of the beginning of customary business hours on the next business day.

(h) DOE shall use its best efforts to berth the purchaser's vessel as soon as possible after receipt of the Notice of Readiness.

(i) Standard hose and fittings (American Standard Association standard connections) for loading shall be provided by DOE. Purchasers must arrange for line handling, deballasting, tug boat and pilot services, both for arrival and departure, through the terminal or ship's agent, and bear all costs associated with such services.

(j) Tankships, ITBs, and self-propelled barges shall be allowed berth time of 36 hours. Barges shall be allowed berth time of three (3) hours plus the quotient determined by dividing the cargo size (gross standard volume barrels) by four thousand (4,000). Vessels loading cargo quantities in excess of 500,000 barrels shall be allowed berth time of 36 hours plus 1 hour for each 20,000 barrels to be loaded in excess of 500,000 barrels. Conditions of this provision excepted, however, the vessel shall not remain at berth more than 6 hours after completion of cargo loading unless hampered by tide or weather.

(1) Berth time shall commence with the vessel's first line ashore and shall continue until loading of the vessel, or vessels in case more than one vessel is loaded, is completed and the last line is off. In addition, allowable berth time will be increased by the amount of any delay occurring subsequent to the commencement of berth time and resulting from causes due to adverse weather, labor disputes, force majeure and the like, decisions made by port authorities affecting loading operations, actions of DOE, its contractors and agents resulting in delay of loading operations (providing this action does not arise through the fault of the purchaser or purchaser's agent), and customs and immigration clearance. The time required by the vessel to discharge oily wastes or to moor multiple vessels sequentially into berth shall count as used berth time.

(2) For all hours of berth time used by the vessel in excess of allowable berth time as provided for in this provision, the purchaser shall be liable for dock demurrage and also shall be subject to the conditions of Provision C.11.

C.9 Vessel Laytime and Demurrage

(a) The laytime allowed DOE for handling of the purchaser's vessel shall be 36 running hours. For vessels with cargo quantities in excess of 500,000 barrels, laytime shall be 36 running hours plus 1 hour for each 20,000 barrels of cargo to be loaded in excess of 500,000 barrels. Vessel laytime shall commence when the vessel is moored alongside (all fast) the loading berth or 6 hours after receipt of a Notice of Readiness, whichever occurs first. It shall continue 24 hours per day, seven days per week without interruption from its commencement until loading of the

vessel is completed and cargo hoses or loading arms are disconnected. Any delay to the vessel in reaching berth caused by the fault or negligence of the vessel or purchaser, delay due to breakdown or inability of the vessel's facilities to load, decisions made by vessel owners or operators or by port authorities affecting loading operations, discharge of ballast or slops, customs and immigration clearance, weather, labor disputes, force majeure and the like shall not count as used laytime. In addition, movement in roads shall not count as used laytime.

(b) If the vessel is tendered for loading on a date earlier than the firm agreed-upon arrival date, established in accordance with Provision C.8, and other vessels are loading or have already been scheduled for loading prior to the purchaser's vessel, the purchaser's vessel shall await its turn and vessel laytime shall not commence until the vessel moors alongside (all fast), or at 0600 hours local time on the firm agreed-upon date of arrival, whichever occurs first. If the vessel is tendered for loading later than 2400 hours on the firm agreed-upon date of arrival, DOE will use its best efforts to have the vessel loaded as soon as possible in its proper turn with other scheduled vessels, under the circumstances prevailing at the time. In such instances, vessel laytime shall commence when the vessel moors alongside (all fast).

(c) For all hours or any part thereof of vessel laytime that elapse in excess of the allowed vessel laytime for loading provided for in this provision, demurrage shall be paid by DOE, for U.S.-flag vessels, at the lesser of the demurrage rate in the tanker voyage or charter party agreement, or the most recently available United States Freight Rate Average (USFRA) for a hypothetical tanker with a deadweight in long tons equal to the weight in long tons of the petroleum loaded, multiplied by the most recent edition of the American Tanker Rate Schedule rate for such hypothetical tanker and voyage. For foreign flag vessels, demurrage shall be as determined in this provision, except that the London Tanker Brokers' Panel Average Freight Rate Assessment (AFRA) and most recent edition of the New Worldwide Tanker Nominal Freight Scale "Worldscale" shall be used as appropriate, if less than the charter party rate. For all foreign flag vessel loadings that commence during a particular calendar month, the applicable AFRA shall be the one that is determined on the basis of freight assessments for the period ended on the 15th day of the preceding month. The demurrage rate for barges will be the lesser of the hourly rate contained in the charter of a chartered barge, or a rate determined by DOE as a fair rate under prevailing conditions. If demurrage is incurred because of breakdown of machinery or equipment of DOE or its contractors (other than the purchaser), the rate of demurrage shall be re-

duced to one-half the rate stipulated herein per running hour and pro rata of such reduced rate for part of an hour for demurrage so incurred. Demurrage payable by DOE, however, shall in no event exceed the actual demurrage expense incurred by the purchaser as the result of the delay.

(d) In the event the purchaser is using more than one vessel to load the contract quantity scheduled to be delivered during a single loading window, the terms of this provision and the Government's liability for demurrage apply only to the first vessel presenting its Notice of Readiness in accordance with (a) of this provision.

(e) The primary source document and official record for demurrage calculations is the SPRCODR (see Provision C.19).

C.10 Vessel Loading Expedition Options

(a) Notwithstanding Provision C.8(j)(1), in order to avoid disruption in the SPR distribution process, the Government may limit berthing time for any vessel receiving SPR petroleum to that period required for loading operations and the physical berthing/unberthing of the vessel. At the direction of the Government, activities not associated with the physical loading of the vessel (*e.g.*, preparing documentation, gauging, sampling, etc.) may be required to be accomplished away from the berth. Time consumed by these activities will not be for the Government's account. If berthing time is to be restricted, the Government will so advise the vessel prior to berthing of the vessel.

(b) In addition to paragraph (a) of this provision, the Government may limit vessels calling at SPR terminals to a total of 24 hours for petroleum transfer operations. In such an event, the loading will be considered completed if the vessel has loaded 95 percent or more of the nominated quantity within a total of 24 hours. If the vessel has loaded less than 95 percent of its nominated quantity, then Provision C.11 shall apply.

C.11 Purchaser Liability for Excessive Berth Time

The Government reserves the right to direct a vessel loading SPR petroleum at a delivery point specified in the NS, to vacate its SPR berth, and absorb all costs associated with this movement, should such vessel, through its operational inability to receive oil at the average rates provided for in Provision C.8, cause the berth to be unavailable for an already scheduled follow-on vessel. Furthermore, should a breakdown of the vessel's propulsion system prevent its getting under way on its own power, the Government may cause the vessel to be removed from the berth with all costs to be borne by the purchaser.

C.12 Pipeline Delivery Procedures

(a) The purchaser shall nominate his delivery requirements to the pipeline carrier, to include the total quantity to be moved and his preferred five-day shipment range(s) as specified in C.5. The purchaser shall provide confirmation of the carrier's acceptance of the nominated quantity (in thousands of barrels per day) and shipment ranges to the SPR/PMO no later than the last day of the month preceding the month of delivery. The purchaser shall also furnish the SPR/PMO with the name, telephone number, and e-mail address of the pipeline point of contact with whom the SPR/PMO should coordinate the delivery.

(b) The SPR/PMO will ensure oil is made available to the carrier within the shipment date range(s) established in accordance with Provision C.5. Once established, the pipeline delivery schedule can only be changed with SPR/PMO's prior written consent. Should the schedule established in accordance with (a) of this provision vary from the original schedule established in accordance with Provision C.5, the Government will provide its best efforts to accommodate this revised schedule but will incur no liability for failure to provide delivery on the dates requested.

(c) Three days prior to the beginning of any five-day shipping range in which the purchaser is to receive delivery, the purchaser shall furnish the SPR/PMO the firm date within that range on which the movement is to commence, the quantity to be moved, and the contract number.

(d) The date of delivery, which will be recorded on the CODR (see Provision C.19), is the date delivery commenced to the custody transfer point, as identified in the NS.

(e) The purchaser shall receive pipeline deliveries at a minimum average rate of 100,000 barrels per day. The purchaser is solely responsible for making the necessary arrangements with pipeline carriers, including storage, to achieve the stated minimum.

C.13 Title and Risk of Loss

Unless otherwise provided in the NS, title to and risk of loss for SPR petroleum will pass to the purchaser at the delivery point as follows:

(a) For vessel shipment—when the petroleum passes from the dock loading equipment connections to the vessel's permanent hose connection.

(b) For pipeline shipment—as identified in the NS.

C.14 Acceptance of Crude Oil

(a) When practical, the NS shall update the SPR crude oil stream characteristics shown in *Exhibit A*, SPR Crude Oil Comprehensive Analysis. However, the purchaser shall accept the crude oil delivered regardless of

characteristics. Except as provided in this provision, DOE assumes no responsibility for deviations in quality.

(b) In the event that the crude oil stream delivered both has a total sulfur content (by weight) in excess of 2.0 percent if a sour crude oil stream, or 0.50 percent if a sweet crude oil stream, and, in addition, has an API gravity less than 28°API if a sour crude oil stream, or 32°API if a sweet crude oil stream, the purchaser shall accept the crude oil delivered and either pay the contract price adjusted in accordance with Provision C.16, or request negotiation of the contract price. Unless the purchaser submits a written request for negotiation of the contract price to the Contracting Officer within 10 days from the date of invoice, the purchaser shall be deemed to have accepted the adjustment of the price in accordance with Provision C.16. Should the purchaser request a negotiation of the price and the parties be unable to agree as to that price, the dispute shall be settled in accordance with Provision C.32.

C.15 Delivery Acceptance and Verification

(a) The purchaser shall provide written confirmation to SPR/PMO, no later than 72 hours prior to the scheduled date of the first delivery under the contract, the name(s) of the authorized agent(s) given signature authority to sign/endorse the delivery documentation (CODR, etc.) on the purchaser's behalf. Any changes to this listing of names must be provided to the SPR/PMO in writing no later than 72 hours before the first delivery to which such change applies. In the event that an independent surveyor (separate from the authorized signatory agent) is appointed by the purchaser to witness the delivery operation (gauging, sampling, testing, etc.), written notification must be provided to SPR/PMO, no later than 72 hours prior to the scheduled date of each applicable cargo delivery.

(b) Absence of the provision of the name(s) of bona fide agent(s) and the signature of such agent on the delivery documentation constitutes acceptance of the delivery quantity and quality as determined by DOE and/or its agents.

C.16 Price Adjustments for Quality Differentials

(a) The NS will specify quality price adjustments applicable to the crude oil streams offered for sale. Unless otherwise specified by the NS, quality price adjustments will be applied only to the amount of variation by which the API gravity of the crude oil delivered differs by more than plus or minus five-tenths of one degree API ($\pm 0.5^\circ$ API) from the API gravity of the crude oil stream contracted for as published in the NS.

Department of Energy

Pt. 625, App. A

(b) Price adjustments for SPR crude oil are expected to be similar to one or more commercial crude oil postings for equivalent quality crude oil. The contract price per barrel shall be increased by that amount if the API gravity of the crude oil delivered exceeds the published API gravity by more than 0.5°API and decreased by that amount if the API gravity of the crude oil delivered falls below the published API gravity by more than 0.5°API.

C.17 Determination of Quality

(a) The quality of the crude oil delivered to the purchaser will be determined from samples taken from the delivery tanks in accordance with API Manual of Petroleum Measurement Standards, Chapter 8.1, Manual Sampling of Petroleum and Petroleum Products (ASTM D4057), latest edition; or from a representative sample collected by an automatic sampler whose performance has been proven in accordance with the API Manual of Petroleum Measurement Standards, Chapter 8.2, Automatic Sampling of Petroleum and Petroleum Products (ASTM D4177), latest edition. Preference will be given to samples collected by means of an automatic sampler when such a system is available and operational. Tests to be performed by DOE or its authorized contractor are:

(1) Sediment and Water

Primary methods: API Manual of Petroleum Measurement Standards, Chapter 10.1, Determination of Sediment in Crude Oils and Fuel Oils by the Extraction Method (ASTM D473) (IP53), latest edition; or API Manual of Petroleum Measurement Standards, Chapter 10.8, Sediment in Crude Oil by Membrane Filtration (ASTM D4807), latest edition; and API Manual of Petroleum Measurement Standards, Chapter 10.2, Determination of Water in Crude Oil by Distillation (ASTM D4006) (IP358), latest edition; or API Manual of Petroleum Measurement Standards, Chapter 10.9, Water in Crude Oil by Coulometric Karl Fischer Titration (ASTM D4928) (IP 386), latest edition.

Alternate methods: API Manual of Petroleum Measurement Standards, Chapter 10.3, Determination of Water and Sediment in Crude Oil by the Centrifuge Method (Laboratory Procedure) (ASTM D4007) (IP 359), latest edition.

(2) Sulfur

Primary method: ASTM D4294, Sulfur in Petroleum Products by Energy-Dispersive X-ray Fluorescence Spectrometry, latest edition.

Alternate method: ASTM D2622, Sulfur in Petroleum Products by Wavelength Dispersive X-ray Fluorescence Spectrometry.

(3) API Gravity

Primary methods: API Manual of Petroleum Measurement Standards, Chapter 9.1, Density, Relative Density (Specific Gravity), or API Gravity of Crude Petroleum and Liquid Petroleum Products by Hydrometer Method (ASTM D1298) (IP 160), latest edition; or Density and Relative Density of Crude Oils by Digital Density Analyzer (ASTM D5002), latest edition.

Alternate method: API Gravity of Crude Petroleum and Petroleum Products (Hydrometer Method) (ASTM D287), latest edition.

To the maximum extent practicable, the primary methods will be used for determination of SPR crude oil quality characteristics. However, because of conditions prevailing at the time of delivery, it may be necessary to use alternate methods of test for one or more of the quality characteristics. The Government's test results will be binding in any dispute over quality characteristics of SPR petroleum.

(b) The purchaser or his representative may arrange to witness and verify testing simultaneously with the U.S. government representative. Such services, however, will be for the account of the purchaser. Any disputes will be settled in accordance with Provision C.32. Should the purchaser opt not to witness the testing, then the Government findings will be binding on the purchaser.

C.18 Determination of Quality

(a) The quantity of crude oil delivered to the purchaser will be determined by opening and closing tank gauges with adjustment for opening and closing free water and sediment and water as determined from shore tank samples where an automatic sampler is not available, or delivery meter reports. All volumetric measurements will be corrected to net standard volume in barrels at 60 °F, using the API Manual of Petroleum Measurement Standards, Chapter 11.1, Volume 1, Volume Correction Factors (ASTM D1250) (IP 200); Table 5A—Generalized Crude Oils, Correction of Observed API Gravity to API Gravity at 60 °F; Table 6A—Generalized Crude Oils, Correction of Volume to 60 °F Against API Gravity at 60 °F, latest edition, and by deducting the tanks' free water, and the entrained sediment and water as determined by the testing of composite all-levels samples taken from the delivery tanks; or by deducting the sediment and water as determined by testing a representative portion of the sample collected by a certified automatic sampler, and also corrected by the applicable pressure correction factor and meter factor.

(b) The quantity measurements shall be performed and certified by the DOE contractor responsible for delivery operations,

and witnessed by the U.S. government representative at the delivery point. The purchaser shall have the right to have representatives present at the gauging/metering, sampling, and testing. Should the purchaser arrange for additional inspection services, such services will be for the account of the purchaser. Any disputes shall be settled in accordance with Provision C.32. Should the purchaser not arrange for additional services, then DOE's quantity determination shall be binding on the purchaser.

C.19 Delivery Documentation

The quantity and quality determination shall be documented on the SPR/PMO Crude Oil Delivery Report (SPRCODR), SPRPMO-F-6110.2-14b (Rev 8/91) (see *Exhibit E* for copy of this form). The SPRCODR will be signed by the purchaser's agent to acknowledge receipt of the quantity and quality of crude oil indicated. In addition, for vessel deliveries, the time statement on the SPRCODR will be signed by the vessel's Master when loading is complete. Copies of the completed SPRCODR, with applicable supporting documentation (i.e., metering or tank gauging tickets and appropriate calculation worksheets), will be furnished to the purchaser and/or the purchaser's authorized representative after completion of delivery. They will serve as the basis for invoicing and/or reconciliation invoicing for the sale of petroleum as well as for any associated services that may be provided.

C.20 Contract Amounts

The contract quantities and dollar value stated in the NA are estimates. The per barrel unit price is subject to adjustment due to variation in the API gravity from the published characteristics, changes in delivery mode and price index values, if applicable. In addition, due to conditions of vessel loading and shipping or pipeline transmission, the quantity actually delivered may vary by ± 10 percent for each shipment. However, a purchaser is not required to engage additional transportation capacity if sufficient capacity to take delivery of at least 90 percent of the contract quantity has been engaged.

C.21 Payment and Performance Letter of Credit

(a) Within five business days of receipt of notification of Apparently Successful Offeror, the Purchaser must provide to the Contracting Officer an "Irrevocable Standby Letter of Credit" established in favor of the United States Department of Energy equal to 100 percent of the contract awarded value and containing the substantive provisions set out in *Exhibit D*. The purchaser must furnish an acceptable letter of credit before DOE will execute the NA. The letter of credit MUST NOT VARY IN SUBSTANCE from the

sample at *Exhibit D*. If the letter of credit contains any provisions at variance with *Exhibit D* or fails to include any provisions contained in *Exhibit D*, nonconforming provisions must be deleted and missing substantive provisions must be added or the letter of credit will not be accepted. The letter of credit must be effective on or before the first delivery under the contract and remain in effect for a period of 120 days, must permit multiple partial drawings, and must contain the contract number. The original of the letter of credit must be sent to the Contracting Officer.

(b) The letter of credit must be issued by a depository institution located in and authorized to do business in any state of the United States or the District of Columbia, and authorized to issue letters of credit by the banking laws of the United States or any state of the United States or the District of Columbia. The depository institution must be an account holder with the Federal Reserve Banking system and a participant (online) in the Fed's Fedwire Deposit System Network funds transfer system. The issuing bank must provide documentation indicating that the person signing the letter of credit is authorized to do so, in the form of corporate minutes, the Authorized Signature List, or the General Resolution of Signature Authority.

(c) All letter of credit costs will be borne by the purchaser.

(d) The letter of credit must be maintained at 100 percent of the contract value of the petroleum remaining to be delivered as well as delivered quantities for which payment has not been remitted, plus any other charges owed to the Government under the contract. In the event the letter of credit falls below the level specified, or at the discretion of the Contracting Officer must be increased because of the effect of the price indexing mechanism provided for in Provision B.2, DOE reserves the right to demand the purchaser modify the letter of credit to a level deemed sufficient by the Contracting Officer. The purchaser shall make such modification within two business days of being notified by the Contracting Officer by express mail or electronic means. The purchaser is deemed to have received such notification the next business day after its dispatch. If such modification is not made within two days after purchaser is deemed to have received the notice, the Contracting Officer may, on the 3rd business day, without prior notice to the purchaser, withhold deliveries in whole or in part under the contract and/or terminate the contract in whole or in part under Provision C.25.

(e) Within 30 calendar days after final payment under the contract, the Contracting Officer shall authorize the cancellation of the letter of credit and shall return it to the

Department of Energy

Pt. 625, App. A

bank or financial institution issuing the letter of credit. A copy of the notice of cancellation will be provided to the purchaser.

C.22 Billing and Payment

(a) The Government will invoice the Purchaser at the conclusion of each delivery.

(b) Payment is due in full on the 20th of the month following each delivery month. Should the 20th of the month fall on a Saturday, Sunday, or Federal holiday, payment will be due and payable in full on the last business day preceding the 20th of the month.

(c) If an invoice is not paid in full, the Government may provide the Purchaser oral or written notification that Purchaser is delinquent in its payments; draw against the letter of credit for all quantities for which unpaid invoices are outstanding; withhold all or any part of future deliveries under the contract; and/or terminate the contract, in whole or in part, in accordance with Provision C.25.

(d) In the event that the bank refuses to honor the draft against the letter of credit, the purchaser shall be responsible for paying the principal and any interest due (see Provision C.24) from the due date.

C.23 Method of Payments

(a) All amounts payable by the purchaser shall be paid by either:

(1) Deposit to the account of the U.S. Treasury by wire transfer of funds over the Fedwire Deposit System Network. The information to be included in each wire transfer will be provided in the NS.

(2) Electronic funds transfer through the Automated Clearing House (ACH) network, using the Federal Remittance Express Program. The information to be included in each transfer will be provided in the NS.

All wire deposit electronic funds transfer costs will be borne by the purchaser.

(b) If the purchaser disagrees with the amounts invoiced by the Government, the purchaser shall immediately pay the amount invoiced, and notify the Contracting Officer of the basis for its disagreement. The Contracting Officer will receive and act upon any such objection. Failure to agree to any adjustment shall be a dispute, and a purchaser shall file a claim promptly in accordance with Provision C.32.

(c) DOE may designate another place, different timing, or another method of payment after reasonable written notice to the purchaser.

(d) Notwithstanding any other contract provision, DOE may via a draft message request a wire transfer of funds against the standby letter of credit at any time for payment of monies due under the contract and remaining unpaid in violation of the terms of the contract. These would include but not be

limited to interest, liquidated damages, demurrage, amounts owing for any services provided under the contract, and the difference between the contract price and price received on the resale of undelivered petroleum as defined in Provision C.25. If the invoice is for delinquent payments, interest shall accrue from the payment due date.

(e) No payment due DOE hereunder shall be subject to reduction or set-off for any claim of any kind against the United States arising independently of the contract.

C.24 Interest

(a) Amounts due and payable by the purchaser or its bank that are not paid in accordance with the provisions governing such payments shall bear interest from the date due until the date payment is received by the Government.

(b) Interest shall be computed on a daily basis. The interest rate shall be in accordance with the Current Value of Funds rate as established by the Department of the Treasury in accordance with the Debt Collection Improvement Act of 1997 and published periodically in Bulletins to the Treasury Fiscal Requirements Manual and in the FEDERAL REGISTER.

C.25 Termination

(a) Immediate termination.

(1) The Contracting Officer may terminate this contract in whole or in part, without liability of DOE, by written notice to the purchaser effective upon its being deposited in the U.S. Postal System addressed to the purchaser as provided in Provision C.31 in the event that the purchaser either notifies the Contracting Officer that it will not be able to accept, or fails to accept, any delivery line item in accordance with the terms of the contract. Such notice shall invite the purchaser to submit information to the Contracting Officer as to the reasons for the failure to accept the delivery line item in accordance with the terms of the contract.

(2) Within 10 business days after the issuance of the notice of termination, the Contracting Officer may determine that such termination was a termination for default under paragraph (b)(1)(ii) of this provision. In the absence of information which persuades the Contracting Officer that the purchaser's failure to accept the delivery line item was excusable, the fact of such failure may be the basis for the Contracting Officer determining the purchaser to be in default, without first determining under paragraphs (b)(2) and (b)(3) whether such failure was excusable under the terms of the contract. The Contracting Officer shall promptly give the purchaser written notice of such determination.

(3) Any immediate termination other than one determined to be a termination for default in accordance with paragraph (a)(2) and paragraph (b) of this provision shall be a termination for the convenience of DOE without liability of the Government.

(b) Termination for Default.

(1) Subject to the provisions of paragraphs (b)(2) and (b)(3), the Contracting Officer may terminate the contract in whole or in part for purchaser default, without liability of DOE, by written notice to the purchaser, effective upon its being deposited in the U.S. Postal System, addressed to the purchaser as provided in Provision C.31 in the event that:

(i) The Government does not receive payment in accordance with any payment provision of the contract;

(ii) The purchaser fails to accept delivery of petroleum in accordance with the terms of the contract; or

(iii) The purchaser fails to comply with any other term or condition of the contract within 5 business days after the purchaser is deemed to have received written notice of such failure from the Contracting Officer.

(2) Except with respect to defaults of subcontractors, the purchaser shall not be determined to be in default or be charged with any liability to DOE under circumstances which prevent the purchaser's acceptance of delivery hereunder due to causes beyond the control and without the fault or negligence of the purchaser as determined by the Contracting Officer. Such causes shall include but are not limited to:

(i) Acts of God or the public enemy;

(ii) Acts of the Government acting in its sovereign or contractual capacity;

(iii) Fires, floods, earthquakes, explosions, unusually severe weather, or other catastrophes; or

(iv) Strikes.

(3) If the failure to perform is caused by the default of a subcontractor, the purchaser shall not be determined to be in default or to be liable for any excess costs for failure to perform, unless the supplies or services to be furnished by the subcontractor were obtainable from other sources in sufficient time to permit the purchaser to meet the delivery schedule, if:

(i) Such default arises out of causes beyond the control of the purchaser and its subcontractor, and without the fault or negligence of either of them; or

(ii) Such default arises out of causes within the control of a transportation subcontractor, not an affiliate of the purchaser, hired to transport the purchaser's petroleum by vessel or pipeline, and such causes are beyond the purchaser's control, without the fault or negligence of the purchaser, and notwithstanding the best efforts of the purchaser to avoid default.

(4) In the event that the contract is terminated in whole or in part for default, the purchaser shall be liable to DOE for:

(i) The difference between the contract price on the contract termination date and any lesser price the Contracting Officer obtained upon resale of the petroleum; and

(ii) Liquidated damages as specified in Provision C.27 as fixed, agreed, liquidated damages for each day of delay until the petroleum is delivered to a purchaser under either a resolicitation for the sale of the quantities of oil defaulted on, or an NS issued after the date of default that specifies that it is for the sale of quantities of oil defaulted on. In no event shall liquidated damages be assessed for more than 30 days.

(5) In the event that the Government exercises its right of termination for default, and it is later determined that the purchaser's failure to perform was excused in accordance with paragraphs (2) and (3), the rights and obligations of the parties shall be the same as if such termination was a termination for convenience without liability of the Government under paragraph (c).

(c) Termination for convenience.

(1) In addition to any other right or remedy provided for in the contract, the Government may terminate this contract at any time in whole or in part whenever the Contracting Officer shall determine that such termination is in the best interest of the Government. Such termination shall be without liability of the Government if such termination arises out of causes specified in paragraphs (a)(1) or (b)(1) of this provision, acts of the Government in its sovereign capacity, or causes beyond the control and without the fault or negligence of the Government, its contractors (other than the purchaser of SPR crude oil under this contract) and agents. For any other termination for convenience, the Government shall be liable for such reasonable costs incurred by the purchaser in preparing to perform the contract, but under no circumstances shall the Government be liable for consequential damages or lost profits as the result of such termination.

(2) The purchaser will be given immediate written notice of any decrease of petroleum deliveries greater than 10 percent, or of termination, under this paragraph (c). The termination or reduction shall be effective upon its notice being deposited in the U.S. Postal System unless otherwise specified in the notice. The purchaser is deemed to have received a mailed notice on the second day after its dispatch and an electronic or express mail notice on the day after dispatch.

(3) Termination for the convenience of the Government shall not excuse the purchaser from liquidated damages accruing prior to the effective date of the termination.

(d) Nothing herein contained shall limit the Government in the enforcement of any

legal or equitable remedy that it might otherwise have, and a waiver of any particular cause for termination shall not prevent termination for the same cause occurring at any other time or for any other cause.

(e) In the event that the Government exercises its right of termination, as provided in paragraphs (a), (b), or (c)(1) of this provision, the Contracting Officer may sell any undelivered petroleum under such terms and conditions as he deems appropriate.

(f) DOE's ability to deliver petroleum on the date on which the defaulted purchaser was scheduled to accept delivery, under another contract awarded prior to the date of the contractor's default, shall not excuse a purchaser that has been terminated for default from either liquidated damages or the difference between the contract price and any lesser price obtained on resale.

(g) Any disagreement with respect to the amount due the Government for either resale costs or liquidated damages shall be deemed to be a dispute and will be decided by the Contracting Officer pursuant to Provision C.32.

(h) The term "subcontractor" or "subcontractors" includes subcontractors at any tier.

C.26 Other Government Remedies

(a) The Government's rights under this provision are in addition to any other right or remedy available to it by law or by virtue of this contract.

(b) The Government may, without liability on its part, withhold deliveries of petroleum under this contract or any other contract the purchaser may have with DOE if payment is not made in accordance with this contract.

(c) If the purchaser fails to take delivery of petroleum in accordance with the delivery schedule developed under the terms of the contract, and such tardiness is not excused under the terms of Provision C.25, but the Government does not elect to terminate that item for default, the purchaser nonetheless shall be liable to the Government for liquidated damages in the amount established by Provision C.27 for each calendar day of delay or fraction thereof until such time as it accepts delivery of the petroleum. In no event shall such damages be assessed for longer than 30 days. No purchaser that fails to perform in accordance with the terms of the contract shall be excused from liability for liquidated damages by virtue of the fact that DOE is able to deliver petroleum on the date on which the non-performing purchaser was scheduled to accept delivery, under another contract awarded prior to the date of default.

C.27 Liquidated Damages

(a) In case of failure on the part of the purchaser to perform within the time fixed in the contract or any extension thereof, the purchaser shall pay to the Government liquidated damages in the amount of 1 percent of the contract price of the undelivered petroleum per calendar day of delay or fraction thereof in accordance with Provision C.25(b) and Provision C.26(c).

(b) As provided in (a) of this provision, liquidated damages will be assessed for each day or fraction thereof a purchaser is late in accepting delivery of petroleum in accordance with this contract, unless such tardiness is excused under Provision C.25. For petroleum to be lifted by vessel, damages will be assessed in the event that the vessel has not commenced loading by 11:59 p.m. on the second day following the last day of the 3-day delivery window established under Provision C.5, unless the vessel has arrived in roads and its Master has presented a notice of readiness to the Government or its agents. Liquidated damages shall continue until the vessel presents its notice of readiness. For petroleum to be moved by pipeline, if delivery arrangements have not been made by the last day of the month prior to delivery, liquidated damages shall commence on the 3rd day of the delivery month until such delivery arrangements are completed; if delivery arrangements have been made, then liquidated damages shall begin on the 3rd day after the scheduled delivery date if delivery is not commenced and shall continue until delivery is commenced.

(c) Any disagreement with respect to the amount of liquidated damages due the Government will be deemed to be a dispute and will be decided by the Contracting Officer pursuant to Provision C.32.

C.28 Failure To Perform Under SPR Contracts

In addition to the usual debarment procedures, 10 CFR 625.3 provides procedures to make purchasers that fail to perform in accordance with these provisions ineligible for future SPR contracts.

C.29 Government Options in Case of Impossibility of Performance

(a) In the event that DOE is unable to deliver petroleum contracted for to the purchaser due either to events beyond the control of the Government, including actions of the purchaser, or to acts of the Government, its agents, its contractors or subcontractors at any tier, the Government at its option may do either of the following:

- (1) Terminate for the convenience of the Government under Provision C.25; or
- (2) Offer different SPR crude oil streams or delivery times to the purchaser in substitution for those specified in the contract.

(b) In the event that a different SPR crude oil stream than originally contracted for is offered to the purchaser, the contract price will be negotiated between the parties. In no event shall the negotiated price be less than the minimum acceptable price established for the same or similar crude oil streams at the time of contract award.

(c) DOE's obligation in such circumstances is to use its best efforts, and DOE under no circumstances shall be liable to the purchaser for damages arising from DOE's failure to offer alternate SPR crude oil streams or delivery times.

(d) If the parties are unable to reach agreement as to price, crude oil streams or delivery times, DOE may terminate the contract for the convenience of the Government under Provision C.25.

C.30 Limitation of Government liability

DOE's obligation under these SSPs and any resultant contract is to use its best efforts to perform in accordance therewith. The Government under no circumstances shall be liable thereunder to the purchaser for the conduct of the Government's contractors or subcontractors or for indirect, consequential, or special damages arising from its conduct, except as provided herein; neither shall the Government be liable thereunder to the purchaser for any damages due in whole or in part to causes beyond the control and without the fault or negligence of the Government, including but not restricted to, acts of God or public enemy, acts of the Government acting in its sovereign capacity, fires, floods, earthquakes, explosions, unusually severe weather, other catastrophes, or strikes.

C.31 Notices

(a) Any notices required to be given by one party to the contract to the other in writing shall be forwarded to the addressee, prepaid, by U.S. registered, return receipt requested mail, express mail, or electronic means as provided in the NS. Parties shall give each other written notice of address changes.

(b) Notices to the purchaser shall be forwarded to the purchaser's address as it appears in the offer and in the contract.

(c) Notices to the Contracting Officer shall be forwarded to the following address: U.S. Department of Energy, Strategic Petroleum Reserve, Project Management Office, Acquisition and Sales Division, Mail Stop FE-4451, 900 Commerce Road East, New Orleans, Louisiana 70123.

C.32 Disputes

(a) This contract is subject to the Contract Disputes Act of 1978 (41 U.S.C. 601 *et seq.*). If a dispute arises relating to the contract, the purchaser may submit a claim to the Contracting Officer, who shall issue a written

decision on the dispute in the manner specified in 48 CFR 1–33.211.

(b) "Claim" means:

(1) A written request submitted to the Contracting Officer;

(2) For payment of money, adjustment of contract terms, or other relief;

(3) Which is in dispute or remains unresolved after a reasonable time for its review and disposition by the Government; and

(4) For which a Contracting Officer's decision is demanded.

(c) In the case of dispute requests or amendments to such requests for payment exceeding \$50,000, the purchaser shall certify at the time of submission as a claim, as follows:

I certify that the claim is made in good faith, that the supporting data are current, accurate and complete to the best of my knowledge and belief and that the amount requested accurately reflects the contract adjustment for which the purchaser believes the Government is liable.

Purchaser's Name

Signature

Title

(d) The Government shall pay to the purchaser interest on the amount found due to the purchaser on claims submitted under this provision at the rate established by the Department of the Treasury from the date the amount is due until the Government makes payment. The Contract Disputes Act of 1978 and the Prompt Payment Act adopt the interest rate established by the Secretary of the Treasury under the Renegotiation Act as the basis for computing interest on money owed by the Government. This rate is published semi-annually in the FEDERAL REGISTER.

(e) The purchaser shall pay to DOE interest on the amount found due to the Government and unpaid on claims submitted under this provision at the rate specified in Provision C.24 from the date the amount is due until the purchaser makes payment.

(f) The decision of the Contracting Officer shall be final and conclusive and shall not be subject to review by any forum, tribunal, or Government agency unless an appeal or action is commenced within the times specified by the Contract Disputes Act of 1978.

(g) The purchaser shall comply with any decision of the Contracting Officer and at the direction of the Contracting Officer shall proceed diligently with performance of this contract pending final resolution of any request for relief, claim, appeal, or action related to this contract.

C.33 Assignment

The purchaser shall not make or attempt to make any assignment of a contract that incorporates these SSPs or any interest therein contrary to the provisions of Federal

Department of Energy

Pt. 625, App. A

law, including the Anti-Assignment Act (41 U.S.C. 15), which provides:

No contract or order, or any interest therein, shall be transferred by the party to whom such contract or order is given to any other party, and any such transfer shall cause the annulment of the contract or order transferred, so far as the United States is concerned. All rights of action, however, for any breach of such contract by the contracting parties, are reserved to the United States.

C.34 Order of Precedence

In the event of an inconsistency between the terms of the various parts of this contract, the inconsistency shall be resolved by giving precedence in the following order:

- (a) The NA and written modifications thereto;
- (b) The NS;
- (c) Those provisions of the SSPs made applicable to the contract by the NS;
- (d) Instructions provided in the Crude Oil Sales Offer Program; and
- (e) The successful offer.

C.35 Gratuities

(a) The Government, by written notice to the purchaser, may terminate the right of the purchaser to proceed under this contract if it is found, after notice and hearing, by the Secretary of Energy or his duly authorized representative, that gratuities (in the form of entertainment, gifts, or otherwise) were offered by or given by the purchaser, or any agent or representative of the purchaser, to any officer or employee of the Government with a view toward securing a contract or securing favorable treatment with respect to the awarding, amending, or making of any determinations with respect to the performing of such contract; provided, that the existence of the facts upon which the Secretary of Energy or his duly authorized representative makes such findings shall be in issue and may be reviewed in any competent court.

(b) In the event that this contract is terminated as provided in paragraph (a) hereof, the Government shall be entitled (1) to pursue the same remedies against the purchaser as it could pursue in the event of a breach of the contract by purchaser, and (2) as a penalty in addition to any other damages to which it may be entitled by law, to exemplary damages in an amount (as determined by the Secretary of Energy or his duly authorized representative) which shall not be less than three nor more than 10 times the cost incurred by the purchaser in providing any such gratuities to any such officer or employee.

(c) The rights and remedies of the Government provided in this clause shall not be exclusive and are in addition to any other

rights and remedies provided by law or under this contract.

EXHIBIT B—SPR DELIVERY POINT DATA

SEAWAY FREEPORT TERMINAL

(Formerly Phillips Terminal)

LOCATION: Brazoria County, Texas (three miles southwest of Freeport, Texas on the Old Brazos River, four miles from the sea buoy)

CRUDE OIL STREAMS: Bryan Mound Sweet and Bryan Mound Sour.

DELIVERY POINTS: Seaway Terminal marine dock facility number 2.

MARINE DOCK FACILITIES AND VESSEL RESTRICTIONS:

TANKSHIP DOCKS: 2 Docks: Nos. 2 and 3.

MAXIMUM LENGTH

OVERALL (LOA): Docks 2 and 3—820 feet (up to 900 feet with pilot approval) during daylight and 615 feet during hours of darkness.

MAXIMUM BEAM: Docks 2 and 3—145 feet.

MAXIMUM DRAFT: Docks 2 and 3—42 feet salt water; subject to change due to weather and silting conditions.

MAXIMUM AIR DRAFT: None.

MAXIMUM DEADWEIGHT TONS (DWT): Dock Nos. 2 and 3 can accommodate up to 120,000 DWT if they meet other port restrictions. Maximum DWT is theoretical berth handling capability; however, purchasers are cautioned that varying harbor and channel physical constraints are the controlling factors as to vessel size, and they are responsible for confirming that proposed vessels can be accommodated.

BARGE LOADING CAPABILITY: None.

OILY WASTE RECEPTION FACILITIES: Facilities are available for oily bilge water and sludge wastes. Purchasers are responsible for making arrangements with the terminal and for bearing costs associated with such arrangements.

CUSTOMARY ANCHORAGE: Freeport Harbor sea-buoy approximately 4.5 miles from the terminal.

SEAWAY TEXAS CITY TERMINAL (Formerly ARCO Texas City)

LOCATION: Docks 11 and 12, Texas City Harbor, Galveston County, Texas.

CRUDE OIL STREAMS: Bryan Mound Sweet and Bryan Mound Sour.

DELIVERY POINTS: Marine Docks (11 and 12) and connections to local commercial pipelines.

MARINE DOCK FACILITIES AND VESSEL RESTRICTIONS:

TANKSHIP DOCKS: 2 Docks: Nos. 11 and 12.

MAXIMUM LENGTH

OVERALL (LOA): 1,020 feet. Maximum bow to manifold centerline distance is 468 feet.

MAXIMUM BEAM: Dock 11—180 feet; Dock 12—220 feet.

MAXIMUM DRAFT: 39.5 feet brackish water; subject to change due to weather and silting conditions.

MAXIMUM AIR DRAFT: None.

MAXIMUM DEADWEIGHT TONS (DWT): 150,000 DWT each. Terminal permission is required for less than 30,000 DWT or greater than 150,000 DWT. Vessels larger than 120,000 DWT are restricted to daylight transit. Purchasers are cautioned that varying harbor and channel physical constraints are the controlling factors as to vessel size, and they are responsible for confirming that proposed vessels can be accommodated.

BARGE LOADING CAPABILITY: None.

OILY WASTE RECEPTION FACILITIES: Facilities are available for oily bilge water and sludge wastes. Purchasers are responsible for making arrangements with the terminal and for bearing all costs associated with such arrangements.

CUSTOMARY ANCHORAGE: Bolivar Roads (breakwater) or Galveston sea-buoy.

SUNOCO LOGISTICS TERMINAL

LOCATION: Nederland, Texas (on the Neches River at Smiths Bluff in southwest Texas, 47.6 nautical miles from the bar).

CRUDE OIL STREAMS: West Hackberry Sweet and West Hackberry Sour.

DELIVERY POINTS: Sun Terminal marine dock facility and Sun Terminal connections to local commercial pipelines.

MARINE DOCK FACILITIES AND VESSEL RESTRICTIONS:

TANKSHIP DOCKS: 5 Docks: Nos. 1, 2, 3, 4 and 5.

MAXIMUM LENGTH

OVERALL (LOA): 1000 feet.

MAXIMUM BEAM: 150 feet.

MAXIMUM DRAFT: 40 feet fresh water.

MAXIMUM AIR DRAFT: 136 feet.

MAXIMUM DEADWEIGHT TONS (DWT): Maximum DWT at Dock No. 1 is 85,000 DWT. Dock Nos. 2, 3, 4 and 5 can accommodate up to 150,000 DWT. Vessels larger than 85,000 DWT, 875 feet LOA, or 125 feet beam are restricted to daylight transit. Maximum DWT is theoretical berth handling capability; however, purchasers are cautioned that varying harbor and channel physical constraints

are the controlling factors as to vessel size, and they are responsible for confirming that proposed vessels can be accommodated.

BARGE LOADING CAPABILITY: 3 Barge Docks: A, B and C. Each is capable of handling barges up to 25,000 barrels capacity.

OILY WASTE RECEPTION FACILITIES: Facilities are available for oily bilge water and sludge wastes. Purchasers are responsible for making arrangements with the terminal and for bearing costs associated with such arrangements.

CUSTOMARY ANCHORAGE: South of Sabine Bar-Buoy. There is an additional anchorage at the Sabine Bar for vessels with draft of 39 feet or less.

SHELL 22-INCH/DOE LAKE CHARLES PIPELINE CONNECTION

LOCATION: Lake Charles Upper Junction, located in Section 36, Township 10 South, Range 10 West, Calcasieu Parish, (Lake Charles) Louisiana.

CRUDE OIL STREAMS: West Hackberry Sweet and West Hackberry Sour.

DELIVERY POINT: Shell 22-Inch/DOE Lake Charles Pipeline Connection.

MARINE DISTRIBUTION

FACILITIES: None.

SHELL SUGARLAND TERMINAL

LOCATION: St. James Parish, Louisiana (30 miles southwest of Baton Rouge on the west bank of the Mississippi River at mile-marker 158.3).

CRUDE OIL STREAMS: Bayou Choctaw Sweet and Bayou Choctaw Sour.

DELIVERY POINTS: Sugarland Terminal marine dock facility and LOCAP and Capline Terminals (connections to Capline interstate pipeline system and local commercial pipelines).

MARINE DOCK FACILITIES AND VESSEL RESTRICTIONS:

TANKSHIP DOCKS: 2 Docks: Nos. 1 and 2.

MAXIMUM LENGTH

OVERALL (LOA): 940 feet.

MAXIMUM BEAM: None.

MAXIMUM DRAFT: 45 feet fresh water.

MAXIMUM AIR DRAFT: 153 feet less the river stage.

MAXIMUM DEADWEIGHT TONS (DWT): 100,000 DWT. Maximum DWT is theoretical berth handling capability; however, purchasers are cautioned that varying harbor and channel physical constraints are the controlling factors as to vessel size, and they are responsible for confirming that proposed vessels can be accommodated.

BARGE LOADING CAPABILITY: Dock 1.

OILY WASTE RECEPTION FACILITIES: Facilities are available for oily bilge water and sludge wastes. Purchasers are responsible for making arrangements and for bearing all

Department of Energy

Pt. 625, App. A

costs associated with such arrangements. Terminal can provide suitable contacts.

CUSTOMARY ANCHORAGE: Grandview Reach approximately 11 miles from the terminal.

UNOCAL BEAUMONT TERMINAL

LOCATION: Beaumont Terminal, located downstream south bank of the Neches River, approximately 8 miles SE of Beaumont, Texas.

CRUDE OIL STREAMS: Big Hill Sweet and Big Hill Sour.

DELIVERY POINTS: Unocal Beaumont Terminal No. 2 Crude Dock and connections to local commercial pipelines.

MARINE DOCK FACILITIES AND VESSEL RESTRICTIONS:

TANKSHIP DOCKS: 1 Dock (No. 2).

MAXIMUM LENGTH

OVERALL (LOA): 1,020 feet.

MAXIMUM BEAM: 150 feet.

MAXIMUM DRAFT: 40 feet fresh water.

MAXIMUM AIR DRAFT: 136 feet.

MAXIMUM DEADWEIGHT TONS (DWT): Maximum DWT at Dock No. 2 is 150,000 DWT. Vessels larger than 85,000 DWT, 875 feet LOA, or 125 feet beam are restricted to daylight transit. Maximum DWT is theoretical berth handling capability; however, purchasers are cautioned that varying harbor and channel physical constraints are the controlling factors as to vessel size and they are responsible for confirming that proposed vessels can be accommodated.

BARGE LOADING CAPABILITY: None.

OILY WASTE RECEPTION FACILITIES: Facilities are available for oily bilge water and sludge wastes. Purchasers are responsible for making arrangements with the terminal and for bearing costs associated with such arrangements.

CUSTOMARY ANCHORAGE: South of Sabine Bar-Buoy. There is an additional anchorage at the Sabine Bar for vessels with draft of 39 feet or less.

SHELL 20-INCH PIPELINE (SPL)

LOCATION: Jefferson County, Texas, Seven miles west and one mile north of FM 365 and Old West Port Arthur Road.

CRUDE OIL STREAMS: Big Hill Sweet and Big Hill Sour.

DELIVERY POINT: SPL East Houston Terminal, Exxon Junction (Channelview), Oil Tanking Junction.

MARINE DISTRIBUTION FACILITIES: None.

SAMPLE—OFFER GUARANTEE STANDBY LETTER OF CREDIT

BANK LETTERHEAD

IRREVOCABLE STANDBY LETTER OF CREDIT

Date: _____

To: Acquisition and Sales Division, Mail Stop FE-4451, Strategic Petroleum Reserve, Project Management Office, U.S. Department of Energy, 900 Commerce Road East, New Orleans, LA 70123

AMOUNT OF LETTER OF CREDIT: _____

U.S. \$ (_____)

CONTRACTOR: _____

NOTICE OF SALE NO: _____

LETTER OF CREDIT NO: _____

EXPIRATION DATE: _____

AMERICAN BANKERS ASSOCIATION

(ABA) NO: _____

Gentlemen:

We hereby establish in the U.S. Department of Energy's favor our irrevocable standby Letter of Credit effective immediately for the account of our customer in response to the above U.S. Department of Energy's Notice of Sale, including any amendments thereto, for the sale of Strategic Petroleum Reserve petroleum. This Letter of Credit expires 60 days from the date set for receipt of offers.

This letter of credit is available by your draft/s at sight, drawn on us and accompanied by a manually signed statement that the signer is an authorized representative of the Department of Energy, and the following statement:

"THIS DRAWING OF U.S. \$ _____ (_____)

AGAINST YOUR LETTER OF CREDIT NUMBERED _____, DATED _____,

IS DUE THE U.S. GOVERNMENT BECAUSE OF THE FAILURE OF (CONTRACTOR) TO HONOR ITS OFFER TO ENTER INTO A CONTRACT FOR THE PURCHASE OF PETROLEUM FROM THE STRATEGIC PETROLEUM RESERVE, IN ACCORDANCE WITH THE U.S. GOVERNMENT'S NOTICE OF SALE NO. _____, INCLUDING ANY AMENDMENTS THERETO."

Drafts must be presented for payment on or before the expiration date of this Letter of Credit at our bank. The Government may make multiple drafts against this Letter of Credit.

Upon receipt of the U.S. Department of Energy's demand by hand, mail express delivery, or other means, at our office located at _____, we will honor the demand and make payment, by 3 p.m. Eastern Time of the next business day following receipt of the demand, by either wire transfer

of funds as a deposit to the account of the U.S. Treasury over the Fedwire Deposit System Network, or by electronic funds transfer through the Automated Clearing House Network, using the Federal Remittance Express Program. The information to be included in each transfer will be as provided in the above referenced Notice of Sale.

This Letter of Credit is subject to the Uniform Customs and Practice for Documentary Credits (1993 Revision, International Chamber of Commerce Publication no. 500) and except as may be inconsistent therewith, to the Uniform Commercial Code in effect on the date of issuance of this Letter of Credit in the state in which the issuer's head office within the United States is located.

We hereby agree with the drawers, endorsers and bona fide holders that all drafts drawn under and in compliance with the terms of this Letter of Credit will be duly honored upon presentation and delivery of the above documents for payment at our bank on or before the expiration date.

Address all communications regarding this Letter of Credit to (name and phone number).

Very truly yours,

(Authorized Signature)

(Typed Name and Title)

INSTRUCTIONS FOR OFFER LETTER OF CREDIT

- 1. The depository institution must be an account holder with the Federal Reserve Banking System and a participant (on line) in the Fed's Fedwire Deposit System Network funds transfer system.
2. Letter of Credit must not vary in substance from this attachment. Provide a copy of this attachment to your bank.
3. Banks shall fill in blanks except those in the drawing statement. The drawing statement is in bold print with double underlines for the blanks. Do not fill in double underlined blanks.
4. The information to be included and format to be used either for a wire transfer as a deposit over the Fedwire Deposit System Network or electronic funds transfer through the Automated Clearing House network, using the Federal Remittance Express Program, will be provided in the Contract.
5. Type name and title under authorized signature.

[70 FR 39367, July 7, 2005]

PART 626—PROCEDURES FOR ACQUISITION OF PETROLEUM FOR THE STRATEGIC PETROLEUM RESERVE

Sec.
626.1 Purpose.

Department of Energy

§ 626.4

- 626.2 Definitions.
- 626.3 Applicability.
- 626.4 General acquisition strategy.
- 626.5 Acquisition procedures-general.
- 626.6 Acquiring oil by direct purchase.
- 626.7 Royalty transfer and exchange.
- 626.8 Deferrals of contractually scheduled deliveries.

AUTHORITY: 42 U.S.C. 6240(c); 42 U.S.C. 7101, *et seq.*

SOURCE: 71 FR 65380, Nov. 8, 2006, unless otherwise noted.

§ 626.1 Purpose.

This part establishes the procedures for acquiring petroleum for, and deferring contractually scheduled deliveries to, the Strategic Petroleum Reserve. The procedures do not represent actual terms and conditions to be contained in the contracts for the acquisition of SPR petroleum.

§ 626.2 Definitions.

Backwardation means a market situation in which prices are progressively lower in succeeding delivery months than in earlier months.

Contango means a market situation in which prices are progressively higher in the succeeding delivery months than in earlier months.

Contract means the agreement under which DOE acquires SPR petroleum, consisting of the solicitation, the contract form signed by both parties, the successful offer, and any subsequent modifications, including those granting requests for deferrals.

Contracting Officer means a person with the authority to enter into, administer, and/or terminate contracts and make related determinations and findings, including entering into sales contracts on behalf of the Government. The term includes certain authorized representatives of the Contracting Officer acting within the limits of their authority as delegated by the Contracting Officer.

DEAR means the Department of Energy Acquisition Regulation.

Deferral means a process whereby petroleum scheduled for delivery to the SPR in a specific contract period is rescheduled for later delivery, outside of that period and encompasses the future delivery of the originally scheduled quantity plus an in-kind premium.

DOE means the Department of Energy.

DOI means the Department of the Interior.

Exchange means a process whereby petroleum owned by or due to the SPR is provided to a person or contractor in return for petroleum of comparable quality plus a premium quantity of petroleum delivered to the SPR in the future, or when SPR petroleum is traded for petroleum of a different quality for operational reasons based on the relative values of the quantities traded.

FAR means the Federal Acquisition Regulation.

Government means the United States Government, and includes DOE as its representative.

International Energy Program means the program established by the Agreement on an International Energy Program, signed by the United States on November 18, 1974, including any subsequent amendments and additions to that Agreement.

OPR means the Office of Petroleum Reserves within the DOE Office of Fossil Energy, whose responsibilities include the operation of the Strategic Petroleum Reserve.

Petroleum means crude oil, residual fuel oil, or any refined product (including any natural gas liquid, and any natural gas liquid product) owned, or contracted for, by DOE and in storage in any permanent SPR facility, or temporarily stored in other storage facilities.

Secretary means the Secretary of Energy.

Strategic Petroleum Reserve or *SPR* means the DOE program established by Title I, Part B, of the Energy Policy and Conservation Act, 42 U.S.C. 6201 *et seq.*

§ 626.3 Applicability.

The procedures in this part apply to the acquisition of petroleum by DOE for the Strategic Petroleum Reserve through direct purchase or transfer of royalty-in-kind oil, as well as to deferrals of contractually scheduled deliveries.

§ 626.4 General acquisition strategy.

(a) *Criteria for commencing acquisition.* To reduce the potential for negative

§ 626.5

10 CFR Ch. II (1–1–16 Edition)

impacts from market participation, DOE shall review the following factors prior to commencing acquisition of petroleum for the SPR:

- (1) The current inventory of the SPR;
- (2) The current level of private inventories;
- (3) Days of net import protection;
- (4) Current price levels for crude oil and related commodities;
- (5) The outlook for international and domestic production levels;
- (6) Existing or potential disruptions in supply or refining capability;
- (7) The level of market volatility;
- (8) Futures market price differentials for crude oil and related commodities; and
- (9) Any other factor the consideration of which the Secretary deems to be necessary or appropriate.

(b) *Review of rate of acquisition.* DOE shall review the appropriate rate of oil acquisition each time an open market acquisition has been suspended for more than three months, and every six months in the case of ongoing or suspended royalty-in-kind transfers.

(c) *Acquisition through other Federal agencies.* DOE may enter into arrangements with another Federal agency for that agency to acquire oil for the SPR on behalf of DOE.

§ 626.5 Acquisition procedures—general.

(a) *Notice of acquisition.* (1) Except when DOE has determined there is good cause to do otherwise, DOE shall provide advance public notice of its intent to acquire petroleum for the SPR. The notice of acquisition is usually in the form of a solicitation. DOE shall state in the notice of acquisition the general terms and details of DOE's crude oil acquisition and, to the extent feasible, shall inform the public of its overall fill goals, so that they may be factored into market participants' plans and activities.

(2) The notice of acquisition generally states:

- (i) The method of acquisition to be employed;
- (ii) The time that the solicitations will be open;
- (iii) The quantity of oil that is sought;

(iv) The minimum crude oil quality requirements;

(v) The acceptable delivery locations; and

(vi) The necessary instructions for the offer process.

(b) *Method of acquisition.* (1) DOE shall define the method of crude oil acquisition, direct purchase or royalty-in-kind transfer and exchange, in the notice of acquisition.

(2) DOE shall determine the method of crude oil acquisition after taking into account the availability of appropriated funds, current market conditions, the availability of oil from the Department of the Interior, and other considerations DOE deems to be relevant.

(c) *Solicitation.* (1) To secure the economic benefit and security of a diversified base of potential suppliers of petroleum to the SPR, DOE shall maintain a listing, developed through online registration and personal contact, of interested suppliers. Upon the issuance of a solicitation, DOE shall notify potential suppliers via their registered e-mail addresses.

(2) DOE shall make the solicitation publicly available on the Web sites of the DOE Office of Fossil Energy <http://www.fe.doe.gov/programs/reserves> and the OPR <http://www.spr.doe.gov>.

(d) *Timing and duration of solicitation.* (1) DOE shall determine crude oil requirements on nominal six-month cycles, and shall review and update these requirements prior to each solicitation cycle.

(2) DOE may terminate all solicitations and contracts pertaining to the acquisition of crude oil at the convenience of the Government, and in such event shall not be responsible for any costs incurred by suppliers, other than costs for oil delivered to the SPR and for reasonable, customary, and applicable costs incurred by the supplier in the performance of a valid contract for delivery before the effective date of termination of such contract. In no event shall the Government be liable for consequential damages or the contractor's lost profits as a result of such termination.

(e) *Quality.* (1) DOE shall define minimum crude oil quality specifications for the SPR. DOE shall include such

specifications in acquisition solicitations, and shall make them available on the Web sites of the DOE Office of Fossil Energy <http://www.fe.doe.gov/programs/reserves> and the OPR <http://www.spr.doe.gov>.

(2) DOE shall periodically review the quality specifications to ensure, to the greatest extent practicable, the crude oil mix in storage matches the demand of the United States refining system.

(f) *Quantity.* In determining the quantities of oil to be delivered to the SPR, DOE shall:

(1) Take into consideration market conditions and the availability of transportation systems; and

(2) Seek to avoid adversely affecting other market participants or crude oil market fundamentals.

(g) *Offer and evaluation procedures.* (1) Each solicitation shall provide necessary instructions on offer format and submission procedures. The details of the offer, evaluation and award procedures may vary depending on the method of acquisition.

(2) DOE shall use relative crude values and time differentials to the maximum extent practicable to manage acquisition and delivery schedules to reduce acquisition costs.

(3) DOE shall evaluate offers based on prevailing market prices of specific crude oils, and shall award contracts on a competitive basis.

(4) Whether acquisition is by direct purchase or royalty transfer and exchange on a term contract basis, DOE shall use a price index to account for fluctuations in absolute and relative market prices at the time of delivery to reduce market risk to all parties throughout the contract term.

(h) *Scheduling and delivery.* (1) Except as provided in paragraph (h)(4) of this section, DOE shall accept offers for crude oil delivered to specified SPR storage sites via pipeline or as waterborne cargos delivered to the terminals serving those sites.

(2) Except as provided in paragraph (h)(4) of this section, DOE shall generally establish schedules that allow for evenly spaced deliveries of economically-sized marine and pipeline shipments within the constraints of SPR site and commercial facilities receipt capabilities.

(3) DOE shall strive to maximize U.S. flag carrier utilization through the terms of its supply contracts.

(4) DOE reserves the right to accept offers for other methods of delivery if, in DOE's sole judgment, market conditions and logistical constraints require such other methods.

§ 626.6 Acquiring oil by direct purchase.

(a) *General.* For the direct purchase of crude oil, DOE shall, through certified contracting officers, conduct crude oil acquisitions in accordance with the FAR and the DEAR.

(b) *Acquisition strategy.* (1) DOE solicitations:

(i) May be either continuously open or fixed for a period of time (usually no longer than 6 months); and

(ii) May provide either for prompt delivery or for delivery at future dates.

(2) DOE may alter the acquisition plan to take advantage of differentials in prices for different qualities of oil, based on a consideration of the availability of storage capacity in the SPR sites, the logistics of changing delivery streams, and the availability of ships, pipelines and terminals to move and receive the oil.

(3) Based on the market analysis described in paragraph (d) of this section, DOE may refuse offers or suspend the acquisition process on the basis of Government estimates that project substantially lower oil prices in the future than those contained in offers. If DOE determines there is a high probability that the cost to the Government can be reduced without significantly affecting national energy security goals, DOE may either contract for delivery at a future date or delay purchases to take advantage of projected future lower prices. Conversely, DOE may increase the rate of purchases if prices fall below recent price trends or futures markets present a significant contango and prices offer the opportunity to reduce the average cost of oil acquisitions in anticipation of higher prices.

(4) Based on the market analysis described in paragraph (d) of this section, DOE may refuse offers, decrease the

§ 626.7

rate of purchase, or suspend the acquisition process if DOE determines acquisition will add significant upward pressure to prices either regionally or on a world-wide basis. DOE may consider recent price changes, private inventory levels, oil acquisition by other stockpiling entities, the outlook for world oil production, incipient disruptions of supply or refining capability, logistical problems for moving petroleum products, macroeconomic factors, and any other considerations that may be pertinent to the balance of petroleum supply and demand.

(c) *Fill requirements determination.* DOE shall develop SPR fill requirements for each solicitation based on an assessment of national energy security goals, the availability of storage capacity, and the need for specific grades and quantities of crude oil.

(d) *Market analysis.* (1) DOE shall establish a market value for each crude type to be acquired based on a market analysis at the time of contract award.

(2) In conducting the market analysis, DOE may use prices on futures markets, spot markets, recent price movements, current and projected shipping rates, forecasts by the DOE Energy Information Administration, and any other analytic tools available to DOE to determine the most desirable purchase profile.

(3) A market analysis may also consider recent price changes, private inventory levels, oil acquisition by other stockpiling entities, the outlook for world oil production, incipient disruptions of supply or refining capability, logistical problems for moving petroleum products, macroeconomic factors, and any other considerations that may be pertinent to the balance of petroleum supply and demand.

(e) *Evaluation of offers.* (1) DOE shall evaluate offers using:

(i) The criteria and requirements stated in the solicitation; and

(ii) The market analysis under paragraph (d) of this section.

(2) DOE shall require financial guarantees from contractors, in the form of a letter of credit or equivalent financial assurance.

10 CFR Ch. II (1-1-16 Edition)

§ 626.7 Royalty transfer and exchange.

(a) *General.* DOE shall conduct royalty transfers pursuant to an agreement between DOE and DOI for the transfer of royalty oil.

(b) *Acquisition strategy.* (1) DOE and DOI shall select a royalty volume from specified leases for transfer usually over six-month periods.

(2) If logistics and crude oil quality are compatible with SPR receipt capabilities and requirements respectively, DOE may take the royalty oil directly from DOI and place it in SPR storage sites. Otherwise, DOE may competitively solicit suppliers to deliver oil of comparable value to the SPR in exchange for the receipt of royalty-in-kind oil.

(3) If, based on the market analysis described in paragraph (d) of this section, DOE determines there is a high probability that the cost to the Government can be reduced without significantly affecting national energy security goals, DOE may contract for delivery at a future date in expectation of lower prices and a higher quantity of oil in exchange. Conversely, it may schedule deliveries at an earlier date under the contract in anticipation of higher prices at later dates.

(4) Based on the market analysis in paragraph (d) of this section, DOE may, after consultation with DOI, suspend the transfer of royalty oil to DOE if it appears the added demand for oil will add significant upward pressure to prices either regionally or on a world-wide basis.

(c) *Fill requirements determination.* DOE shall develop SPR fill requirements for each solicitation based on an assessment of national energy security goals, the availability of royalty oil and storage capacity, and need for specific grades and quantities of crude oil.

(d) *Market analysis.* (1) DOE may use prices on futures markets, spot markets, recent price movements, current and projected shipping rates, forecasts by the DOE Energy Information Administration, and any other analytic tools to determine the most desirable acquisition profile.

(2) A market analysis may also consider recent price changes, private inventory levels, oil acquisition by other stockpiling entities, the outlook for

Department of Energy

§ 626.8

world oil production, incipient disruptions of supply or refining capability, logistical problems for moving petroleum products, macroeconomic factors, and any other considerations that may be pertinent to the balance of petroleum supply and demand.

(e) *Evaluation of royalty exchange offers.* (1) DOE shall evaluate offers using:

(i) The criteria and requirements stated in the solicitation; and

(ii) The market analysis under paragraph (d) of this section.

(2) DOE shall require financial guarantees from contractors in the form of a letter of credit or equivalent financial assurance.

§ 626.8 Deferrals of contractually scheduled deliveries.

(a) *General.* (1) DOE prefers to take deliveries of petroleum for the SPR at times scheduled under applicable contracts. However, in the event the market is distorted by disruption to supply or other factors, DOE may defer scheduled deliveries or request or entertain deferral requests from contractors.

(2) A contractor seeking to defer scheduled deliveries of oil to the SPR may submit a deferral request to DOE.

(b) *Deferral criteria.* DOE shall only grant a deferral request for negotiation under paragraph (c) of this section if it determines that DOE can receive a premium for the deferral paid in additional barrels of oil and, based on

DOE's deferral analysis, that at least one of the following conditions exists:

(1) DOE can reduce the cost of its oil acquisition per barrel and increase the volume of oil being delivered to the SPR by means of the premium barrels required by the deferral process.

(2) DOE anticipates private inventories are approaching a point where unscheduled outages may occur.

(3) There is evidence that refineries are reducing their run rates for lack of feedstock.

(4) There is an unanticipated disruption to crude oil supply.

(c) *Negotiating terms.* (1) If DOE decides to negotiate a deferral of deliveries, DOE shall estimate the market value of the deferral and establish a strategy for negotiating with suppliers the minimum percentage of the market value to be taken by the Government. During these negotiations, if the deferral request was initiated by DOE, DOE may consider any reasonable, customary, and applicable costs already incurred by the supplier in the performance of a valid contract for delivery. In no event shall such consideration account for any consequential damages or lost profits suffered by the supplier as a result of such deferral.

(2) DOE shall only agree to amend the contract if the negotiation results in an agreement to give the Government a fair and reasonable share of the market value.

AUTHORITY: Sec. 161, 68 Stat. 948, as amended; 42 U.S.C. 2201.

SOURCE: 41 FR 56776, Dec. 30, 1976, unless otherwise noted.

GENERAL

§ 706.1 Purpose.

The purpose of this part is to set forth Department of Energy, hereinafter "DOE," security policies and practices in the area of labor-management relations.

§ 706.2 Basis and scope.

The specific policies contained in this part are worked out within the framework of DOE's general objectives for labor-management relations in the DOE program, namely:

(a) Wholehearted acceptance by contractors and by labor and its representatives of the moral responsibility inherent in participation in the DOE program;

(b) Development of procedures to assure (1) that all participants in the program are loyal to the United States in-

cluding those whose participation involves the exercise of negotiating and disciplinary authority over bargaining units, and (2) that determination of unit, jurisdiction, and similar questions will not breach security;

(c) Continuity of production at vital DOE installations;

(d) Consistent with DOE's responsibility under the law, the least possible governmental interference with the efficient management expected from DOE contractors;

(e) Minimum interference with the traditional rights and privileges of American labor.

SECURITY POLICIES AND PROCEDURES IN NATIONAL LABOR RELATIONS BOARD PROCEEDINGS

§ 706.10 Policy.

It is policy of DOE that NLRB cases falling within the scope of the Labor Management Relations Act at the various DOE installations should be conducted in normal fashion wherever possible, on the basis of open hearings, unclassified records and published decisions. This policy does not preclude adoption of special arrangements which may be required for reasons of program security at any stage of the proceedings in particular areas.

§ 706.11 Consent elections.

In accordance with the recommendation of the President's Commission on Labor Relations in the Atomic Energy Installations, it is the policy of DOE to encourage every effort by management and labor at DOE installations to determine bargaining units and representatives by agreement and consent elections in preference to contested proceedings before the National Labor Relations Board.

§ 706.12 Administrative Law Judges.

By agreement with the National Labor Relations Board, a panel of cleared NLRB administrative law judges is maintained to facilitate resolution of questions as to the materiality of classified information in NLRB hearings and to facilitate preparation of an unclassified record. The assignment of individual administrative law judges to DOE cases remains a matter

§ 706.13

within the discretion of the National Labor Relations Board.

§ 706.13 Clearance of counsel.

It is recognized that clearance of counsel for the parties is sometimes desirable for proper preparation of a case even though the record is to be unclassified. Clearance of counsel makes possible their participation in any closed discussions needed preparatory to making an unclassified record. Each party is responsible for requesting clearance of its counsel well in advance so that clearance requirements will not delay the proceeding. The clearance of temporary special counsel will be terminated on completion of the proceeding.

§ 706.14 DOE's role in proceedings.

If controversies within the scope of the Labor Management Relations Act arise which cannot be adjusted by mutual agreement, and contested proceedings before NLRB result, each party to such proceedings will present his own position and the evidence in support thereof with due regard for existing security rules. DOE will be continuously informed of the progress of such proceedings and will act as may appear desirable (a) to assure the protection of classified information; (b) to assure that material and relevant information is not withheld from the record on grounds of security if such information can be supplied in unclassified form; and (c) to assist in determining appropriate action where a decision may turn on data which can be expressed only in classified form.

LOYALTY OF PARTICIPANTS

§ 706.20 Policy.

Loyalty to the United States is a paramount factor applicable to all participants in DOE program including those whose participation (although not requiring access to restricted data) involves the exercise of administrative, negotiating and disciplinary authority over bargaining units composed of employees engaged on classified work. Individuals involved in questions of loyalty will be given full opportunity to explore the questions with DOE. DOE will take such further steps as may be appropriate in the circumstances.

10 CFR Ch. III (1-1-16 Edition)

CONTRACT NEGOTIATION AND ADMINISTRATION

§ 706.30 Clearance of certain local union representatives.

It is recognized that security clearance of certain union representatives may be necessary to assure opportunity for effective representation of employees in collective bargaining relationships with DOE contractors. Accordingly, DOE managers may authorize investigation for "Q" clearance of union officials whose functions as representatives of employees may reasonably be expected to require access to Restricted Data under NLRB and other procedures according to applicable law (LMRA, 1947); to effectively perform their representation functions in the resolution of grievances and in other collective bargaining relationships with contractors; to effectuate the recommendation of the President's Commission on Labor Relations in the Atomic Energy Installations in respect to integration of the union into the plant organization "as to two-way channel of communication and a medium of understanding between management and workers".

(a) In the pre-contract stage of union-management relations, the requirements of the Labor Management Relations Act normally will be the applicable criteria for determining which bargaining representatives, if any, will need access to classified material in the exercise of their functions as employee representatives.

(b) After a bargaining relationship has been established between the contractor and the representatives of its employees the nature of this relationship and the procedures followed in it normally will be the controlling criteria for determination of the access to be granted to particular persons in carrying out their functions as employee representatives. For example, many contract grievance procedures designate by title certain union and management officials who are to have definite roles in the resolution of grievances under the procedure. Investigation for "Q" clearance will normally be

Department of Energy

§ 707.2

in order for such officials, both company and union, employee, and non-employee. In addition, persons not so designated may be investigated for clearance where the company and the union advise DOE manager that their established relationships contemplate access for such persons.

§ 706.31 Clearance of conciliators and arbitrators.

Conciliators and arbitrators who are regularly assigned to DOE cases may be processed for “Q” clearance at the discretion of the local DOE manager, either on the manager’s initiative or at the request of a contractor.

§ 706.32 Security indoctrination of non-employee representatives.

All collective bargaining representatives, company and union, who are to have access to Restricted Data, will be given appropriate security indoctrination.

§ 706.40 Final responsibility of DOE in security matters.

On all matters of security at all Government-owned, privately operated DOE installations, DOE retains absolute and final authority, and neither the security rules nor their administration are matters for collective bargaining between management and labor, insofar as DOE security regulations affect the collective bargaining process, the security policies and regulations will be made known to both parties. To the fullest extent feasible DOE will consult with representatives of management and labor in formulating security rules and regulations that affect the collective bargaining process.

SOURCE: 57 FR 32656, July 22, 1992, unless otherwise noted.

Subpart A—General Provisions

§ 707.1 Purpose.

The Department of Energy (DOE) promulgates this part in order to protect the environment, maintain public health and safety, and safeguard the national security. This part establishes policies, criteria, and procedures for developing and implementing programs that help to maintain a workplace free from the use of illegal drugs. It applies to DOE contractors and subcontractors performing work at sites owned or controlled by DOE and operated under the authority of the Atomic Energy Act of 1954, as amended, and to individuals with unescorted access to the control areas of certain DOE reactors. The procedures include detection of the use of illegal drugs by current or prospective contractor employees in testing designated positions.

§ 707.2 Scope.

(a) This part applies to the following contracts with DOE, at sites owned or controlled by DOE which are operated

§ 707.3

under the authority of the Atomic Energy Act of 1954, as amended:

(1) Management and operating contracts; and

(2) Other contracts or subcontracts with a value of \$25,000 or more, and which have been determined by DOE to involve:

(i) Access to or handling of classified information or special nuclear materials;

(ii) High risk of danger to life, the environment, public health and safety, or national security; or

(iii) Transportation of hazardous materials to or from a DOE site.

(b) Individuals described in § 707.7 (b) and (c) will be subject to random drug testing; to drug testing as a result of an occurrence, as described in § 707.9; and to drug testing on the basis of reasonable suspicion, as described in § 707.10.

(c) Applicants for employment in testing designated positions will be tested in accordance with § 707.8.

§ 707.3 Policy.

It is the policy of DOE to conduct its programs so as to protect the environment, maintain public health and safety, and safeguard the national security. This policy is advanced in this rule by requiring contractors and subcontractors within its scope to adopt procedures consistent with the baseline requirements of this part, and to impose significant sanctions on individuals in testing designated positions or with unescorted access to the control areas of certain DOE reactors, who use or are involved with illegal drugs.

§ 707.4 Definitions.

For the purposes of this part, the following definitions apply:

Collection Site Person means a technician or other person trained and qualified to take urine samples and to secure urine samples for later laboratory analysis.

Confirmed Positive Test means, for drugs, a finding based on a positive initial or screening test result, confirmed by another positive test on the same sample. The confirmatory test must be by the gas chromatography/mass spectrometry method.

10 CFR Ch. III (1–1–16 Edition)

Counseling means assistance provided by qualified professionals to employees, especially, but not limited to those employees whose job performance is, or might be, impaired as a result of illegal drug use or a medical-behavioral problem; such assistance may include short-term counseling and assessment, crisis intervention, referral to outside treatment facilities, and follow-up services to the individual after completion of treatment and return to work.

Drug Certification means a written assurance signed by an individual with known past illegal drug involvement, as a condition for obtaining or retaining a DOE access authorization, stating that the individual will refrain from using or being involved with illegal drugs while employed in a position requiring DOE access authorization (security clearance).

Employee Assistance means a program of counseling, referral, and educational services concerning illegal drug use and other medical, mental, emotional, or personal problems of employees, particularly those which adversely affect behavior and job performance.

Hazardous Material means any material subject to the placarding requirements of 49 CFR 172.504, table 1, and materials presenting a poison-inhalation hazard that must be placarded under the provisions of 49 CFR 172.505.

Head of DOE Field Element means an individual who is the manager or head of the DOE operations office or field office.

Illegal Drug means a controlled substance, as specified in Schedules I through V of the Controlled Substances Act, 21 U.S.C. 811, 812. The term “illegal drugs” does not apply to the use of a controlled substance in accordance with terms of a valid prescription, or other uses authorized by law.

Management and Operating Contract means an agreement for the operation, maintenance, or support, on behalf of the Government, of a Government-owned or controlled research, development, special production, or testing establishment wholly or principally devoted to one or more major programs of DOE.

Medical Review Officer (MRO) means a licensed physician, approved by DOE to perform certain functions under this

Department of Energy

§ 707.5

part. The MRO is responsible for receiving laboratory results generated by an employer's drug testing program, has knowledge of illegal drug use and other substance abuse disorders, and has appropriate medical training to interpret and evaluate an individual's positive test result, together with that person's medical history and any other relevant biomedical information. For purposes of this part a physician from the site occupational medical department may be the MRO.

Occurrence means any event or incident that is a deviation from the planned or expected behavior or course of events in connection with any Department of Energy or Department of Energy-controlled operation, if the deviation has environmental, public health and safety, or national security protection significance. Incidents having such significance include the following, or incidents of a similar nature:

(1) Injury or fatality to any person involving actions of a Department of Energy contractor employee.

(2) Involvement of nuclear explosives under Department of Energy jurisdiction which results in an explosion, fire, the spread of radioactive material, personal injury or death, or significant damage to property.

(3) Accidental release of pollutants which results or could result in a significant effect on the public or environment.

(4) Accidental release of radioactive material above regulatory limits.

Random Testing means the unscheduled, unannounced urine drug testing of randomly selected individuals in testing designated positions, by a process designed to ensure that selections are made in a non-discriminatory manner.

Reasonable Suspicion means a suspicion based on an articulable belief that an employee uses illegal drugs, drawn from particularized facts and reasonable inferences from those facts, as detailed further in § 707.10.

Referral means the direction of an individual toward an employee assistance program or to an outside treatment facility by the employee assistance program professional, for assistance with prevention of illegal drug use, treat-

ment, or rehabilitation from illegal drug use or other problems. Referrals to an employee assistance program can be made by the individual (self-referral), by contractor supervisors or managers, or by a bargaining unit representative.

Rehabilitation means a formal treatment process aimed at the resolution of behavioral-medical problems, including illegal drug use, and resulting in such resolution.

Special Nuclear Material has the same meaning as in section 11aa of the Atomic Energy Act of 1954 (42 U.S.C. 2014(aa)).

Specimen Chain of Custody Form is a form used to document the security of the specimen from time of collection until receipt by the laboratory. This form, at a minimum, shall include specimen identifying information, date and location of collection, name and signature of collector, name of testing laboratory, and the names and signatures of all individuals who had custody of the specimen from time of collection until the specimen was prepared for shipment to the laboratory.

Testing Designated Position names a position whose incumbents are subject to drug testing under this part.

[57 FR 32656, July 22, 1992, as amended at 80 FR 5008, Jan. 30, 2015]

Subpart B—Procedures

§ 707.5 Submission, approval, and implementation of a baseline workplace substance abuse program.

(a) Each contractor subject to this part shall develop a written program consistent with the requirements of this part and the guidelines of the Department of Health and Human Services and subsequent amendments to those guidelines ("Mandatory Guidelines for Federal Workplace Drug Testing Programs," 53 FR 11970, April 11, 1988; hereinafter "HHS Mandatory Guidelines"), and applicable to appropriate DOE sites. Such a program shall be submitted to DOE for review and approval, and shall include at least the following baseline elements:

(1) Prohibition of the use; possession, sale, distribution, or manufacture of illegal drugs at sites owned or controlled by DOE;

§ 707.5

10 CFR Ch. III (1–1–16 Edition)

(2) Plans for instruction of supervisors and employees concerning problems of substance abuse, including illegal drug use, and the availability of assistance through the employee assistance program and referrals to other resources, and the penalties that may be imposed upon employees for drug-related violations occurring on the DOE owned or controlled site;

(3) Provision for distribution to all employees engaged in performance of the contract on the DOE owned or controlled site of a statement which sets forth the contractor's policies prohibiting the possession, sale, distribution, or manufacture of illegal drugs at the DOE owned or controlled site. The statement shall include notification to all employees that as a condition of employment under the contract, the employee will:

(i) Abide by the terms of the statement; and

(ii) Notify the employer in writing of the employee's conviction under a criminal drug statute for a violation occurring on the DOE owned or controlled site no later than 10 calendar days after such conviction;

(4) Provision for written notification to the DOE contracting officer within 10 calendar days after receiving notice under paragraph (a)(3)(ii) of this section, from an employee or otherwise receiving actual notice of an employee's conviction of a drug-related offense;

(5) Provision for imposing one of the following actions, with respect to any employee who is convicted of a drug-related violation occurring in the workplace, within 30 calendar days after receiving such notice of conviction under paragraph (a)(4) of this section;

(i) Taking appropriate personnel action against such employee, up to and including termination; or

(ii) Offering such employee, consistent with the contractor's policies, an opportunity to participate satisfactorily in a drug abuse assistance or rehabilitation program approved for such purposes by a Federal, State, or local health, law enforcement, or other appropriate agency. If the employee does not participate in such a rehabilitation program, the contractor must take appropriate personnel action, up to and

including termination, in accordance with the contractor's policies.

(6) Commitment to make a good faith effort to maintain a workplace free of substance abuse through implementation of paragraphs (a)(1) through (a)(5) of this section.

(b) In addition, the following baseline elements must be included in programs developed by contractors that have identified testing designated positions (see § 707.7(b));

(1) Notification to DOE of the positions subject to drug testing;

(2) Prohibition of individuals in testing designated positions who are not free from the use of illegal drugs from working in those positions;

(3) Sanctions for individuals in testing designated positions who violate the prohibitions of paragraphs (a)(1) or (b)(2) of this section;

(4) Provision for:

(i) Notification, at least 60 days in advance of initiating testing, to those individuals subject to drug testing, unless the contractor is currently conducting a testing program.

(ii) Urine drug analysis of applicants for testing designated positions before final selection for employment or assignment;

(iii) Random urine drug analysis for employees in testing designated positions;

(iv) Urine drug analysis for employees in testing designated positions on the basis of reasonable suspicion, as a result of an occurrence, or as a follow-up to rehabilitation; and

(v) Random urine drug analysis and urine drug analysis on the basis of reasonable suspicion or as the result of an occurrence, for any individual with unescorted access to the control areas of certain DOE reactors (see § 707.7(c)).

(vi) Written notice to the contractor by an employee in a testing designated position of a drug-related arrest or conviction, or receipt of a positive drug test result regarding that employee, as soon as possible but within 10 calendar days of such arrest, conviction, or receipt; and

(vii) Appropriate action, if any, to be taken regarding an employee who:

(A) is arrested for or convicted of a drug-related offense; or

Department of Energy

§ 707.5

(B) has a positive drug test result (consistent with § 707.14).

(5) Provision to employees of the opportunity for rehabilitation, consistent with the contractor's policies, under circumstances as provided in this part (see § 707.14(b));

(6) Immediate notification to DOE security officials whenever the circumstances in connection with procedures under this part raise a security concern as provided in DOE Orders, rules and regulations; such circumstances including, but are not necessarily limited to, a determination that an individual holding a DOE access authorization has used an illegal drug.

(c) Each contractor's written policy and procedures under this part shall comply with the requirements of 10 CFR part 710, "Criteria and Procedures for Determining Eligibility for Access to Classified Matter or Significant Quantities of Special Nuclear Material."

(d) Contractors are required to submit all subcontracts they believe to be within the scope of this part to the Head of DOE Field Element for a determination as to whether the subcontract falls within the scope of this part. Subcontractors so determined to be within the scope of this part shall be required to agree to comply with its requirements, as a condition of eligibility for performing the subcontract work. Each subcontractor subject to this part shall submit its plan to the appropriate prime contractor for approval; the contractor shall be responsible for periodically monitoring the implementation of the subcontractor's program for effectiveness and compliance with this part.

(e) In reviewing each proposed workplace substance abuse plan, the Head of DOE Field Element shall decide whether the program meets the applicable baseline requirements established by this part. The responsible Head of DOE Field Element will reject proposed workplace substance abuse plans that are deemed not to meet the baseline requirements. The Head of DOE Field Element shall provide the contractor with a written notification regarding the decision as to the acceptability of the plan. Nothing in this rule is in-

tended to prohibit any contractor subject to this part from implementing workplace substance abuse requirements additional to those of the baseline, including drug testing employees and applicants for employment in any position and testing for any illegal drugs. However, the contractor shall inform Head of DOE Field Element of such additional requirements at least 30 days prior to implementation.

(f) DOE shall periodically review and evaluate each contractor's program, including the contractor's oversight of the covered subcontractors, to assure effectiveness and compliance with this part.

(g) Contractors or proposers will submit their program to the appropriate Head of DOE Field Element for review within 30 days of notification by the appropriate Head of DOE Field Element that the contract or proposed contract falls within the scope of this part. Workplace substance abuse programs, as provided in this part, shall be implemented within 30 days of approval by the Head of DOE Field Element. The Head of DOE Field Element may grant an extension to the notification or implementation period, as warranted by local conditions. Implementation may require changes to collective bargaining agreements as discussed in § 707.15 of this part.

(h) To assure consistency of application, The Head of DOE Field Element shall periodically review designated contracts and testing designated positions included in the workplace substance abuse plans approved by The Head of DOE Field Element. The Head of DOE Field Element will also periodically review implementation of programs conducted by prime contractors, to assure consistency of application among prime contracts (and subcontracts where appropriate).

(i) This part preempts any State or local law, rule, regulation, order, or standard to the extent that:

(1) compliance with both the State or local requirement and any requirements in this part is not possible; or

(2) compliance with the State or local requirement is an obstacle to the

§ 707.6

accomplishments and execution of any requirement in this part.

[57 FR 32656, July 22, 1992., as amended at 80 FR 5008, Jan. 30, 2015]

§ 707.6 Employee assistance, education, and training.

Contractor programs shall include the following or appropriate alternatives:

(a) Employee assistance programs emphasizing preventive services, education, short-term counseling, coordination and referral to outside agencies, and follow-up. These services shall be available to all contractor on-site employees involved in the DOE contract. The contractor has no obligation to pay the costs of any individual's counseling, treatment, or rehabilitation beyond those services provided by the contractor's employee assistance program, except as provided for in the contractor's benefits programs. DOE undertakes no obligation to pay for any individual's counseling, rehabilitation, or treatment, unless specifically provided for by contract.

(b) Education and training programs for on-site employees on a periodic basis, which will include, at a minimum, the following subjects:

(1) For all on-site employees: Health aspects of substance abuse, especially illegal drug use; safety, security, and other workplace-related problems caused by substance abuse, especially illegal drug use; the provisions of this rule; the employer's policy; and available employee assistance services.

(2) For managers and supervisors:

(i) The subjects listed in paragraph (b)(1) of this section;

(ii) Recognition of deteriorating job performance or judgment, or observation of unusual conduct which may be the result of possible illegal drug use;

(iii) Responsibility to intervene when there is deterioration in performance, or observed unusual conduct, and to offer alternative courses of action that can assist the employee in returning to satisfactory performance, judgment, or conduct, including seeking help from the employee assistance program;

(iv) Appropriate handling and referral of employees with possible substance abuse problems, especially illegal drug use; and

10 CFR Ch. III (1–1–16 Edition)

(v) Employer policies and practices for giving maximum consideration to the privacy interests of employees and applicants.

§ 707.7 Random drug testing requirements and identification of testing designated positions.

(a)(1) Each workplace substance abuse program will provide for random testing for evidence of the use of illegal drugs of employees in testing designated positions identified in this section.

(2) Programs developed under this part for positions identified in paragraph (b)(3) of this section shall provide for random tests at a rate equal to 30 percent of the total number of employees in testing designated positions for each 12 month period. Employees in the positions identified in paragraphs (b)(1), (b)(2), and (c) of this section will be subject to random testing at a rate equal to 100 percent of the total number of employees identified, and those identified in paragraphs (b)(1) and (b)(2) of this section may be subject to additional drug tests.

(b) The testing designated positions subject to random drug testing are:

(1) Positions determined to be covered by the Human Reliability Program (HRP), codified at 10 CFR part 712. HRP employees will be subject to the drug testing standards of this part and any additional requirements of the HRP rule.

(2) Positions identified by the contractor which entail duties where failure of an employee adequately to discharge his or her position could significantly harm the environment, public health or safety, or national security, such as:

(i) Pilots;

(ii) Firefighters;

(iii) Protective force personnel, exclusive of those covered in paragraphs (b)(1) or (b)(2) of this section, in positions involving use of firearms where the duties also require potential contact with, or proximity to, the public at large;

(iv) Personnel directly engaged in construction, maintenance, or operation of nuclear reactors; or

(v) Personnel directly engaged in production, use, storage, transportation,

Department of Energy

§ 707.10

or disposal of hazardous materials sufficient to cause significant harm to the environment or public health and safety.

(3) Other positions determined by the DOE, after consultation with the contractor, to have the potential to significantly affect the environment, public health and safety, or national security.

(c) Each contractor shall require random testing of any individual, whether or not an employee, who is allowed unescorted access to the control areas of the following DOE reactors: Advanced Test Reactor (ATR) and High Flux Isotope Reactor (HFIR). A confirmed positive test shall result in such an individual being denied unescorted access. If such an individual is not an employee of the contractor, that individual may be granted unescorted access only after the individual meets the conditions established in §707.14(d) of this part. If, after restoration of unescorted access, such an individual is determined to have used illegal drugs for a second time, unescorted access shall be denied for a period of not less than three (3) years. Such an individual thereafter shall be granted unescorted access only upon a determination by the Head of DOE Field Element that a grant of unescorted access to the individual presents no unacceptable safety or security risk. If such an individual is an employee, that individual is subject to the other requirements of this part, including appropriate disciplinary measures.

(d) A position otherwise subject to testing under this part may be exempted from such testing if it is within the scope of another comparable Federal drug testing program, as determined by DOE, after consultation with the contractor, to avoid unnecessary multiple tests.

[57 FR 32656, July 22, 1992, as amended at 73 FR 3863, Jan. 23, 2008; 80 FR 5008, Jan. 30, 2015]

§ 707.8 Applicant drug testing.

An applicant for a testing designated position will be tested for the use of illegal drugs before final selection for employment or assignment to such a position. Provisions of this part do not prohibit contractors from conducting

drug testing on applicants for employment in any position.

§ 707.9 Drug testing as a result of an occurrence.

When there is an occurrence which is required to be reported to DOE by the contractor, under contract provisions incorporating applicable DOE Orders, rules, and regulations, it may be necessary to test individuals in testing designated positions, or individuals with unescorted access to the control areas of the DOE reactors listed in §707.7(c), for the use of illegal drugs, if such individuals could have caused or contributed to the conditions which caused the occurrence. For an occurrence requiring immediate notification or reporting as required by applicable DOE Orders, rules, and regulations, the contractor will require testing as soon as possible after the occurrence but within 24 hours of the occurrence, unless DOE determines that it is not feasible to do so. For other occurrences requiring notifications to DOE as required by applicable DOE Orders, rules, and regulations, the contractor may require testing.

§ 707.10 Drug testing for reasonable suspicion of illegal drug use.

(a)(1) It may be necessary to test any employee in a testing designated position, or individuals with unescorted access to the control areas of the DOE reactors listed in §707.7(c), for the use of illegal drugs, if the behavior of such an individual creates the basis for reasonable suspicion of the use of illegal drugs. Two or more supervisory or management officials, at least one of whom is in the direct chain of supervision of the employee, or is a physician from the site occupational medical department, must agree that such testing is appropriate. Reasonable suspicion must be based on an articulable belief that an employee uses illegal drugs, drawn from particularized facts and reasonable inferences from those facts.

(2) Such a belief may be based upon, among other things:

(i) Observable phenomena, such as direct observation of:

(A) The use or possession of illegal drugs; or

§ 707.11

10 CFR Ch. III (1–1–16 Edition)

(B) The physical symptoms of being under the influence of drugs;

(ii) A pattern of abnormal conduct or erratic behavior;

(iii) Arrest for a conviction of a drug related offense, or the identification of the individual as the focus of a criminal investigation into illegal drug possession use, or trafficking;

(iv) Information that is either provided by a reliable and credible source or is independently corroborated;

(v) Evidence that an employee has tampered with a drug test; or

(vi) Temperature of the urine specimen is outside the range of 32–38 degrees centigrade or 90–100 degrees Fahrenheit.

(b) The fact that an employee had a confirmed positive test for the use for the use of illegal drugs at some prior time, or has undergone a period of rehabilitation or treatment, will not, in and of itself, be grounds for testing on the basis of reasonable suspicion.

(c) The requirements of this part relating to the testing for the use of illegal drugs are not intended to prohibit the contractor from pursuing other existing disciplinary procedures or from requiring medical evaluation of any employee exhibiting aberrant or unusual behavior.

[57 FR 32656, July 22, 1992, as amended at 80 FR 5008, Jan. 30, 2015]

§ 707.11 Drugs for which testing is performed.

Where testing is performed under this part, at a minimum, contractors will be required to test for the use of the following drugs or classes of drugs: marijuana; cocaine; opiates; phencyclidine; and amphetamines. However, when conducting reasonable suspicion or occurrence testing, the contractor may test for any drug listed in Schedules I or II of the Controlled Substances Act.

§ 707.12 Specimen collection, handling and laboratory analysis for drug testing.

(a) Procedures for providing urine specimens must allow individual privacy, unless there is reason to believe that a particular individual may alter or substitute the specimen to be provided. Contractors shall utilize a chain

of custody procedure for maintaining control and accountability from point of collection to final disposition of specimens, and testing laboratories shall use appropriate cutoff levels in screening specimens to determine whether they are negative or positive for a specific drug, consistent with the HHS Mandatory Guidelines (see § 707.5(a)). The contractor shall ensure that only testing laboratories certified by the Department of Health and Human Services, are utilized.

(b)(1) If the individual refuses to cooperate with the urine collection (e.g., refusal to provide a specimen, or to complete paperwork), then the collection site person shall inform the MRO and shall document the non-cooperation on the specimen chain of custody form. The MRO shall report the failure to cooperate to the appropriate management authority, who shall report to DOE if the individual holds an access authorization. Individuals so failing to cooperate shall be treated in all respects as if they had been tested and had been determined to have used an illegal drug. The contractor may apply additional sanctions consistent with its disciplinary policy.

(2) The collection site person shall ascertain that there is a sufficient amount of urine to conduct an initial test, a confirmatory test, and a retest, in accordance with the HHS Mandatory Guidelines. If there is not a sufficient amount of urine, additional urine will be collected in a separate container. The individual may be given reasonable amounts of liquid and a reasonable amount of time in which to provide the specimen required. The individual and the collection site person must keep the specimen in view at all times. In the event that the individual fails to provide a sufficient amount of urine, the amount collected will be noted on the "Urine Sample Custody Document." In this case, the collection site person will telephone the individual's supervisor who will determine the next appropriate action. This may include deciding to reschedule the individual for testing, to return the individual to

his or her work site and initiate disciplinary action, or both.

[57 FR 32656, July 22, 1992, as amended at 73 FR 3863, Jan. 23, 2008; 80 FR 5008, Jan. 30, 2015]

§ 707.13 Medical review of results of tests for illegal drug use.

(a) All test results shall be submitted for medical review by the MRO. A confirmed positive test for drugs shall consist of an initial test performed by the immunoassay method, with positive results on that initial test confirmed by another test, performed by the gas chromatography/mass spectrometry method (GC/MS). This procedure is described in the HHS Mandatory Guidelines.

(b) The Medical Review Officer will consider the medical history of the employee or applicant, as well as any other relevant biomedical information. When there is a confirmed positive test result, the employee or applicant will be given an opportunity to report to the MRO the use of any prescription or over-the-counter medication. If the MRO determines that there is a legitimate medical explanation for a confirmed positive test result, consistent with legal and non-abusive drug use, the MRO will certify that the test results do not meet the conditions for a determination of use of illegal drugs. If no such certification can be made, the MRO will make a determination of use of illegal drugs. Determinations of use of illegal drugs will be made in accordance with the criteria provided in the Medical Review Officer Manual issued by the Department of Health and Human Services.

[57 FR 32656, July 22, 1992, as amended at 80 FR 5008, Jan. 30, 2015]

§ 707.14 Action pursuant to a determination of illegal drug use.

(a) When an applicant for employment has been tested and determined to have used an illegal drug, processing for employment will be terminated and the applicant will be so notified.

(b)(1) When an employee who is in a testing designated position has been tested and determined to have used an illegal drug, the contractor shall immediately remove that employee from the testing designated position; if such

employee also holds, or is an applicant for, an access authorization, then the contractor shall immediately notify DOE security officials for appropriate adjudication. If this is the first determination of use of illegal drugs by that employee (for example, the employee has not previously signed a DOE drug certification, and has not previously tested positive for use of illegal drugs), the employee may be offered a reasonable opportunity for rehabilitation, consistent with the contractor's policies. If rehabilitation is offered, the employee will be placed in a non-testing designated position, which does not require a security clearance, provided there is such an acceptable position in which the individual can be placed during rehabilitation; if there is no acceptable non-testing designated position, the employee will be placed on sick, annual, or other leave status, for a reasonable period sufficient to permit rehabilitation. However, the employee will not be protected from disciplinary action which may result from violations of work rules other than a positive test result for illegal drugs.

(2) Following a determination by the site occupational medical department, after counseling or rehabilitation, that the employee can safely return to duty, the contractor may offer the employee reinstatement, in the same or a comparable position to the one held prior to the removal, consistent with the contractor's policies and the requirements of 10 CFR part 710. Failure to take the opportunity for rehabilitation, if it has been made available, for the use of illegal drugs, will require significant disciplinary action up to and including removal from employment under the DOE contract, in accordance with the contractor's policies. Any employee who is twice determined to have used illegal drugs shall in all cases be removed from employment under the DOE contract. Also, if an employee who has signed a DOE drug certification violates the terms of the certification, DOE shall conduct a timely review of the circumstances of such violation, and the individual's continued eligibility for a DOE access authorization shall be determined under the provisions of 10 CFR part 710,

§ 707.15

“Criteria and Procedures for Determining Eligibility for Access to Classified Matter or Significant Quantities of Special Nuclear Material.”

(c) An employee who has been removed from a testing designated position because of the use of illegal drugs may not be returned to such position until that employee has:

(1) Successfully completed counseling or a program of rehabilitation;

(2) Undergone a urine drug test with a negative result; and

(3) Been evaluated by the site occupational medical department, which has determined that the individual is capable of safely returning to duty.

(d) An individual who is not an employee of a contractor who has been denied unescorted access because of the use of illegal drugs may not have the unescorted access reinstated until that individual has:

(1) Provided evidence of successful completion of counseling or a program of rehabilitation;

(2) Undergone a urine drug test with a negative result; and

(3) Been evaluated by the site occupational medical department, which has determined that the individual is capable of being permitted unescorted access to a reactor control area.

(e) If a DOE access authorization is involved, DOE must be notified of a contractor's intent to return to a testing designated position an employee removed from such duty for use of illegal drugs. Positions identified in § 707.7(b)(1) and (2) will require DOE approval prior to return to a testing designated position.

(f) An individual who has been notified of a positive test result may request a retest of the same sample at the same or another certified laboratory. The individual shall bear the costs of transportation and/or testing of the specimen. The contractor will inform employees of their right to request a retest under the provisions of this paragraph.

(g) After an employee determined to have used illegal drugs has been returned to duty, the employee shall be subject to unannounced drug testing, at intervals, for a period of 12 months.

[57 FR 32656, July 22, 1992., as amended at 80 FR 5008, Jan. 30, 2015]

10 CFR Ch. III (1–1–16 Edition)

§ 707.15 Collective bargaining.

When establishing drug testing programs, contractors who are parties to collective bargaining agreements will negotiate with employee representatives, as appropriate, under labor relations laws or negotiated agreements. Such negotiation, however, cannot change or alter the requirements of this rule because DOE security requirements themselves are non-negotiable under the security provisions of DOE contracts. Employees covered under collective bargaining agreements will not be subject to the provisions of this rule until those agreements have been modified, as necessary; provided, however, that if one year after commencement of negotiation the parties have failed to reach agreement, an impasse will be determined to have been reached and the contractor will unilaterally implement the requirements of this rule.

§ 707.16 Records.

(a) Confirmed positive test results shall be provided to the Medical Review Officer and other contractor and DOE officials with a need to know. Any other disclosure may be made only with the written consent of the individual.

(b) Contractors shall maintain maximum confidentiality of records related to illegal drug use, to the extent required by applicable statutes and regulations (including, but not limited to, 42 U.S.C. 290dd–3, 42 U.S.C. 290ee–3, and 42 CFR part 2). If such records are sought from the contractor for criminal investigations, or to resolve a question or concern relating to the Personnel Assurance Program certification or access authorization under 10 CFR part 710, any applicable procedures in statute or regulation for disclosure of such information shall be followed. Moreover, owing to DOE's express environmental, public health and safety, and national security interests, and the need to exercise proper contractor oversight, DOE must be kept fully apprised of all aspects of the contractor's program, including such information as incidents involving reasonable suspicion, occurrences, and

confirmed test results, as well as information concerning test results in the aggregate.

(c) Unless otherwise approved by DOE, the contractors shall ensure that all laboratory records relating to positive drug test results, including initial test records and chromatographic tracings, shall be retained by the laboratory in such a manner as to allow retrieval of all information pertaining to the individual urine specimens for a minimum period of five years after completion of testing of any given specimen, or longer if so instructed by DOE or by the contractor. In addition, a frozen sample of all positive urine specimens shall be retained by the laboratory for at least six months, or longer if so instructed by DOE.

(d) The contractor shall maintain as part of its medical records copies of specimen chain of custody forms.

(e) The specimen chain of custody form will contain the following information:

- (1) Date of collection;
- (2) Tested person's name;
- (3) Tested employee/applicant's social security number or other identification number unique to the individual;
- (4) Specimen number;
- (5) Type of test (random, applicant, occurrence, reasonable suspicion, follow-up, or other);
- (6) Temperature range of specimen;
- (7) Remarks regarding unusual behavior or conditions;
- (8) Collector's signature; and
- (9) Certification signature of specimen provider certifying that specimen identified is in fact the specimen the individual provided.

§707.17 Permissible actions in the event of contractor noncompliance.

Actions available to DOE in the event of contractor noncompliance with the provisions of this part or otherwise performing in a manner inconsistent with its approved program include, but are not limited to, suspension or debarment, contract termination, or reduction in fee in accordance with the contract terms.

PART 708—DOE CONTRACTOR EMPLOYEE PROTECTION PROGRAM

Subpart A—General Provisions

Sec.

- 708.1 What is the purpose of this part?
- 708.2 What are the definitions of terms used in this part?
- 708.3 What employee complaints are covered?
- 708.4 What employee complaints are not covered?
- 708.5 What employee conduct is protected from retaliation by an employer?
- 708.6 What constitutes "a reasonable fear of serious injury?"
- 708.7 What must an employee do before filing a complaint based on retaliation for refusal to participate?
- 708.8 Does this part apply to pending cases?
- 708.9 When is a complaint or other document considered to be "filed" under this part?

Subpart B—Employee Complaint Resolution Process

- 708.10 Where does an employee file a complaint?
- 708.11 Will an employee's identity be kept confidential if the employee so requests?
- 708.12 What information must an employee include in a complaint?
- 708.13 What must an employee do to show that all grievance-arbitration procedures have been exhausted?
- 708.14 How much time does an employee have to file a complaint?
- 708.15 What happens if an employee files a complaint under this part and also pursues a remedy under State or other law?
- 708.16 Will a contractor or a labor organization that represents an employee be notified of an employee's complaint and be given an opportunity to respond with information?
- 708.17 When may DOE dismiss a complaint for lack of jurisdiction or other good cause?
- 708.18 How can an employee appeal dismissal of a complaint for lack of jurisdiction or other good cause?
- 708.19 How can a party obtain review by the Secretary of Energy of a decision on appeal of a dismissal?
- 708.20 Will DOE encourage the parties to resolve the complaint informally?

Subpart C—Investigation, Hearing and Decision Process

- 708.21 What are the employee's options if the complaint cannot be resolved informally?

§ 708.1

- 708.22 What process does the Office of Hearings and Appeals use to conduct an investigation of the complaint?
- 708.23 How does the Office of Hearings and Appeals issue a report of investigation?
- 708.24 Will there always be a hearing after a report of investigation is issued?
- 708.25 Who will conduct the hearing?
- 708.26 When and where will the hearing be held?
- 708.27 May the Hearing Officer recommend mediation to the parties?
- 708.28 What procedures govern a hearing conducted by the Office of Hearings and Appeals?
- 708.29 What must the parties to a complaint prove?
- 708.30 What process does the Hearing Officer follow to issue an initial agency decision?
- 708.31 If no hearing is conducted, what is the process for issuing an initial agency decision?
- 708.32 Can a dissatisfied party appeal an initial agency decision?
- 708.33 What is the procedure for an appeal?
- 708.34 What is the process for issuing an appeal decision?
- 708.35 How can a party obtain review by the Secretary of Energy of an appeal decision?
- 708.36 What remedies for retaliation may be ordered in initial and final agency decisions?
- 708.37 Will an employee whose complaint is denied by a final agency decision be reimbursed for costs and expenses incurred in pursuing the complaint?
- 708.38 How is a final agency decision implemented?
- 708.39 Is a decision and order implemented under this regulation considered a claim by the government against a contractor or a decision by the contracting officer under sections 6 and 7 of the Contract Disputes Act?
- 708.40 Are contractors required to inform their employees about this program?
- 708.41 Will DOE ever refer a complaint filed under this part to another agency for investigation and a decision?
- 708.42 May the deadlines established by this part be extended by any DOE official?
- § 708.43 Does this rule impose an affirmative duty on DOE contractors not to retaliate?

AUTHORITY: 42 U.S.C. 2201(b), 2201(c), 2201(i), and 2201(p); 42 U.S.C. 5814 and 5815; 42 U.S.C. 7251, 7254, 7255, and 7256; and 5 U.S.C. Appendix 3.

SOURCE: 64 FR 12870, Mar. 15, 1999, unless otherwise noted.

EDITORIAL NOTE: Nomenclature changes to part 708 appear at 78 FR 52391, Aug. 23, 2013.

10 CFR Ch. III (1–1–16 Edition)

Subpart A—General Provisions

§ 708.1 What is the purpose of this part?

This part provides procedures for processing complaints by employees of DOE contractors alleging retaliation by their employers for disclosure of information concerning danger to public or worker health or safety, substantial violations of law, or gross mismanagement; for participation in Congressional proceedings; or for refusal to participate in dangerous activities.

§ 708.2 What are the definitions of terms used in this part?

For purposes of this part:

Contractor means a seller of goods or services who is a party to:

(1) A management and operating contract or other type of contract with DOE to perform work directly related to activities at DOE-owned or -leased facilities, or

(2) A subcontract under a contract of the type described in paragraph (1) of this definition, but only with respect to work related to activities at DOE-owned or -leased facilities.

Day means a calendar day.

Discovery means a process used to enable the parties to learn about each other's evidence before a hearing takes place, including oral depositions, written interrogatories, requests for admissions, inspection of property and requests for production of documents.

DOE Official means any officer or employee of DOE whose duties include program management or the investigation or enforcement of any law, rule, or regulation relating to Government contractors or the subject matter of a contract.

EC Director means the Director of the Office of Employee Concerns at DOE Headquarters, or any official to whom the Director delegates his or her functions under this part.

Employee means a person employed by a contractor, and any person previously employed by a contractor if that person's complaint alleges that employment was terminated for conduct described in § 708.5 of this subpart.

Department of Energy

§ 708.4

Field element means a DOE field-based office that is responsible for the management, coordination, and administration of operations at a DOE facility.

Head of Field Element means the manager or head of a DOE operations office or field office, or any official to whom those individuals delegate their functions under this part.

Administrative Judge means an individual appointed by the OHA Director to conduct a hearing on a complaint filed under this part.

Management and operating contract means an agreement under which DOE contracts for the operation, maintenance, or support of a Government-owned or -leased research, development, special production, or testing establishment that is wholly or principally devoted to one or more of the programs of DOE.

Mediation means an informal, confidential process in which a neutral third person assists the parties in reaching a mutually acceptable resolution of their dispute; the neutral third person does not render a decision.

OHA Director means the Director of the Office of Hearings and Appeals, or any official to whom the Director delegates his or her functions under this part.

Party means an employee, contractor, or other party named in a proceeding under this part.

Retaliation means an action (including intimidation, threats, restraint, coercion or similar action) taken by a contractor against an employee with respect to employment (*e.g.*, discharge, demotion, or other negative action with respect to the employee's compensation, terms, conditions or privileges of employment) as a result of the employee's disclosure of information, participation in proceedings, or refusal to participate in activities described in § 708.5 of this subpart.

You means the employee who files a complaint under this part, or the complainant.

§ 708.3 What employee complaints are covered?

This part applies to a complaint of retaliation filed by an employee of a contractor that performs work on behalf of DOE, directly related to activi-

ties at a DOE-owned or -leased site, if the complaint stems from a disclosure, participation, or refusal described in § 708.5.

§ 708.4 What employee complaints are not covered?

If you are an employee of a contractor, you may not file a complaint against your employer under this part if:

(a) The complaint is based on race, color, religion, sex, age, national origin, or other similar basis; or

(b) The complaint involves misconduct that you, acting without direction from your employer, deliberately caused, or in which you knowingly participated; or

(c) Except as provided in § 708.15(a), the complaint is based on the same facts for which you have chosen to pursue a remedy available under:

(1) Department of Labor regulations at 29 CFR part 24, "Procedures for the Handling of Discrimination Complaints under Federal Employee Protection Statutes;"

(2) Federal Acquisition Regulations, 48 CFR part 3, "Federal Acquisition Regulation; Whistleblower Protection for Contractor Employees (Ethics);" or

(3) State or other applicable law, including final and binding grievance-arbitration, as described in § 708.15 of subpart B; or

(d) The complaint is based on the same facts in which you, in the course of a covered disclosure or participation, improperly disclosed Restricted Data, national security information, or any other classified or sensitive information in violation of any Executive Order, statute, or regulation. This part does not override any provision or requirement of any regulation pertaining to Restricted Data, national security information, or any other classified or sensitive information; or

(e) The complaint deals with "terms and conditions of employment" within the meaning of the National Labor Relations Act, except as provided in § 708.5.

§ 708.5

§ 708.5 What employee conduct is protected from retaliation by an employer?

If you are an employee of a contractor, you may file a complaint against your employer alleging that you have been subject to retaliation for:

(a) Disclosing to a DOE official, a member of Congress, any other government official who has responsibility for the oversight of the conduct of operations at a DOE site, your employer, or any higher tier contractor, information that you reasonably believe reveals—

(1) A substantial violation of a law, rule, or regulation;

(2) A substantial and specific danger to employees or to public health or safety; or

(3) Fraud, gross mismanagement, gross waste of funds, or abuse of authority; or

(b) Participating in a Congressional proceeding or an administrative proceeding conducted under this part; or

(c) Subject to § 708.7 of this subpart, refusing to participate in an activity, policy, or practice if you believe participation would—

(1) Constitute a violation of a federal health or safety law; or

(2) Cause you to have a reasonable fear of serious injury to yourself, other employees, or members of the public.

[57 FR 7541, Mar. 3, 1992, as amended at 65 FR 6319, Feb. 9, 2000]

§ 708.6 What constitutes “a reasonable fear of serious injury?”

Participation in an activity, policy, or practice may cause an employee to have a reasonable fear of serious injury that justifies a refusal to participate if:

(a) A reasonable person, under the circumstances that confronted the employee, would conclude there is a substantial risk of a serious accident, injury, or impairment of health or safety resulting from participation in the activity, policy, or practice; or

(b) An employee, because of the nature of his or her employment responsibilities, does not have the training or skills needed to participate safely in the activity or practice.

[57 FR 7541, Mar. 3, 1992, as amended at 65 FR 6319, Feb. 9, 2000]

10 CFR Ch. III (1–1–16 Edition)

§ 708.7 What must an employee do before filing a complaint based on retaliation for refusal to participate?

You may file a complaint for retaliation for refusing to participate in an activity, policy, or practice only if:

(a) Before refusing to participate in the activity, policy, or practice, you asked your employer to correct the violation or remove the danger, and your employer refused to take such action; and

(b) By the 30th day after you refused to participate, you reported the violation or dangerous activity, policy, or practice to a DOE official, a member of Congress, another government official with responsibility for the oversight of the conduct of operations at the DOE site, your employer, or any higher tier contractor, and stated your reasons for refusing to participate.

§ 708.8 Does this part apply to pending cases?

The procedures in this part apply prospectively in any complaint proceeding pending on the effective date of this part.

§ 708.9 When is a complaint or other document considered to be “filed” under this part?

Under this part, a complaint or other document is considered “filed” on the date it is mailed or on the date it is personally delivered to the specified official or office.

Subpart B—Employee Complaint Resolution Process

§ 708.10 Where does an employee file a complaint?

(a) If you were employed by a contractor whose contract is handled by a contracting officer located in DOE Headquarters when the alleged retaliation occurred, you must file two copies of your written complaint with the EC Director.

(b) If you were employed by a contractor at a DOE field facility or site when the alleged retaliation occurred, you must file two copies of your written complaint with the Head of Field Element at the DOE field element with jurisdiction over the contract.

Department of Energy

§ 708.15

§ 708.11 Will an employee's identity be kept confidential if the employee so requests?

No. The identity of an employee who files a complaint under this part appears on the complaint. A copy of the complaint is provided to the contractor and it becomes a public document.

§ 708.12 What information must an employee include in a complaint?

Your complaint does not need to be in any specific form but must be signed by you and contain the following:

(a) A statement specifically describing

(1) The alleged retaliation taken against you and

(2) The disclosure, participation, or refusal that you believe gave rise to the retaliation;

(b) A statement that you are not currently pursuing a remedy under State or other applicable law, as described in § 708.15 of this subpart;

(c) A statement that all of the facts that you have included in your complaint are true and correct to the best of your knowledge and belief; and

(d) An affirmation, as described in § 708.13 of this subpart, that you have exhausted (completed) all applicable grievance or arbitration procedures.

§ 708.13 What must an employee do to show that all grievance-arbitration procedures have been exhausted?

(a) To show that you have exhausted all applicable grievance-arbitration procedures, you must:

(1) State that all available opportunities for resolution through an applicable grievance-arbitration procedure have been exhausted, and provide the date on which the grievance-arbitration procedure was terminated and the reasons for termination; or

(2) State that you filed a grievance under applicable grievance-arbitration procedures, but more than 150 days have passed and a final decision on it has not been issued, and provide the date that you filed your grievance; or

(3) State that your employer has established no grievance-arbitration procedures.

(b) If you do not provide the information specified in § 708.13(a), your complaint may be dismissed for lack of ju-

risdiction as provided in § 708.17 of this subpart.

§ 708.14 How much time does an employee have to file a complaint?

(a) You must file your complaint by the 90th day after the date you knew, or reasonably should have known, of the alleged retaliation.

(b) The period for filing a complaint does not include time spent attempting to resolve the dispute through an internal company grievance-arbitration procedure. The time period for filing stops running on the day the internal grievance is filed and begins to run again on the earlier of:

(1) The day after such dispute resolution efforts end; or

(2) 150 days after the internal grievance was filed if a final decision on the grievance has not been issued.

(c) The period for filing a complaint does not include time spent resolving jurisdictional issues related to a complaint you file under State or other applicable law. The time period for filing stops running on the date the complaint under State or other applicable law is filed and begins to run again the day after a final decision on the jurisdictional issues is issued.

(d) If you do not file your complaint during the 90-day period, the Head of Field Element or EC Director (as applicable) will give you an opportunity to show any good reason you may have for not filing within that period, and that official may, in his or her discretion, accept your complaint for processing.

§ 708.15 What happens if an employee files a complaint under this part and also pursues a remedy under State or other law?

(a) You may not file a complaint under this part if, with respect to the same facts, you choose to pursue a remedy under State or other applicable law, including final and binding grievance-arbitration procedures, unless:

(1) Your complaint under State or other applicable law is dismissed for lack of jurisdiction;

(2) Your complaint was filed under 48 CFR part 3, Subpart 3.9 and the Inspector General, after conducting an initial inquiry, determines not to pursue it; or

§ 708.16

(3) You have exhausted grievance-arbitration procedures pursuant to § 708.13, and issues related to alleged retaliation for conduct protected under § 708.5 remain.

(b) Pursuing a remedy other than final and binding grievance-arbitration procedures does not prevent you from filing a complaint under this part.

(c) You are considered to have filed a complaint under State or other applicable law if you file a complaint, or other pleading, with respect to the same facts in a proceeding established or mandated by State or other applicable law, whether you file such complaint before, concurrently with, or after you file a complaint under this part.

(d) If you file a complaint under State or other applicable law after filing a complaint under this part, your complaint under this regulation will be dismissed under § 708.17(c)(3).

[57 FR 7541, Mar. 3, 1992, as amended at 65 FR 6319, Feb. 9, 2000]

§ 708.16 Will a contractor or a labor organization that represents an employee be notified of an employee's complaint and be given an opportunity to respond with information?

(a) By the 15th day after receiving your complaint, the Head of Field Element or EC Director (as applicable) will provide your employer a copy of your complaint. Your employer has 10 days from receipt of your complaint to submit any comments it wishes to make regarding the allegations in the complaint.

(b) If you are part of a bargaining unit represented for purposes of collective bargaining by a labor organization, the Head of Field Element or EC Director (as applicable) will provide your representative a copy of your complaint by the 15th day after receiving it. The labor organization will be advised that it has 10 days from the receipt of your complaint to submit any comments it wishes to make regarding the allegations in the complaint.

§ 708.17 When may DOE dismiss a complaint for lack of jurisdiction or other good cause?

(a) The Head of Field Element or EC Director (as applicable) may dismiss

10 CFR Ch. III (1-1-16 Edition)

your complaint for lack of jurisdiction or for other good cause after receiving your complaint, either on his or her own initiative or at the request of a party named in your complaint. Such decisions are generally issued by the 15th day after the receipt of your employer's comments.

(b) The Head of Field Element or EC Director (as applicable) will notify you by certified mail, return receipt requested, if your complaint is dismissed for lack of jurisdiction or other good cause, and give you specific reasons for the dismissal, and will notify other parties of the dismissal.

(c) Dismissal for lack of jurisdiction or other good cause is appropriate if:

- (1) Your complaint is untimely; or
- (2) The facts, as alleged in your complaint, do not present issues for which relief can be granted under this part; or
- (3) You filed a complaint under State or other applicable law with respect to the same facts as alleged in a complaint under this part; or
- (4) Your complaint is frivolous or without merit on its face; or
- (5) The issues presented in your complaint have been rendered moot by subsequent events or substantially resolved; or
- (6) Your employer has made a formal offer to provide the remedy that you request in your complaint or a remedy that DOE considers to be equivalent to what could be provided as a remedy under this part.

§ 708.18 How can an employee appeal dismissal of a complaint for lack of jurisdiction or other good cause?

(a) If your complaint is dismissed by the Head of Field Element or EC Director, the administrative process is terminated unless you appeal the dismissal to the OHA Director by the 10th day after you receive the notice of dismissal as evidenced by a receipt for delivery of certified mail.

(b) If you appeal a dismissal to the OHA Director, you must send copies of your appeal to the Head of Field Element or EC Director (as applicable) and all parties. Your appeal must include a copy of the notice of dismissal, and state the reasons why you think the dismissal was erroneous.

Department of Energy

§ 708.21

(c) The OHA Director will issue a decision on your appeal and notify the parties of the decision by the 30th day after it is received.

(d) The OHA Director's decision, either upholding the dismissal by the Head of Field Element or EC Director or ordering further processing of your complaint, is the final decision on your appeal, unless a party files a petition for Secretarial review by the 30th day after receiving the appeal decision.

§ 708.19 How can a party obtain review by the Secretary of Energy of a decision on appeal of a dismissal?

(a) By the 30th day after receiving a decision on an appeal under § 708.18 from the OHA Director, any party may file a petition for Secretarial review of a dismissal with the Office of Hearings and Appeals.

(b) By the 15th day after filing the petition for Secretarial review, a party must file a statement setting forth the arguments in support of its position. A copy of the statement must be served on the other parties, who may file a response by the 20th day after receipt of the statement. Any response must also be served on the other parties.

(c) All submissions permitted under this section must be filed with the Office of Hearings and Appeals.

(d) After a petition for Secretarial review is filed, the Secretary (or his or her delegee) will issue the final agency decision on jurisdiction over the complaint. The Secretary will reverse or revise an appeal decision by the OHA Director only under extraordinary circumstances. In the event he or she determines that a revision in the appeal decision is appropriate, the Secretary will direct the OHA Director to issue an order either upholding the dismissal by the Head of Field Element or EC Director or ordering further processing of your complaint.

§ 708.20 Will DOE encourage the parties to resolve the complaint informally?

(a) Yes. The Head of Field Element or EC Director (as applicable) may recommend that the parties attempt to resolve the complaint informally, for example, through mediation.

(b) The period for attempting informal resolution of the complaint may not exceed 30 days from the date you filed your complaint, unless the parties agree to extend the time.

(c) The 30-day period permitted for informal resolution of the complaint stops running when a request to dismiss your complaint on jurisdictional grounds is filed with the Head of Field Element or EC Director, and begins to run again on the date the OHA Director returns the complaint to the Head of Field Element or EC Director for further processing.

(d) If the parties resolve the complaint informally, the Head of Field Element or EC Director (as applicable) must be given a copy of the settlement agreement or a written statement from you withdrawing the complaint.

Subpart C—Investigation, Hearing and Decision Process

§ 708.21 What are the employee's options if the complaint cannot be resolved informally?

(a) If the attempt at informal resolution is not successful, the Head of Field Element or EC Director (as applicable) will notify you in writing that you have the following options:

(1) Request that your complaint be referred to the Office of Hearings and Appeals for a hearing without an investigation; or

(2) Request that your complaint be referred to the Office of Hearings and Appeals for an investigation followed by a hearing.

(b) You must notify the Head of Field Element or EC Director (as applicable), in writing, by the 20th day after receiving notice of your options, whether you request referral of your complaint to the Office of Hearings and Appeals for a hearing without an investigation, or an investigation followed by a hearing.

(c) If the Head of Field Element or EC Director does not receive your response to the notice of options by the 20th day after your receipt of that notice, DOE will consider your complaint withdrawn.

(d) If you timely request referral to the Office of Hearings and Appeals, the Head of Field Element or EC Director

§ 708.22

(as applicable) will forward your complaint to the OHA Director by the 5th day after receipt of your request.

(e) The Head of the Field Element or EC Director (as applicable) will notify all parties that the complaint has been referred to the Office of Hearings and Appeals, and state whether you have requested a hearing without an investigation or requested an investigation followed by a hearing.

§ 708.22 What process does the Office of Hearings and Appeals use to conduct an investigation of the complaint?

(a) If you request a hearing without an investigation, the OHA Director will not initiate an investigation even if another party requests one.

(b) If you request an investigation followed by a hearing, the OHA Director will appoint a person from the Office of Hearings and Appeals to conduct the investigation. The investigator may not participate or advise in the initial or final agency decision on your complaint.

(c) The investigator will determine the appropriate scope of investigation based on the circumstances of the complaint. The investigator may enter and inspect places and records; make copies of records; interview persons alleged to have been involved in retaliation and other employees of the charged contractor who may have relevant information; take sworn statements; and require the production of any documents or other evidence.

(d) A contractor must cooperate fully with the investigator by making employees and all pertinent evidence available upon request.

(e) A person being interviewed in an investigation has the right to be represented by a person of his or her choosing.

(f) Parties to the complaint are not entitled to be present at interviews conducted by an investigator.

(g) If a person other than the complainant requests that his or her identity be kept confidential, the investigator may grant confidentiality, but must advise such person that confidentiality means that the Office of Hearings and Appeals will not identify the person as a source of information to

10 CFR Ch. III (1–1–16 Edition)

anyone outside the Office of Hearings and Appeals, except as required by statute or other law, or as determined by the OHA Director to be unavoidable.

§ 708.23 How does the Office of Hearings and Appeals issue a report of investigation?

(a) The investigator will complete the investigation and issue a report of investigation by the 60th day after the complaint is received by the Office of Hearings and Appeals, unless the OHA Director, for good cause, extends the investigation for no more than 30 days.

(b) The investigator will provide copies of the report of investigation to the parties. The investigation will not be reopened after the report of investigation is issued.

(c) If the parties informally resolve the complaint (e.g., through mediation) after an investigation is started, you must notify the OHA Director in writing of your decision to withdraw the complaint.

§ 708.24 Will there always be a hearing after a report of investigation is issued?

(a) No. An employee may withdraw a hearing request after the report of investigation is issued. However, the hearing may be canceled only if all parties agree that they do not want a hearing.

(b) If the hearing is canceled, the Administrative Judge will issue an initial agency decision pursuant to § 708.31 of this subpart.

§ 708.25 Who will conduct the hearing?

(a) The OHA Director will appoint a Administrative Judge from the Office of Hearings and Appeals to conduct a hearing.

(b) The Administrative Judge may not be subject to the supervision or direction of the investigator.

§ 708.26 When and where will the hearing be held?

(a) The Administrative Judge will schedule a hearing to be held by the 90th day after receipt of the complaint, or issuance of the report of investigation, whichever is later. Any extension of the hearing date must be approved by the OHA Director.

(b) The Administrative Judge will schedule the hearing for a location near the site where the alleged retaliation occurred or your place of employment, or at another location that is appropriate considering the circumstances of a particular case.

§ 708.27 May the Administrative Judge recommend mediation to the parties?

The Administrative Judge may recommend, but may not require, that the parties attempt to resolve the complaint through mediation or other informal means at any time before issuance of an initial agency decision on the complaint.

§ 708.28 What procedures govern a hearing conducted by the Office of Hearings and Appeals?

(a) In all hearings under this part:

(1) The parties have the right to be represented by a person of their choosing or to proceed without representation. The parties are responsible for producing witnesses in their behalf, including requesting the issuance of subpoenas, if necessary;

(2) Testimony of witnesses is given under oath or affirmation, and witnesses must be advised of the applicability of 18 U.S.C. 1001 and 1621, dealing with the criminal penalties associated with false statements and perjury;

(3) Witnesses are subject to cross-examination;

(4) Formal rules of evidence do not apply, but OHA may use the Federal Rules of Evidence as a guide; and

(5) A court reporter will make a transcript of the hearing.

(b) The Administrative Judge has all powers necessary to regulate the conduct of proceedings:

(1) The Administrative Judge may order discovery at the request of a party, based on a showing that the requested discovery is designed to produce evidence regarding a matter, not privileged, that is relevant to the subject matter of the complaint;

(2) The Administrative Judge may permit parties to obtain discovery by any appropriate method, including deposition upon oral examination or written questions; written interrogatories; production of documents or things; per-

mission to enter upon land or other property for inspection and other purposes; and requests for admission;

(3) The Administrative Judge may issue subpoenas for the appearance of witnesses on behalf of either party, or for the production of specific documents or other physical evidence;

(4) The Administrative Judge may rule on objections to the presentation of evidence; exclude evidence that is immaterial, irrelevant, or unduly repetitious; require the advance submission of documents offered as evidence; dispose of procedural requests; grant extensions of time; determine the format of the hearing; direct that written motions, documents, or briefs be filed with respect to issues raised during the course of the hearing; ask questions of witnesses; direct that documentary evidence be served upon other parties (under protective order if such evidence is deemed confidential); and otherwise regulate the conduct of the hearing;

(5) The Administrative Judge may, at the request of a party or on his or her own initiative, dismiss a claim, defense, or party and make adverse findings upon the failure of a party or the party's representative to comply with a lawful order of the Administrative Judge, or, without good cause, to attend a hearing;

(6) The Administrative Judge, upon request of a party, may allow the parties a reasonable time to file pre-hearing briefs or written statements with respect to material issues of fact or law. Any pre-hearing submission must be limited to the issues specified and filed within the time prescribed by the Administrative Judge.

(7) The parties are entitled to make oral closing arguments, but post-hearing submissions are only permitted by direction of the Administrative Judge.

(8) Parties allowed to file written submissions must serve copies upon the other parties within the time prescribed by the Administrative Judge.

(9) The Administrative Judge is prohibited, beginning with his or her appointment and until a final agency decision is issued, from initiating or otherwise engaging in *ex parte* (private) discussions with any party on the merits of the complaint.

§ 708.29

§ 708.29 What must the parties to a complaint prove?

The employee who files a complaint has the burden of establishing by a preponderance of the evidence that he or she made a disclosure, participated in a proceeding, or refused to participate, as described under § 708.5, and that such act was a contributing factor in one or more alleged acts of retaliation against the employee by the contractor. Once the employee has met this burden, the burden shifts to the contractor to prove by clear and convincing evidence that it would have taken the same action without the employee's disclosure, participation, or refusal.

§ 708.30 What process does the Administrative Judge follow to issue an initial agency decision?

(a) The Administrative Judge will issue an initial agency decision on your complaint by the 60th day after the later of:

(1) The date the Administrative Judge approves the parties' agreement to cancel the hearing;

(2) The date the Administrative Judge receives the transcript of the hearing; or

(3) The date the Administrative Judge receives post-hearing submissions permitted under § 708.28(b)(7) of this subpart.

(b) The Administrative Judge will serve the initial agency decision on all parties.

(c) An initial agency decision issued by the Administrative Judge will contain appropriate findings, conclusions, an order, and the factual basis for each finding, whether or not a hearing has been held on the complaint. In making such findings, the Administrative Judge may rely upon, but is not bound by, the report of investigation.

(d) If the Administrative Judge determines that an act of retaliation has occurred, the initial agency decision will include an order for any form of relief permitted under § 708.36.

(e) If the Administrative Judge determines that an act of retaliation has not occurred, the initial agency decision will state that the complaint is denied.

10 CFR Ch. III (1-1-16 Edition)

§ 708.31 If no hearing is conducted, what is the process for issuing an initial agency decision?

(a) If no party wants a hearing after the issuance of a report of investigation, the Administrative Judge will issue an initial agency decision by the 60th day after the hearing is canceled pursuant to § 708.24. The standards in § 708.30, governing the issuance of an initial agency decision, apply whether or not a hearing has been held on the complaint.

(b) The Administrative Judge will serve the initial agency decision on all parties.

§ 708.32 Can a dissatisfied party appeal an initial agency decision?

(a) Yes. By the 15th day after receiving an initial agency decision from the Administrative Judge, any party may file a notice of appeal with the OHA Director requesting review of the initial agency decision.

(b) A party who appeals an initial agency decision (the appellant) must serve a copy of the notice of appeal on all other parties.

(c) A party who receives an initial agency decision by a Administrative Judge has not exhausted its administrative remedies until an appeal has been filed with the OHA Director and a decision granting or denying the appeal has been issued.

§ 708.33 What is the procedure for an appeal?

(a) By the 15th day after filing a notice of appeal under § 708.32, the appellant must file a statement identifying the issues that it wishes the OHA Director to review. A copy of the statement must be served on the other parties, who may file a response by the 20th day after receipt of the statement. Any response must also be served on the other parties.

(b) In considering the appeal, the OHA Director:

(1) May initiate an investigation of any statement contained in the request for review and utilize any relevant facts obtained by such investigation in conducting the review of the initial agency decision;

(2) May solicit and accept submissions from any party that are relevant

Department of Energy

§ 708.36

to the review. The OHA Director may establish appropriate times to allow for such submissions;

(3) May consider any other source of information that will advance the evaluation, provided that all parties are given an opportunity to respond to all third person submissions; and

(4) Will close the record on appeal after receiving the last submission permitted under this section.

§ 708.34 What is the process for issuing an appeal decision?

(a) If there is no appeal of an initial agency decision, and the time for filing an appeal has passed, the initial agency decision becomes the final agency decision.

(b) If there is an appeal of an initial agency decision, the OHA Director will issue an appeal decision based on the record of proceedings by the 60th day after the record is closed.

(1) An appeal decision issued by the OHA Director will contain appropriate findings, conclusions, an order, and the factual basis for each finding, whether or not a hearing has been held on the complaint. In making such findings, the OHA Director may rely upon, but is not bound by, the report of investigation and the initial agency decision.

(2) If the OHA Director determines that an act of retaliation has occurred, the appeal decision will include an order for any form of relief permitted under § 708.36.

(3) If the OHA Director determines that the contractor charged has not committed an act of retaliation, the appeal decision will deny the complaint.

(c) The OHA Director will send an appeal decision to all parties and to the Head of Field Element or EC Director having jurisdiction over the contract under which you were employed when the alleged retaliation occurred.

(d) The appeal decision issued by the OHA Director is the final agency decision unless a party files a petition for Secretarial review by the 30th day after receiving the appeal decision.

§ 708.35 How can a party obtain review by the Secretary of Energy of an appeal decision?

(a) By the 30th day after receiving an appeal decision from the OHA Director, any party may file a petition for Secretarial review with the Office of Hearings and Appeals.

(b) By the 15th day after filing a petition for Secretarial review, the petitioner must file a statement identifying the issues that it wishes the Secretary to consider. A copy of the statement must be served on the other parties, who may file a response by the 20th day after receipt of the statement. Any response must also be served on the other parties.

(c) All submissions permitted under this section must be filed with the Office of Hearings and Appeals.

(d) After a petition for Secretarial review is filed, the Secretary (or his or her delegee) will issue the final agency decision on the complaint. The Secretary will reverse or revise an appeal decision by the OHA Director only under extraordinary circumstances. In the event the Secretary determines that a revision in the appeal decision is appropriate, the Secretary will direct the OHA Director to issue a revised decision which is the final agency action on the complaint.

§ 708.36 What remedies for retaliation may be ordered in initial and final agency decisions?

(a) *General remedies.* If the initial or final agency decision determines that an act of retaliation has occurred, it may order:

- (1) Reinstatement;
- (2) Transfer preference;
- (3) Back pay;

(4) Reimbursement of your reasonable costs and expenses, including attorney and expert-witness fees reasonably incurred to prepare for and participate in proceedings leading to the initial or final agency decision; or

(5) Such other remedies as are deemed necessary to abate the violation and provide you with relief.

(b) *Interim relief.* If an initial agency decision contains a determination that

§ 708.37

an act of retaliation occurred, the decision may order the contractor to provide you with appropriate interim relief (including reinstatement) pending the outcome of any request for review of the decision by the OHA Director. Such interim relief will not include payment of any money.

§ 708.37 Will an employee whose complaint is denied by a final agency decision be reimbursed for costs and expenses incurred in pursuing the complaint?

No. If your complaint is denied by a final agency decision, you may not be reimbursed for the costs and expenses you incurred in pursuing the complaint.

§ 708.38 How is a final agency decision implemented?

(a) The Head of Field Element having jurisdiction over the contract under which you were employed when the alleged retaliation occurred, or EC Director, will implement a final agency decision by forwarding the decision and order to the contractor, or subcontractor, involved.

(b) A contractor's failure or refusal to comply with a final agency decision and order under this regulation may result in a contracting officer's decision to disallow certain costs or terminate the contract for default. In the event of a contracting officer's decision to disallow costs or terminate a contract for default, the contractor may file a claim under the disputes procedures of the contract.

§ 708.39 Is a decision and order implemented under this regulation considered a claim by the government against a contractor or a decision by the contracting officer under sections 6 and 7 of the Contract Disputes Act?

No. A final agency decision and order issued pursuant to this regulation is not considered a claim by the government against a contractor or "a decision by the contracting officer" under sections 6 and 7 of the Contract Disputes Act (41 U.S.C. 605 and 606).

10 CFR Ch. III (1-1-16 Edition)

§ 708.40 Are contractors required to inform their employees about this program?

Yes. Contractors who are covered by this part must inform their employees about these regulations by posting notices in conspicuous places at the work site. These notices must include the name and address of the DOE office where you can file a complaint under this part.

[64 FR 37397, July 12, 1999]

§ 708.41 Will DOE ever refer a complaint filed under this part to another agency for investigation and a decision?

Notwithstanding the provisions of this part, the Secretary of Energy retains the right to request that a complaint filed under this part be accepted by another Federal agency for investigation and factual determinations.

[64 FR 37397, July 12, 1999]

§ 708.42 May the deadlines established by this part be extended by any DOE official?

Yes. The Secretary of Energy (or the Secretary's designee) may approve the extension of any deadline established by this part, and the OHA Director may approve the extension of any deadline under § 708.22 through § 708.34 of this subpart (relating to the investigation, hearing, and OHA appeal process).

[64 FR 37397, July 12, 1999]

§ 708.43 Does this rule impose an affirmative duty on DOE contractors not to retaliate?

Yes. DOE contractors may not retaliate against any employee because the employee (or any person acting at the request of the employee) has taken an action listed in §§ 708.5(a)-(c).

[65 FR 6319, Feb. 9, 2000; 65 FR 9201, Feb. 24, 2000]

PART 709—COUNTERINTELLIGENCE EVALUATION PROGRAM

Subpart A—General Provisions

Sec.

709.1 Purpose.

709.2 Definitions.

Department of Energy

§ 709.2

- 709.3 Covered persons subject to a CI evaluation and polygraph.
- 709.4 Notification of a CI evaluation.
- 709.5 Waiver of polygraph examination requirements.

Subpart B—CI Evaluation Protocols and Protection of National Security

- 709.10 Scope of a counterintelligence evaluation.
- 709.11 Topics within the scope of a polygraph examination.
- 709.12 Defining polygraph examination questions.
- 709.13 Implications of refusal to take a polygraph examination.
- 709.14 Consequences of a refusal to complete a CI evaluation including a polygraph examination.
- 709.15 Processing counterintelligence evaluation results.
- 709.16 Application of Counterintelligence Evaluation Review Boards in reaching conclusions regarding CI evaluations.
- 709.17 Final disposition of CI evaluation findings and recommendations.

Subpart C—Safeguarding Privacy and Employee Rights

- 709.21 Requirements for notification of a polygraph examination.
- 709.22 Right to counsel or other representation.
- 709.23 Obtaining consent to a polygraph examination.
- 709.24 Other information provided to the covered person prior to a polygraph examination.
- 709.25 Limits on use of polygraph examination results that reflect “Significant Response” or “No Opinion”.
- 709.26 Protection of confidentiality of CI evaluation records to include polygraph examination records and other pertinent documentation.

Subpart D—Polygraph Examination and Examiner Standards

- 709.31 DOE standards for polygraph examiners and polygraph examinations.
- 709.32 Training requirements for polygraph examiners.

AUTHORITY: 42 U.S.C. 2011, *et seq.*, 7101, *et seq.*, 7144b, *et seq.*, 7383h-1; 50 U.S.C. 2401, *et seq.*

SOURCE: 71 FR 57392, Sept. 29, 2006, unless otherwise noted.

Subpart A—General Provisions

§ 709.1 Purpose.

This part:

(a) Describes the categories of individuals who are subject for counterintelligence evaluation processing;

(b) Provides guidelines for the counterintelligence evaluation process, including the use of counterintelligence-scope polygraph examinations, and for the use of event-specific polygraph examinations; and

(c) Provides guidelines for protecting the rights of individual DOE employees and DOE contractor employees subject to this part.

§ 709.2 Definitions.

For purposes of this part:

Access authorization means an administrative determination under the Atomic Energy Act of 1954, Executive Order 12968, or 10 CFR part 710 that an individual is eligible for access to classified matter or is eligible for access to, or control over, special nuclear material.

Adverse personnel action means:

(1) With regard to a DOE employee, the removal, suspension for more than 14 days, reduction in grade or pay, or a furlough of 30 days or less as described in 5 U.S.C. Chapter 75; or

(2) With regard to a contractor employee, the discharge, discipline, or denial of employment or promotion, or any other discrimination in regard to hire or tenure of employment or any term or condition of employment.

Contractor means any industrial, educational, commercial, or other entity, assistance recipient, or licensee, including an individual who has executed an agreement with DOE for the purpose of performing under a contract, license, or other agreement, and including any subcontractors of any tier.

Counterintelligence or CI means information gathered and activities conducted to protect against espionage, other intelligence activities, sabotage, or assassinations conducted for or on behalf of foreign powers, organizations or persons, or international terrorist activities, but not including personnel, physical, document or communications security programs.

Counterintelligence evaluation or CI evaluation means the process, possibly including a counterintelligence scope polygraph examination, used to make

recommendations as to whether certain employees should have access to information or materials protected by this part.

Counterintelligence program office means the Office of Counterintelligence in the Office of Intelligence and Counterintelligence (and any successor office to which that office's duties and authorities may be reassigned).

Counterintelligence-scope or CI-scope polygraph examination means a polygraph examination using questions reasonably calculated to obtain counterintelligence information, including questions relating to espionage, sabotage, terrorism, unauthorized disclosure of classified information, deliberate damage to or malicious misuse of a United States Government information or defense system, and unauthorized contact with foreign nationals.

Covered person means an applicant for employment with DOE or a DOE contractor, a DOE employee, a DOE contractor employee, and an assignee or detailee to DOE from another agency.

DOE means the Department of Energy including the National Nuclear Security Administration (NNSA).

Foreign nexus means specific indications that a covered person is or may be engaged in clandestine or unreported relationships with foreign powers, organizations or persons, or international terrorists; contacts with foreign intelligence services; or other hostile activities directed against DOE facilities, property, personnel, programs or contractors by or on behalf of foreign powers, organizations or persons, or international terrorists.

Human Reliability Program means the program under 10 CFR part 712.

Intelligence means information relating to the capabilities, intentions, or activities of foreign governments or elements thereof, foreign organizations or foreign persons.

Local commuting area means the geographic area that usually constitutes one area for employment purposes. It includes any population center (or two or more neighboring ones) and the surrounding localities in which people live and can reasonably be expected to travel back and forth daily to their usual employment.

Materials means any “nuclear explosive” as defined in 10 CFR 712.3, and any “special nuclear material,” hazardous “source material,” and hazardous “byproduct material” as those terms are defined by the Atomic Energy Act of 1954 (42 U.S.C. 2014).

National security information means information that has been determined pursuant to Executive Order 12958, as amended by Executive Order 13292, or any predecessor order to require protection against unauthorized disclosure and is marked to indicate its classified status when in documentary form.

NNSA means DOE's National Nuclear Security Administration.

No opinion means an evaluation of a polygraph test by a polygraph examiner in which the polygraph examiner cannot render an opinion.

Polygraph examination means all activities that take place between a Polygraph Examiner and an examinee (person taking the test) during a specific series of interactions, including the pretest interview, the use of the polygraph instrument to collect physiological data from the examinee while presenting a series of tests, the test data analysis phase, and the post-test phase.

Polygraph examination records means all records of the polygraph examination, including the polygraph report, audio-video recording, and the polygraph consent form.

Polygraph instrument means a diagnostic instrument used during a polygraph examination, which is capable of monitoring, recording and/or measuring at a minimum, respiratory, electrodermal, and cardiovascular activity as a response to verbal or visual stimuli.

Polygraph report means a document that may contain identifying data of the examinee, a synopsis of the basis for which the examination was conducted, the relevant questions utilized, and the examiner's conclusion.

Polygraph test means that portion of the polygraph examination during which the polygraph instrument collects physiological data based upon the individual's responses to questions from the examiner.

Program Manager means a DOE official designated by the Secretary or the

Department of Energy

§ 709.3

Head of a DOE Element to make an access determination under this part.

Random means a statistical process whereby eligible employees have an equal probability of selection for a CI evaluation each time the selection process occurs.

Regular and routine means access by individuals without further permission more than two times per calendar quarter.

Relevant questions are those questions used during the polygraph examination that pertain directly to the issues for which the examination is being conducted.

Restricted data means all data concerning the design, manufacture, or utilization of atomic weapons; the production of special nuclear material; or the use of special nuclear material in the production of energy, but does not include data declassified or removed from the restricted data category pursuant to section 142 of the Atomic Energy Act of 1954.

Secret means the security classification that is applied to DOE-generated information or material the unauthorized disclosure of which reasonably could be expected to cause serious damage to the national security.

Secretary means the Secretary of Energy or the Secretary's designee.

Significant response means an opinion that the analysis of the polygraph charts reveals consistent, significant, timely physiological responses to the relevant questions.

Special Access Program or SAP means a program established under Executive Order 12958 for a specific class of classified information that imposes safeguarding and access requirements that exceed those normally required for information at the same classification level.

Suspend means temporarily to withdraw an employee's access to information or materials protected under § 709.3 of this part.

System Administrator means any individual who has privileged system, data, or software access that permits that individual to exceed the authorization of a normal system user and thereby override, alter, or negate integrity verification and accountability procedures or other automated and/or tech-

nical safeguards provided by the systems security assets for normal users.

Top Secret means the security classification that is applied to DOE-generated information or material the unauthorized disclosure of which reasonably could be expected to cause exceptionally grave damage to the national security.

Unresolved issues means an opinion by a CI evaluator that the analysis of the information developed during a CI evaluation remains inconclusive and needs further clarification before a CI access recommendation can be made.

§ 709.3 Covered persons subject to a CI evaluation and polygraph.

(a) *Mandatory CI evaluation.* Except as provided in § 709.5 of this part with regard to waivers, a CI evaluation, which may include a CI-scope polygraph examination, is required for any covered person in any category under paragraph (b) of this section who will have or has access to classified information or materials protected under this paragraph. Such an evaluation is required for covered persons who are incumbent employees at least once every five years. DOE, in its sole discretion, may require a CI-scope polygraph examination:

(1) If the CI evaluation reveals foreign nexus issues;

(2) If a covered person who is an incumbent employee is to be assigned within DOE to activities involving another agency and a polygraph examination is required as a condition of access to the activities by the other agency; or

(3) If a covered person who is an incumbent employee is proposed to be assigned or detailed to another agency and the receiving agency requests DOE to administer a polygraph examination as a condition of the assignment or detail.

(b) Paragraph (a) of this section applies to covered persons:

(1) In an intelligence or counterintelligence program office (or with programmatic reporting responsibility to an intelligence or counterintelligence program office) because of access to classified intelligence information, or sources, or methods;

§ 709.3

10 CFR Ch. III (1–1–16 Edition)

(2) With access to Sensitive Compartmented Information;

(3) With access to information that is protected within a non-intelligence Special Access Program (SAP) designated by the Secretary;

(4) With regular and routine access to Top Secret Restricted Data;

(5) With regular and routine access to Top Secret National Security Information; and

(6) Designated, with approval of the Secretary, on the basis of a risk assessment consistent with paragraphs (e) and (f) of this section, by a Program Manager for the following DOE offices and programs (and any successors to those offices and programs): The Office of the Secretary; the Human Reliability Program; the National Nuclear Security Administration (including the Office of Emergency Operations); and the Office of Health, Safety and Security.

(c) *Random CI evaluation.* Except as provided in § 709.5 of this part with regard to waivers, DOE may require a CI evaluation, including a CI-scope polygraph examination, of covered persons who are incumbent employees selected on a random basis from the following:

(1) All covered persons identified in § 709.3(b);

(2) All employees in the Office of Independent Oversight (or any successor office) within the Office of Health, Safety and Security because of access to classified information regarding the inspection and assessment of safeguards and security functions, including cyber security, of the DOE;

(3) All employees in other elements of the Office of Health, Safety and Security (or any successor office) because of their access to classified information;

(4) All employees in the NNSA Office of Emergency Operations (OEO or any successor office) including DOE field offices or contractors who support OEO because of their access to classified information;

(5) All employees with regular and routine access to classified information concerning: The design and function of nuclear weapons use control systems, features, and their components (currently designated as Sigma 15); vulnerability of nuclear weapons to delib-

erate unauthorized nuclear detonation (currently designated as Sigma 14); and improvised nuclear device concepts or designs; and

(6) Any system administrator with access to a system containing classified information, as identified by the DOE or NNSA Chief Information Officer.

(d) *Specific incident polygraph examinations.* In response to specific facts or circumstances with potential counterintelligence implications with a defined foreign nexus, the Director of the Office of Intelligence and Counterintelligence (or, in the case of a covered person in NNSA, the Administrator of NNSA, after consideration of the recommendation of the Director, Office of Intelligence and Counterintelligence) may require a covered person with access to DOE classified information or materials to consent to and take an event-specific polygraph examination. Except as otherwise determined by the Secretary, on the recommendation of the appropriate Program Manager, if a covered person with access to DOE classified information or materials refuses to consent to or take a polygraph examination under this paragraph, then the Director of the Office of Intelligence and Counterintelligence (or, in the case of a covered person in NNSA, the Administrator of NNSA, after consideration of the recommendation of the Director, Office of Intelligence and Counterintelligence) shall direct the denial of access (if any) to classified information and materials protected under paragraphs (b) and (c) of this section, and shall refer the matter to the Office of Health, Safety and Security for a review of access authorization eligibility under 10 CFR part 710. In addition, in the circumstances described in this paragraph, any covered person with access to DOE classified information or material may request a polygraph examination.

(e) *Risk assessment.* For the purpose of deciding whether to designate or remove employees for mandatory CI evaluations under paragraph (b)(6) of this section, Program Managers may consider:

(1) Access on a non-regular and non-routine basis to Top Secret Restricted Data or Top Secret National Security

Department of Energy

§ 709.5

Information or the nature and extent of access to other classified information;

(2) Unescorted or unrestricted access to significant quantities or forms of special nuclear materials; and

(3) Any other factors concerning the employee's responsibilities that are relevant to determining risk of unauthorized disclosure of classified information or materials.

(f) Based on the risk assessments conducted under paragraph (e) of this section and in consultation with the Director of the Office of Intelligence and Counterintelligence, the Program Manager shall provide recommendations as to positions to be designated or removed under paragraph (b)(6) of this section for approval by the Secretary. Recommendations shall include a summary of the basis for designation or removal of the positions and of the views of the Director of the Office of Intelligence and Counterintelligence as to the recommendations.

(g) Not less than once every calendar year quarter, the responsible Program Manager must provide a list of all incumbent employees who are covered persons under paragraphs (b) and (c) of this section to the Director of the Office of Intelligence and Counterintelligence.

§ 709.4 Notification of a CI evaluation.

(a) If a polygraph examination is scheduled, DOE must notify the covered person, in accordance with § 709.21 of this part.

(b) Any job announcement or posting with respect to any position with access to classified information or materials protected under § 709.3(b) and (c) of this part should indicate that DOE may condition the selection of an individual for the position (709.3(b)) or retention in that position (709.3(b) and (c)) upon his or her successful completion of a CI evaluation, including a CI-scope polygraph examination.

(c) Advance notice will be provided to the affected Program Manager and laboratory/site/facility director of the covered persons who are included in any random examinations that are administered in accordance with provisions at § 709.3(c).

§ 709.5 Waiver of polygraph examination requirements.

(a) *General.* Upon a waiver request submitted under paragraph (b) of this section, DOE may waive the CI-scope polygraph examination under § 709.3 of this part for:

(1) Any covered person based upon certification from another Federal agency that the covered person has successfully completed a full scope or CI-scope polygraph examination administered within the previous five years;

(2) Any covered person who is being treated for a medical or psychological condition that, based upon consultation with the covered person and appropriate medical personnel, would preclude the covered person from being tested; or

(3) Any covered person in the interest of national security.

(b) *Submission of Waiver Requests.* A covered person may submit a request for waiver under this section, and the request shall assert the basis for the waiver sought and shall be submitted, in writing, to the Director, Office of Intelligence and Counterintelligence, at the following address: U.S. Department of Energy, Attn: Director, Office of Intelligence and Counterintelligence, 1000 Independence Avenue, SW., Washington, DC 20585.

(c) *Disposition of Waiver Requests.* The Director, Office of Intelligence and Counterintelligence, shall issue a written decision on a request for waiver prior to the administration of a polygraph examination. The Director shall obtain the concurrence of the Secretary in his or her decision on a request for waiver under § 709.5(a)(3) and shall obtain the concurrence of the Administrator of NNSA in a decision on a waiver request from an NNSA covered person under § 709.5(a)(1) and § 709.5(a)(2). Notification of approval of a waiver request will contain information regarding the duration of the waiver and any other relevant information. Notification of the denial of a waiver request will state the basis for the denial and state that the covered person may request reconsideration of the denial by the Secretary under § 709.5(d).

§ 709.10

(d) *Reconsideration Rights.* If a waiver is denied, the covered person may file with the Secretary a request for reconsideration of the denial within 30 days of receipt of the decision, and the Secretary's decision will be issued prior to the administration of a polygraph examination.

Subpart B—CI Evaluation Protocols and Protection of National Security

§ 709.10 Scope of a counterintelligence evaluation.

A counterintelligence evaluation consists of a counterintelligence-based review of the covered person's personnel security file and review of other relevant information available to DOE in accordance with applicable guidelines and authorities. As provided in § 709.3(b), DOE also may require a CI-scope polygraph examination. As provided for in § 709.3(c), a CI evaluation, if conducted on a random basis, will include a CI-scope polygraph examination. As set forth in § 709.15(b) and (c) of this part, a counterintelligence evaluation may also include other pertinent measures to address and resolve counterintelligence issues in accordance with Executive Order 12333, the DOE "Procedures for Intelligence Activities," and other relevant laws, guidelines and authorities, as applicable.

§ 709.11 Topics within the scope of a polygraph examination.

(a) DOE may ask questions in a specific incident polygraph examination that are appropriate for a CI-scope examination or that are relevant to the counterintelligence concerns with a defined foreign nexus raised by the specific incident.

(b) A CI-scope polygraph examination is limited to topics concerning the covered person's involvement in espionage, sabotage, terrorism, unauthorized disclosure of classified information, unauthorized foreign contacts, and deliberate damage to or malicious misuse of a U.S. government information or defense system.

(c) DOE may not ask questions that:

(1) Probe a covered person's thoughts or beliefs;

10 CFR Ch. III (1–1–16 Edition)

(2) Concern conduct that has no CI implication with a defined foreign nexus; or

(3) Concern conduct that has no direct relevance to a CI evaluation.

§ 709.12 Defining polygraph examination questions.

The examiner determines the exact wording of the polygraph questions based on the examiner's pretest interview of the covered person, the covered person's understanding of the questions, established test question procedures from the Department of Defense Polygraph Institute, and other input from the covered person.

§ 709.13 Implications of refusal to take a polygraph examination.

(a) Subject to § 709.14 of this part, a covered person may refuse to take a polygraph examination pursuant to § 709.3 of this part, and a covered person being examined may terminate the examination at any time.

(b) If a covered person terminates a polygraph examination prior to the completion of the examination, DOE may treat that termination as a refusal to complete a CI evaluation under § 709.14 of this part.

§ 709.14 Consequences of a refusal to complete a CI evaluation including a polygraph examination.

(a) If a covered person is an applicant for employment or assignment or a potential detailee or assignee with regard to an identified position and the covered person refuses to complete a CI evaluation including a polygraph examination required by this part as an initial condition of access, DOE and its contractors must refuse to employ, assign, or detail that covered person with regard to the identified position.

(b) If a covered person is an incumbent employee in an identified position subject to a CI evaluation including a polygraph examination under § 709.3(b), (c), or (d), and the covered person refuses to complete a CI evaluation, DOE and its contractors must deny that covered person access to classified information and materials protected under § 709.3(b) and (c) and may take other actions consistent with the denial of access, including administrative

Department of Energy

§ 709.16

review of access authorization under 10 CFR part 710. If the covered person is a DOE employee, DOE may reassign or realign the DOE employee's duties, or take other action, consistent with that denial of access and applicable personnel regulations.

(c) If a DOE employee refuses to take a CI polygraph examination, DOE may not record the fact of that refusal in the employee's personnel file.

§ 709.15 Processing counterintelligence evaluation results.

(a) If the reviews under § 709.10 or a polygraph examination present unresolved foreign nexus issues that raise significant questions about the covered person's access to classified information or materials protected under § 709.3 of this part that justified the counterintelligence evaluation, DOE may undertake a more comprehensive CI evaluation that, in appropriate circumstances, may include evaluation of financial, credit, travel, and other relevant information to resolve any identified issues. Participation by Office of Intelligence and Counterintelligence personnel in any such evaluation is subject to Executive Order 12333, the DOE "Procedures for Intelligence Activities," and other relevant laws, guidelines, and authorities as may be applicable with respect to such matters.

(b) The Office of Intelligence and Counterintelligence, in coordination with NNSA with regard to issues concerning a NNSA covered person, may conduct an in-depth interview with the covered person, may request relevant information from the covered person, and may arrange for the covered person to undergo an additional polygraph examination.

(c) Whenever information is developed by the Office of Health, Safety and Security indicating counterintelligence issues, the Director of that Office shall notify the Director, Office of Intelligence and Counterintelligence.

(d) If, in carrying out a comprehensive CI evaluation of a covered person under this section, there are significant unresolved issues, not exclusively related to polygraph examination results, indicating counterintelligence issues, then the Director, Office of In-

telligence and Counterintelligence shall notify the DOE national laboratory director (if applicable), plant manager (if applicable) and program manager(s) for whom the individual works that the covered person is undergoing a CI evaluation pursuant to this part and that the evaluation is not yet complete.

(e) Utilizing the DOE security criteria in 10 CFR part 710, the Director, Office of Intelligence and Counterintelligence, makes a determination whether a covered person completing a CI evaluation has made disclosures that warrant referral, as appropriate, to the Office of Health, Safety and Security or the Manager of the applicable DOE/NNSA Site, Operations Office or Service Center.

§ 709.16 Application of Counterintelligence Evaluation Review Boards in reaching conclusions regarding CI evaluations.

(a) *General.* If the results of a counterintelligence evaluation are not dispositive, the Director of the Office of Intelligence and Counterintelligence may convene a Counterintelligence Evaluation Review Board to obtain the individual views of each member as assistance in resolving counterintelligence issues identified during a counterintelligence evaluation.

(b) *Composition.* A Counterintelligence Evaluation Review Board is chaired by the Director of the Office of Intelligence and Counterintelligence (or his/her designee) and includes representation from the appropriate line Program Managers, lab/site/facility management (if a contractor employee is involved), NNSA, if the unresolved issues involve an NNSA covered person, the DOE Office of Health, Safety and Security and security directors for the DOE or NNSA site or operations office.

(c) *Process.* When making a final recommendation under § 709.17 of this part, to a Program Manager, the Director of Intelligence and Counterintelligence shall report on the Counterintelligence Evaluation Review Board's views, including any consensus recommendation, or if the members are divided, a summary of majority and dissenting views.

§ 709.17 Final disposition of CI evaluation findings and recommendations.

(a) Following completion of a CI evaluation, the Director of the Office of Intelligence and Counterintelligence must recommend, in writing, to the appropriate Program Manager that the covered person's access be approved or retained, or denied or revoked.

(b) If the Program Manager agrees with the recommendation, the Program Manager notifies the covered person that the covered person's access has been approved or retained, or denied or revoked.

(c) If the Program Manager disagrees with the recommendation of the Director, Office of Intelligence and Counterintelligence, the matter is referred to the Secretary for a final decision.

(d) If the Program Manager denies or revokes a DOE employee's access, DOE may reassign the employee or realign the employee's duties within the local commuting area or take other actions consistent with the denial of access.

(e) If the Program Manager revokes the access of a covered person assigned or detailed to DOE, DOE may remove the assignee or detailee from access to the information that justified the CI evaluation and return the assignee or detailee to the agency of origin.

(f) Covered persons whose access is denied or revoked may request reconsideration by the head of the relevant DOE element.

(g) For cases involving a question of loyalty to the United States, the Director of the Office of Intelligence and Counterintelligence may refer the matter to the FBI as required by section 145d of the Atomic Energy Act of 1954. For cases indicating that classified information is being, or may have been, disclosed in an unauthorized manner to a foreign power or an agent of a foreign power, DOE is required by 50 U.S.C. 402a(e) to refer the matter to the Federal Bureau of Investigation.

Subpart C—Safeguarding Privacy and Employee Rights

§ 709.21 Requirements for notification of a polygraph examination.

When a polygraph examination is scheduled, the DOE must notify the covered person, in writing, of the date,

time, and place of the polygraph examination, the provisions for a medical waiver, and the covered person's right to obtain and consult with legal counsel or to secure another representative prior to the examination. DOE must provide a copy of this part to the covered person. The covered person must receive the notification at least ten days, excluding weekend days and holidays, before the time of the examination except when good cause is shown or when the covered person waives the advance notice provision.

§ 709.22 Right to counsel or other representation.

(a) At the covered person's own expense, a covered person has the right to obtain and consult with legal counsel or another representative. However, the counsel or representative may not be present during the polygraph examination. Except for interpreters and signers, no one other than the covered person and the examiner may be present in the examination room during the polygraph examination.

(b) A covered person has the right to consult with legal counsel or another representative at any time during an interview conducted in accordance with § 709.15 of this part.

§ 709.23 Obtaining consent to a polygraph examination.

DOE may not administer a polygraph examination unless DOE:

(a) Notifies the covered person of the polygraph examination in writing in accordance with § 709.21 of this part; and

(b) Obtains written consent from the covered person prior to the polygraph examination.

§ 709.24 Other information provided to a covered person prior to a polygraph examination.

Before administering the polygraph examination, the examiner must:

(a) Inform the covered person that audio and video recording of each polygraph examination session will be made, and that other observation devices, such as two-way mirrors and observation rooms, also may be employed;

Department of Energy

§ 709.31

(b) Explain to the covered person the characteristics and nature of the polygraph instrument and examination;

(c) Explain to the covered person the physical operation of the instrument and the procedures to be followed during the examination;

(d) Review with the covered person the relevant questions to be asked during the examination;

(e) Advise the covered person of the covered person right against self-incrimination; and

(f) Provide the covered person with a pre-addressed envelope, which may be used to submit a quality assurance questionnaire, comments or complaints concerning the examination.

§ 709.25 Limits on use of polygraph examination results that reflect “Significant Response” or “No Opinion”.

DOE or its contractors may not:

(a) Take an adverse personnel action against a covered person or make an adverse access recommendation solely on the basis of a polygraph examination result of “significant response” or “no opinion”; or

(b) Use a polygraph examination that reflects “significant response” or “no opinion” as a substitute for any other required investigation.

§ 709.26 Protection of confidentiality of CI evaluation records to include polygraph examination records and other pertinent documentation.

(a) DOE owns all CI evaluation records, including polygraph examination records and reports and other evaluation documentation.

(b) DOE maintains all CI evaluation records, including polygraph examination records and other pertinent documentation acquired in conjunction with a counterintelligence evaluation, in a system of records established under the Privacy Act of 1974 (5 U.S.C. 552a).

(c) DOE must afford the full privacy protection provided by law to information regarding a covered person’s refusal to participate in a CI evaluation to include a polygraph examination and the completion of other pertinent documentation.

(d) With the exception of the polygraph report, all other polygraph examination records are destroyed ninety

days after the CI evaluation is completed, provided that a favorable recommendation has been made to grant or continue the access to the position. If a recommendation is made to deny or revoke access to the information or involvement in the activities that justified conducting the CI evaluation, then all of the polygraph examination records are retained until the final resolution of any request for reconsideration by the covered person or the completion of any ongoing investigation.

Subpart D—Polygraph Examination and Examiner Standards

§ 709.31 DOE standards for polygraph examiners and polygraph examinations.

(a) DOE adheres to the procedures and standards established by the Department of Defense Polygraph Institute (DODPI). DOE administers only DODPI approved testing formats.

(b) A polygraph examiner may administer no more than five polygraph examinations in any twenty-four hour period. This does not include those instances in which a covered person voluntarily terminates an examination prior to the actual testing phase.

(c) The polygraph examiner must be certified to conduct polygraph examinations under this part by the DOE Psychophysiological Detection of Deception/Polygraph Program Quality Control Official.

(d) To be certified under paragraph (c) of this section, an examiner must have the following minimum qualifications:

(1) The examiner must be an experienced CI or criminal investigator with extensive additional training in using computerized instrumentation in Psychophysiological Detection of Deception and in psychology, physiology, interviewing, and interrogation.

(2) The examiner must have a favorably adjudicated single-scope background investigation, complete a CI-scope polygraph examination, and must hold a “Q” access authorization, which is necessary for access to Secret

§ 709.32

Restricted Data and Top Secret National Security Information. In addition, he or she must have been granted SCI access approval.

(3) The examiner must receive basic Forensic Psychophysiological Detection of Deception training from the DODPI.

§ 709.32 Training requirements for polygraph examiners.

(a) Examiners must complete an initial training course of thirteen weeks, or longer, in conformance with the procedures and standards established by DODPI.

(b) Examiners must undergo annual continuing education for a minimum of forty hours training within the discipline of Forensic Psychophysiological Detection of Deception.

(c) The following organizations provide acceptable curricula to meet the training requirement of paragraph (b) of this section:

- (1) American Polygraph Association,
- (2) American Association of Police Polygraphists, and
- (3) Department of Defense Polygraph Institute.

PART 710—CRITERIA AND PROCEDURES FOR DETERMINING ELIGIBILITY FOR ACCESS TO CLASSIFIED MATTER OR SPECIAL NUCLEAR MATERIAL

Subpart A—General Criteria and Procedures for Determining Eligibility for Access to Classified Matter or Special Nuclear Material

GENERAL PROVISIONS

- Sec.
- 710.1 Purpose.
- 710.2 Scope.
- 710.3 Reference.
- 710.4 Policy.
- 710.5 Definitions.

CRITERIA AND PROCEDURES FOR DETERMINING ELIGIBILITY FOR ACCESS TO CLASSIFIED MATTER OR SPECIAL NUCLEAR MATERIAL

- 710.6 Cooperation by the individual.
- 710.7 Application of the criteria.
- 710.8 Criteria.
- 710.9 Action on derogatory information.
- 710.10 Suspension of access authorization.

IV; E.O. 13526, 3 CFR 2010 Comp., pp. 298-327 (or successor orders); E.O. 12968, 3 CFR 1995 Comp., p. 391.

EDITORIAL NOTE: Nomenclature changes to part 710 appear at 78 FR 52391, Aug. 23, 2013.

Subpart A—General Criteria and Procedures for Determining Eligibility for Access to Classified Matter or Special Nuclear Material

SOURCE: 59 FR 35185, July 8, 1994, unless otherwise noted.

GENERAL PROVISIONS

§ 710.1 Purpose.

(a) This subpart establishes the criteria, procedures, and methods for resolving questions concerning the eligibility of individuals who are employed by, or applicants for employment with,

Department of Energy

§ 710.4

Department of Energy (DOE) contractors, agents, and access permittees, individuals who are DOE employees or applicants for DOE employment, and other persons designated by the Secretary of Energy, for access to Restricted Data or special nuclear material, pursuant to the Atomic Energy Act of 1954, as amended, or for access to national security information.

(b) This subpart is published to implement: Executive Order 12968, 60 FR 40245 (August 7, 1995); Executive Order 12958, 60 FR 19825 (April 20, 1995); Executive Order 10865, 25 FR 1583 (February 24, 1960), as amended; and Executive Order 10450, 18 FR 2489 (April 27, 1954), as amended. This subpart also provides for public information: selected provisions of the Atomic Energy Act of 1954, as amended, set forth in appendix A to this subpart; and the 1997 Adjudicative Guidelines approved by the President and set forth in appendix B to this subpart.

[59 FR 35185, July 8, 1994, as amended at 66 FR 47062, Sept. 11, 2001]

§ 710.2 Scope.

The criteria and procedures outlined in this subpart shall be used in those cases in which there are questions of eligibility for DOE access authorization involving:

(a) Employees (including consultants) of, and applicants for employment with, contractors and agents of the DOE;

(b) Access permittees of the DOE and their employees (including consultants) and applicants for employment;

(c) Employees (including consultants) of, and applicants for employment with, the DOE; and

(d) Other persons designated by the Secretary of Energy.

§ 710.3 Reference.

The pertinent sections of the Atomic Energy Act of 1954, as amended, relative to this regulation are set forth in Appendix A to this subpart.

§ 710.4 Policy.

(a) It is the policy of DOE to provide for the security of its programs in a manner consistent with traditional American concepts of justice and fairness. To this end, the Secretary has es-

tablished criteria for determining eligibility for access authorization and procedures that will afford those individuals described in § 710.2 the opportunity for administrative review of questions concerning their eligibility for access authorization.

(b) It is also the policy of DOE that none of the procedures established by DOE for determining eligibility for access authorization shall be used for an improper purpose, including any attempt to coerce, restrain, threaten, intimidate, or retaliate against individuals for exercising their rights under any statute, regulation or DOE directive. Any DOE officer or employee violating, or causing the violation of this policy, shall be subject to appropriate disciplinary action.

(c) If the individual is currently awaiting a hearing or trial, or has been convicted of a crime punishable by imprisonment of six (6) months or longer, or is awaiting or serving a form of preprosecution probation, suspended or deferred sentencing, court ordered probation, or parole in conjunction with an arrest or criminal charges initiated against the individual for a crime that is punishable by imprisonment of six (6) months or longer, DOE may suspend processing an application for access authorization until such time as the hearing, trial, criminal prosecution, suspended sentencing, deferred sentencing, probation, or parole has been completed.

(d) DOE may suspend processing an application for access authorization if sufficient information about the individual's background cannot be obtained to meet the investigative scope and extent requirements for the access authorization requested.

(e) DOE may suspend processing an application for access authorization until such time as a question regarding an individual's national allegiance is resolved. For example, if an individual is exercising rights of citizenship conferred by a country other than the United States, DOE will be concerned with whether granting access authorization to that individual constitutes an unacceptable national security risk.

(f) DOE may suspend processing an application for access authorization

§710.5

10 CFR Ch. III (1–1–16 Edition)

whenever an individual fails to fulfill the responsibilities described in §710.6.

(g) If an individual believes that the provisions of paragraph (c), (d), or (e) of this section have been inappropriately applied, a written appeal may be filed with the Director, Office of Personnel Security, DOE Headquarters, within 30 calendar days of the date the individual was notified of the action. The Director shall act on the written appeal as described in section 710.6(c).

[59 FR 35185, July 8, 1994, as amended at 66 FR 47062, Sept. 11, 2001; 71 FR 68730, Nov. 28, 2006]

§710.5 Definitions.

(a) As used in this subpart:

Access authorization means an administrative determination that an individual is eligible for access to classified matter or is eligible for access to, or control over, special nuclear material.

Classified Matter means the material of thought or expression that is classified pursuant to statute or Executive Order.

DOE Counsel means a DOE attorney assigned to represent DOE in proceedings under this subpart. DOE Counsel shall be a U.S. citizen and shall have been subject to a favorably adjudicated background investigation.

Administrative Judge means a DOE attorney or senior management official appointed by the Director, Office of Hearings and Appeals, pursuant to §710.25. A Administrative Judge shall be a U.S. citizen and shall have been subject to a favorably adjudicated background investigation.

Local Director of Security means the individual with primary responsibility for safeguards and security at the Chicago, Idaho, Oak Ridge, Richland, and Savannah River Operations Offices and the Pittsburgh and Schenectady Naval Reactors Offices; the Manager, National Nuclear Security Administration (NNSA) Service Center; for Washington, DC area cases, the Director, Office of Security Operations; and any person designated in writing to serve in one of the aforementioned positions in an acting capacity.

Manager means the Manager of a DOE Operations Office (Albuquerque, Chicago, Idaho, Nevada, Oak Ridge, Oakland, Richland, or Savannah

River), the Manager of the Pittsburgh Naval Reactors Office, the Manager of the Schenectady Naval Reactors Office, and, for Washington, DC area cases, the Director, Office of Personnel Security.

National Security Information means any information that has been determined, pursuant to Executive Order 12958 or any predecessor Order, to require protection against unauthorized disclosure and that is so designated.

Secretary means the Secretary of Energy, as provided by section 201 of the Department of Energy Organization Act.

Special nuclear material means plutonium, uranium enriched in the isotope 233, or in the isotope 235, and any other material which, pursuant to the provisions of Section 51 of the Atomic Energy Act of 1954, as amended, has been determined to be special nuclear material, but does not include source material; or any material artificially enriched by any of the foregoing, not including source material.

(b) Throughout this subpart the use of the male gender shall include the female gender and vice versa.

[59 FR 35185, July 8, 1994, as amended at 66 FR 47063, Sept. 11, 2001; 71 FR 68730, Nov. 28, 2006]

CRITERIA AND PROCEDURES FOR DETERMINING ELIGIBILITY FOR ACCESS TO CLASSIFIED MATTER OR SPECIAL NUCLEAR MATERIAL

§710.6 Cooperation by the individual.

(a)(1) It is the responsibility of the individual to cooperate by providing full, frank, and truthful answers to DOE's relevant and material questions, and when requested, to furnish or authorize others to furnish information that the DOE deems pertinent to the individual's eligibility for DOE access authorization. This obligation to cooperate applies when completing security forms, during the course of a personnel security background investigation or reinvestigation, and at any stage of DOE's processing of the individual's access authorization, including but not limited to, personnel security interviews, DOE-sponsored mental evaluations, and other authorized DOE investigative activities under this subpart. The individual may elect not to

Department of Energy

§ 710.8

cooperate; however, such refusal may prevent DOE from reaching an affirmative finding required for granting or continuing access authorization. In this event, any access authorization then in effect may be terminated, or, for applicants, further processing may be suspended.

(2) It is the responsibility of an individual subject to § 709.3(d) to consent to and take an event-specific polygraph examination. A refusal to consent to or take such an examination may prevent DOE from reaching an affirmative finding required for continuing access authorization. In this event, DOE may suspend or terminate any access authorization.

(b) If the individual believes that the provisions of paragraph (a) of this section have been inappropriately applied in his case, he may file a written appeal of the action with the Director, Office of Personnel Security, DOE Headquarters, within 30 calendar days of the date he was notified of the action.

(c) Upon receipt of the written appeal, the Director, Office of Personnel Security, shall conduct an inquiry as to the circumstances involved in the action and shall, within 30 calendar days of receipt of the written appeal, notify the individual, in writing, as to whether the action to terminate or suspend processing of access authorization was appropriate. If the Director determines that the action was inappropriate, he shall direct that the individual continue to be processed for access authorization, or that access authorization for the individual be reinstated.

[59 FR 35185, July 8, 1994, as amended at 71 FR 57397, Sept. 29, 2006; 71 FR 68730, Nov. 28, 2006]

§ 710.7 Application of the criteria.

(a) The decision as to access authorization is a comprehensive, common-sense judgment, made after consideration of all relevant information, favorable and unfavorable, as to whether the granting or continuation of access authorization will not endanger the common defense and security and is clearly consistent with the national interest. Any doubt as to an individual's access authorization eligibility shall be

resolved in favor of the national security. Absent any derogatory information, a favorable determination usually will be made as to access authorization eligibility.

(b) To assist in making these determinations, on the basis of all the information in a particular case, there are set forth in this subpart criteria consisting of a number of specific types of derogatory information. These criteria are not exhaustive but contain the principal types of derogatory information which create a question as to the individual's eligibility for access authorization. DOE is not limited to these criteria or precluded from exercising its judgment that information or facts in a case under its cognizance are derogatory although at variance with, or outside the scope of, the stated categories. These criteria are subject to continuing review and may be revised from time to time as experience and circumstances may make desirable.

(c) In resolving a question concerning an individual's eligibility for access authorization, all DOE officials involved in the decision-making process shall consider: the nature, extent, and seriousness of the conduct; the circumstances surrounding the conduct, to include knowledgeable participation; the frequency and recency of the conduct; the age and maturity of the individual at the time of the conduct; the voluntariness of participation; the absence or presence of rehabilitation or reformation and other pertinent behavioral changes; the motivation for the conduct; the potential for pressure, coercion, exploitation, or duress; the likelihood of continuation or recurrence; and other relevant and material factors.

[59 FR 35185, July 8, 1994, as amended at 66 FR 47063, Sept. 11, 2001]

§ 710.8 Criteria.

Derogatory information shall include, but is not limited to, information that the individual has:

(a) Committed, prepared or attempted to commit, or aided, abetted or conspired with another to commit or attempt to commit any act of sabotage, espionage, treason, terrorism, or sedition.

§710.8

10 CFR Ch. III (1–1–16 Edition)

(b) Knowingly established or continued a sympathetic association with a saboteur, spy, terrorist, traitor, seditionist, anarchist, or revolutionist, espionage agent, or representative of a foreign nation whose interests are inimical to the interests of the United States, its territories or possessions, or with any person advocating the use of force or violence to overthrow the Government of the United States or any state or subdivision thereof by unconstitutional means.

(c) Knowingly held membership in or had a knowing affiliation with, or has knowingly taken action which evidences a sympathetic association with the intent of furthering the aims of, or adhering to, and actively participating in, any foreign or domestic organization, association, movement, group, or combination of persons which advocates or practices the commission of acts of force or violence to prevent others from exercising their rights under the Constitution or Laws of the United States or any state or subdivision thereof by unlawful means.

(d) Publicly or privately advocated, or participated in the activities of a group or organization, which has as its goal, revolution by force or violence to overthrow the Government of the United States or the alteration of the form of Government of the United States by unconstitutional means with the knowledge that it will further those goals.

(e) Parent(s), brother(s), sister(s), spouse, or offspring residing in a nation whose interests may be inimical to the interests of the United States.

(f) Deliberately misrepresented, falsified, or omitted significant information from a Personnel Security Questionnaire, a Questionnaire for Sensitive (or National Security) Positions, a personnel qualifications statement, a personnel security interview, written or oral statements made in response to official inquiry on a matter that is relevant to a determination regarding eligibility for DOE access authorization, or proceedings conducted pursuant to §710.20 through §710.31.

(g) Failed to protect classified matter, or safeguard special nuclear material; or violated or disregarded security or safeguards regulations to a degree

which would be inconsistent with the national security; or disclosed classified information to a person unauthorized to receive such information; or violated or disregarded regulations, procedures, or guidelines pertaining to classified or sensitive information technology systems.

(h) An illness or mental condition of a nature which, in the opinion of a psychiatrist or licensed clinical psychologist, causes or may cause, a significant defect in judgment or reliability.

(i) Refused to testify before a Congressional Committee, Federal or state court, or Federal administrative body, regarding charges relevant to eligibility for DOE, or another Federal agency's access authorization.

(j) Been, or is, a user of alcohol habitually to excess, or has been diagnosed by a psychiatrist or a licensed clinical psychologist as alcohol dependent or as suffering from alcohol abuse.

(k) Trafficked in, sold, transferred, possessed, used, or experimented with a drug or other substance listed in the Schedule of Controlled Substances established pursuant to section 202 of the Controlled Substances Act of 1970 (such as marijuana, cocaine, amphetamines, barbiturates, narcotics, etc.) except as prescribed or administered by a physician licensed to dispense drugs in the practice of medicine, or as otherwise authorized by Federal law.

(l) Engaged in any unusual conduct or is subject to any circumstances which tend to show that the individual is not honest, reliable, or trustworthy; or which furnishes reason to believe that the individual may be subject to pressure, coercion, exploitation, or duress which may cause the individual to act contrary to the best interests of the national security. Such conduct or circumstances include, but are not limited to, criminal behavior, a pattern of financial irresponsibility, conflicting allegiances, or violation of any commitment or promise upon which DOE previously relied to favorably resolve an issue of access authorization eligibility.

[59 FR 35185, July 8, 1994, as amended at 66 FR 47063, Sept. 11, 2001]

Department of Energy

§ 710.10

§ 710.9 Action on derogatory information.

(a) If the reports of investigation of an individual or other reliable information tend to establish the validity and significance of one or more items in the criteria, or of other reliable information or facts which are of security concern, although outside the scope of the stated categories, such information shall be regarded as derogatory and create a question as to the individual's access authorization eligibility.

(b) If a question arises as to the individual's access authorization eligibility, the Local Director of Security shall authorize the conduct of an interview with the individual, or other appropriate actions, which may include a DOE-sponsored mental evaluation, and, on the basis of the results of such interview or actions, may authorize the granting of the individual's access authorization. If, in the opinion of the Local Director of Security, the question as to the individual's access authorization eligibility has not been favorably resolved, he shall submit the matter to the Manager with a recommendation that authority be obtained to process the individual's case under administrative review procedures.

(c) If the Manager agrees that unresolved derogatory information is present and that appropriate attempts to resolve such derogatory information have been unsuccessful, he shall notify the Director, Office of Personnel Security, DOE Headquarters, of his proposal to conduct an administrative review proceeding, accompanied by an explanation of the security concerns and a duplicate Personnel Security File. If the Manager believes that the derogatory information has been favorably resolved, he shall direct that access authorization be granted for the individual. The Manager may also direct the Local Director of Security to obtain additional information in the matter prior to deciding whether to grant the individual access authorization or to submit a request for authority to conduct an administrative review proceeding. A decision in the matter shall be rendered by the Manager within 10 calendar days of its receipt.

(d) Upon receipt of the Manager's notification, the Director, Office of Personnel Security, shall review the matter and confer with the Manager on:

(1) The institution of administrative review proceedings set forth in §§ 710.20 through 710.32;

(2) The granting of access authorization; or

(3) Other actions as the Director deems appropriate.

(e) The Director, Office of Personnel Security, shall act pursuant to one of these options within 30 calendar days of the receipt of the Manager's notification unless an extension is granted by the Principal Deputy Chief for Mission Support Operations, Office of Health, Safety and Security.

[66 FR 47063, Sept. 11, 2001, as amended at 71 FR 68730, Nov. 28, 2006]

§ 710.10 Suspension of access authorization.

(a) If information is received that raises a question concerning an individual's continued access authorization eligibility, the Local Director of Security shall authorize action(s), to be taken on an expedited basis, to resolve the question pursuant to § 710.9(b). If the question as to the individual's continued access authorization eligibility is not resolved in favor of the individual, the Local Director of Security shall submit the matter to the Manager with a recommendation that the individual's access authorization be suspended pending the final determination resulting from the procedures in this subpart.

(b) Within two working days of receipt of the recommendation from the Local Director of Security to suspend the individual's DOE access authorization, the Manager shall review the matter and authorize continuation or suspension of access authorization. The access authorization of an individual shall not be suspended except by the direction of the Manager. This authority to suspend access authorization may not be delegated but may be exercised by a person who has been designated in writing as Acting Manager.

(c) Upon suspension of an individual's access authorization pursuant to paragraph (b) of this section, the individual, the individual's employer, any

§ 710.20

other DOE Operations Office having an access authorization interest in the individual, and, if known, any other government agency where the individual holds an access authorization, security clearance, or access approval, or to which the DOE has certified the individual's DOE access authorization, shall be notified immediately. The Central Personnel Clearance Index shall also be updated. Notification to the individual shall be made in writing and shall reflect, in general terms, the reason(s) why the suspension has been effected. Pending final determination of the individual's eligibility for access authorization from the operation of the procedures provided in this subpart, the individual shall not be afforded access to classified matter, special nuclear material, or unescorted access to security areas that require the individual to possess a DOE access authorization.

(d) Following the decision to suspend an individual's DOE access authorization, the Manager shall immediately notify the Director, Office of Personnel Security, DOE Headquarters, of the action and the reason(s) therefore. In addition, the Manager, within 10 calendar days of the date of suspension, shall notify the Director of his proposal to conduct an administrative review proceeding, accompanied by an explanation of its basis and a duplicate Personnel Security File.

(e) Upon receipt of the Manager's notification, the Director, Office of Personnel Security, shall review the matter and confer with the Manager on:

(1) The institution of administrative review procedures set forth in §§ 710.20 through 710.32;

(2) The reinstatement of access authorization; or

(3) Other actions as the Director deems appropriate.

(f) The Director, Office of Personnel Security, shall act pursuant to one of these options within 30 calendar days of the receipt of the Manager's notification unless an extension is granted by the Principal Deputy Chief for Mission Support Operations, Office of Health, Safety and Security.

[59 FR 35185, July 8, 1994, as amended at 66 FR 47064, Sept. 11, 2001; 71 FR 68730, Nov. 28, 2006]

10 CFR Ch. III (1–1–16 Edition)

ADMINISTRATIVE REVIEW

§ 710.20 Purpose of administrative review.

These procedures establish methods for the conduct of the administrative review of questions concerning an individual's eligibility for access authorization when it is determined that such questions cannot be favorably resolved by interview or other action.

§ 710.21 Notice to the individual.

(a) Unless an extension is authorized by the Director, Office of Personnel Security, DOE Headquarters, within 30 calendar days of receipt of authority to institute administrative review procedures, the Manager shall prepare and deliver to the individual a notification letter approved by the local Office of Chief Counsel, or the Office of General Counsel for Headquarters cases. Where practicable, the letter shall be delivered to the individual in person.

(b) The letter shall state:

(1) That reliable information in the possession of DOE has created a substantial doubt concerning the individual's eligibility for access authorization.

(2) The information which creates a substantial doubt regarding the individual's access authorization eligibility (which shall be as comprehensive and detailed as the national security permits) and why that information creates such doubt.

(3) That the individual has the option to have the substantial doubt regarding eligibility for access authorization resolved in one of two ways:

(i) By the Manager, without a hearing, on the basis of the existing information in the case;

(ii) By personal appearance before a Administrative Judge (a "hearing").

(4) That, if the individual desires a hearing, the individual must, within 20 calendar days of the date of receipt of the notification letter, indicate this in writing to the Manager from whom the letter was received.

(5) That the individual may also file with the Manager the individual's written answer to the reported information

Department of Energy

§ 710.22

which raises the question of the individual's eligibility for access authorization, and that, if the individual requests a hearing without filing a written answer, the request shall be deemed a general denial of all of the reported information.

(6) That, if the individual so requests, a hearing will be scheduled before a Administrative Judge, with due regard for the convenience and necessity of the parties or their representatives, for the purpose of affording the individual an opportunity of supporting his eligibility for access authorization;

(7) That, if a hearing is requested, the individual will have the right to appear personally before a Administrative Judge; to present evidence in his own behalf, through witnesses, or by documents, or both; and, subject to the limitations set forth in §710.26(g), to be present during the entire hearing and be accompanied, represented, and advised by counsel or representative of the individual's choosing and at the individual's own expense;

(8) That the individual's failure to file a timely written request for a hearing before a Administrative Judge in accordance with paragraph (b)(4) of this section, unless time deadlines are extended for good cause, will be considered as a relinquishment by the individual of the right to a hearing provided in this subpart, and that in such event a final decision will be made by the Manager; and

(9) That in any proceedings under this subpart DOE Counsel will be participating on behalf of and representing the Department of Energy, and that any statements made by the individual to DOE Counsel may be used in subsequent proceedings.

(c) The notification letter referenced in paragraph (b) of this section shall also:

(1) Describe the individual's access authorization status until further notice;

(2) Advise the individual of the right to representation at the individual's own expense at each and every stage of the proceedings;

(3) Provide the name and telephone number of the designated DOE official to contact for any further information desired concerning the proceedings, in-

cluding an explanation of the individual's rights under the Freedom of Information and Privacy Acts; and

(4) Include a copy of this subpart.

[59 FR 35185, July 8, 1994, as amended at 66 FR 47064, Sept. 11, 2001; 71 FR 68730, Nov. 28, 2006]

§ 710.22 Initial decision process.

(a) The Manager shall make an initial decision as to the individual's access authorization eligibility based on the existing information in the case if:

(1) The individual fails to respond to the notification letter by filing a timely written request for a hearing before a Administrative Judge or fails to respond to the notification letter after requesting an extension of time to do so;

(2) The individual's response to the notification letter does not request a hearing before a Administrative Judge; or

(3) The Administrative Judge refers the individual's case to the Manager in accordance with §710.25(e) or §710.26(b).

(b) Unless an extension of time is granted by the Director, Office of Personnel Security, DOE Headquarters, the Manager's initial decision as to the individual's access authorization eligibility shall be made within 15 calendar days of the date of receipt of the information in paragraph (a) of this section. The Manager shall either grant or deny, or reinstate or revoke, the individual's access authorization.

(c) A letter reflecting the Manager's initial decision in the individual's case shall be signed by the Manager and delivered to the individual within 15 calendar days of the date of the Manager's decision unless an extension of time is granted by the Director, Office of Personnel Security, DOE Headquarters. If the Manager's initial decision is unfavorable to the individual, the individual shall be advised:

(1) Of the Manager's unfavorable decision and the reason(s) therefor;

(2) That within 30 calendar days from the date of receipt of the letter, he may file a written request for a review of the Manager's initial decision through the Director, Office of Personnel Security, DOE Headquarters, to the DOE Headquarters Appeal Panel (hereafter referred to as the "Appeal Panel");

§ 710.23

(3) That the Director, Office of Personnel Security, DOE Headquarters, may, for good cause shown, at the written request of the individual, extend the time for filing a written request for a review of the case by the Appeal Panel; and

(4) That if the written request for a review of the Manager's initial decision by the Appeal Panel is not filed within 30 calendar days of the individual's receipt of the Manager's letter, the Manager's initial decision in the case shall be final.

[66 FR 47064, Sept. 11, 2001, as amended at 71 FR 68730, Nov. 28, 2006]

§ 710.23 Extensions of time by the Manager.

The Manager may, for good cause shown, at the written request of the individual, extend the time for filing a written request for a hearing, and/or the time for filing a written answer to the matters contained in the notification letter. The Manager shall notify the Director, Office of Personnel Security, DOE Headquarters, when such extensions have been approved.

[59 FR 35185, July 8, 1994, as amended at 71 FR 68730, Nov. 28, 2006]

§ 710.24 Appointment of DOE Counsel.

(a) Upon receipt from the individual of a written request for a hearing, an attorney shall forthwith be assigned by the Manager to act as DOE Counsel.

(b) DOE Counsel is authorized to consult directly with the individual if he is not represented by counsel, or with the individual's counsel or representative if so represented, to clarify issues and reach stipulations with respect to testimony and contents of documents and other physical evidence. Such stipulations shall be binding upon the individual and the DOE Counsel for the purposes of this subpart.

§ 710.25 Appointment of Administrative Judge; prehearing conference; commencement of hearings.

(a) Upon receipt of a request for a hearing, the Manager shall in a timely manner transmit that request to the Office of Hearings and Appeals, and identify the DOE Counsel. The Manager shall at the same time transmit a copy of the notification letter and the

10 CFR Ch. III (1-1-16 Edition)

individual's response to the Office of Hearings and Appeals.

(b) Upon receipt of the hearing request from the Manager, the Director, Office of Hearings and Appeals, shall appoint, as soon as practicable, an Administrative Judge.

(c) Immediately upon appointment of the Administrative Judge, the Office of Hearings and Appeals shall notify the individual and DOE Counsel of the Administrative Judge's identity and the address to which all further correspondence should be sent.

(d) The Administrative Judge shall have all powers necessary to regulate the conduct of proceedings under this subpart, including, but not limited to, establishing a list of persons to receive service of papers, issuing subpoenas for witnesses to attend the hearing or for the production of specific documents or other physical evidence, administering oaths and affirmations, ruling upon motions, receiving evidence, regulating the course of the hearing, disposing of procedural requests or similar matters, and taking other actions consistent with the regulations in this subpart. Requests for subpoenas shall be liberally granted except where the Administrative Judge finds that the grant of subpoenas would clearly result in evidence or testimony that is repetitious, incompetent, irrelevant, or immaterial to the issues in the case. The Administrative Judge may take sworn testimony, sequester witnesses, and control the dissemination or reproduction of any record or testimony taken pursuant to this part, including correspondence, or other relevant records or tangible evidence including, but not limited to, information retained in computerized or other automated systems in possession of the subpoenaed person.

(e) The Administrative Judge will determine the day, time, and place for the hearing. Hearings will normally be held at or near the appropriate DOE facility, unless the Administrative Judge determines that another location would be more appropriate. Normally the location for the hearing will be selected for the convenience of all participants. In the event the individual fails to appear at the time and place specified, the record in the case shall

Department of Energy

§ 710.26

be closed and returned to the Manager, who will then make a final determination regarding the eligibility of the individual for DOE access authorization.

(f) At least 7 calendar days prior to the date scheduled for the hearing, the Administrative Judge will convene a prehearing conference for the purpose of discussing stipulations and exhibits, identifying witnesses, and disposing of other appropriate matters. The conference will usually be conducted by telephone.

(g) Hearings shall commence within 90 calendar days from the date the individual's request for hearing is received by the Office of Hearings and Appeals. Any extension of the hearing date past 90 calendar days from the date the request for hearing is received by the Office of Hearings and Appeals shall be approved by the Director, Office of Hearings and Appeals.

§ 710.26 Conduct of hearings.

(a) In all hearings conducted under this subpart, the individual shall have the right to be represented by a person of his own choosing. The individual is responsible for producing witnesses in his own behalf, including requesting the issuance of subpoenas, if necessary, or presenting other proof before the Administrative Judge to support his defense to the allegations contained in the notification letter. With the exception of procedural or scheduling matters, the Administrative Judge is prohibited from initiating or otherwise engaging in *ex parte* discussions about the case during the pendency of proceedings under this part.

(b) Unless the Administrative Judge finds good cause for granting a waiver of this paragraph or granting an extension of time, in the event that the individual unduly delays the hearing, such as by failure to meet deadlines set by the Administrative Judge, the record shall be closed, and a final decision shall be made by the Manager on the basis of the record in the case.

(c) Hearings shall be open only to DOE Counsel, duly authorized representatives of the staff of DOE, the individual and his counsel or other representatives, and such other persons as may be authorized by the Administrative Judge. Unless otherwise ordered

by the Administrative Judge, witnesses shall testify in the presence of the individual but not in the presence of other witnesses.

(d) DOE Counsel shall assist the Administrative Judge in establishing a complete administrative hearing record in the proceeding and bringing out a full and true disclosure of all facts, both favorable and unfavorable, having a bearing on the issues before the Administrative Judge. The individual shall be afforded the opportunity of presenting evidence, including testimony by the individual in the individual's own behalf. The proponent of a witness shall conduct the direct examination of that witness. All witnesses shall be subject to cross-examination, if possible. Whenever reasonably possible, testimony shall be given in person.

(e) The Administrative Judge may ask the witnesses any questions which the Administrative Judge deems appropriate to assure the fullest possible disclosure of relevant and material facts.

(f) During the course of the hearing, the Administrative Judge shall rule on all questions presented to the Administrative Judge for the Administrative Judge's determination.

(g) In the event it appears during the course of the hearing that Restricted Data or national security information may be disclosed, it shall be the duty of the Administrative Judge to assure that disclosure is not made to persons who are not authorized to receive it.

(h) Formal rules of evidence shall not apply, but the Federal Rules of Evidence may be used as a guide for procedures and principles designed to assure production of the most probative evidence available. The Administrative Judge shall admit into evidence any matters, either oral or written, which are material, relevant, and competent in determining issues involved, including the testimony of responsible persons concerning the integrity of the individual. In making such determinations, the utmost latitude shall be permitted with respect to relevancy, materiality, and competency. The Administrative Judge may also exclude evidence which is incompetent, immaterial, irrelevant, or unduly repetitious. Every reasonable effort shall be made

§ 710.26

10 CFR Ch. III (1-1-16 Edition)

to obtain the best evidence available. Subject to §§ 710.26(1), 710.26(m), 710.(n), 710.26(o), hearsay evidence may in the discretion of the Administrative Judge and for good cause shown be admitted without strict adherence to technical rules of admissibility and shall be accorded such weight as the circumstances warrant.

(i) Testimony of the individual and witnesses shall be given under oath or affirmation. Attention of the individual and each witness shall be directed to 18 U.S.C. 1001 and 18 U.S.C. 1621.

(j) The Administrative Judge shall endeavor to obtain all the facts that are reasonably available in order to arrive at findings. If, prior to or during the proceedings, in the opinion of the Administrative Judge, the allegations in the notification letter are not sufficient to cover all matters into which inquiry should be directed, the Administrative Judge shall recommend to the Manager concerned that, in order to give more adequate notice to the individual, the notification letter should be amended. Any amendment shall be made with the concurrence of the local Office of Chief Counsel or the Office of General Counsel in Headquarters cases. If, in the opinion of the Administrative Judge, the circumstances of such amendment may involve undue hardships to the individual because of limited time to answer the new allegations in the notification letter, an appropriate adjournment shall be granted upon the request of the individual.

(k) A written or oral statement of a person relating to the characterization in the notification letter of any organization or person other than the individual may be received and considered by the Administrative Judge without affording the individual an opportunity to cross-examine the person making the statement on matters relating to the characterization of such organization or person, provided the individual is given notice that it has been received and may be considered by the Administrative Judge, and is informed of its contents provided such is not prohibited by paragraph (g) of this section.

(l) Any oral or written statement adverse to the individual relating to a

controverted issue may be received and considered by the Administrative Judge without affording an opportunity for cross-examination in either of the following circumstances:

(1) The head of the agency supplying the statement certifies that the person who furnished the information is a confidential informant who has been engaged in obtaining intelligence information for the Government and that disclosure of the informant's identity would be substantially harmful to the national interest;

(2) The Secretary or his special designee for that particular purpose has preliminarily determined, after considering information furnished by the investigative agency as to the reliability of the person and the accuracy of the statement concerned, that:

(i) The statement concerned appears to be reliable and material; and

(ii) Failure of the Administrative Judge to receive and consider such statement would, in view of the access sought to Restricted Data, national security information, or special nuclear material, be substantially harmful to the national security and that the person who furnished the information cannot appear to testify

(A) Due to death, severe illness, or similar cause, in which case the identity of the person and the information to be considered shall be made available to the individual, or

(B) Due to some other specified cause determined by the head of the agency to be good and sufficient.

(m) Whenever procedures under paragraph (l) of this section are used:

(1) The individual shall be given a summary or description of the information which shall be as comprehensive and detailed as the national interest permits, and

(2) Appropriate consideration shall be accorded to the fact that the individual did not have an opportunity to cross-examine such person(s).

(n) Records compiled in the regular course of business, or other physical evidence other than investigative reports obtained by DOE, may be received and considered subject to rebuttal without authenticating witnesses provided that such information has

Department of Energy

§ 710.27

been furnished to DOE by an investigative agency pursuant to its responsibilities in connection with assisting the Secretary to safeguard Restricted Data, national security information, or special nuclear material.

(o) Records compiled in the regular course of business, or other physical evidence other than investigative reports, relating to a controverted issue which, because they are classified, may not be inspected by the individual, may be received and considered provided that:

(1) The Secretary or his special designee for that particular purpose has made a preliminary determination that such physical evidence appears to be material;

(2) The Secretary or his special designee for that particular purpose has made a determination that failure to receive and consider such physical evidence would, in view of the access sought to Restricted Data, national security information, or special nuclear material sought, be substantially harmful to the national security; and

(3) To the extent that national security permits, a summary or description of such physical evidence is made available to the individual. In every such case, information as to the authenticity and accuracy of such physical evidence furnished by the investigative agency shall be considered.

(p) The Administrative Judge may request the Local Director of Security to arrange for additional investigation on any points which are material to the deliberations of the Administrative Judge and which the Administrative Judge believes need further investigation or clarification. In this event, the Administrative Judge shall set forth in writing those issues upon which more evidence is requested, identifying where possible persons or sources from which the evidence should be sought. The Local Director of Security shall make every effort through appropriate sources to obtain additional information upon the matters indicated by the Administrative Judge.

(q) A written transcript of the entire proceedings shall be made and, except for portions containing Restricted Data or national security information,

a copy of such transcript shall be furnished the individual without cost.

(r) Whenever information is made a part of the record under the exceptions authorized by paragraphs (1) or (o) of this section, the record shall contain certificates evidencing that the determinations required therein have been made.

[59 FR 35185, July 8, 1994, as amended at 71 FR 68730, Nov. 28, 2006]

§ 710.27 Administrative Judge's decision.

(a) The Administrative Judge shall carefully consider the record in view of the standards set forth herein and shall render a decision as to whether the grant or restoration of access authorization to the individual would not endanger the common defense and security and would be clearly consistent with the national interest. In resolving a question concerning the eligibility of an individual for access authorization under these procedures, the Administrative Judge shall consider the factors stated in paragraph 710.7(c) to determine whether the findings will be adverse or favorable.

(b) In reaching the findings, the Administrative Judge shall consider the demeanor of the witnesses who have testified at the hearing, the probability or likelihood of the truth of their testimony, their credibility, and the authenticity and accuracy of documentary evidence, or lack of evidence on any material points in issue. If the individual is, or may be, handicapped by the non-disclosure to the individual of confidential information or by lack of opportunity to cross-examine confidential informants, the Administrative Judge shall take that fact into consideration. Possible impact of the loss of the individual's access authorization upon the DOE program shall not be considered by the Administrative Judge.

(c) The Administrative Judge shall make specific findings based upon the record as to the validity of each of the allegations contained in the notification letter and the significance which the Administrative Judge attaches to such valid allegations. These findings shall be supported fully by a statement

§710.28

10 CFR Ch. III (1-1-16 Edition)

of reasons which constitute the basis for such findings.

(d) The Administrative Judge's decision shall be based on the Administrative Judge's findings of fact. If, after considering all of the factors in light of the criteria set forth in this subpart, the Administrative Judge is of the opinion that it will not endanger the common defense and security and will be clearly consistent with the national interest to grant or reinstate access authorization for the individual, the Administrative Judge shall render a favorable decision; otherwise, the Administrative Judge shall render an unfavorable decision. Within 15 calendar days of the Administrative Judge's written decision, the Administrative Judge shall provide copies of the decision and the administrative record to the Manager and the Director, Office of Personnel Security, DOE Headquarters.

[59 FR 35185, July 8, 1994, as amended at 66 FR 47065, Sept. 11, 2001; 71 FR 68730, Nov. 28, 2006]

§710.28 Action on the Administrative Judge's decision.

(a) Within 10 calendar days of receipt of the decision and the administrative record, unless an extension of time is granted by the Director, Office of Personnel Security, DOE Headquarters, the Manager shall:

(1) Notify the individual in writing of the Administrative Judge's decision;

(2) Advise the individual in writing of the appeal procedures available to the individual in paragraph (b) of this section if the decision is unfavorable to the individual;

(3) Advise the individual in writing of the appeal procedures available to the Manager and the Director, Office of Personnel Security, DOE Headquarters, in paragraph (c) of this section if the decision is favorable to the individual; and,

(4) Provide the individual and/or counsel or representative, a copy of the Administrative Judge's decision and the administrative record.

(b) If the Administrative Judge's decision is unfavorable to the individual:

(1) The individual may file with the Director, Office of Personnel Security, DOE Headquarters, a written request for further review of the decision by

the Appeal Panel along with a statement required by paragraph (e) of this section within 30 calendar days of the individual's receipt of the Manager's notice;

(2) The Director, Office of Personnel Security, DOE Headquarters may, for good cause shown, extend the time for filing a request for further review of the decision by the Appeal Panel at the written request of the individual provided the request for an extension of time is filed by the individual within 30 calendar days of receipt of the Manager's notice;

(3) The Administrative Judge's decision shall be considered final if the individual does not: file a written request for a review of the decision by the Appeal Panel or for an extension of time to file a written request for further review of the decision by the Appeal Panel in accordance with paragraphs (b)(1) or (b)(2) of this section; or, file a written request for a further review of the decision by the Appeal Panel after having been granted an extension of time to do so.

(c) If the Administrative Judge's decision is favorable to the individual, within 30 calendar days of the individual's receipt of the Manager's notice:

(1) The Manager or the Director, Office of Personnel Security, DOE Headquarters, may file a written request for further review of the decision by the Appeal Panel along with the statement required by paragraph (e) of this section;

(2) The Principal Deputy Chief for Mission Support Operations, Office of Health, Safety and Security, may, at the written request of the Manager or Director, Office of Personnel Security, DOE Headquarters, extend the time for filing a request for further review of the decision by the Appeal Panel; or

(3) The Manager, with the concurrence of the Director, Office of Personnel Security, DOE Headquarters, shall grant or reinstate the individual's access authorization.

(d) A copy of any request for further review of the individual's case by the Appeal Panel filed by the Manager or the Director, Office of Personnel Security, shall be provided to the individual by the Manager.

Department of Energy

§ 710.29

(e) The party filing a request for review of the individual's case by the Appeal Panel shall include with the request a statement identifying the issues on which it wishes the Appeal Panel to focus. A copy of such statement shall be served on the other party, who may file a response with the Appeal Panel within 20 calendar days of receipt of the statement.

[66 FR 47065, Sept. 11, 2001, as amended at 71 FR 68730, Nov. 28, 2006]

§ 710.29 Final appeal process.

(a) The Appeal Panel shall be convened by the Principal Deputy Chief for Mission Support Operations, Office of Health, Safety and Security, to review and render a final decision in an access authorization eligibility case referred by the individual, the Manager, or the Director, Office of Personnel Security, in accordance with §§ 710.22, 710.28, and 710.32.

(b) The Appeal Panel shall consist of three members, each of whom shall be a DOE Headquarters employee, a United States citizen, and hold a DOE Q access authorization. The Principal Deputy Chief for Mission Support Operations, Office of Health, Safety and Security, shall serve as a permanent member of the Appeal Panel and as the Appeal Panel Chairman. The second member of the Appeal Panel shall be a DOE attorney designated by the General Counsel. The head of the DOE Headquarters element who has cognizance over the individual whose access authorization eligibility is being considered may designate an employee to act as the third member on the Appeal Panel; otherwise, the third member will be designated by the Chairman. Only one member of the Appeal Panel shall be from the security field.

(c) In filing a written request for a review by the Appeal Panel in accordance with §§ 710.22 and 710.28, the individual, or the counsel or representative, shall identify the relevant issues and may also submit any relevant material in support of the individual. The individual's written request and supportive material shall be made a part of the administrative record. The Director, Office of Personnel Security, shall provide staff support to the Appeal Panel as requested by the Prin-

icipal Deputy Chief for Mission Support Operations, Office of Health, Safety and Security.

(d) Within 15 calendar days from the date of receipt of a request for a review of a case by the Appeal Panel, the Principal Deputy Chief for Mission Support Operations, Office of Health, Safety and Security, shall:

(1) Request the General Counsel to designate an attorney who shall serve as an Appeal Panel member;

(2) Either request the head of the cognizant DOE element to designate, or himself designate, an employee from outside the security field who shall serve as the third member of the Appeal Panel; and

(3) Arrange for the Appeal Panel members to convene to review the administrative record or provide a copy of the administrative record to the other Appeal Panel members for their independent review.

(e) The Appeal Panel may initiate an investigation of any statement or material contained in the request for an Appeal Panel review and use any relevant facts obtained by such investigation in the conduct of the final decision process. The Appeal Panel may solicit and accept submissions from either the individual or DOE officials that are relevant to the final decision process and may establish appropriate time frames to allow for such submissions. The Appeal Panel may also consider any other source of information that will advance the final decision process, provided that both parties are afforded an opportunity to respond to all third party submissions. All information obtained by the Appeal Panel under this section shall be made a part of the administrative record.

(f) Within 45 work days of the closing of the administrative record, the Appeal Panel shall render a final written decision in the case predicated upon an evaluation of the administrative record, findings as to each of the allegations contained in the notification letter, and any new evidence that may have been submitted pursuant to § 710.30. If a majority of the Appeal Panel members determine that it will not endanger the common defense and security and will be clearly consistent

§ 710.30

10 CFR Ch. III (1–1–16 Edition)

with the national interest, the Principal Deputy Chief for Mission Support Operations, Office of Health, Safety and Security, shall grant or reinstate access authorization for the individual; otherwise, he shall deny or revoke access authorization for the individual. The Appeal Panel written decision shall be made a part of the administrative record.

(g) The Principal Deputy Chief for Mission Support Operations, Office of Health, Safety and Security, through the Director, Office of Personnel Security, shall inform in writing the individual involved and counsel or representative of the Appeal Panel's final decision. A copy of the correspondence shall also be provided to the other panel members and the Manager.

(h) If, upon receipt of a written request for a review of the individual's case by the Appeal Panel, the Principal Deputy Chief for Mission Support Operations, Office of Health, Safety and Security, is aware or subsequently becomes aware of information that the individual is the subject of an unresolved inquiry or investigation of a matter that could reasonably be expected to affect the individual's DOE access authorization eligibility, the Principal Deputy Chief for Mission Support Operations may defer action by the Appeal Panel on the request until the inquiry or investigation is completed and its results available for review by the Appeal Panel. In such instances, the Principal Deputy Chief for Mission Support Operations, shall:

(1) Obtain written approval from the Secretary to defer review of the individual's case by the Appeal Panel for an initial interval not to exceed 90 calendar days;

(2) Advise the individual and appropriate DOE officials in writing of the initial deferral and the reason(s) therefor;

(3) Request that the individual's employment status not be affected during the initial and any subsequent deferral interval, except at the written request of the individual;

(4) Obtain written approval from the Secretary to extend the deferral for each subsequent 90 calendar day interval and advise in writing all concerned parties of the Secretary's approval;

(5) Inform in writing all concerned parties when the inquiry or investigation has been completed and the results made available to the Appeal Panel.

(i) If, upon receipt of a written request for review of an individual's case by the Appeal Panel, the Principal Deputy Chief for Mission Support Operations, Office of Health, Safety and Security, is aware or subsequently becomes aware of information that adversely affects the individual's DOE access authorization eligibility and that cannot for national security reasons be disclosed in the proceedings before a DOE Administrative Judge, the Principal Deputy Chief for Mission Support Operations may refer the information and the administrative record to the Secretary for the final decision as to the individual's DOE access authorization eligibility. In such instances, the Principal Deputy Chief for Mission Support Operations shall notify in writing all concerned parties that the individual's case has been provided to the Secretary for a final decision in accordance with § 710.31.

(j) Upon the recommendation of the Appeal Panel, the Secretary may exercise the appeal authority of the Appeal Panel. If the Secretary exercises the appeal authority, then the decision of the Secretary is final.

[66 FR 47065, Sept. 11, 2001, as amended at 71 FR 68731, Nov. 28, 2006]

§ 710.30 New evidence.

(a) In the event of the discovery of new evidence relevant to the allegations contained in the notification letter prior to final decision of the individual's eligibility for access authorization, such evidence shall be submitted by the offering party to the Director, Office of Personnel Security, DOE Headquarters. DOE Counsel shall notify the individual of any new evidence submitted by DOE.

(b) The Director, Office of Personnel Security, DOE Headquarters, shall:

(1) Refer the matter to the Administrative Judge appointed in the individual's case if the Administrative Judge has not yet issued a decision. The Administrative Judge receiving the application for the presentation of new evidence shall determine the appropriate

Department of Energy

§ 710.32

form in which any new evidence, and the other party's response, shall be received, e.g., by testimony before the Administrative Judge, by deposition or by affidavit.

(2) In those cases where the Administrative Judge's decision has been issued, the application for presentation of new evidence shall be referred to the Principal Deputy Chief for Mission Support Operations, Office of Health, Safety and Security. In the event that the Principal Deputy Chief for Mission Support Operations, determines that the new evidence shall be received, he shall determine the form in which it, and the other party's response, shall be received.

(c) When new evidence submitted by either party is received into the record, the opposing party shall be afforded the opportunity to cross-examine the source of the new information or to submit a written response, unless the information is subject to the exceptions in § 710.26 (l) or (o).

[59 FR 35185, July 8, 1994. Redesignated and amended at 66 FR 47065, 47066, Sept. 11, 2001; 71 FR 68731, Nov. 28, 2006]

§ 710.31 Action by the Secretary.

(a) Whenever an individual has not been afforded an opportunity to cross-examine witnesses who have furnished information adverse to the individual under the provisions of §§ 710.26(l) or (o), or the opportunity to review and respond to the information provided by the Principal Deputy Chief for Mission Support Operations, Office of Health, Safety and Security, to the Secretary under § 710.29(i), only the Secretary may issue a final decision to deny or revoke DOE access authorization for the individual after personally reviewing the administrative record and any additional material provided by the Principal Deputy Chief for Mission Support Operations, Office of Health, Safety and Security. The Secretary's authority may not be delegated and may be exercised only when the Secretary determines that the circumstances described in § 710.26(l) or (o), or § 710.29(i) are present, and such determination shall be final.

(b) Whenever the Secretary issues a final decision as to the individual's DOE access authorization eligibility,

the individual and other concerned parties will be notified in writing, by the Principal Deputy Chief for Mission Support Operations, Office of Health, Safety and Security, of that decision and of the Secretary's findings with respect to each of the allegations contained in the notification letter and each substantial issue identified in the statement in support of the request for review to the extent allowed by the national security.

(c) Nothing contained in these procedures shall be deemed to limit or affect the responsibility and powers of the Secretary to issue subpoenas or to deny or revoke access to Restricted Data, national security information, or special nuclear material.

(d) Only the Secretary may approve initial and subsequent requests under § 710.29(h) by the Principal Deputy Chief for Mission Support Operations, Office of Health, Safety and Security, to defer the review of an individual's case by the Appeal Panel.

[66 FR 47066, Sept. 11, 2001, as amended at 71 FR 68731, Nov. 28, 2006]

§ 710.32 Reconsideration of access eligibility.

(a) If, pursuant to the procedures set forth in §§ 710.20 through 710.31 the Manager, Administrative Judge, Appeal Panel, or the Secretary has made a decision granting or reinstating access authorization for an individual, the individual's access authorization eligibility shall be reconsidered as a new administrative review under the procedures set forth in this subpart when previously unconsidered derogatory information is identified, or the individual violates a commitment or promise upon which the DOE previously relied to favorably resolve an issue of access authorization eligibility.

(b) If, pursuant to the procedures set forth in §§ 710.20 through 710.31 the Manager, Administrative Judge, Appeal Panel, or the Secretary has made a decision denying or revoking access authorization for the individual, the individual's access authorization eligibility may be reconsidered only when the individual so requests, when there

§ 710.33

is a bona fide offer of employment requiring access to Restricted Data, national security information, or special nuclear material, and when there is either:

(1) Material and relevant new evidence which the individual and the individual's representatives are without fault in failing to present earlier, or

(2) Convincing evidence of rehabilitation or reformation.

(c) A request for reconsideration shall be submitted in writing to the Principal Deputy Chief for Mission Support Operations, Office of Health, Safety and Security, accompanied by an affidavit setting forth in detail the new evidence or evidence of rehabilitation or reformation. If the Principal Deputy Chief for Mission Support Operations, determines that the regulatory requirements for reconsideration have been met, the Director shall notify the individual that the individual's access authorization shall be reconsidered in accordance with established procedures for determining eligibility for access authorizations.

(d) If the individual's access authorization is not reinstated following reconsideration, the individual shall be advised by the Director, Office of Personnel Security, DOE Headquarters, in writing:

(1) Of the unfavorable action and the reason(s) therefor; and

(2) That within 30 calendar days from the date of receipt of the notification, he may file, through the Director, Office of Personnel Security, DOE Headquarters, DOE Headquarters, a written request for a review of the decision by the Appeal Panel, in accordance with § 710.29.

[66 FR 47066, Sept. 11, 2001, as amended at 71 FR 68731, Nov. 28, 2006]

MISCELLANEOUS

§ 710.33 Terminations.

If the individual is no longer an applicant for access authorization or no longer requires access authorization, the procedures of this subpart shall be terminated without a final decision as to the individual's access authorization eligibility, unless a final decision has been rendered prior to the DOE being notified of the change in the individ-

10 CFR Ch. III (1-1-16 Edition)

ual's pending access authorization status.

[66 FR 47067, Sept. 11, 2001]

§ 710.34 Attorney representation.

In the event the individual is represented by an attorney or other representatives, the individual shall file with the Administrative Judge and DOE Counsel a document designating such attorney or representatives and authorizing one such attorney or representative to receive all correspondence, transcripts, and other documents pertaining to the proceeding under this subpart.

[59 FR 35185, July 8, 1994. Redesignated at 66 FR 47065, Sept. 11, 2001]

§ 710.35 Time frames.

Statements of time established for processing aspects of a case under this subpart are the agency's desired time frames in implementing the procedures set forth in this subpart. However, failure to meet the time frames shall have no impact upon the final disposition of an access authorization by a Manager, Administrative Judge, the Appeal Panel, or the Secretary, and shall confer no procedural or substantive rights upon an individual whose access authorization eligibility is being considered.

[66 FR 47067, Sept. 11, 2001]

§ 710.36 Acting officials.

Except for the Secretary, the responsibilities and authorities conferred in this subpart may be exercised by persons who have been designated in writing as acting for, or in the temporary capacity of, the following DOE positions: The Local Director of Security; the Manager; the Director, Office of Personnel Security, DOE Headquarters; or the General Counsel. The responsibilities and authorities of the Principal Deputy Chief for Mission Support Operations, Office of Health, Safety and Security, may be exercised by persons in security-related Senior Executive Service positions within the Office of Health, Safety and Security who have been designated in writing as acting for, or in the temporary capacity

Department of Energy

Pt. 710, Subpt. A, App. A

of, the Principal Deputy Chief for Mission Support Operations, with the approval of the Chief Health, Safety and Security Officer.

[77 FR 71691, Dec. 4, 2012]

APPENDIX A TO SUBPART A OF PART 710—SELECTED PROVISIONS OF THE ATOMIC ENERGY ACT OF 1954, AS AMENDED, SEC. 141 (42 U.S.C. 2161), SEC. 145 (42 U.S.C. 2165), SEC. 161 (42 U.S.C. 2201)

(By authority of the Department of Energy Organization Act, 42 U.S.C. 7151(a), the Secretary of Energy or her designated representative is to be substituted for the “Commission” and “General Manager” as appropriate.)

Sec. 141. Policy. It shall be the policy of the Commission to control the dissemination and declassification of Restricted Data in such a manner as to assure the common defense and security. * * *

Sec. 145. Restriction. (a) No arrangement shall be made under section 31, no contract shall be made or continued in effect under section 141, and no license shall be issued under section 103 or 104, unless the person with whom such arrangement is made, the contractor or prospective contractor, or the prospective licensee agrees in writing not to permit any individual to have access to Restricted Data until the Civil Service Commission shall have made an investigation and report to the Commission on the character, associations, and loyalty of such individual, and the Commission shall have determined that permitting such person to have access to Restricted Data will not endanger the common defense and security.

(b) Except as authorized by the Commission or the General Manager upon a determination by the Commission or General Manager that such action is clearly consistent with the national interest, no individual shall be employed by the Commission nor shall the Commission permit any individual to have access to Restricted Data until the Civil Service Commission shall have made an investigation and report to the Commission on the character, associations, and loyalty of such individual, and the Commission shall have determined that permitting such person to have access to Restricted Data will not endanger the common defense and security.

(c) In lieu of the investigation and report to be made by the Civil Service Commission pursuant to subsection (b) of this appendix, the Commission may accept an investigation and report on the character, associations, and loyalty of an individual made by another Government agency which conducts personnel security investigations, provided that

a security clearance has been granted to such individual by another Government agency based on such investigation and report.

(d) In the event an investigation made pursuant to subsections (a) and (b) of this appendix develops any data reflecting that the individual who is the subject of the investigation is of questionable loyalty, the Civil Service Commission shall refer the matter to the Federal Bureau of Investigation for the conduct of a full field investigation, the results of which shall be furnished to the Civil Service Commission for its information and appropriate action.

(e) If the President deems it to be in the national interest he may from time to time determine that investigations of any group or class which are required by subsections (a), (b), and (c) of this appendix be made by the Federal Bureau of Investigation.

(f) Notwithstanding the provisions of subsections (a), (b), and (c) of this appendix, a majority of the members of the Commission shall certify those specific positions which are of a high degree of importance or sensitivity, and upon such certification, the investigation and reports required by such provisions shall be made by the Federal Bureau of Investigation.

(g) The Commission shall establish standards and specifications in writing as to the scope and extent of investigations, the reports of which will be utilized by the Commission in making the determination, pursuant to subsections (a), (b), and (c) of this appendix, that permitting a person access to Restricted Data will not endanger the common defense and security. Such standards and specifications shall be based on the location and class or kind of work to be done, and shall, among other considerations, take into account the degree of importance to the common defense and security of the Restricted Data to which access will be permitted.

(h) Whenever the Congress declares that a state of war exists, or in the event of a national disaster due to enemy attack, the Commission is authorized during the state of war or period of national disaster due to enemy attack to employ individuals and to permit individuals access to Restricted Data pending the investigation report, and determination required by section 145b, to the extent that and so long as the Commission finds that such action is required to prevent impairment of its activities in furtherance of the common defense and security.

Sec. 161. General provisions. In the performance of its functions the Commission is authorized to:

(a) Establish advisory boards to advise with and make recommendations to the

Commission on legislation, policies, administration, research, and other matters, provided that the Commission issues regulations setting forth the scope, procedure, and limitations of the authority of each such board;

(b) Establish by rule, regulation, or order, such standards and instructions to govern the possession and use of special nuclear material, source material, and byproduct material as the Commission may deem necessary or desirable to promote the common defense and security or to protect health or to minimize danger to life or property;

(c) Make such studies and investigations, obtain such information, and hold such meetings or hearings as the Commission may deem necessary or proper to assist it in exercising any authority provided in this chapter, or in the administration or enforcement of this Act, or any regulations or orders issued thereunder. For such purposes the Commission is authorized to administer oaths and affirmations, and by subpoena to require any person to appear and testify, or to appear and produce documents, or both, at any designated place. Witnesses subpoenaed under this subsection, shall be paid the same fees and mileage as are paid witnesses in the district courts of the United States.

* * * * *

(i) Prescribe such regulations or orders as it may deem necessary (1) to protect Restricted Data received by any person in connection with any activity authorized pursuant to this Act, (2) to guard against the loss or diversion of any special nuclear material acquired by any person pursuant to section 53 or produced by any person in connection with any activity authorized pursuant to the Act, to prevent any use or disposition thereof which the Commission may determine to be inimical to the common defense and security, including regulations or orders designating activities, involving quantities of special nuclear material which in the opinion of the Commission are important to the common defense and security, that may be conducted only by persons whose character, associations, and loyalty shall have been investigated under standards and specifications established by the Commission and as to whom the Commission shall have determined that permitting each such person to conduct the activity will not be inimical to the common defense and security, and (3) to govern any activity authorized pursuant to this Act, including standards and restrictions governing the design, location, and operation of facilities used in the conduct of such activity, in order to protect health and to minimize danger to life or property;

* * * * *

(n) Delegate to the General Manager or other officers of the Commission any of those functions assigned to it under this Act except those specified in sections 51, 57b, 61, 108, 123, 145b (with respect to the determination of those persons to whom the Commission may reveal Restricted Data in the national interest), 145f, and 161a;

* * * * *

(p) Make, promulgate, issue, rescind, and amend such rules and regulations as may be necessary to carry out the purposes of this Act.

APPENDIX B TO SUBPART A OF PART 710—ADJUDICATIVE GUIDELINES APPROVED BY THE PRESIDENT IN ACCORDANCE WITH THE PROVISIONS OF EXECUTIVE ORDER 12968

(The following guidelines, included in this subpart for reference purposes only, are reproduced as provided to the DOE by the Security Policy Board. The President may change the guidelines without notice.)

ADJUDICATIVE GUIDELINES FOR DETERMINING ELIGIBILITY FOR ACCESS TO CLASSIFIED INFORMATION

1. *Introduction.* The following adjudicative guidelines are established for all U.S. government civilian and military personnel, consultants, contractors, employees of contractors, licensees, certificate holders or grantees and their employees and other individuals who require access to classified information. They apply to persons being considered for initial or continued eligibility for access to classified information, to include sensitive compartmented information and special access programs and are to be used by government departments and agencies in all final clearance determinations.

2. *The Adjudicative Process.*

(a) The adjudicative process is an examination of a sufficient period of a person's life to make an affirmative determination that the person is eligible for a security clearance. Eligibility for access to classified information is predicated upon the individual meeting these personnel security guidelines. The adjudicative process is the careful weighing of a number of variables known as the whole person concept. Available, reliable information about the person, past and present, favorable and unfavorable, should be considered in reaching a determination. In evaluating the relevance of an individual's conduct, the adjudicator should consider the following factors:

(1) The nature, extent, and seriousness of the conduct;

Department of Energy

Pt. 710, Subpt. A, App. B

(2) The circumstances surrounding the conduct, to include knowledgeable participation;

(3) The frequency and recency of the conduct;

(4) The individual's age and maturity at the time of the conduct;

(5) The voluntariness of participation;

(6) The presence or absence of rehabilitation and other pertinent behavioral changes;

(7) The motivation for the conduct;

(8) The potential for pressure, coercion, exploitation, or duress; and

(9) The likelihood of continuation or recurrence.

(b) Each case must be judged on its own merits, and final determination remains the responsibility of the specific department or agency. Any doubt as to whether access to classified information is clearly consistent with national security will be resolved in favor of the national security.

(c) The ultimate determination of whether the granting or continuing of eligibility for a security clearance is clearly consistent with the interests of national security must be an overall common sense determination based upon careful consideration of the following, each of which is to be evaluated in the context of the whole person concept, as explained further below:

(1) Guideline A: Allegiance to the United States;

(2) Guideline B: Foreign influence;

(3) Guideline C: Foreign preference;

(4) Guideline D: Sexual behavior;

(5) Guideline E: Personal conduct;

(6) Guideline F: Financial considerations;

(7) Guideline G: Alcohol consumption;

(8) Guideline H: Drug involvement;

(9) Guideline I: Emotional, mental, and personality disorders;

(10) Guideline J: Criminal Conduct;

(11) Guideline K: Security violations;

(12) Guideline L: Outside activities;

(13) Guideline M: Misuse of Information Technology Systems.

(d) Although adverse information concerning a single criterion may not be sufficient for an unfavorable determination, the individual may be disqualified if available information reflects a recent or recurring pattern of questionable judgment, irresponsibility, or emotionally unstable behavior. Notwithstanding, the whole person concept, pursuit of further investigation may be terminated by an appropriate adjudicative agency in the face of reliable, significant, disqualifying, adverse information.

(e) When information of security concern becomes known about an individual who is currently eligible for access to classified information, the adjudicator should consider whether the person:

(1) Voluntarily reported the information;

(2) Was truthful and complete in responding to questions;

(3) Sought assistance and followed professional guidance, where appropriate;

(4) Resolved or appears likely to favorably resolve the security concern;

(5) Has demonstrated positive changes in behavior and employment;

(6) Should have his or her access temporarily suspended pending final adjudication of the information.

(f) If after evaluating information of security concern, the adjudicator decides that the information is not serious enough to warrant a recommendation of disapproval or revocation of the security clearance, it may be appropriate to recommend approval with a warning that future incidents of a similar nature may result in revocation of access.

GUIDELINE A: ALLEGIANCE TO THE UNITED STATES

3. *The Concern.* An individual must be of unquestioned allegiance to the United States. The willingness to safeguard classified information is in doubt if there is any reason to suspect an individual's allegiance to the United States.

4. *Conditions that could raise a security concern and may be disqualifying include:*

(a) Involvement in any act of sabotage, espionage, treason, terrorism, sedition, or other act whose aim is to overthrow the Government of the United States or alter the form of government by unconstitutional means;

(b) Association or sympathy with persons who are attempting to commit, or who are committing, any of the above acts;

(c) Association or sympathy with persons or organizations that advocate the overthrow of the United States Government, or any state or subdivision, by force or violence or by other unconstitutional means;

(d) Involvement in activities which unlawfully advocate or practice the commission of acts of force or violence to prevent others from exercising their rights under the Constitution or laws of the United States or of any state.

5. *Conditions that could mitigate security concerns include:*

(a) The individual was unaware of the unlawful aims of the individual or organization and severed ties upon learning of these;

(b) The individual's involvement was only with the lawful or humanitarian aspects of such an organization;

(c) Involvement in the above activities occurred for only a short period of time and was attributable to curiosity or academic interest;

(d) The person has had no recent involvement or association with such activities.

GUIDELINE B: FOREIGN INFLUENCE

6. *The Concern.* A security risk may exist when an individual's immediate family, including cohabitants and other persons to whom he or she may be bound by affection, influence, or obligation are not citizens of the United States or may be subject to duress. These situations could create the potential for foreign influence that could result in the compromise of classified information. Contacts with citizens of other countries or financial interests in other countries are also relevant to security determinations if they make an individual potentially vulnerable to coercion, exploitation, or pressure.

7. *Conditions that could raise a security concern and may be disqualifying include:*

- (a) An immediate family member, or a person to whom the individual has close ties of affection or obligation, is a citizen of, or resident or present in, a foreign country.
- (b) Sharing living quarters with a person or persons, regardless of their citizenship status, if the potential for adverse foreign influence or duress exists;
- (c) Relatives, cohabitants, or associates who are connected with any foreign country;
- (d) Failing to report, where required, associations with foreign nationals;
- (e) Unauthorized association with a suspected or known collaborator or employee of a foreign intelligence service;
- (f) Conduct which may make the individual vulnerable to coercion, exploitation, or pressure by a foreign government;
- (g) Indications that representatives or nationals from a foreign country are acting to increase the vulnerability of the individual to possible future exploitation, coercion or pressure;
- (h) A substantial financial interest in a country, or in any foreign owned or operated business that could make the individual vulnerable to foreign influence.

8. *Conditions that could mitigate security concerns include:*

- (a) A determination that the immediate family member(s) (spouse, father, mother, sons, daughters, brothers, sisters), cohabitant, or associate(s) in question are not agents of a foreign power or in a position to be exploited by a foreign power in a way that could force the individual to choose between loyalty to the person(s) involved and the United States;
- (b) Contacts with foreign citizens are the result of official United States Government business;
- (c) Contact and correspondence with foreign citizens are casual and infrequent;
- (d) The individual has promptly complied with existing agency requirements regarding the reporting of contacts, requests, or threats from persons or organizations from a foreign country;

(e) Foreign financial interests are minimal and not sufficient to affect the individual's security responsibilities.

GUIDELINE C: FOREIGN PREFERENCE

9. *The Concern.* When an individual acts in such a way as to indicate a preference for a foreign country over the United States, then he or she may be prone to provide information or make decisions that are harmful to the interests of the United States.

10. *Conditions that could raise a security concern and may be disqualifying include:*

- (a) The exercise of dual citizenship;
- (b) Possession and/or use of a foreign passport;
- (c) Military service or a willingness to bear arms for a foreign country;
- (d) Accepting educational, medical, or other benefits, such as retirement and social welfare, from a foreign country;
- (e) Residence in a foreign country to meet citizenship requirements;
- (f) Using foreign citizenship to protect financial or business interests in another country;
- (g) Seeking or holding political office in the foreign country;
- (h) Voting in foreign elections; and
- (i) Performing or attempting to perform duties, or otherwise acting, so as to serve the interests of another government in preference to the interests of the United States.

11. *Conditions that could mitigate security concerns include:*

- (a) Dual citizenship is based solely on parents' citizenship or birth in a foreign country;
- (b) Indicators of possible foreign preference (e.g., foreign military service) occurred before obtaining United States citizenship;
- (c) Activity is sanctioned by the United States;
- (d) Individual has expressed a willingness to renounce dual citizenship.

GUIDELINE D: SEXUAL BEHAVIOR

12. *The Concern.* Sexual behavior is a security concern if it involves a criminal offense, indicates a personality or emotional disorder, may subject the individual to coercion, exploitation, or duress, or reflects lack of judgment or discretion. (The adjudicator should also consider guidelines pertaining to criminal conduct (Guideline J) and emotional, mental, and personality disorders (Guideline I) in determining how to resolve the security concerns raised by sexual behavior.) Sexual orientation or preference may not be used as a basis for a disqualifying factor in determining a person's eligibility for a security clearance.

13. *Conditions that could raise a security concern and may be disqualifying include:*

Department of Energy

Pt. 710, Subpt. A, App. B

(a) Sexual behavior of a criminal nature, whether or not the individual has been prosecuted;

(b) Compulsive or addictive sexual behavior when the person is unable to stop a pattern of self-destructive high-risk behavior or that which is symptomatic of a personality disorder;

(c) Sexual behavior that causes an individual to be vulnerable to coercion, exploitation, or duress;

(d) Sexual behavior of a public nature and/or that which reflects lack of discretion or judgment.

14. *Conditions that could mitigate security concerns include:*

(a) The behavior occurred during or prior to adolescence and there is no evidence of subsequent conduct of a similar nature;

(b) The behavior was not recent and there is no evidence of subsequent conduct of a similar nature;

(c) There is no other evidence of questionable judgment, irresponsibility, or emotional instability;

(d) The behavior no longer serves as a basis for coercion, exploitation, or duress.

GUIDELINE E: PERSONAL CONDUCT

15. *The Concern.* Conduct involving questionable judgment, untrustworthiness, unreliability, lack of candor, dishonesty, or unwillingness to comply with rules and regulations could indicate that the person may not properly safeguard classified information. The following will normally result in an unfavorable clearance action or administrative termination of further processing for clearance eligibility:

(a) Refusal to undergo or cooperate with required security processing, including medical and psychological testing; or

(b) Refusal to complete required security forms, releases, or provide full, frank and truthful answers to lawful questions of investigators, security officials or other official representatives in connection with a personnel security or trustworthiness determination.

16. *Conditions that could raise a security concern and may be disqualifying also include:*

(a) Reliable, unfavorable information provided by associates, employers, coworkers, neighbors, and other acquaintances;

(b) The deliberate omission, concealment, or falsification of relevant and material facts from any personnel security questionnaire, personal history statement, or similar form used to conduct investigations, determine employment qualifications, award benefits or status, determine security clearance eligibility or trustworthiness, or award fiduciary responsibilities;

(c) Deliberately providing false or misleading information concerning relevant and material matters to an investigator, security official, competent medical authority, or

other official representative in connection with a personnel security or trustworthiness determination.

(d) Personal conduct or concealment of information that may increase an individual's vulnerability to coercion, exploitation, or duress, such as engaging in activities which, if known, may affect the person's personal, professional, or community standing or render the person susceptible to blackmail;

(e) A pattern of dishonesty or rule violations, including violation of any written or recorded agreement made between the individual and the agency;

(f) Association with persons involved in criminal activity.

17. *Conditions that could mitigate security concerns include:*

(a) The information was unsubstantiated or not pertinent to a determination of judgment, trustworthiness, or reliability;

(b) The falsification was an isolated incident, was not recent, and the individual has subsequently provided correct information voluntarily;

(c) The individual made prompt, good-faith efforts to correct the falsification before being confronted with the facts;

(d) Omission of material facts was caused or significantly contributed to by improper or inadequate advice of authorized personnel, and the previously omitted information was promptly and fully provided;

(e) The individual has taken positive steps to significantly reduce or eliminate vulnerability to coercion, exploitation, or duress;

(f) A refusal to cooperate was based on advice from legal counsel or other officials that the individual was not required to comply with security processing requirements and, upon being made aware of the requirement, fully and truthfully provided the requested information;

(g) Association with persons involved in criminal activities has ceased.

GUIDELINE F: FINANCIAL CONSIDERATIONS

18. *The Concern.* An individual who is financially overextended is at risk of having to engage in illegal acts to generate funds. Unexplained affluence is often linked to proceeds from financially profitable criminal acts.

19. *Conditions that could raise a security concern and may be disqualifying include:*

(a) A history of not meeting financial obligations;

(b) Deceptive or illegal financial practices such as embezzlement, employee theft, check fraud, income tax evasion, expense account fraud, filing deceptive loan statements, and other intentional financial breaches of trust;

(c) Inability or unwillingness to satisfy debts;

(d) Unexplained affluence;

(e) Financial problems that are linked to gambling, drug abuse, alcoholism, or other issues of security concern.

20. *Conditions that could mitigate security concerns include:*

- (a) The behavior was not recent;
- (b) It was an isolated incident;
- (c) The conditions that resulted in the behavior were largely beyond the person's control (e.g., loss of employment, a business downturn, unexpected medical emergency, or a death, divorce or separation);
- (d) The person has received or is receiving counseling for the problem and there are clear indications that the problem is being resolved or is under control;
- (e) The affluence resulted from a legal source; and
- (f) The individual initiated a good-faith effort to repay overdue creditors or otherwise resolve debts.

GUIDELINE G: ALCOHOL CONSUMPTION

21. *The Concern.* Excessive alcohol consumption often leads to the exercise of questionable judgment, unreliability, failure to control impulses, and increases the risk of unauthorized disclosure of classified information due to carelessness.

22. *Conditions that could raise a security concern and may be disqualifying include:*

- (a) Alcohol-related incidents away from work, such as driving while under the influence, fighting, child or spouse abuse, or other criminal incidents related to alcohol use;
- (b) Alcohol-related incidents at work, such as reporting for work or duty in an intoxicated or impaired condition, or drinking on the job;
- (c) Diagnosis by a credentialed medical professional (e.g., physician, clinical psychologist, or psychiatrist) of alcohol abuse or alcohol dependence;
- (d) Evaluation of alcohol abuse or alcohol dependence by a licensed clinical social worker who is a staff member of a recognized alcohol treatment program;
- (e) Habitual or binge consumption of alcohol to the point of impaired judgment;
- (f) Consumption of alcohol, subsequent to a diagnosis of alcoholism by a credentialed medical professional and following completion of an alcohol rehabilitation program.

23. *Conditions that could mitigate security concerns include:*

- (a) The alcohol related incidents do not indicate a pattern;
- (b) The problem occurred a number of years ago and there is no indication of a recent problem;
- (c) Positive changes in behavior supportive of sobriety;
- (d) Following diagnosis of alcohol abuse or alcohol dependence, the individual has successfully completed inpatient or outpatient rehabilitation along with aftercare require-

ments, participated frequently in meetings of Alcoholics Anonymous or a similar organization, has abstained from alcohol for a period of at least 12 months, and received a favorable prognosis by a credentialed medical professional or a licensed clinical social worker who is a staff member of a recognized alcohol treatment program.

GUIDELINE H: DRUG INVOLVEMENT

24. *The Concern.*

(a) Improper or illegal involvement with drugs raises questions regarding an individual's willingness or ability to protect classified information. Drug abuse or dependence may impair social or occupational functioning, increasing the risk of an unauthorized disclosure of classified information.

(b) Drugs are defined as mood and behavior altering substances and include: (1) Drugs, materials, and other chemical compounds identified and listed in the Controlled Substances Act of 1970, as amended (e.g., marijuana or cannabis, depressants, narcotics, stimulants, and hallucinogens), and (2) inhalants and other similar substances.

(c) Drug abuse is the illegal use of a drug or use of a legal drug in a manner that deviates from approved medical direction.

25. *Conditions that could raise a security concern and may be disqualifying include:*

- (a) Any drug abuse (see above definition);
- (b) Illegal drug possession, including cultivation, processing, manufacture, purchase, sale, or distribution;
- (c) Diagnosis by a credentialed medical professional (e.g., physician, clinical psychologist, or psychiatrist) of drug abuse or drug dependence;
- (d) Evaluation of drug abuse or drug dependence by a licensed clinical social worker who is a staff member of a recognized drug treatment program;
- (e) Failure to successfully complete a drug treatment program prescribed by a credentialed medical professional. Recent drug involvement, especially following the granting of a security clearance, or an expressed intent not to discontinue use, will almost invariably result in an unfavorable determination.

26. *Conditions that could mitigate security concerns include:*

- (a) The drug involvement was not recent;
- (b) The drug involvement was an isolated or aberrational event;
- (c) A demonstrated intent not to abuse any drugs in the future;
- (d) Satisfactory completion of a prescribed drug treatment program, including rehabilitation and aftercare requirements, without recurrence of abuse, and a favorable prognosis by a credentialed medical professional.

Department of Energy

Pt. 710, Subpt. A, App. B

GUIDELINE I: EMOTIONAL, MENTAL, AND PERSONALITY DISORDERS

27. *The Concern.* Emotional, mental, and personality disorders can cause a significant defect in an individual's psychological, social and occupational functioning. These disorders are of security concern because they may indicate a defect in judgment, reliability, or stability. A credentialed mental health professional (e.g., clinical psychologist or psychiatrist), employed by, acceptable to or approved by the government, should be utilized in evaluating potentially disqualifying and mitigating information fully and properly, and particularly for consultation with the individual's mental health care provider.

28. *Conditions that could raise a security concern and may be disqualifying include:*

(a) An opinion by a credentialed mental health professional that the individual has a condition or treatment that may indicate a defect in judgment, reliability, or stability;

(b) Information that suggests that an individual has failed to follow appropriate medical advice relating to treatment of a condition, e.g., failure to take prescribed medication;

(c) A pattern of high-risk, irresponsible, aggressive, anti-social or emotionally unstable behavior;

(d) Information that suggests that the individual's current behavior indicates a defect in his or her judgment or reliability.

29. *Conditions that could mitigate security clearance concerns include:*

(a) There is no indication of a current problem;

(b) Recent opinion by a credentialed mental health professional that an individual's previous emotional, mental, or personality disorder is cured, under control or in remission and has a low probability of recurrence or exacerbation;

(c) The past emotional instability was a temporary condition (e.g., one caused by a death, illness, or marital breakup), the situation has been resolved, and the individual is no longer emotionally unstable.

GUIDELINE J: CRIMINAL CONDUCT

30. *The Concern.* A history or pattern of criminal activity creates a doubt about a person's judgment, reliability and trustworthiness.

31. *Conditions that could raise a security concern and may be disqualifying include:*

(a) Allegations or admissions of criminal conduct, regardless of whether the person was formally charged;

(b) A single serious crime or multiple lesser offenses.

32. *Conditions that could mitigate security concerns include:*

(a) The criminal behavior was not recent;

(b) The crime was an isolated incident;

(c) The person was pressured or coerced into committing the act and those pressures are no longer present in that person's life;

(d) The person did not voluntarily commit the act and/or the factors leading to the violation are not likely to recur;

(e) Acquittal;

(f) There is clear evidence of successful rehabilitation.

GUIDELINE K: SECURITY VIOLATIONS

33. *The Concern.* Noncompliance with security regulations raises doubt about an individual's trustworthiness, willingness, and ability to safeguard classified information.

34. *Conditions that could raise a security concern and may be disqualifying include:*

(a) Unauthorized disclosure of classified information;

(b) Violations that are deliberate or multiple or due to negligence.

35. *Conditions that could mitigate security concerns include actions that:*

(a) Were inadvertent;

(b) Were isolated or infrequent;

(c) Were due to improper or inadequate training;

(d) Demonstrate a positive attitude towards the discharge of security responsibilities.

GUIDELINE L: OUTSIDE ACTIVITIES

36. *The Concern.* Involvement in certain types of outside employment or activities is of security concern if it poses a conflict with an individual's security responsibilities and could create an increased risk of unauthorized disclosure of classified information.

37. *Conditions that could raise a security concern and may be disqualifying include any service, whether compensated, volunteer, or employment with:*

(a) A foreign country;

(b) Any foreign national;

(c) A representative of any foreign interest;

(d) Any foreign, domestic, or international organization or person engaged in analysis, discussion, or publication of material on intelligence, defense, foreign affairs, or protected technology.

38. *Conditions that could mitigate security concerns include:*

(a) Evaluation of the outside employment or activity indicates that it does not pose a conflict with an individual's security responsibilities;

(b) The individual terminates employment or discontinues the activity upon being notified that it is in conflict with his or her security responsibilities.

GUIDELINE M: MISUSE OF INFORMATION
TECHNOLOGY SYSTEMS

39. *The Concern.* Noncompliance with rules, procedures, guidelines, or regulations pertaining to information technology systems may raise security concerns about an individual's trustworthiness, willingness, and ability to properly protect classified systems, networks, and information. Information Technology Systems include all related equipment used for the communication, transmission, processing, manipulation, and storage of classified or sensitive information.

40. *Conditions that could raise a security concern and may be disqualifying include:*

(a) Illegal or unauthorized entry into any information technology system;

(b) Illegal or unauthorized modification destruction, manipulation or denial of access to information residing on an information technology system;

(c) Removal (or use) of hardware, software, or media from any information technology system without authorization, when specifically prohibited by rules, procedures, guidelines or regulations;

(d) Introduction of hardware, software, or media into any information technology system without authorization, when specifically prohibited by rules, procedures, guidelines or regulations.

41. *Conditions that could mitigate security concerns include:*

(a) The misuse was not recent or significant;

(b) The conduct was unintentional or inadvertent;

(c) The introduction or removal of media was authorized;

(d) The misuse was an isolated event;

(e) The misuse was followed by a prompt, good faith effort to correct the situation.

SOURCE: 69 FR 3223, Jan. 23, 2004, unless otherwise noted.

Subpart A—Establishment of and Procedures for the Human Reliability Program

GENERAL PROVISIONS

§ 712.1 Purpose.

This part establishes the policies and procedures for a Human Reliability Program (HRP) in the Department of Energy (DOE), including the National Nuclear Security Administration (NNSA). The HRP is a security and safety reliability program designed to ensure that individuals who occupy positions affording access to certain materials, nuclear explosive devices, facilities, and programs meet the highest standards of reliability and physical and mental suitability. This objective is accomplished under this part through a system of continuous evaluation that identifies individuals whose judgment and reliability may be impaired by physical or mental/personality disorders, alcohol abuse, use of illegal drugs or the abuse of legal drugs

Department of Energy

§712.3

or other substances, or any other condition or circumstance that may be of a security or safety concern.

§712.2 Applicability.

The HRP applies to all applicants for, or current employees of DOE or a DOE contractor or subcontractor in a position defined or designated under §712.10 of this subpart as an HRP position. Individuals currently in a Personnel Assurance Program or Personnel Security Assurance Program position will be grandfathered into the HRP.

§712.3 Definitions.

The following definitions are used in this part:

Access means:

(1) A situation that may provide an individual proximity to or control over Category I special nuclear material (SNM); or

(2) The proximity to a nuclear explosive and/or Category I SNM that allows the opportunity to divert, steal, tamper with, and/or damage the nuclear explosive or material in spite of any controls that have been established to prevent such unauthorized actions.

Alcohol means the intoxicating agent in beverage alcohol, ethyl alcohol, or other low molecular weight alcohol.

Alcohol abuse means consumption of any beverage, mixture, or preparation, including any medication containing alcohol that results in impaired social or occupational functioning.

Alcohol concentration means the alcohol in a volume of breath expressed in terms of grams of alcohol per 210 liters of breath as indicated by a breath test.

Alcohol use disorder means a maladaptive pattern in which a person's intake of alcohol is great enough to damage or adversely affect physical or mental health or personal, social, or occupational function; or when alcohol has become a prerequisite to normal function.

Certification means the formal action the HRP certifying official takes that permits an individual to perform HRP duties after it is determined that the individual meets the requirements for certification under this part.

Contractor means subcontractors at all tiers and any industrial, educational, commercial, or other entity,

grantee, or licensee, including an employee that has executed an agreement with the Federal government for the purpose of performing under a contract, license, or other arrangement.

Designated Physician means a licensed doctor of medicine or osteopathy who has been nominated by the Site Occupational Medical Director (SOMD) and approved by the Manager or designee, with the concurrence of the Director, Office of Health and Safety, to provide professional expertise in occupational medicine for the HRP.

Designated Psychologist means a licensed Ph.D., or Psy.D., in clinical psychology who has been nominated by the SOMD and approved by the Manager or designee, with the concurrence of the Director, Office of Health and Safety, to provide professional expertise in the area of psychological assessment for the HRP.

Diagnostic and Statistical Manual of Mental Disorders means the current version of the American Psychiatric Association's manual containing definitions of psychiatric terms and diagnostic criteria of mental disorders.

Director, Office of Health and Safety means the DOE individual with responsibility for policy and quality assurance for DOE occupational medical programs.

Drug abuse means use of an illegal drug or misuse of legal drugs.

Evidential-grade breath alcohol device means a device that conforms to the model standards for an evidential breath-testing device as listed on the Conforming Products List of Evidential Breath Measurement Devices published by the National Highway Traffic Safety Administration (NHTSA).

Flashback means an involuntary, spontaneous recurrence of some aspect of a hallucinatory experience or perceptual distortion that occurs long after taking the hallucinogen that produced the original effect; also referred to as hallucinogen persisting perception disorder.

Hallucinogen means a drug or substance that produces hallucinations, distortions in perception of sights and sounds, and disturbances in emotion, judgment, and memory.

§ 712.3

10 CFR Ch. III (1–1–16 Edition)

HRP candidate means an individual being considered for assignment to an HRP position.

HRP-certified individual means an individual who has successfully completed the HRP requirements.

HRP certifying official means the Manager or the Manager's designee who certifies, recertifies, temporarily removes, reviews the circumstances of an individual's removal from an HRP position, and directs reinstatement.

HRP management official means an individual designated by the DOE or a DOE contractor, as appropriate, who has programmatic responsibility for HRP positions.

Illegal drug means a controlled substance, as specified in Schedules I through V of the Controlled Substances Act, 21 U.S.C. 811 and 812; the term does not apply to the use of a controlled substance in accordance with the terms of a valid prescription, or other uses authorized by Federal law.

Impaired or impairment means a decrease in functional capacity of a person that is caused by a physical, mental, emotional, substance abuse, or behavioral disorder.

Incident means an unplanned, undesired event that interrupts the completion of an activity and that may include property damage or injury.

Job task analysis means the formal process of defining the requirements of a position and identifying the knowledge, skills, and abilities necessary to effectively perform the duties of the position.

Manager means the senior Federal line manager at a departmental site or Federal office with HRP-designated positions.

Material access area means a type of Security Area that is authorized to contain a Category I quantity of special nuclear material and that has specifically defined physical barriers, is located within a Protected Area, and is subject to specific access controls.

Medical assessment means an evaluation of an HRP candidate and HRP-certified individual's present health status and health risk factors by means of:

- (1) Medical history review;
- (2) Job task analysis;
- (3) Physical examination;

- (4) Appropriate laboratory tests and measurements; and

- (5) Appropriate psychological and psychiatric evaluations.

Nuclear explosive means an assembly of fissionable and/or fusionable materials and main charge high explosive parts or propellants that is capable of producing a nuclear detonation.

Nuclear explosive duties means work assignments that allow custody of a nuclear explosive or access to a nuclear explosive device or area.

Occurrence means any event or incident that is a deviation from the planned or expected behavior or course of events in connection with any DOE or DOE-controlled operation if the deviation has environmental, public health and safety, or national security protection significance, including (but not limited to) incidents involving:

- (1) Injury or fatality to any person involving actions of a DOE employee or contractor employee;

- (2) An explosion, fire, spread of radioactive material, personal injury or death, or damage to property that involves nuclear explosives under DOE jurisdiction;

- (3) Accidental release of pollutants that results from, or could result in, a significant effect on the public or environment; or

- (4) Accidental release of radioactive material above regulatory limits.

Psychological assessment or test means a scientifically validated instrument designed to detect psychiatric, personality, and behavioral tendencies that would indicate problems with reliability and judgment.

Random alcohol testing means the unscheduled, unannounced alcohol testing of randomly selected employees by a process designed to ensure that selections are made in a nondiscriminatory manner.

Random drug testing means the unscheduled, unannounced drug testing of randomly selected employees by a process designed to ensure that selections are made in a nondiscriminatory manner.

Reasonable suspicion means a suspicion based on an articulable belief that an individual uses illegal drugs or is under the influence of alcohol, drawn

Department of Energy

§ 712.10

from reasonable inferences from particular facts, as detailed further in part 707 of this title.

Recertification means the formal action the HRP certifying official takes annually, not to exceed 12 months, that permits an employee to remain in the HRP and perform HRP duties.

Reinstatement means the action the HRP certifying official takes after it has been determined that an employee who has been temporarily removed from the HRP meets the certification requirements of this part and can be returned to HRP duties.

Reliability means an individual's ability to adhere to security and safety rules and regulations.

Safety concern means any condition, practice, or violation that causes a substantial probability of physical harm, property loss, and/or environmental impact.

Security concern means the presence of information regarding an individual applying for or holding an HRP position that may be considered derogatory under the criteria listed in 10 CFR part 710, subpart A.

Semi-structured interview means an interview by a Designated Psychologist, or a psychologist under his or her supervision, who has the latitude to vary the focus and content of the questions depending on the interviewee's responses.

Site Occupational Medical Director (SOMD) means the physician responsible for the overall direction and operation of the occupational medical program at a particular site.

Supervisor means the individual who has oversight and organizational responsibility for a person holding an HRP position, and whose duties include evaluating the behavior and performance of the HRP-certified individual.

Transfer means an HRP-certified individual moving from one site to another site.

Unacceptable damage means an incident that could result in a nuclear detonation; high-explosive detonation or deflagration from a nuclear explosive; the diversion, misuse, or removal of Category I special nuclear material; or an interruption of nuclear explosive operations with a significant impact on national security.

Unsafe practice means either a human action departing from prescribed hazard controls or job procedures or practices, or an action causing a person unnecessary exposure to a hazard.

[69 FR 3223, Jan. 23, 2004, as amended at 71 FR 68731, Nov. 28, 2006; 78 FR 56135, Sept. 12, 2013]

PROCEDURES

§ 712.10 Designation of HRP positions.

(a) HRP certification is required for each individual assigned to, or applying for, a position that:

(1) Affords access to Category I SNM or has responsibility for transportation or protection of Category I quantities of SNM;

(2) Involves nuclear explosive duties or has responsibility for working with, protecting, or transporting nuclear explosives, nuclear devices, or selected components;

(3) Affords access to information concerning vulnerabilities in protective systems when transporting nuclear explosives, nuclear devices, selected components, or Category I quantities of SNM; or

(4) Is not included in paragraphs (a)(1) through (3) of this section but affords the potential to significantly impact national security or cause unacceptable damage and is approved pursuant to paragraph (b) of this section.

(b) The Manager or the HRP management official may nominate positions for the HRP that are not specified in paragraphs (a)(1) through (3) of this section or that have not previously been designated HRP positions. All such nominations must be submitted to and approved by either the NNSA Administrator, his or her designee, the Chief Health, Safety and Security Officer, or the appropriate Lead Program Secretarial Officer, or his or her designee.

(c) Before nominating a position for designation as an HRP position, the Manager or the HRP management official must analyze the risks the position poses for the particular operational program. If the analysis shows that more restrictive physical, administrative, or other controls could be implemented that would prevent the position from being designated an HRP

§ 712.11

10 CFR Ch. III (1–1–16 Edition)

position, those controls will be implemented, if practicable.

(d) Nothing in this part prohibits contractors from establishing stricter employment standards for individuals who are nominated to DOE for certification or recertification in the HRP.

[69 FR 3223, Jan. 23, 2004, as amended at 71 FR 68731, Nov. 28, 2006]

§ 712.11 General requirements for HRP certification.

(a) The following certification requirements apply to each individual applying for or in an HRP position:

(1) A DOE “Q” access authorization based on a background investigation;

(2) An annual review of the personnel security file;

(3) Signed releases, acknowledgments, and waivers to participate in the HRP on forms provided by DOE;

(4) Completion of initial and annual HRP instruction as provided in § 712.17;

(5) Successful completion of an initial and annual supervisory review, medical assessment, management evaluation, and a DOE personnel security review for certification and recertification in accordance with this part. With respect to the DOE personnel security review:

(i) If the DOE personnel security review is not completed within the 12-month time period and the individual’s access authorization is not suspended, the HRP certification form shall be forwarded to the HRP certifying official for recertification or temporary removal, contingent upon a favorable security review;

(ii) If a final determination has been made by DOE personnel security that is favorable, this information shall be forwarded to the HRP certifying official and so noted on the certification form; or

(iii) If the final determination has been made by DOE personnel security that the access authorization has been suspended, the individual shall be immediately removed from the HRP position, the HRP certifying official notified, the information noted on the certification form, and the procedures outlined in 10 CFR part 710, subpart A, shall be followed.

(6) No use of any hallucinogen in the preceding five years and no experience

of flashback resulting from the use of any hallucinogen more than five years before applying for certification or recertification;

(7) A psychological evaluation consisting of a generally accepted psychological assessment (test) and a semi-structured interview;

(8) An initial drug test and random drug tests for the use of illegal drugs at least once each 12 months in accordance with DOE policies implementing Executive Order 12564 or the relevant provisions of 10 CFR part 707 for DOE contractors, and DOE Order 3792.3, “Drug-Free Federal Workplace Testing Implementation Program,” for DOE employees;

(9) An initial alcohol test and random alcohol tests at least once each 12 months using an evidential-grade breath alcohol device, as listed without asterisks on the Conforming Products List of Evidential Breath Measurement Devices published by the NHTSA (49 CFR part 40); and

(10) Successful completion of a counterintelligence evaluation, which includes a counterintelligence-scope polygraph examination in accordance with DOE’s Polygraph Examination Regulation, 10 CFR part 709, and any subsequent revisions to that regulation.

(b) Each HRP candidate must be certified in the HRP before being assigned to HRP duties and must be recertified annually, not to exceed 12 months between recertifications. For certification:

(1) Individuals in newly identified HRP positions must immediately sign the releases, acknowledgments, and waivers to participate in the HRP and complete initial instruction on the importance of security, safety, reliability, and suitability. If these requirements are not met, the individual must be removed from the HRP position.

(2) All remaining HRP requirements listed in paragraph (a) of this section must be completed in an expedited manner.

(c) Alcohol consumption is prohibited within an eight-hour period preceding scheduled work for individuals performing nuclear explosive duties and for individuals in specific positions designated by either the Manager, the

Department of Energy

§ 712.12

NNSA Administrator, his or her designee, or the appropriate Lead Program Secretarial Officer, or his or her designee.

(d) Individuals reporting for unscheduled nuclear explosive duties and those specific positions designated by either the Manager, the NNSA Administrator or his or her designee, or the appropriate Lead Program Secretarial Officer, or his or her designee, will be asked prior to performing any type of work if they have consumed alcohol within the preceding eight-hour period. If they answer “no,” they may perform their assigned duties but still may be tested.

(e) HRP-certified individuals may be tested for alcohol and/or drugs in accordance with § 712.15(b), (c), (d) and (e) if they are involved in an incident, unsafe practice, or an occurrence, or if there is reasonable suspicion that they may be impaired.

[69 FR 3223, Jan. 23, 2004, as amended at 78 FR 56135, Sept. 12, 2013]

§ 712.12 HRP implementation.

(a) The implementation of the HRP is the responsibility of the appropriate Manager or his or her designee. The Manager or designee must fully implement the HRP by April 22, 2004.

(b) The HRP Management Official must:

(1) Prepare an initial HRP implementation plan and submit it by March 23, 2004, to the applicable Manager for review and site approval. The implementation plan must:

(i) Be reviewed and updated every two years;

(ii) Include the four annual components of the HRP process: supervisory review, medical assessment, management evaluation (which includes random drug and alcohol testing), and a DOE personnel security determination; and

(iii) Include the HRP instruction and education component described in § 712.17 of this part.

(2) Approve the temporary removal and the reinstatement after temporary removal of an HRP-certified individual if the removal was based on a nonsecurity concern and the HRP-certified individual continues to meet the certification requirements and notify the

HRP certifying official of these actions.

(c) The Deputy Administrator for Defense Programs, NNSA must:

(1) Provide advice and assistance to the Chief Health, Safety and Security Officer, regarding policies, standards, and guidance for all nuclear explosive duty requirements; and

(2) Be responsible for implementation of all nuclear explosive duty safety requirements.

(d) The DOE Under Secretary with cognizance over the program which makes the HRP certification at issue (hereinafter ‘cognizant Under Secretary’), in consultation with the DOE General Counsel, based on a recommendation of the Chief Health, Safety and Security Officer, makes the final decision for any appeal of denial or revocation of certification or recertification from HRP.

(e) The Director, Office of Security, or designee, is responsible for HRP policy and must:

(1) Ensure consistency of the HRP throughout the DOE and NNSA;

(2) Review and comment on all HRP implementation plans to ensure consistency with policy; and

(3) Provide policies and guidance, including instructional materials, to NNSA and non-NNSA field elements concerning the HRP, as appropriate.

(f) The Manager must:

(1) Review and approve the HRP implementation plan for sites/facilities under their cognizance and forward the plan to the Director, Office of Security, or designee; and

(2) Ensure that the HRP is implemented at the sites/facilities under their cognizance.

(g) The HRP certifying official must:

(1) Approve placement, certification, reinstatement, and recertification of individuals into HRP positions; for unresolved temporary removals, follow the process in § 712.19(c)(5);

(2) Ensure that instructional requirements are implemented;

(3) Immediately notify (for the purpose of limiting access) the appropriate HRP management official of a personnel security action that results in the suspension of access authorization; and

§712.13

10 CFR Ch. III (1–1–16 Edition)

(4) Ensure that the supervisory review, medical assessment, and management evaluation, including drug and alcohol testing, are conducted on an annual basis (not to exceed 12 months).

(h) Individuals assigned to HRP duties must:

(1) Execute HRP releases, acknowledgments, and waivers to facilitate the collection and dissemination of information, the performance of drug and alcohol testing, and medical examinations;

(2) Notify the Designated Physician, the Designated Psychologist, or the SOMD immediately of a physical or mental condition requiring medication or treatment;

(3) Provide full, frank, and truthful answers to relevant and material questions, and when requested, furnish, or authorize others to furnish, information that DOE deems pertinent to reach a decision regarding HRP certification or recertification;

(4) Report any observed or reported behavior or condition of another HRP-certified individual that could indicate a reliability concern, including those behaviors and conditions listed in §712.13(c), to a supervisor, the Designated Physician, the Designated Psychologist, the SOMD, or the HRP management official; and

(5) Report to a supervisor, the Designated Physician, the Designated Psychologist, the SOMD, or the HRP management official, any behavior or condition, including those listed in §712.13(c), that may affect his or her ability to perform HRP duties.

[69 FR 3223, Jan. 23, 2004, as amended at 71 FR 68731, Nov. 28, 2006; 76 FR 12273, Mar. 7, 2011; 78 FR 56135, Sept. 12, 2013]

§712.13 Supervisory review.

(a) The supervisor must ensure that each HRP candidate and each individual occupying an HRP position but not yet HRP certified, executes the appropriate HRP releases, acknowledgments, and waivers. If these documents are not executed:

(1) The request for HRP certification may not be further processed until these requirements are completed; and

(2) The individual is immediately removed from the position.

(b) Each supervisor of HRP-certified personnel must conduct an annual review of each HRP-certified individual during which the supervisor must evaluate information (including security concerns) relevant to the individual's suitability to perform HRP tasks in a reliable and safe manner.

(c) The supervisor must report any concerns resulting from his or her review to the appropriate HRP management official. Types of behavior and conditions that would indicate a concern include, but are not limited to:

(1) Psychological or physical disorders that impair performance of assigned duties;

(2) Conduct that warrants referral for a criminal investigation or results in arrest or conviction;

(3) Indications of deceitful or delinquent behavior;

(4) Attempted or threatened destruction of property or life;

(5) Suicidal tendencies or attempted suicide;

(6) Use of illegal drugs or the abuse of legal drugs or other substances;

(7) Alcohol use disorders;

(8) Recurring financial irresponsibility;

(9) Irresponsibility in performing assigned duties;

(10) Inability to deal with stress, or the appearance of being under unusual stress;

(11) Failure to comply with work directives, hostility or aggression toward fellow workers or authority, uncontrolled anger, violation of safety or security procedures, or repeated absenteeism; and

(12) Significant behavioral changes, moodiness, depression, or other evidence of loss of emotional control.

(d) The supervisor must immediately remove an HRP-certified individual from HRP duties, pursuant to §712.19, and temporarily reassign the individual to a non-HRP position if the supervisor believes the individual has demonstrated a security or safety concern that warrants such removal. If temporary removal is based on a security concern, the HRP management official must immediately notify the applicable DOE personnel security office and the HRP certifying official.

(1) Based on the DOE personnel security office recommendation, the HRP certifying official will make the final decision about whether to reinstate an individual into an HRP position.

(2) If temporary removal is based on a medical concern, the Designated Physician, the Designated Psychologist, or the SOMD must immediately recommend the medical removal or medical restriction in writing to the appropriate HRP management official, who will make the final determination in temporary removal actions and immediately notify the appropriate HRP certifying official.

(e) The supervisor must immediately remove from HRP duties any Federal employee who does not obtain HRP recertification. The supervisor may reassign the individual or realign the individual's current duties. If these actions are not feasible, the supervisor must contact the appropriate personnel office for guidance.

(f) The supervisor who has been informed by the breath alcohol technician that an HRP-certified individual's confirmatory breath alcohol test result is at or above an alcohol concentration of 0.02 percent shall send the individual home and not allow that individual to perform HRP duties for 24 hours, and inform the HRP management official of this action.

§ 712.14 Medical assessment.

(a) *Purpose.* The HRP medical assessment is performed to evaluate whether an HRP candidate or an HRP-certified individual:

- (1) Represents a security concern; or
- (2) Has a condition that may prevent the individual from performing HRP duties in a reliable and safe manner.

(b) *When performed.* (1) The medical assessment is performed initially on HRP candidates and individuals occupying HRP positions who have not yet received HRP certification. The medical assessment is performed annually for HRP-certified individuals, or more often as required by the SOMD.

(2) The Designated Physician and other examiners working under the direction of the Designated Physician also will conduct an evaluation:

(i) If an HRP-certified individual requests an evaluation (*i.e.*, self-referral); or

(ii) If an HRP-certified individual is referred by management for an evaluation.

(c) *Process.* The Designated Physician, under the supervision of the SOMD, is responsible for the medical assessment of HRP candidates and HRP-certified individuals. In performing this responsibility, the Designated Physician or the SOMD must integrate the medical evaluations, available testing results, psychological evaluations, any psychiatric evaluations, a review of current legal drug use, and any other relevant information. This information is used to determine if a reliability, safety, or security concern exists and if the individual is medically qualified for his or her assigned duties. If a security concern is identified, the Designated Physician or SOMD must immediately notify the HRP management official, who notifies the applicable DOE personnel security office and appropriate HRP certifying official.

(d) *Evaluation.* The Designated Physician, with the assistance of the Designated Psychologist, must determine the existence or nature of any of the following:

(1) Physical or medical disabilities, such as a lack of visual acuity, defective color vision, impaired hearing, musculoskeletal deformities, and neuromuscular impairment;

(2) Mental/personality disorders or behavioral problems, including alcohol and other substance use disorders, as described in the *Diagnostic and Statistical Manual of Mental Disorders*;

(3) Use of illegal drugs or the abuse of legal drugs or other substances, as identified by self-reporting or by medical or psychological evaluation or testing;

(4) Threat of suicide, homicide, or physical harm; or

(5) Medical conditions such as cardiovascular disease, endocrine disease, cerebrovascular or other neurologic disease, or the use of drugs for the treatment of conditions that may adversely affect the judgment or ability of an individual to perform assigned duties in a reliable and safe manner.

(e) *Job task analysis.* Before the initial or annual medical assessment and psychological evaluation, employers must provide, to both the Designated Physician and Designated Psychologist, a job task analysis for each HRP candidate or HRP-certified individual. Medical assessments and psychological evaluations may not be performed if a job task analysis has not been provided.

(f) *Psychological evaluations.* Psychological evaluations must be conducted:

(1) For initial HRP certification. This psychological evaluation consists of a psychological assessment (test), approved by the Director, Office of Health and Safety or his or her designee, and a semi-structured interview.

(2) For recertification. This psychological evaluation consists of a semi-structured interview. A psychological assessment (test) may also be conducted as warranted.

(3) Every third year. The medical assessment for recertification must include a psychological assessment (test) approved by the Director, Office of Health and Safety or his or her designee. This requirement can be implemented over a three-year period for individuals who are currently in an HRP position.

(4) When additional psychological or psychiatric evaluations are required by the SOMD to resolve any concerns.

(g) *Return to work after sick leave.* HRP-certified individuals who have been on sick leave for five or more consecutive days, or an equivalent time period for those individuals on an alternative work schedule, must report in person to the Designated Physician, the Designated Psychologist, or the SOMD before being allowed to return to normal duties. The Designated Physician, the Designated Psychologist, or the SOMD must provide a written recommendation to the appropriate HRP supervisor regarding the individual's return to work. An HRP-certified individual also may be required to report to the Designated Physician, the Designated Psychologist, or the SOMD for written recommendation to return to normal duties after any period of sick leave.

(h) *Temporary removal or restrictions.* The Designated Physician, the Des-

ignated Psychologist, or the SOMD may recommend temporary removal of an individual from an HRP position or restrictions on an individual's work in an HRP position if a medical condition or circumstance develops that affects the individual's ability to perform assigned job duties. The Designated Physician, the Designated Psychologist, or the SOMD must immediately recommend medical removal or medical restrictions in writing to the appropriate HRP management official. If the HRP management official concurs, he or she will then notify the appropriate HRP certifying official. To reinstate or remove such restrictions, the Designated Physician, the Designated Psychologist, or the SOMD must make written recommendation to the HRP management official for concurrence. The HRP management official will then notify the appropriate HRP certifying official.

(i) *Medical evaluation after rehabilitation.* (1) Individuals who request reinstatement in the HRP following rehabilitative treatment for alcohol use disorder, use of illegal drugs, or the abuse of legal drugs or other substances, must undergo an evaluation, as prescribed by the SOMD, to ensure continued rehabilitation and adequate capability to perform their job duties.

(2) The HRP certifying official may reinstate HRP certification of an individual who successfully completes an SOMD-approved drug or alcohol rehabilitation program. Recertification is based on the SOMD's follow-up evaluation and recommendation. The individual is also subject to unannounced follow-up tests for illegal drugs or alcohol and relevant counseling for three years.

(j) *Medication and treatment.* HRP-certified individuals are required to immediately report to the Designated Physician, the Designated Psychologist, or the SOMD any physical or mental condition requiring medication or treatment. The Designated Physician, the Designated Psychologist, or the SOMD determines if temporary removal of the individual from HRP duties is required and follows the procedures pursuant to §712.14(h).

[69 FR 3223, Jan. 23, 2004, as amended at 71 FR 68731, Nov. 28, 2006]

§ 712.15 Management evaluation.

(a) *Evaluation components.* An evaluation by the HRP management official is required before an individual can be considered for initial certification or recertification in the HRP. This evaluation must be based on a careful review of the results of the supervisory review, medical assessment, and drug and alcohol testing. If a safety concern is identified, the HRP management official must require the supervisor to temporarily reassign the individual to non-HRP duties and forward this information to the HRP certifying official. If the management evaluation reveals a security concern, the HRP management official must notify the applicable DOE personnel security office.

(b) *Drug testing.* All HRP candidates and HRP-certified individuals are subject to testing for the use of illegal drugs, as required by this part. Testing must be conducted in accordance with 10 CFR part 707, the workplace substance abuse program for DOE contractor employees, and DOE Order 3792.3, "Drug-Free Federal Workplace Testing Implementation Program," for DOE employees. The program must include an initial drug test, random drug tests at least once every 12 months from the previous test, and tests of HRP-certified individuals if they are involved in an incident, unsafe practice, occurrence, or based on reasonable suspicion. Failure to appear for unannounced testing within two hours of notification constitutes a refusal to submit to a test. Sites may establish a shorter time period between notification and testing but may not exceed the two-hour requirement. An HRP-certified individual who, based on a drug test, has been determined to use illegal drugs must immediately be removed from HRP duties, and DOE personnel security must be notified immediately.

(c) *Alcohol testing.* All HRP candidates and HRP-certified individuals are subject to testing for the use of alcohol, as required by this part. The alcohol testing program must include, as a minimum, an initial alcohol test prior to performing HRP duties and random alcohol tests at least once every 12 months from the previous test, and tests of HRP-certified individuals

if they are involved in an incident, unsafe practice, occurrence, or based on reasonable suspicion. An HRP-certified individual who has been determined to have an alcohol concentration of 0.02 percent or greater shall be sent home and not allowed to perform HRP duties for 24 hours.

(1) Breath alcohol testing must be conducted by a certified breath alcohol technician and conform to the DOT procedures (49 CFR part 40, Procedures for Transportation Workplace Drug and Alcohol Testing Programs, subparts J through N) for use of an evidential-grade breath analysis device approved for 0.02/0.04 cutoff levels, which conforms to the DOT model specifications and the most recent "Conforming Products List" issued by NHTSA.

(2) An individual required to undergo DOT alcohol testing is subject to the regulations of the DOT. If such an individual's blood alcohol level exceeds DOT standards, the individual's employer may take appropriate disciplinary action.

(3) The following constitutes a refusal to submit to a test and shall be considered as a positive alcohol concentration test of 0.02 percent, which requires the individual be sent home and not allowed to perform HRP duties for 24 hours:

(i) Failure to appear for unannounced testing within two hours of notification (or established shorter time for the specific site);

(ii) Failure to provide an adequate volume of breath in two attempts without a valid medical excuse; and

(iii) Engaging in conduct that clearly obstructs the testing process, including failure to cooperate with reasonable instructions provided by the testing technician.

(d) *Occurrence testing.* (1) When an HRP-certified individual is involved in, or associated with, an occurrence requiring immediate reporting to the DOE, the following procedures must be implemented:

(i) Testing for the use of illegal drugs in accordance with the provisions of the DOE policies implementing Executive Order 12564, and 10 CFR part 707 or DOE Order 3792.3, which establish workplace substance abuse programs

§712.16

for contractor and DOE employees, respectively.

(ii) Testing for use of alcohol in accordance with this section.

(2) Testing must be performed as soon as possible after an occurrence that requires immediate notification or reporting.

(3) The supervisor must remove an HRP-certified individual from HRP duties if the individual refuses to undergo the testing required by this section.

(e) *Testing for reasonable suspicion.* (1) If the behavior of an individual in an HRP position creates the basis for reasonable suspicion of the use of an illegal drug or alcohol, that individual must be tested if two or more supervisory or management officials, at least one of whom is in the direct chain of supervision of the individual or is the Designated Physician, the Designated Psychologist, or the SOMD, agree that such testing is appropriate.

(2) Reasonable suspicion must be based on an articulable belief, drawn from facts and reasonable inferences from those particular facts, that an HRP-certified individual is in possession of, or under the influence of, an illegal drug or alcohol. Such a belief may be based on, among other things:

(i) Observable phenomena, such as direct observation of the use or possession of illegal drugs or alcohol, or the physical symptoms of being under the influence of drugs or alcohol;

(ii) A pattern of abnormal conduct or erratic behavior;

(iii) Information provided by a reliable and credible source that is independently corroborated; or

(iv) Detection of alcohol odor on the breath.

(f) Counterintelligence Evaluation. HRP candidates and, when selected, HRP-certified individuals, must submit to and successfully complete a counterintelligence evaluation, which includes a polygraph examination in accordance with 10 CFR part 709, Polygraph Examination Regulations and any subsequent revisions to that regulation.

§712.16 DOE security review.

(a) A personnel security specialist will perform a personnel security file review of an HRP candidate and HRP-certified individual upon receiving the

10 CFR Ch. III (1–1–16 Edition)

supervisory review, medical assessment, and management evaluation and recommendation.

(b) If the personnel security file review is favorable, this information must be forwarded to the HRP certifying official. If the review reveals a security concern, or if a security concern is identified during another component of the HRP process, the HRP certifying official must be notified and the security concern evaluated in accordance with the criteria in 10 CFR part 710, subpart A. All security concerns must be resolved according to procedures outlined in 10 CFR part 710, subpart A, rather than through the procedures in this part.

(c) Any mental/personality disorder or behavioral issues found in a personnel security file, which could impact an HRP candidate or HRP-certified individual's ability to perform HRP duties, may be provided in writing to the SOMD, Designated Physician, and Designated Psychologist previously identified for receipt of this information. Medical personnel may not share any information obtained from the personnel security file with anyone who is not an HRP certifying official.

§712.17 Instructional requirements.

(a) HRP management officials at each DOE site or facility with HRP positions must establish an initial and annual HRP instruction and education program. The program must provide:

(1) HRP candidates, HRP-certified individuals, supervisors, and managers, and supervisors and managers responsible for HRP positions with the knowledge described in paragraph (b)(1) of this section; and

(2) For all HRP medical personnel, a detailed explanation of HRP duties and responsibilities.

(b) The following program elements must be included in initial and annual instruction. The elements may be tailored to accommodate group differences and refresher training needs:

(1) The objectives of the HRP and the role and responsibilities of each individual in the HRP to include recognizing and responding to behavioral change and aberrant or unusual behavior that may result in a risk to national security or nuclear explosive

Department of Energy

§ 712.19

safety; recognizing and reporting security concerns and prescription drug use; and an explanation of return-to-work requirements and continuous evaluation of HRP participants; and

(2) For those who have nuclear explosive responsibilities, a detailed explanation of duties and safety requirements.

§ 712.18 Transferring HRP certification.

(a) For HRP certification to be transferred, the individual must currently be certified in the HRP.

(b) Transferring the HRP certification from one site to another requires the following before the individual is allowed to perform HRP duties at the new site:

(1) Verify that the individual is currently certified in the HRP and is transferring into a designated HRP position;

(2) Incorporate the individual into the new site's alcohol and drug-testing program;

(3) Ensure that the 12-month time period for HRP requirements that was established at the prior site is not exceeded; and

(4) Provide site-specific instruction.

(c) Temporary assignment to HRP positions at other sites requires verification that the individual is currently enrolled in the HRP and has completed all site-specific instruction. The individual is required to return to the site that maintains his or her HRP certification for recertification.

§ 712.19 Removal from HRP.

(a) *Immediate removal.* A supervisor who has a reasonable belief that an HRP-certified individual is not reliable, based on either a safety or security concern, must immediately remove that individual from HRP duties pending a determination of the individual's reliability. A supervisor also must immediately remove an individual from HRP duties when requested to do so by the HRP certifying official. The supervisor must, at a minimum:

(1) Require the individual to stop performing HRP duties;

(2) Take action to ensure the individual is denied both escorted and

unescorted access to the material access areas; and

(3) Provide, within 24 hours, to the individual and the HRP management official, a written reason for these actions.

(b) The temporary removal of an HRP-certified individual from HRP duties pending a determination of the individual's reliability is an interim, precautionary action and does not constitute a determination that the individual is not fit to perform his or her required duties. Removal is not, in itself, cause for loss of pay, benefits, or other changes in employment status.

(c) *Temporary removal.* (1) If an HRP management official receives a supervisor's written notice of the immediate removal of an HRP-certified individual, that official must direct the temporary removal of the individual pending an evaluation and determination of the individual's reliability.

(2) If removal is based on a security concern, the HRP management official must notify the HRP certifying official and the applicable DOE personnel security office. The security concern will be resolved under the criteria and procedures in 10 CFR part 710, subpart A.

(3) If removal is based on a concern that is not security related, the HRP management official must conduct an evaluation of the circumstances or information that led the supervisor to remove the individual from HRP duties. The HRP management official must prepare a written report of the evaluation that includes a determination of the individual's reliability for continuing HRP certification.

(4) If the HRP management official determines that an individual who has been temporarily removed continues to meet the requirements for certification, the HRP management official must:

(i) Notify the individual's supervisor of the determination and direct that the individual be allowed to return to HRP duties;

(ii) Notify the individual; and

(iii) Notify the HRP certifying official.

(5) If the HRP management official determines that an individual who has been temporarily removed does not

§ 712.20

meet the HRP requirements for certification, the HRP management official must forward the written report to the HRP certifying official. If the HRP certifying official is not the Manager, the HRP certifying official must review the written report and take one of the following actions:

(i) Direct that the individual be reinstated and provide written explanation of the reasons and factual bases for the action;

(ii) Direct continuation of the temporary removal pending completion of specified actions (*e.g.*, medical assessment, treatment) to resolve the concerns about the individual's reliability; or

(iii) Recommend to the Manager the revocation of the individual's certification and provide written explanation of the reasons and factual bases for the decision.

(d) The Manager, on receiving the HRP management official's written report and the HRP certifying official's recommendation (if any), must take one of the following actions:

(1) Direct reinstatement of the individual and provide written explanation of the reasons and factual bases for the action;

(2) Direct revocation of the individual's HRP certification; or

(3) Direct continuation of the temporary removal pending completion of specified actions (*e.g.*, medical assessment, treatment) to resolve the concerns about the individual's reliability.

(e) If the action is revocation, the Manager must provide the individual a copy of the HRP management official's report. The Manager may withhold such a report, or portions thereof, to the extent that he or she determines that the report, or portions thereof, may be exempt from access by the employee under the Privacy Act or the Freedom of Information Act.

(f) If an individual is directed by the Manager to take specified actions to resolve HRP concerns, he or she must be reevaluated by the HRP management official and HRP certifying official after those actions have been completed. After considering the HRP management and HRP certifying officials' report and recommendation, the Manager must direct either:

10 CFR Ch. III (1-1-16 Edition)

(1) Reinstatement of the individual; or

(2) Revocation of the individual's HRP certification.

(g) *Notification of Manager's initial decision.* The Manager must send by certified mail (return receipt requested) a written decision, including rationale, to the HRP-certified individual whose certification is revoked. The Manager's decision must be accompanied by notification to the individual, in writing, of the procedures pertaining to reconsideration or a hearing on the Manager's decision.

§ 712.20 Request for reconsideration or certification review hearing.

(a) An HRP-certified individual who receives notification of the Manager's decision to revoke his or her HRP certification may choose one of the following options:

(1) Take no action;

(2) Submit a written request to the Manager for reconsideration of the decision to revoke certification. The request must include the individual's response to the information that gave rise to the concern. The request must be sent by certified mail to the Manager within 20 working days after the individual received notice of the Manager's decision; or

(3) Submit a written request to the Manager for a certification review hearing. The request for a hearing must be sent by certified mail to the Manager within 20 working days after the individual receives notice of the Manager's decision.

(b) If an individual requests reconsideration by the Manager but not a certification review hearing, the Manager must, within 20 working days after receipt of the individual's request, send by certified mail (return receipt requested) a final decision to the individual. This final decision about certification is based on the individual's response and other relevant information available to the Manager.

(c) If an individual requests a certification review hearing, the Manager must forward the request to the Office of Hearings and Appeals.

Department of Energy

§ 712.31

§ 712.21 Office of Hearings and Appeals.

(a) The certification review hearing is conducted by the Office of Hearings and Appeals.

(b) The hearing officer must have a DOE “Q” access authorization when hearing cases involving HRP duties.

(c) An individual who requests a certification review hearing has the right to appear personally before the hearing officer; to present evidence in his or her own behalf, through witnesses or by documents, or by both; and to be accompanied and represented at the hearing by counsel or any other person of the individual’s choosing and at the individual’s own expense.

(d) In conducting the proceedings, the hearing officer must:

(1) Receive all relevant and material information relating to the individual’s fitness for HRP duties through witnesses or documentation;

(2) Ensure that the individual is permitted to offer information in his or her behalf; to call, examine, and cross-examine witnesses and other persons who have made written or oral statements, and to present and examine documentary evidence;

(3) Require the testimony of the individual and all witnesses be given under oath or affirmation; and

(4) Ensure that a transcript of the certification review proceedings is made.

§ 712.22 Hearing officer’s report and recommendation.

Within 30 calendar days of the receipt of the hearing transcript by the hearing officer or the closing of the record, whichever is later, the hearing officer must forward written findings, a supporting statement of reasons, and recommendation regarding the individual’s eligibility for recertification in the HRP position to the Chief Health, Safety and Security Officer. The hearing officer’s report and recommendation must be accompanied by a copy of the record of the proceedings. The Chief Health, Safety and Security Officer shall forward to the DOE cognizant Under Secretary a recommendation to

either recertify or revoke the certification of an individual in the HRP.

[69 FR 3223, Jan. 23, 2004, as amended at 71 FR 68731, Nov. 28, 2006; 76 FR 12273, Mar. 7, 2011]

§ 712.23 Final decision by DOE Under Secretary.

Within 20 working days of the receipt of the Chief Health, Safety and Security Officer’s recommendation, the cognizant Under Secretary, in consultation with the DOE General Counsel should issue a final written decision. A copy of this decision must be sent by certified mail (return receipt requested) to the Manager and to the individual accompanied by a copy of the hearing officer’s report and the transcript of the certification review proceedings.

[69 FR 3223, Jan. 23, 2004, as amended at 71 FR 68731, Nov. 28, 2006; 76 FR 12273, Mar. 7, 2011]

Subpart B—Medical Standards

§ 712.30 Applicability.

This subpart establishes standards and procedures for conducting medical assessments of DOE and DOE contractor individuals in HRP positions.

§ 712.31 Purpose.

The standards and procedures set forth in this subpart are necessary for DOE to:

(a) Identify the presence of any mental/personality disorders, physical, or behavioral characteristics or conditions that present or are likely to present an unacceptable impairment in reliability;

(b) Facilitate the early diagnosis and treatment of disease or impairment and foster accommodation and rehabilitation;

(c) Determine what functions an HRP-certified individual may be able to perform and to facilitate the proper placement of individuals; and

(d) Provide for continuing monitoring of the health status of individuals to facilitate early detection and correction of adverse health effects, trends, or patterns.

§ 712.32

10 CFR Ch. III (1–1–16 Edition)

§ 712.32 Designated Physician.

(a) The Designated Physician must be qualified to provide professional expertise in the area of occupational medicine as it relates to the HRP.

(b) The Designated Physician must:

(1) Be a graduate of an accredited school of medicine or osteopathy;

(2) Have a valid, unrestricted state license to practice medicine in the state where HRP medical assessments occur;

(3) Have met the applicable HRP instruction requirements; and

(4) Be eligible for the appropriate DOE access authorization.

(c) The Designated Physician is responsible for the medical assessments of HRP candidates and HRP-certified individuals, including determining which components of the medical assessments may be performed by other qualified personnel. Although a portion of the assessment may be performed by another physician, physician's assistant, or nurse practitioner, the Designated Physician remains responsible for:

(1) Supervising the evaluation process;

(2) Interpreting the results of evaluations;

(3) Documenting medical conditions or issues that may disqualify an individual from the HRP;

(4) Providing medical assessment information to the Designated Psychologist to assist in determining psychological fitness;

(5) Determining, in conjunction with DOE if appropriate, the location and date of the next required medical assessment; and

(6) Signing a recommendation about the medical fitness of an individual for certification or recertification.

(d) The Designated Physician must immediately report to the SOMD any of the following about himself or herself:

(1) Initiation of an adverse action by any state medical licensing board or any other professional licensing board;

(2) Initiation of an adverse action by any Federal regulatory board since the last designation;

(3) The withdrawal of the privilege to practice by any institution;

(4) Being named a defendant in any criminal proceedings (felony or misdemeanor) since the last designation;

(5) Being evaluated or treated for alcohol use disorder or drug dependency or abuse since the last designation; or

(6) Occurrence, since the last designation, of a physical, mental/personality disorder, or health condition that might affect his or her ability to perform professional duties.

§ 712.33 Designated Psychologist.

(a) The Designated Psychologist reports to the SOMD and determines the psychological fitness of an individual to participate in the HRP. The results of this evaluation may be provided only to the Designated Physician or the SOMD.

(b) The Designated Psychologist must:

(1) Hold a doctoral degree from a clinical psychology program that includes a one-year clinical internship approved by the American Psychological Association or an equivalent program;

(2) Have accumulated a minimum of three years postdoctoral clinical experience with a major emphasis in psychological assessment and testing;

(3) Have a valid, unrestricted state license to practice clinical psychology in the state where HRP medical assessments occur;

(4) Have met the applicable HRP instruction requirements; and

(5) Be eligible for the appropriate DOE access authorization.

(c) The Designated Psychologist is responsible for all psychological evaluations of HRP candidates, HRP-certified individuals, and others as directed by the SOMD. Although a portion of the psychological evaluation may be performed by another psychologist, the Designated Psychologist must:

(1) Supervise the psychological evaluation process and designate which components may be performed by other qualified personnel;

(2) Upon request of management, assess the psychological fitness of HRP candidates and HRP-certified individuals for HRP duties, including specific work settings, and recommend referrals as indicated; and

Department of Energy

§ 712.36

(3) Make referrals for psychiatric, psychological, substance abuse, or personal or family problems, and monitor the progress of individuals so referred.

(d) The Designated Psychologist must immediately report to the SOMD any of the following about himself or herself:

(1) Initiation of an adverse action by any state medical licensing board or any other professional licensing board;

(2) Initiation of an adverse action by any Federal regulatory board since the last designation;

(3) The withdrawal of the privilege to practice by any institution;

(4) Being named a defendant in any criminal proceeding (felony or misdemeanor) since the last designation;

(5) Being evaluated or treated for alcohol use disorder or drug dependency or abuse since the last designation; or

(6) Occurrence since the last designation of a physical, mental/personality disorder, or health condition that might affect his or her ability to perform professional duties.

§ 712.34 Site Occupational Medical Director.

(a) The SOMD must nominate a physician to serve as the Designated Physician and a clinical psychologist to serve as the Designated Psychologist. The nominations must be sent through the Manager to the Director, Office of Health and Safety or his or her designee. Each nomination must describe the nominee's relevant training, experience, and licensure, and include a curriculum vitae and a copy of the nominee's current state or district license.

(b) The SOMD must submit a renomination report biennially through the Manager to the Director, Office of Health and Safety or his or her designee. This report must be submitted at least 60 days before the second anniversary of the initial designation or of the last redesignation, whichever applies. The report must include:

(1) A statement evaluating the performance of the Designated Physician and Designated Psychologist during the previous designation period; and

(2) A copy of the valid, unrestricted state or district license of the Des-

ignated Physician and Designated Psychologist.

(c) The SOMD must submit, annually, to the Director, Office of Health and Safety or his or her designee through the Manager, a written report summarizing HRP medical activity during the previous year. The SOMD must comply with any DOE directives specifying the form or contents of the annual report.

(d) The SOMD must investigate any reports of performance issues regarding a Designated Physician or Designated Psychologist, and the SOMD may suspend either official from HRP-related duties. If the SOMD suspends either official, the SOMD must notify the Director, Office of Health and Safety or his or her designee and provide supporting documentation and reasons for the action.

[69 FR 3223, Jan. 23, 2004, as amended at 71 FR 68731, Nov. 28, 2006]

§ 712.35 Director, Office of Health and Safety.

The Director, Office of Health and Safety or his or her designee must:

(a) Develop policies, standards, and guidance for the medical aspects of the HRP, including the psychological testing inventory to be used;

(b) Review the qualifications of Designated Physicians and Designated Psychologists, and concur or non-concur with their designations by sending a statement to the Manager and an informational copy to the SOMD; and

(c) Provide technical assistance on medical aspects of the HRP to all DOE elements and DOE contractors.

[69 FR 3223, Jan. 23, 2004, as amended at 71 FR 68732, Nov. 28, 2006]

§ 712.36 Medical assessment process.

(a) The Designated Physician, under the supervision of the SOMD, is responsible for the medical assessment of HRP candidates and HRP-certified individuals. In carrying out this responsibility, the Designated Physician or the SOMD must integrate the medical evaluations, psychological evaluations, psychiatric evaluations, and any other relevant information to determine an individual's overall medical qualification for assigned duties.

§712.37

10 CFR Ch. III (1–1–16 Edition)

(b) Employers must provide a job task analysis for those individuals involved in HRP duties to both the Designated Physician and the Designated Psychologist before each medical assessment and psychological evaluation. HRP medical assessments and psychological evaluations may not be performed if a job task analysis has not been provided.

(c) The medical process by the Designated Physician includes:

(1) Medical assessments for initial certification, annual recertification, and evaluations for reinstatement following temporary removal from the HRP;

(2) Evaluations resulting from self-referrals and referrals by management;

(3) Routine medical contacts and occupational and nonoccupational health counseling sessions; and

(4) Review of current legal drug use.

(d) Psychological evaluations must be conducted:

(1) For initial certification. This psychological evaluation consists of a generally accepted psychological assessment (test) approved by the Director, Office of Health and Safety or his or her designee and a semi-structured interview.

(2) For recertification. This psychological evaluation consists of a semi-structured interview, which is conducted annually at the time of the medical examination.

(3) Every third year. The medical assessment for recertification must include a generally accepted psychological assessment (test) approved by the Director, Office of Health and Safety or his or her designee.

(4) When the SOMD determines that additional psychological or psychiatric evaluations are required to resolve HRP concerns as listed in §712.13(c).

(e) Following absences requiring return-to-work evaluations under applicable DOE directives, the Designated Physician, the Designated Psychologist, or the SOMD must determine whether a psychological evaluation is necessary.

(f) Except as provided in paragraph (g) of this section, the Designated Physician must forward the completed medical assessment of an HRP candidate and HRP-certified individual to

the SOMD, who must make a recommendation, based on the assessment, to the individual's HRP management official. If the Designated Physician determines that a currently certified individual no longer meets the HRP requirements, the Designated Physician must immediately, orally, inform the HRP management official. A written explanation must follow within 24 hours.

(g) The Designated Physician, the Designated Psychologist, or the SOMD may make a medical recommendation for return to work and work accommodations for HRP-certified individuals.

(h) The following documentation is required after treatment of an individual for any disqualifying condition:

(1) A summary of the diagnosis, treatment, current status, and prognosis to be furnished by the treatment provider to the Designated Physician;

(2) The medical opinion of the Designated Physician advising the individual's supervisor whether the individual is able to return to work in either an HRP or non-HRP capacity; and

(3) Any periodic monitoring plan, approved by the Designated Physician or the Designated Psychologist and the SOMD, used to evaluate the reliability of the individual.

(i) If the disqualifying condition was of a security concern, the appropriate procedure described in 10 CFR part 710, subpart A, applies.

[69 FR 3223, Jan. 23, 2004, as amended at 71 FR 68731, Nov. 28, 2006]

§712.37 Evaluation for hallucinogen use.

If DOE determines that an HRP candidate or HRP-certified individual has used any hallucinogen, the individual is not eligible for certification or recertification unless:

(a) Five years have passed since the last use of the hallucinogen;

(b) There is no evidence of any flashback within the last five years from the previous hallucinogen use; and

(c) The individual has a record of acceptable job performance and observed behavior.

§ 712.38 Maintenance of medical records.

(a) The medical records of HRP candidates and HRP-certified individuals must be maintained in accordance with the Privacy Act, 5 U.S.C. 552a, and DOE implementing regulations in 10 CFR part 1008; the Department of Labor's regulations on access to individual exposure and medical records, 29 CFR 1910.1020; and applicable DOE directives. DOE contractors also may be subject to section 503 of the Rehabilitation Act, 29 U.S.C. 793, and its implementing rules, including confidentiality provisions in 41 CFR 60-741.23 (d).

(b) The psychological record of HRP candidates and HRP-certified individuals is a component of the medical record. The psychological record must:

(1) Contain any clinical reports, test protocols and data, notes of individual contacts and correspondence, and other information pertaining to an individual's contact with a psychologist;

(2) Be stored in a secure location in the custody of the Designated Psychologist; and

(3) Be kept separate from other medical record documents, with access limited to the SOMD and the Designated Physician.

PART 715—DEFINITION OF NON-RECURSE PROJECT-FINANCED

Sec.

715.1 Purpose and scope.

715.2 Definitions.

715.3 Definition of "Nonrecourse Project-Financed."

AUTHORITY: 42 U.S.C. 7651o(a)(2)(B); 42 U.S.C. 7254.

SOURCE: 56 FR 55064, Oct. 24, 1991, unless otherwise noted.

§ 715.1 Purpose and scope.

This part sets forth the definition of "nonrecourse project-financed" as that term is used to define "new independent power production facility," in section 416(a)(2)(B) of the Clean Air Act Amendments of 1990, 42 U.S.C. 7651o(a)(2)(B). This definition is for purposes of section 416(a)(2)(B) only. It is not intended to alter or impact the tax treatment of any facility or facil-

ity owner under the Internal Revenue Code and regulations.

§ 715.2 Definitions.

As used in this subpart—

Act means the Clean Air Act Amendments of 1990, 104 Stat. 2399.

Facility means a "new independent power production facility" as that term is used in the Act, 42 U.S.C. 7651o(a)(2).

§ 715.3 Definition of "Nonrecourse Project-Financed".

Nonrecourse project-financed means when being financed by any debt, such debt is secured by the assets financed and the revenues received by the facility being financed including, but not limited to, part or all of the revenues received under one or more agreements for the sale of the electric output from the facility, and which neither an electric utility with a retail service territory, nor a public utility as defined by section 201(e) of the Federal Power Act, as amended, 16 U.S.C. 824(e), if any of its facilities are financed with general credit, is obligated to repay in whole or in part. A commitment to contribute equity or the contribution of equity to a facility by an electric utility shall not be considered an obligation of such utility to repay the debt of a facility. The existence of limited guarantees, commitments to pay for cost overruns, indemnity provisions, or other similar undertakings or assurances by the facility's owners or other project participants will not disqualify a facility from being "nonrecourse project-financed" as long as, at the time of the financing for the facility, the borrower is obligated to make repayment of the term debt from the revenues generated by the facility, rather than from other sources of funds. Projects that are 100 percent equity financed are also considered "nonrecourse project-financed" for purposes of section 416(a)(2)(B).

PART 719—CONTRACTOR LEGAL MANAGEMENT REQUIREMENTS

Sec.

Subpart A—General Provisions

719.1 What is the purpose of this part?

§ 719.1

- 719.2 What are the definitions of terms used in this part?
- 719.3 What contracts are covered by this part?
- 719.4 Are law firms that are retained by contract by the Department covered by this part?
- 719.5 What contracts are not covered by this part?
- 719.6 Are there any types of legal matters not included in the coverage of this part?
- 719.7 Is there a procedure for exceptions or deviations from this part?
- 719.8 Does the provision of protected documents from the contractor to the Department constitute a waiver of privilege?

Subpart B—Legal Management Plan, Staffing and Resource Plan and Annual Legal Budget

- 719.10 Who must submit a Legal Management Plan?
- 719.11 When must a Legal Management Plan be submitted or revised?
- 719.12 What information must be included in the Legal Management Plan?
- 719.13 Who at the Department receives and reviews the Legal Management Plan?
- 719.14 Will the Department notify the contractor concerning the adequacy or inadequacy of the submitted Legal Management Plan?
- 719.15 What are the requirements for a Staffing and Resource Plan?
- 719.16 When must the Staffing and Resource Plan be submitted?
- 719.17 Are there any budgetary requirements?

Subpart C—Engagement Letter

- 719.20 When must an engagement letter be submitted to Department Counsel?
- 719.21 What are the required elements of an engagement letter?

Subpart D—Requests from Contractor Counsel to Initiate, Defend, and Settle Legal Matters

- 719.30 In what circumstances may the contractor initiate litigation, including appeals from adverse decisions?
- 719.31 When must the contractor initiate litigation against third parties?
- 719.32 What must the contractor do when it receives notice that it is a party to litigation?
- 719.33 In what circumstances must the contractor seek permission from the Department to enter a settlement agreement?
- 719.34 What documentation must the contractor provide to Department Counsel when it seeks permission to enter a settlement agreement?

10 CFR Ch. III (1–1–16 Edition)

- 719.35 When must the contractor provide a copy of an executed settlement agreement?

Subpart E—Reimbursement of Costs Subject to this Part

- 719.40 What effect do the regulations of this part have on cost allowability?
- 719.41 How does the Department determine whether fees are reasonable?
- 719.42 What categories of costs are unallowable?
- 719.43 What is the treatment of travel costs?
- 719.44 What categories of costs require advance approval?
- 719.45 Are there any special procedures or requirements regarding subcontractor and retrospective insurance carrier legal costs?
- 719.46 Are costs covered by this part subject to audit?
- 719.47 What happens when more than one contractor is a party to a matter?

Subpart F—Department Counsel

- 719.50 What authority does Department Counsel have?
- 719.51 What information must be forwarded to the General Counsel's Office concerning contractor submissions to Department Counsel under this part?
- 719.52 What types of field actions must be coordinated with the General Counsel?

APPENDIX A TO PART 719—GUIDANCE FOR LEGAL RESOURCE MANAGEMENT

AUTHORITY: 42 U.S.C. 2201, 5814, 5815 and 7101, *et seq.*; 50 U.S.C. 2401, *et seq.*

SOURCE: 78 FR 25809, May 3, 2013, unless otherwise noted.

Subpart A—General Provisions

§ 719.1 What is the purpose of this part?

This part facilitates management of retained legal counsel and contractor legal costs, including litigation and legal matter costs. It requires the contractor to develop a Legal Management Plan, to document the analysis used to decide when to utilize outside counsel, and to document what law firm or individual attorney will be engaged as outside counsel. This part also requires the contractor to document the terms of the engagement with retained legal counsel. Payment of Department-retained law firm invoices and reimbursement of contractor legal costs

Department of Energy

§ 719.3

under covered contracts are subject to compliance with this part.

§ 719.2 What are the definitions of terms used in this part?

For purposes of this part:

Alternative dispute resolution includes, but is not limited to, processes such as mediation, neutral evaluation, mini-trials and arbitration.

Contractor means any person or entity with whom the Department contracts for the acquisition of goods or services.

Covered contracts means those contracts described in § 719.3 of this part.

Days means calendar days.

Department means the Department of Energy (DOE), including the National Nuclear Security Administration (NNSA).

Department Counsel means the attorney in the DOE or NNSA field office, or Headquarters office, designated as the contracting officer's representative and point of contact for a contractor or for Department retained legal counsel, for purposes of this part.

General Counsel means the DOE General Counsel for DOE legal matters and the NNSA General Counsel for NNSA legal matters.

Legal costs means, but is not limited to, administrative expenses associated with the provision of legal services by retained legal counsel; the costs of legal services provided by retained legal counsel; the costs of the services, if the services are procured in connection with a legal matter, of accountants, consultants, experts or others retained by the contractor or by retained legal counsel; and any similar costs incurred by retained legal counsel or in connection with the services of retained legal counsel.

Legal Management Plan means a document required by subpart B of this part describing the contractor's practices for managing legal costs and legal matters for which it procures the services of retained legal counsel.

Litigation means a proceeding arising under or related to a contract between the contractor and the Department to which the contractor is a party in a State, tribal, territorial, foreign, or federal court or before an administrative body or an arbitrator.

Retained legal counsel means a licensed attorney working in the private sector who is retained by a contractor or the Department to provide legal services.

Retrospective insurance means any insurance policy under which the premium is not fixed but is subject to adjustments to reimburse the insurance carrier for actual losses incurred or paid (e.g. claims, settlements, damages, and legal costs). Retrospective insurance includes service-type insurance policies as described in 48 CFR 928.370.

Settlement agreement means a written agreement between a contractor and one or more parties pursuant to which one or more parties waives the right to pursue a legal claim in exchange for something of value.

Significant matters means legal matters involving significant issues as determined by Department Counsel and identified to a contractor in writing, and any legal matters where the amount of any legal costs, over the life of the matter, is expected to exceed \$100,000.

Staffing and Resource Plan means a statement prepared in accordance with subpart B of this part by retained legal counsel that describes the method for managing a Significant Matter in litigation.

§ 719.3 What contracts are covered by this part?

(a) Unless excluded under § 719.5, this part covers the following three categories of contracts:

(1) All management and operating contracts;

(2) Non-management and operating cost reimbursement contracts exceeding \$100,000,000; and

(3) Non-management and operating contracts exceeding \$100,000,000 that include cost reimbursable elements exceeding \$10,000,000 (e.g., contracts with both fixed-price and cost-reimbursable line items where the cost-reimbursable line items exceed \$10,000,000 or time and materials contracts where the materials portions exceed \$10,000,000).

(b) This part also covers contracts otherwise not covered by paragraph (a) of this section but which contain a

§719.4

clause requiring compliance with this part.

(c) This part also covers any contract the Department awards directly to retained legal counsel exceeding \$100,000.

§719.4 Are law firms that are retained by contract by the Department covered by this part?

Legal counsel retained under fixed rate or other type of contract or other agreement by the Department to provide legal services must comply with the following if the legal costs over the life of the matter for which counsel has been retained are expected by the Department to exceed \$100,000 and retained legal counsel are so notified by the Department:

(a) Requirements related to Staffing and Resource Plans in subpart B of this part;

(b) Cost guidelines in subpart E of this part; and

(c) Engagement letter requirements in subpart C of this part if the retained legal counsel subcontracts legal work valued at \$25,000 or more (e.g., a law firm retained by the Department subcontracts with another law firm to provide \$26,000 in discovery-related legal work).

§719.5 What contracts are not covered by this part?

This part does not cover any contract under which the Department is not responsible for directly reimbursing the contractor for legal costs, such as fixed price contracts.

§719.6 Are there any types of legal matters not included in the coverage of this part?

Legal matters not covered by this part include:

(a) Matters handled by counsel retained by an insurance carrier, except under retrospective insurance in accordance with §719.45;

(b) Routine intellectual property law support services; and

(c) Routine workers and unemployment compensation matters.

§719.7 Is there a procedure for exceptions or deviations from this part?

(a) Requests for exceptions or deviations from this part must be made in writing to Department Counsel and ap-

10 CFR Ch. III (1–1–16 Edition)

proved by the General Counsel. If an alternate procedure is proposed for compliance with an individual requirement in this part, that procedure must be included in the written request by the contractor. The General Counsel or his/her delegee shall provide a written response to such requests; however the response shall not require a justification of the Department's exercise of its discretion.

(b) The General Counsel may authorize exceptions or deviations requested under paragraph (a) of this section. The General Counsel may also establish exceptions to this part based on current field office and contractor practices that satisfy the purpose of these requirements.

(c) Exceptions to this part that are also a deviation from the Department of Energy Acquisition Regulation (DEAR) cost principles (see subpart D of this part) must be approved in accordance with applicable DOE procurement policy. See, e.g., DOE Acquisition Guide chapter 1.1, requiring approval by the Senior Procurement Executive of DOE or NNSA as applicable. In any event, the written request from a contractor for a deviation from a cost principle relating to this part must be submitted to the contracting officer, with a copy provided to Department Counsel.

§719.8 Does the provision of protected documents from the contractor to the Department constitute a waiver of privilege?

Contractors are required to provide detailed information about third-party claims and litigation to the Department. The Department and its contractors typically share common legal and strategic interests relating to pending or threatened litigation. The common interest between the parties is primarily rooted in the fact that the Department reimburses contractors for allowable costs incurred when litigation is threatened or initiated against contractors. However, other sources of the common interest between the Department and its contractors may include, but are not limited to, an interest in completion of the agency's important mission work and an interest in safe and efficient operation of the

Department of Energy

§ 719.12

Department's facilities. To the extent documents associated with compliance with this part (e.g., Staffing and Resource Plans, invoices, engagement letters, settlement authority requests, and draft pleadings) are protected from disclosure to third parties because the items constitute attorney work product and/or involve attorney client communications, the contractor's provision of these items to the Department does not constitute a waiver of privilege. As long as the Department and the contractor share a common interest in the outcome of legal matters, this mutual legal interest permits the parties to share privileged material without waiving any applicable privilege.

Subpart B—Legal Management Plan, Staffing and Resource Plan and Annual Legal Budget

§ 719.10 Who must submit a Legal Management Plan?

Contractors who are parties to contracts identified under § 719.3(a) and (b) must submit a Legal Management Plan.

§ 719.11 When must a Legal Management Plan be submitted or revised?

(a) Contractors must submit a Legal Management Plan to Department Counsel within 60 days following award of the contract. The deadline for submitting the Legal Management Plan may be extended by Department Counsel.

(b) Contractors must submit a revised Legal Management Plan upon request of Department Counsel within 60 days of receipt of the Department Counsel's request. The request for a revised Legal Management Plan shall include an explanation of the request. The deadline for submitting the Legal Management Plan may be extended by the Department Counsel.

§ 719.12 What information must be included in the Legal Management Plan?

The Legal Management Plan must include the following items:

(a) A description of the contractor's in-house counsel resources at the time

the Legal Management Plan is submitted, including areas of expertise and an explanation of the types of matters expected to be handled in-house.

(b) A description of the legal matters that may necessitate engagement of retained legal counsel.

(c) A description of the factors the contractor will consider in determining whether to handle a particular matter utilizing retained legal counsel.

(d) An outline of the factors the contractor must consider in selecting retained legal counsel, including:

- (1) Cost;
- (2) Past performance of previously retained counsel;
- (3) Particular expertise in a specific area of the law;
- (4) Familiarity with the Department's activity at the particular site and the prevalent issues associated with facility history and current operations;

(5) Location of retained legal counsel relative to:

- (i) The site involved in the matter,
 - (ii) Any forum in which the matter will be processed, and
 - (iii) The location where a significant portion of the work will be performed;
- (6) Experience as an advocate in alternative dispute resolution procedures such as mediation;
- (7) Actual or potential conflicts of interest; and
- (8) The means and rate of compensation (e.g., hourly billing, fixed fee, blended fees).

(e) A description of the system that the contractor will use to review each matter in litigation to determine whether and when alternative dispute resolution is appropriate.

(f) A description of the role of in-house counsel in cost management.

(g) A description of the contractor's process for review and approval of invoices for legal costs.

(h) A description of the contractor's strategy for interaction with, and supervision of, retained legal counsel.

(i) A description of the procedures the contractor will employ in order to seek timely approval from Department Counsel to settle any legal matters as required by § 719.34 of this part;

§ 719.13

(j) A description of the contractor's strategy for keeping Department Counsel apprised of all legal matters covered by this part (e.g., regularly scheduled meetings and written communications).

§ 719.13 Who at the Department receives and reviews the Legal Management Plan?

Contractors must submit a Legal Management Plan to Department Counsel. If the contractor has not been notified of the assignment of Department Counsel, the contractor must submit the Legal Management Plan to the contracting officer and the DOE Deputy General Counsel for Litigation and Enforcement or the NNSA Deputy General Counsel as appropriate.

§ 719.14 Will the Department notify the contractor concerning the adequacy or inadequacy of the submitted Legal Management Plan?

The Contracting Officer or Department Counsel will notify the contractor of any non-compliance or inadequate information relating to requirements in § 719.12 within 30 days of the contractor's submission of the plan. The contractor must either correct matters identified within 30 days of notification or file a letter with the General Counsel disputing the determination of a deficiency.

§ 719.15 What are the requirements for a Staffing and Resource Plan?

(a) For significant matters in litigation, the contractor must require retained legal counsel to prepare a Staffing and Resource Plan. The contractor must then forward the Staffing and Resource Plan to Department Counsel.

(b) Retained legal counsel retained directly by the Department subject to this part must prepare a Staffing and Resource Plan and forward it to Department Counsel.

(c) A Staffing and Resource Plan must describe the following:

- (1) Major phases likely to be involved in the handling of the matter;
- (2) Timing and sequence of such phases;
- (3) Projected cost for each phase of the representation; and

10 CFR Ch. III (1-1-16 Edition)

(4) Detailed description of resources that the retained legal counsel intends to devote to the representation.

(d) A Staffing and Resource Plan must include a budget, broken down by phases, including at a minimum the following phases:

- (1) Matter assessment, development and administration;
- (2) Pretrial pleadings and motions;
- (3) Discovery;
- (4) Trial preparation and trial; and
- (5) Appeal.

(e) The contractor must notify Department Counsel before incurring retained legal counsel costs in excess of costs listed in the budget developed pursuant to paragraph (d) of this section.

§ 719.16 When must the Staffing and Resource Plan be submitted?

(a) The contractor or retained legal counsel must submit the Staffing and Resource Plan to Department Counsel within 30 days after the filing of an answer or a dispositive motion in lieu of an answer, 30 days after a determination that the cost is expected to exceed \$100,000, or 30 days after notification from Department Counsel that a matter is considered significant, whichever is sooner. The deadline for submitting the Staffing and Resource Plan may be extended by Department Counsel.

(b) Department Counsel may state objections to the Staffing and Resource Plan within 30 days of receipt of a Staffing and Resource Plan. When an objection is stated, the contractor or retained legal counsel must either revise the Staffing and Resource Plan to satisfy the objection within 30 days or file a letter with the General Counsel disputing the objection.

(c) Contractors must require retained legal counsel to update Staffing and Resource Plans annually or more frequently if there are significant changes in the matter. The contractor must submit the Staffing and Resource Plan updates to Department Counsel. Similarly, Department retained legal counsel must submit to Department Counsel annual Staffing and Resource Plan updates or more frequent updates if there are significant changes in the matter.

Department of Energy

§ 719.21

§ 719.17 Are there any budgetary requirements?

(a) Contractors required to submit a Legal Management Plan must also submit an annual legal budget to Department Counsel.

(b) The annual legal budget must include cost projections for significant matters at a level of detail reflective of the types of billable activities and the stage of each such matter.

(c) For informational purposes for both the contractor and Department Counsel, the contractor must submit a report to Department Counsel comparing its budgeted and actual legal costs within 30 days of the conclusion of the period covered by each annual legal budget. The Department recognizes, however, that there may be departures from the annual budget beyond the control of the contractor.

Subpart C—Engagement Letter

§ 719.20 When must an engagement letter be submitted to Department Counsel?

Contractors must submit a copy of an executed engagement letter between it and retained legal counsel to Department Counsel when the retained counsel is expected to provide \$25,000 or more in legal services for a particular matter. A copy of the executed engagement letter must be submitted to Department Counsel upon execution.

§ 719.21 What are the required elements of an engagement letter?

(a) The engagement letter must require retained legal counsel to assist the contractor in complying with this part and any supplemental guidance distributed under this part.

(b) At a minimum, the engagement letter must include the following:

(1) A process for review and documented approval of all billing by a contractor representative including the timing and scope of billing reviews.

(2) A statement that provision of records to the Government is not intended to constitute a waiver of any applicable legal privilege, protection, or immunity with respect to disclosure of these records to third parties. An exemption for specific records may be obtained where contractors can dem-

onstrate that a particular situation may provide grounds for a waiver.

(3) A requirement that the contractor, the Department, and the Government Accountability Office have the right, upon request, and at reasonable times and locations to inspect, copy, and audit all records documenting billable fees and costs.

(4) A statement that all records must be retained for a period of six (6) years and three (3) months after the final payment or after final case disposition, whichever is later.

(5) Identification of all attorneys and staff who are assigned to the matter and the rate and basis of their compensation (i.e., hourly rates, fixed fees, contingency arrangement) and a process for obtaining approval of temporary adjustments in staffing levels or identified attorneys.

(6) An initial assessment of the matter by retained legal counsel, along with a commitment to provide updates as necessary.

(7) A description of billing procedures, including frequency of billing and billing statement format.

(8) A statement setting forth an agreement that the retained legal counsel will prepare a Staffing and Resource Plan in accordance with the requirements of § 719.15.

(9) A statement setting forth an agreement to consider alternative dispute resolution at the earliest possible stage and thereafter as appropriate where litigation is involved.

(10) A statement setting forth an agreement that retained legal counsel must comply with the cost guidelines in subpart E of this part.

(11) A statement setting forth an agreement that retained legal counsel will provide a certification concerning the costs submitted for reimbursement. The certification that must be included in bills or invoices submitted by retained legal counsel must appear as follows: “Under penalty of law, [the representative] acknowledges the expectation that the bill will be paid by the contractor and that the contractor will be reimbursed by the Federal Government through the U.S. Department of Energy, and, based on personal

§719.30

knowledge and a good faith belief, certifies that the bill is truthful and accurate, and that the services and charges set forth herein comply with the terms of engagement and the policies set forth in the Department of Energy's regulation and guidance on contractor legal management requirements, and that the costs and charges set forth herein are appropriate and related to the representation of the client." The certification must be signed and dated by a representative of the retained legal counsel. Invoices must contain all elements (e.g., date of service, description of service, name of attorney, etc.) set forth in the model bill format in Appendix A to this part.

(12) A statement setting forth agreement to identify and address promptly any professional conflicts of interest.

(c) There may be additional requirements for an engagement letter based on the needs of the contractor or the Departmental element requiring the services of the Department retained legal counsel.

Subpart D—Requests From Contractor Counsel To Initiate, Defend, and Settle Legal Matters

§719.30 In what circumstances may the contractor initiate litigation, including appeals from adverse decisions?

(a) The contractor must provide written notice to Department Counsel prior to initiating litigation or appealing from adverse decisions.

(b) The contractor may not initiate litigation for which it seeks reimbursement without prior written authorization of Department Counsel.

(c) The following information must be provided to Department Counsel by the contractor prior to initiating litigation or appealing an adverse decision:

- (1) Identification of the proposed parties;
- (2) The nature of the proposed action;
- (3) Relief sought;
- (4) Venue;
- (5) Proposed representation and reason for selection;
- (6) An analysis of the issues and the likelihood of success, and any time

10 CFR Ch. III (1–1–16 Edition)

limitation associated with the requested approval;

(7) The estimated costs associated with the proposed action, including whether outside counsel has agreed to a contingent fee arrangement;

(8) Whether, for any reason, the contractor will assume any part of the costs of the action;

(9) A description of any attempts to resolve the issues that would be the subject of the litigation, such as through mediation or other means of alternative dispute resolution; and

(10) A discussion regarding why initiating litigation would prove beneficial to the contractor and to the Department.

§719.31 When must the contractor initiate litigation against third parties?

The contractor must initiate litigation, upon the request of the contracting officer, against third parties including proceedings before administrative agencies, in connection with the contract. The contractor shall proceed with such litigation in good faith and as directed from time to time by Department Counsel.

§719.32 What must the contractor do when it receives notice that it is a party to litigation?

(a) The contractor shall give the contracting officer and Department Counsel immediate notice in writing of any legal proceeding, including any proceeding before an administrative agency and any claim which will be handled by a retrospective insurance carrier if costs (including Legal costs, settlements, claims paid, damages, etc.) are likely to be \$100,000 or more, filed against the contractor arising out of the performance of the contract and shall provide a copy of all relevant filings and any other documents that may be requested by the contracting officer and/or Department Counsel. The Department Counsel will direct the contractor as to:

- (1) Whether the contractor must authorize the Government to defend the action;
- (2) Whether the Government will take charge of the action; or

Department of Energy

§ 719.40

(3) Whether the Government must receive an assignment of the contractor's rights.

(b) The contractor shall proceed with such litigation in good faith and as directed from time to time by the Department Counsel.

(c) If the costs and expenses associated with the legal proceeding against the contractor are potentially allowable under the contract, the contractor shall:

(1) Authorize Department representatives to collaborate with contractor in-house counsel or Department Counsel-approved outside counsel in settling or defending the legal proceeding; or counsel for any associated insurance carrier in settling or defending the claim if retrospective insurance applies or the amount of liability claimed exceeds the amount of insurance coverage; and

(2) Authorize Department representatives to settle the legal proceeding or to defend or represent the contractor in and/or to take charge of any litigation, if required by the Department, except where the liability is covered by bond or is insured by an insurance policy other than retrospective insurance.

§ 719.33 In what circumstances must the contractor seek permission from the Department to enter a settlement agreement?

The contractor must obtain permission from Department Counsel to enter a settlement agreement if the settlement agreement requires contractor payment of \$25,000 or more. Obtaining this approval does not represent a determination that the settlement amount and/or the legal costs incurred in connection with the underlying legal matter will be determined to be allowable.

§ 719.34 What documentation must the contractor provide to Department Counsel when it seeks permission to enter a settlement agreement?

The contractor must provide a written statement to the Department Counsel that includes the following information, as applicable:

(a) The amount of any proposed monetary settlement payment.

(b) Titles and docket numbers associated with the case(s) for which the contractor is seeking approval to settle;

(c) The procedural history of the case(s) or issue(s);

(d) A narrative description of the legal claims or allegations at issue in the matter and any background information that explains events that precipitated the initiation of the matter;

(e) A description of the history of the settlement discussions;

(f) A description of the terms of the proposed settlement agreement or requested settlement authority and the rationale for the contractor entering into the proposed agreement;

(g) If the proposed total monetary settlement amount would be allocated among multiple plaintiffs, a list of the plaintiffs and the amount of money each would receive pursuant to the proposed settlement agreement as well as an explanation as to why the settlement amount is different for any particular plaintiff, if appropriate;

(h) A description as to why settlement of the matter is in the best interest of the Department; and

(i) Any additional supporting documents requested by Department Counsel.

§ 719.35 When must the contractor provide a copy of an executed settlement agreement?

A contractor must provide a copy of an executed settlement agreement within seven (7) days of execution.

Subpart E—Reimbursement of Costs Subject to This Part

§ 719.40 What effect do the regulations of this part have on cost allowability?

Contractor and retained legal counsel compliance with this part is a prerequisite for allowability of legal costs. However, compliance with this part does not guarantee that legal costs will be determined to be allowable. Only the contracting officer has the authority to determine allowability of costs in accordance with 48 CFR (FAR) part 31 and (DEAR) part 931 and all other applicable contract terms and conditions.

§ 719.41

§ 719.41 How does the Department determine whether fees are reasonable?

In determining whether fees or rates charged by retained legal counsel are reasonable, the Department may consider among other things:

(a) Whether the lowest reasonably achievable fees or rates (including any currently available or negotiable discounts) were obtained from retained legal counsel;

(b) Whether lower rates from other firms providing comparable services, at appropriate competency and experience levels, were available;

(c) Whether alternative rate structures such as flat, contingent, and other innovative proposals, were considered; and

(d) The complexity of the legal matter and the expertise of the law firm in this area.

§ 719.42 What categories of costs are unallowable?

(a) Specific categories of unallowable costs are contained in the cost principles at 48 CFR (FAR) part 31 and 48 CFR (DEAR) part 931 and 48 CFR 970.31. See also 41 U.S.C. 4304.

(b) Costs that are customarily or already included in billed hourly rates are not separately reimbursable.

(c) Interest charges that a contractor incurs on any outstanding (unpaid) bills from retained legal counsel are not reimbursable.

§ 719.43 What is the treatment of travel costs?

(a) Travel and related expenses must at a minimum comply with the restrictions set forth in 48 CFR 31.205-46, or 48 CFR (DEAR) 970.3102-05-46, as appropriate, to be reimbursable.

(b) Travel time may be allowed at a full hourly rate for the portion of time during which retained legal counsel performs legal work for which it was retained; any remaining travel time shall be reimbursed at 50 percent of the full hourly rate, except that in no event will travel time spent working for other clients be allowable. Also, for long distance travel that could be completed by various methods of transportation, e.g., car, train, or plane, costs charged by retained legal counsel or

10 CFR Ch. III (1-1-16 Edition)

any agent of retained legal counsel will be considered reasonable only if the individuals charge no more travel time than it would take to utilize the fastest mode of transportation that is cost-effective. For example, if retained legal counsel travels for 10 hours by train when a cost-effective flight that would take two hours to get to the same destination is available, the attorney may charge a maximum of two hours for the time spent traveling.

§ 719.44 What categories of costs require advance approval?

(a) To be considered for reimbursement, costs incurred by retained legal counsel for the following require advance written approval from Department Counsel or the submission of subsequent specific justification to Department Counsel when circumstances out of the contractor's control make advance approval unobtainable:

(1) Computers or general application software, or non-routine computerized databases, if they are specifically created for a particular matter. For costs associated with the creation and use of computerized databases, contractors and retained legal counsel must ensure that the creation and use of computerized databases is necessary and cost-effective. Use of databases originally created by the Department or its contractors for other purposes, but that can be used to assist a contractor or retained legal counsel in connection with a particular matter, should be considered. Contractors and retained legal counsel must ensure that DOE is provided the discretion to obtain unlimited access to and dominion over any computers or general application software, or non-routine computerized databases specifically created for a particular matter;

(2) Secretarial and support services, word processing, or temporary support personnel;

(3) Attendance by more than one attorney at a deposition, court hearing or interview;

(4) Expert witnesses and consultants;

(5) Trade publications, books, treatises, background materials, and other similar documents;

(6) Professional or educational seminars and conferences;

Department of Energy

§ 719.47

(7) Preparation of bills or time spent responding to questions about bills from either the Department or the contractor;

(8) Food and beverages when the attorney or consultant is not on travel status and away from the home office;

(9) Pro hac vice admissions; and

(10) Time charged for law students' or interns' services.

(b) Requests for fee increases by retained legal counsel, other than those under contract directly with the Department, must be sent in writing to the contractor, who will review the request for reasonableness. If the contractor determines the request is reasonable, the contractor must seek approval for the increase from Department Counsel before it authorizes any increase. Contractors should attempt to lock in rates for partners, associates and paralegals for at least a two year period.

§ 719.45 Are there any special procedures or requirements regarding subcontractor and retrospective insurance carrier legal costs?

(a) The contractor shall establish a monitoring system for significant matters in litigation which are handled by subcontractors other than retrospective insurance carriers whose contracts provide for the reimbursement of legal costs. The purpose of this monitoring system is to enable the contractor to be regularly informed of the progress of the Significant Matter, to monitor the associated costs and help ensure that they are reasonable, and to report on the progress of the Significant Matter and the associated costs to Department Counsel.

(b) The contractor shall require retrospective insurance carriers and other subcontractors whose contracts provide for the reimbursement of legal costs to request prior permission from the contractor to enter into a settlement agreement with, or make any payments to, claimants or third-parties if:

(1) In the case of a subcontractor other than a retrospective insurance carrier, the settlement or payment amount is likely to reach \$25,000 or more; or

(2) In the case of a retrospective insurance carrier, the settlement or payment amount is likely to reach \$100,000 or more.

(c) The contractor shall require the insurance carrier or other subcontractor to submit all documentation described in § 719.34 and to provide the contractor with a copy of the executed settlement agreement within seven days of execution, which the contractor will promptly forward to Department Counsel. The contractor shall not authorize the subcontractor to enter into a settlement agreement or make a payment to a claimant or third-party that is likely to reach or exceed the above-stated threshold amounts without first obtaining the approval of the Department Counsel.

(d) Upon request from Department Counsel, the Contracting Officer, or other authorized representative of the Department, the contractor shall provide detailed cost information regarding particular legal matters handled by retrospective insurance carriers or other subcontractors whose contracts provide for the reimbursement of legal costs.

(e) The contractor shall provide reviewed costs and status updates for all significant matters in litigation handled by subcontractors whose contracts provide for the reimbursement of legal costs in accordance with § 719.51. The contractor is not required to provide cost and status updates for matters handled by retrospective insurance carriers except upon the written request of the cognizant Contracting Officer or Department Counsel.

§ 719.46 Are costs covered by this part subject to audit?

All costs covered by this part are subject to audit by the Department, its designated representative, or the Government Accountability Office. *See* § 719.21.

§ 719.47 What happens when more than one contractor is a party to a matter?

(a) If more than one contractor is a party in a particular matter and the issues involved are similar for all the contractors, a single legal counsel designated by the General Counsel must

§ 719.50

either represent all of the contractors or serve as lead counsel, when the rights of the contractors and the Government can be effectively represented by a single legal counsel, consistent with the standards for professional conduct applicable in the particular matter. Contractors may propose to the General Counsel their preference for the individual or law firm to perform as the lead counsel for a particular matter.

(b) If a contractor, having been afforded an opportunity to present its views concerning joint or lead representation, does not acquiesce in the designation of one retained legal counsel to represent a number of contractors, or serve as lead counsel, then the legal costs of such contractor are not reimbursable by the Department, unless the contractor demonstrates that it was reasonable for the contractor to incur such expenses.

Subpart F—Department Counsel

§ 719.50 What authority does Department Counsel have?

(a) Department Counsel will receive written delegated authority from the contracting officer to serve as the contracting officer's representative for legal matters.

(b) Actions by Department Counsel may not exceed the responsibilities and limitations as delegated by the contracting officer. Delegated contracting officer representative authority shall not be construed to include the authority to execute or modify the contract or resolve any contract dispute arising under the contract. Additional discussion of the authority and limitation of contracting officers can be found at 48 CFR 1.602-1, and contracting officer's representatives at 48 CFR (DEAR) 942.270-1. The clause, Technical Direction, 48 CFR (DEAR) 952.242-70, also discusses the responsibilities and authority of a contracting officer's representative.

10 CFR Ch. III (1-1-16 Edition)

§ 719.51 What information must be forwarded to the General Counsel's Office concerning contractor submissions to Department Counsel under this part?

Department Counsel must submit through the General Counsel reporting system, the reviewed costs and status updates for all matters involving retained counsel, including but not limited to contractor litigation. The reports are to be received by the 15th day of the month following the end of each quarter of the fiscal year.

§ 719.52 What types of field actions must be coordinated with the General Counsel?

(a) Requests from contractors for exceptions or deviations from this part must be submitted to the contracting officer and Department Counsel, and approved by the General Counsel or his/her delegee.

(b) Requests from contractors for approval to initiate or defend litigation, or to appeal from adverse decisions, where legal issues of first impression, sensitive issues, issues of national significance to the Department or of broad applicability to the Government that might adversely impact its operations are involved must be coordinated by Department Counsel with the General Counsel or his/her delegee.

(c) Department Counsel must inform the General Counsel of any Significant Matter, as defined in this part, and must coordinate any action involving a Significant Matter with the General Counsel, or his/her delegee, as directed by the General Counsel or his/her delegee.

APPENDIX A TO PART 719—GUIDANCE FOR LEGAL RESOURCE MANAGEMENT

MANAGEMENT AND ADMINISTRATION OF OUTSIDE LEGAL SERVICES

- 1.0 Alternative Dispute Resolution
 - 2.0 Cost Allowability Issues
 - 2.1 Underlying Cause for Incurrence of Costs
- Attachment—Contractor Litigation and Legal Costs, Model Bill Format

MANAGEMENT AND ADMINISTRATION OF OUTSIDE LEGAL SERVICES

This guidance is intended to assist contractors, contracting officers and retained

Department of Energy

Pt. 725

legal counsel in managing the costs of outside legal services.

1.0 Alternative Dispute Resolution

Contractors are expected to evaluate all matters for appropriate alternative dispute resolution (ADR) at various stages of an issue in dispute, e.g., before a case is filed, during pre-discovery, after initial discovery and during pretrial. This evaluation should be done in coordination with the Department's ADR liaison if one has been established or appointed or Department Counsel if an ADR liaison has not been appointed. Contractors, contractor counsel, and Department Counsel are also encouraged to consult with the Department's Director of the Office of Conflict Prevention and Resolution. The Department anticipates that mediation will be the principal and most common method of alternative dispute resolution. Agreement to arbitrate should generally be consistent with the Administrative Dispute Resolution Act (incorporated in part at 5 U.S.C. 571, et seq.) and Department guidance issued under that Act. When a decision to arbitrate is made, a statement fixing the maximum award amount should be agreed to in advance by the participants.

2.0 Cost Allowability Issues

A determination of cost reasonableness depends on a variety of considerations and cir-

cumstances. 48 CFR 31.201-3 establishes that no presumption of reasonableness is attached to the incurrence of costs by a contractor.

2.1 Underlying Cause for Incurrence of Costs

While 10 CFR part 719 provides procedures associated with incurring and monitoring legal costs, the evaluation of the reason for the incurrence of the legal costs, e.g., liability, fault or avoidability, is a separate issue. The reason for the contractor incurring costs may affect the allowability of the contractor's legal costs. In some cases, the final determination of allowability of legal costs cannot be made until a matter is fully resolved. In certain circumstances, contract and cost principle language may permit conditional reimbursement of costs pending the outcome of the legal matter. Whether the Department makes conditional reimbursements or withholds any payment pending the outcome, legal costs ultimately reimbursed by the Department must comply with the applicable cost principles, the terms of the contract, and part 719.

ATTACHMENT—CONTRACTOR LITIGATION AND LEGAL COSTS, MODEL BILL FORMAT

1. Model Bill Format

I—FOR FEES

Date of service	Description of service	Name or initials of attorney	Approved rate	Time charged	Amount (rate × time)
-----------------	------------------------	------------------------------	---------------	--------------	----------------------

(See Note 1 to this table).

II—FOR DISBURSEMENTS

Date	Description of disbursement	Amount
------	-----------------------------	--------

(See Note 1 to this table).

NOTE 1—DESCRIPTION OF SERVICE: All fees must be itemized and described in sufficient detail and specificity to reflect the purpose and nature of the work performed (e.g., subject matter researched or discussed; names of participants of calls/meetings; type of documents reviewed).

NOTE 2—DESCRIPTION OF DISBURSEMENT: Description should be in sufficient detail to determine that the disbursement expense was in accordance with all applicable Department policies on reimbursement of contractor legal costs and the terms of engagement between the contractor and the retained legal counsel. The date the expense was incurred or disbursed should be listed rather than the date the expense was processed. The following should be itemized: copy charge (i.e., number of pages times the price

per page); fax charges (date, phone number and actual amount); overnight delivery (date and amount); electronic research (date and amount); extraordinary postage (e.g., bulk or certified mail); court reporters; expert witness fees; filing fees; outside copying or binding charges; temporary help (assuming prior approval).

NOTE 3—RECEIPTS: Receipts for all expenses equal to or above \$75 must be attached.

- 725.31 Violations.

APPENDIX A TO PART 725—CATEGORIES OF RESTRICTED DATA AVAILABLE

AUTHORITY: Sec. 161 of the Atomic Energy Act of 1954, as amended, 68 Stat. 943, 42 U.S.C. 2201.

SOURCE: 41 FR 56778, Dec. 30, 1976, unless otherwise noted.

GENERAL PROVISIONS

§ 725.1 Purpose.

This part establishes procedures and standards for the issuance of an Access Permit to any person subject to this part who requires access to Restricted Data applicable to civil uses of atomic energy for use in his business, trade or profession; provides for the amendment, renewal, suspension, termination and revocation of an Access Permit; and specifies the terms and conditions under which the Chief Health, Safety and Security Officer will issue the Permit.

[41 FR 56778, Dec. 30, 1976, as amended at 71 FR 68732, Nov. 28, 2006]

§ 725.2 Applicability.

The regulations in this part apply to any person within or under the jurisdiction of the United States who desires access to Restricted Data for use in his business, profession or trade.

§ 725.3 Definitions.

As used in this part:

(a) *Access Permit* means a permit, issued by the Administrator author-

izing access by the named permittee to Restricted Data applicable to civil uses of atomic energy in accordance with the terms and conditions stated on the permit.

(b) *Act* means the Atomic Energy Act of 1954 (68 Stat. 919), including any amendments thereto.

(c) *Category* means a category of Restricted Data designated in appendix A to the regulations in this part.

(d) *Chief Health, Safety and Security Officer* means the Chief Health, Safety and Security Officer or his duly authorized representatives.

(e) *DOE* means the Department of Energy.

(f) *Permittee* means the holder of a permit issued pursuant to the regulations in this part.

(g) *Person* means (1) any individual, corporation, partnership, firm, association, trust, estate, public or private institution, group, Government agency other than DOE, any state or any political subdivision of, or any political entity within a state, or other entity; and (2) any legal successor, representative, agent, or agency of the foregoing.

(h) *Restricted Data* means all data concerning (1) design, manufacture or utilization of atomic weapons; (2) the production of special nuclear material; or (3) the use of special nuclear material in the production of energy, but shall not include data declassified or removed from the Restricted Data category pursuant to section 142 of the Act.

(i) *Government Confidential Commercial Information* means sensitive commercial information not including Restricted Data, generated by the government, the release of which could put the government at a competitive disadvantage in providing enrichment services.

[41 FR 56778, Dec. 30, 1976, as amended at 52 FR 30139, Aug. 13, 1987; 71 FR 68732, Nov. 28, 2006]

§ 725.4 Interpretations.

Except as specifically authorized by the Chief Health, Safety and Security Officer in writing no interpretation of the meaning of the regulations in this part by any officer or employee of DOE other than a written interpretation by

Department of Energy

§ 725.11

the General Counsel will be recognized to be binding upon DOE.

[41 FR 56778, Dec. 30, 1976, as amended at 71 FR 68732, Nov. 28, 2006]

§ 725.5 Communications.

All communications concerning this part should be addressed to the Chief Health, Safety and Security Officer, HS-1/Forrestal Building, U.S. Department of Energy, 1000 Independence Ave, SW., Washington, DC 20585.

[71 FR 68732, Nov. 28, 2006]

§ 725.6 Categories of available information.

For administrative purposes DOE has categorized Restricted Data which will be made available to permittees in the categories as set forth in appendix A to this part. Top Secret information; information pertaining to the design, manufacture or utilization of atomic weapons; and defense information other than Restricted Data are not included in these categories and will not be made available under this part.

§ 725.7 Specific waivers.

The Chief Health, Safety and Security Officer may, upon application of any interested party, grant such waivers from the requirements of this part as he determines are authorized by law and will not constitute an undue risk to the common defense and security.

[41 FR 56778, Dec. 30, 1976, as amended at 71 FR 68732, Nov. 28, 2006]

APPLICATIONS

§ 725.11 Applications.

(a) Any person desiring access to Restricted Data pursuant to this part should submit an application (Form 378), in triplicate, for an access permit to the Chief Health, Safety and Security Officer, HS-1/Forrestal Building, U.S. Department of Energy, 1000 Independence Ave, SW., Washington, DC 20585.

(b) Where an individual desires access to Restricted Data for use in the performance of his duties as an employee, the application for an access permit must be filed in the name of his employer.

(c) Self-employed private consultants, desiring access to Restricted Data, must file the application in their own name for an individual access permit.

(d) Each application should contain the following information:

(1) Name of applicant (unincorporated subsidiaries or divisions of a corporation must apply in the name of the corporation);

(2) Address of applicant;

(3) Description of business or occupation of applicant; and

(4)(i) If applicant is an individual, state citizenship.

(ii) If applicant is a partnership, state name, citizenship and address of each partner and the principal location where the partnership does business.

(iii) If applicant is a corporation or an unincorporated association, state:

(A) The state where it is incorporated or organized and the principal location where it does business;

(B) The names, addresses and citizenship of its directors and of its principal officers;

(C) Whether it is owned, controlled or dominated by an alien, a foreign corporation, or foreign government, and if so, give details.

(iv) If the applicant is acting as agent or representative of another person in filing the application, identify the principal and furnish information required under this subparagraph with respect to such principal;

(5) Total number of full-time employees;

(6) Classification of Restricted Data (Confidential or Secret) to which access is requested;

(7) Potential use of the Restricted Data in the applicant's business, profession or trade. If access to Secret Restricted Data is requested, list the specific categories by number and furnish detailed reasons why such access within the specified categories is needed by the applicant. The need for Secret information should be stated by describing its proposed use in specific research, design, planning, construction, manufacturing, or operating projects; in activities under licenses issued by Nuclear Regulatory Commission; in studies or evaluations planned or under

§ 725.12

way; or in work or services to be performed for other organizations. In addition, if access to secret restricted data in category C-65, plutonium production, or restricted data in category C-24, isotope separation, is requested, the application should also include sufficient information to satisfy the requirements of § 725.15(b) (2) or (3), as the case may be.”

(8) Principal Location(s) at which Restricted Data will be used.

(e) Applications should be signed by a person authorized to sign for the applicant.

(f) Each application shall contain complete and accurate disclosure with respect to the real party or parties in interest and as to all other matters and things required to be disclosed.

[41 FR 56778, Dec. 30, 1976, as amended at 71 FR 68732, Nov. 28, 2006]

§ 725.12 Noneligibility.

The following persons are not eligible to apply for an access permit:

(a) Corporations not organized under the laws of the United States or a political subdivision thereof.

(b) Any individual who is not a citizen of the United States.

(c) Any partnership not including among the partners one or more citizens of the United States; or any other unincorporated association not including one or more citizens of the United States among its principal officers.

(d) Any organization which is owned, controlled or dominated by the Government of, a citizen of, or an organization organized under the laws of a country or area listed as a Subgroup A country or destination in § 371.3 (15 CFR 371.3) of the Comprehensive Export Schedule of the United States Department of Commerce.

(e) Persons subject to the jurisdiction of the United States who are not doing business within the United States.

§ 725.13 Additional information.

The Chief Health, Safety and Security Officer may, at any time after the filing of the original application and before the termination of the permit, require additional information in order to enable the Chief Health, Safety and Security Officer to determine whether the permit should be granted or denied

10 CFR Ch. III (1-1-16 Edition)

or whether it should be modified or revoked.

[41 FR 56778, Dec. 30, 1976, as amended at 71 FR 68732, Nov. 28, 2006]

§ 725.14 Public inspection of applications.

Applications and documents submitted to DOE in connection with applications may be made available for public inspection in accordance with the regulations contained in part 702 of this chapter.

§ 725.15 Requirements for approval of applications.

(a) An application for an access permit authorizing access to confidential restricted data in the categories set forth in appendix A of this part (except C-91 and C-24) will be approved only if the application demonstrates that the applicant has a potential use or application for such data in his business, trade, or profession and has filed a complete application form.

(b)(1) An application for an access permit authorizing access to restricted data in category C-24 or secret restricted data in other categories will be approved only if the applicant has a need for such data in his business, trade, or profession and has filed a complete application form.

(2) An application for an access permit authorizing access to Secret Restricted Data in category C-65 Plutonium Production will be approved only if the application demonstrates also that the applicant:

(i) Is directly engaged in a substantial effort to develop, design, build or operate a chemical processing plant or other facility related to his participation in the peaceful uses of atomic energy for which such production rate and cost data are needed; or

(ii) Is furnishing to a permittee having access to C-65 under paragraph (b)(2)(i) of this section, substantial scientific, engineering or other professional services to be used by said permittee in carrying out the activities for which said permittee received access to category C-65.

(3) An application for an access permit authorizing access to Restricted

Department of Energy

§ 725.22

Data in category C-24, isotope separation—subcategory A or B—will be approved only if the application demonstrates also that the applicant:

(i) Possesses technical, managerial and financial qualifications demonstrating that the applicant is potentially capable of undertaking or participating significantly in the construction and/or operation of production or manufacturing facilities and offers reasonable assurance of adequacy of resources to carry on, alone or with others, uranium enrichment on a production basis or the large-scale manufacture or assembly of precision equipment systems, or is potentially capable of utilizing centrifuge machines in its business for uranium enrichment or for purposes other than uranium enrichment; and is not subject to foreign ownership, control, or influence; and

(A) For subcategory A, desires to determine its interest in participating significantly in a substantial effort to develop, design, build, and operate a uranium enrichment facility or a facility for the manufacture of uranium enrichment equipment.

(B) For subcategory B, proposes to (1) participate significantly in, or is directly participating significantly in, a substantial effort to evaluate alternative processes, develop, design, build, and operate a uranium enrichment facility or a facility for the manufacture of uranium enrichment equipment, or (2) utilize centrifuge machines and related equipment in its business for uranium enrichment or for purposes other than uranium enrichment, or

(ii) Is furnishing to a permittee having access to Category C-24 under the paragraph (b)(3)(i) of this section substantial scientific, engineering, or other professional services to be used by said permittee in carrying out the activities for which said permittee received access to Category C-24.

(4) An application for an access permit authorizing access to Confidential and Secret Restricted Data in C-91, Nuclear Reactors for Rocket Propulsion, will be approved only if the application demonstrates also that the applicant:

(i) Possesses qualifications demonstrating that he is capable of making a contribution to research and development in the field of nuclear reactors

for rocket propulsion and is directly engaged in or proposes to engage in a substantial research and development program in such field of work; or

(ii) Is engaged in or proposes to engage in a substantial study program in the field of nuclear reactors for rocket propulsion preparatory to the submission of a research and development proposal to DOE; or

(iii) Is furnishing to a permittee having access under paragraph (b)(4) (i) or (ii) of this section substantial scientific, engineering or other professional services to be used by that permittee in a study or research and development program for which said permittee received access.

[41 FR 56778, Dec. 30, 1976, as amended at 52 FR 30139, Aug. 13, 1987]

PERMITS

§ 725.21 Issuance.

(a) Upon a determination that an application meets the requirements of this regulation, the Chief Health, Safety and Security Officer will issue to the applicant an access permit on Form DOE 379.

(b) An Access Permit is not an access authorization. It does not authorize any individual not having an appropriate DOE access authorization to receive Restricted Data. See § 725.24 and part 1016 of this title.

[41 FR 56778, Dec. 30, 1976, as amended at 71 FR 68732, Nov. 28, 2006]

§ 725.22 Scope of permit.

(a) All access permits will as a minimum authorize access, subject to the terms and conditions of the access permit to confidential restricted data in all of the categories set forth in appendix A to this part, except C-91 and C-24.

(b) In addition, access permits may authorize access, subject to the terms and conditions of the access permit to such Secret Restricted Data as is included within the particular category or categories specified in the permit.

(c) In addition, access permits may authorize access, subject to the terms and conditions of the access permit, to such government confidential commercial information as is included within

§ 725.23

the particular category or categories specified in the permit.

[41 FR 56778, Dec. 30, 1976, as amended at 52 FR 30139, Aug. 13, 1987]

§ 725.23 Terms and conditions of access.

(a) Neither the United States, nor DOE, nor any person acting on behalf of DOE makes any warranty or other representation, expressed or implied, (1) with respect to the accuracy, completeness or usefulness of any information made available pursuant to an access permit, or (2) that the use of any such information may not infringe privately owned rights.

(b) The Chief Health, Safety and Security Officer, on behalf of DOE, hereby waives such rights with respect to any invention or discovery as it may have pursuant to section 152 of the Act by reason of such invention or discovery having been made or conceived in the course of, in connection with, or resulting from access to Restricted Data received under the terms of an access permit. (Note provisions of § 725.23(d).)

(c) Each permittee shall:

(1) Comply with all applicable provisions of the Atomic Energy Act of 1954, as amended, and with parts 810 and 1016 of this title and with all other applicable rules, regulations, and orders of DOE, including such rules, regulations, and orders as DOE may adopt or issue to effectuate the policies specified in the act directing DOE to strengthen free competition in private enterprise and avoid the creation or maintenance of a situation inconsistent with the antitrust laws.

(2) Be deemed to have waived all claims for damages under section 183 of title 35 U.S. Code by reason of the imposition of any secrecy order on any patent application and all claims for just compensation under section 173 of the Atomic Energy Act of 1954, with respect to any invention or discovery made or conceived in the course of, in connection with or as a result of access to Restricted Data received under the terms of the access permit;

(3) Be deemed to have waived any and all claims against the United States, DOE and all persons acting on behalf of DOE that might arise in connection

with the use, by the applicant, of any and all information supplied by them pursuant to the access permit;

(4) Obtain and preserve in his files written agreements from all individuals who will have access to Restricted Data under his access permit. The agreement shall be as follows:

In consideration for receiving access to Restricted Data under the access permit issued by the Chief Health, Safety and Security Officer, I hereby agree to:

(a) Waive all claims for damages under section 183 of title 35 U.S. Code by reason of the imposition of any secrecy order on any patent application, and all claims for just compensation under section 173 of the Atomic Energy Act of 1954, with respect to any invention or discovery made or conceived in the course of, in connection with or resulting from access to Restricted Data received under the terms of the access permit issued to (insert the name of the holder of the access permit);

(b) Waive any and all claims against the United States, DOE, and all persons acting on behalf of DOE that might arise in connection with the use, by me, of any and all information supplied by them pursuant to the access permit issued to (insert the name of the holder of the access permit).

In case of an access permit authorizing access to restricted data in category C-24, isotope separation, the agreement shall also provide for such requirements as the permittee considers necessary for purposes of fulfilling its obligations under paragraph (d) of this section.

(5) Pay all established charges for personnel access authorizations, DOE consulting services, publication and reproduction of documents, and such other services as DOE may furnish in connection with the access permit.

(d) The following terms and conditions are applicable to an access permit authorizing access to restricted data in category C-24, isotope separation irrespective of whether access to DOE's restricted data information is desired:

(1) The permittee agrees to grant a nonexclusive license at reasonable royalties to the United States and, at the request of DOE, to domestic and foreign persons, to use in the production or enrichment of special nuclear material any U.S. patent or any U.S. patent application (otherwise in condition for allowance except for a secrecy order

thereon) on any invention or discovery made or conceived by the permittee, its employees, or others engaged by the permittee in the course of the permittee's work under the access permit, or as a result of access to data or information made available by DOE.

(2) The permittee agrees to grant to the United States, and, at the request of DOE, to domestic and foreign persons, the right at reasonable royalties to use for research, development, or manufacturing programs for the production or enrichment of special nuclear material, any technical information or data, including economic evaluations thereof, of a proprietary nature developed by the permittee, its employees, or others engaged by the permittee in the course of the permittee's work under the access permit or as a result of access to data or information made available by DOE and not covered by a U.S. patent or U.S. patent application referred to in paragraph (d)(1) of this section. If DOE disseminates any such proprietary technical information or data in its possession to any of its contractors for use in any DOE research, development, production, or manufacturing programs, it will do so under contractual provisions pursuant to which the contractor would undertake to use this information only for the work under the pertinent DOE contract. Notwithstanding the foregoing provisions of this subparagraph, the permittee waives any claim against DOE for compensation or otherwise, in connection with any use or dissemination of information or data not specifically identified and claimed by the permittee as proprietary in a written notice to DOE at the time of the furnishing of the information or data to DOE. As used in this subparagraph, the term "technical information or data, including economic evaluations thereof, of a proprietary nature" means information or data which:

- (i) Is not the property of the Government by virtue of any agreement;
- (ii) Concerns the details of trade secrets or manufacturing processes which the permittee has protected from us by others; and
- (iii)(A) Is specifically identified as proprietary at the time it is made available to DOE.

(B) Technical information or data shall not be deemed proprietary in nature whenever substantially the same technical information is available to DOE which has been prepared, developed or furnished as nonproprietary information by another source independently of the proprietary information and data furnished by the permittee.

(3) If the amount of reasonable royalties provided for in paragraphs (d) (1) and (2) of this section cannot be agreed upon, the permittee agrees that such amount shall be determined by the Administrator under the provisions of section 157c of the Atomic Energy Act of 1954, as amended.

(4) In the event domestic commercial uranium enriching services are provided by persons other than an agency of the United States, the permittee agrees not to require the United States to pay the royalties provided for in paragraphs (d) (1) and (2) of this section.

(5) The acceptance, exercise, or use of the licenses or rights provided for in paragraphs (d) (1) and (2) of this section shall not prevent the Government, at any time, from contesting their validity, scope or enforceability.

(6) The permittee agrees, during the term of the access permit, to make quarterly reports to DOE in writing, in reasonable detail, respecting all technical information or data, including economic evaluations thereof, which the permittee or DOE considers may be of interest to DOE, including reports of patent applications on inventions or discoveries and of technical information and data of a proprietary nature. These reports will cover the results of the permittee's work under the access permit or as a result of data or information made available by DOE. The foregoing provisions of this subparagraph shall be subject to the provisions of paragraphs (d) (1) and (2) of this section.

(7) The permittee agrees to make available to DOE, at all reasonable times during the term of the access permit, for inspection by DOE personnel, or by mutual agreement, others on behalf of DOE, all experimental equipment and technical information or data developed by the permittee, its employees, or others engaged by the

§ 725.24

permittee, in the course of the permittee's work under the access permit or as a result of data or information made available by DOE. The foregoing provision of this subparagraph shall be subject to the provisions of paragraphs (d) (1) and (2) of this section.

(8) The permittee agrees to pay such reasonable compensation as DOE may elect to charge for the commercial use of its inventions and discoveries including related data and technology and, except for an applicant qualifying for a permit pursuant to § 725.15(b)(3)(ii), agrees to pay \$25,000 for an access permit authorizing access to restricted data in subcategory B.

(9) Except as may be otherwise authorized by DOE, the permittee agrees not to disseminate to persons not granted access by DOE, restricted data or government confidential commercial information made available to the permittee by DOE or restricted data developed by the permittee, its employees, or others engaged by the permittee in the course of the permittee's work under the access permit or as a result of data or information made available by DOE.

(10) The granting of an access permit does not constitute any assurance, direct or implied, that the Nuclear Regulatory Commission will grant the permittee a license for a production facility or any other license.

(11) In the event the permittee is engaged by DOE to perform work for DOE in the field of the separation of isotopes, the permittee agrees to undertake such measures as DOE may require for the separation of its activities under the access permit from its work for DOE.

[41 FR 56778, Dec. 30, 1976, as amended at 52 FR 30139, Aug. 13, 1987; 71 FR 68732, Nov. 28, 2006]

§ 725.24 Administration.

With respect to each permit issued pursuant to the regulations in this part, the Chief Health, Safety and Security Officer will designate a DOE or National Nuclear Security Administration office which will:

(a) Process all personnel access authorizations requested in connection with the permit;

10 CFR Ch. III (1-1-16 Edition)

(b) Review the procedures submitted by the Applicant, in accordance with part 1016 of this title, for the safeguarding of Restricted Data; and

(c) Provide information to the permittee with respect to the sources and locations of Restricted Data available under this permit and to assist the permittee in other matters pertaining to the administration of his permit.

[41 FR 56778, Dec. 30, 1976, as amended at 71 FR 68732, Nov. 28, 2006]

§ 725.25 Term and renewal.

(a) Each access permit will be issued for a two year term, unless otherwise stated in the permit.

(b) Applications for renewal shall be filed in accordance with § 725.11. Each renewal application must be complete, without reference to previous applications. In any case in which a permittee has filed a properly completed application for renewal more than thirty (30) days prior to the expiration of his existing permit, such existing permit shall not expire until the application for a renewal has been finally acted upon by the Chief Health, Safety and Security Officer.

[41 FR 56778, Dec. 30, 1976, as amended at 71 FR 68732, Nov. 28, 2006]

§ 725.26 Assignment.

An access permit is nontransferable and nonassignable.

§ 725.27 Amendment.

An access permit may be amended from time to time upon application by the permittee. An application for amendment may be filed, in triplicate, in letter form and shall be signed by an individual authorized to sign on behalf of the applicant. The term of an access permit shall not be altered by an amendment thereto.

§ 725.28 Action on application to renew or amend.

In considering an application by a permittee to review or amend his permit, the Chief Health, Safety and Security Officer will apply the criteria set forth in § 725.15. Failure of an applicant to reply to an DOE request for additional information concerning an application for renewal or amendment

Department of Energy

Pt. 725, App. A

within 60 days shall result in a rejection of the application without prejudice to resubmit a properly completed application at a later date.

[41 FR 56778, Dec. 30, 1976, as amended at 71 FR 68732, Nov. 28, 2006]

§ 725.29 Suspension, revocation and termination of permits.

The Chief Health, Safety and Security Officer may revoke or suspend any access permit for any material false statement in the application or in any report submitted to DOE pursuant to the regulations in this part or because of conditions or facts which would have warranted a refusal to grant the permit in the first instance, or for violation of any of the terms and conditions of the Atomic Energy Act of 1954 or rules, regulations or orders issued pursuant thereto. A permittee should request termination of his permit when he no longer requires Restricted Data for use in his business, trade or profession.

[41 FR 56778, Dec. 30, 1976, as amended at 71 FR 68732, Nov. 28, 2006]

§ 725.30 Exceptions and additional requirements.

Notwithstanding any other provision in the regulations in this part, the Chief Health, Safety and Security Officer may deny an application for an access permit or suspend or revoke any access permit, or incorporate additional conditions or requirements in any access permit, upon finding that such denial, revocation or the incorporation of such conditions and limitations is necessary or appropriate in the interest of the common defense and security or is otherwise in the public interest.

[41 FR 56778, Dec. 30, 1976, as amended at 71 FR 68732, Nov. 28, 2006]

§ 725.31 Violations.

An injunction or other court order may be obtained prohibiting any violation of any provision of the Act or any regulation or order issued thereunder. Any person who willfully violates any provision of the Act or any regulation or order issued thereunder may be guilty of a crime and, upon conviction, may be punished by fine or imprisonment or both, as provided by law.

APPENDIX A TO PART 725—CATEGORIES OF RESTRICTED DATA AVAILABLE

C-24 Isotope separation. This category is divided into subcategories A and B.

Subcategory A includes information in summary form concerning the status and potential of the gaseous diffusion and gas centrifuge processes for the separation of uranium isotopes.

Subcategory B includes information on the following:

a. Any aspect of separating one or more isotopes of uranium from a composition containing a mixture of isotopes of that element by the gas centrifuge or gaseous diffusion processes.

b. Design, construction, and operation of any plant, facility or device capable of separating by the gas centrifuge or gaseous diffusion processes one or more isotopes of uranium from a composition containing a mixture of isotopes of that element, including means and methods of transporting materials from one to another device.

C-44 Nuclear Technology. This category includes classified technical information concerning nuclear technology. It may contain information on the following:

a. Materials, including metals, ceramics, organic and inorganic compounds. Included are such technical areas as the technology and fabrication of fuel elements, corrosion studies, cladding techniques and radiation studies.

b. Chemistry, chemical engineering and radiochemistry of all the elements and their compounds. Included are techniques and processes of chemical separations, radioactive waste handling and feed material processing.

c. Reactor physics, engineering and technology including theory, design, criticality studies and operation of reactors, reactor systems and reactor components.

d. Reserved.

e. Lithium isotope separation technology. This subcategory includes classified technical information on the separation of lithium isotopes by using counter-current flows of lithium amalgam and aqueous lithium hydroxide solution in packed columns. Not included is information regarding plant design and operating conditions from which total production rates or design capacity of the lithium isotope separation plant (Calex) in Oak Ridge, Tennessee, can be inferred. In addition to the other requirements of this part, access permits for Restricted Data in this subcategory will be approved, provided the permittee:

1. Demonstrates that it is not a corporation or entity owned, controlled or dominated by an alien, a foreign corporation, or a foreign government, and

2. Agrees to insertion in his access permit of the terms and conditions:

(i) Set forth in paragraphs (a) and (b) of § 725.23 of this part;

(ii) Set forth in paragraph (c) of § 725.23 of this part, amended by deleting the phrase “category C-24, isotope separation,” and inserting in lieu thereof the phrase “sub-category C-44e, lithium isotope separation technology”;

(iii) Set forth in paragraph (d) of § 725.23 of this part, amended by:

(A) Deleting the phrases “production or enrichment of special nuclear material” and “separation of isotopes” wherever they appear, and inserting in lieu thereof the phrase “separation of isotopes of lithium”;

(B) Deleting the phrase “domestic commercial uranium enriching services are provided by,” and inserting in lieu thereof the phrase “domestic lithium isotope separation capacity becomes available to.”

This category does not include information which reveals or from which can be calculated actual or planned (as distinguished from design) capacities, production rates and unit costs for the plutonium production program.

C-65 Plutonium Production. This category includes information on reactor, fuel element and separations technology which reveals or from which can be calculated actual or planned (as distinguished from design) capacities, production rates and unit costs for the Hanford and Savannah River production facilities.

Technology which does not reveal or enable calculation of production rates and unit costs of Hanford or Savannah River production facilities is categorized in C-44 Nuclear Technology.

C-90 Nuclear Reactors for Ram-Jet Propulsion. This category includes information on:

a. Programs pertaining to the development of nuclear reactors for application to ram-jet propulsion systems including theory and/or design, test philosophy procedures and/or results.

b. Fabrication technology and evaluation of performance or characteristics of materials or components for such reactors.

c. Controls, control systems and instrumentation relating to the design or technology of such reactors.

d. Data pertaining to heat transfer, propellant kinetics or corrosion and erosion of materials under conditions of high temperature, high gas flows or other environmental conditions characteristic of ram-jet propulsion systems.

This category does not include information on:

a. Design details of weapons systems or nuclear warheads.

b. Military operational techniques or characteristics.

c. General aspects of nuclear ram-jet missiles, such as payload, aerodynamic characteristics, guidance systems, physical size, gross weight, thrust and information of this kind which is associated with utilization of a nuclear ram-jet propulsion system.

C-91 Nuclear Reactors for Rocket Propulsion. This category includes information on:

a. Programs pertaining to nuclear reactors for rocket propulsion, i.e., missile propulsion, theory and/design, test philosophy procedures and/or results.

b. Design, fabrication technology and evaluation of performance or characteristics of material, components, or subsystems or nuclear rocket reactors.

c. Controls, control systems and instrumentation relating to the design or technology of rocket reactor systems.

d. Data pertaining to heat transfer, propellant kinetics or corrosion and erosion of rocket reactor system materials under conditions of high temperature, high gas flows, or other environmental conditions characteristic of rocket reactors.

This category does not include information on:

a. Design details of weapons systems or nuclear warheads.

b. Military operational techniques or characteristics.

c. General aspects of payload and aerodynamic characteristics.

d. Design details and development, information of components and subsystems of the nuclear rocket engine other than that associated with the reactor system.

C-92 Systems for Nuclear Auxiliary Power (SNAP). This category includes information on:

a. Isotopic SNAP Program, including theory, design, research and development, fabrication, test procedures and results for the device, including power conversion device and the fuels used.

b. Reactor SNAP Program, including theory, design, research and development, fabrication, test procedures and results for the reactor, including the directly associated power conversion device when developed by DOE.

This category does not include that technical and scientific data developed under the SNAP Advanced Concept Program which should be reported in C-93.

C-93 Advanced Concepts for Future Application.

C-93a Reactor Experiments. This category includes classified technical information developed in the pursuit of work on new or advanced concepts of reactors or components which DOE considers essential to future growth or for general application to future generations of reactors. Classified information developed in the pursuit of work on the lithium cooled reactor experiment is an

example of the type of information to be reported in this category, i.e., information resulting from an experimental reactor project or component development which may have many future applications but which is not currently being pursued to meet the specific needs of an approved requirement for which other information categories have been provided. For example, classified technical information developed in the pursuit of work on Naval, Ram-Jet or Rocket nuclear reactors would not be reported here but under their respective specific categories. This category will include classified technical information on the following:

- a. Theory, design, and performance, either estimated or actual.
- b. Design details, composition and performance characteristics of major components (e.g., fuel media, reflectors, moderators, heat exchangers, pressure shells or containment devices, control rods, conversion devices, instrumentation and shielding).
- c. Material (metals, ceramics and compounds) development, alloying, cladding, corrosion, erosion, radiation studies and fabrication techniques.
- d. Chemistry, including chemical engineering, processes and techniques. Reactor physics, engineering and criticality studies.

C-93b Conversion Devices. This category includes classified technical information developed in the pursuit of studies, designs, research and development, fabrication and operation of any energy conversion device to be used with nuclear energy sources which is not being applied to a specific system development project.

C-94 Military Compact Reactor (MCR). This category includes classified technical information on the actual or planned Military Compact Reactor and its components developed in the pursuit of studies, designs, research and development, fabrication, and operation of the reactor system or its components.

Examples of the areas of information included are:

- a. Reactor core physics.
- b. Fuel elements and fuel element components.
- c. Moderator and reflector details.
- d. Data on primary coolant system.
- e. Radiation shield.
- f. Controls and instrumentation.

This category does not include information on military operational characteristics or techniques.

[41 FR 56778, Dec. 30, 1976, as amended at 44 FR 37939, June 29, 1979]

PART 727—CONSENT FOR ACCESS TO INFORMATION ON DEPARTMENT OF ENERGY COMPUTERS

Sec.

- 727.1 What is the purpose and scope of this part?
- 727.2 What are the definitions of the terms used in this part?
- 727.3 To whom does this part apply?
- 727.4 Is there any expectation of privacy applicable to a DOE computer?
- 727.5 What acknowledgment and consent is required for access to information on DOE computers?
- 727.6 What are the obligations of a DOE contractor?

AUTHORITY: 42 U.S.C. 7101, *et seq.*; 42 U.S.C. 2011, *et seq.*; 50 U.S.C. 2425, 2483; E.O. No. 12958, 60 FR 19825, 3 CFR, 1995 Comp., p. 333; and E.O. 12968, 60 FR 40245, 3 CFR, 1995 Comp., p. 391.

SOURCE: 71 FR 40884, July 19, 2006, unless otherwise noted.

§ 727.1 What is the purpose and scope of this part?

(a) The purpose of this part is to establish minimum requirements applicable to each individual granted access to a DOE computer or to information on a DOE computer, including a requirement for written consent to access by an authorized investigative agency to any DOE computer used in the performance of the individual's duties during the term of that individual's employment and for a period of three years thereafter.

(b) Section 727.4 of this part also applies to any person who uses a DOE computer by sending an e-mail message to such a computer.

§ 727.2 What are the definitions of the terms used in this part?

For purposes of this part:

Authorized investigative agency means an agency authorized by law or regulation to conduct a counterintelligence investigation or investigations of persons who are proposed for access to classified information to ascertain whether such persons satisfy the criteria for obtaining and retaining access to such information.

Computer means desktop computers, portable computers, computer networks (including the DOE network and local area networks at or controlled by

§ 727.3

DOE organizations), network devices, automated information systems, or other related computer equipment owned by, leased, or operated on behalf of the DOE.

DOE means the Department of Energy, including the National Nuclear Security Administration.

DOE computer means any computer owned by, leased, or operated on behalf of the DOE.

Individual means an employee of DOE or a DOE contractor, or any other person who has been granted access to a DOE computer or to information on a DOE computer, and does not include a member of the public who sends an e-mail message to a DOE computer or who obtains information available to the public on DOE Web sites.

User means any person, including any individual or member of the public, who sends information to or receives information from a DOE computer.

§ 727.3 To whom does this part apply?

(a) This part applies to DOE employees, DOE contractors, DOE contractor and subcontractor employees, and any other individual who has been granted access to a DOE computer or to information on a DOE computer.

(b) Section 727.4 of this part also applies to any person who uses a DOE computer by sending an e-mail message to such computer.

§ 727.4 Is there any expectation of privacy applicable to a DOE computer?

Notwithstanding any other provision of law (including any provision of law enacted by the Electronic Communications Privacy Act of 1986), no user of a DOE computer shall have any expectation of privacy in the use of that DOE computer.

§ 727.5 What acknowledgment and consent is required for access to information on DOE computers?

An individual may not be granted access to information on a DOE computer unless:

(a) The individual has acknowledged in writing that the individual has no expectation of privacy in the use of a DOE computer; and

10 CFR Ch. III (1–1–16 Edition)

(b) The individual has consented in writing to permit access by an authorized investigative agency to any DOE computer used during the period of that individual's access to information on a DOE computer and for a period of three years thereafter.

§ 727.6 What are the obligations of a DOE contractor?

(a) A DOE contractor must ensure that neither its employees nor the employees of any of its subcontractors has access to information on a DOE computer unless the DOE contractor has obtained a written acknowledgment and consent by each contractor or subcontractor employee that complies with the requirements of § 727.5 of this part.

(b) A DOE contractor must maintain a file of original written acknowledgments and consents executed by its employees and all subcontractors employees that comply with the requirements of § 727.5 of this part.

(c) Upon demand by the cognizant DOE contracting officer, a DOE contractor must provide an opportunity for a DOE official to inspect the file compiled under this section and to copy any portion of the file.

(d) If a DOE contractor violates the requirements of this section with regard to a DOE computer with Restricted Data or other classified information, then the DOE contractor may be assessed a civil penalty or a reduction in fee pursuant to section 234B of the Atomic Energy Act of 1954 (42 U.S.C. 2282b).

PART 733—ALLEGATIONS OF RESEARCH MISCONDUCT

Sec.	
733.1	Purpose.
733.2	Scope.
733.3	Definitions.
733.4	Research misconduct requirements.
733.5	Allegations received by DOE.
733.6	Consultation with the DOE Office of the Inspector General.
733.7	Referral to the contracting officer.
733.8	Contracting officer procedures.

AUTHORITY: 42 U.S.C. 2201; 7254; 7256; 7101 *et seq.*; 50 U.S.C. 2401 *et seq.*

SOURCE: 70 FR 37014, June 28, 2005, unless otherwise noted.

Department of Energy

§ 733.6

§ 733.1 Purpose.

The purpose of this part is to set forth a general statement of policy on the treatment of allegations of research misconduct consistent with Federal Policy on Research Misconduct established by the White House Office of Science and Technology Policy on December 6, 2000 (65 FR 76260–76264).

§ 733.2 Scope.

This part applies to allegations of research misconduct with regard to scientific research conducted under a Department of Energy contract or an agreement.

§ 733.3 Definitions.

The following terms used in this part are defined as follows:

Contract is defined in 2 CFR 200.22.

DOE means the U.S. Department of Energy (including the National Nuclear Security Administration).

DOE Element means a major division of DOE, usually headed by a Presidential appointee, which has a delegation of authority to carry out activities by entering into contracts or financial assistance agreements.

Fabrication means making up data or results and recording or reporting them.

Falsification means manipulating research materials, equipment, or processes, or changing or omitting data or results such that the research is not accurately represented in the research record.

Financial assistance agreement means an agreement the primary purpose of which is to provide appropriated funds to stimulate an activity, including but not limited to, grants and cooperative agreements pursuant to 2 CFR part 200 as amended by 2 CFR part 910.

Finding of research misconduct means a determination, based on a preponderance of the evidence, that research misconduct has occurred. Such a finding requires a conclusion that there has been a significant departure from accepted practices of the relevant research community and that it be knowingly, intentionally, or recklessly committed.

Plagiarism means the appropriation of another person's ideas, processes, re-

sults, or words without giving appropriate credit.

Research means all basic, applied, and demonstration research in all fields of science, engineering, and mathematics, such as research in economics, education, linguistics, medicine, psychology, social sciences, statistics, and research involving human subjects or animals.

Research misconduct means fabrication, falsification, or plagiarism in proposing, performing, or reviewing research, or in reporting research results, but does not include honest error or differences of opinion.

Research record means the record of all data or results that embody the facts resulting from scientists' inquiries, including, but not limited to, research proposals, laboratory records, both physical and electronic, progress reports, abstracts, theses, oral presentations, internal reports, and journal articles

[70 FR 37014, June 28, 2005, as amended at 79 FR 76047, Dec. 19, 2014]

§ 733.4 Research misconduct requirements.

DOE intends to apply the research misconduct policy set forth in 65 FR 76260–76264 by including appropriate research misconduct requirements in contracts and financial assistance awards that make contractors and financial recipients primarily responsible for implementing the policy in dealing with allegations of research misconduct in connection with the proposal, performance or review of research for DOE .

§ 733.5 Allegations received by DOE.

If DOE receives directly a written allegation of research misconduct with regard to research under a DOE contract or financial assistance agreement, DOE will refer the allegation for processing to the DOE Element responsible for the contract or financial assistance agreement.

§ 733.6 Consultation with the DOE Office of the Inspector General.

Upon receipt of an allegation of research misconduct, the DOE Element shall consult with the DOE Office of

§ 733.7

the Inspector General which will determine whether that office will elect to investigate the allegation.

§ 733.7 Referral to the contracting officer.

If the DOE Office of the Inspector General declines to investigate an allegation of research misconduct, the DOE Element should forward the allegation to the contracting officer responsible for administration of the contract or financial assistance agreement to which the allegation pertains.

§ 733.8 Contracting officer procedures.

Upon receipt of an allegation of research misconduct by referral under § 733.7, the contracting officer should, by notification of the contractor or financial assistance recipient:

(a) Require the contractor or the financial assistance recipient to act on the allegation consistent with the Research Misconduct requirements in the contract or financial assistance award to which the allegation pertains; or

(b) In the event the contractor or the financial assistance recipient is unable to act:

(1) Designate an appropriate DOE program to conduct an investigation to develop a complete factual record and an examination of such record leading to either a finding of research misconduct and an identification of appropriate remedies or a determination that no further action is warranted; and

(2) Make the appropriate findings consistent with the Research Misconduct requirements contained in the contract or financial assistance award, in order to act in lieu of the contractor or financial assistance recipient.

PART 745—PROTECTION OF HUMAN SUBJECTS

Sec.

745.101 To what does this policy apply?

745.102 Definitions.

745.103 Assuring compliance with this policy—research conducted or supported by any Federal department or agency.

745.104–745.106 [Reserved]

745.107 IRB membership.

745.108 IRB functions and operations.

745.109 IRB review of research.

10 CFR Ch. III (1–1–16 Edition)

745.110 Expedited review procedures for certain kinds of research involving no more than minimal risk, and for minor changes in approved research.

745.111 Criteria for IRB approval of research.

745.112 Review by institution.

745.113 Suspension or termination of IRB approval of research.

745.114 Cooperative research.

745.115 IRB records.

745.116 General requirements for informed consent.

745.117 Documentation of informed consent.

745.118 Applications and proposals lacking definite plans for involvement of human subjects.

745.119 Research undertaken without the intention of involving human subjects.

745.120 Evaluation and disposition of applications and proposals for research to be conducted or supported by a Federal department or agency.

745.121 [Reserved]

745.122 Use of Federal funds.

745.123 Early termination of research support: Evaluation of applications and proposals.

745.124 Conditions.

AUTHORITY: 5 U.S.C. 301; 42 U.S.C. 7254; 42 U.S.C. 300v–1(b).

SOURCE: 56 FR 28012, 28018, June 18, 1991, unless otherwise noted.

§ 745.101 To what does this policy apply?

(a) Except as provided in paragraph (b) of this section, this policy applies to all research involving human subjects conducted, supported or otherwise subject to regulation by any federal department or agency which takes appropriate administrative action to make the policy applicable to such research. This includes research conducted by federal civilian employees or military personnel, except that each department or agency head may adopt such procedural modifications as may be appropriate from an administrative standpoint. It also includes research conducted, supported, or otherwise subject to regulation by the federal government outside the United States.

(1) Research that is conducted or supported by a federal department or agency, whether or not it is regulated as defined in § 745.102(e), must comply with all sections of this policy.

(2) Research that is neither conducted nor supported by a federal department or agency but is subject to

Department of Energy

§ 745.101

regulation as defined in § 745.102(e) must be reviewed and approved, in compliance with § 745.101, § 745.102 and § 745.107 through § 745.101 of this policy, by an institutional review board (IRB) that operates in accordance with the pertinent requirements of this policy.

(b) Unless otherwise required by department or agency heads, research activities in which the only involvement of human subjects will be in one or more of the following categories are exempt from this policy:

(1) Research conducted in established or commonly accepted educational settings, involving normal educational practices, such as (i) research on regular and special education instructional strategies, or (ii) research on the effectiveness of or the comparison among instructional techniques, curricula, or classroom management methods.

(2) Research involving the use of educational tests (cognitive, diagnostic, aptitude, achievement), survey procedures, interview procedures or observation of public behavior, unless:

(i) Information obtained is recorded in such a manner that human subjects can be identified, directly or through identifiers linked to the subjects; and (ii) any disclosure of the human subjects' responses outside the research could reasonably place the subjects at risk of criminal or civil liability or be damaging to the subjects' financial standing, employability, or reputation.

(3) Research involving the use of educational tests (cognitive, diagnostic, aptitude, achievement), survey procedures, interview procedures, or observation of public behavior that is not exempt under paragraph (b)(2) of this section, if:

(i) The human subjects are elected or appointed public officials or candidates for public office; or (ii) federal statute(s) require(s) without exception that the confidentiality of the personally identifiable information will be maintained throughout the research and thereafter.

(4) Research, involving the collection or study of existing data, documents, records, pathological specimens, or diagnostic specimens, if these sources are publicly available or if the information is recorded by the investigator in such

a manner that subjects cannot be identified, directly or through identifiers linked to the subjects.

(5) Research and demonstration projects which are conducted by or subject to the approval of department or agency heads, and which are designed to study, evaluate, or otherwise examine:

(i) Public benefit or service programs;

(ii) Procedures for obtaining benefits or services under those programs;

(iii) Possible changes in or alternatives to those programs or procedures; or

(iv) Possible changes in methods or levels of payment for benefits or services under those programs.

(6) Taste and food quality evaluation and consumer acceptance studies, (i) if wholesome foods without additives are consumed or (ii) if a food is consumed that contains a food ingredient at or below the level and for a use found to be safe, or agricultural chemical or environmental contaminant at or below the level found to be safe, by the Food and Drug Administration or approved by the Environmental Protection Agency or the Food Safety and Inspection Service of the U.S. Department of Agriculture.

(c) Department or agency heads retain final judgment as to whether a particular activity is covered by this policy.

(d) Department or agency heads may require that specific research activities or classes of research activities conducted, supported, or otherwise subject to regulation by the department or agency but not otherwise covered by this policy, comply with some or all of the requirements of this policy.

(e) Compliance with this policy requires compliance with pertinent federal laws or regulations which provide additional protections for human subjects.

(f) This policy does not affect any state or local laws or regulations which may otherwise be applicable and which provide additional protections for human subjects.

(g) This policy does not affect any foreign laws or regulations which may

otherwise be applicable and which provide additional protections to human subjects of research.

(h) When research covered by this policy takes place in foreign countries, procedures normally followed in the foreign countries to protect human subjects may differ from those set forth in this policy. [An example is a foreign institution which complies with guidelines consistent with the World Medical Assembly Declaration (Declaration of Helsinki amended 1989) issued either by sovereign states or by an organization whose function for the protection of human research subjects is internationally recognized.] In these circumstances, if a department or agency head determines that the procedures prescribed by the institution afford protections that are at least equivalent to those provided in this policy, the department or agency head may approve the substitution of the foreign procedures in lieu of the procedural requirements provided in this policy. Except when otherwise required by statute, Executive Order, or the department or agency head, notices of these actions as they occur will be published in the FEDERAL REGISTER or will be otherwise published as provided in department or agency procedures.

(i) Unless otherwise required by law, department or agency heads may waive the applicability of some or all of the provisions of this policy to specific research activities or classes of research activities otherwise covered by this policy. Except when otherwise required by statute or Executive Order, the department or agency head shall forward advance notices of these actions to the Office for Human Research Protections, Department of Health and Human Services (HHS), or any successor office, and shall also publish them in the FEDERAL REGISTER or in such other manner as provided in department or agency procedures.¹

[56 FR 28012, 28018, June 18, 1991; 56 FR 29756, June 28, 1991, as amended at 70 FR 36328, June 23, 2005]

¹Institutions with HHS-approved assurances on file will abide by provisions of title 45 CFR part 46 subparts A-D. Some of the other Departments and Agencies have incorporated all provisions of title 45 CFR part 46

§ 745.102 Definitions.

(a) *Department or agency head* means the head of any federal department or agency and any other officer or employee of any department or agency to whom authority has been delegated.

(b) *Institution* means any public or private entity or agency (including federal, state, and other agencies).

(c) *Legally authorized representative* means an individual or judicial or other body authorized under applicable law to consent on behalf of a prospective subject to the subject's participation in the procedure(s) involved in the research.

(d) *Research* means a systematic investigation, including research development, testing and evaluation, designed to develop or contribute to generalizable knowledge. Activities which meet this definition constitute research for purposes of this policy, whether or not they are conducted or supported under a program which is considered research for other purposes. For example, some demonstration and service programs may include research activities.

(e) *Research subject to regulation*, and similar terms are intended to encompass those research activities for which a federal department or agency has specific responsibility for regulating as a research activity, (for example, Investigational New Drug requirements administered by the Food and Drug Administration). It does not include research activities which are incidentally regulated by a federal department or agency solely as part of the department's or agency's broader responsibility to regulate certain types of activities whether research or non-research in nature (for example, Wage and Hour requirements administered by the Department of Labor).

into their policies and procedures as well. However, the exemptions at 45 CFR 46.101(b) do not apply to research involving prisoners, subpart C. The exemption at 45 CFR 46.101(b)(2), for research involving survey or interview procedures or observation of public behavior, does not apply to research with children, subpart D, except for research involving observations of public behavior when the investigator(s) do not participate in the activities being observed.

(f) *Human subject* means a living individual about whom an investigator (whether professional or student) conducting research obtains

(1) Data through intervention or interaction with the individual, or

(2) Identifiable private information.

Intervention includes both physical procedures by which data are gathered (for example, venipuncture) and manipulations of the subject or the subject's environment that are performed for research purposes. Interaction includes communication or interpersonal contact between investigator and subject. "Private information" includes information about behavior that occurs in a context in which an individual can reasonably expect that no observation or recording is taking place, and information which has been provided for specific purposes by an individual and which the individual can reasonably expect will not be made public (for example, a medical record). Private information must be individually identifiable (i.e., the identity of the subject is or may readily be ascertained by the investigator or associated with the information) in order for obtaining the information to constitute research involving human subjects.

(g) *IRB* means an institutional review board established in accord with and for the purposes expressed in this policy.

(h) *IRB approval* means the determination of the IRB that the research has been reviewed and may be conducted at an institution within the constraints set forth by the IRB and by other institutional and federal requirements.

(i) *Minimal risk* means that the probability and magnitude of harm or discomfort anticipated in the research are not greater in and of themselves than those ordinarily encountered in daily life or during the performance of routine physical or psychological examinations or tests.

(j) *Certification* means the official notification by the institution to the supporting department or agency, in accordance with the requirements of this policy, that a research project or activity involving human subjects has been reviewed and approved by an IRB in accordance with an approved assurance.

§ 745.103 Assuring compliance with this policy—research conducted or supported by any Federal department or agency.

(a) Each institution engaged in research which is covered by this policy and which is conducted or supported by a federal department or agency shall provide written assurance satisfactory to the department or agency head that it will comply with the requirements set forth in this policy. In lieu of requiring submission of an assurance, individual department or agency heads shall accept the existence of a current assurance, appropriate for the research in question, on file with the Office for Human Research Protections, HHS, or any successor office, and approved for Federal wide use by that office. When the existence of an HHS-approved assurance is accepted in lieu of requiring submission of an assurance, reports (except certification) required by this policy to be made to department and agency heads shall also be made to the Office for Human Research Protections, HHS, or any successor office.

(b) Departments and agencies will conduct or support research covered by this policy only if the institution has an assurance approved as provided in this section, and only if the institution has certified to the department or agency head that the research has been reviewed and approved by an IRB provided for in the assurance, and will be subject to continuing review by the IRB. Assurances applicable to federally supported or conducted research shall at a minimum include:

(1) A statement of principles governing the institution in the discharge of its responsibilities for protecting the rights and welfare of human subjects of research conducted at or sponsored by the institution, regardless of whether the research is subject to federal regulation. This may include an appropriate existing code, declaration, or statement of ethical principles, or a statement formulated by the institution itself. This requirement does not preempt provisions of this policy applicable to department- or agency-supported or regulated research and need not be applicable to any research exempted or waived under § 745.101 (b) or (i).

(2) Designation of one or more IRBs established in accordance with the requirements of this policy, and for which provisions are made for meeting space and sufficient staff to support the IRB's review and recordkeeping duties.

(3) A list of IRB members identified by name; earned degrees; representative capacity; indications of experience such as board certifications, licenses, etc., sufficient to describe each member's chief anticipated contributions to IRB deliberations; and any employment or other relationship between each member and the institution; for example: full-time employee, part-time employee, member of governing panel or board, stockholder, paid or unpaid consultant. Changes in IRB membership shall be reported to the department or agency head, unless in accord with § 745.103(a) of this policy, the existence of an HHS-approved assurance is accepted. In this case, change in IRB membership shall be reported to the Office for Human Research Protections, HHS, or any successor office.

(4) Written procedures which the IRB will follow (i) for conducting its initial and continuing review of research and for reporting its findings and actions to the investigator and the institution; (ii) for determining which projects require review more often than annually and which projects need verification from sources other than the investigators that no material changes have occurred since previous IRB review; and (iii) for ensuring prompt reporting to the IRB of proposed changes in a research activity, and for ensuring that such changes in approved research, during the period for which IRB approval has already been given, may not be initiated without IRB review and approval except when necessary to eliminate apparent immediate hazards to the subject.

(5) Written procedures for ensuring prompt reporting to the IRB, appropriate institutional officials, and the department or agency head of (i) any unanticipated problems involving risks to subjects or others or any serious or continuing noncompliance with this policy or the requirements or determinations of the IRB and (ii) any sus-

pension or termination of IRB approval.

(c) The assurance shall be executed by an individual authorized to act for the institution and to assume on behalf of the institution the obligations imposed by this policy and shall be filed in such form and manner as the department or agency head prescribes.

(d) The department or agency head will evaluate all assurances submitted in accordance with this policy through such officers and employees of the department or agency and such experts or consultants engaged for this purpose as the department or agency head determines to be appropriate. The department or agency head's evaluation will take into consideration the adequacy of the proposed IRB in light of the anticipated scope of the institution's research activities and the types of subject populations likely to be involved, the appropriateness of the proposed initial and continuing review procedures in light of the probable risks, and the size and complexity of the institution.

(e) On the basis of this evaluation, the department or agency head may approve or disapprove the assurance, or enter into negotiations to develop an approvable one. The department or agency head may limit the period during which any particular approved assurance or class of approved assurances shall remain effective or otherwise condition or restrict approval.

(f) Certification is required when the research is supported by a federal department or agency and not otherwise exempted or waived under § 745.101 (b) or (i). An institution with an approved assurance shall certify that each application or proposal for research covered by the assurance and by § 745.103 of this Policy has been reviewed and approved by the IRB. Such certification must be submitted with the application or proposal or by such later date as may be prescribed by the department or agency to which the application or proposal is submitted. Under no condition shall research covered by § 745.103 of the Policy be supported prior to receipt of the certification that the research has been reviewed and approved by the IRB. Institutions without an approved assurance covering the research shall certify within 30 days after receipt of a request

Department of Energy

§ 745.109

for such a certification from the department or agency, that the application or proposal has been approved by the IRB. If the certification is not submitted within these time limits, the application or proposal may be returned to the institution.

(Approved by the Office of Management and Budget under Control Number 0990-0260)

[56 FR 28012, 28018, June 18, 1991; 56 FR 29756, June 28, 1991, as amended at 70 FR 36328, June 23, 2005]

§§ 745.104–745.106 [Reserved]

§ 745.107 IRB membership.

(a) Each IRB shall have at least five members, with varying backgrounds to promote complete and adequate review of research activities commonly conducted by the institution. The IRB shall be sufficiently qualified through the experience and expertise of its members, and the diversity of the members, including consideration of race, gender, and cultural backgrounds and sensitivity to such issues as community attitudes, to promote respect for its advice and counsel in safeguarding the rights and welfare of human subjects. In addition to possessing the professional competence necessary to review specific research activities, the IRB shall be able to ascertain the acceptability of proposed research in terms of institutional commitments and regulations, applicable law, and standards of professional conduct and practice. The IRB shall therefore include persons knowledgeable in these areas. If an IRB regularly reviews research that involves a vulnerable category of subjects, such as children, prisoners, pregnant women, or handicapped or mentally disabled persons, consideration shall be given to the inclusion of one or more individuals who are knowledgeable about and experienced in working with these subjects.

(b) Every nondiscriminatory effort will be made to ensure that no IRB consists entirely of men or entirely of women, including the institution's consideration of qualified persons of both sexes, so long as no selection is made to the IRB on the basis of gender. No IRB may consist entirely of members of one profession.

(c) Each IRB shall include at least one member whose primary concerns are in scientific areas and at least one member whose primary concerns are in nonscientific areas.

(d) Each IRB shall include at least one member who is not otherwise affiliated with the institution and who is not part of the immediate family of a person who is affiliated with the institution.

(e) No IRB may have a member participate in the IRB's initial or continuing review of any project in which the member has a conflicting interest, except to provide information requested by the IRB.

(f) An IRB may, in its discretion, invite individuals with competence in special areas to assist in the review of issues which require expertise beyond or in addition to that available on the IRB. These individuals may not vote with the IRB.

§ 745.108 IRB functions and operations.

In order to fulfill the requirements of this policy each IRB shall:

(a) Follow written procedures in the same detail as described in § 745.103(b)(4) and, to the extent required by, § 745.103(b)(5).

(b) Except when an expedited review procedure is used (see § 745.110), review proposed research at convened meetings at which a majority of the members of the IRB are present, including at least one member whose primary concerns are in nonscientific areas. In order for the research to be approved, it shall receive the approval of a majority of those members present at the meeting.

§ 745.109 IRB review of research.

(a) An IRB shall review and have authority to approve, require modifications in (to secure approval), or disapprove all research activities covered by this policy.

(b) An IRB shall require that information given to subjects as part of informed consent is in accordance with § 745.116. The IRB may require that information, in addition to that specifically mentioned in § 745.116, be given to

§ 745.110

10 CFR Ch. III (1–1–16 Edition)

the subjects when in the IRB's judgment the information would meaningfully add to the protection of the rights and welfare of subjects.

(c) An IRB shall require documentation of informed consent or may waive documentation in accordance with § 745.117.

(d) An IRB shall notify investigators and the institution in writing of its decision to approve or disapprove the proposed research activity, or of modifications required to secure IRB approval of the research activity. If the IRB decides to disapprove a research activity, it shall include in its written notification a statement of the reasons for its decision and give the investigator an opportunity to respond in person or in writing.

(e) An IRB shall conduct continuing review of research covered by this policy at intervals appropriate to the degree of risk, but not less than once per year, and shall have authority to observe or have a third party observe the consent process and the research.

(Approved by the Office of Management and Budget under Control Number 0990-0260)

[56 FR 28012, 28018, June 18, 1991, as amended at 70 FR 36328, June 23, 2005]

§ 745.110 Expedited review procedures for certain kinds of research involving no more than minimal risk, and for minor changes in approved research.

(a) The Secretary, HHS, has established, and published as a Notice in the FEDERAL REGISTER, a list of categories of research that may be reviewed by the IRB through an expedited review procedure. The list will be amended, as appropriate after consultation with other departments and agencies, through periodic republication by the Secretary, HHS, in the FEDERAL REGISTER. A copy of the list is available from the Office for Human Research Protections, HHS, or any successor of office.

(b) An IRB may use the expedited review procedure to review either or both of the following:

(1) Some or all of the research appearing on the list and found by the reviewer(s) to involve no more than minimal risk,

(2) Minor changes in previously approved research during the period (of one year or less) for which approval is authorized.

Under an expedited review procedure, the review may be carried out by the IRB chairperson or by one or more experienced reviewers designated by the chairperson from among members of the IRB. In reviewing the research, the reviewers may exercise all of the authorities of the IRB except that the reviewers may not disapprove the research. A research activity may be disapproved only after review in accordance with the non-expedited procedure set forth in § 745.108(b).

(c) Each IRB which uses an expedited review procedure shall adopt a method for keeping all members advised of research proposals which have been approved under the procedure.

(d) The department or agency head may restrict, suspend, terminate, or choose not to authorize an institution's or IRB's use of the expedited review procedure.

[56 FR 28012, 28018, June 18, 1991, as amended at 70 FR 36328, June 23, 2005]

§ 745.111 Criteria for IRB approval of research.

(a) In order to approve research covered by this policy the IRB shall determine that all of the following requirements are satisfied:

(1) Risks to subjects are minimized: (i) By using procedures which are consistent with sound research design and which do not unnecessarily expose subjects to risk, and (ii) whenever appropriate, by using procedures already being performed on the subjects for diagnostic or treatment purposes.

(2) Risks to subjects are reasonable in relation to anticipated benefits, if any, to subjects, and the importance of the knowledge that may reasonably be expected to result. In evaluating risks and benefits, the IRB should consider only those risks and benefits that may result from the research (as distinguished from risks and benefits of therapies subjects would receive even if not participating in the research). The IRB should not consider possible long-range effects of applying knowledge gained in the research (for example,

Department of Energy

§ 745.115

the possible effects of the research on public policy) as among those research risks that fall within the purview of its responsibility.

(3) Selection of subjects is equitable. In making this assessment the IRB should take into account the purposes of the research and the setting in which the research will be conducted and should be particularly cognizant of the special problems of research involving vulnerable populations, such as children, prisoners, pregnant women, mentally disabled persons, or economically or educationally disadvantaged persons.

(4) Informed consent will be sought from each prospective subject or the subject's legally authorized representative, in accordance with, and to the extent required by § 745.116.

(5) Informed consent will be appropriately documented, in accordance with, and to the extent required by § 745.117.

(6) When appropriate, the research plan makes adequate provision for monitoring the data collected to ensure the safety of subjects.

(7) When appropriate, there are adequate provisions to protect the privacy of subjects and to maintain the confidentiality of data.

(b) When some or all of the subjects are likely to be vulnerable to coercion or undue influence, such as children, prisoners, pregnant women, mentally disabled persons, or economically or educationally disadvantaged persons, additional safeguards have been included in the study to protect the rights and welfare of these subjects.

§ 745.112 Review by institution.

Research covered by this policy that has been approved by an IRB may be subject to further appropriate review and approval or disapproval by officials of the institution. However, those officials may not approve the research if it has not been approved by an IRB.

§ 745.113 Suspension or termination of IRB approval of research.

An IRB shall have authority to suspend or terminate approval of research that is not being conducted in accordance with the IRB's requirements or that has been associated with unex-

pected serious harm to subjects. Any suspension or termination of approval shall include a statement of the reasons for the IRB's action and shall be reported promptly to the investigator, appropriate institutional officials, and the department or agency head.

(Approved by the Office of Management and Budget under Control Number 0990-0260)

[56 FR 28012, 28018, June 18, 1991, as amended at 70 FR 36328, June 23, 2005]

§ 745.114 Cooperative research.

Cooperative research projects are those projects covered by this policy which involve more than one institution. In the conduct of cooperative research projects, each institution is responsible for safeguarding the rights and welfare of human subjects and for complying with this policy. With the approval of the department or agency head, an institution participating in a cooperative project may enter into a joint review arrangement, rely upon the review of another qualified IRB, or make similar arrangements for avoiding duplication of effort.

§ 745.115 IRB records.

(a) An institution, or when appropriate an IRB, shall prepare and maintain adequate documentation of IRB activities, including the following:

(1) Copies of all research proposals reviewed, scientific evaluations, if any, that accompany the proposals, approved sample consent documents, progress reports submitted by investigators, and reports of injuries to subjects.

(2) Minutes of IRB meetings which shall be in sufficient detail to show attendance at the meetings; actions taken by the IRB; the vote on these actions including the number of members voting for, against, and abstaining; the basis for requiring changes in or disapproving research; and a written summary of the discussion of controverted issues and their resolution.

(3) Records of continuing review activities.

(4) Copies of all correspondence between the IRB and the investigators.

(5) A list of IRB members in the same detail as described in § 745.103(b)(3).

§745.116

10 CFR Ch. III (1–1–16 Edition)

(6) Written procedures for the IRB in the same detail as described in §745.103(b)(4) and §745.103(b)(5).

(7) Statements of significant new findings provided to subjects, as required by §745.116(b)(5).

(b) The records required by this policy shall be retained for at least 3 years, and records relating to research which is conducted shall be retained for at least 3 years after completion of the research. All records shall be accessible for inspection and copying by authorized representatives of the department or agency at reasonable times and in a reasonable manner.

(Approved by the Office of Management and Budget under Control Number 0990–0260)

[56 FR 28012, 28018, June 18, 1991, as amended at 70 FR 36328, June 23, 2005]

§745.116 General requirements for informed consent.

Except as provided elsewhere in this policy, no investigator may involve a human being as a subject in research covered by this policy unless the investigator has obtained the legally effective informed consent of the subject or the subject's legally authorized representative. An investigator shall seek such consent only under circumstances that provide the prospective subject or the representative sufficient opportunity to consider whether or not to participate and that minimize the possibility of coercion or undue influence. The information that is given to the subject or the representative shall be in language understandable to the subject or the representative. No informed consent, whether oral or written, may include any exculpatory language through which the subject or the representative is made to waive or appear to waive any of the subject's legal rights, or releases or appears to release the investigator, the sponsor, the institution or its agents from liability for negligence.

(a) *Basic elements of informed consent.* Except as provided in paragraph (c) or (d) of this section, in seeking informed consent the following information shall be provided to each subject:

(1) A statement that the study involves research, an explanation of the purposes of the research and the expected duration of the subject's partici-

pation, a description of the procedures to be followed, and identification of any procedures which are experimental;

(2) A description of any reasonably foreseeable risks or discomforts to the subject;

(3) A description of any benefits to the subject or to others which may reasonably be expected from the research;

(4) A disclosure of appropriate alternative procedures or courses of treatment, if any, that might be advantageous to the subject;

(5) A statement describing the extent, if any, to which confidentiality of records identifying the subject will be maintained;

(6) For research involving more than minimal risk, an explanation as to whether any compensation and an explanation as to whether any medical treatments are available if injury occurs and, if so, what they consist of, or where further information may be obtained;

(7) An explanation of whom to contact for answers to pertinent questions about the research and research subjects' rights, and whom to contact in the event of a research-related injury to the subject; and

(8) A statement that participation is voluntary, refusal to participate will involve no penalty or loss of benefits to which the subject is otherwise entitled, and the subject may discontinue participation at any time without penalty or loss of benefits to which the subject is otherwise entitled.

(b) Additional elements of informed consent. When appropriate, one or more of the following elements of information shall also be provided to each subject:

(1) A statement that the particular treatment or procedure may involve risks to the subject (or to the embryo or fetus, if the subject is or may become pregnant) which are currently unforeseeable;

(2) Anticipated circumstances under which the subject's participation may be terminated by the investigator without regard to the subject's consent;

(3) Any additional costs to the subject that may result from participation in the research;

(4) The consequences of a subject's decision to withdraw from the research and procedures for orderly termination of participation by the subject;

(5) A statement that significant new findings developed during the course of the research which may relate to the subject's willingness to continue participation will be provided to the subject; and

(6) The approximate number of subjects involved in the study.

(c) An IRB may approve a consent procedure which does not include, or which alters, some or all of the elements of informed consent set forth above, or waive the requirement to obtain informed consent provided the IRB finds and documents that:

(1) The research or demonstration project is to be conducted by or subject to the approval of state or local government officials and is designed to study, evaluate, or otherwise examine: (i) Public benefit of service programs; (ii) procedures for obtaining benefits or services under those programs; (iii) possible changes in or alternatives to those programs or procedures; or (iv) possible changes in methods or levels of payment for benefits or services under those programs; and

(2) The research could not practicably be carried out without the waiver or alteration.

(d) An IRB may approve a consent procedure which does not include, or which alters, some or all of the elements of informed consent set forth in this section, or waive the requirements to obtain informed consent provided the IRB finds and documents that:

(1) The research involves no more than minimal risk to the subjects;

(2) The waiver or alteration will not adversely affect the rights and welfare of the subjects;

(3) The research could not practicably be carried out without the waiver or alteration; and

(4) Whenever appropriate, the subjects will be provided with additional pertinent information after participation.

(e) The informed consent requirements in this policy are not intended to preempt any applicable federal, state, or local laws which require additional information to be disclosed in

order for informed consent to be legally effective.

(f) Nothing in this policy is intended to limit the authority of a physician to provide emergency medical care, to the extent the physician is permitted to do so under applicable federal, state, or local law.

(Approved by the Office of Management and Budget under Control Number 0990-0260)

[56 FR 28012, 28018, June 18, 1991, as amended at 70 FR 36328, June 23, 2005]

§ 745.117 Documentation of informed consent.

(a) Except as provided in paragraph (c) of this section, informed consent shall be documented by the use of a written consent form approved by the IRB and signed by the subject or the subject's legally authorized representative. A copy shall be given to the person signing the form.

(b) Except as provided in paragraph (c) of this section, the consent form may be either of the following:

(1) A written consent document that embodies the elements of informed consent required by § 745.116. This form may be read to the subject or the subject's legally authorized representative, but in any event, the investigator shall give either the subject or the representative adequate opportunity to read it before it is signed; or

(2) A short form written consent document stating that the elements of informed consent required by § 745.116 have been presented orally to the subject or the subject's legally authorized representative. When this method is used, there shall be a witness to the oral presentation. Also, the IRB shall approve a written summary of what is to be said to the subject or the representative. Only the short form itself is to be signed by the subject or the representative. However, the witness shall sign both the short form and a copy of the summary, and the person actually obtaining consent shall sign a copy of the summary. A copy of the summary shall be given to the subject or the representative, in addition to a copy of the short form.

(c) An IRB may waive the requirement for the investigator to obtain a signed consent form for some or all subjects if it finds either:

§ 745.118

(1) That the only record linking the subject and the research would be the consent document and the principal risk would be potential harm resulting from a breach of confidentiality. Each subject will be asked whether the subject wants documentation linking the subject with the research, and the subject's wishes will govern; or

(2) That the research presents no more than minimal risk of harm to subjects and involves no procedures for which written consent is normally required outside of the research context.

In cases in which the documentation requirement is waived, the IRB may require the investigator to provide subjects with a written statement regarding the research.

(Approved by the Office of Management and Budget under Control Number 0990-0260)

[56 FR 28012, 28018, June 18, 1991, as amended at 70 FR 36328, June 23, 2005]

§ 745.118 Applications and proposals lacking definite plans for involvement of human subjects.

Certain types of applications for grants, cooperative agreements, or contracts are submitted to departments or agencies with the knowledge that subjects may be involved within the period of support, but definite plans would not normally be set forth in the application or proposal. These include activities such as institutional type grants when selection of specific projects is the institution's responsibility; research training grants in which the activities involving subjects remain to be selected; and projects in which human subjects' involvement will depend upon completion of instruments, prior animal studies, or purification of compounds. These applications need not be reviewed by an IRB before an award may be made. However, except for research exempted or waived under § 745.101 (b) or (i), no human subjects may be involved in any project supported by these awards until the project has been reviewed and approved by the IRB, as provided in this policy, and certification submitted, by the institution, to the department or agency.

10 CFR Ch. III (1-1-16 Edition)

§ 745.119 Research undertaken without the intention of involving human subjects.

In the event research is undertaken without the intention of involving human subjects, but it is later proposed to involve human subjects in the research, the research shall first be reviewed and approved by an IRB, as provided in this policy, a certification submitted, by the institution, to the department or agency, and final approval given to the proposed change by the department or agency.

§ 745.120 Evaluation and disposition of applications and proposals for research to be conducted or supported by a Federal department or agency.

The department or agency head will evaluate all applications and proposals involving human subjects submitted to the department or agency through such officers and employees of the department or agency and such experts and consultants as the department or agency head determines to be appropriate. This evaluation will take into consideration the risks to the subjects, the adequacy of protection against these risks, the potential benefits of the research to the subjects and others, and the importance of the knowledge gained or to be gained.

(b) On the basis of this evaluation, the department or agency head may approve or disapprove the application or proposal, or enter into negotiations to develop an approvable one.

§ 745.121 [Reserved]

§ 745.122 Use of Federal funds.

Federal funds administered by a department or agency may not be expended for research involving human subjects unless the requirements of this policy have been satisfied.

§ 745.123 Early termination of research support: Evaluation of applications and proposals.

(a) The department or agency head may require that department or agency support for any project be terminated or suspended in the manner prescribed in applicable program requirements, when the department or agency head finds an institution has materially

Department of Energy

§ 760.1

failed to comply with the terms of this policy.

(b) In making decisions about supporting or approving applications or proposals covered by this policy the department or agency head may take into account, in addition to all other eligibility requirements and program criteria, factors such as whether the applicant has been subject to a termination or suspension under paragraph (a) of this section and whether the applicant or the person or persons who would direct or has have directed the scientific and technical aspects of an activity has have, in the judgment of the department or agency head, materially failed to discharge responsibility for the protection of the rights and welfare of human subjects (whether or not the research was subject to Federal regulation).

§ 745.124 Conditions.

With respect to any research project or any class of research projects the department or agency head may impose additional conditions prior to or at the time of approval when in the judgment of the department or agency head additional conditions are necessary for the protection of human subjects.

PART 760—DOMESTIC URANIUM PROGRAM

§ 760.1 Uranium leases on lands controlled by DOE. (Domestic Uranium Program Circular No. 760.1, formerly (AEC) Domestic Uranium Program Circular 8, 10 CFR 60.8).

(a) *What this section does.* This section sets forth regulations governing the issuance of leases to permit the exploration for and mining of deposits containing uranium in public lands withdrawn from entry and location under the general mining laws for use of DOE, and in certain other lands under DOE control.

(b) *Statutory authority.* The Atomic Energy Act of 1954, as amended (68 Stat. 919, 42 U.S.C. 2011 *et seq.*) is the authority for this section.

(c) *Who may hold leases.* Only parties who are (1) citizens of the United States; (2) associations of such citizens; or (3) corporations organized under the laws of the United States or territories

thereof, are eligible lessees under this section. Persons under 21 years of age or employees of DOE are not eligible.

(d) *Issuance of leases through competitive bidding.* Except under special circumstances as provided in paragraph (u) of this section, each lease will be offered through competitive bidding and, except as otherwise provided in this paragraph (d), will be issued to the acceptable bidder offering the highest bid. The bid may be on a cash bonus, royalty bonus, or other basis as specified in the invitation to bid. Invitations to bid on some of the lands may be limited to small business concerns as defined by the Small Business Administration, and such invitations may limit the number of leases to be awarded to each bidder. In such cases DOE will accept those bids which, in relation to other bids received pursuant to the invitation, are most advantageous to the Government. Before any lease is awarded, DOE may require high bidders to submit a detailed statement of the facts as to such matters as their experience, organization, and financial resources. DOE reserves the right to reject any and all bids.

(e) *Solicitation of bids.* Announcements of the availability of invitations to bid for a lease will be publicly posted and published. Copies of such announcements will also be mailed to parties who submit to DOE's Grand Junction, Colorado, Office subsequent to publication in the FEDERAL REGISTER of this (DOE) Domestic Uranium Program Circular 760.1, written requests that their names be placed on a mailing list for receipt of such announcements. The invitations containing information for preparation and submission of bids will be available at the Grand Junction Office, and will be mailed only on specific written request, following announcement of their availability. Invitations will specify the land to be leased, the basis on which bids are to be submitted, the amount of the monetary deposit which must be transmitted with the bid, the place and time the bids will be publicly opened, the term, royalty and other payments, performance requirements, and other payments, performance requirements, and other conditions which will become a part of the lease.

In addition, data which have been assembled pertaining to the lands to be leased will be available for public inspection at the Grand Junction Office; copies will also be available for purchase.

(f) *Bidding requirements; deposits.* All bids must be filed at the place and prior to the time set forth in the invitation. Each bid must be sealed and accompanied by a deposit, in the form of a certified check, cashier's check, or bank draft, in an amount as specified in the invitation to bid. Deposits of unsuccessful bidders will be returned. If the bidder is an individual, he must submit with his bid a statement of his citizenship and age. If the bidder is an association (including a partnership), the bid shall be accompanied by a certified copy of the articles of association together with a statement as to the citizenship and age of its members. If the bidder is a corporation, evidence that the officer signing the bid had authority to do so and a statement as to the State of incorporation shall also be submitted.

(g) *Awarding of lease.* Following public opening of the bids, DOE, subject to the right to reject any and all bids, will determine the successful bidder. In the event the highest acceptable bids are tie bids, a public drawing will be held by DOE to determine the successful bidder. After notice of award and within the time period prescribed in the invitation, the successful bidder shall execute and return to DOE three (3) copies of the lease and shall remit payments due as prescribed in the invitation. Should the successful bidder fail to execute the lease, or make payments as required, in accordance with the terms of the invitation, or fail to otherwise comply with applicable regulations, he may be required to forfeit any payments previously made, and lose any further right or interest in the lease. In such event, DOE may offer the lease to the next highest acceptable bidder, reoffer the lease for bidding, or take such other action as appropriate. If the awarded lease is executed by the bidder through an agent, evidence of authorization must be submitted.

(h) *Dating of lease.* A lease issued under this section will ordinarily be ef-

fective as of the date it is signed on behalf of DOE.

(i) *Term of lease.* A lease shall be for the period specified in the invitation to bid. When deemed desirable by DOE, the lease will provide that the lease term may be extended at the option of the lessee for a specified period and upon stipulated conditions.

(j) *Payments to DOE under lease.* Royalty payments shall be specified in the invitation to bid; base royalty, minimum royalty, advance royalty, and rental payments, or a combination thereof may be required.

(k) *Title to unshipped ore.* DOE, unless it approves otherwise, reserves all right and title to property in and to all ores and other uranium- or vanadium-bearing material not removed from the leased premises within 60 days after expiration or other termination of the lease. Unless DOE approves otherwise, all material mined from the leased premises and not marketed by the lessee shall remain on the leased premises.

(l) *Environmental controls.* Each lease will contain such provisions as may be deemed necessary by DOE with respect to the lessee's use of the leased lands. DOE may require periodic submission of plans for exploration and mining activities including provisions for control of environmental impact. The lessee will be required to conduct operations so as to minimize adverse environmental effects, to comply with all applicable State and Federal statutes and regulations and to the extent stipulated in the lease agreement, will be held responsible for maintenance or rehabilitation of affected areas in accordance with plans submitted to and approved by DOE.

(m) *Performance requirements.* A lease shall require that exploration, development, and mining activities, as appropriate, be conducted on the leased premises with reasonable diligence, skill, and care as required to achieve and maintain production of uranium ore at rates consistent with good and safe mining practice and with market conditions.

(n) *Health and safety requirements.* A lease (1) shall require that exploration, development, and mining activities, as appropriate, be conducted on the leased

premises with due regard for the health and safety of those involved, and (2) shall include appropriate measures for the control of radiation exposure in the mines.

(o) *Lessee's records.* Leases shall provide that the lessee keep and make available to DOE such records as DOE deems necessary for the administration of the lease and its leasing program.

(p) *Rights of DOE.* DOE reserves the right to enter upon the leased property and into all parts of the mine for inspection and other purposes. DOE also reserves the right to grant to other persons easements or rights of way upon, through, or in the leased premises. DOE and the Comptroller General of the United States or any of his duly authorized representatives shall, until the expiration of 3 years after termination or expiration of lease, have access to and the right to examine any directly pertinent books, papers, and records of the lessee involving transactions related to the lease.

(q) *Relinquishment of leases.* A lease may be surrendered by the lessee upon filing with and approval by DOE of a written application for relinquishment. Approval of the application shall be contingent upon the delivery of the leased premises to DOE in a condition determined to be satisfactory to DOE. The lessee shall continue to be liable for the payment of all royalty and other debts due DOE.

(r) *Assignment of leases.* Any transfer of a lease or any interest therein or claim thereunder, will not be recognized unless and until approved by DOE in writing. Ordinarily, DOE will not approve any transfer of a lease which involves overriding royalties or deferred payments of any kind to the transferor.

(s) *Cancellation.* Any lease may be cancelled by DOE whenever the lessee fails to comply with the provisions of the lease. Failure of DOE to exercise its right to cancel shall not be deemed a waiver thereof.

(t) *Form of lease.* Leases will be issued on forms prescribed by DOE.

(u) *Noncompetitive leases.* Under special circumstances, where DOE believes it to be in the best interest of the Government, DOE at its discretion may

award or extend leases on the basis of negotiation.

(v) *DOE decisions.* All matters connected with the issuance and administration of leases will be determined by DOE whose decisions shall be final and conclusive.

(w) *Definitions.* DOE as used in this section means the United States Department of Energy or its duly authorized representative or representatives.

(x) *Multiple use of land.* Leases issued under this section shall provide that operations under them will be conducted so as not to interfere with the lawful operations of any third party having a lease, permit, easement, or other right or interest in the premises.

(y) *Compliance with State and Federal regulations.* Every lease shall provide that the lessee is required to comply with all applicable State and Federal statutes and regulations.

(Secs. 66, 161, 68 Stat. 933, 948, as amended; 42 U.S.C. 2096, 2201)

PART 765—REIMBURSEMENT FOR COSTS OF REMEDIAL ACTION AT ACTIVE URANIUM AND THORIUM PROCESSING SITES

Subpart A—General

- Sec.
- 765.1 Purpose.
- 765.2 Scope and applicability.
- 765.3 Definitions.

Subpart B—Reimbursement Criteria

- 765.10 Eligibility for reimbursement.
- 765.11 Reimbursable costs.
- 765.12 Inflation index adjustment procedures.

Subpart C—Procedures for Submitting and Processing Reimbursement Claims

- 765.20 Procedures for submitting reimbursement claims.
- 765.21 Procedures for processing reimbursement claims.
- 765.22 Appeals procedures.
- 765.23 Annual report.

Subpart D—Additional Reimbursement Procedures

- 765.30 Reimbursement of costs incurred in accordance with a plan for subsequent remedial action.

§ 765.1

765.31 Designation of funds available for subsequent remedial action.

765.32 Reimbursement of excess funds.

AUTHORITY: 42 U.S.C. 2296a *et seq.*

SOURCE: 59 FR 26726, May 23, 1994, unless otherwise noted.

Subpart A—General

§ 765.1 Purpose.

The provisions of this part establish regulatory requirements governing reimbursement for certain costs of remedial action at active uranium or thorium processing sites as specified by Subtitle A of Title X of the Energy Policy Act of 1992. These regulations are authorized by section 1002 of the Act (42 U.S.C. 2296a-1), which requires the Secretary to issue regulations governing the reimbursements.

§ 765.2 Scope and applicability.

(a) This part establishes policies, criteria, and procedures governing reimbursement of certain costs of remedial action incurred by licensees at active uranium or thorium processing sites as a result of byproduct material generated as an incident of sales to the United States.

(b) Costs of remedial action at active uranium or thorium processing sites are borne by persons licensed under section 62 or 81 of the Atomic Energy Act (42 U.S.C. 2092, 2111), either by NRC or an Agreement State pursuant to a counterpart to section 62 or 81 of the Atomic Energy Act, under State law, subject to the exceptions and limitations specified in this part.

(c) The Department shall, subject to the provisions specified in this part, reimburse a licensee, of an active uranium or thorium processing site for the portion of the costs of remedial action as are determined by the Department to be attributable to byproduct material generated as an incident of sales to the United States and either incurred by the licensee not later than December 31, 2007, or incurred by the licensee in accordance with a plan for subsequent remedial action approved by the Department.

(d) Costs of remedial action are reimbursable under Title X for decontamination, decommissioning, reclamation, and other remedial action,

10 CFR Ch. III (1-1-16 Edition)

provided that claims for reimbursement are supported by reasonable documentation as specified in subpart C of this part.

(e) Except as authorized by § 765.32, the total amount of reimbursement paid to any licensee of an active uranium processing site shall not exceed \$6.25 multiplied by the number of Federal-related dry short tons of byproduct material. This total amount shall be adjusted for inflation pursuant to section 765.12.

(f) The total amount of reimbursement paid to all active uranium processing site licensees shall not exceed \$350 million. This total amount shall be adjusted for inflation by applying the CPI-U, as provided by § 765.12.

(g) The total amount of reimbursement paid to the licensee of the active thorium processing site shall not exceed \$365 million, as adjusted for inflation by applying the CPI-U as provided by § 765.12.

(h) Reimbursement of licensees for costs of remedial action will only be made for costs that are supported by reasonable documentation as required by § 765.20 and claimed for reimbursement by a licensee in accordance with the procedures established by subpart C of this part.

(i) The \$715 million aggregate amount authorized to be appropriated under section 1003(a) of the Act (42 U.S.C. 2296a-2(a)) shall be adjusted for inflation by applying the CPI-U as provided by § 765.12, and shall be provided from the Fund.

[59 FR 26726, May 23, 1994, as amended at 68 FR 32957, June 3, 2003]

§ 765.3 Definitions.

For the purposes of this part, the following terms are defined as follows:

Active uranium or thorium processing site or active processing site means:

(1) Any uranium or thorium processing site, including the mill, containing byproduct material for which a license, issued either by NRC or by an Agreement State, for the production at a site of any uranium or thorium derived from ore—

(i) Was in effect on January 1, 1978;

(ii) Was issued or renewed after January 1, 1978; or

Department of Energy

§ 765.3

(iii) For which an application for renewal or issuance was pending on, or after January 1, 1978; and

(2) Any other real property or improvement on such real property that is determined by the Secretary or by an Agreement State to be:

(i) In the vicinity of such site; and

(ii) Contaminated with residual byproduct material.

Agreement State means a State that is or has been a party to a discontinuance agreement with NRC under section 274 of the Atomic Energy Act (42 U.S.C. 2021) and thereafter issues licenses and establishes remedial action requirements pursuant to a counterpart to section 62 or 81 of the Atomic Energy Act under state law.

Atomic Energy Act means the Atomic Energy Act of 1954, as amended, (42 U.S.C. 2011 *et seq.*).

Byproduct material means the tailings or wastes produced by the extraction or concentration of uranium or thorium from any ore processed primarily for its source material content.

Claim for reimbursement means the submission of an application for reimbursement in accordance with the requirements established in subpart C of this part.

Costs of remedial action means costs incurred by a licensee prior to or after enactment of UMTRCA to perform decontamination, decommissioning, reclamation, and other remedial action. These costs may include but are not necessarily limited to expenditures for work necessary to comply with applicable requirements to conduct groundwater remediation, treatment or containment of contaminated soil, disposal of process wastes, removal actions, air pollution abatement measures, mill and equipment decommissioning, site monitoring, administrative activities, expenditures required to meet necessary regulatory standards, or other requirements established by NRC, or an Agreement State. Costs of remedial action must be supported by reasonable documentation in accordance with the requirements of subpart C of this part.

Decontamination, decommissioning, reclamation, and other remedial action means work performed which is necessary to comply with all applicable re-

quirements of UMTRCA or, where appropriate, with applicable requirements established by an Agreement State.

Department means the United States Department of Energy or its authorized agents.

Dry short tons of byproduct material means the quantity of tailings generated from the extraction and processing of 2,000 pounds of uranium or thorium ore-bearing rock.

Federal reimbursement ratio means the ratio of Federal-related dry short tons of byproduct material to total dry short tons of byproduct material present at an active uranium or thorium processing site on October 24, 1992. The ratio shall be established by comparing Federal-related dry short tons of byproduct material to total dry short tons of byproduct material present at the site on October 24, 1992, or by another means of attributing costs of remedial action to byproduct material generated as an incident of sales to the United States which the Department determines is more accurate than a ratio established using dry short tons of byproduct material.

Federal-related dry short tons of byproduct material means dry short tons of byproduct material that was present at an active uranium or thorium processing site on October 24, 1992, and was generated as an incident of uranium or thorium sales to the United States.

Generally accepted accounting principles means those principles established by the Financial Accounting Standards Board which encompass the conventions, rules, and procedures necessary to define accepted accounting practice at a particular time.

Inflation index means the consumer price index for all urban consumers (CPI-U) as published by the Department of Commerce's Bureau of Labor Statistics.

Licensee means a site owner licensed under section 62 or 81 of the Atomic Energy Act (42 U.S.C. 2092, 2111) by NRC, or an Agreement State, for any activity at an active uranium or thorium processing site which results, or has resulted, in the production of byproduct material.

Maximum reimbursement amount or maximum reimbursement ceiling means

§ 765.10

the smaller of the following two quantities:

(1) The amount obtained by multiplying the total cost of remedial action at the site, as determined in the approved plan for subsequent remedial action, by the Federal reimbursement ratio established for the site; or

(2) \$6.25, as adjusted for inflation, multiplied by the number of Federal-related dry short tons of byproduct material.

NRC means the United States Nuclear Regulatory Commission or its predecessor agency.

Offsite disposal means the disposal, and activities that contribute to the disposal, of byproduct material in a location that is not contiguous to the West Chicago Thorium Mill Site located in West Chicago, Illinois, in accordance with a plan approved by, or other written authorization from, the State of Illinois or NRC provided the activities are consistent with the ultimate removal of byproduct material from the West Chicago Thorium Mill Site.

Plan for subsequent remedial action means a plan approved by the Department which includes an estimated total cost and schedule for remedial action, and all applicable requirements of remedial action established by NRC or an Agreement State to be performed after December 31, 2007, at an active uranium or thorium processing site.

Reclamation plan or site reclamation plan means a plan, which has been approved by NRC or an Agreement State, for remedial action at an active processing site that establishes the work necessary to comply with applicable requirements of UMTRCA, or where appropriate with requirements established by an Agreement State.

Remedial action means decontamination, decommissioning, reclamation, and other remedial action at an active uranium or thorium processing site.

Secretary means the Secretary of Energy or her designees.

Site owner means a person that presently holds, or held in the past, any interest in land, including but not limited to a fee simple absolute, surface or subsurface ownership of mining claims, easements, and a right of access for the

10 CFR Ch. III (1–1–16 Edition)

purposes of cleanup, or any other legal or equitable interest.

Tailings means the remaining portion of a metal-bearing ore after some or all of the metal, such as uranium, has been extracted.

The Fund means the Uranium Enrichment Decontamination and Decommissioning Fund established at the United States Department of Treasury pursuant to section 1801 of the Atomic Energy Act (42 U.S.C. 2297g).

Title X or “the Act” means Subtitle A of Title X of the Energy Policy Act of 1992, Public Law 102–486, 106 Stat. 2776 (42 U.S.C. 2296a–1 *et seq.*).

UMTRCA means the Uranium Mill Tailings Radiation Control Act of 1978, as amended (42 U.S.C. 7901 *et seq.*).

United States means any executive department, commission, or agency, or other establishment in the executive branch of the Federal Government.

Written Authorization means a written statement from either the NRC or an Agreement State that a licensee has performed in the past, or is authorized to perform in the future, a remedial action that is necessary to comply with the requirements of UMTRCA or, where appropriate, the requirements of an Agreement State.

[59 FR 26726, May 23, 1994, as amended at 68 FR 32957, June 3, 2003]

Subpart B—Reimbursement Criteria

§ 765.10 Eligibility for reimbursement.

(a) Any licensee of an active uranium or thorium processing site that has incurred costs of remedial action for the site that are attributable to byproduct material generated as an incident of sales to the United States shall be eligible for reimbursement of these costs, subject to the procedures and limitations specified in this part.

(b) Prior to reimbursement of costs of remedial action incurred by a licensee, the Department shall make a determination regarding the total quantity of dry short tons of byproduct material, and the quantity of Federal-related dry short tons of byproduct material present on October 24, 1992 at the licensee’s active processing site. A claim for reimbursement from a site

Department of Energy

§ 765.12

for which a determination is made will be evaluated individually. If a licensee does not concur with the Department's determination regarding the quantity of dry short tons of byproduct material present at the site, the licensee may appeal the Department's determination in accordance with § 765.22 of this part. The Department's determination shall be used to determine that portion of an approved claim for reimbursement submitted by the licensee which shall be reimbursed, unless or until the determination is overturned on appeal. If the outcome of an appeal requires a change in the Department's initial determination, the Department will adjust any payment previously made to the licensee to reflect the change.

§ 765.11 Reimbursable costs.

(a) Costs for which a licensee may be reimbursed must be for remedial action that a licensee demonstrates is attributable to byproduct material generated as an incident of sales to the United States, as determined by the Department. These costs are equal to the total costs of remedial action at a site multiplied by the Federal reimbursement ratio established for the site. These costs must be incurred in the performance of activities, prior to or after enactment of UMTRCA, and required by a plan, portion thereof, or other written authorization, approved by NRC or by an Agreement State. Costs of remedial action shall be reimbursable only if approved by the Department in accordance with the provisions of this part.

(b) In addition, costs of remedial action incurred by a licensee after December 31, 2007 must be in accordance with a plan for subsequent remedial action approved by the Department as specified in § 765.30.

(c) Total reimbursement of costs of remedial action incurred at an active processing site that are otherwise reimbursable pursuant to the provisions of this part shall be limited as follows:

(1) Reimbursement of costs of remedial action to active uranium processing site licensees shall not exceed \$6.25, as adjusted for inflation, multiplied by the number of Federal-related dry short tons of byproduct material.

(2) Aggregate reimbursement of costs of remedial action incurred at all active uranium processing sites shall not exceed \$350 million. This aggregate amount shall be adjusted for inflation pursuant to § 765.12; and

(3) Reimbursement of costs of remedial action at the active thorium processing site shall be limited to costs incurred for offsite disposal and shall not exceed \$365 million. This amount shall be adjusted for inflation pursuant to § 765.12.

(d) Notwithstanding the Title X requirement that byproduct material must be located at an active processing site on October 24, 1992, byproduct material moved from the Edgemont Mill in Edgemont, South Dakota, to a disposal site as a result of remedial action, shall be eligible for reimbursement in accordance with all applicable requirements of this part.

[59 FR 26726, May 23, 1994, as amended at 68 FR 32957, June 3, 2003]

§ 765.12 Inflation index adjustment procedures.

(a) The amounts of \$6.25 (as specified in § 765.2(e) of this rule) \$350 million (as specified in § 765.2(f) of this rule), \$365 million (as specified in § 765.2(g) of this rule) and \$715 million (as specified in § 765.2(i) of this rule) shall be adjusted for inflation as provided by this section.

(b) To make adjustments for inflation to the amounts specified in paragraph (a) of this section, the Department shall apply the CPI-U to these amounts annually, beginning in 1994, using the CPI-U as published by the Bureau of Labor Statistics within the Department of Commerce for the preceding calendar year.

(c) The Department shall adjust annually, using the CPI-U as defined in this part, amounts paid to an active uranium processing site licensee for purposes of comparison with the \$6.25 per dry short ton limit on reimbursement as adjusted for inflation.

[59 FR 26726, May 23, 1994, as amended at 68 FR 32957, June 3, 2003]

Subpart C—Procedures for Submitting and Processing Reimbursement Claims

§ 765.20 Procedures for submitting reimbursement claims.

(a) All costs of remedial action for which reimbursement is claimed must be supported by reasonable documentation as specified in this subpart. The Department reserves the right to deny any claim for reimbursement, in whole or in part, that is not submitted in accordance with the requirements of this subpart.

(b) The licensee shall provide a copy of the approved site reclamation plan or other written authorization from NRC or an Agreement State upon which claims for reimbursement are based, with the initial claim submitted. Any revision or modification made to the plan or other written authorization, which is approved by NRC or an Agreement State, shall be included by the licensee in the next claim submitted to the Department following that revision or modification. This reclamation plan or other written authorization, as modified or revised, shall serve as the basis for the Department's evaluation of all claims for reimbursement submitted by a licensee.

(c) Each submitted claim shall provide a summary of all costs of remedial action for which reimbursement is claimed. This summary shall identify the costs of remedial action associated with each major activity or requirement established by the site's reclamation plan or other written authorization. In addition, each claim shall provide a summary of the documentation relied upon by the licensee in support of each cost category for which reimbursement is claimed.

(d) Documentation used to support a reimbursement claim must demonstrate that the costs of remedial action for which reimbursement is claimed were incurred specifically for activities specified in the site's reclamation plan, or otherwise authorized by NRC or an Agreement State. Summary documentation used in support of a claim must be cross-referenced to the relevant page and activity of the licensee's reclamation plan, or other

written authorization approved by NRC or an Agreement State.

(1) Documentation prepared contemporaneous to the time the cost was incurred should be used when available. The documentation should identify the date or time period for which the cost was incurred, the activity for which the cost was incurred, and the reclamation plan provision or other written authorization to which the cost relates. Where available, each claim should be supported by receipts, invoices, pay records, or other documents that substantiate that each specific cost for which reimbursement is claimed was incurred for work that was necessary to comply with UMTRCA or applicable Agreement State requirements.

(2) Documentation not prepared contemporaneous to the time the cost was incurred, or not directly related to activities specified in the reclamation plan or other written authorization, may be used in support of a claim for reimbursement provided that the licensee determines the documentation is the only means available to document costs for which reimbursement is sought.

(e) The Department may audit, or require the licensee to audit, any documentation used to support a claim on a case-by-case basis and may approve, approve in part, or deny reimbursement of any claim in accordance with the requirements of this part. Documentation relied upon by a licensee in support of a claim for reimbursement shall be made available to the Department and retained by the licensee until 4 years after final payment of a claim is made by the Department.

(f) Each licensee should utilize generally accepted accounting principles consistently throughout the claim. These accounting principles, underlying assumptions, and any other information necessary for the Department to evaluate the claim shall be set forth in each claim.

(g) Following each annual appropriation by Congress, the Department will issue a FEDERAL REGISTER Notice announcing:

- (1) A claim submission deadline for that fiscal year;
- (2) Availability of funds for reimbursement of costs of remedial action;

Department of Energy

§ 765.21

(3) Whether the Department anticipates that approved claims for that fiscal year may be subject to prorated payment;

(4) Any changes in the Federal reimbursement ratio or maximum reimbursement ceiling for any active uranium or thorium processing site;

(5) Any revision in the per dry short ton limit on reimbursement for all active uranium processing sites; and

(6) Any other relevant information.

(h) A licensee shall certify, with respect to any claim submitted by it for reimbursement, that the work was completed as described in an approved reclamation plan or other authorization. In addition, the licensee shall certify that all costs for which reimbursement is claimed, all documentation relied upon in support of its costs, and all statements or representations made in the claim are complete, accurate, and true. The certification shall be signed by an officer or other official of the licensee with knowledge of the contents of the claim and authority to represent the licensee in making the certification. Any knowingly false or frivolous statements or representations may subject the individual to penalties under the False Claims Act, sections 3729 through 3731 of title 31 United States Code, or any other applicable statutory authority; and criminal penalties under sections 286, 287, 1001 and 1002 of title 18, United States Code, or any other applicable statutory authority.

(i) All claims for reimbursement submitted to the Department shall be sent by registered or certified mail, return receipt requested. The Department reserves all rights under applicable law to recover any funds paid to licensees which an audit finds to not meet the requirements of this part.

§ 765.21 Procedures for processing reimbursement claims.

(a) The Department will conduct a preliminary review of each claim within 60 days after the claim submission deadline announced in the FEDERAL REGISTER Notice specified in § 765.20(g) to determine the completeness of each claim. Payments from the Fund to active uranium or thorium processing site licensees for approved costs of re-

medial action will be made simultaneously by the Department within 1 year of the claim submission deadline.

(b) After completing the preliminary review specified in paragraph (a) of this section, the Department may audit, or require the licensee to audit, any documentation used in support of such claim, request the licensee to provide additional information, or request the licensee to provide other clarification determined by the Department to be necessary to complete its evaluation of the claim. In addition, the Department reserves the right to conduct an inspection of the site to verify any information provided by the licensee in a claim for reimbursement, or in support thereof. Any information requested by the Department, if provided, must be submitted by the claimant within 60 days of receipt of the request unless the Department specifies in writing that additional time is provided.

(c) At any time during the review of a claim, the Department may request an informal conference with a licensee to obtain further information or clarification on any unresolved issue pertaining to the claim. While the licensee is not required to provide additional clarification requested by the Department, a failure to do so may result in the denial of that portion of the claim for which information is requested.

(d) Based upon the claim submitted and any additional information received by the Department, including any audit or site inspection if conducted, the Department shall complete a final review of all relevant information prior to making a reimbursement decision. When the Department determines it is not clear that an activity for which reimbursement is claimed was necessary to comply with UMTRCA or where appropriate, with applicable Agreement State requirements, the Department may consult with the appropriate regulatory authorities.

(e) A written decision regarding the Department's determination to approve, approve in part, or deny a claim will be provided to the licensee within 10 days of completion of the claim review. Within 45 days after the Department's issuance of a written decision to deny the claim due to inadequate

§ 765.22

documentation, the licensee may request the Department to reconsider its decision if the licensee provides reasonable documentation in accordance with § 765.20. If a licensee chooses not to submit the documentation, the licensee has the right to file a formal appeal to a claim denial in accordance with § 765.22. If a licensee chooses to submit the documentation, the Department will consider whether the documentation results in the Department's reversal of the initial decision to deny the claim and will inform the licensee of the Department's subsequent decision. The licensee may appeal that decision in accordance with § 765.22.

(f) If the Department determines that insufficient funds are available at any time to provide for complete payment of all outstanding approved claims, reimbursements of approved claims will be made on a prorated basis. A prorated payment of all outstanding approved claims for reimbursement, or any unpaid portion thereof, shall be made on the basis of the total amount of all outstanding approved claims, regardless of when the claims were submitted or approved.

(g) Notwithstanding the provisions of paragraph (f) of this section, or any other provisions of this part, any requirement for the payment or obligation of funds by the Department established by this part shall be subject to the availability of appropriated funds, and no provision herein shall be interpreted to require obligation or payment of funds in violation of the Anti-Deficiency Act (31 U.S.C. 1341).

[59 FR 26726, May 23, 1994, as amended at 68 FR 32957, June 3, 2003]

§ 765.22 Appeals procedures.

(a) Any appeal by a licensee of any Department determination subject to the requirements of this part, shall invoke the appeals process specified in paragraph (b) of this section.

(b) A licensee shall file an appeal of any Department determination subject to the requirements of this part with the Office of Hearings and Appeals, U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585. Any appeal must be filed within 45 days from the date the licensee received notice, actual or constructive

10 CFR Ch. III (1–1–16 Edition)

(i.e., publication in the FEDERAL REGISTER), of the Department's determination. Appeals must comply with the procedures set forth in 10 CFR part 1003, subpart C. The decision of the Office of Hearings and Appeals shall be the final decision of the Department. A licensee must file an appeal in order to exhaust its administrative remedies, and the receipt of an appellate decision is a prerequisite to seeking judicial review of any determination made under this part.

[59 FR 26726, May 23, 1994, as amended at 60 FR 15017, Mar. 21, 1995]

§ 765.23 Annual report.

The Department shall prepare annually a report summarizing pertinent information concerning claims submitted in the previous calendar year, the status of the Department's review of the claims, determinations made regarding the claims, amounts paid for claims approved, and other relevant information concerning this reimbursement program. The report will be available to all interested parties upon written request to the Department's National Nuclear Security Administration Service Center, Office of Technical Services, Environmental Programs Department, P.O. Box 5400, Albuquerque, NM 87185-5400 and will also be available in the Department's Freedom of Information Reading room, 1000 Independence Avenue SW., Washington, DC.

[59 FR 26726, May 23, 1994, as amended at 68 FR 32957, June 3, 2003]

Subpart D—Additional Reimbursement Procedures

§ 765.30 Reimbursement of costs incurred in accordance with a plan for subsequent remedial action.

(a) This section establishes procedures governing reimbursements of costs of remedial action incurred in accordance with a plan for subsequent remedial action approved by the Department as provided in this section. Costs otherwise eligible for reimbursement in accordance with the terms of this part and incurred in accordance with the plan shall be reimbursed in accordance with the provisions of subpart D and subpart C. In the event there is an

Department of Energy

§ 765.31

inconsistency between the requirements of subpart D and subpart C, the provisions of subpart D shall govern reimbursement of such costs of remedial action.

(b) A licensee who anticipates incurring costs of remedial action after December 31, 2007 may submit a plan for subsequent remedial action. This plan may be submitted at any time after January 1, 2005, but no later than December 31, 2006. Reimbursement of costs of remedial action incurred after December 31, 2007 shall be subject to the approval of this plan by the Department. This plan shall describe:

(1) All applicable requirements established by NRC pursuant to UMTRCA, or where appropriate, by the requirements of an Agreement State, included in a reclamation plan approved by NRC or an Agreement State which have not yet been satisfied in full by the licensee, and

(2) The total cost of remedial action required at the site, together with all necessary supporting documentation, segregated into actual costs incurred to date, costs incurred or expected to be incurred prior to December 31, 2007 but not yet approved for reimbursement, and anticipated future costs.

(c) The Department shall review the plan for subsequent remedial action to verify conformance with the NRC- or Agreement State-approved reclamation plan or other written authorization, and to determine the reasonableness of anticipated future costs, and shall approve, approve with suggested modifications, or reject the plan. During its review, the Department may request additional information from the licensee to clarify or provide support for any provision or estimate contained in the plan. The Department may also consult with NRC or an Agreement State concerning any provision or estimate contained in the plan. Upon approval, approval with modifications, or rejection of a plan, the Department shall inform and explain to the licensee its decision.

(d) If the Department rejects a plan for subsequent remedial action submitted by a licensee, the licensee may appeal the Department's rejection or prepare and submit a revised plan. The licensee may continue to submit re-

vised plans for subsequent remedial action until the Department approves a plan, or September 30, 2007, whichever occurs first. A failure by a licensee to receive approval from the Department of a plan prior to December 31, 2007 will preclude that licensee from receiving any reimbursement for costs of remedial action incurred after that date.

(e) The Department shall determine, in approving a plan for subsequent remedial action, the maximum reimbursement amount for which the licensee may be eligible. This maximum reimbursement amount shall be the smaller of the following two quantities:

(1) The amount obtained by multiplying the total cost of remedial action at the site, as determined in the approved plan for subsequent remedial action, by the Federal reimbursement ratio established for such site; or

(2) For the uranium site licensees only, \$6.25, as adjusted for inflation, multiplied by the number of Federal-related dry short tons of byproduct material. For all licensees, the Department shall subtract from the maximum reimbursement amount any reimbursement already approved to be paid to the licensee. The resulting sum shall be the potential additional reimbursement to which the licensee may be entitled. This resulting sum will be adjusted after the approval of claims for work performed through December 31, 2007, to reflect the actual approved costs of work performed through that date.

[59 FR 26726, May 23, 1994, as amended at 68 FR 32957, June 3, 2003]

§ 765.31 Designation of funds available for subsequent remedial action.

(a) The Department shall authorize reimbursement of costs of remedial action, incurred in accordance with an approved plan for subsequent remedial action and approved by the Department as specified in subpart C to this part, to be made from the Fund. These costs are reimbursable until:

(1) This remedial action has been completed, or

(2) The licensee has been reimbursed its maximum reimbursement amount as determined by the Department pursuant to paragraph (e) of § 765.30.

§ 765.32

(b) A licensee shall submit any claim for reimbursement of costs of remedial action incurred pursuant to an approved plan for subsequent remedial action in accordance with the requirements of subpart C of this part. The Department shall approve, approve in part, or deny any claims in accordance with the procedures specified in subpart C of this part. The Department shall authorize the disbursement of funds upon approval of a claim for reimbursement.

(c) After all remedial actions have been completed by affected Agreement State or NRC licensees, the Department will issue a FEDERAL REGISTER notice announcing a termination date beyond which claims for reimbursement will no longer be accepted.

[59 FR 26726, May 23, 1994, as amended at 68 FR 32958, June 3, 2003]

§ 765.32 Reimbursement of excess funds.

(a) No later than December 31, 2008, the Department shall determine if the aggregate amount authorized for appropriation pursuant to section 1003 of the Act (42 U.S.C. 2296a-2), as adjusted for inflation pursuant to § 765.12, exceed as of that date the combined total of all reimbursements which have been paid to licensees under this part, any amounts approved for reimbursement and owed to any licensee, and any anticipated additional reimbursements to be made in accordance with approved plans for subsequent remedial action.

(b) If the Department determines that the amount authorized pursuant to section 1003 of the Act (42 U.S.C. 2296a-2), as adjusted for inflation, exceed the combined total of all reimbursements (as indicated in paragraph (a) of this section), the Department may establish procedures for providing additional reimbursement to uranium licensees for costs of remedial action, subject to the availability of appropriated funds. If the amount of available excess funds is insufficient to provide reimbursement of all eligible costs of remedial action, then reimbursement shall be paid on a prorated basis.

(c) Each eligible uranium licensee's prorated share will be determined by dividing the total excess funds available by the total number of Federal-re-

10 CFR Ch. III (1-1-16 Edition)

lated dry short tons of byproduct material present at the site where costs of remedial action exceed \$6.25 per dry short ton, as adjusted for inflation pursuant to § 765.12. The resulting number will be the maximum cost per dry short ton, over \$6.25, that may be reimbursed. Total reimbursement for each licensee that has incurred approved costs of remedial action in excess of \$6.25 per dry short ton will be the product of the excess cost per dry short ton multiplied by the number of Federal-related dry short tons of byproduct material at the site or the actual costs incurred and approved by the Department, whichever is less.

(d) Any costs of remedial action for which reimbursement is sought from excess funds determined by the Department to be available is subject to all requirements of this part except the per dry short ton limit on reimbursement established by paragraph (d) of § 765.11.

SOURCE: 59 FR 41963, Aug. 15, 1994, unless otherwise noted.

Department of Energy

§ 766.102

Subpart A—General

§ 766.1 Purpose.

The provisions of this part establish procedures for the Special Assessment of domestic utilities for the Uranium Enrichment Decontamination and Decommissioning Fund pursuant to sections 1801, 1802 and 1803 of the Atomic Energy Act of 1954, as amended (42 U.S.C. § 2011 *et seq.*).

§ 766.2 Applicability.

This part applies to all domestic utilities in the United States that purchased separative work units from the DOE between 1945 and October 23, 1992.

§ 766.3 Definitions.

For the purposes of this part, the following terms shall be defined as follows:

CPI-U means the Consumer Price Index for all-urban consumers published by the Department of Labor.

Commercial electricity generation means the production of electricity for sale to consumers.

DOE means the United States Department of Energy and its predecessor agencies.

Domestic utility means any utility in the United States that has purchased SWUs produced by DOE for the purpose of commercial electrical generation during the period beginning in 1945 to October 23, 1992.

Fund means an account in the U.S. Treasury referred to as the Uranium Enrichment Decontamination and Decommissioning Fund, established by section 1801 of the Atomic Energy Act of 1954, as amended.

Oak Ridge Operations Office means the Oak Ridge Operations Office of the Department of Energy in Oak Ridge, Tennessee.

Special Assessment means the Special Assessment levied on domestic utilities for payments into the Fund.

SWU means a separative work unit, the common measure by which uranium enrichment services are sold.

TESS means the Toll Enrichment Services System, which is the database that tracks uranium enrichment services transactions of the DOE Oak Ridge Operations Office for the purpose of planning, toll transaction processing,

customer invoicing and historical tracking of SWU deliveries.

Use and burnup charges mean lease charges for the consumption of SWUs and natural uranium.

Subpart B—Procedures for Special Assessment

§ 766.100 Scope.

This subpart sets forth the procedures for the Special Assessment of domestic utilities for funds to be deposited in the Fund.

§ 766.101 Data utilization.

DOE shall use the records from the Toll Enrichment Services System (TESS) and other records maintained by the Oak Ridge Operations Office in order to determine the total SWUs purchased from DOE for all purposes. DOE shall use records from TESS, relevant records of domestic utilities, and such other information as DOE deems to be reliable and probative in determining the number of SWUs that were purchased by each domestic utility prior to October 24, 1992. A domestic utility shall be considered to have purchased a SWU from DOE if the SWU was produced by DOE but purchased by the domestic utility from another source. DOE shall consider a purchase to have occurred upon the delivery of a SWU to the domestic utility purchasing the SWU. A domestic utility shall not be considered to have purchased a SWU from DOE if the SWU was purchased by the domestic utility but subsequently sold to another source.

§ 766.102 Calculation methodology.

(a) *Calculation of Domestic Utilities' Annual Assessment Ratio to the Fund.* Domestic utilities shall be assessed annually for their share of the Fund. The amount of the assessment shall be determined by the ratio of SWUs produced by DOE and purchased by domestic utilities prior to October 24, 1992, to the total number of SWUs produced by DOE for all purposes (including SWUs produced for defense purposes). All calculations will be carried out to the fifth significant digit. This ratio is expressed by the following hypothetical example:

§ 766.103

10 CFR Ch. III (1-1-16 Edition)

SWUs purchased by all domestic utilities	Total SWUs produced—all purposes	Special assessment ratio
12345	+	45678 = .27026

Total fund	Annual assessment ratio	Baseline total annual special assessment
\$480,000,000	× 0.27026	= \$129,724,800

(b) Calculation of the Baseline Total Annual Special Assessment for Domestic Utilities. The Annual Special Assessment ratio calculated in paragraph (a) of this section shall be multiplied by \$480 million, yielding the total amount of the Baseline Total Annual Special Assessment as of October 1992. In the event that this amount is in excess of \$150 million, the Baseline Total Annual Special Assessment shall be capped at \$150 million. All calculations will be carried out to the fifth significant digit. The Baseline Total Annual Special Assessment is determined as shown in the following hypothetical example:

(c) Calculation of Baseline Total Annual Special Assessment per Utility. The ratio of the total number of SWUs purchased by an individual domestic utility for commercial electricity generation, to the total number of SWUs purchased by all domestic utilities for commercial electricity generation, multiplied by the Baseline Total Annual Special Assessment calculated in paragraph (b) of this section, determines an individual utility's share of the Baseline Total Annual Special Assessment. All calculations will be carried out to the fifth significant digit. A hypothetical example of such a calculation follows:

Single utility SWUs	All utility SWUs	Utility ratio	Baseline total annual special assessment	Individual utility special Assessment
300	+	12345 = .02430	× \$129,724,800	\$3,152,312.64

(d) Calculation of Inflation Adjustment. The Baseline Total Annual Special Assessment billed to domestic utilities shall be adjusted for inflation using the most recently published monthly CPI-U and the CPI-U for October 1992. All calculations will be carried out to the fifth significant digit. A hypothetical example of such a calculation follows:

justed for inflation using the most recently published monthly CPI-U data.

CPI-U (Mar 93)	CPI-U (Oct 92)	Adjustment multiplier
150	+	141.8 = 1.05783

(b) DOE shall enclose with the Fiscal Year 1993 Special Assessment invoice a sealed, business confidential, summary SWU transaction statement including:

Utility special Assessment	Adjustment multiplier	Adjusted utility assessment
\$3,152,312.64	× 1.05783	= \$3,334,610.88

(1) TESS information which documents, by reactor, the basis of the utility's assessment;

(2) A list of domestic utilities subject to the Special Assessment;

(3) The total number of SWUs purchased from DOE by all domestic utilities for all purposes prior to October 24, 1992.

(4) The total number of SWUs purchased from DOE for all purposes prior to October 24, 1992, including SWUs purchased or produced for defense purposes; and

(5) Such other information as may be appropriate.

§ 766.103 Special Assessment invoices.

(a) DOE shall issue annually a Special Assessment invoice to each domestic utility. This invoice will specify itemized quantities of enrichment services by reactor. In each Special Assessment invoice, DOE shall require payment, on or before 30 days from the date of each invoice, of that utility's prorated share of the Baseline Total Annual Special Assessment, as ad-

(c) With regard to any fiscal year after Fiscal Year 1993, DOE shall enclose a summary SWU transaction statement with Special Assessment invoices that will include updated information regarding adjustments to Special Assessments resulting from the reconciliation and appeals process under Section 766.104.

Department of Energy

§ 766.106

(d) The date of each Annual Special Assessment invoicing will be set on or about October 1 with payment due 30 calendar days from the date of invoice starting with the Fiscal Year 1995 Special Assessment.

§ 766.104 Reconciliation, adjustments and appeals.

(a) A domestic utility requesting an adjustment shall, within 30 days from the date of a Special Assessment invoice, file a notice requesting an adjustment. Such notice shall include an explanation of the basis for the adjustment and any supporting documents, and may include a request for a meeting with DOE to discuss its invoice. If more time is needed to gather probative information, DOE will consider utility requests for up to 90 days additional time, providing that the initial notice requesting an adjustment was timely filed. The notice shall be filed at the address set forth in the Special Assessment invoice, and filing of this notice is complete only upon receipt by DOE. Domestic utilities are considered to have met the filing requirements upon DOE's receipt of the notice requesting an adjustment without regard to DOE's acceptance of supporting documentation. The filing of a notice for an adjustment shall not stay the obligation to pay.

(b) DOE may request additional information from domestic utilities and may acquire data from other sources.

(c) After reviewing a notice submitted under paragraph (a) of this section and other relevant information, and after making any necessary adjustment to its records in light of reliable and adequately probative records submitted in connection with the request for adjustment or otherwise obtained by DOE, DOE shall make a written determination granting or denying the requested adjustment. As appropriate, DOE shall modify the application of TESS data for any discrepancies or further transactions raised during the reconciliation process.

(d) Any domestic utility that wishes to dispute a written determination under paragraph (c) of this section shall have the right to file an appeal with the Office of Hearings and Appeals, U.S. Department of Energy, 1000

Independence Avenue S.W., Washington, DC 20585. Except for the Fiscal Year 1993 Special Assessment, any appeal must be filed on or before 30 days from the date of the written determination and should contain information of the type described in 10 CFR part 1003, subpart C. With regard to a written determination under paragraph (c) of this section concerning a Fiscal Year 1993 Special Assessment, a domestic utility must file an appeal on or before 30 days from the effective date of this paragraph or from the date of such written determination, whichever is later. The decision of the Office of Hearings and Appeals shall be the final decision of DOE. Upon completion of the reconciliation process, all records of SWU transactions shall be finalized and shall become the basis of subsequent Special Assessment invoices. These records shall be revised to reflect any decisions from the Office of Hearings and Appeals and any applicable court rulings.

(e) Refunds of Special Assessments shall be provided in cases where DOE has determined, as a result of reconciliation, that an overpayment has been made by a domestic utility, and that the domestic utility has no further current obligation to DOE.

[59 FR 41963, Aug. 15, 1994, as amended at 60 FR 15017, Mar. 21, 1995]

§ 766.105 Payment procedures.

DOE shall specify payment details and instructions in all Special Assessment invoices. Each domestic utility shall make payments to the Fund by wire transfer to the Department of Treasury.

§ 766.106 Late payment fees.

In the case of a late payment by a domestic utility of its Special Assessment, the domestic utility shall pay interest at the per annum rate (365-day basis) established by DOE for general application to monies due DOE and not received by DOE on or before a designated due date. Interest shall accrue beginning the date of the designated payment except that, whenever the due date falls on a Saturday, Sunday, or a United States legal holiday, interest

§ 766.107

shall commence on the next day immediately following which is not a Saturday, Sunday, or United States legal holiday. Late payment provisions for the Special Assessment to the Fund shall be based on the Treasury Current Value of Funds Rate (which is published annually by the Treasury and used in assessing interest charges for outstanding debts on claims owed to the United States Government), plus six (6) percent pro rata on a daily basis. The additional six (6) percent charge shall not go into effect until five (5) business days after payment was originally due. Late payment fees shall be invoiced within two days of receipt of utility payment of the special assessment when delinquency is less than 30 days. For longer periods of delinquency, DOE will submit additional invoices, as appropriate. Late payment fees will be due 30 days from the date of invoice.

§ 766.107 Prepayment of future Special Assessments

DOE shall accept prepayment of future Special Assessments upon request by a domestic utility. A domestic utility's liability for the future assessments shall be satisfied to the extent of the prepayments. DOE shall use the pro rata share of prepayments attributable to a given fiscal year plus the Special Assessments collected from utilities who did not prepay for that fiscal year, in order to determine that the total amount of Special Assessments collected from domestic utilities in a given fiscal year does not exceed \$150 million, annually adjusted for inflation.

PART 770—TRANSFER OF REAL PROPERTY AT DEFENSE NUCLEAR FACILITIES FOR ECONOMIC DEVELOPMENT

Sec.

770.1 What is the purpose of this part?

770.2 What real property does this part cover?

770.3 What general limitations apply to this part?

770.4 What definitions are used in this part?

770.5 How does DOE notify persons and entities that defense nuclear facility real property is available for transfer for economic development?

770.9 What conditions apply to DOE indemnification of claims against a person or entity based on the release or threatened release of a hazardous substance or pollutant or contaminant attributable to DOE?

770.10 When must a person or entity, who wishes to contest a DOE denial of request for indemnification of a claim, begin legal action?

770.11 When does a claim “accrue” for purposes of notifying the Field Office Manager under § 770.9(a) of this part?

AUTHORITY: 50 U.S.C. 2811.

SOURCE: 65 FR 10689, Feb. 29, 2000, unless otherwise noted.

§ 770.1 What is the purpose of this part?

(a) This part establishes how DOE will transfer by sale or lease real property at closed or downsized defense nuclear facilities for economic development.

(b) This part also contains the procedures for a person or entity to request indemnification for any claim that results from the release or threatened release of a hazardous substance or pollutant or contaminant as a result of DOE activities at the defense nuclear facility.

[65 FR 10689, Feb. 29, 2000, as amended at 78 FR 67927, Nov. 13, 2013]

§ 770.2 What real property does this part cover?

(a) DOE may transfer DOE-owned real property by sale or lease at closed or downsized defense nuclear facilities, for the purpose of permitting economic development.

(b) DOE may transfer, by lease only, improvements at defense nuclear facilities on land withdrawn from the public domain, that are unneeded, temporarily underutilized, or underutilized, for the purpose of permitting economic

Department of Energy

§ 770.4

development and for facilitating local reuse or redevelopment.

[65 FR 10689, Feb. 29, 2000, as amended at 78 FR 67927, Nov. 13, 2013]

§ 770.3 What general limitations apply to this part?

(a) Nothing in this part affects or modifies in any way section 120(h) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S.C. 9620(h)).

(b) Individual proposals for transfers of property are subject to NEPA review as implemented by 10 CFR part 1021.

(c) Any indemnification agreed to by the DOE is subject to the availability of funds.

§ 770.4 What definitions are used in this part?

Community Reuse Organization or CRO means a governmental or non-governmental organization that is recognized by DOE and that represents a community adversely affected by DOE work force restructuring at a defense nuclear facility..

Claim means a request for reimbursement of monetary damages.

Defense Nuclear Facility means “Department of Energy defense nuclear facility” within the meaning of section 318 of the Atomic Energy Act of 1954 (42 U.S.C. 2286g).

DOE means the United States Department of Energy.

DOE Field Office means any of DOE’s officially established organizations and components located outside the Washington, D.C., metropolitan area. (See Field Office Manager.)

Economic Development means the use of transferred DOE real property in a way that enhances the production, distribution, or consumption of goods and services in the surrounding region(s) or which furthers reuse or redevelopment, and furthers the public policy objectives of the laws governing the downsizing of DOE’s defense nuclear facilities.

Field Office Manager means the head of the DOE Operations Offices or Field Offices associated with the management and control of defense nuclear facilities.

Hazardous Substance means a substance within the definition of “haz-

ardous substances” in subchapter I of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) (42 U.S.C. 9601(14)).

Indemnification means the responsibility for reimbursement of payment for any suit, claim, demand or action, liability, judgment, cost, or other fee arising out of any claim for personal injury or property damage, including business losses consistent with generally accepted accounting practices, which involve the covered real property transfers. Indemnification payments are subject to the availability of appropriated funds.

Person or Entity means any state, any political subdivision of a state or any individual person that acquires ownership or control of real property at a defense nuclear facility.

Pollutant or Contaminant means a substance identified within the definition of “pollutant or contaminant” in section 101(33) of CERCLA (42 U.S.C. 9601(33)).

Real Property means all interest in land, together with the improvements, structures, and fixtures located on the land (usually including prefabricated or movable structures), and associated appurtenances under the control of any federal agency.

Release means a “release” as defined in subchapter I of CERCLA (42 U.S.C. 9601(22)).

Underutilized Real Property or Temporarily Underutilized Real Property means the entire property or a portion of the real property (with or without improvements) that is used only at irregular intervals, or which is used by current DOE missions that can be satisfied with only a portion of the real property. Underutilized property is available by lease only.

Unneeded Real Property means any property under DOE control that the Field Office, cognizant program, or the Secretary of Energy have determined, according to applicable procedures, to be no longer needed for the purposes of conducting DOE business.

[65 FR 10689, Feb. 29, 2000, as amended at 78 FR 67927, Nov. 13, 2013]

§ 770.5 How does DOE notify persons and entities that defense nuclear facility real property is available for transfer for economic development?

(a) Field Office Managers annually make available to Community Reuse Organizations, local government, and Tribal nations, and other persons and entities a list of real property at defense nuclear facilities that DOE has identified as appropriate for transfer for economic development. Field Office Managers may use any effective means of publicity to notify potentially-interested persons or entities of the availability of the list.

(b) Upon request, Field Office Managers provide to interested persons and entities relevant information about listed real property, including information about a property's physical condition, environmental, safety and health matters, and any restrictions or terms of transfer.

[65 FR 10689, Feb. 29, 2000, as amended at 78 FR 67927, Nov. 13, 2013]

§ 770.6 May interested persons and entities request that real property at defense nuclear facilities be transferred for economic development?

Any person or entity may request that specific real property be made available for transfer for economic development pursuant to procedures in § 770.7. A person or entity must submit such a request in writing to the Field Office Manager who is responsible for the real property.

§ 770.7 What procedures are to be used to transfer real property at defense nuclear facilities for economic development?

(a) *Proposal.* The transfer process starts when a potential purchaser or lessee submits to the Field Office Manager a proposal for the transfer of real property that DOE has included on a list of available real property, as provided in § 770.5 of this part.

(1) A proposal must include (but is not limited to):

(i) A description of the real property proposed to be transferred;

(ii) The intended use and duration of use of the real property, including potential users and an indication that these users are interested in partici-

pating in the economic development of the property;

(iii) A description of the economic development that would be furthered by the transfer (*e.g.*, jobs to be created or retained, improvements to be made) or what reuse or reutilization would be accomplished by means of a description of the business to be created (direct and indirect economic benefits that will result due to the proposed transfer);

(iv) Information supporting the economic viability of the proposed development; and

(v) The consideration offered and any financial requirements.

(2) The person or entity should state in the proposal whether it is or is not requesting indemnification against claims based on the release or threatened release of a hazardous substance or pollutant or contaminant resulting from DOE activities.

(3) If a proposal for transfer does not contain a statement regarding indemnification, the Field Office Manager will notify the person or entity by letter of the potential availability of indemnification under this part, and will request that the person or entity either modify the proposal to include a request for indemnification or submit a statement that it is not seeking indemnification.

(b) *Decision to transfer real property.* After review of the proposal, DOE will notify, by letter, the person or entity that submitted the proposal of DOE's decision whether or not a transfer of the real property by sale or lease is in the best interest of the Government. If DOE determines the transfer is in the Government's best interest, then the Field Office Manager will begin development of a transfer agreement.

(c) *Congressional committee notification.* DOE may not transfer real property under this part until 30 days have elapsed after the date DOE notifies congressional defense committees of the proposed transfer. The Field Office Manager will notify congressional defense committees through the Secretary of Energy.

[65 FR 10689, Feb. 29, 2000, as amended at 78 FR 67927, Nov. 13, 2013]

§ 770.8 May DOE transfer real property at defense nuclear facilities for economic development at less than fair market value?

DOE generally attempts to obtain fair market value for real property transferred for economic development, but DOE may agree to sell or lease such property for less than fair market value if the statutory transfer authority used imposes no market value restriction, and:

(a) The real property requires considerable infrastructure improvements to make it economically viable, or

(b) A conveyance at less than market value would, in the DOE's judgment, further the public policy objectives of the laws governing the downsizing of defense nuclear facilities.

§ 770.9 What conditions apply to DOE indemnification of claims against a person or entity based on the release or threatened release of a hazardous substance or pollutant or contaminant attributable to DOE?

(a) If an agreement for the transfer of real property for economic development contains an indemnification provision, the person or entity requesting indemnification for a particular claim must:

(1) Notify the Field Office Manager in writing within two years after such claim accrues under § 770.11 of this part;

(2) Furnish the Field Office Manager, or such other DOE official as the Field Office Manager designates, with evidence or proof of the claim;

(3) Furnish the Field Office Manager, or such other DOE official as the Field Office Manager designates, with copies of pertinent papers (*e.g.*, legal documents) received by the person or entity;

(4) If requested by DOE, provide access to records and personnel of the person or entity for purposes of defending or settling the claim; and

(5) Provide certification that the person or entity making the claim did not contribute to any such release or threatened release.

(b) DOE will enter into an indemnification agreement if DOE determines that indemnification is essential for the purpose of facilitating reuse or redevelopment.

(c) DOE may not indemnify any person or entity for a claim if the person or entity contributed to the release or threatened release of a hazardous substance or pollutant or contaminant that is the basis of the claim.

(d) DOE may not indemnify a person or entity for a claim made under an indemnification agreement if the person or entity refuses to allow DOE to settle or defend the claim.

(e) Any indemnification provided will apply to any successor, assignee, transferee, lender or lessee of the original entity that acquires ownership or control.

[65 FR 10689, Feb. 29, 2000, as amended at 78 FR 67927, Nov. 13, 2013]

§ 770.10 When must a person or entity, who wishes to contest a DOE denial of request for indemnification of a claim, begin legal action?

If DOE denies the claim, DOE must provide the person or entity with a notice of final denial of the claim by DOE by certified or registered mail. The person or entity must begin legal action within six months after the date of mailing.

§ 770.11 When does a claim “accrue” for purposes of notifying the Field Office Manager under § 770.9(a) of this part?

For purposes of § 770.9(a) of this part, a claim “accrues” on the date on which the person asserting the claim knew, or reasonably should have known, that the injury to person or property was caused or contributed to by the release or threatened release of a hazardous substance, pollutant, or contaminant as a result of DOE activities at the defense nuclear facility on which the real property is located.

American Free Trade Agreement Implementing Act, Pub. L. 103–182.

SOURCE: 46 FR 39581, Aug. 4, 1981, unless otherwise noted.

Subpart A—General Provisions

§ 780.1 Scope.

The regulations in this part establish the procedures, terms, and conditions for Patent Compensation Board:

(a) Proceedings to declare a patent affected with the public interest pursuant to section 153a of the Atomic Energy Act of 1954 (Pub. L. 83–703; 42 U.S.C. 2183);

(b) Proceedings to determine a reasonable royalty fee pursuant to section 157 of the Atomic Energy Act of 1954;

(c) Proceedings for the grant of an award pursuant to section 157 of the Atomic Energy Act of 1954;

(d) Proceedings to obtain compensation pursuant to section 173 of the Atomic Energy Act of 1954 and the Invention Secrecy Act (35 U.S.C. 183);

And for applications to the Department of Energy (DOE) for a patent license pursuant to sections 153b(2) and 153c of the Atomic Energy Act of 1954.

§ 780.2 Definitions.

(a) *Act* means the Atomic Energy Act of 1954 (Pub. L. 83–703; 42 U.S.C. 2011).

(b) *Application* means the application filed by an applicant for a patent license, for the determination of a reasonable royalty fee, for an award, or for compensation under this part.

(c) *Board* means the Patent Compensation Board.

(d) *Chairman* means the Chairman of the Patent Compensation Board.

(e) *Department*, or *DOE*, or *Department of Energy* means the Department of Energy, established by the Department of Energy Organization Act (Pub. L. 95–91; 42 U.S.C. 7101).

(f) *Party* means the applicant, patent owner, Department representative, and any person admitted as a party by the Board for any proceeding under this part.

(g) *Patent Owner* means the owner of record in the United States Patent and Trademark Office.

Department of Energy

§ 780.7

(h) *Secretary* means the Secretary of the Department of Energy or the delegate of the Secretary of Energy.

§ 780.3 Jurisdiction of the Patent Compensation Board.

The Patent Compensation Board was established by section 157 of the Atomic Energy Act of 1954. It was transferred to the Energy Research and Development Administration pursuant to section 104(d) of the Energy Reorganization Act of 1974 (42 U.S.C. 5814) and subsequently to the Department of Energy by section 301 of the Department of Energy Organization Act (42 U.S.C. 7151). Under section 157, the Board is given authority to determine reasonable royalty fees or resolve issues involving the grant of awards. In addition, the Board has authority:

(a) To hear and make decisions as to compensation under section 173 of the Act (42 U.S.C. 2223) and the Invention Secrecy Act (35 U.S.C. 183);

(b) To hear and make decisions as to whether a specific patent is affected with the public interest pursuant to section 153a of the Act;

(c) To hear and make decisions as to whether a specific patent license should be granted under sections 153b(2) and 153e of the Act;

(d) To give notices, hold hearings and take such other actions as may be necessary under section 153; and

(e) To exercise all powers available under the Act and necessary for the performance of these duties, including the issuance of such rules of procedure as may be necessary.

§ 780.4 Filing and service of documents.

(a) All communications regarding proceedings subject to this part should be addressed to: Chairman, Patent Compensation Board, U.S. Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585. All documents offered for filing shall be accompanied by proof of service upon all parties to the proceeding or their attorneys of record as required by law, rule, or order of the Department. Service on the Department shall be by mail or delivery to: Office of Assistant General Counsel for Technology Transfer and Intellectual Property, U.S. Department

of Energy, 1000 Independence Avenue SW., Washington, DC 20585.

(b) Filing by mail will be deemed to be complete as of the time of deposit in the United States mail.

[77 FR 4887, Feb. 1, 2012]

§ 780.5 Applications—General form, content, and filing.

(a) Each application shall be signed by the applicant and shall state the applicant's name and address. If the applicant is a corporation, the application shall be signed by an authorized officer of the corporation, and the application shall indicate the state of incorporation. Where the applicant elects to be represented by counsel, a signed notice to that effect shall be filed with the Board.

(b) Each application must contain a concise statement of all of the essential facts upon which it is based. No particular form of statement is required. Each application shall be verified by the applicant or by the person having the best knowledge of such facts. In the case of facts stated on information and belief, the source of such information and grounds of belief shall be given.

(c) Each application must identify any person whose interest the applicant believes may be affected by the proceeding before the Board.

(d) Three copies of each application shall be filed with the Board. However, only one copy of the accompanying exhibits need be filed.

(e) The Board will acknowledge the receipt of the application in writing and advise the applicant of the docket number assigned to the application.

§ 780.6 Department participation.

The Department shall be a party to all proceedings under this part, and the Office of the General Counsel will represent the Department's interests before the Board.

§ 780.7 Designation of interested persons as parties.

In any proceeding under this part, the Board shall admit as a party any person, upon application of such person or on the Board's own initiative, whose interest may be affected by the proceeding.

§ 780.8

§ 780.8 Security.

In any proceeding under this part, the Board shall take such steps as necessary pursuant to chapter 12 of the Act and section 181 of the Act to assure compliance with Department security regulations and the common defense.

§ 780.9 Make-up of the Patent Compensation Board.

The DOE Secretary of Energy, or a person acting in that position, shall appoint a three member panel to serve as the Patent Compensation Board to hear and decide cases falling under the subject matter jurisdiction set forth in § 780.3 of this part. The Secretary of Energy shall further designate one member as the chairman. The Board may be appointed to hear cases on an ad hoc basis, or on other such term of service deemed appropriate by the Secretary. All proceedings shall be conducted pursuant to rules of procedure provided by the Board.

[77 FR 4887, Feb. 1, 2012]

§ 780.10 Decision of the Board.

The decision of the Board in any proceeding under this part shall constitute the final action of the Department on the matter.

§ 780.11 Records of the Board.

The records of the Board in cases filed before it, including the pleadings, the transcript, and the final decision, shall be open to public inspection, except to the extent that such records or portions thereof are withheld from disclosure by the Board pursuant to 10 CFR part 1004.

Subpart B—Declaring Patents Affected With the Public Interest Under Section 153a of the Atomic Energy Act of 1954

§ 780.20 Initiation of proceeding.

When any person in the Department believes that the Department should declare a patent affected with the public interest pursuant to section 153a of the Act, that person shall make such a recommendation to the Under Secretary. If, after consultation with the General Counsel, the Under Secretary

10 CFR Ch. III (1–1–16 Edition)

agrees with the recommendation, the Under Secretary shall initiate in writing a proceeding under section 153a before the Board. The communication of the Under Secretary to the Board shall identify the patent and state the basis for the proposed declaration.

§ 780.21 Notice.

The Board will serve upon the patent owner and all other parties a written notice of the Department's proposed action to declare the patent affected with the public interest, and the notice shall identify the patent and state the basis for the proposed declaration.

§ 780.22 Opposition, support and request for hearing.

(a) Any party may, within thirty (30) days after service of the notice or such other time as may be provided by the terms of the notice, file with the Board a written statement in opposition to or in support of the Department's proposed action. Such statement may also include a request for hearing. The statement shall contain a concise description of the facts, law, or any other relevant matter which the party believes should be reviewed by the Board during its consideration of the proposed declaration. If the request for a hearing is timely received, the Board shall call a hearing and provide notice of the time and place to all parties.

(b) Failure of all parties to oppose the proposed action or to request a hearing within the time specified in the notice shall be deemed an acquiescence to that action and may result in a declaration by the Board that the patent is affected with the public interest.

§ 780.23 Hearing and decision.

If a timely request for a hearing is made by any party, the Board will proceed with a hearing and decision. If a hearing is not requested, the Board shall prepare and issue its decision on the record.

§ 780.24 Criteria for declaring a patent affected with the public interest.

A patent shall be declared to be affected with the public interest pursuant to section 153a of the Act upon the Board's final decision that:

Department of Energy

§ 780.34

(a) The invention or discovery covered by the patent is of primary importance in the production or utilization of special nuclear material or atomic energy; and

(b) The licensing of such invention or discovery under section 153 of the Act is of primary importance to effectuate the policies and purposes of the Act.

Subpart C—Application for a License Pursuant to Section 153b(2) of the Atomic Energy Act of 1954

§ 780.30 Filing of application.

An applicant for a license pursuant to section 153b(2) of the Act, under a patent which the Department has declared to be affected with the public interest, shall file an application with the Board in accordance with §780.5. The Board will docket the application and serve notice of the docketing upon all parties.

§ 780.31 Contents of application.

Each application shall contain, in addition to the requirements specified in §780.5, the following information:

(a) The activities in the production or utilization of special nuclear material or atomic energy to which applicant proposes to apply the patent license;

(b) The nature and purpose of the applicant's intended use of the patent license;

(c) The relationship of the invention or discovery to the authorized activities to which it is to be applied, including an estimate of the effect on such activities stemming from the grant or denial of the license;

(d) Efforts made by the applicant to obtain a patent license from the owner of the patent;

(e) Terms, if any, on which the owner of the patent proposes to grant the applicant a patent license;

(f) The terms the applicant proposes for the patent license; and

(g) A request for either a hearing or a decision on the record.

§ 780.32 Response and request for hearing.

Any party within thirty (30) days after service of the notice of docketing of the application:

(a) May file with the Board a response containing a concise statement of the facts or law or any other relevant information which that party believes should be considered by the Board in opposition to or in support of the proposed application; and

(b) May file a request for a hearing or for a decision on the record.

§ 780.33 Hearing and decision.

If any party requests a hearing, the Board will proceed with a hearing and decision. If a hearing is not requested, the Board shall on the basis of the record prepare and issue its decision.

§ 780.34 Criteria for decision to issue a license.

A license shall issue to the applicant to use the invention covered by the patent declared to be affected with the public interest pursuant to subsection 153b(2) of the Act upon a final decision that:

(a) The activities to which the patent license is proposed to be applied are of primary importance to the applicant's conduct of an activity authorized under the Act; and

(b) The applicant has made efforts to obtain reasonable commercial terms and conditions and such efforts have not been successful within a reasonable period of time. The requirement to make such efforts may be waived by the Board in the case of a national emergency or other circumstances of extreme urgency or in cases of public non-commercial use. Where this requirement is waived due to national emergency or other circumstances of extreme urgency, the owner of the patent shall be notified as soon as reasonably practicable. Where this requirement is waived for a public non-commercial use, the owner of the patent shall be notified promptly.

[46 FR 39581, Aug. 4, 1981, as amended at 58 FR 68734, Dec. 29, 1993]

§ 780.35

§ 780.35 Communication of decision to General Counsel.

Following a determination to issue a patent license under section 153b(2) of the Act, the Board shall send the decision to the General Counsel and instruct the General Counsel to issue the license on terms deemed equitable by the Department and generally not less fair than those granted by the patentee or by the Department to similar licensees for comparable use.

§ 780.36 Conditions and issuance of license.

(a) Upon receipt of the Board's decision and instruction to issue a patent license, the General Counsel shall issue a license which complies with the following:

(1) The scope and durations of such use shall be limited to the purpose for which it was authorized;

(2) Such use shall be non-exclusive;

(3) Such use shall be non-assignable, except with that part of the enterprise or goodwill that enjoys such use;

(4) Any such use shall be authorized predominantly for the supply of the U.S. market; and,

(5) Authorization for such use shall be liable, subject to adequate protection of the legitimate interests of the persons so authorized, to be terminated if and when the circumstances that led to it cease to exist and are unlikely to recur.

(b) The Board shall have the authority to review, on motivated request, the continued existence of these circumstances. The parties will propose and agree on a reasonable royalty fee within a reasonable time as determined by the General Counsel. A reasonable royalty shall provide adequate remuneration for the circumstances of each case, taking into account the economic value of the authorization. If a party does not agree with the terms and conditions of the license as determined by the General Counsel or if a royalty fee cannot be agreed upon within the reasonable time period established by the General Counsel, any party may, within 30 days after the expiration of such time period, initiate a proceeding before the Board, in accordance with subpart E of this part, for a reconsideration of the General Counsel's deter-

10 CFR Ch. III (1-1-16 Edition)

mination. After the proceeding under subpart E of this part is completed, the General Counsel shall modify the patent license in accordance with the Board's determination.

[58 FR 68734, Dec. 29, 1993]

Subpart D—Application for a License Pursuant to Section 153c of the Atomic Energy Act of 1954

§ 780.40 Filing of application.

An application to the Department, pursuant to section 153c of the Act, for the issuance of a license to use the invention or discovery covered by a patent useful in the production or utilization of special nuclear material or atomic energy shall be filed with the Board in accordance with requirements of § 780.5.

§ 780.41 Contents of application.

In addition to the information specified in § 780.5, each application shall contain the following:

(a) The applicant's contention, with supporting data, that the invention or discovery covered by the patent is of primary importance in the production or utilization of special nuclear material or atomic energy;

(b) The applicant's contention, with supporting data, that the licensing of such invention or discovery is of primary importance to the conduct of the activities of the applicant, including information concerning:

(1) The activities in the production or utilization of special nuclear material or atomic energy to which applicant proposes to apply the license;

(2) The nature and purpose of the applicant's intended use of the patent license; and

(3) The relationship of the invention or discovery to the activities to which it is to be applied, including an estimate of the effect of such activities stemming from the grant or denial of the license.

(c) The applicant's contention, with supporting data, that the activities to which the patent license are proposed to be applied are of primary importance to the furtherance of policies and purposes of the Act;

Department of Energy

§ 780.47

(d) The applicant's contention, with supporting data, that such applicant cannot otherwise obtain a patent license from the owner of the patent on terms which are reasonable for the applicant's intended use of the patent, including information concerning:

(1) Efforts made by applicant to obtain a patent license from the owner of the patent; and

(2) Terms, if any, on which the owner of the patent proposed to grant applicant a patent license.

(e) The terms the applicant proposes as reasonable for the patent license; and

(f) A copy of any license, permit, or lease obtained by the applicant under the procedures outlined in section 153(c) of the Act.

§ 780.42 Notice of hearing.

Within thirty (30) days after the filing of the application, the Board will serve on all parties a notice of hearing to be held not later than sixty (60) days after the filing of the application.

§ 780.43 Response.

Any party may file a response with the Board containing a concise statement of the facts or law or any other relevant information in opposition to or in support of the application which that party believes should be considered by the Board. Such response must be filed by a party within twenty (20) days after being served a copy of the application.

§ 780.44 Hearing and decision.

In accordance with section 153d of the Act, the Board shall hold a hearing and issue a final decision on the application.

§ 780.45 Criteria for decision to issue a license.

A license shall issue to the applicant to use the invention covered by the patent for the purposes stated in the application upon a final decision that:

(a) The invention or discovery covered by the patent is of primary importance in the production or utilization of special nuclear material or atomic energy;

(b) The licensing of such invention or discovery is of primary importance to

the conduct of the activities of the applicant;

(c) The activities to which the patent license is proposed to be applied by such applicant are of primary importance to the furtherance of policies and purposes of the Act; and

(d) The applicant has made efforts to obtain reasonable commercial terms and conditions and such efforts have not been successful within a reasonable period of time. The requirement to make such efforts may be waived by the Board in the case of a national emergency or other circumstances of extreme urgency or in cases of public non-commercial use. Where this requirement is waived due to national emergency or other circumstances of extreme urgency, the owner of the patent shall be notified as soon as reasonably practicable. Where this requirement is waived for a public non-commercial use, the owner of the patent shall be notified promptly.

[46 FR 39581, Aug. 4, 1981, as amended at 58 FR 68734, Dec. 29, 1993]

§ 780.46 Communication of decision to General Counsel.

When the Board decides to issue a patent license under section 153c of the Act, the Board shall send the decision to the General Counsel and instruct the General Counsel to issue the license on terms deemed equitable by the Department and generally not less fair than those granted by the patentee or by the Department to similar licensees for comparable use.

§ 780.47 Conditions and issuance of license.

(a) Upon receipt of the Board's decision and instruction to issue a patent license, the General Counsel shall issue a license which complies with the following:

(1) The scope and durations of such use shall be limited to the purpose for which it was authorized;

(2) Such use shall be non-exclusive;

(3) Such use shall be non-assignable, except with that part of the enterprise or goodwill that enjoys such use;

(4) Any such use shall be authorized predominantly for the supply of the U.S. market; and,

§ 780.50

10 CFR Ch. III (1-1-16 Edition)

(5) Authorization for such use shall be liable, subject to adequate protection of the legitimate interests of the persons so authorized, to be terminated if and when the circumstances that led to it cease to exist and are unlikely to recur.

(b) The Board shall have the authority to review, on motivated request, the continued existence of these circumstances. The parties will propose and agree on a reasonable royalty fee within a reasonable time as determined by the General Counsel. A reasonable royalty shall provide adequate remuneration for the circumstances of each case, taking into account the economic value of the authorization. If a party does not agree with the terms and conditions of the license as determined by the General Counsel or if a royalty fee cannot be agreed upon within the reasonable time period established by the General Counsel, any party may, within 30 days after the expiration of such time period, initiate a proceeding before the Board, in accordance with subpart E of this part, for a reconsideration of the General Counsel's determination. After the proceeding under subpart E of this part is completed, the General Counsel shall modify the patent license in accordance with the Board's determination.

[46 FR 39581, Aug. 4, 1981, as amended at 58 FR 68734, Dec. 29, 1993]

Subpart E—Application for Royalties and Awards Under Section 157 of the Atomic Energy Act of 1954 and Compensation Under Section 173 of the Atomic Energy Act of 1954 and the Invention Secrecy Act (35 U.S.C. 183)

§ 780.50 Applicants.

(a) Any owner or licensee of a patent licensed under section 158 or subsections b or e of section 153 of the Act may file an application with the Board for the determination of a reasonable royalty fee.

(b) Any owner or licensee of a patent licensed under subsections b or e of section 153 of the Act may file an application with the Board for the modifica-

tion of any terms and conditions of the license.

(c) Any person who has made an invention or discovery useful in the production or utilization of special nuclear material or atomic energy, has complied with the provisions of section 151c, but, under the Act, is not entitled to a royalty for such invention or discovery, may file an application for an award.

(d) Any owner of a patent application that contains restricted data not belonging to the United States which the Department has communicated to any foreign nation may make application for just compensation pursuant to section 173 of the Act.

(e) Any patent applicant, whose patent is withheld because of a secrecy order issued at the request of the Department may, beginning at the date the patent applicant is notified that, except for such order, the application is otherwise in condition for allowance, apply for compensation for the damage caused by the secrecy order and/or for the use of the invention by the Government, resulting from any disclosure to the Department required by the Invention Secrecy Act.

§ 780.51 Form and content.

(a) Each application shall contain a statement of the applicant's interest in the patent, patent application, invention or discovery and identify any other claimants of whom the applicant has knowledge.

(b) Each application must contain a concise statement of all of the essential facts upon which it is based. No particular form of statement is required, but it will facilitate consideration of the application if the following specific data accompany the application:

(1) In the case of an issued patent, a copy of the patent.

(2) In the case of a patent application, a copy of the application and of all Patent and Trademark Office actions and responses thereto.

(3) In the case of an invention or discovery as to which a report has been filed with the Department pursuant to subsection c of section 151 of the Act, a copy of such report.

Department of Energy

§ 780.53

(4) In the case of an award, the date relied upon as the date of invention.

(5) In all cases, a statement of the extent to which the invention or discovery was developed through federally financed research or with other Federal support.

(6) In all cases, the degree of the utility, novelty, and importance of the invention or discovery.

(7) In all cases, a statement of the actual use by the Federal Government or others of such invention or discovery, to the extent known to the applicant.

(8) In all cases, the cost of developing the invention or discovery and acquiring the patent or patent application.

(9) The royalty fee proposed, the proposed terms and conditions of a license agreement, or the amount sought as compensation or award, as well as the basis used in calculating such fee, compensation or award and whether a lump sum or periodic payments are sought.

(10) In an application for just compensation pursuant to section 173 of the Act, the ownership of the invention that is the subject matter of the patent application at the time the Department communicated the restricted data shall be set forth, and any restricted data contained in the application shall be specifically identified.

(11) In an application for compensation under the authority provided in the Invention Secrecy Act (35 U.S.C. 183), for the damage caused by imposition of a secrecy order on a patent application and/or for the use of the invention by the Government, the date of the secrecy order, the date of the notice that the patent application is in condition for allowance, and, if known to the applicant, the date of the first use of the invention by the Government.

§ 780.52 Notice and hearing.

The Board shall, in its discretion, afford the applicable party an opportunity for a hearing for the presentation of relevant evidence. Thirty (30) days notice shall be given of the time and place of such hearing. After expiration of the notice period, the Board shall proceed with a hearing and render its decision.

§ 780.53 Criteria for decisions for royalties, awards and compensation.

(a) In deciding a reasonable royalty fee for a patent licensed under section 158 or sections 153b or 153e of the Act, the Board shall consider:

(1) The economic value of the compulsory license and the Board shall strive to provide adequate remuneration for the circumstances of each case.

(2) Any defense, general or special, that a defendant could plead in an action for infringement;

(3) The extent to which such patent was developed through federally financed research or with other Federal support;

(4) The degree of utility, novelty, and importance of the invention or discovery; and

(5) The cost to the owner of the patent of developing such invention or discovery or of acquiring such patent.

(b) In deciding whether or not to grant an award, under section 157 of the Act, for the making of an invention or discovery useful in the production or utilization of special nuclear material or atomic energy, the Board shall take into account the considerations set forth in §780.53(a) of this part and the actual use of such invention or discovery.

(c) In deciding whether or not to provide compensation, pursuant to section 173 of the Act, to a person who owns a patent application that contains restricted data not belonging to the United States which the Department has communicated to a foreign nation, the Board shall take into account the considerations set forth in §780.53(b) of this part and the damage to the applicant resulting from such communication.

(d) In the course of its review of an application to provide compensation, pursuant to 35 U.S.C. 183, to an applicant whose patent was withheld because of a secrecy order issued at the request of the Department, the Board shall take into account the considerations set forth in §780.53(b) of this part and:

(1) The damage sustained by the applicant as a result of the secrecy order; and

Pt. 781

10 CFR Ch. III (1–1–16 Edition)

(2) The use of the invention by the Government resulting from the disclosure of such invention to the Department.

AUTHORITY: 42 U.S.C. 2186, 42 U.S.C. 2201(g), and 35 U.S.C. 207–209.

SOURCE: 45 FR 73447, Nov. 4, 1980, unless otherwise noted.

GENERAL PROVISIONS

§ 781.1 Scope.

The regulations of this part supplement the U.S. Department of Commerce regulations, entitled LICENSING OF GOVERNMENT OWNED INVENTIONS, at 37 CFR Part 404.

[77 FR 4889, Feb. 1, 2012]

§ 781.2 Policy.

(a) It is the policy of this regulation to use the patent system to promote the utilization of inventions arising from Department of Energy supported research and development.

(b) Decisions as to grants or denials of any license application will, in the discretion of the Secretary of Energy, be based on the Department of Energy’s view of what is in the best interests of the United States and the general public under the provisions of

these regulations. Decisions of the Department of Energy under these regulations may be made on the Secretary of Energy’s behalf by the Assistant General Counsel for Technology Transfer and Intellectual Property, except where otherwise delegated.

[77 FR 4889, Feb. 1, 2012]

§ 781.3 [Reserved]

§ 781.4 Communications.

All communications concerning the regulations in this part, including applications for licenses, should be addressed or delivered to the General Counsel, Attention: Assistant General Counsel for Technology Transfer and Intellectual Property, U.S. Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585.

[77 FR 4889, Feb. 1, 2012]

TYPES OF LICENSES AND CONDITIONS FOR LICENSING

§§ 781.51–781.52 [Reserved]

§ 781.53 Additional licenses.

Subject to any outstanding licenses, nothing in this part shall preclude the Department of Energy from granting additional nonexclusive, or exclusive, or partially exclusive licenses for inventions covered by this part when the Department of Energy determines that to do so would provide for an equitable exchange of patent rights. The following circumstances are examples in which such licenses may be granted:

(a) In consideration of the settlement of interferences or other administrative proceedings before the U.S. Patent and Trademark Office;

(b) In consideration of a release of any claims;

(c) In exchange for or as a part of the consideration for a license under adversely held patents;

(d) As necessary for meeting obligations of the U.S. under any treaty, international agreement arrangement or cooperation, memorandum of understanding or similar arrangement; or

(e) In consideration for the settlement or resolution of any proceeding

Department of Energy

Pt. 782

under the Department of Energy Organization Act or other law.

[77 FR 4889, Feb. 1, 2012]

PROCEDURES

§§ 781.61–781.64 [Reserved]

§ 781.65 Appeals.

(a) Standing. The following parties have the right to appeal under this part:

(1) Pursuant to 37 CFR 404.11:

(i) A person whose application for a license has been denied;

(ii) A licensee whose license has been modified or terminated, in whole or in part;

(iii) A person who timely filed a written objection in response to the notice required by 37 CFR 404.7(a)(1)(i) or (b)(1)(i) and who can demonstrate to the satisfaction of the Federal agency that such person may be damaged by the agency action; or

(2) A management and operating contractor appealing an agency decision to grant a copyright license to a third party pursuant to the Rights in Data-Technology Transfer clause for DOE management and operating contracts per 48 CFR part 970.

(b) Notice of Appeal. Appeal under paragraph (a) of this section shall be initiated by filing a Notice of Appeal with the Secretary, ATTN: Deputy General Counsel for Technology Transfer and Procurement (“Deputy General Counsel”), within thirty (30) days from the date of receipt of a written notice by the Department of Energy of an action set forth in paragraph (a) of this section. The Notice of Appeal shall specify the portion of the decision from which the appeal is taken. A statement of fact and argument in the form of a brief in support of the appeal shall be submitted with the Notice of Appeal or within thirty (30) days thereafter.

(c) Procedure. Appeals under this section shall be conducted pursuant to rules of procedure provided by the Deputy General Counsel.

(d) Within sixty (60) days of receiving appellant’s brief pursuant to paragraph (b) of this section or such other time period set by the Deputy General Counsel, the Office of the Assistant General Counsel for Technology Transfer and

Intellectual Property shall submit to the Deputy General Counsel a response brief and shall timely serve a copy of the response brief to appellant.

(e) The Deputy General Counsel shall consider the facts and arguments submitted in appellant’s brief submitted under paragraph (b) of this section, as well as those presented by the Assistant General Counsel for Technology Transfer and Intellectual Property. An appeal by a licensee under paragraph (a)(1)(ii) of this section may include a hearing, upon request of the licensee, to address a dispute over any relevant fact. Such request for a hearing must be received by the Deputy General Counsel within thirty (30) days of appellant’s receipt of the response brief.

(f) The Deputy General Counsel shall issue a written decision, which shall constitute the final action of the Department on the matter.

(g) The parties may agree to Alternate Dispute Resolution in lieu of an appeal.

(h) Appeals Arising Under National Nuclear Security Administration (NNSA) Management and Operating Contracts. For appeals pursuant to paragraph (a)(2) of this section arising under management and operating contracts administered by NNSA for NNSA facilities, the NNSA Deputy General Counsel for Procurement shall be designated as the appeal authority (Deputy General Counsel) pursuant to paragraphs (b) through (f) of this section.

Subpart A—General

§ 782.1 Purpose.

The purpose of this regulation is to set forth policies and procedures for the filing and disposition of claims asserted against the Department of Energy of infringement of privately owned rights in patented inventions or copyrighted works.

§ 782.2 Objectives.

Whenever a claim of infringement of privately owned rights in patented inventions or copyrighted works is asserted against the Department of Energy, all necessary steps shall be taken to investigate and to settle administratively, to deny, or otherwise to dispose of such claim prior to suit against the United States.

§ 782.3 Authority.

The General Counsel or the General Counsel's delegate is authorized to investigate, settle, deny, or otherwise dispose of all claims of patent and copyright infringement pursuant to 42 U.S.C. 2201(g), 2223, 5817(d) and 7261; the Foreign Assistance Act of 1961, 22 U.S.C. 2356 (formerly the Mutual Security Acts of 1951 and 1954); the Invention Secrecy Act, 35 U.S.C. 183; and 28 U.S.C. 1498.

10 CFR Ch. III (1–1–16 Edition)

Subpart B—Requirements and Procedures

§ 782.5 Contents of communication initiating claim.

(a) *Requirements for claim.* A patent or copyright infringement claim for compensation, asserted against the United States as represented by the Department of Energy under any of the applicable statutes cited in § 782.3, must be actually communicated to and received by an agency, organization, office, or field establishment within the Department of Energy. Claims must be in writing and must include the following:

- (1) An allegation of infringement;
- (2) A request, either expressed or implied, for compensation;
- (3) A citation of the patents or copyrighted items alleged to be infringed;
- (4) In the case of a patent infringement claim, a sufficiently specific designation to permit identification of the items or processes alleged to infringe the patents, giving the commercial designation if known to the claimant, or, in the case of a copyright infringement claim, the acts alleged to infringe the copyright;
- (5) In the case of a patent infringement claim, a designation of at least one claim of each patent alleged to be infringed or, in the case of a copyright infringement claim, a copy of each work alleged to be infringed;
- (6) As an alternative to paragraphs (a) (4) and (5) of this section, certification that the claimant has made a bona fide attempt to determine the items or processes which are alleged to infringe the patents, or the acts alleged to infringe the copyrights, but was unable to do so, giving reasons, and stating a reasonable basis for the claimant's belief that the patents or copyrighted items are being infringed.

(b) *Additional information for patent infringement claims.* In addition to the information listed in paragraph (a) of this section the following material and information generally is necessary in the course of processing a claim of patent infringement. Claimants are encouraged to furnish this information at the time of filing a claim to permit rapid processing and resolution of the claim.

Department of Energy

§ 782.7

(1) A copy of the asserted patents and identification of all claims of the patents alleged to be infringed.

(2) Identification of all procurements known to claimant that involve the accused items or processes, including the identity of the vendors or contractors and the Government acquisition activity or activities.

(3) A detailed identification and description of the accused articles or processes, particularly where the articles or processes relate to components or subcomponents of the item acquired, and an element-by-element comparison of representative claims with the accused articles or processes. If available, the identification and description should include documentation and drawings to illustrate the accused articles or processes in sufficient detail to enable verification that the claims of the asserted patents read on the accused articles or processes.

(4) Names and addresses of all past and present licensees under the patents and copies of all license agreements and releases involving the patents.

(5) A brief description of all litigation in which the patents have been or are now involved, and their present status.

(6) A list of all persons to whom notices of infringement have been sent, including all departments and agencies of the Government, and a statement of the status or ultimate disposition of each.

(7) A description of Government employment or military service, if any, by the inventors or patent owner.

(8) A list of all contracts between the Government and inventors, patent owner, or anyone in privity with them that were in effect at the time of conception or actual reduction to practice of the inventions covered by the patents.

(9) Evidence of title to the asserted patents or other right to make the claim.

(10) If it is available to claimant, a copy of the Patent Office file of each patent.

(11) Pertinent prior art of which the claimant has become aware after issuance of the asserted patents.

In addition to the foregoing, if claimant can provide a statement that the

investigation may be limited to the specifically identified accused articles or processes, or to a specific acquisition (e.g. identified contracts), it may speed disposition of the claim.

(c) *Denial for refusal to provide information.* In the course of investigating a claim, it may become necessary for the Department of Energy to request information in the control and custody of claimant that is relevant to the disposition of the claim. Failure of the claimant to respond to a request for such information may be sufficient reason alone for denying a claim.

§ 782.6 Processing of administrative claims.

(a) *Filing and forwarding of claims.* All communications regarding claims should be addressed to:

General Counsel, ATTN: Assistant General Counsel for Patents, Office of the General Counsel, U.S. Department of Energy, Washington, DC 20545.

If any communication relating to a claim or possible claim of patent or copyright infringement is received by an agency, organization, office, or field establishment within the Department of Energy, it should be forwarded to the Assistant General Counsel for Patents.

(b) *Disposition and notification.* The General Counsel shall investigate and administratively settle, deny, or otherwise dispose of each claim by denial or settlement. When a claim is denied, the Department shall so notify the claimant or his authorized representative and provide the claimant with the reasons for denying the claim. Disclosure of information shall be subject to applicable statutes, regulations, and directives pertaining to security, access to official records, and the rights of others.

§ 782.7 Incomplete notice of infringement.

(a) If a communication alleging patent or copyright infringement is received that does not meet the requirements set forth above in § 782.5, the sender shall be advised in writing by the General Counsel:

§ 782.8

(1) That the claim for infringement has not been satisfactorily presented; and

(2) Of the elements considered necessary to establish a claim.

(b) A communication, such as a mere offer of a license, in which an infringement is not alleged in accordance with § 782.5(a) of this part shall not be considered a claim for infringement.

§ 782.8 Indirect notice of infringement.

If a patent or copyright owner communicates an allegation of infringement in the performance of a Government contract, grant, or other arrangement to addressees other than those specified in § 782.5(a), such as Department of Energy contractors including contractors operating government-owned facilities, the communication shall not be considered a claim within the meaning of § 782.5 until it meets the requirements of that section.

PART 783—WAIVER OF PATENT RIGHTS

Sec.

783.1 Waiver.

783.2 Limitations.

AUTHORITY: Secs. 152, 161, 68 Stat. 944, 948, as amended; (42 U.S.C. 2182, 2201).

SOURCE: 41 FR 56784, Dec. 30, 1976, unless otherwise noted.

§ 783.1 Waiver.

The Department of Energy, hereinafter "DOE", waives its rights under section 152 of the Atomic Energy Act of 1954 (66 Stat. 944) with respect to inventions and discoveries resulting from the use of the following materials and services:

(a) Source materials, special nuclear materials, and heavy water distributed by DOE in accordance with the "Schedules of Base Charges for Materials Sold or Leased by DOE for Use in Private Atomic Energy Development and Base Prices Which DOE Will Pay for Certain Products From Private Reactors."

(b) Radioactive and stable isotopes, irradiation services (this waiver does not include inventions or discoveries made by DOE or DOE contractor personnel in the course of or in connection

10 CFR Ch. III (1-1-16 Edition)

with the performance of an irradiation service), and radioactive material resulting from the performance of an irradiation service sold or distributed by DOE in accordance with the prices and charges established by:

(1) Oak Ridge National Laboratory Inventory and Price List of electromagnetically enriched and other stable isotopes.

(2) Oak Ridge National Laboratory Catalog and Price List of radioisotopes, special materials, and services.

(3) Idaho National Engineering Laboratory Catalog of Price and charges on irradiation services at the materials testing reactor. The waiver does include inventions or discoveries made by sponsor personnel in the course of their use of the Gamma Irradiation Facility at the Idaho National Engineering Laboratory.

(4) Argonne National Laboratory schedule of charges for irradiation services at its irradiation facilities.

(5) Brookhaven National Laboratory schedule of prices and charges for irradiation services and radioisotopes.

§ 783.2 Limitations.

(a) Except with regard to the use of the Gamma facility at the Idaho National Engineering Laboratory, nothing contained in this part shall be deemed to waive any rights in inventions or discoveries where a person or a group of persons acting on behalf of the person requesting the irradiation service works at the DOE facility in connection with the irradiation service. In such event, special arrangements are made.

(b) Nothing contained in this part shall be construed to affect the provisions of any written agreement to which DOE has or may become a party.

SOURCE: 61 FR 36614, July 12, 1996, unless otherwise noted.

§ 784.1 Scope and applicability.

(a) This part states the policy and establishes the procedures, terms and conditions governing waiver of the Government's rights in inventions made under contracts, grants, agreements, understandings or other arrangements with the Department of Energy (DOE).

(b) This part applies to all inventions conceived or first actually reduced to practice in the course of or under any contract, grant, agreement, understanding, or other arrangement with or for the benefit of DOE (including any subcontract, subgrant, or subagreement), the patent rights disposition of which is governed by section 152 of the Atomic Energy Act of 1954, 42 U.S.C. 2182, or section 9 of the Federal Non-nuclear Energy Research and Development Act of 1974, 42 U.S.C. 5908. In funding agreements with nonprofit organizations or small business firms, when title or other rights are reserved to the Government under the authority of 35 U.S.C. 202(a), this part will apply to any waiver of such rights. The patent waiver provisions in this part supersede the patent waiver regulations previously included with patent regulations at 41 CFR part 9-9.100.

§ 784.2 Definitions.

As used in this part:

Contract means procurement contracts, grants, agreements, understandings and other arrangements (including Cooperative Research and Development Agreements [CRADAs], Work for Others and User Facility agreements, which includes research, development, or demonstration work, and includes any assignment or substitution of the parties, entered into, with, or for the benefit of DOE.

Contractor means entities performing under contracts as defined above.

Patent Counsel means the DOE Patent Counsel assisting the contracting activity.

§ 784.3 Policy.

(a) Section 6 of Public Law 96-517 (the Bayh-Dole patent and trademark amendments of 1980), as amended, as codified at 35 U.S.C. 200-212, provides that title to inventions conceived or first actually reduced to practice in the course of or under any contract, grant, agreement, understanding, or other arrangement entered into with or for the benefit of the Department of Energy (DOE) vests in the United States, except where 35 U.S.C. 202 provides otherwise for nonprofit organizations or small business firms. However, where title to such inventions vests in the United States, the Secretary of Energy (hereinafter Secretary) or designee may waive all or any part of the rights of the United States, subject to required terms and conditions, with respect to any invention or class of inventions made or which may be made by any person or class of persons in the course of or under any contract of DOE if it is determined that the interests of the United States and the general public will best be served by such waiver. In making such determinations, the Secretary or designee shall have the following objectives:

(1) Making the benefits of the energy research, development, and demonstration program widely available to the public in the shortest practicable time;

(2) Promoting the commercial utilization of such inventions;

(3) Encouraging participation by private persons in DOE's energy research, development, and demonstration programs; and

(4) Fostering competition and preventing undue market concentration or the creation or maintenance of other situations inconsistent with the anti-trust laws.

(b) If it is not possible to attain the objectives in paragraphs (a)(1) through (4) immediately and simultaneously for any specific waiver determination, the Secretary or designee will seek to reconcile these objectives in light of the overall purposes of the DOE patent waiver policy, as set forth in section 152 of the Atomic Energy Act of 1954, 42

§ 784.4

10 CFR Ch. III (1–1–16 Edition)

U.S.C. 2182, section 9 of the Federal Nonnuclear Energy Research and Development Act of 1974, 42 U.S.C. 5908, Public Law 99–661, 42 U.S.C. 7261a, and, where not inconsistent therewith, the Presidential Memorandum to the Heads of Executive Departments and Agencies on Government Patent Policy issued February 18, 1983 and Executive Order No. 12591 issued April 10, 1987.

(c) The policy set forth in this section is applicable to all types of contracts as defined in § 784.2 of this part.

§ 784.4 Advance waiver.

This section covers inventions that may be conceived or first actually reduced to practice in the course of or under a particular contract. In determining whether an advance waiver will best serve the interests of the United States and the general public, the Secretary or designee (currently the Assistant General Counsel for Technology Transfer and Intellectual Property) shall, at a minimum, specifically include as considerations the following:

(a) The extent to which the participation of the contractor will expedite the attainment of the purposes of the program;

(b) The extent to which a waiver of all or any part of such rights in any or all fields of technology is needed to secure the participation of the particular contractor;

(c) The extent to which the work to be performed under the contract is useful in the production or utilization of special nuclear material or atomic energy;

(d) The extent to which the contractor's commercial position may expedite utilization of the research, development, and demonstration results;

(e) The extent to which the Government has contributed to the field of technology to be funded under the contract;

(f) The purpose and nature of the contract, including the intended use of the results developed thereunder;

(g) The extent to which the contractor has made or will make substantial investment of financial resources or technology developed at the contractor's private expense which will directly benefit the work to be performed under the contract;

(h) The extent to which the field of technology to be funded under the contract has been developed at the contractor's private expense;

(i) The extent to which the Government intends to further develop to the point of commercial utilization the results of the contract effort;

(j) The extent to which the contract objectives are concerned with the public health, public safety, or public welfare;

(k) The likely effect of the waiver on competition and market concentration;

(l) In the case of a domestic nonprofit educational institution under an agreement not governed by Chapter 18 of Title 35, United States Code, the extent to which such institution has a technology transfer capability and program approved by the Secretary or designee as being consistent with the applicable policies of this section;

(m) The small business status of the contractor under an agreement not governed by Chapter 18 of Title 35, United States Code, and

(n) Such other considerations, such as benefit to the U.S. economy, that the Secretary or designee may deem appropriate.

§ 784.5 Waiver of identified inventions.

This section covers the relinquishing by the Government to the contractor or inventor of title rights in a particular identified subject invention. In determining whether such a waiver of an identified invention will best serve the interests of the United States and the general public, the Secretary or designee shall, at a minimum, specifically include as considerations the following:

(a) The extent to which such waiver is a reasonable and necessary incentive to call forth private risk capital for the development and commercialization of the invention;

(b) The extent to which the plans, intentions, and ability of the contractor or inventor will obtain expeditious commercialization of such invention;

(c) The extent to which the invention is useful in the production or utilization of special nuclear material or atomic energy;

Department of Energy

§ 784.6

(d) The extent to which the Government has contributed to the field of technology of the invention;

(e) The purpose and nature of the invention, including the anticipated use thereof;

(f) The extent to which the contractor has made or will make substantial investment of financial resources or technology developed at the contractor's private expense which will directly benefit the commercialization of the invention;

(g) The extent to which the field of technology of the invention has been developed at the contractor's expense;

(h) The extent to which the Government intends to further develop the invention to the point of commercial utilization;

(i) The extent to which the invention is concerned with the public health, public safety, or public welfare;

(j) The likely effect of the waiver on competition and market concentration;

(k) In the case of a domestic non-profit educational institution under an agreement not governed by Chapter 18, Title 35, United States Code, the extent to which such institution has a technology transfer capability and program approved by the Secretary or designee as being consistent with the applicable policies of this section;

(l) The small business status of the contractor, under an agreement not governed by Chapter 18 of Title 35, United States Code; and,

(m) Such other considerations, such as benefit to the U.S. economy that the Secretary or designee may deem appropriate.

§ 784.6 National security considerations for waiver of certain sensitive inventions.

(a) Whenever, in the course of or under any Government contract or subcontract of the Naval Nuclear Propulsion Program or the nuclear weapons programs or other atomic energy defense activities of the Department of Energy, a contractor makes an invention or discovery to which title vests in the Department of Energy pursuant to statute, the contractor may request waiver of any or all of the Government's property rights. The Secretary

of Energy or designee may decide to waive the Government's rights.

(b) In making a decision under this section, the Secretary or designee shall consider, in addition to the objectives of DOE waiver policy as specified in § 784.3(a)(1) through (4), and the considerations specified in § 784.4 for advance waivers, and § 784.5 for waiver of identified inventions, the following:

(1) Whether national security will be compromised;

(2) Whether sensitive technical information (whether classified or unclassified) under the Naval Nuclear Propulsion Program or the nuclear weapons programs or other atomic energy defense activities of the Department of Energy for which dissemination is controlled under Federal statutes and regulations will be released to unauthorized persons;

(3) Whether an organizational conflict of interest contemplated by Federal statutes and regulations will result, and

(4) Whether waiving such rights will adversely affect the operation of the Naval Nuclear Propulsion Program or the nuclear weapons programs or other atomic energy defense activities of the Department of Energy.

(c) A decision under this § 784.6 shall be made within 150 days after the date on which a complete request for waiver, as described by paragraph (d) of this section, has been submitted to the Patent Counsel by the contractor.

(d) In addition to the requirements for content which apply generally to all waiver requests under paragraph (a) of this section, a requestor must include a full and detailed statement of facts, to the extent known by or available to the requestor, directed to the considerations set forth in paragraphs (b)(1) through (4) of this section, as applicable. To be considered complete, a waiver request must contain sufficient information, in addition to the content requirements under paragraphs (a) and (b) of this section, to allow the Secretary or designee to make a decision under this section. For advance waiver requests, such information shall include, at a minimum:

(1) An identification of all of the requestor's contractual arrangements involving the Government (including

§ 784.6

10 CFR Ch. III (1-1-16 Edition)

contracts, subcontracts, grants, or other arrangements) in which the technology involved in the contract was developed or used and any other funding of the technology by the Government, whether direct or indirect, involving any other party, of which the requestor is aware;

(2) A description of the requestor's past, current, and future private investment in and development of the technology which is the subject of the contract. This includes expenditures not reimbursed by the Government on research and development which will directly benefit the work to be performed under the instant contract, the amount and percentage of contract costs to be shared by the requestor, the out-of-pocket costs of facilities or equipment to be made available by the requestor for performance of the contract work which are not charged directly or indirectly to the Government under contract, and the contractor's plans and intentions to further develop and commercialize the technology at private expense;

(3) A description of competitive technologies or other factors which would ameliorate any anticompetitive effect of granting the waiver.

(4) Identification of whether the contract pertains to work that is classified, or sensitive, i.e., unclassified but controlled pursuant to section 148 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2168), or subject to export control under Chapter 17 of the Military Critical Technology List (MCTL) contained in Department of Defense Directive 5230.25 including identification of all principal uses of the subject matter of the contract, whether inside or outside the contractor program, and an indication of whether any such uses involve classified or sensitive technologies.

(5) Identification of all DOE and DOD programs and projects in the same general technology as the contract for which the requestor intends to be providing program planning advice or has provided program planning advice within the last three years.

(e) For identified invention requests under this section, such requests shall include at a minimum:

(1) A brief description of the intentions of the requestor (or its present or intended licensee) to commercialize the invention. This description should include:

(i) Estimated expenditures,

(ii) Anticipated steps,

(iii) The associated time periods to bring the invention to commercialization, and

(iv) A statement that requestor (or its present or intended licensee) has the capability to carry out its stated intentions.

(2) A description of any continuing Government funding of the development of the invention (including investigation of materials or processes for use therewith), from whatever Government source, whether direct or indirect, and, to the extent known by the requestor, any anticipated future Government funding to further develop the invention.

(3) A description of competitive technologies or other factors which would ameliorate any anticompetitive effects of granting the waiver.

(4) A statement as to whether or not the requestor would be willing to reimburse the Department of Energy for any and all costs and fees incurred by the Department in the preparation and prosecution of the patent applications covering the invention that is the subject of the waiver request.

(5) Where applicable, a statement of reasons why the request was not timely filed in accordance with the applicable patent rights clause of the contract, or why a request for an extension of time to file the request was not filed in a timely manner.

(6) Identification of whether the invention pertains to work that is classified, or sensitive, i.e., unclassified but controlled pursuant to section 148 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2168), or subject to export control under Chapter 17 of the Military Critical Technology List (MCTL) contained in Department of Defense Directive 5230.25, including identification of all principal uses of the invention inside or outside the contractor program, and an indication of whether any such uses involve classified or sensitive technologies.

Department of Energy

§ 784.8

(7) Identification of all DOE and DOD programs and projects in the same general technology as the invention for which the requestor intends to be providing program planning advice or has provided program planning advice within the last three years.

(8) A statement of whether a classification review of the invention disclosure, any resulting patent application(s), and/or any reports and other documents disclosing a substantial portion of the invention, has been made, together with any determinations on the existence of classified or sensitive information in either the invention disclosure, the patent application(s), or reports or other documents disclosing a substantial portion of the invention; and

(9) Identification of any and all proposals, work for other activities, or other arrangements submitted by the requestor, DOE, or a third party, of which requestor is aware, which may involve further funding of the work on the invention at either the contractor facility where the invention arose or another facility owned by the Government.

(f) Patent Counsel will notify the requestor promptly if the waiver request is found not to be a complete request and, in that event, will provide the requestor with a reasonable period, not to exceed 60 days, to correct any such incompleteness. If requestor does not respond within the allotted time period, the waiver request will be considered to be withdrawn. If requestor responds within the allotted time period, but the submittal is still deemed incomplete or insufficient, the waiver request may be denied.

(g) As set forth in paragraph (c) of this section, waiver decisions shall be made within 150 days after the date on which a complete request for waiver of such rights, as specified in this section, has been submitted by the requestor to the DOE Patent Counsel. If the original waiver request does not result in a communication from DOE Patent Counsel indicating that the request is incomplete, the 150-day period for decision commences on the date of receipt of the waiver request. If the original waiver request results in a communication from DOE Patent Counsel indi-

cating that the request is incomplete, the 150-day period for decision commences on the date on which supplementary information is received by Patent Counsel sufficient to make the waiver request complete. For advance waiver requests, if requestor is not notified that the request is incomplete, the 150-day period for decision commences on the date of receipt of the request, or on the date on which negotiation of contract terms is completed, whichever is later.

(h) Failure of DOE to make a patent waiver decision within the prescribed 150-day period shall in no way be construed as a grant of the waiver.

§ 784.7 Class waiver.

This section covers relinquishing of patent title rights by the Government to a class of persons or to a class of inventions. The authorization for class waivers is to be found at 42 U.S.C. 5908(c). Class waivers may be appropriate in situations where all members of a particular class would likely qualify for an advance or identified invention waiver. Normally, class waivers are originated by the Department. However, any person with a direct and substantial interest in a DOE program may request a class waiver by forwarding a written request therefor to the Patent Counsel. While no particular format for requesting a class waiver is prescribed, any request for a class waiver and any resulting determination by the Secretary or designee must address the pertinent objectives and considerations set forth in §§ 784.3(a), 784.4, 784.5, and 784.6.

§ 784.8 Procedures.

(a) All requests for waivers shall be in writing. Each request for a waiver other than a class waiver shall include the information set forth in § 784.9. Such requests may be submitted by existing or prospective contractors in the case of requests for an advance waiver and by contractors, including successor contractors at a facility, or employee-inventors in the case of requests for waiver of identified inventions.

(b) A request for an advance waiver should be submitted to the Contracting Officer (subcontractors may submit through their prime contractors) at

§ 784.8

10 CFR Ch. III (1–1–16 Edition)

any time prior to execution of the contract or subcontract, or within thirty days thereafter, or within such longer period as may be authorized by Patent Counsel for good cause shown in writing. If the purpose, scope, or cost of the contract is substantially altered by modification or extension after the waiver is granted, a new waiver request will be required. When advance waivers are granted, the provisions of the “Patent Rights—Waiver” clause set forth in § 784.12 shall be used in contracts which are the subject of the waivers, unless modified with the approval of the Patent Counsel to conform to the scope of the waiver granted. (See § 784.12.) Advance waivers may be requested for all inventions which may be conceived or first actually reduced to practice under a DOE contract. An advance waiver may also be requested for an identified invention conceived by the contractor before the contract but which may be first actually reduced to practice under the contract. Such waiver request must include a copy of any patent or patent application covering the identified invention, or if no patent application has been filed, a complete description of the invention.

(c) A request for waiver (other than an advance or class waiver) for an identified invention must be submitted to the Patent Counsel at the time the invention is to be reported to DOE or not later than eight months after conception and/or first actual reduction to practice, whichever occurs first in the course of or under the contract, or such longer period as may be authorized by Patent Counsel for good cause shown in writing by the requestor. The time for submitting a waiver request will not normally be extended past the time the invention has been advertised for licensing by DOE. If the Government has already filed a patent application on the invention, the requestor should indicate whether or not it is willing to reimburse the Government for the costs of searching, prosecution, filing and maintenance fees, in the event the waiver is granted.

(d) If the request for waiver contains insufficient information, the Patent Counsel may seek additional information from the requestor and from other

sources. The Patent Counsel will thoroughly analyze the request in view of each of the objectives and considerations and shall also consider the overall rights obtained by the Government in the patent, copyright, and data clauses of the contract. Where it appears that a waiver of a lesser part of the rights of the United States than requested would be more appropriate in view of the policies set forth, the Patent Counsel should attempt to negotiate a compromise acceptable to both the requestor and DOE. If approval of a waiver is recommended, Patent Counsel shall obtain an indication of agreement by the requestor to the proposed waiver scope, terms and conditions.

(e) The Patent Counsel will prepare a Statement of Considerations setting forth the rationale for either approving or denying the waiver request and will forward the Statement to the General Counsel or designee for review thereof. While the Statement need not provide specific findings as to each and every consideration of § 784.4 or § 784.5 of this part, it will cover those that are decisive, and it will explain the basis for the recommended determination. There may be occasions when the application of the various individual considerations of § 784.4 or § 784.5 of this part to a particular case could conflict, and in those instances the conflict will be reconciled giving due regard to the overall policies set forth in 784.3(a) (1) through (4).

(f) The Patent Counsel will also obtain comments from the appropriate DOE program organization to assist the Patent Counsel in the waiver determination. Additionally, if any other Federal Government entity has provided funding or will be providing funding, or if a subject invention has been made in whole or in part by an employee of that entity, Patent Counsel shall obtain permission to waive title to the undivided interest in the invention from the cognizant official of that entity. In situations where time does not permit a delay in contract negotiations for the preparation and mailing of a full written statement, field Patent Counsel may submit a recommendation on the waiver orally to the Assistant General Counsel for Technology Transfer and Intellectual

Department of Energy

§ 784.9

Property, who upon verbal consultation with the appropriate DOE program organization, shall provide a verbal decision to field Patent Counsel. All oral actions shall be promptly confirmed in writing. In approving waiver determinations, the Secretary or designee shall objectively review all requests for waiver in view of the objectives and considerations set forth in §§ 784.3 through 784.6. If the determination and the rationale therefor is not accurately reflected in the Statement of Considerations which has been submitted for approval, a new Statement of Considerations shall be prepared.

(g) In the event that a request for advance waiver is approved after the effective date of the contract, the Patent Counsel shall promptly notify the requestor by letter of the determination and the basis therefor. The letter shall state the scope, terms and conditions of such waiver. If the terms and conditions of an approved advance waiver were not incorporated in the contract when executed, the letter shall inform the requestor that the advance waiver shall be effective as of the effective date of the contract for an advance waiver of inventions identified, i.e., conceived prior to the effective date of the contract, or as of the date the invention is reported with an election by the contractor to retain rights therein, i.e., for an invention conceived or first actually reduced to practice after the effective date of the contract; provided a copy of the letter is signed and returned to the Contracting Officer by the requestor acknowledging the acceptance of the scope, terms and conditions of the advance waiver. After acceptance by the contractor of an advance waiver, the Contracting Officer shall cause a unilateral no-cost modification to be made to the contract incorporating the terms and conditions of the waiver in lieu of previous patent rights provisions.

(h) In the event that a waiver request is denied, the requestor may, within thirty days after notification of the denial, request reconsideration. Such a request shall include any additional facts and rationale not previously submitted which support the request. Request for reconsideration shall be submitted and processed in accordance

with the procedures for submitting waiver requests set forth in this section.

§ 784.9 Content of waiver requests.

(a) Forms (OMB No. 1901-0800) for submitting requests for advance and identified invention waivers, indicating the necessary information, may be obtained from the Contracting Officer or Patent Counsel. All requests for advance and identified invention waivers shall include the following information:

(1) The requestor's identification, business address, and, if represented by Counsel, the Counsel's name and address;

(2) An identification of the pertinent contract or proposed contract and a copy of the contract Statement of Work or a nonproprietary statement which fully describes the proposed work to be performed;

(3) The nature and extent of waiver requested;

(4) A full and detailed statement of facts, to the extent known by or available to the requestor, directed to each of the considerations set forth in §§ 784.4 or 784.5 of this part, as applicable, and a statement applying such facts and considerations to the policies set forth in § 784.3 of this part. It is important that this submission be tailored to the unique aspects of each request for waiver, and be as complete as feasible; and

(5) The signature of the requestor or authorized representative with the following statement: "The facts set forth in this request for waiver are within the knowledge of the requestor and are submitted with the intention that the Secretary or designee rely on them in reaching the waiver determination."

(b) In addition to the requirements of paragraph (a) of this section, requests for waiver of identified inventions shall include:

(1) The full names of all inventors;

(2) A statement of whether a patent application has been filed on the invention, together with a copy of such application if filed or, if not filed, a complete description of the invention;

(3) If a patent application has not been filed, any information which may indicate a potential statutory bar to

the patenting of the invention under 35 U.S.C. 102 or a statement that no such bar is known to exist; and

(4) Where the requestor is the inventor, written authorization from the applicable contractor or subcontractor permitting the inventor to request a waiver.

(c) Subject to statutes, DOE regulations, requirements, and restrictions on the treatment of proprietary and classified information; all material submitted in requests for waiver or in support thereof will be made available to the public after a determination on the waiver request has been made, regardless of whether a waiver is granted. Accordingly, requests for waiver should not normally contain information or data that the requestor is not willing to have made public. If proprietary or classified information is needed to make the waiver determination, such information shall be submitted only at the request of Patent Counsel.

§ 784.10 Record of waiver determinations.

The Assistant General Counsel for Technology Transfer and Intellectual Property shall maintain and periodically update a publicly available record of waiver determinations.

§ 784.11 Bases for granting waivers.

(a) The various factual situations which are appropriate for waivers cannot be categorized precisely because the appropriateness of a waiver will depend upon the manner in which the considerations set forth in §§ 784.4 or 784.5, and 784.6 if applicable, of this part relate to the facts and circumstances surrounding the particular contracting situation or the particular invention, in order to best achieve the objectives set forth in § 784.3 of this part. However, some examples where advance waivers might be appropriate are:

(1) Cost-shared contracts;

(2) Situations in which DOE is providing increased funding to a specific ongoing privately-sponsored research, development, or demonstration project;

(3) Situations such as Work for Others Agreements, User Facility Agreements or CRADAs, involving DOE-ap-

proved private use of Government facilities where the waiver requestor is funding a substantial part of the costs; and

(4) Situations in which the equities of the contractor are so substantial in relation to that of the Government that the waiver is necessary to obtain the participation of the contractor.

(b) Waivers may be granted as to all or any part of the rights of the United States to an invention subject to certain rights retained by the United States as set forth in § 784.12 of this part. The scope of the waiver will depend upon the relationship of the contractual situation or identified invention to considerations set forth in §§ 784.4 or 784.5, and 784.6, if applicable, in order to best achieve the objectives set forth in § 784.3. For example, waivers may be restricted to a particular field of use in which the contractor has substantial equities or a commercial position, or restricted to those uses that are not the primary object of the contract effort. Waivers may also be made effective for a specified duration of time, may be limited to particular geographic locations, may require the contractor to license others at reduced royalties in consideration of the Government's contribution to the research, development, or demonstration effort, or may require return of a portion of the royalties or revenue to the Government.

(c) Contractors shall not use their ability to award subcontracts as economic leverage to acquire rights for themselves in the subcontractor inventions, where the subcontractor(s) would prefer to petition for title. A waiver granted to a prime contractor is not normally applicable to inventions of subcontractors. However, in appropriate circumstances, the waiver given to the prime contractor may be made applicable to the waivable inventions of any or all subcontractors, such as where there are pre-existing special research and development arrangements between the prime contractor and subcontractor, or where the prime contractor and subcontractor are partners in a cooperative effort. In addition, in such circumstances, the prime contractor may be permitted to acquire

Department of Energy

§ 784.12

nonexclusive licenses in the subcontractors' inventions when a waiver of the subcontractor inventions is not covered by the prime contractor's waiver.

(d) In advance waivers of identified inventions, the invention will be deemed to be a subject invention and the waiver will be considered as being effective as of the effective date of the contract (see § 784.13(a)). This will be true regardless of whether the identified invention had been first actually reduced to practice prior to the time of contracting or would be reduced to practice under the contract or after expiration of the contract. One purpose of advance waivers of identified inventions is to establish the rights of the parties to such inventions when the facts surrounding the first actual reduction to practice prior to or during the contract are or will be difficult to establish.

§ 784.12 Terms and conditions of waivers.

The terms and conditions for waivers are set forth in the "Patent Rights—Waiver" clause in this section. A waiver of all foreign and domestic patent rights under a contract authorizes the use of this clause with any additions prescribed by the DOE Acquisition Regulations (48 CFR Chapter 9) or the terms of the waiver. This clause shall not be used in contracts with small business firms or nonprofit organizations subject to 35 U.S.C. 200 *et seq.* If a waiver of different scope is granted, the clause shall be modified to conform to the scope of the waiver granted. Advance waivers for arrangements other than contracts, grants, and cooperative agreements may use other clause provisions approved by the Assistant General Counsel for Technology Transfer and Intellectual Property, except that all waivers for funding agreements shall be subject to the license of clause paragraph (b) and the provisions of clause paragraphs (i) and (j). The terms and conditions of the clause shall also constitute the basis for confirmatory licenses regarding waivers of identified inventions. For inventions under advance waivers, a duly executed and approved instrument fully confirmatory of all rights to which the Government

is entitled is required to be submitted promptly after filing a patent application thereon. If, however, a waiver request is pending, delivery of the confirmatory instrument may be delayed until a determination on the waiver request is made. In the case of a waiver of an identified invention pursuant to a request for greater rights, the confirmatory instrument shall be agreed to or submitted to Patent Counsel before or at the time the waiver is granted.

PATENT RIGHTS—WAIVER

Use the clause at 48 CFR 52.227-12 with the following changes:

(1) In paragraph (a) "Definitions" add the following definitions:

Background patent means a domestic patent covering an invention or discovery which is not a Subject Invention and which is owned or controlled by the Contractor at any time through the completion of this contract:

(i) Which the Contractor, but not the Government, has the right to license to others without obligation to pay royalties thereon, and

(ii) Infringement of which cannot reasonably be avoided upon the practice of any specific process, method, machine, manufacture or composition of matter (including relatively minor modifications thereof) which is a subject of the research, development, or demonstration work performed under this contract.

Contract means any contract, grant, agreement, understanding, or other arrangement, which includes research, development, or demonstration work, and includes any assignment or substitution of parties.

DOE patent waiver regulations means the Department of Energy patent waiver regulations at 10 CFR part 784.

Patent Counsel means the Department of Energy Patent Counsel assisting the procuring activity.

Secretary means the Secretary of Energy.

(2) In paragraph (a) in the definition of "Subject invention" substitute: "course of or" for: "performance of work".

(3) In paragraph (b) "Allocation of principal rights," add at the beginning of first sentence:

"Whereas DOE has granted a waiver of rights to subject inventions to the Contractor,"

(4) In paragraph (c)(1), substitute:

"Patent Counsel within six months after conception or first actual reduction to practice, whichever occurs first in the course of or under this contract, but in any event, prior to any sale, public use, or public disclosure of such invention known to the Contractor." for.

“Contractor officer within 2 months after the inventor discloses it in writing to Contractor Personnel responsible for Patent matters * * * earlier.”

(5) In paragraph (c)(2) add at the end: “The Contractor shall notify the Patent Counsel as to those countries (including the United States) in which the Contractor will retain title not later than 60 days prior to the end of the statutory period.”

(6) In paragraph (c)(3) substitute: “but not later than at least 60 days” for “or, if earlier,”

(7) In paragraph (d) add (d)(5):

“(5) If the waiver authorizing the use of this clause is terminated as provided in paragraph (p) of this clause.”

(8) In paragraph (e)(1) add: “under paragraph (d) of this clause” after “Government obtains title.”

(9) In paragraph (e)(2) substitute “37 CFR part 404 and DOE licensing regulations.” for “the Federal Property Management regulations and agency licensing regulations (if any)”

(10) In paragraph (f)(5) substitute “the course of or” for “performance of work”.

(11) In paragraph (g) substitute paragraphs (1), (2) and (3) as follows:

(1) Unless otherwise directed by the Contracting Officer, the Contractor shall include the clause at 48 CFR 952.227–11, suitably modified to identify the parties, in all subcontracts, regardless of tier, for experimental, developmental, or research work to be performed by a small business firm or nonprofit organization, except where the work of the subcontract is subject to an Exceptional Circumstances Determination by DOE. In all other subcontracts, regardless of tier, for experimental, developmental, demonstration, or research work, the Contractor shall include the patent rights clause at 48 CFR 952.227–13 (suitably modified to identify the parties).

(2) The Contractor shall not, as part of the consideration for awarding the subcontract, obtain rights in the subcontractor’s subject inventions.

(3) In the case of subcontractors at any tier, Department, the subcontractor, and Contractor agree that the mutual obligations of the parties created by this clause constitute a contract between the subcontractor and the Department with respect to those matters covered by this clause.

(12) Substitute the following for paragraph (k):

(k) Background Patents

(1) The Contractor agrees:

(i) to grant to the Government a royalty-free, nonexclusive license under any Background Patent for purposes of practicing a subject of this contract by or for the Government in research, development, and demonstration work only.

(ii) that, upon written application by DOE, it will grant to responsible parties for purposes of practicing a subject of this contract, nonexclusive licenses under any Background Patent on terms that are reasonable under the circumstances. If, however, the Contractor believes that exclusive or partially exclusive rights are necessary to achieve expeditious commercial development or utilization, then a request may be made to DOE for DOE approval of such licensing by the Contractor.

(2) Notwithstanding paragraph (k)(1)(ii), the Contractor shall not be obligated to license any Background Patent if the Contractor demonstrates to the satisfaction of the Secretary or his designee that:

(i) a competitive alternative to the subject matter covered by said Background Patent is commercially available from one or more other sources; or

(ii) the Contractor or its licensees are supplying the subject matter covered by said Background Patent in sufficient quantity and at reasonable prices to satisfy market needs, or have taken effective steps or within a reasonable time are expected to take effective steps to so supply the subject matter.

(13) Add new paragraph (l) Communications as follows:

All reports and notifications required by this clause shall be submitted to the Patent Counsel unless otherwise instructed.

(14) In paragraph (m) add to end of sentence: “, except with respect to Background Patents, above.”

(15) In paragraph (n)(4) substitute “conducted in such a manner as” for “subject to appropriate conditions.”

(16) In paragraph (o) add at the end of the parenthetical phrase in the heading to the paragraph: “or grants”.

(17) In paragraph (o) add paragraph (o)(1)(v) as follows:

(v) Convey to the Government, using a DOE-approved form, the title and/or rights of the Government in each subject invention as required by this clause.

(18) In paragraph (o), substitute the following for (o)(3):

(3) Final payment under this contract shall not be made before the Contractor delivers to the Patent Counsel all disclosures of subject inventions required by paragraph (c)(1) of this clause, an acceptable final report pursuant to paragraph (f)(7)(ii) of this clause, and all past due confirmatory instruments, and the Patent Counsel has issued a patent clearance certification to the Contracting Officer.

(19) Add paragraphs (p), (q), (r), and (s) as follows:

(p) Waiver Terminations.

Any waiver granted to the Contractor authorizing the use of this clause (including any retention of rights pursuant thereto by the Contractor under paragraph (b) of this

clause) may be terminated at the discretion of the Secretary or his designee in whole or in part, if the request for waiver by the Contractor is found to contain false material statements or nondisclosure of material facts, and such were specifically relied upon by DOE in reaching the waiver determination. Prior to any such termination, the Contractor will be given written notice stating the extent of such proposed termination and the reasons therefor, and a period of 30 days, or such longer period as the Secretary or his designee shall determine for good cause shown in writing, to show cause why the waiver of rights should not be so terminated. Any waiver termination shall be subject to the Contractor's minimum license as provided in paragraph (e) of this clause.

(q) Atomic Energy.

No claim for pecuniary award or compensation under the provisions of the Atomic Energy Act of 1954, as amended, shall be asserted by the Contractor or its employees with respect to any invention or discovery made or conceived in the course of or under this contract.

(r) Publication.

It is recognized that during the course of work under this contract, the Contractor or its employees may from time to time desire to release or publish information regarding scientific or technical developments conceived or first actually reduced to practice in the course of or under this contract. In order that public disclosure of such information will not adversely affect the patent interests of DOE or the Contractor, approval for release of publication shall be secured from Patent Counsel prior to any such release or publication. In appropriate circumstances, and after consultation with the Contractor, Patent Counsel may waive the right of prepublication review.

(s) Forfeiture of rights in unreported subject inventions.

(1) The Contractor shall forfeit and assign to the Government, at the request of the Secretary of Energy or designee, all rights in any subject invention which the Contractor fails to report to Patent Counsel within six months after the time the Contractor:

(i) Files or causes to be filed a United States or foreign patent application thereon; or

(ii) Submits the final report required by paragraph (e)(2)(ii) of this clause, whichever is later.

(2) However, the Contractor shall not forfeit rights in a subject invention if, within the time specified in paragraph (m)(1) of this clause, the Contractor:

(i) Prepares a written decision based upon a review of the record that the invention was neither conceived nor first actually reduced to practice in the course of or under the contract and delivers the decision to Patent

Counsel, with a copy to the Contracting Officer; or

(ii) Contending that the subject invention is not a subject invention, the Contractor nevertheless discloses the subject invention and all facts pertinent to this contention to the Patent Counsel, with a copy to the Contracting Officer, or

(iii) Establishes that the failure to disclose did not result from the Contractor's fault or negligence.

(3) Pending written assignment of the patent application and patents on a subject invention determined by the Contracting Officer to be forfeited (such determination to be a Final Decision under the Disputes clause of this contract), the Contractor shall be deemed to hold the invention and the patent applications and patents pertaining thereto in trust for the Government. The forfeiture provision of this paragraph shall be in addition to and shall not supersede any other rights and remedies which the Government may have with respect to subject inventions.

§ 784.13 Effective dates.

Waivers shall be effective on the following dates:

(a) For advance waivers of identified inventions, i.e., inventions conceived prior to the effective date of the contract, on the effective date of the contract, even though the advance waiver may have been requested after that date;

(b) For identified inventions under advance waivers, i.e., inventions conceived or first actually reduced to practice after the effective date of the contract, on the date the invention is reported with the election to retain rights as to that invention; and

(c) For waivers of identified inventions (other than under an advance waiver), on the date of the letter from Patent Counsel notifying the requestor that the waiver has been granted.

SOURCE: 46 FR 44689, Sept. 4, 1981, unless otherwise noted.

Subpart A—General

§ 800.001 Purpose.

The purpose of this regulation is to set forth policies and procedures for the award and administration of loans to minority business enterprises. The loans are to assist such enterprises in participating fully in research, development, demonstration and contract activities of the Department of Energy. The loans are to defray a percentage of the cost of obtaining DOE contracts and other agreements, including procurements, cooperative agreements, grants, loans and loan guarantees; of obtaining subcontracts with DOE operating contractors; and of obtaining contracts with first-tier subcontractors of DOE operating contractors in furtherance of the research, development, demonstration or other contract activities of DOE. Issuance of loans under this regulation is limited to the extent funds are provided in advance in appropriation acts. This regulation imple-

10 CFR Ch. III (1-1-16 Edition)

ments the authority for such loans in section 211(e) of the Department of Energy (DOE) Organization Act, Public Law 95-619, title VI, section 641, November 9, 1978, 92 Stat. 3284 (42 U.S.C.A. 7141).

[48 FR 17574, Apr. 25, 1983]

§ 800.002 Program management.

Program management responsibility for financial assistance awarded under this regulation has been assigned to the Office of Minority Economic Impact.

§ 800.003 Definitions.

For the purpose of this regulation:

Act means the DOE Organization Act, Public Law 95-91, title II, as amended by the National Energy Conservation Policy Act, Public Law 95-619, title VI, section 641.

Applicant means a minority business enterprise which is seeking a loan under this regulation.

Application Approving Official means the Director of the Office of Minority Economic Impact.

Application Evaluation Panel (also referred to as the *Panel*) means a team of Federal employees appointed by the Application Approving Official to evaluate loan applications and make approval or disapproval recommendations regarding such applications.

Borrower means an applicant who enters into a loan agreement with DOE.

Contracting Officer means the DOE official warranted and authorized to contractually bind the Department of Energy and execute written agreements that are binding on the Department.

Costs of a bid or proposal means the cost of preparing, submitting and supporting a bid or proposal, whether solicited or not, for a DOE contract or other agreement such as a procurement contract, grant, cooperative agreement, loan or loan guarantee; or a subcontract with a DOE operating contractor; or a contract with a first-tier subcontractor of a DOE operating contractor in furtherance of the research, development, demonstration or other contract activities of DOE.

Default means the actual failure by the borrower to make payment of principal or interest in accordance with the terms and conditions of a loan issued

Department of Energy

§ 800.100

under this regulation, or the failure of the borrower to meet any other requirement specified as a default condition in the loan agreement.

Director means the Director of the Office of Minority Economic Impact (OMEI).

Loan, in reference to a loan made pursuant to the regulation, means a transaction in which a contractual instrument (“loan agreement”) is executed between the United States, as lender, acting through the Secretary of Energy, and a borrower. The instrument must obligate the United States to provide the borrower with a specified amount(s) of United States funds for a specified period of time and must obligate the borrower to use the moneys to bid for and attempt to obtain contracts and other agreements relating to DOE research, development, demonstration and contract activities, and to repay the moneys at a specified time at an agreed rate of interest. The words ‘loan’, ‘loan agreement’ and ‘transaction’ include (where the context does not require otherwise) the terms and conditions of related documents, such as the borrower’s note or bond or other evidence of, or security for, the borrower’s indebtedness.

Minority Business Enterprise means a firm including a sole proprietorship, corporation, association, or partnership which is at least 50 percent owned or controlled by a member of a minority or group of members of a minority. For the purpose of this definition, ‘control’ means direct or indirect possession of the power to direct, or cause the direction of, management and policies, whether through the ownership of voting securities, by contract or otherwise. An individual who is a citizen of the United States and who is a Negro, Puerto Rican, American Indian, Eskimo, Oriental, or Aleut, or is a Spanish speaking individual of Spanish descent, is a member of a “minority” as used in this regulation.

Operating Contractors means contractors under contracts having one of the following purposes, in accordance with the provisions of §9.50.001(a)(1) of the DOE procurement regulations (title 41 CFR part 9-50):

(a) DOE prime contracts for the management of Federal Government-owned

laboratories, production plants, and research facilities located on Federal Government-owned or Federal Government-leased sites, where the programs being conducted are considered of a long-term, continuing nature; or

(b) DOE prime contracts for the operation of Federal Government-owned facilities located on contractor-owned or leased sites where the programs being conducted are of a long-term, continuing nature. An example of this category would be those contracts with universities for the operation of Federal Government-owned facilities, for the purpose of conducting long-term basic research programs.

(c) Other contracts performed on sites owned by the Federal Government when so designated by the appropriate procurement official.

Secretary means the Secretary of the Department of Energy or his delegate.

[46 FR 44689, Sept. 4, 1981, as amended at 48 FR 17574, Apr. 25, 1983]

§ 800.004 Eligibility.

In order to be eligible for a loan, an applicant must be a minority business enterprise as defined in §800.003.

Subpart B—Loan Solicitation, Application and Review

§ 800.100 Solicitation of applications.

The Secretary will periodically issue an announcement soliciting applications under this regulation. The announcement will be published in the FEDERAL REGISTER, synopsisized in the *Commerce Business Daily*, and circulated to minority trade associations and organizations and to the Minority Business Development Agency and Small Business Administration. The announcement will indicate funds availability, eligibility requirements, application instructions, interest rates, maturities and other key loan terms and any applicable restrictions. In such solicitations, DOE shall further indicate that, in the case of applications for loans relating to bids or proposals for contracts with first-tier subcontractors of DOE operating contractors, information necessary to substantiate such applications may be unavailable to DOE

§ 800.101

10 CFR Ch. III (1-1-16 Edition)

from such subcontractors. If the substantiating information is not made available to DOE in a timely manner, the application may be rejected.

[46 FR 44689, Sept. 4, 1981, as amended at 48 FR 17574, Apr. 25, 1983]

§ 800.101 Application requirements.

(a) Applications for loans shall be filed, one original and three copies with: Department of Energy, Washington, DC 20585, Attention: Announcement No. DE-PS60-MI.

(b) An application for a loan under this regulation must include the following information. Items described in paragraphs (b)(1) through (7) of this section may be submitted for preliminary review in advance of a specific loan request but must be updated at time of loan request to reflect substantial changes.

(1) Applicant's name and address, with a description of the kind and size of its business, its business experience and its history as a minority business enterprise.

(2) Financial statements of applicant and its principals, including source of revenue and balance sheets for the current year and, as to applicant, for the two preceding years of applicant's existence as a business entity. The Secretary may require applicant to provide certification by a public accountant, or other certification acceptable to the Secretary.

(3) A description of any other Federal financial backing (direct loans, guaranteed loans, grants, etc.) applied for or obtained by the applicant within the previous five years, or expected to be applied for.

(4) A description of applicant's management structure, with list of applicant's key persons with their responsibilities and qualifications.

(i) In the case of a specific loan request this list should include any contractor or consultant whose services are proposed in connection with the bid or proposal for which the loan is sought.

(5) Affidavit(s) of eligibility (see § 800.004).

(6) Documentation as to applicant's authority to undertake the activities contemplated by the application. Such

documentation shall take substantially the following form:

(i) If the applicant is a corporation, a copy of the charter or certificate and articles of incorporation, with any amendments, duly certified by the Secretary of State of the State where organized, and a copy of the by-laws. There shall also be included a copy of all minutes, resolutions of stockholders or directors or other representatives of the applicant, properly attested, authorizing the filing of the application.

(ii) If the applicant is an association, a verified copy of its articles of association, if any, with an attested copy of the resolution of its governing board, if any, authorizing the filing of the application.

(iii) If the applicant is a business trust, a verified copy of the trust instrument and an attested copy of the resolution or other authority under which the application is made.

(iv) If the applicant is a joint stock company, a verified copy of the articles of association and of the authorizing resolution.

(v) If the application is made on behalf of a partnership, a copy of the partnership agreement, if any; if on behalf of a limited partnership, a duly certified copy, also, of the certificate of limited partnership, if such certificate is required to be obtained under state law governing such limited partnership.

(7) Credit references.

(8) Information on the award to be sought through the bid or proposal, as follows:

(i) Title, and whether in response to a solicitation or unsolicited.

(ii) Brief description of work to be performed.

(iii) Sponsoring DOE office, including solicitation number, if any.

(iv) If an unsolicited proposal is planned, the loan application shall indicate the appropriate DOE program personnel to be consulted as to whether there is potential for the proposal to be supported.

(v) Schedule for preparation and submission of the bid or proposal.

(9) Itemized cost estimates (and whether yet incurred).

Department of Energy

§ 800.102

(10) The required loan amount, not to exceed 75 percent of total bid or proposal costs, in accordance with § 800.200 on allowable costs.

(11) Requested loan maturity, in accordance with § 800.202(a)(3).

(12) How applicant will finance performance of work under a successful bid or proposal.

(13) Such other information as the Application Approving Official may deem necessary for evaluation in accordance with § 800.103 and for compliance with the provisions of this regulation.

(14) The application shall be signed by the applicant or on behalf of the applicant by an authorized representative. Verification may be by affidavit of an authorized representative of an applicant; attestation shall be by the authorized officer of an applicant.

NOTE: Title 18 United States Code, section 1001 provides criminal penalties for fraud and intentional false statements in information submitted in such an application.

§ 800.102 Review by Application Evaluation Panel.

(a) Applications for loans under this regulation shall be reviewed by an Application Evaluation Panel, which shall be appointed by the Application Approving Official. The Panel shall include, at a minimum, a representative of the Office of Minority Economic Impact, the contracting officer and a representative of the Office of the Controller.

(b) Panel review shall be conducted pursuant to paragraph (c) or (d) of this section, as applicable, to evaluate, to clarify and to develop information contained in the application and such other information as the Application Approving Official or the Panel may request.

(1) The Panel shall give priority to applications relating to a competitive solicitation, because of time limits on such solicitations. The Panel may defer action a maximum of five days after a solicitation has been announced in the *Commerce Business Daily* to provide all interested applicants an opportunity to apply.

(2) Initial screening will be in the order applications are received, but

time required to process an application may vary from case to case.

(c) *Panel review of specific loan requests.* (1) If an application contains a specific loan request, and complies with § 800.101, the Panel shall arrange for risk analysis, independent of any such analysis submitted by or on behalf of the applicant. Risk analysis shall be directed both to the loan request and to applicant's prospective performance of work pursuant to the bid or proposal.

(2) The Panel shall evaluate the loan request in light of the risk analysis, and shall give its conclusions in writing to the Application Approving Official, with respect to the following and to such other considerations as that official may direct:

(i) Applicant's eligibility as a minority business enterprise.

(ii) Compliance with the application requirements of § 800.101.

(iii) Compliance with § 800.200 on allowable costs.

(iv) Applicant's financial ability to make the bid or proposal without the loan.

(v) Applicant's contribution of, or ability to contribute, the 25% minimum share of allowable costs, or more.

(vi) Applicant's ability to prepare an adequate bid or proposal, if the loan is made.

(vii) Possibility of award to applicant pursuant to its bid or proposal.

NOTE: Normally, not more than three loans will be approved for the same competitive award.

(viii) Applicant's ability to perform pursuant to the bid or proposal.

(ix) Likelihood that applicant will repay the requested loan, regardless of success of applicant's bid or proposal.

(x) Optimal use of available program funds.

(xi) The Panel's recommendation.

(d) *Panel review of other applications.* If the application was submitted without a specific loan request, the Panel shall review the application in accordance with paragraph (b) of this section with the limited purpose of determining whether the applicant has complied with § 800.101, except as to matters determinable only with respect to a future specific loan request, and shall

§ 800.103

inform the Application Approving Official in writing as to its determinations.

§ 800.103 Review by Application Approving Official.

(a) The Application Approving Official shall consider the results of the Panel's review under section 102 (c) or (d), and such other information as the Application Approving Official determines to be relevant pursuant to the provisions of this regulation, and shall either approve or disapprove the application, giving it priority in accordance with the provisions of § 800.102(b).

(b) The Application Approving Official shall authorize a contracting officer to notify the applicant of approval or disapproval.

(c) An applicant whose application has been rejected will be informed, on request, of the reason for rejection. Rejection is not a bar to submission of an appropriately revised application.

Subpart C—Loans

§ 800.200 Maximum loan; allowable costs.

(a) A loan under this regulation shall not exceed 75 percent of allowable costs of a bid or proposal to obtain a DOE contract or other agreement (such as a procurement contract, cooperative agreement, grant, loan or loan guarantee), or a subcontract with a DOE operating contractor, or a contract with a first-tier subcontractor of a DOE operating contractor in furtherance of the research, development, demonstration or other contract activities of DOE.

(b) To be allowable, costs must, in DOE's judgment:

(1) Be consistent with the bidding cost principles of the Federal Procurement Regulation (41 CFR Ch. 1, 1-15.205-3) and DOE Procurement Regulation (41 CFR Ch. 9, 9-15.205-3); and

(2) Be necessary, reasonable and customary for the bid or proposal contemplated by the application; and

(3) Be incurred, or expected to be incurred, by the applicant.

(c) Costs which are, in general, allowable, if consistent with paragraph (b) of this section include, but are not limited to:

(1) Bid bond premiums.

10 CFR Ch. III (1-1-16 Edition)

(2) Financial, accounting, legal, engineering and other professional, consulting or similar fees and service charges.

(3) Printing and reproduction costs.

(4) Travel and transportation costs.

(5) Costs of the loan application under this rule.

(d) Costs that are not considered as allowable costs include the following:

(1) Fees and commissions charged to the applicant, including finder's fees, for obtaining Federal funds.

(2) Expenses, which, in DOE's judgment, have primarily an application broader than the specific loan request.

(3) Costs which, in DOE's judgment, fail to conform to paragraph (b) of this section.

[46 FR 44689, Sept. 4, 1981, as amended at 48 FR 17574, Apr. 25, 1983]

§ 800.201 Findings.

A loan shall issue under this regulation only if the Secretary, having reviewed the action of the Application Approving Official, and having considered such other information as the Secretary may deem pertinent, has made all the findings that follow:

(a) That the applicant is a minority business enterprise.

(b) That the loan will assist the enterprise to participate in the research, development, demonstration or contract activities of the Department of Energy by providing funds needed by applicant for bid or proposal purposes.

(c) That, by terms of the loan, applicant's use of the funds will be limited to bidding for and obtaining a contract or other agreement with the Department of Energy, a subcontract with a DOE operating contractor, or a contract with a first-tier subcontractor of a DOE operating contractor in furtherance of the research, development, demonstration or other contract activities of DOE.

(d) That the funds to be loaned will not exceed 75% of applicant's costs in bidding for and obtaining the contract or agreement.

(e) That the rate of interest on the loan has been determined in consultation with the Secretary of the Treasury.

(f) That there is a reasonable prospect that the applicant will make the

Department of Energy

§ 800.202

bid or proposal which is the purpose of the loan, will perform according to its bid or proposal, and will repay the loan according to the terms thereof, regardless of the success of its bid or proposal.

(g) That the terms and conditions of the loan are acceptable to the Secretary and comply with this regulation and with section 211(e) of the Department of Energy Organization Act.

[46 FR 44689, Sept. 4, 1981, as amended at 48 FR 17574, Apr. 25, 1983]

§ 800.202 Loan terms and conditions.

(a) The loan shall be based upon a loan agreement and the borrower's separate promissory note for the proceeds of the loan, including interest. The agreement and note shall be executed in writing between the borrower and the Secretary. The contracting officer shall execute the loan agreement on behalf of the Secretary. The loan agreement and the promissory note shall provide as follows, either at full length or by incorporation by reference to terms of the other of the two documents.

(1) The borrower agrees to repay the loan of funds provided by the Secretary.

(2) The interest rate on the loan is as established in consultation with the Secretary of the Treasury, taking into consideration the current average market yields of outstanding marketable obligations of the United States having maturities comparable to the loan.

(3) The loan shall be repaid over a maximum period as follows, in equal monthly installments of principal and interest, unless a different frequency of installments is specified by the Secretary:

Loan value	Maximum repayment ¹
\$0—\$5,000	3 years 3 months.
\$5,000—\$25,000	5 years 3 months.
Excess of \$25,000	8 years 3 months.

¹Maximum repayment period from date of initial disbursement.

Repayment of principal and interest shall begin within 90 days following the initial loan disbursement or such longer period as may be acceptable to the Secretary. Installments shall be applied to accrued interest first and then to repayment of principal. Past

due installments shall accrue interest at the quarterly current-value-of-funds-rate specified by the Treasury for overdue accounts. Prepayments may be made at any time without penalty.

(4) The borrower shall have appropriate opportunities, as specified in the loan agreement, to cure any default, failure, or breach of any of the covenants, conditions and obligations undertaken by the borrower pursuant to the provisions of the loan agreement.

(5) Loans of \$10,000 or less will be disbursed in a single disbursement. Disbursement of loans larger than \$10,000 shall be per schedule and documentation specified by the Secretary.

(6) The loan may be used by the borrower to defray as much as, but no more than, 75 percent of the cost of the bid or proposal within the limitations specified in § 800.200, on allowable costs. Costs incurred by the borrower prior to the effective date of the loan agreement, and allowable under § 800.200, may be credited toward the borrower's share of costs if, in DOE's judgment, they were primarily related to the bid or proposal, but shall not be reimbursed from the loan.

(7) The borrower shall make periodic reports regarding the bid or proposal.

(8) The borrower shall maintain good standing under Federal, State and local laws and regulations applicable to the conduct of its business, including current payment of all taxes, fees and other charges and all requisite licenses and other governmental authorization necessary for the continued operation of the business throughout the term of the loan.

(9) The borrower shall remain a minority business enterprise throughout the term of the loan.

(10) The borrower shall return funds disbursed, but not required together with accrued interest thereon, to DOE, or to the servicing agent, if applicable, when its bid or proposal is ready for submission. The return of unrequired funds shall be by check separate from any payment of interest or principal, shall be identified by the borrower as a return of unrequired funds, and shall be accompanied by the borrower's certification that so much of the loan as has been disbursed to the borrower and not returned has been, or will be, expended

§ 800.203

by the borrower for costs allowable under § 800.200.

(11) Such other provisions as the Secretary deems appropriate.

(b) The loan agreement shall also provide for loan servicing and monitoring in accordance with § 800.300 and § 800.301, loan limitation in accordance with § 800.302, assignment and transfer in accordance with § 800.303, default in accordance with § 800.304 and appeals in accordance with § 800.307.

(c) The Secretary may require, as preconditions to disbursement, that the borrower have specified amounts of working capital (including amounts derived from Federal financial assistance) and maintain specified financial ratios, where in the Secretary's judgment satisfaction of such preconditions is necessary to assure the borrower's ability to make and perform the contract, agreement or subcontract according to the bid or proposal, or is otherwise necessary to protect the interests of the United States.

(d) The Secretary may require pledges, personal guarantees and other collateral security, and the maintenance of insurance on the borrower's assets and principals, in amounts and on terms appropriate in the Secretary's judgment, to protect the interests of the United States.

§ 800.203 Loan limits.

The Secretary shall not make a loan in excess of \$50,000, or make aggregate loans to the same minority business enterprise, including its affiliates, in any Federal fiscal year in excess of \$100,000. In addition, the Secretary shall not increase a loan to an amount which would cause the limits set forth in the previous sentence to be exceeded. Nothing in this regulation shall be interpreted to restrict the Secretary, in making the various determinations provided for in this regulation, from taking into account considerations relating to the Office of Minority Economic Impact loan program as a whole.

§ 800.204 Deviations.

(a) To the extent consistent with the Act, relevant appropriations acts, and other applicable statutes, DOE may deviate on an individual application basis from the requirements of this regula-

10 CFR Ch. III (1-1-16 Edition)

tion upon a finding by the Secretary that such deviation is necessary or appropriate in the individual case for the accomplishment of program objectives.

(b) The contracting officer may, subject to written agreement by other necessary parties, modify or amend the terms and conditions of a loan provided that such modification or amendment shall be consistent with this regulation.

Subpart D—Loan Administration

§ 800.300 Loan servicing.

(a) Servicing of a loan under this regulation may be performed by DOE, by another Federal agency, or by a servicing agent (commercial bank, broker, or other financial institution or entity) having the capability, and legally qualified, to service the loan consistently with the requirements of this regulation, which contracts with DOE to act as servicing agent. In determining the capability of a prospective servicing agent, DOE shall give due consideration to the experience of the agent in providing financial services to minority business enterprises.

(b) If the servicing of the loan is by contract or other agreement, such contract or other agreement shall provide that the loan shall be serviced in accordance with this regulation and with the terms and conditions of the loan, under a standard of performance that a reasonable and prudent lender would require as to its own similar loan. Servicing responsibilities shall include, but not necessarily be limited to, the following:

(1) Loan disbursements as set forth in the loan agreement.

(2) Collection of principal and interest payments on a monthly basis.

(3) Maintenance of records on loan accounts.

(4) Notification of the Secretary, without delay, as to the following:

(i) That the initial disbursement or loan drawdown is ready to be made, together with evidence from the borrower that the bid or proposal preparation has begun or is about to begin.

(ii) The date and amount of each subsequent disbursement under the loan.

(iii) Any nonreceipt of payment within 10 days after the date specified for

Department of Energy

§ 800.305

payment, together with evidence of appropriate notification to the borrower.

(iv) Any known failure by the borrower to comply with the terms and conditions of the loan agreement.

(v) Evidence, if any, that the borrower is likely to default on any condition set forth in the loan agreement or may be unable to make the next scheduled payment of principal or interest.

(5) Submittal to DOE of periodic (semi-annual or annual) reports on the status and conditions of the loan and of the borrower.

§ 800.301 Monitoring.

The Secretary shall have the right to audit any and all costs of the bid or proposal for which the loan is sought or made and to exclude or reduce the includible amount of any cost in accordance with § 800.200. Auditors who are employees of the United States Government, who are designated by the Secretary of Energy or by the Comptroller General of the United States, shall have access to, and the right to examine, any directly pertinent documents and records of an applicant or borrower at reasonable times under reasonable circumstances. The servicing agent, if any, shall make information regarding the loan available to the Secretary of Energy and Comptroller General to the extent lawful and within its ability. The Secretary may direct the applicant or borrower to submit to an audit by public accountant or equivalent acceptable to the Secretary.

§ 800.302 Loan limitation.

The Secretary may limit the loan by written notice to the borrower to those amounts, if any, already disbursed under the loan, if the Secretary has determined that the borrower has failed to comply with a material term or condition set forth in the loan agreement.

§ 800.303 Assignment or transfer of loan.

Assignment or transfer of the loan and obligations thereunder may be made only with the prior written consent of the Secretary.

§ 800.304 Default.

(a) In the event that the borrower fails to perform the terms and conditions of the loan, the borrower shall be in default and the Secretary shall have the right, at the Secretary's option, to accelerate the indebtedness and demand full payment of all principal and interest amounts outstanding under the loan.

(b) No failure on the part of the Secretary to make demand at any time shall constitute a waiver of the rights held by the Secretary.

(c) Upon demand by the Secretary, the borrower shall have a period of not more than 30 days from the date of receipt of the Secretary's demand to make payment in full.

(d) In the event that the failure on the part of the borrower to perform the terms and conditions of the loan does not constitute an intentional act, but is brought about as a result of circumstances largely beyond the control of the borrower, or is deemed by the Secretary to be insubstantial, the Secretary may elect, at the Secretary's option, to defer such performance and/or restructure the repayment required by the loan agreement in any mutually acceptable manner.

(e) Should the borrower fail to pay after demand as provided in paragraph (c) of this section, and no deferral or restructuring is agreed to by the Secretary as provided in paragraph (d) of this section, the Secretary shall undertake collection in accordance with the terms of the loan agreement and the applicable law.

§ 800.305 Disclosure.

Information received from an applicant by DOE may be available to the public subject to the provision of 5 U.S.C. 552, 18 U.S.C. 1905 and 10 CFR part 1004; provided that:

(a) Subject to the requirements of law, information such as trade secrets, commercial and financial information, and other information concerning the minority business enterprise that the enterprise submits to DOE in writing, in an application, or at other times throughout the duration of the loan on a privileged or confidential basis, will not be disclosed without prior notice to

§ 800.306

submitter in accordance with DOE regulations concerning public disclosure of information. Any submitter asserting that the information is privileged or confidential should appropriately identify and mark such information.

(b) Upon a showing satisfactory to the Secretary that any information or portion thereof obtained under this regulation would, if made public, divulge trade secrets or other proprietary information of the minority business enterprise, the Secretary may not disclose such information.

(c) This section shall not be construed as authority to withhold information from Congress or from any committee of Congress upon request of the Chairman.

§ 800.306 Noninterference with other laws.

Nothing in this regulation shall be construed to modify requirements imposed on the borrower by Federal, State and local government agencies in connection with permits, licenses, or other authorizations to conduct or finance its business.

§ 800.307 Appeals.

Any dispute concerning questions of fact arising under the loan agreement shall be decided in writing by the contracting officer. The borrower may request the contracting officer to reconsider any such decision, which reconsideration shall be promptly undertaken. If not satisfied with the contracting officer's final decision, the borrower, upon receipt of such written decision, may appeal the decision within 60 days in writing to the Chairman, Financial Assistance Appeals Board (FAAB), Department of Energy, Washington, DC 20585. The Board shall proceed in accordance with the Department of Energy's rules and regulations for such purpose. The decision of the Board with respect to such appeals shall be the final decision of the Secretary.

APPENDIX A TO PART 810—GENERALLY AUTHORIZED DESTINATIONS

AUTHORITY: Secs. 57, 127, 128, 129, 161, 222, and 232 Atomic Energy Act of 1954, as amended by the Nuclear Nonproliferation Act of 1978, Pub. L. 95–242, 68 Stat. 932, 948, 950, 958, 92 Stat. 126, 136, 137, 138 (42 U.S.C. 2077, 2156, 2157, 2158, 2201, 2272, 2280), and the Intelligence Reform and Terrorism Prevention Act of 2004, Pub. L. 108–458, 118 Stat. 3768; Sec. 104 of the Energy Reorganization Act of 1974, Pub. L. 93–438; Sec. 301, Department of Energy Organization Act, Pub. L. 95–91; National Nuclear Security Administration Act, Pub. L. 106–65, 50 U.S.C. 2401 *et seq.*, as amended.

SOURCE: 80 FR 9375, Feb. 23, 2015, unless otherwise noted.

§ 810.1 Purpose.

The regulations in this part implement section 57 b.(2) of the Atomic Energy Act, which empowers the Secretary, with the concurrence of the Department of State, and after consultation with the Nuclear Regulatory Commission, the Department of Commerce, and the Department of Defense, to authorize persons to directly or indirectly engage or participate in the development or production of special nuclear material outside the United States. The purpose of the regulations in this part is to:

(a) Identify activities that are generally authorized by the Secretary and thus require no other authorization under this part;

(b) Identify activities that require specific authorization by the Secretary and explain how to request authorization; and

Department of Energy

§810.3

(c) Specify reporting requirements for authorized activities.

§810.2 Scope.

(a) Part 810 (this part) applies to:

(1) All persons subject to the jurisdiction of the United States who directly or indirectly engage or participate in the development or production of any special nuclear material outside the United States; and

(2) The transfer of technology that involves any of the activities listed in paragraph (b) of this section either in the United States or abroad by such persons or by licensees, contractors or subsidiaries under their direction, supervision, responsibility, or control.

(b) The activities referred to in paragraph (a) of this section are:

(1) Chemical conversion and purification of uranium and thorium from milling plant concentrates and in all subsequent steps in the nuclear fuel cycle;

(2) Chemical conversion and purification of plutonium and neptunium;

(3) Nuclear fuel fabrication, including preparation of fuel elements, fuel assemblies and cladding thereof;

(4) Uranium isotope separation (uranium enrichment), plutonium isotope separation, and isotope separation of any other elements (including stable isotope separation) when the technology or process can be applied directly or indirectly to uranium or plutonium;

(5) Nuclear reactor development, production or use of the components within or attached directly to the reactor vessel, the equipment that controls the level of power in the core, and the equipment or components that normally contain or come in direct contact with or control the primary coolant of the reactor core;

(6) Development, production or use of production accelerator-driven subcritical assembly systems;

(7) Heavy water production and hydrogen isotope separation when the technology or process has reasonable potential for large-scale separation of deuterium (^2H) from protium (^1H);

(8) Reprocessing of irradiated nuclear fuel or targets containing special nuclear material, and post-irradiation examination of fuel elements, fuel assem-

blies and cladding thereof, if it is part of a reprocessing program; and

(9) The transfer of technology for the development, production, or use of equipment or material especially designed or prepared for any of the above listed activities. (See Nuclear Regulatory Commission regulations at 10 CFR part 110, Appendices A through K, and O, for an illustrative list of items considered to be especially designed or prepared for certain listed nuclear activities.)

(c) This part does not apply to:

(1) Exports authorized by the Nuclear Regulatory Commission, Department of State, or Department of Commerce;

(2) Transfer of publicly available information, publicly available technology, or the results of fundamental research;

(3) Uranium and thorium mining and milling (e.g., production of impure source material concentrates such as uranium yellowcake and all activities prior to that production step);

(4) Nuclear fusion reactors per se, except for supporting systems involving hydrogen isotope separation technologies within the scope defined in paragraph (b)(7) of this section and §810.7(c)(3);

(5) Production or extraction of radiopharmaceutical isotopes when the process does not involve special nuclear material; and

(6) Transfer of technology to any individual who is lawfully admitted for permanent residence in the United States or is a protected individual under the Immigration and Naturalization Act (8 U.S.C. 1324b(a)(3)).

(d) Persons under U.S. jurisdiction are responsible for their foreign licensees, contractors, or subsidiaries to the extent that the former have control over the activities of the latter.

§810.3 Definitions.

As used in this part 810:

Agreement for cooperation means an agreement with another nation or group of nations concluded under sections 123 or 124 of the Atomic Energy Act.

Assistance means assistance in such forms as instruction, skills, training,

§810.3

10 CFR Ch. III (1–16 Edition)

working knowledge, consulting services, or any other assistance as determined by the Secretary. Assistance may involve the transfer of technical data.

Atomic Energy Act means the Atomic Energy Act of 1954, as amended.

Classified information means national security information classified under Executive Order 13526 or any predecessor or superseding order, and Restricted Data classified under the Atomic Energy Act.

Cooperative enrichment enterprise means a multi-country or multi-company (where at least two of the companies are incorporated in different countries) joint development or production effort. The term includes a consortium of countries or companies or a multinational corporation.

Country, as well as government, nation, state, and similar entity, shall be read to include Taiwan, consistent with section 4 of the Taiwan Relations Act (22 U.S.C. 3303).

Development means any activity related to all phases before production such as: Design, design research, design analysis, design concepts, assembly and testing of prototypes, pilot production schemes, design data, process of transforming design data into a product, configuration design, integration design, and layouts.

DOE means the U.S. Department of Energy.

Enrichment means isotope separation of uranium or isotope separation of plutonium, regardless of the type of process or separation mechanism used.

Fissile material means isotopes that readily fission after absorbing a neutron of any energy, either fast or slow. Fissile materials are uranium-235, uranium-233, plutonium-239, and plutonium-241.

Foreign national means an individual who is not a citizen or national of the United States, but excludes U.S. lawful permanent residents and protected individuals under the Immigration and Naturalization Act (8 U.S.C. 1324b(a)(3)).

Fundamental research means basic and applied research in science and engineering, the results of which ordinarily are published and shared broadly within the scientific community, as

distinguished from proprietary research and from industrial development, design, production, and product utilization, the results of which ordinarily are restricted for proprietary or national security reasons.

General authorization means an authorization granted by the Secretary under section 57 b.(2) of the Atomic Energy Act to provide assistance or technology to foreign atomic energy activities subject to this part and which does not require a request for, or the Secretary's issuance of, a specific authorization.

IAEA means the International Atomic Energy Agency.

NNPA means the Nuclear Non-Proliferation Act of 1978, 22 U.S.C. 3201 *et seq.*

NPT means the Treaty on the Non-Proliferation of Nuclear Weapons, done on July 1, 1968.

Nuclear reactor means an apparatus, other than a nuclear explosive device, designed or used to sustain nuclear fission in a self-sustaining chain reaction.

Operational safety means the capability of a reactor to be operated in a manner that complies with national standards or requirements or widely-accepted international standards and recommendations to prevent uncontrolled or inadvertent criticality, prevent or mitigate uncontrolled release of radioactivity to the environment, monitor and limit staff exposure to radiation and radioactivity, and protect off-site population from exposure to radiation or radioactivity. Operational safety may be enhanced by providing expert advice, equipment, instrumentation, technology, software, services, analyses, procedures, training, or other assistance that improves the capability of the reactor to be operated in compliance with such standards, requirements or recommendations.

Person means:

(1) Any individual, corporation, partnership, firm, association, trust, estate, public or private institution;

(2) Any group, government agency other than DOE, or any State or political entity within a State; and

(3) Any legal successor, representative, agent, or agency of the foregoing.

Department of Energy

§810.3

Production means all production phases such as: Construction, production engineering, manufacture, integration, assembly or mounting, inspection, testing, and quality assurance.

Production accelerator means a particle accelerator especially designed, used, or intended for use with a production subcritical assembly.

Production accelerator-driven subcritical assembly system means a system comprised of a production subcritical assembly and a production accelerator and which is especially designed, used, or intended for the production of plutonium or uranium-233. In such a system, the production accelerator target provides a source of neutrons used to effect special nuclear material production in the production subcritical assembly.

Production reactor means a nuclear reactor especially designed or used primarily for the production of plutonium or uranium-233.

Production subcritical assembly means an apparatus that contains source material or special nuclear material to produce a nuclear fission chain reaction that is not self-sustaining and that is especially designed, used, or intended for the production of plutonium or uranium-233.

Publicly available information means information in any form that is generally accessible, without restriction, to the public.

Publicly available technology means technology that is already published or has been prepared for publication; arises during, or results from, fundamental research; or is included in an application filed with the U.S. Patent Office and eligible for foreign filing under 35 U.S.C. 184.

Restricted Data means all data concerning:

- (1) Design, manufacture, or utilization of atomic weapons;
- (2) The production of special nuclear material; or
- (3) The use of special nuclear material in the production of energy, but shall not include data declassified or removed from the Restricted Data category pursuant to section 142 of the Atomic Energy Act.

Secretary means the Secretary of Energy.

Sensitive nuclear technology means any information (including information incorporated in a production or utilization facility or important component part thereof) which is not available to the public (see definition of "publicly available information") and which is important to the design, construction, fabrication, operation, or maintenance of a uranium enrichment or nuclear fuel reprocessing facility or a facility for the production of heavy water, but shall not include Restricted Data controlled pursuant to chapter 12 of the Atomic Energy Act. The information may take a tangible form such as a model, prototype, blueprint, or operation manual or an intangible form such as assistance.

Source material means:

- (1) Uranium or thorium, other than special nuclear material; or
- (2) Ores that contain by weight 0.05 percent or more of uranium or thorium, or any combination of these materials.

Special nuclear material means:

- (1) Plutonium,
- (2) Uranium-233, or
- (3) Uranium enriched above 0.711 percent by weight in the isotope uranium-235.

Specific authorization means an authorization granted by the Secretary under section 57b.(2) of the Atomic Energy Act, in response to an application filed under this part, to engage in specifically authorized nuclear activities subject to this part.

Technical data means data in such forms as blueprints, plans, diagrams, models, formulae, engineering designs, specifications, manuals, and instructions written or recorded on other media or devices such as disks, tapes, read-only memories, and computational methodologies, algorithms, and computer codes that can directly or indirectly affect the production of special nuclear material.

Technology means assistance or technical data required for the development, production or use of any plant, facility, or especially designed or prepared equipment for the activities described in §810.2(b).

§ 810.4

Use means operation, installation (including on-site installation), maintenance (checking), repair, overhaul, or refurbishing.

United States, when used in a geographical sense, includes Puerto Rico and all territories and possessions of the United States.

§ 810.4 Communications.

(a) All communications concerning the regulations in this part should be addressed to: U.S. Department of Energy, Washington, DC 20585. Attention: Senior Policy Advisor, National Nuclear Security Administration/Office of Nonproliferation and Arms Control (NPAC), Telephone (202) 586-1007.

(b) Communications also may be delivered to DOE's headquarters at 1000 Independence Avenue SW., Washington, DC 20585. All clearly marked proprietary information will be given the maximum protection allowed by law.

(c) Communications may also be delivered by email to: *Part810@nnsa.doe.gov*. For "fast track" activities described in §§ 810.6(c)(1) and (c)(2) emails should be sent to: *Part810-OperationalSafety@nnsa.doe.gov*. Notifications regarding activity in the Ukraine should be delivered by email to: *Part810-Ukraine@nnsa.doe.gov*.

§ 810.5 Interpretations.

(a) The advice of the DOE Office of Nonproliferation and Arms Control may be requested on whether a proposed activity falls outside the scope of this part, is generally authorized under § 810.6, or requires a specific authorization under § 810.7. However, unless authorized by the Secretary in writing, no interpretation of the regulations in this part other than a written interpretation by the DOE General Counsel is binding upon DOE.

(b) When advice is requested from the DOE Office of Nonproliferation and Arms Control, or a binding, written determination is requested from the DOE General Counsel, a response normally will be made within 30 calendar days and, if this is not feasible, an interim response will explain the reason for the delay.

(c) The DOE Office of Nonproliferation and Arms Control may periodically publish abstracts of general or

10 CFR Ch. III (1-1-16 Edition)

specific authorizations that may be of general interest, exclusive of proprietary business-confidential data submitted to DOE or other information protected by law from unauthorized disclosure.

§ 810.6 Generally authorized activities.

The Secretary has determined that the following activities are generally authorized, provided that no sensitive nuclear technology or assistance described in § 810.7 is involved:

(a) Engaging directly or indirectly in the production of special nuclear material at facilities in countries or with entities listed in the Appendix to this part;

(b) Transfer of technology to a citizen or national of a country other than the United States not listed in the Appendix to this part and working at an NRC-licensed facility, provided:

(1) The foreign national is lawfully employed by or contracted to work for a U.S. employer in the United States;

(2) The foreign national executes a confidentiality agreement with the U.S. employer to safeguard the technology from unauthorized use or disclosure;

(3) The foreign national has been granted unescorted access in accordance with NRC regulations at an NRC-licensed facility; and

(4) The foreign national's U.S. employer authorizing access to the technology complies with the reporting requirements in § 810.12(g).

(c) Activities at any safeguarded or NRC-licensed facility to:

(1) Prevent or correct a current or imminent radiological emergency posing a significant danger to the health and safety of the off-site population, which emergency in DOE's assessment cannot be met by other means, provided DOE is notified in writing in advance and does not object within 48 hours of receipt of the advance notification;

(2) Furnish operational safety information or assistance to existing safeguarded civilian nuclear reactors outside the United States in countries with safeguards agreements with the IAEA or an equivalent voluntary offer, provided DOE is notified in writing and approves the activity in writing within

Department of Energy

§810.9

45 calendar days of the notice. The applicant should provide all the information required under §810.11 and specific references to the national or international safety standards or requirements for operational safety for nuclear reactors that will be addressed by the assistance; or

(3) Furnish operational safety information or assistance to existing, proposed, or new-build civilian nuclear facilities in the United States, provided DOE is notified by certified mail return receipt requested and approves the activity in writing within 45 calendar days of the notice. The applicant should provide all the information required under §810.11.

(d) Participation in exchange programs approved by the Department of State in consultation with DOE;

(e) Activities carried out in the course of implementation of the "Agreement between the United States of America and the IAEA for the Application of Safeguards in the United States," done on December 9, 1980;

(f) Activities carried out by persons who are full-time employees of the IAEA or whose employment by or work for the IAEA is sponsored or approved by the Department of State or DOE; or

(g) Extraction of Molybdenum-99 for medical use from irradiated targets of enriched uranium, provided that the activity does not also involve purification and recovery of enriched uranium materials, and provided further, that the technology used does not involve significant components relevant for reprocessing spent nuclear reactor fuel (*e.g.*, high-speed centrifugal contactors, pulsed columns).

§810.7 Activities requiring specific authorization.

Any person requires a specific authorization by the Secretary before:

(a) Engaging in any of the activities listed in §810.2(b) with any foreign country or entity not specified in the Appendix to this part;

(b) Providing or transferring sensitive nuclear technology to any foreign country or entity; or

(c) Engaging in or providing technology (including assistance) for any of the following activities with respect to any foreign country or entity (or a cit-

izen or national of that country other than U.S. lawful permanent residents or protected individuals under the Immigration and Naturalization Act (8 U.S.C. 1324b(a)(3)):

(1) Uranium isotope separation (uranium enrichment), plutonium isotope separation, or isotope separation of any other elements (including stable isotope separation) when the technology or process can be applied directly or indirectly to uranium or plutonium;

(2) Fabrication of nuclear fuel containing plutonium, including preparation of fuel elements, fuel assemblies, and cladding thereof;

(3) Heavy water production, and hydrogen isotope separation, when the technology or process has reasonable potential for large-scale separation of deuterium (^2H) from protium (^1H);

(4) Development, production or use of a production accelerator-driven subcritical assembly system;

(5) Development, production or use of a production reactor; or

(6) Reprocessing of irradiated nuclear fuel or targets containing special nuclear material.

§810.8 Restrictions on general and specific authorization.

A general or specific authorization granted by the Secretary under this part:

(a) Is limited to activities involving only unclassified information and does not permit furnishing classified information;

(b) Does not relieve a person from complying with the relevant laws or the regulations of other U.S. Government agencies applicable to exports; and

(c) Does not authorize a person to engage in any activity when the person knows or has reason to know that the activity is intended to provide assistance in designing, developing, fabricating, or testing a nuclear explosive device.

§810.9 Grant of specific authorization.

(a) An application for authorization to engage in activities for which specific authorization is required under §810.7 should be made to the U.S. Department of Energy, National Nuclear

Security Administration, Washington, DC 20585, Attention: Senior Policy Advisor, Office of Nonproliferation and Arms Control (NPAC).

(b) The Secretary will approve an application for specific authorization if it is determined, with the concurrence of the Department of State and after consultation with the Nuclear Regulatory Commission, Department of Commerce, and Department of Defense, that the activity will not be inimical to the interest of the United States. In making such a determination, the Secretary will take into account the following factors:

(1) Whether the United States has an agreement for cooperation in force covering exports to the country or entity involved;

(2) Whether the country is a party to, or has otherwise adhered to, the NPT;

(3) Whether the country is in good standing with its acknowledged nonproliferation commitments;

(4) Whether the country is in full compliance with its obligations under the NPT;

(5) Whether the country has accepted IAEA safeguards obligations on all nuclear materials used for peaceful purposes and has them in force;

(6) Whether other nonproliferation controls or conditions exist on the proposed activity, including that the recipient is duly authorized by the country to receive and use the technology sought to be transferred;

(7) Significance of the assistance or transferred technology relative to the existing nuclear capabilities of the country;

(8) Whether the transferred technology is part of an existing cooperative enrichment enterprise or the supply chain of such an enterprise;

(9) The availability of comparable assistance or technology from other sources; and

(10) Any other factors that may bear upon the political, economic, competitiveness, or security interests of the United States, including the obligations of the United States under treaties or other international agreements, and the obligations of the country under treaties or other international agreements.

(c) If the proposed activity involves the export of sensitive nuclear technology, the requirements of sections 127 and 128 of the Atomic Energy Act and of any applicable United States international commitments must also be met. For the export of sensitive nuclear technology, in addition to the factors in paragraph (b) of this section, the Secretary will take into account:

(1) Whether the country has signed, ratified, and is implementing a comprehensive safeguards agreement with the IAEA and has in force an Additional Protocol based on the Model Additional Protocol, or, pending this, in the case of a regional accounting and control arrangement for nuclear materials, is implementing, in cooperation with the IAEA, a safeguards agreement approved by the IAEA Board of Governors prior to the publication of INFCIRC/540 (September 1997); or alternatively whether comprehensive safeguards, including the measures of the Model Additional Protocol, are being applied in the country;

(2) Whether the country has not been identified in a report by the IAEA Secretariat that is under consideration by the IAEA Board of Governors, as being in breach of obligations to comply with the applicable safeguards agreement, nor continues to be the subject of Board of Governors decisions calling upon it to take additional steps to comply with its safeguards obligations or to build confidence in the peaceful nature of its nuclear program, nor as to which the IAEA Secretariat has reported that it is unable to implement the applicable safeguards agreement. This criterion would not apply in cases where the IAEA Board of Governors or the United Nations Security Council subsequently decides that adequate assurances exist as to the peaceful purposes of the country's nuclear program and its compliance with the applicable safeguards agreements. For the purposes of this paragraph, "breach" refers only to serious breaches of proliferation concern;

(3) Whether the country is adhering to the Nuclear Suppliers Group Guidelines and, where applicable, has reported to the Security Council of the United Nations that it is implementing effective export controls as identified

Department of Energy

§ 810.11

by Security Council Resolution 1540; and

(4) Whether the country adheres to international safety conventions relating to nuclear or other radioactive materials or facilities.

(d) Unless otherwise prohibited by U.S. law, the Secretary may grant an application for specific authorization for activities related to the enrichment of source material and special nuclear material, provided that:

(1) The U.S. Government has received written nonproliferation assurances from the government of the country;

(2) That it/they accept(s) the sensitive enrichment equipment and enabling technologies or an operable enrichment facility under conditions that do not permit or enable unauthorized replication of the facilities;

(3) That the subject enrichment activity will not result in the production of uranium enriched to greater than 20% in the isotope uranium-235; and

(4) That there are in place appropriate security arrangements to protect the activity from use or transfer inconsistent with the country's national laws.

(e) Approximately 30 calendar days after the Secretary's grant of a specific authorization, a copy of the Secretary's determination may be provided to any person requesting it at DOE's Public Reading Room, unless the applicant submits information demonstrating that public disclosure will cause substantial harm to its competitive position. This provision does not affect any other authority provided by law for the non-disclosure of information.

§ 810.10 Revocation, suspension, or modification of authorization.

The Secretary may revoke, suspend, or modify a general or specific authorization:

(a) For any material false statement in an application for specific authorization or in any additional information submitted in its support;

(b) For failing to provide a report or for any material false statement in a report submitted pursuant to § 810.12;

(c) If any authorization governed by this part is subsequently determined by the Secretary to be inimical to the

interest of the United States or otherwise no longer meets the legal criteria for approval; or

(d) Pursuant to section 129 of the Atomic Energy Act.

§ 810.11 Information required in an application for specific authorization.

(a) An application letter must include the following information:

(1) The name, address, and citizenship of the applicant, and complete disclosure of all real parties in interest; if the applicant is a corporation or other legal entity, where it is incorporated or organized; the location of its principal office; and the degree of any control or ownership by any foreign individual, corporation, partnership, firm, association, trust, estate, public or private institution or government agency;

(2) The country or entity to receive the assistance or technology; the name and location of any facility or project involved; and the name and address of the person for which or whom the activity is to be performed;

(3) A description of the assistance or technology to be provided, including a complete description of the proposed activity, its approximate monetary value, and a detailed description of any specific project to which the activity relates as specified in §§ 810.9(b)(7), (8), and (9); and

(4) The designation of any information that if publicly disclosed would cause substantial harm to the competitive position of the applicant.

(b) Except as provided in § 810.6(b), an applicant seeking to employ a citizen or national of a country not listed in the Appendix in a position that could result in the transfer of technology subject to § 810.2, or seeking to employ any foreign national in the United States or in a foreign country that could result in the export of assistance or transfer of technology subject to § 810.7 must request a specific authorization. The applicant must provide, with respect to each foreign national to whom access to technology will be granted, the following:

(1) A description of the technology that would be made available to the foreign national;

(2) The purpose of the proposed transfer, a description of the applicant's

§810.12

10 CFR Ch. III (1–1–16 Edition)

technology control program, and any Nuclear Regulatory Commission standards applicable to the employer's grant of access to the technology;

(3) A copy of any confidentiality agreement to safeguard the technology from unauthorized use or disclosure between the applicant and the foreign national;

(4) Background information about the foreign national, including the individual's citizenship, all countries where the individual has resided for more than six months, the training or educational background of the individual, all work experience, any other known affiliations with persons engaged in activities subject to this part, and any current immigration or visa status in the United States; and

(5) A statement signed by the foreign national that he/she will comply with the regulations under this part; will not disclose the applicant's technology without DOE's prior written authorization; and will not, at any time during or after his/her employment with the applicant, use the applicant's technology for any nuclear explosive device, for research on or development of any nuclear explosive device, or in furtherance of any military purpose.

(c) An applicant for a specific authorization related to the enrichment of fissile material must submit information that demonstrates that the proposed transfer will avoid, so far as practicable, the transfer of enabling design or manufacturing technology associated with such items; and that the applicant will share with the recipient only information required for the regulatory purposes of the recipient country or to ensure the safe installation and operation of a resulting enrichment facility, without divulging enabling technology.

§810.12 Reports.

(a) Each person who has received a specific authorization shall, within 30 calendar days after beginning the authorized activity, provide to DOE a written report containing the following information:

(1) The name, address, and citizenship of the person submitting the report;

(2) The name, address, and citizenship of the person for whom or which the activity is being performed;

(3) A description of the activity, the date it began, its location, status, and anticipated date of completion; and

(4) A copy of the DOE letter authorizing the activity.

(b) Each person carrying out a specifically authorized activity shall inform DOE, in writing within 30 calendar days, of completion of the activity or of its termination before completion.

(c) Each person granted a specific authorization shall inform DOE, in writing within 30 calendar days, when it is known that the proposed activity will not be undertaken and the granted authorization will not be used.

(d) DOE may require reports to include such additional information that may be required by applicable U.S. law, regulation, or policy with respect to the specific nuclear activity or country for which specific authorization is required.

(e) Each person, within 30 calendar days after beginning any generally authorized activity under §810.6, shall provide to DOE:

(1) The name, address, and citizenship of the person submitting the report;

(2) The name, address, and citizenship of the person for whom or which the activity is being performed;

(3) A description of the activity, the date it began, its location, status, and anticipated date of completion; and

(4) A written assurance that the applicant has an agreement with the recipient ensuring that any subsequent transfer of materials, equipment, or technology transferred under general authorization under circumstances in which the conditions in §810.6 would not be met will take place only if the applicant obtains DOE's prior written approval.

(f) Individuals engaging in generally authorized activities as employees of persons required to report are not themselves required to submit the reports described in paragraph (e) of this section.

(g) Persons engaging in generally authorized activities under §810.6(b) are required to notify DOE that a citizen

or national of a country not listed in the Appendix to this part has been granted access to information subject to §810.2 in accordance with Nuclear Regulatory Commission access requirements. The report should contain the information required in §810.11(b).

(h) All reports should be sent to: U.S. Department of Energy, National Nuclear Security Administration, Washington, DC 20585, Attention: Senior Policy Advisor, Office of Nonproliferation and Arms Control (NPAC).

§ 810.13 Additional information.

DOE may at any time require a person engaging in any generally or specifically authorized activity to submit additional information.

§ 810.14 Special provisions regarding Ukraine.

(a) *Pre-activity notification requirements.* Any person beginning any generally authorized activity involving Ukraine shall provide to DOE at least ten days prior to beginning that activity a report containing the following information:

- (1) The name, address, and citizenship of the person submitting the notification;
- (2) The name, address, and citizenship of the person for which the activity is to be performed;
- (3) A description of the activity, the date it is proposed to begin, its location, status, and anticipated date of completion; and
- (4) A written assurance that the person that is to perform the activity has an agreement with the recipient that any subsequent transfer of technology or information transferred under general authorization will not be transferred to a country that is not listed in the Appendix to this part without the prior written approval of DOE.

(b) *Post-activity reporting requirements.* Every person completing a generally authorized activity in Ukraine shall provide to DOE within ten days following the original transfer of technology or information written confirmation that such transfer was completed in accordance with the description of the activity provided as required by paragraph (a) of this section.

§ 810.15 Violations.

(a) The Atomic Energy Act provides that:

(1) In accordance with section 232 of the AEA, permanent or temporary injunctions, restraining or other orders may be granted to prevent a violation of any provision of the Atomic Energy Act or any regulation or order issued thereunder.

(2) In accordance with section 222 of the AEA, whoever willfully violates, attempts to violate, or conspires to violate any provision of section 57 of the Atomic Energy Act may be fined up to \$10,000 or imprisoned up to 10 years, or both. If the offense is committed with intent to injure the United States or to aid any foreign nation, the penalty could be up to life imprisonment or a \$20,000 fine, or both.

(b) In accordance with Title 18 of the United States Code, section 1001, whoever knowingly and willfully falsifies, conceals, or covers up a material fact or makes or uses false, fictitious or fraudulent statements or representations shall be fined under that title or imprisoned up to five or eight years depending on the crime, or both.

§ 810.16 Effective date and savings clause.

(a) The regulations in this part are effective March 25, 2015.

(b) Except for actions that may be taken by DOE pursuant to §810.10, the regulations in this part do not affect the validity or terms of any specific authorizations granted under regulations in effect before March 25, 2015 or generally authorized activities under those regulations for which the contracts, purchase orders, or licensing arrangements were already in effect. Persons engaging in activities that were generally authorized under regulations in effect before March 25, 2015, but that require specific authorization under the regulations in this part, must request specific authorization by August 24, 2015 and may continue their activities until DOE acts on the request.

PART 820—PROCEDURAL RULES FOR DOE NUCLEAR ACTIVITIES

Subpart A—General

- Sec.
- 820.1 Purpose and scope.
- 820.2 Definitions.
- 820.3 Separation of functions.
- 820.4 Conflict of interest.
- 820.5 Service.
- 820.6 Computation and extension of time.
- 820.7 Questions of policy or law.
- 820.8 Evidentiary matters.
- 820.9 Special assistant.
- 820.10 Office of the docketing clerk.
- 820.11 Information requirements.
- 820.12 Classified, confidential, and controlled information.
- 820.13 Direction to NNSA contractors.

Subpart B—Enforcement Process

- 820.20 Purpose and scope.
- 820.21 Investigations.
- 820.22 Informal conference.
- 820.23 Consent order.
- 820.24 Preliminary notice of violation.
- 820.25 Final notice of violation.
- 820.26 Enforcement adjudication.
- 820.27 Answer.
- 820.28 Prehearing actions.
- 820.29 Hearing.
- 820.30 Post-hearing filings.
- 820.31 Initial decision.
- 820.32 Final order.

10 CFR Ch. III (1–1–16 Edition)

- 820.33 Default order.
- 820.34 Accelerated decision.
- 820.35 *Ex parte* discussions.
- 820.36 Filing, form, and service of documents.
- 820.37 Participation in an adjudication.
- 820.38 Consolidation and severance.
- 820.39 Motions.

Subpart C—Compliance Orders

- 820.40 Purpose and scope.
- 820.41 Compliance order.
- 820.42 Final order.
- 820.43 Appeal.

Subpart D—Interpretations

- 820.50 Purpose and scope.
- 820.51 General Counsel.
- 820.52 Procedures.

Subpart E—Exemption Relief

- 820.60 Purpose and scope.
- 820.61 Secretarial officer.
- 820.62 Criteria.
- 820.63 Procedures.
- 820.64 Terms and conditions.
- 820.65 Implementation plan.
- 820.66 Appeal.
- 820.67 Final order.

Subpart F—Criminal Penalties

- 820.70 Purpose and scope.
- 820.71 Standard.
- 820.72 Referral to the Attorney General.

Subpart G—Civil Penalties

- 820.80 Basis and purpose.
- 820.81 Amount of penalty.

APPENDIX A TO PART 820—GENERAL STATEMENT OF ENFORCEMENT POLICY

AUTHORITY: 42 U.S.C. 2201; 2282(a); 7191; 28 U.S.C. 2461 note; 50 U.S.C. 2410.

SOURCE: 58 FR 43692, Aug. 17, 1993, unless otherwise noted.

Subpart A—General

§ 820.1 Purpose and scope.

(a) *Scope.* This part sets forth the procedures to govern the conduct of persons involved in DOE nuclear activities and, in particular, to achieve compliance with the DOE Nuclear Safety Requirements by all persons subject to those requirements.

(b) *Questions not addressed by these rules.* Questions that are not addressed in this part shall be resolved at the discretion of the DOE Official.

Department of Energy

§ 820.2

(c) *Exclusion.* Activities and facilities covered under E.O. 12344, 42 U.S.C. 7158 note, pertaining to Naval nuclear propulsion are excluded from the requirements of subparts D and E of this part regarding interpretations and exemptions related to this part. The Deputy Administrator for Naval Reactors or his designee will be responsible for formulating, issuing, and maintaining appropriate records of interpretations and exemptions for these facilities and activities.

[58 FR 43692, Aug. 17, 1993, as amended at 71 FR 68732, Nov. 28, 2006]

§ 820.2 Definitions.

(a) The following definitions apply to this part:

Act or *AEA* means the Atomic Energy Act of 1954, as amended.

Administrative Law Judge means an Administrative Law Judge appointed under 5 U.S.C. 3105.

Consent Agreement means any written document, signed by the Director and a person, containing stipulations or conclusions of fact or law and a remedy acceptable to both the Director and the person.

Contractor means any person under contract (or its subcontractors or suppliers) with the Department of Energy with the responsibility to perform activities or to supply services or products that are subject to DOE Nuclear Safety Requirements.

Department means the United States Department of Energy or any predecessor agency.

Director means the DOE Official to whom the Secretary has assigned the authority to issue Notices of Violation under subpart B of this part, including the Director of Enforcement, or his designee. With regard to activities and facilities covered under E.O. 12344, 42 U.S.C. 7158 note, pertaining to Naval nuclear propulsion, the Director shall mean the Deputy Administrator for Naval Reactors or his designee.
